This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

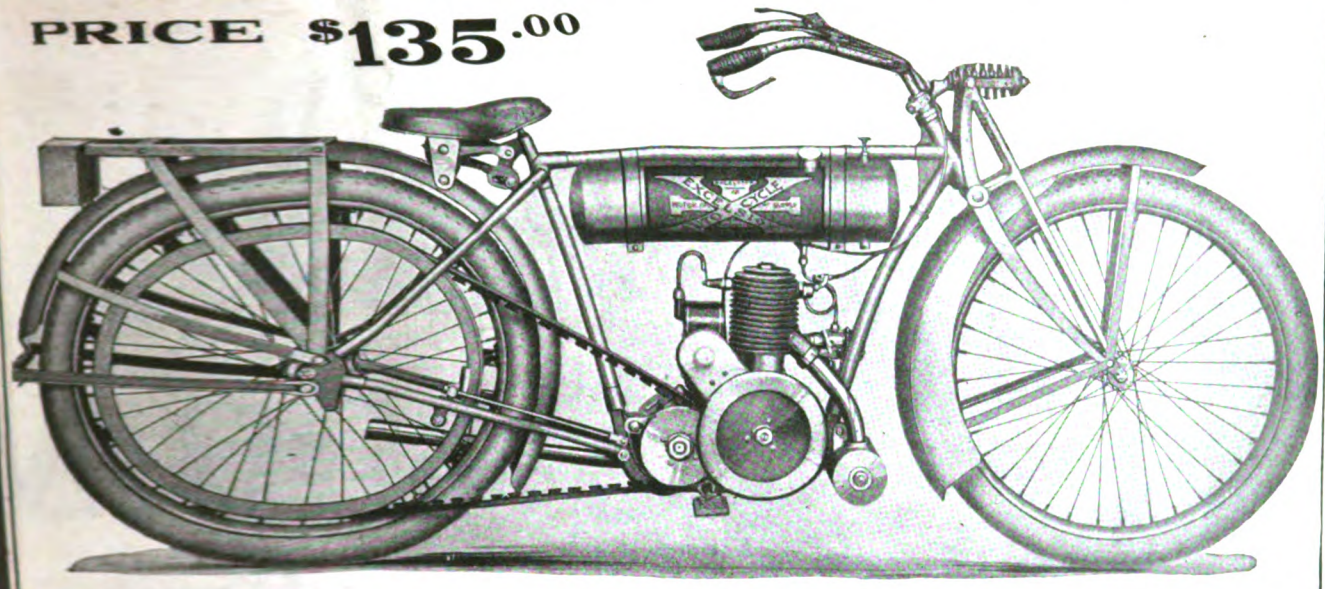
EXCELSIOR LIGHT WEIGHT IS MAKING GOOD

PRICE $135.00



AN UNSOLICITED LETTER FROM A MAN WHO BOUGHT ONE

Baltimore, Maryland, June 15, 1916.

Excelsior Motor Mfg. & Sup. Co.,
3700 Cortland St., Chicago, Illinois.
Gentlemen:

I am enclosing you herewith, Registration Card as requested.

My new Lightweight, motor No. 1583, arrived yesterday, and I must say that I am more than pleased with it. In Baltimore we have a park "Druid Hill" which has some very steep grades in it, and one grade called "Mountain Pass" is used to a great extent by the different automobile agencies for demonstrating the hill climbing ability of their respective cars. Just for fun I tried out my new Excelsior Lightweight on this hill, and much to my surprise it took it with apparently no great effort, in high gear. Several of my friends who happened to be out there remarked "it can't be done," but whether it could or could not be done, it did it.

It certainly is a fine little boat, and as soon as I get a chance to boost it, you can bet I am going to do so.

Complimenting you on this powerful little dust kicker, I am,

A satisfied customer,

Theodore H. Barber.

EXCELSIOR LIGHTWEIGHTS HAVE WON EVERY RACE IN WHICH THEY HAVE BEEN ENTERED, proving their SUPREMACY in SPEED as well is in SERVICEABILITY.

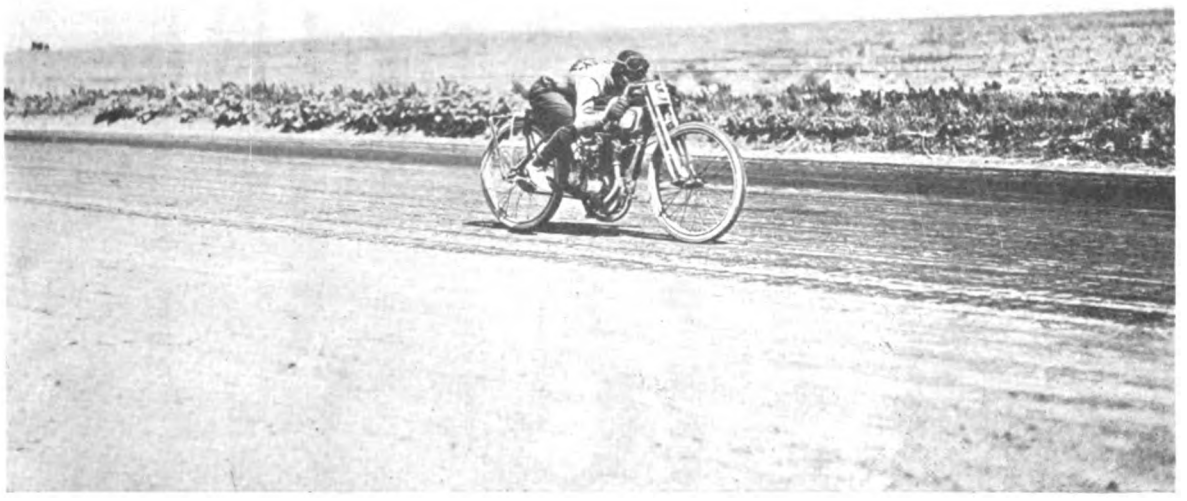
ersary in racing by winning the Dodge City 300 mile
as to Harley-Davidson consistency. Irving Janke of
during the last 200 miles, smashing all records and
crossing the line in three, forty-five, thirty-six. The
remarkable time made on the dirt track can be
appreciated when it is stated that he even broke
the record of the Tacoma speedway and lowered
the dirt track record for 300 miles ten minutes and
nine seconds. Added honors for the Harley-Davidson
were won by Ray Weishaar of Wichita on a pocket
valve and Floyd Clymer of Greeley, Colorado on
an eight valve. Weishaar would have been right up in front
with Janke had it not been for tire and plug trouble and, like all
the other Harley-Davidsons, his motor, constantly increasing in
speed, was notably faster than the big valves and eight valves
of other makes.

Weishaar finished in three fifty-five, fifty-three and more
than ten minutes ahead of the next nearest man. Any of the

You get quick results from advertisers When you mention Motor Cycle

Digitized by Google



eight valves and big valve machines following him required more than four hours.

Harley-Davidsons came out in front in the second lap and remained in front right through to the finish. The only contest for the 100 mile world's dirt track record was between Clymer and Janke, both on Harley-Davidsons.

Clymer made the new record, one eleven forty-five. This is two minutes, twenty-five seconds faster than the former world's record. The average time for Clymer was 83 1-3 miles per hour. His record for the hour was eighty-four miles.

Janke was but a few seconds behind and after their fill with gas and oil he and Clymer put up the prettiest race ever seen in America. For miles they rode side by side out in front. Janke's time for the 200 miles was two twenty-seven, twenty-two, breaking the former record five minutes and thirty-six seconds; his average speed was eighty-one and eighty-two hundredths miles per hour. For the 300 miles Janke averaged eighty miles per hour.

The decisive victory in 1916 on top of the memorable Harley-Davidson clean sweep of 1915 leaves no doubt as to Harley-Davidson supremacy.

United States Tires Win

On July 4th at Sheepshead Bay, Richard Buttlar won the 25-mile New York State Amateur Motorcycle Championship in 18 minutes and 34 seconds. Buttlar also won the 10-mile Amateur Motorcycle Championship in 7 minutes and 35 2/5 seconds. These records were made on a Harley-Davidson motorcycle equipped with United States Tires.

On the same day I. F. Jacobs won the Jack Pine Endurance Run at Grand Rapids, Michigan, on an Indian Motorcycle equipped with United States Tires, thereby winning the title of F. A. M. National Road Champion, which prize was at stake for the first time.

These records prove the amazing speed and endurance qualities of United States Motorcycle Tires both for track and road work.

If you want thorough tire satisfaction on road or track, use United States Motorcycle Tires.

Janke Leading Clymer Near End of the Race. These Two Switched Positions Several Times in the Long Grind.

THROUGHOUT the first 109 laps, the race proved to be a nip and tuck contest between Floyd Clymer and Irving Janke, both on Gray Fellows, the former being out in front for the greater part of the distance, with Wolter and Wells Bennett, on Excelsiors, providing competition of a high order for third place.

At the 100-mile mark, Clymer whizzed over the tape in 1 hour, 11 minutes and 45 seconds, clipping 2 minutes and 25 seconds from the record hung up for that distance by Carl Goudy, Excelsior, last year. He thus earned for himself the special prize of $100. The pace proved too trying for him, however, and he went out on the 110th lap.

Janke then assumed the lead and was not again headed.

THE DODGE CITY RESULTS AT A GLANCE

Position at Finish	*Make of Machine*	*Time*	*Prize Money*
1—Irving Janke	Harley-Davidson	3:45:36	$600
2—Joe Wolter	Excelsior	3:47:53	300
3—Ray Weishaar	Harley-Davidson	3:55:53	150
4—"Speck" Warner	Indian	4:16:17	75
5—Gene Walker	Indian	4:20:49	50
6—Morty Graves	Indian	4:22:11	25

Janke averaged a shade under eighty miles an hour.

Both Janke and Wolter smashed the record (3 hrs. 55 minutes, 45 seconds) for the triple century, made at Dodge City last year by Otto Walker.

VERBAL SNAPSHOTS FROM THE TRACKSIDE

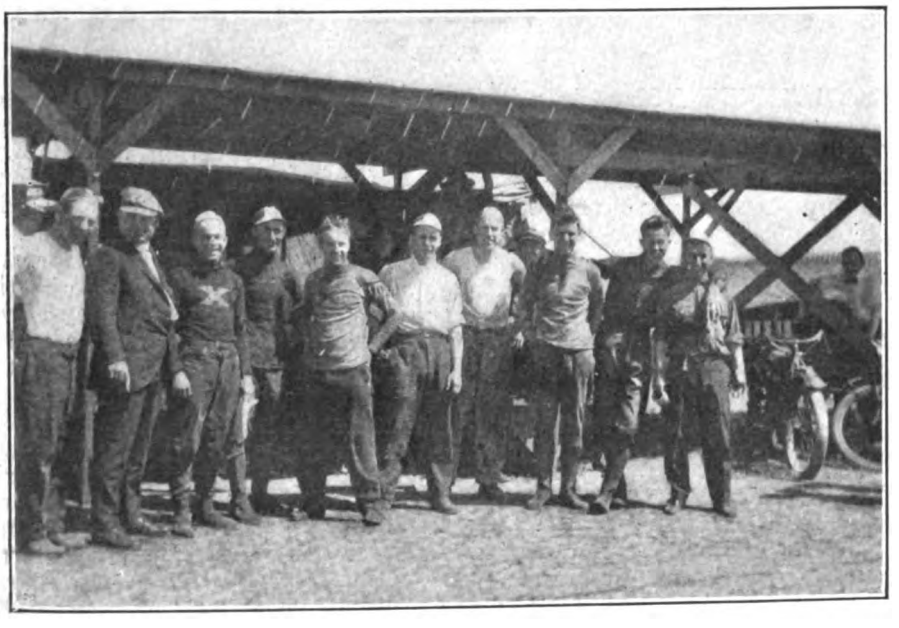
Favored with a beautifully clear sky and a cooling breeze that made things comfortable, but was not strong enough to interfere with the speed work, the crowd starts to gather at the track at ten o'clock to watch Boido, Brant and Johnson qualify in a special elimination trial, this trio not being on deck when the regular trials were staged on the day previous.

Long before the starting hour the fans begin to flock in. Shortly the grandstand is loaded to capacity, and as far as the eye can see on either side, vehicles filled with spectators are parked along the track.

Ready for Start

At 10:40 Chairman Donovan calls for lineup and Bill Ash, the clerk of the course, gives the machines the final "once over" and orders them into position for the start, with the result that there are three rows of five machines each and one of six, the riders being placed according to the showing made in the elimination trials.

Johns, who on his Indian had made a circuit of the two-mile track in 1:24 during the trials, takes his position at the pole, with Floyd Clymer, Harley-Davidson; Gene Walker, Indian; Morty Graves, Indian; and Lorenzo Boido, Excelsior, "toeing" the same mark. Then Donovan and T. J. Sullivan, the official starter, make the first circuit of the course with the riders, the actual start being made when Don Johns, going at great guns, rushes across the tape at 11:05:30 o'clock. And there's not the thickness of cigarette paper separating him from Clymer, and scarcely more than that between the latter and Morty Graves.



Pitmen and Speedsters at Excelsior Camp

Two Lag Behind

The rest of the pack shoot past together in a great cloud of dust, all except Gene Walker, Indian, who hobbles into the pit with a fouled plug, and Clarence Johnston, who has been ill for the last few days and is trailing at a comparatively slow pace.

Just 1 minute and 25 seconds elapse before Johns, at the head of the procession, but hard pressed by the Harley-Davidson riders, again rolls over the tape. But that short interval has afforded sufficient time for Walker again to straddle his red machine and take up the pace of the fastest men.

First Lap Completed

Following Johns across the line, in the order named, are Clymer and Janke, Harley-Davidson, and Bob Perry, Excelsior. The rest of the field is strung out and

whizzes by in twos and threes at second and half second intervals.

The second and third laps finish in exactly the same manner, save that "Speck" Warner draws up the pit for some minor adjustment, which is completed in the twinkling of an eye. Then they came around for the fourth time, the only noticeable change in the line-up being that Janke and Johns have changed positions, the former taking second and the latter third place. Perry now holds fourth place, with a wide enough margin to keep Graves, in fifth position, from crowding him.

All Pass Johnson

The bright orange sweater, with which Johnston out in front is clothed, seems to be the powerful magnet that is drawing the field on. Each lap they are growing nearer to that conspicuous goal, and when seven trips are made around that two-mile circuit, the crowd has lapped the sick boy. Now on the eighth turn, Joe Wolter begins to crowd Graves for fifth place. On the ninth lap, Joe has shot past Morty; and on the tenth Stokes, also on an Excelsior,

brushes with Graves for sixth, while Johnston and Warner roll slowly up to the pits for expert examination of their machines.

On the eleventh lap Perry has pushed past Johns and is beginning to crowd Janke for second place. Glenn Stokes then puts on an extra spurt and goes by Graves for sixth place. The twelfth lap—and those two Harley-Davidson leaders shoot past with astonishing smoothness, matching explosion for explosion and spurt for spurt.

Perry Retires

Then Bob Perry's machine, which has been brought so close to them in the preceding lap, fails to show up, and the report is hurried to the press stand that poor Bob stopped in the back stretch and was put permanently out of the running because of magneto trouble.

The next six laps are without incident other than that Paul Gott, Clarence Johnston and Ray Weishaar have visit the pit. The first five men—Clymer, Janke, Wolter, Johns and Stokes, in that order—

OSCAR HEDSTROM

Motor Wizard, Who Retired From Sp... His Previou...

OSCAR HEDSTROM, the motor wizard, until three years ago almost as closely associated with Indian progress as George M. Hendee himself, is back again in Springfield.

In other words, too young, too active and too much interested in motorcycles to retire. Hedstrom has once more taken up the work which made him famous throughout the motorcycle world. Thus the triumvirate which was so successful in bringing the Indian to the forefront—George M. Hendee, Frank J. Weschler and Oscar Hedstrom—is re-established.

Glad of His Return

It is safe to say that this announcement will electrify the entire trade and create unbounded enthusiasm among Indian distributors, dealers and riders, everywhere on earth where Indian machines are sold and ridden. On the other hand, many will not be as surprised over Hedstrom's return as they were when his retirement was announced. His association with the Hendee Manufacturing Co. had up to that time been generally regarded as quite permanent, and therefore his resumption of his relations will be taken by many who have their ears to the ground almost as a matter of course. There was a time, not so long ago, when it was impossible to think of the Indian without also thinking of Hedstrom, for the simple reason that his genius, particularly his wonderful knowledge of motors, was manifested in every line and every feature of the Indian motorcycle.

It is needless to say that the Indian factory is elated over Hedstrom's coming out of retirement from his Connecticut farm, to once more actively participate in designing the Indian. There is not the slightest doubt that the trade thoroughly and heartily approves Oscar Hedstrom's decision to return.

Oscar Hedstrom, born in Sweden, came to the United States when he was nine years old. After a grammar school education, he entered a watch-case factory, and soon became a first-class tool maker. Incidentally, he took up bicycle racing, winning the one and one-half mile amateur championship in Madison Square Garden in 1899 against such stars as Eddie Ball, Nat Carter, Harry Caldwell and others of that type. Then he began building bicycles, and it was not long afterwards that he started to experiment with a motor tandem, with which he won the ten-mile amateur tandem championship at the Pan-American Exposition in Buffalo, in 1907. Henshaw was his

INVINCIBLES FAVOR FALOR FOR F. A. M. PRESIDENT

BROOKLYN, N. Y., July 4.—The first club in the East to place its approval upon the candidacy of Shelby A. Falor for the presidency of the F. A. M. is the Invincible M. C. At a recent meeting, following the announcement of Mr. Falor's willingness to accept the leadership of the F. A. M. should the rank and file of the organization so desire, that club unanimously declared in favor of Mr. Falor and instructed its delegate to the convention in Providence to vote for the Akron booster.

HERROLD STARS AT THE MOUNDSVILLE MEET

MOUNDSVILLE, W. Va.—Emory Herrold, Indian, won the five-mile free for all and set a new mile record for the track at the Moundsville M. C. meet last Saturday. His time for the five miles was 6:47 and he covered the mile in 1:10 flat, beating his former mark of 1:11. Herrold rode a 4-valve Indian single.

Ritz, Indian ported, won the five-mile opening event in 6:27, with Mickels on a stock Harley-Davidson second and McCluskey, stock Thor, third. Wasmuth, Indian, carried off the five-mile novelty race in 7:11, with Ritz second and McCluskey third. J. L. Bier took the three-mile sidecar race with his Harley-Davidson combination. Foster Noble, on a similar combination, was second. Ritz came second to Herrold in the five mile free for all, and Mickels third.

THEURER BECOMES A DIRECTOR

General Manager E. W. Theurer, of the Reading Standard Co., Reading, Pa., has been elected a member of the R-S Board of Directors to fill the vacancy left by the resignation of William F. Remppis. Mr. Remppis has no longer any connection with the Reading Standard Co., of which he was a founder.

JACOBS HIGH-SCORES IN HEART-BREAKING JACK PINES GRIND OVER 800-MILE ROUTE

Hero of Many Road Contests Brings His Indian Through Purgatorial Course with Score of 975; "Hap" Scherer, Harley-Davidson, Finishes with 925 Points and Ransom Heth, Excelsior, Has Score of 811; All Other Entrants Are Eliminated by Terrific Roads

By PAUL J. BAILEY

GRAND RAPIDS, July 4.—Having covered more than 800 miles of roads which included every imaginable kind of difficulty in a most aggravated form, three dust-covered and weary riders in the Jack Pines endurance run of the Grand Rapids M. C. proved that the modern motorcycle is practically unconquerable when they finished in front of the Herald office this afternoon. The three victors are Iwin Jacobs, Indian; "Happy" Scherer, Harley-Davidson, and Ransom Heth, Jr., Excelsior.

Latest official reports give Jacobs a finishing score of 975 points; "Hap" Scherer, 925, and Ransom Heth, 811.

There were no perfect scores as every checking station along the line counted as a control, and in the face of such difficulties it was inevitable that points should be lost here and there. Jacobs emphasized his skill and experiences by bringing his score through the three days' grind with fewest penalties, thereby winning the Wilderness Trophy and first prize. The riding of Jacobs and his ability to stand the terrific strain are among the most interesting features of the contest. He mounted a rigid-frame, short-coupled model, fitted with few provisions for comfort, but excellently adapted for sand riding.

After the first day the run had become clearly a matter of the stamina and skill of the riders, for the motorcycles demonstrated that they were equal to all the punishment the men could give them.

"Hap" Scherer, whose reputation as an endurance rider has long been established, was counted on for a position well to the front and his friends will not be surprised to learn that he is in second place. Heth, however, has not figured prominently in big runs heretofore and the manner in which he took his Excelsior through is winning him general congratulations.

It is impossible to give scores for any of the other riders at this time, as they are scattered along the route. Complete scores will, however, appear in next week's issue.

FULL LINEUP OF THE JACK PINE STARTERS

The Riders, Their Mounts and Some Equipment Details

GRAND RAPIDS, July 2.—Having been fully advised concerning the regulations and the course to be followed, at a special meeting held on Saturday evening, July 1, the contestants in the Jack Pines endurance run were ready to get away in good shape at daybreak on Sunday morning, July 2. They rolled out of Grand Rapids in the following order:

Harry D. Immel, of Pittsburgh, Pa., Henderson, equipped with Berling magneto; M. Vandenberg, of Grand Rapids, Excelsior, equipped with United States tires and Bosch magneto; Tom Martin, Grand Rapids, Excelsior, equipped with United States tires and Bosch magneto; Byrne Hull, Grand Rapids, Henderson, equipped with Lee tires and Berling magneto; P. H. Peters, of Buffalo, Harley-Davidson, equipped with Firestone tires and Bosch magneto; James Long, Grand Rapids, Excelsior, equipped with United States tires and Bosch magneto; G. Von Staden, Indianapolis, Indian machine, equipped with United States tires and Splitdorf magneto; "Hap" Scherer, of Fort Wayne, Harley-Davidson, equipped with Coventry chain, Firestone corrugated tires and Remy magneto; "Warhorse" Baker, Indianapolis, Indian, equipped with United States tires and Dixie magneto; Oscar Lenz, of Indianapolis, Henderson, equipped with Goodyear tires and Berling magneto; W. M. Davey, of Detroit, Henderson, equipped with Pennsylvania tires and Berling magneto; Iwin F. Jacobs, of Dayton, Indian, equipped with United States tires and Splitdorf magneto; R. E. Heth, Jr., of Grand Rapids, Excelsior, equipped with Firestone tires and Bosch magneto; John Foster, Grand Rapids, Henderson, equipped with Pennsylvania tires and Berling magneto; W. J. Ruhle, of Albany, N. Y., Harley-Davidson, equipped with Firestone tires and Dixie magneto.

Iwin Jacobs, the High Score Man; He Got 975

SEVEN RIDERS REACH ALPENA NIGHT CONTROL

TRAVERSE CITY, Mich., July 3.—At this stage of the Jack Pines run the officials and observers were struck with wonder that any of the contestants could keep up the pace against such odds as they had to contend with. The obstacles looked simply impossible, what with swamps, corduroy roads and sand washes coming one after the other. It is recorded that when the pathfinding crew, with their sidecars, were marking the course, it took them seven and one-half hours to cover fourteen miles of today's run.

Of the ten riders who got past the noon control yesterday, only seven reached the night stop at Alpena. "Warhorse" Baker, who had shown his usual wonderful form up to that point, was one of the missing. "Bake" was put out in the mud of Mc-

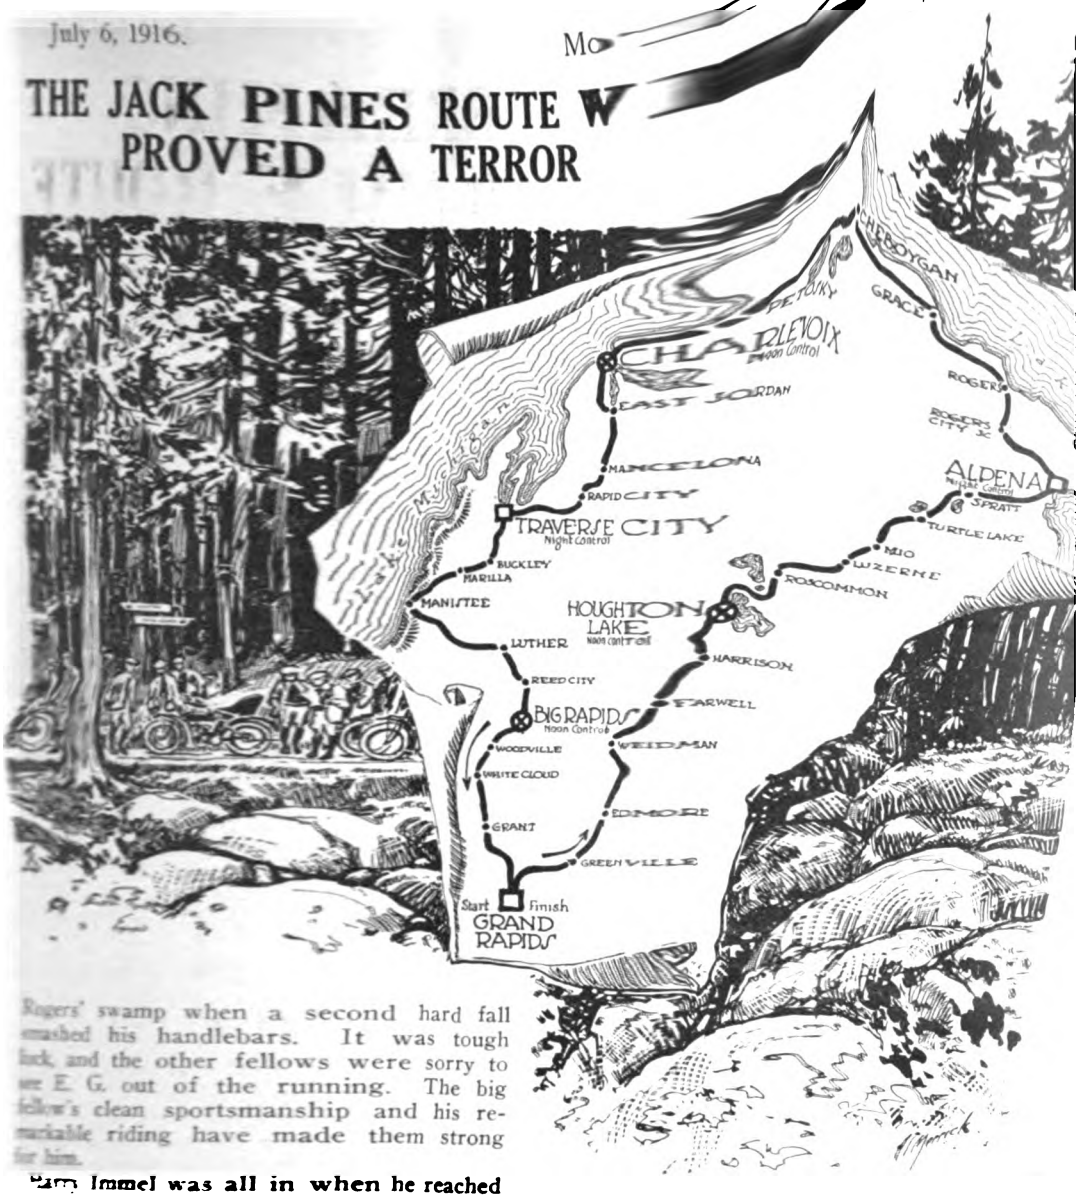
THE JACK PINES ROUTE W PROVED A TERROR



Rogers' swamp when a second hard fall smashed his handlebars. It was tough luck, and the other fellows were sorry to see E. G. out of the running. The big fellow's clean sportsmanship and his remarkable riding have made them strong for him.

Harry Immel was all in when he reached Petosky having done very little road riding since last summer. He was in no shape for training for such a grind as this and he did not start with the survivors the second day.

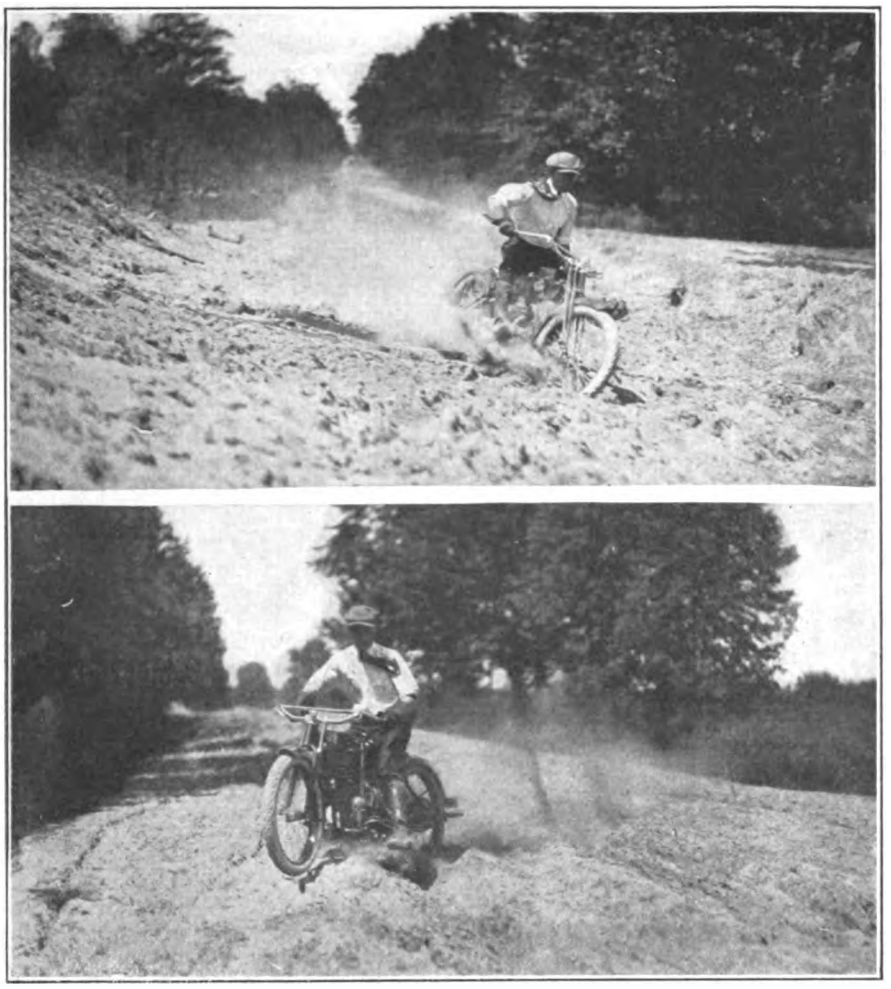
Only Four Reach Petosky

The seven riders who survived the first day only four managed to reach Petosky, the noon control today. The morning's run was another horror of swamps, corduroy and sand, and the ranks were thinned down to Jacobs, Scherer, Heth and Hull. Hull was O. K. as far as his motorcycle was concerned, but had sprained his right wrist badly during the morning, and was forced to handle his machine practically altogether with one hand. This was his throttle hand and had to do double duty.

Had Time to Spare

This handicap kept Hull somewhat late at noon, and was tiring him rapidly. The climax of the really bad stuff came just after noon, the rest of the route for the day being somewhat easier. Jacobs, Heth and Scherer breezed through the afternoon with time to spare all the way, and Hull fought gamely to stay in the contest with one hand out of commission. He was getting away with the job, too, until his rear tire rolled off the rim just outside of Traverse, and shredded the tube. He did not have an extra tube with him. He refused that darkness would descend before he could get a new tube and reach Manistee, the night control, and he was accordingly forced to give up the struggle. With Hull retired, Jacobs, Heth and Scherer were left to battle to the finish. The trio kept stubbornly on and renewed the contest the following day.

Hap Scherer, Harley-Davidson, Who Scor



Hendersons Plugging the Sand at Harrison in First Day's Course

shoulders down on the road with disconcerting suddenness.

The sand was deep and loose and powdery after several days of hot, dry weather, but they just didn't dare to skid off the road because that would often mean dropping into a ditch neck deep with ooze and water, or into a brush thicket where hair and hide and clothes would all be torn off just that quick.

All Good Roadsmen

Every man of the bunch was a real road fighter and in good trim—else he would never have dared look an entry blank in the face—and they battled hard. Of those who failed to get through to the noon control, some had plain hard luck and some had little minor troubles that ordinarily wouldn't matter much, but that put them out of the running under such tremendous road difficulties.

Von Staden was hung up several miles out, so that he was crossed off the list. Vandenberg had his mechanical oiler stick, causing considerable delay, but he kept it on the job one way and another so that he got to the noon station, though quite late.

Harry Immel slid into a mudhole about 20 miles from Houghton Lake, and went in so deep that the footboards of his Henderson were covered and the rear wheel was left spinning. Then to help matters along his gasoline tank ran dry before he got in, so that he lost another collection of valuable minutes.

Houghton Lake looked good to the riders, scenically and otherwise. A brisk breeze was kicking up little whitecaps all over the broad blue sheet of water, and a good dinner was ready at the hotel.

"Warhorse" Baker, of trans-continental fame—also he who showed 'em all how to do it with an automobile—was the first rider to arrive at the control, having a few minutes to spare. Jacobs pulled in a few minutes later with all flags flying, having just run off a hurry-up finish. He had been taking his time under the impression that he had lots of it to spare, when he woke up to the fact that he was still a long way from lunch; so he "stepped on 'er"—hard—and unwound the last bunch of miles in a burst of speed. Jake says he covered the last 16 miles in 28 minutes—and oh, such miles as they were, too.

Hull Comes In

Byrne Hull, with his Henderson, was next man in. The mileage had been deceptive to him too, as he had believed himself well ahead of time until near the finish, when he had to let out a sprint for the final stretch.

Hull had had his share of experiences, hitting two stumps, sliding off the road, and seeing a lot of country not given on the road maps.

"Hap" Scherer loomed up on the horizon next at the helm of his Harley-Davidson. A little chain trouble had held him back, but he was still going strong and ready for more.

Lost Things en Route

When Tom Martin, Excelsior, rolled in he was minus a coat and sundry other little items that had been with him at the start. The job was too much for luggage-carrier straps when Tommy hit the high spots, and they had loosened up. Scherer looked at Tom and smiled, and opined that a salvage wagon could reap a profitable harvest by following the riders, as he had seen coats, innner tubes, speedometers, spark plugs, and other little things that various riders had discarded en route as excess baggage.

H. H. Peters, Harley-Davidson, was the next arrival, and Ransom Heth, also checked with his Excelsior. Peters had bent his foot lever so that he couldn't use his brake, but said the sand made it easy to stop in a hurry anyway—all he needed think about was to keep going.

J. Long came in with the forks of his Excelsior slanting considerably to the southeast as a result of a well-meant attempt to smooth a high spot off the scenery. When he had checked out at the

VERRILL STARS AT BALTIMORE HOLIDAY MEET

Mounted on Indian, "Krazy Horse" Takes Second and Ten-Mile Events, Breaking State Records in Each; Tiemeyer Wins Two-Mile

BALTIMORE, Md., July 4.—"Crazy Horse" Verrill, of Los Angeles, mounted on an Indian, was the star of the meet held today by the Maryland Motor Association at the Gentlemen's Driving Park near Baltimore. He won both the five- and ten-mile open professional events in fine style, circling his field in the last lap in the ten-mile race.

Freddie Tiemeyer, of Baltimore, defeated Willie Denham, of Washington, in the two-mile State championship race, open to professionals, in a hard fought battle. Tiemeyer also gave Verrill a hard rub in the ten-mile open, the latter gaining a lap on him only on the last circuit of the track. Verrill hung up new State records for both *the five and* ten miles.

Clarence Lowenstein defeated Oliver M. *Shock*, both riding Indians, in a close finish in the three-mile amateur novice race. The five-mile professional sidecar race also furnished some thrills, Gus Heinz, Harley-Davidson, getting it; Carey Mears, Indian, finishing third. *The Second* and Seabrooke, Indian, also *very exciting*, Mammock and Gus Heinz, *on Harley-Davidsons*, finishing one and two. *with* Mears on the Indian, third. The *complete* summary:

Three-*mile* Amateur Novice, Stock, under 50 cu. in.—*First*, Clarence Lowenstein, Indian; second, Oliver *M.* Shock, Indian. Time, 4:08⅖.

Two *Miles*, Catalogued Lightweights, Professional—*First*, Frank Fertittia, Miami; second, W. P. Shepherd, Indian; third, R. H. Merryman, Dayton. *Time*, 3:20⅗.

Five *Miles*, Professional, Open, 30.50—First, Verrill, *Indian*; second, Freddie Tiemeyer, Harley-Davidson; *third*, Craddock, Harley-Davidson. Time, 5:50⅗.

Five-mi*le* Professional, Sidecars, Stock, 61 limit—First, *Gus* Heinz, Harley-Davidson; second, Carey *Mears*, Indian; third, A. R. Seabrooke, Indian. *Time*, 7:30.

Two *Miles*, State Championship, Open to Professionals, 30.50—First, Freddie Tiemeyer, Harley-Davidson; *second*, Willie Denham, Indian. Time, 2:25.

Ten *Miles*. Professional, Open, 30.50—First, Verrill, *Indian*; second, Freddie Tiemeyer, Harley-Davidson; *third*, Craddock, Harley-Davidson. Time, 11:53⅗.

Ten Mi*les*. Sidecar, Stock, 61 limit—First, Mammock, Har*ley*-Davidson; second, Gus Heinz, Harley-Davids*on*; third, Carey Mears, Indian. Time, 14:00⅗.

"CREVVY" BAGS EVERYTHING AT GALESBURG

Indian Speedster Wins 100 Miles With Big Lead in Spite of a Spill, and Also Takes Ten-Mile Initial Race

GALESBURG, Ill., July 4.—Leading his nearest competitors by eleven laps, Ray Creviston on his Indian came in first in the annual 100-mile race on the one mile dirt track this afternoon. His time was 1:28:46. L. S. Hadfield on a Harley-Davidson was second and Wald Korn, on an Indian, third. Creviston made no stops at the pits, but crossed the tape for the victory out of gasoline.

"Crevvy" took the lead at the first lap and gradually increased his distance from the field, lapping it time after time. A spill in the eightieth mile cut down his advantage, but he finished eleven miles to the good. The spill spoiled his chances of setting a new record for the distance. Warren Croop, Excelsior, skidded into the fence early in the race and George Filker, Indian, crashed into his machine. Filker was badly hurt while Croop was only cut slightly.

Creviston also captured the 10-mile pro. race which preceded the feature event, in 8:45. Korn was second and Croop third. Kenneth Albert, Indian, won the 10-mile amateur opening race in 9:14. The attendance was large.

VOSS AND DAVIS WINNERS IN INDIANAPOLIS

Excelsior Man Takes Feature While Indian Speedster Gets First in Five and Ten-Mile Races—Close Finish in First Event

INDIANAPOLIS, Ind., July 4.—C. W. Voss on an Excelsior, won the feature race at the Indiana State Racing Association meet this afternoon. This was a 25-mile race cut to 10 miles. Voss covered the distance in 9.10 4/5. Frank Irish, Indian, was second and Jim Davis, Indian, third. Davis led in this race for a while, but developed motor trouble, when Voss came to the front and Irish passed Davis for second position. Voss did not complete the race.

Davis won the opening five-mile race in 4:39 by about six inches from Irish. The latter led practically to 100 yards of the finish. James Kellar, Indian, was third. In the 10-mile open, Davis got a bad start but came right ahead and finished first in 8:52, with Voss second and Kellar third. Albert Blankenship, Harley-Davidson, smashed into the fence in this race and died in a few minutes from his injuries. Irish broke a chain just when he had the chance of placing and retired.

WEBB IS VICTOR IN THREE DIXIE CLUB EVENTS

ROANOKE, Va., July 4.—H. Webb, Indian, captured the five- and ten-mile pro. races at the Dixie M. C. meet this afternoon. His time was 6:27 2/5 for the five and 12:55 2/5 for the 10 miles. O. Leahr, Harley-Davidson, came first in the 15-mile pro. event, his time being 18:35 1/5. B. Johnson, Excelsior, copped the 15-mile pursuit, Webb went out for a time trial, in which he covered the distance in 1:15.

Johnson was second in all the events except the pursuit race. Webb, Leahr and Johnson all were Bosch and Goodyear equipped.

WILLIAMS TAKES ALL CARD

BOISE

BOISE, Idaho, July 4.—Albert Williams, Harley-Davidson, won all three events run at the meet in this city today. His time for the first ten-mile stripped stock was 8:50, while in the ten-mile stock equipped he came home first in 10:30. The third event, a ten-mile stripped stock, went to Williams in 9:25.

Chambers, Indian, came second in both stripped stock events, while Whitney, Excelsior, took second place in the fully-equipped race. Eddie Goodman, Harley-Davidson, was third in the stripped events, while G. Dickson took similar place in the equipped race. Williams covered the fastest mile of the day—50 seconds—in the first race.

ELEVEN FINISH WHEELING ENDURANCE RUN

WHEELING, W. Va.—Eleven contestants finished the annual endurance run of the Wheeling M. C., out of 32 starters. None of the finishers had perfect scores. There were many spills but no bad accidents. Poor roads on the return trip accounted for most of the non-finishers.

Following are the finishers: D. H. Mikels, Harley-Davidson; C. L. Cheshire, Harley-Davidson; J. P. Wasmuth, Indian; E. Herrold, Indian; Earl Braunlich, Harley-Davidson sidecar; E. R. Durkee, Harley-Davidson sidecar; D. H. Neidengard, Excelsior; H. B. Black, Henderson; Harry D. Immel, Henderson; A. C. Davis, Excelsior sidecar; Ed. Sailor, Harley-Davidson sidecar.

RAIN POSTPONES NEBRASKA CITY CARD OF RACES

NEBRASKA CITY, Nebr., July 4.—Heavy rains caused the postponement of the meet in this city today and the date for the affair has been set for July 9. Considerable heavy weather had been experienced, but all hope of holding the races was given up when this morning dawned with a downpour.

ZANESVILLE TEN-MILE GOES TO MILLER

ZANESVILLE, O., July 4.—Only one race was held here today, a 10-mile event, as the dust on the track was too heavy for further riding. This was won by Miller, Indian, in 16:00, with Greerer second and Green third. Both rode Indians.

PONTI COMES FIRST IN 10-MILE AT DOVER

DOVER, O., July 4.—The 10-mile race which formed the opening event of the Decoration Day meet here was won by Ponti, Indian, with Snyder, Indian, second and Leffel, Harley-Davidson, third. Ponti's time was 15:13.

"RED" PARKHURST COPS CENTURY GRIND AT THRILLING SHEEPSHEAD SPEEDWAY MEET

Rides Sensational Race Witnessed by Crowd of 18,000 and Breaks Otto Walker's Record at the Fifty-Mile Mark; "Red" Also Wins Two-Mile National Championship Event; Brier, Buttlar and Currie, Mounted on Harley-Davidsons, Clean Up in Four Hair-Raising Races; Farrell and Gest, Astride Indian Machines, Are Victors in Amateur Ranks

By GOSLIN

SHEEPSHEAD BAY, N. Y., July 4.—"Red" Parkhurst, astride an 8-valve Harley-Davidson, swept through the professional events, held at the Sheepshead Speedway on the "4th," like a great sorrel-topped comet, winning the Two-Mile National Pro. Championship handily, and coming home in front in the One hundred-mile race, the feature event of the day, close to record time.

Sharing the limelight with Parkhurst, "Babe" Buttlar on a pocket-valve edition of the Harley-Davidson, tore loose in the amateur races and when the smoke and roar had cleared was ten- and twenty-five-mile Amateur Champion of New York State. He also took second in the two-mile and third in the 5-mile events.

Another amateur who figured largely in the results was Joe Farrell, who on an 8-valve Indian won the two-mile championship and took second in the five and twenty-five-mile contests.

Joe Gest, 8-valve Indian, came in for notice in the ranks of the simon-pures, winning the five-mile and capturing second place in the ten and third in the twenty-five-mile.

Bill Brier, on a duplicate of Parkhurst's 8-valve, won the ten-mile and took second to "Red" in the hundred and third in the two-mile National Championships. Carl Currie, Harley Davidson, amateur, won the one-mile and copped third in the two-mile race.

The many who were rooting for their favorite sons, Chapple and Constant, had to be content with "Chap's" capturing second in the two-mile national title race.

An enthusiastic crowd of 18,000 looked on and witnessed the most successful race-meet in the history of the N. Y. State F. A. M. The assemblage demonstrated beyond a doubt the wonderful hold that motorcycle racing has on the public.

Race Treat for Visitors

Those who were there, and they came rolling in, tandem, sidecar and solo, from the far corners of the New England and the Middle Atlantic States, were afforded a rare treat, one that more than made up for the two years of disappointments and postponements at Saratoga "Sprinkles."

They saw the fastest "hundred" ever contested on the boards; they witnessed a card of events, five amateur championships and one national pro. championship and two pro. events, run off without a hitch, there being but one slight spill. They saw a Sunbeam racing auto take fire, also saw it put out. But they did not see the balloon go up—and who cared after that wonderful 100 mile race? No answer!

The opening event of the afternoon, the one-mile amateur championship brought joy to the hearts of the Harley-Davidson admirers when Carl Currie breezed home a winner, followed by Le Fosse, Excelsior, and Emil Bleecher, on a Harley-Davidson.

In the very next event the Indian followers cheered up when Joe Farrell came through to the tape sixty yards in front of "Babe" Buttlar and Carl Currie, both on Harley-Davidsons.

With "Red" Parkhurst out in front all of the way, the National Two-Mile Championship was contested, Art Chapple, Indian, second, and "Bill" Brier, Harley-Davidson, rapidly closing in, third.

Buttlar Jumps Into Lead

Then came the call for the twenty-five-mile amateur, and from the drop of the starting flag, "Babe" Buttlar, Harley-Davidson, went into the lead, gradually increasing it until he finished almost a mile in front of Farrell, Indian, and Gest, Indian.

The time was 18 minutes, 34 seconds, or somewhere around eighty miles an hour all the way. Some rolling for amateurs!

After that two racing autos, a Mercedes and Sunbeam, started warming up for a ten-mile match race, but in the third mile, opposite the grandstand, the latter car caught fire, ending the match and causing a little excitement.

Coasted Into Fourth Place

Then came a battle royal, the ten-mile pro. race, with Parkhurst going in front at the crack of the gun, and for eight miles the drone of his motor lead the field around. But something went wrong, and Brier, Fredericks and Don Barclay, all on Harley-Davidsons, went by him, Parkhurst coasting into fourth place, so great was his momentum.

In the five-mile amateur race that followed Joe Gest, Indian, came home in the lead with Farrell, a fellow wigwamite, second, Buttlar being content with third place.

The ten-mile amateur followed this, with the contestants rolling right up to the starting line without dismounting. Through a fluke on the part of Gest's handlers, he shut down on the "bell lap" while enjoying a good lead over Buttlar, who was right behind him. This won the race for Buttlar, with Gest second, and Farrell third. But after the contest Buttlar showed fine sportsmanship by turning the gold medal over to Gest, for he felt the latter was entitled to it.

Impossible to Keep Score

Then the call for the hundred-mile came. Everyone at the track sat up and got their pencils out in that futile exercise of trying to keep score. They soon left that to the officials, however, so great was the excitement. Using his old tactics Parkhurst went out in front at the start, the deep drone of his motor coming and going more often than any other contestant's, Brier hotly following in each round.

In the twelfth mile "Red" began lapping the stragglers, and at twenty miles he had

(Continued from page 22)

the entire field behind him. At this time Constant signaled trouble to the pits and came in to tighten his auxiliary tank, which had loosened.

In the sixteenth Sorensen, Thor, caused excitement when he stopped on the far side of the track with a blown front cylinder. On the thirtieth Chapple went into the pits and stayed there. The pace was so hot at this stage that a stop spelled o-u-t for a contestant, for Parkhurst had already picked up most of the field for the second time, and at the fiftieth-mile was four miles to the good, and 1 minute and 40 seconds ahead of the world's record held by Otto Walker for the distance. Wasko, Don and Bob Barclay, Fredericks, Carroll, Barnard, Hamilton and Luther were all the time riding a steady, if not a spectacular, race, and their work showed in the final results.

Lost Chance to Crimp Record

In the sixty-second mile Parkhurst sat up, signaled to his pit-men, ran past them on his next round, and came limping in on "one" in the sixty-sixth, yelling for a plug. This probably cost him the chance of hanging up a new one hundred-mile world's record.

While this was happening, Brier swept into the lead, but relinquished it to Parkhurst six miles further on, when "Red" went out freshened by his brief stop and clocked off four laps, in 1 minute 16 seconds each round.

From then on the race was all Parkhurst's, and Brier used the time to good advantage by coaching Fredericks and Bob Barclay into third and fourth place behind him.

Still Kept in Second Place

Brier went into the pits on his ninety-second mile for his first stop for gas, but had ample lead to keep second place.

Owing to the confusion growing out of the lapped riders taking the finish flag, the judges decided to let the contestants ride on until the seven places had been won, and then stop all contestants on the track. The decision came after Teddy Carroll stopped a lap too soon, and had to go out one more to capture fifth place. The race over the crowd poured out on the track to congratulate the winners.

Partial List of Equipment

The Harley-Davidson professionals used Goodyear Blue Streak tires, while the amateurs used United States tires. Both classes were equipped with Bosch magnetos. The Indian riders all used Goodyear Blue Streaks and Dixie magneto. The summaries:

One-mile New York State Amateur Championship—First, Carl Currie, Harley-Davidson; second, A. Le Fosse, Excelsior; third, Emil Bleecher, Harley-Davidson. Time, :50⅗ (71 miles per hour).

Two-mile New York State Amateur Championship—First, Joe Farrell, Indian; second, "Babe" Buttlar, Harley-Davidson; third, Carl Currie, Harley-Davidson. Time, 1:30⅘ (79 miles per hour).

Two-mile F. A. M. National Professional Championship—First, "Red" Parkhurst, Harley-Davidson; second, Arthur Chapple, Indian; third, Bill Brier, Harley-Davidson. Time, 1:19⅕ (90 miles per hour).

Twenty-five-mile New York State Amateur Championship—First, "Babe" Buttlar, Harley-Davidson; second, Jos. Farrell, Indian; third, Jos. Gest, Indian. Time, 18:34 (80 miles per hour).

Five-mile New York State Amateur Championship—First, Joe Gest, Indian; second, Joe Farrell, Indian; third, "Babe" Buttlar. Time 3:29⅘ (86 miles per hour).

Ten-mile Professional—First, "Bill" Brier, Harley-Davidson; second, "Curly" Fredericks, Harley-Davidson; third, Don Barclay, Harley-Davidson; fourth, Geo. Hamilton, Indian; fifth, I. W. Barnard, Indian; sixth, Bert Sayer, Harley-Davidson; seventh, Fred Luther, Excelsior. Time, 6:44 (89 miles per hour).

Ten-mile New York State Amateur Championship—First, "Babe" Buttlar, Harley-Davidson; second, Joe Gest, Indian; third, Joe Farrell, Indian. Time, 7:35⅗ (80 miles per hour).

100-mile Professional—First, Red Parkhurst, Harley-Davidson; second, "Bill" Brier, Harley-Davidson; third, "Curly" Fredericks, Harley-Davidson; fourth, Bob Barclay, Harley-Davidson; fifth, Teddy Carroll, Indian; sixth, Joe Wasko, Harley-Davidson; seventh, Fred Luther, Excelsior. Time, 68:13⅘ (88 miles per hour).

TIRE MEN ON THE JOB

Firestone tire interests were taken care of by Charles Speaks and Stewart Slosson, the latter being on from the Pacific Coast for a short Eastern visit.

Among the United States tire coterie were J. J. Hanse and George W. Shapcott, who presented "Red" Parkhurst with the monster cup donated by their firm to the 100-mile winner.

At the Right Is a Glimpse of Motorcyclists Arriving at the Sheepshead Bay Speedway. Below Is a Good View of the Grandstand and the Board Straightaway.

PENN STATE CLUBS ENTERTAINED BY NEWARKERS

NEWARK, N. J., July 4.—Three days of good fellowship were enjoyed by the Motorcycle Club of Philadelphia and the Keystone M. C. of Harrisburg as the guests of the New Jersey M. C. on July 2-3-4. The entertaining by the local club began on Sunday, July 2, when the New Jersey M. C. rode down to meet the Pennsylvanians at Trenton, escorting them to their club house where the visitors were royally welcomed.

On the following day Fred Cordes piloted a big delegation around New York City on a night-seeing tour and when they returned to Newark the local club held a moonlight run—moonless would be more accurate—to Olympic Park, where all sat down to a big "feed" and witnessed the circus. The afternoon of Independence Day was spent at Sheepshead Bay and a trip to Coney Island was made in the evening. There were more than sixty in the party.

HONOLULU M. C. MAKES AN AUSPICIOUS START

HONOLULU, H. I.—The Honolulu Motorcycle Club came into existence June 9th at the store of the Honolulu Cyclery, which will be its headquarters until the organization needs a home of its own. The club aims to promote race meets, endurance runs and pleasure outings and to work for the observance of the traffic ordinances and other road regulations. Later an effort will be made to protect the members of the club by giving them legal assistance and also the best medical aid in case of sickness. Attorney Leon Strauss, who stands high in legal circles here, will advise the riders in matters of law and Major Van Poole, of the U. S. Army, will watch over their health.

During the meeting soft drinks and other refreshments were served by the Honolulu Cyclery and later the members enjoyed a moonlight ride.

The charter list of the new club will be kept open till August 9 and the member who brings in the most new riders prior to that date will receive a golden insignia of the club. The officers: D. C. Mitchell, president; W. B. Ferry, vice-president; "Cannon-Ball" Fisher, secretary-treasurer; C. J. Willetts, B. B. Gramberg, Gus Labude, Oscar Apana and Y. Muto, board of directors; I. Yoshikawa, S. E. Klemme and T. S. Nott, finance committee.

GOOD RECORD FOR HAVANA POLICE INDIANS

SPRINGFIELD, Mass.—Rene DeZaldo, who represents the Indian in Havana, Cuba, was a recent visitor to the big plant of the Hendee Mfg. Co., in this city. Señor DeZaldo gave a rather remarkable record of the police Indian mounts which were installed in Havana last fall; four of these had come through till May without a tube or tire change.

The four machines now adopted by the Havana police are constantly in use, one set of traffic officers riding them from 4 p. m. till midnight and the other set taking them from midnight till 8 a. m. A fifth machine is used by Lieutenant Alvarez. Señor DeZaldo stated that tobacco growers in Cuba were not as propsperous this season as in previous years by reason of the European war cutting off a part of their market. Sugar growers, he said, were doing well. Cuban roads are mainly lime and are very dusty, but in the city of Havana, asphalt streets are laid.

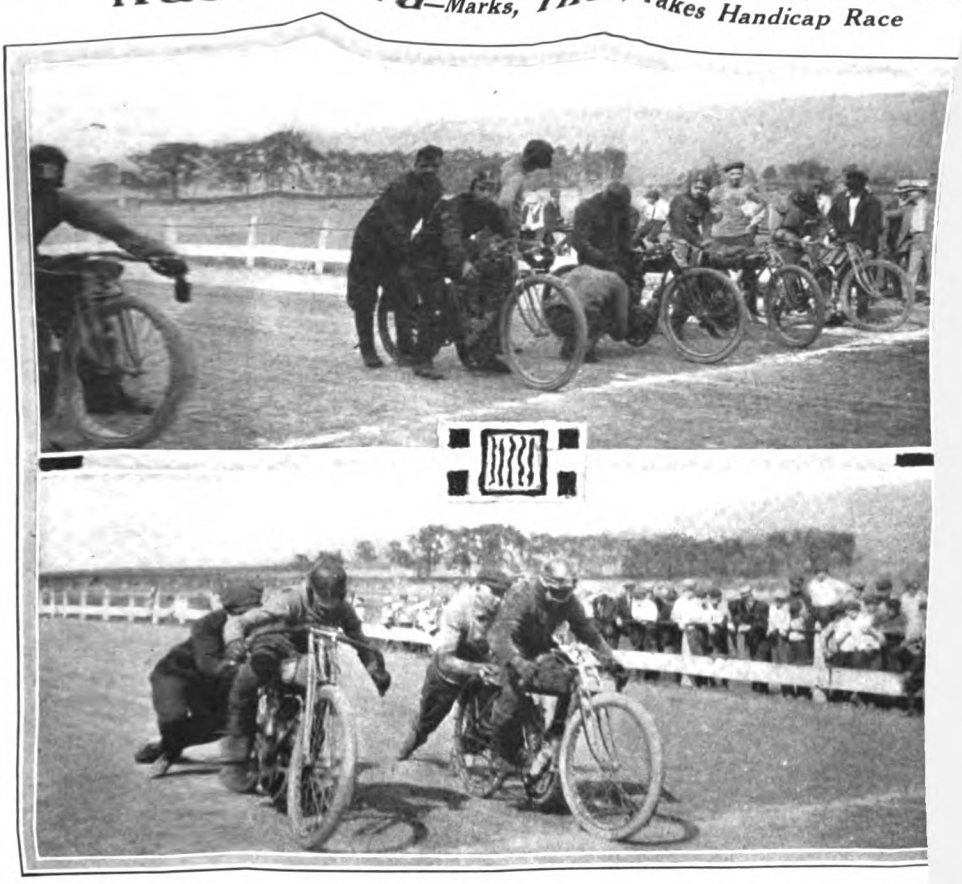
MATHEWS TAKES FIRST HONORS AT ALTOONA

Indian Crack Wins Five and Fifteen Mile Events, and Sets New Track Record—Marks, Thor, Takes Handicap Race



Top, Tuning Up at Start of Fifteen Mile Pro. Race; Below, Marks on Thor (at L and Mathews on Indian in Three Mile Match

ALTOONA, Pa., July 2.—"Shorty" Mathews, Indian, carried off first honors in the five pro. mile and 15 mile races at the meet of the Altoona Motorcycle Racing Association yesterday. He also set a new record for the track for one mile, and won a match race against Marks, Thor. "Shorty" likewise came second in a five-mile handicap event, the fifth on the program. This was won by Marks.

There were six starters in the opening event, the five-mile pro. race—Mathews, Marks, Schmidt, Allison, Albright and Boreland. Mathews took the lead, and was never headed. The order of finish was Mathews, Allison (Pope), Albright (Indian). Time, 5:57.

In the time trials, Mathews covered the mile in 1:08 flat, cutting the former record made by Maldwyn Jones by ¾ of a second. The fifteen-mile pro. race brought out "Shorty," Marks, Williams, Keys, Bor and Allison. Marks led for a while, skidded and came off, giving Mathew first place. Williams and Allison took which affected their position in the the former putting his mount out of mission in the process. The finish Mathews, Marks, Boreland.

The Mathews-Marks match was and-neck for the first mile, after "Shorty" pulled ahead gradually, and in 3:40. Marks went to the pits i last lap. In the five-mile handicap judges placed Mathews and Marks a quarter, Albright and Boreland on sc and Schmidt and Allison at ⅜. A end of three laps, Marks went to the with Mathews second and Allison c up on "Shorty" steadily. Marks fi with a good margin, with Mathews s and Allison third. Time, 6:17.

BIG GAINS IN F. A. M. RANKS

WESTBORO, Mass.—F. A. M. membership statistics for the month of June show 334 affiliated members gained, 106 unaffiliated and 329 renewals. Massachusetts led with 82 affiliated, 17 unaffiliated and 43 renewals, while New York second with 32 affiliated, 16 unaffiliate 53 renewals. Main, South Dakota, Maryland, District of Columbia adde member apiece, each being a renewal.

PAY 29TH REWARD

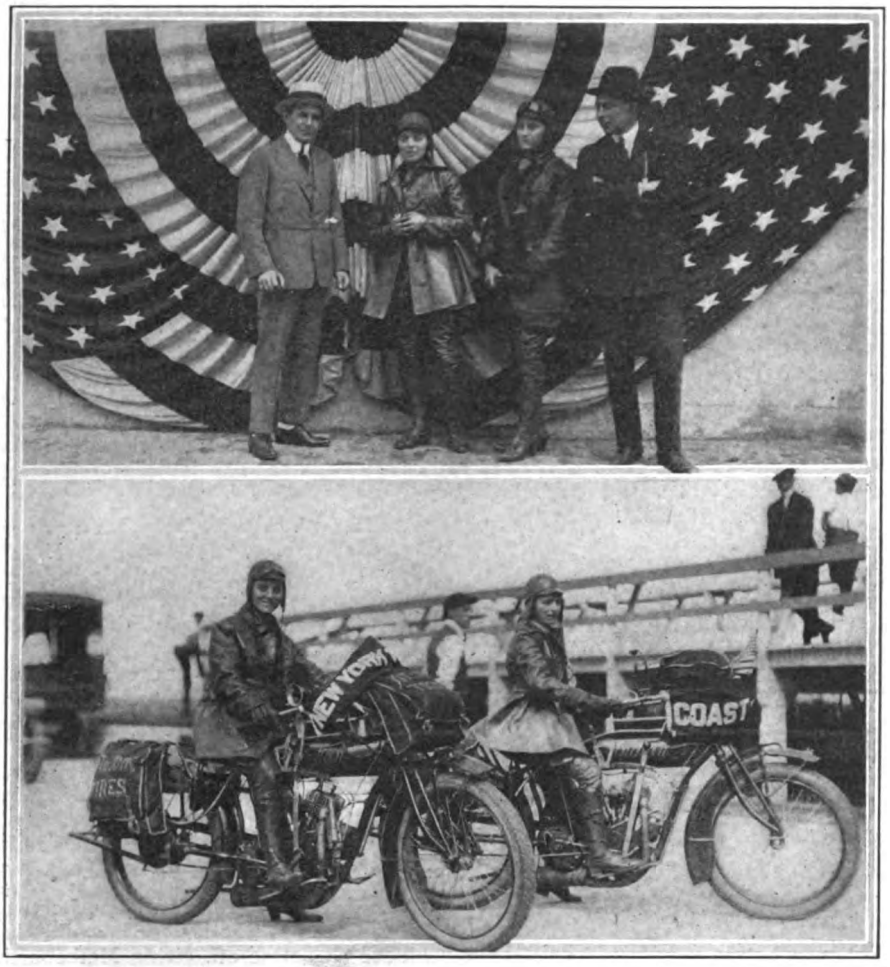
NEW YORK GIRLS START TOUR TO COAST

Misses Adeline and Augusta Van Buren, Mounting Individual Indians, Begin 3,800-Mile Trip; Expect to Average 100 to 150 Miles a Day on Their Way to the Pacific



Top, Charles E. Speaks (Left) and Stewart Slosson, of Firestone Forces, and the Misses Van Buren; Below, Ready to Start on Their Transcontinental Trip from Sheepshead Bay Speedway—They Use Firestone Tires

NEW YORK, July 5.—The first motorcycle ride from coast to coast ever attempted by women on individual machines started July 4th from Sheepshead Bay, when two New York City girls, Miss Adeline Van Buren and Miss Augusta Van Buren, tackled the 3800-mile test on Indians. They expect to ride from 100 to 150 miles a day through July and August and return to New York in time for the opening of school when Miss Adeline Van Buren will resume her duties of teaching in the New York City schools and her sister will return to her position of correspondent in a business office.

This ride grew out of their strong interest in preparedness and National efficiency and is undertaken to show that the gentler sex may be relied upon to perform many duties ordinarily expected from sterner hands. They have in mind such a nerve-trying task as despatch carrying in time of war, and, having become proficient riders in the past three years, decided to undertake a trial for which they had had some preparation.

They were born and brought up in New York, attending the elementary and high schools of Manhattan. Regarding their outdoor life Miss Adeline Van Buren, who is the directing spirit on this trip, says:

"From childhood we have always been interested in athletics. My father trained us in all the different sports. When I was only seven we had a punching bag and boxing gloves and were taught to box and wrestle with my brother.

"Later we participated in short distance speed running. My sister is an exceptionally clever ice skater. My favorite sport was swimming. Each year we had a different fad, taking up canoeing and horseback riding in turn. Naturally we finally turned to motorcycling. It has supplanted all other sports and now reigns supreme as it has for three years."

For the road they have adopted a riding dress consisting of leather coats, riding breeches and leather leggings. The Misses Van Buren are two years apart in their ages, Miss Adeline being 22 and Miss Augusta 24.

Both are refined in appearance and they expect to show the brothers and fathers of other girls that ladies can ride and still not lose their most valuable asset, their femininity.

The motorcycles used by the Misses Van Buren are both equipped for the cross-country tour with Firestone tires, of which the fair riders speak in the most enthusiastic terms. "We are very well satisfied with our mounts and their equipment throughout," commented Miss Adeline, "but we feel that our tires deserve special mention. We have selected them because of what we consider their ideal combination of all the qualities that should be found in tires that are going to be subjected to very hard usage."

PINEAU ANNEXES FEATURE AT HAMILTON

HAMILTON, O., July 4.—C. F. Pineau, Flying Merkel, won the 25-mile pro. feature in today's meet, his time being 33:54. E. Streifthau, Indian, was second. L. S. Taylor, Indian, was injured in a collision with Maldwyn Jones, Harley-Davidson, and had his leg broken. He was leading when the accident occurred.

The 10-mile pro. race went to Streifthau in 13:31 with Jones second and "Doc" Back, Excelsior, third. Lee Taylor, Indian, won the second event, a five-mile pro., in 6:18 with Maldwyn Jones second and Pineau third.

COLE STARS AT COSHOCTON MEET ON JULY 4

COSHOCTON, O., July 4.—Cole, Indian, captured the 10 and 15-mile pro. races at the local half-mile track today. His times were 13:22 and 20:36 respectively. Cupps, Excelsior, was second in both events. Sprague, Indian, took third money in the 10-mile, while Berlin, Indian, took a like place in the longer event.

In the country riders five-mile, Gunnion, Indian, won, with Ross, Pope, second, and King, Indian, third. Time, 7:16.

DAY, ON POWERPLUS, BEATS SPECIAL AUTO

TACOMA, Wash., July 4.—Thirty thousand spectators cheered the victory of Ray Day, Indian Powerplus with full equipment, over W. Aubry on a fast automobile at the Speedway today. Day was given a one lap handicap. He made four laps of the two-mile track at the rate of 75 miles per hour.

$1,000 PURSE FOR DETROIT 200-MILE RACE.

DETROIT, Mich., July 3.—A two hundred mile relay race, two men to a team, will be staged by the Interstate Racing Association Company on the local track here on July 9. One thousand dollars in prize money will be hung up, and there will be three five-mile heats preliminary to the feature. Many of the prominent factory riders are expected to participate, and the promotors expect to realize a large crowd as a result of the live-wire publicity work now under way.

NEW MOTORCYCLE CORPS OF 71ST A CRACK SQUAD

Well-Officered and Completely Equipped Body of Riders Attached to 71st Regiment, N. Y. N. G., Are Prepared to Demonstrate Motorcycle's Value in War Service

NEW YORK, July 1.—As announced briefly in last week's issue of MOTOR CYCLE ILLUSTRATED, the 71st Regiment of the New York National Guard enjoys the distinction of organizing the most completely-equipped automobile and motorcycle machine gun company to be sent to the Mexican border. Thanks to the enthusiasm and intelligently directed energy of Captain Ernest Schroeder and Lieutenant Hoffman Nickerson, the State of New York will be represented at the front by a machine gun company consisting of four officers and fifty-three enlisted men, with no less than seventy-one motorcycles, including sixty-three solo machines and eight vans. At least four, and possibly eight of the motorcycles will be fitted with machine guns. In addition, the company will be equipped with four forty horsepower lightly armored automobile roadsters.

Only High Class Men

The organization of this company offers a splendid opportunity for patriotic riders who wish to enlist in the country's service. There is only a limited number of vacancies, and Captain Schroeder desires to fill these with as high-class men as he can possibly find. Although orders to leave for the front are momentarily expected, there may be still time for enlistment and those wishing to do so should call immediately at the Seventy-first Regiment Armory and ask for Captain Schroeder or Lieutenant Nickerson.

Firmly convinced of the possibilities, in actual warfare, of the motorcycle machine gun company, and despite the fact that no provision is made by the State or the Government for furnishing cycle equipment for such a company, Captain Schroeder and Lieutenant Nickerson in a few hours raised sufficient money to purchase seventy-one machines. Through Lou Gutterman, who is a member of the company, and who will accompany it to the front as First Sergeant, the order was placed with the Reading Standard Company and all the machines have already been delivered. The eight vans will be used to carry ammunition and extra gasoline and oil. The solo machines will serve as escort for those carrying the machine guns and their riders will be equipped with a pistol, also a rifle strapped to the machine to be used in the event of fighting afoot.

The company will consist of four officers and fifty-three enlisted men as follows: Captain, first lieutenant, two second lieutenants and the following non-commissioned officers,—First sergeant, supply sergeant, chief mechanic, two mechanics, five sergeants, six corporals, two cooks and two buglers, together with eight first-class privates and twenty-four privates. Inasmuch as this is the first completely organized company of its kind, and as the necessity of motorcycle machine gun companies is almost sure to be demonstrated, the members of this company have an excellent chance for advancement in the direction of commissions in the other companies which are likely to be formed later on.

Among the qualifications for enlistment are the following: A height of at least five feet six inches and weight at least 130 pounds; a grammar school education is required, and high school graduates and college men are preferred. Applicants must be experienced riders or chauffeurs and mechanics, and otherwise qualified to pass the regular army examinations.

Those who make up this new company will be splendidly officered. Captain Schroeder is an ex-Army man of eighteen years' experience and ten years as a commissioned officer. He has seen service in the Philippines and also the Spanish-American war.

Lieutenant Nickerson, Assemblyman representing the 27th District of New York City, is a Harvard graduate, a motorist and well known tennis player and general athlete. He was connected with the Boston First Corps Cadets and spent last summer at the Plattsburgh Camp. Both are splendid fellows and determined to make a success of their new company.

TO BUILD NEW DIAMOND CHAIN PLANT

Indianapolis Company Will Erect Building of Four Stories With 150,000 Square Feet of Floor Space on Recently-Acquired Tract

INDIANAPOLIS, Ind.—The Diamond Chain and Manufacturing Company announce that they will immediately begin the erection of a complete manufacturing plant on the six-acre tract of land which they acquired four years ago, located on Kentucky avenue, six blocks from the Soldiers and Sailors Monument in Indianapolis.

The plans contemplate a concrete structure containing four stories with 150,000 square feet of floor space. The main building will be 380 feet by 60 feet with two "L's" 100 feet long, making the entire frontage 700 feet. The additions will be the powerplant and auxiliary buildings.

The buildings and new equipment will double the present plant and capacity, which will be operated intensely until the new plant is completed, making no break in present production, which is being rapidly increased over the capacity during the past few months.

The plans, specifications, engineering and construction will be done by Westinghouse, Church, Kerr & Company, W. I. Ballentine acting as consulting engineer for the Diamond Chain and Manufacturing Company.

F. A. M. ENDURANCE RUN IS SCENIC RIDE

Good Roads Prevail on Practically All of 550-Mile Two-Day National Contest from Albany to Convention City—Schedule of 22 Miles Per Hour Decided Upon

By D. R. HOBART
Pathfinder, F. A. M. National Endurance Run

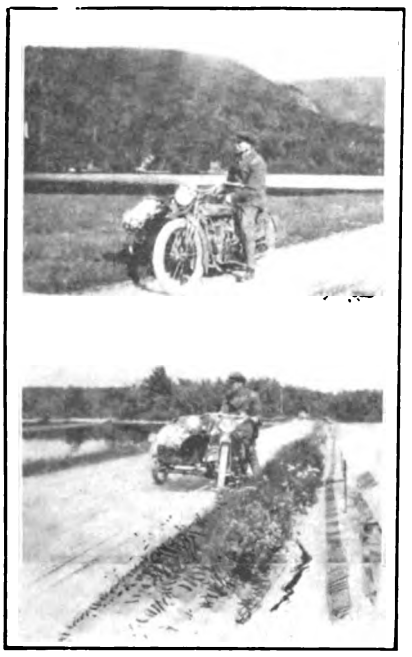
PROVIDENCE, R. I., July 2.—Final decision has been made as to the course, controls, etc., of the F. A. M. National Endurance Run from Albany to this city on July 24 and 25. Several alterations of the course have been made, but the roads, with but few exceptions, are good, and there will be no difficulty in adhering to the 22-mile per hour schedule which will prevail throughout. Taking in the Berkshires and the White Mountains on the first day, and the New England coast on the second, it is a scenic ride par excellence.

Instead of going north from Greenfield, Mass., through Brattleboro and Bellows Falls, Vt., the run will continue as far as Bernardston on the original course, then pass through Northfields, Hinsdale and Winchester to Keene, N. H. and thence northward to Newport via Gilsum, Marlow and Lempster. The night stop will be at North Conway, N. H., instead of Fryeburg as originally laid out.

Albany to Pittsfield

The start will be made at Albany from the market place, at 4 a. m. on Monday, July 24. The first leg of the morning course will be to Pittsfield, Mass., over good roads. It might be noted right here that this route is a standard automobile "trail" and is marked with a red band on trees and poles at short intervals, so that the rider merely has to "follow the red" to get to Pittsfield. Past Lebanon Springs, the Taconic Mountains are ascended and the main part of Pittsfield is passed through with the first control at the Allyn Farm gateway, two miles out. This control will be in charge of J. A. Foizie, the Harley-Davidson man in Pittsfield, and his aides. The distance is about 37 miles.

The second leg will be to North Adams and east to Greenfield, 58 miles. The section to North Adams is macadam, generally good, passing Pontoosuc Lake, with an ascent of Mt. Greylock and fine views all the way. From North Adams the road leads over the Hoosac Mountain up a "roller coaster" ascent of about 5 miles,



Top, at Crawford Notch, Control on First Day; Below, Passing Moose Pond

easily taken on top by solo mounts. This is followed by a descent of nearly 10 miles, through the Berkshires. The turns are sharp in this section and care must be taken in negotiating them. Charlemont, Shelburne Falls and Shelburne are then passed through and there is a check at the square in Greenfield.

From Greenfield to Keene, the next leg, is 38½ miles over fairly good roads. This section is prominently marked with a blue band. The cities of Bernardston, Northfield, East Northfield, Hinsdale, Winchester, Westport and East Swanzey are passed through and the control of Keene will be at the railroad station on Main street. This check will be in charge of C. C. Wilber, Harley-Davidson agent. From Keene, the riders will pass to Newport, noon control, 35½ miles. The control will be at the town hall. Luncheon will be at Child's restaurant, opposite the control, and will cost 35 cents.

The first leg in the afternoon will be to Franklin, 34 miles, passing Sunapee Lake. Pick up and follow the black to Potter Place (22 miles), then follow green and blue to Franklin. Check will be at the Franklin garage, in charge of C. P. Stevens. From Franklin, the White Mountain Trail will be followed through Hill, Bristol, past New Found Lake, Plymouth, into the White Mountains over rolling grades with good roads. A check will be established at the Old Man of the Mountain, 59 miles, and time will be allowed to see this wonder of Nature. Continuing the famous Echo Lake will be passed on the right, past the Twin Mountain House and through the Bretton Woods, all fine roads. A control will be located at the Crawford House, just above the Crawford Notch, 3 miles beyond Bretton Woods station.

Through Crawford Notch

At the Crawford control, brakes will be examined, as the descent through the Notch is along winding roads with hairpin turns, along a deep ravine. Caution is desirable in traversing the Notch. The route, also marked by sign-posts and tree bands, continues through Bartlett, Glen, and Intervale to North Conway, N. H., the night stop.

...MC OF CO-OPERATIVE DEALERS' ASSOCIATION OF CHICAGO

...dies, but the Cameraman Could Only Get Those Seen Above. The Woods Were Full of the Others

Digitized by Google

The control here will be at the Sunset House. Dinner, night's lodging and breakfast have been arranged for at the Sunset House, the cost in all being $1.50 per head. This ends the first day's run, 310 miles. Arrival will be about 7 p. m.

The start will be made at 8 a. m. on Tuesday, July 25, for Providence, R. I., 240 miles. The first leg will be through Redstone, East Conway and Fryeburg to Bridgton, 25 miles, with a check in that town, then on to Naples, Me. There is a rough stretch of several miles—real endurance stuff—near Naples. The contestants will pass Moose Pond and Long Lake en route. From Naples, the route avoids the main highway (to Poland Springs) and passes through South Naples, (sign "Portland") and around the west and south shores of Sebago Lake to Standish, Gorham and Westbrook. The roads are varying in this stretch, but are mostly good. Portland is 70 miles from North Conway. The Portland control is at the Oaks, opposite the Power House on Forest avenue. It is in charge of E. G. Haggett, Indian agent.

Leaving Portland, the main automobile route to Portsmouth, N. H. will be followed, with the exception of a detour to Old Orchard Beach, through Saco and Biddeford, Kennebunkport, Wells, Ogunquit, York Beach, York harbor and village, Kittery Beach to Portsmouth, the noon stop. A control will be established here by members of the Bay State M. C. of Boston. The run will then continue to Newburyport.

From Newburyport, the run will continue through Rowley, Ipswich, South Hamilton, North Dublin, Beverly, Salem, Swampscott, Lynn and Cambridge to Boston. The Boston control will be at the Harvard bridge, as arranged at present, under charge of George Holden and the Bay State M. C. From this control the run will pass along the Fenway, a picturesque section of the Hub, and ride to Providence, 50 miles away. All roads from Portland to Providence are good.

It is suggested that contestants have plenty of oil during the White Mountain section of the trip, as considerable hand pumping may have to be done. Through this district, and also on the second day's run, there will be no lack of fuel stations, but oil stations are not so numerous.

Chairman Swenson and the writer covered this course with a sidecar at an average speed for the 550 miles, of 27.6 miles per hour, so that the regulation 22 miles per hour will not be difficult to sustain at any point of the course. Route maps of the run will be issued by Chairman Swenson to all contestants, and the Chairman will personally oversee the start at Albany on July 24.

CONVENTION OFFICIALS HAVE BUSY WEEK

Endurance Run and Tours Chairmen Are Right on the Job and Entry Blanks Will Soon Be Ready—Crown Hotel Is Headquarters

PROVIDENCE, R. I., July 4.—During the past week, B. A. Swenson, chairman of the general committee for the F. A. M. convention, has been very busy. In the early part of the week, in company with D. R. Hobart, of **Motor Cycle Illustrated,** he covered the course of the National Endurance Run and arranged details as to controls, while during the remaining three days he has been busy with badge-makers and printers. The entry blanks for the big run are now being printed and will be distributed in a few days.

Chairman Swenson has appointed Clarence J. Loftes to be chairman of the endurance run committee, with headquarters at 522 Broad street. Mr. Loftes urges all who desire to enter to do so at once, as everything must be in hand by July 20 and the intervening time is short.

The result of the pathfinders' run over the course has been that several parties from this city have gone out to follow in their footsteps, among these being Edward Lutz, manager of the Motorcycle Supply Co. in Pawtucket. Lutz with seven others left on July 2 with a camera and will show some good pictures of the scenery all along when he returns. The party returned this afternoon.

Jes Campbell, who has charge of the touring parties, has written that entry blanks will be ready this week. He reports that Hal Noyes in Springfield, and Elliot Holton, in Newark, N. J., are making good progress in arranging details. Lightweights will be included in the tours, and not in the endurance run.

Miss Margaret Gast, the noted motorcyclist, visited Chairman Swenson yesterday, and the outcome will probably be some form of entertainment by her for the convention Friday visit to Rocky Point.

The Crown Hotel will be official F. A. M. headquarters. Secretary G. B. Gibson, who was in the city last week, has consulted with Chairman Swenson, and a large room in the Crown hotel has been arranged for, off the lobby with entrance on a side street. This will be the headquarters room. A grill room in the basement will be fixed up for the use of members who desire a less expensive place than the regular dining rooms, and one where they will be more at home.

The B. F. Goodrich Company is now getting out a special map of the course.

SWENSON GIVES ENDURANCE RUN RULES

Chairman of F. A. M. Program Announces Two Classes for Albany-Providence Contest on July 24 and 25—Entry Fee Is $5

PROVIDENCE, R. I., July 3.—B. A. Swenson, chairman of the general committee for arranging the F. A. M. Convention, announces the following general rules for the National Endurance Run of July 24 and 25, Albany to Providence:

There will be two classes, amateur and professional. The start will be made from Albany at 4 a. m. with four riders despatched every minute. Western Union time will be official. The schedule will be 22 miles per hour. Each contestant will be credited with 1,000 points at the start from which will be deducted any penalties inflicted. An allowance of two minutes either way will be made for variation of watches.

Penalizations

Penalizations will be: one point for each minute early or late at each control; if over 60 minutes late at any control, two points for each minute late. Checking stations and controls will be marked by a blue flag with F. A. M. and Providence emblems thereon. Controls and checking stations will close 60 minutes after last entrants are due. If contestants arrive after checking station or control is closed, authentic report must be secured from reliable party at control or check, which shall include time, location and signature, address and two witnesses. Any contestant will be disqualified who uses other than the motive power of his machine or his own muscular energy.

Contestants are earnestly requested to

THIS IS CLAFLIN'S HIGH PERCENTAGE TEAM

Salt Lake City, Utah, Indianites Who Carry Chieftain Lon's Badge in Commercial League Baseball Series. They Are Now in Second Place, with Rating of .667

Digitized by Google

comply with rules of the road and accord all due respect to the rights of others, and it is assumed that the riders will exercise the best judgment in the use of the open muffler, etc. These rules are supplementary to the rules of the F. A. M.

Entries close at 12 noon on July 20. The fee is $5. Post entries will be received by the chairman of the endurance run committee not later than 12 midnight July 23-24. The post entry fee is $7. C. J. Loftes, of 322 Broad street, Providence, is the chairman.

The contest is open to all members of the F. A. M. If entrant is not a member of the F. A. M., application and the necessary fee may be enclosed at the time entry is made.

SOUTH AFRICAN ROAD RACE WON BY INDIAN RIDER

THE South African veldt was the scene of a well-contested road race on April 30 reports of which were recently received by the Hendee Manufacturing Company. An Indian sidecar team defeated another American sidecar outfit by 36 minutes over a road course of 214 miles. Several streams had to be forded and the road was about as rough as could be found in the Colony. The course was from Durham through Maritzburg and Ladysmith and return to Durham.

The Indian driven by Jordan, with Z. Tasker as sidecar passenger, started 15 minutes later than its rival and finished in seven hours and 38 minutes.

ARTISTIC SPLITDORF WATCH FOB FROM "DIXIE DAN"

ADVERTISING Manager D. R. Walls, of the Splitdorf Electrical Co., is adding to his already well-recognized popularity these days by distributing an unusually attractive Splitdorf watch-fob. A neat metallic in gold plate, with a circle of purple enamel surrounding the Splitdorf trade mark giant, is suspended from a tidy black leather strap.

The Splitdorf trade mark is so skilfully worked into the design that the result is a fob which even the most conservative motor enthusiast will be pleased to carry. "Dixie Dan" hasn't announced the number of these fobs that are available but it is safe to say that his supply will soon be exhausted, no matter how many he has ordered.

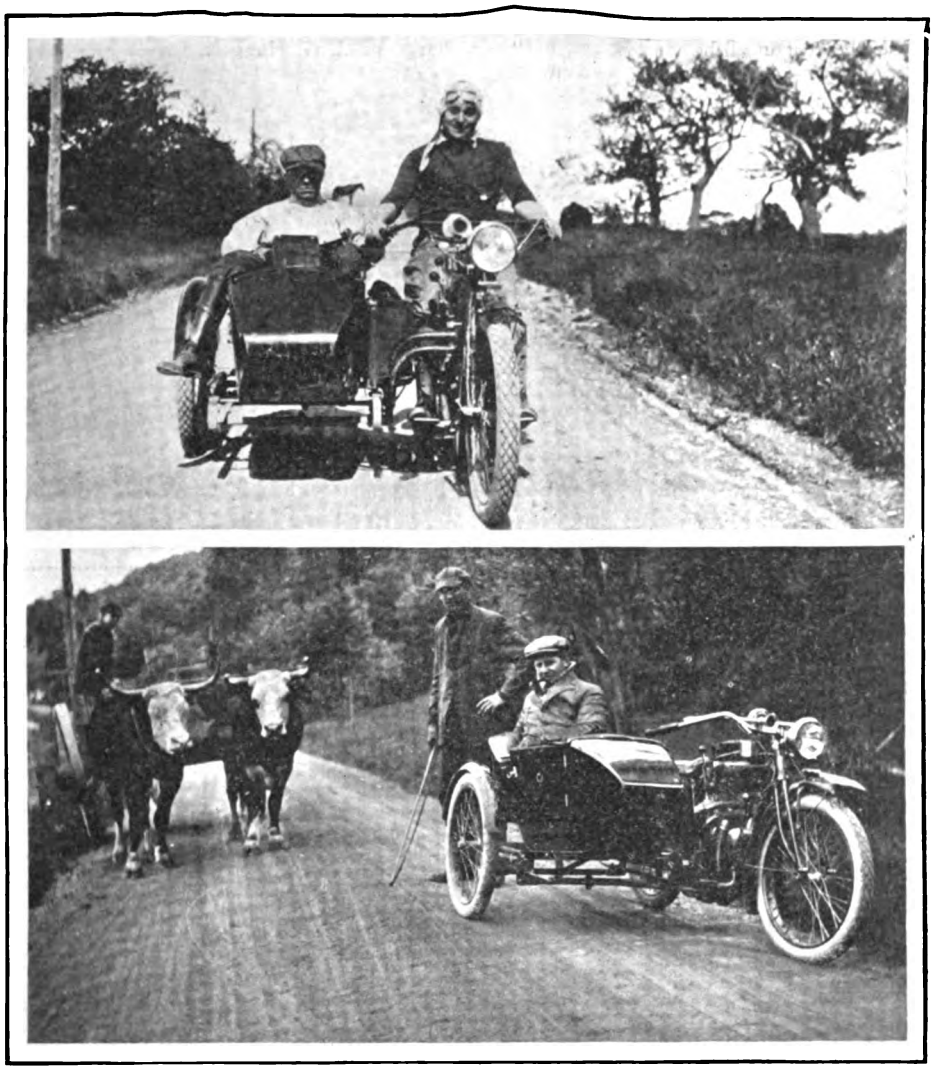
BOSCH NEWS IN SILHOUETTE

The Bosch News for June is a silhouette number, the illustrations throughout being in keeping with that idea. Among the feature articles are "A New Bosch Trophy" referring to the cup which will be given by the Bosch Company to the motor cycle driver making the best average performance for the season; "Special Bosch Sidecar Attachments," with illustrations of machine, and other matters of interest to motorists in general.

WHEELER & SCHEBLER CHANGE

INDIANAPOLIS, Ind.—The firm name of Wheeler & Schebler, the well-known carbureter makers, has been changed to the Wheeler & Schebler Carbureter Co., Inc., the change being effective July 1.

THESE BRAVES ARE STRONG FOR *THE SIDECAR*



Two Views of the Third-Wheeler in Pastoral Surroundings

THE lower photo shows Hal Noyes enjoying life on his sidecar during a recent New England trip. "Lamp the ox-team and then give my Indian sidecar combination the once-over," requests Noyes. 'Ain't that a hop from the old days to the present minute? Well, I guess yes."

The upper picture shows Ralph Fannon, of Appleton, Wis., in the saddle and Edward J. Nelson, of Manitowoc, Wis., in the sidecar. Fannon rode home with his Indian after closing the college year at the University of Maine, and Nelson traveled with him from Bangor, Me., Springfield, Mass. Nelson then bought a new Indian and rode homeward. Nelson has been riding since 1904 and says he prefers a motorcycle to a motor car because there is more fun in piloting the two-wheeler.

STILL GETS EFFICIENT SERVICE FROM 1911 EXCELSIOR

GRAND RAPIDS, Mich., July 4.—How long can a motorcycle be run and still be expected to give good service? Is five years enough? There is one enthusiast in Grand Rapids who doesn't think so, especially insofar as it applies to his machine.

Early in 1911 Judd Heth purchased one of the first twin sevens put on the market by the Excelsior company. He rode it for two years and then it began a round of nearly a dozen owners, but in the windup came back to Heth and he now rides it all the time and thinks it is in as good condition as ever. It has been in the hospital plenty of times but seems to have a constitution sturdy enough to overcome the many hard knocks it has had. It has been in several strenuous endurance contests.

How many miles has it been run? Nobody knows; but it's thousands and then some.

PROVIDENCE M. C. WILL HAVE 200-MILE ROAD CONTEST

PROVIDENCE, R. I., July 4.—The Providence Motorcycle Club is arranging for an endurance run to be held on Sunday, July 16. John G. Edwards, secretary of the club is in charge. The trip will be to New Britain, Conn., and return, about 200 miles. Suitable prizes will be awarded and the contest will be open to all.

It is expected to leave Providence at 8 o'clock in the morning and the riders will go through Chepatchet, Putnam, Williamantic, Pomfret, Hartford to New Britain, arriving there at 1 o'clock. The start for home will be made at 2 o'clock the same route being used, returning at 7 o'clock in the city.

Local riders and others are looking forward to the event, which promises to be one on a huge scale.

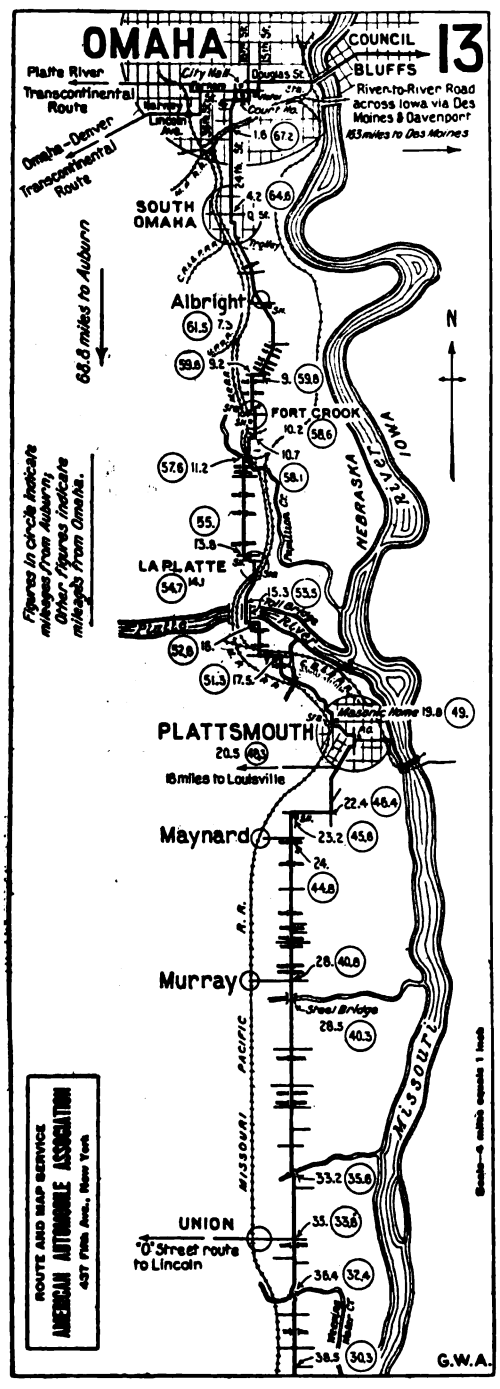
The Story of a Strategic Bridge

by ROBERT BRUCE

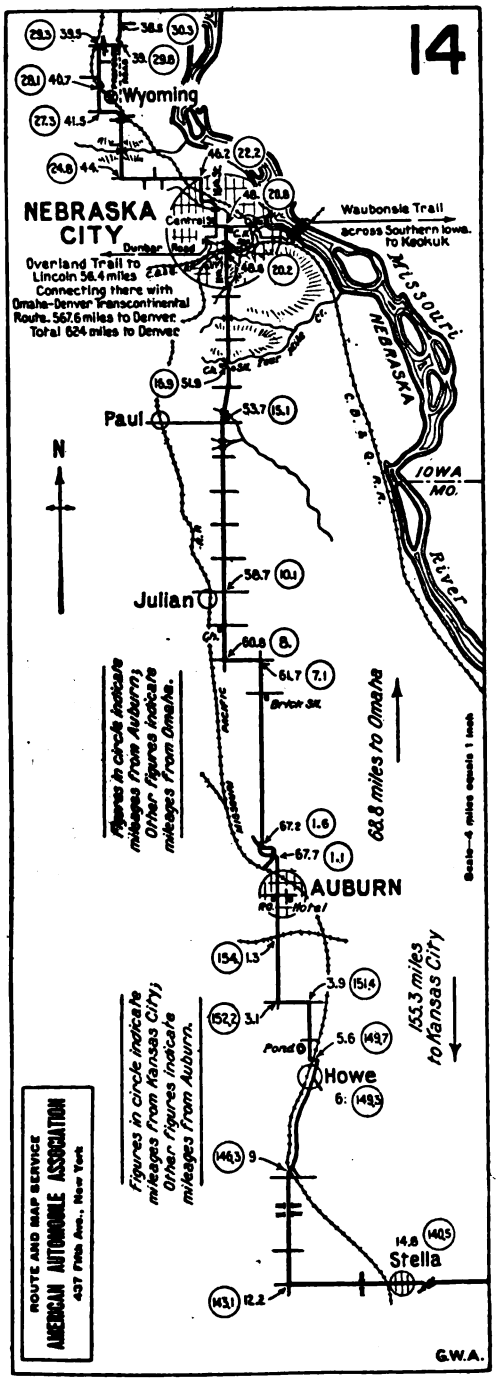


The Bridge That Shortened a "Transcontinental Route" Is the One Across the Platte River at the Mileage Figures "15.3" from Omaha.

WHILE new long-distance routes are being laid out all the while, great progress is being made in improving and standardizing the older ones, especially that pioneer transcontinental line, the "Trail to Sunset," from Chicago through Omaha, Kansas City, Trinidad, Santa Fe, Phoenix, San Diego and Los Angeles to San Francisco. This, by the way, is the only route that the eastern tourist can ordinarily start as late as September, and plan to cross all the way by road to the Pacific coast without risking cold weather, or even snow, in the mountains on the northern and central routes.

The present distance from Chicago to Los Angeles via the "Trail to Sunset" is 2,797.7 miles; formerly it was 2,817.2, the saving of 19½ miles having been effected by the building of a strategic highway bridge across the Platte River in Nebraska, 15.3 miles south of Omaha and 4½ miles north of the town of Plattsmouth. A glance at the route map (No. 13 in the upper right-hand corner), will show the location of this comparatively new but important bridge, near the junction of the Platte and the mighty Missouri. The larger half-tone illustration gives a good idea of the bridge itself, the toll-house and an automobile that has just crossed. Many motorcycle tourists use it also, and all who have passed over it will instantly recall the locality.

When the original survey of the route was made, it was necessary to start nearly west from Omaha, through South Omaha, Fort cross the Platte at the town of Louisville, thence through Weeping Water, zigzaging back toward the river through several small towns to Auburn, Neb., 88.3 miles from Omaha. This not only cut Plattsmouth and Nebraska City off the route, but made necessary a number of turns in the prairie country, some of them none too easy for the stranger to identify. But upon the completion of this bridge, the route changed to go nearly south from Omaha, through South Omaha, Fort Crook and La Platte, crossing



The Important Town of Nebraska City, Neb., Was Put on the "Trail to Sunset" by the Building of the Plattsmouth Bridge Over the Missouri.

Digitized by Google

the bridge shown in the illustration to Plattsmouth, Nebraska City and Auburn, a distance of only 68.8 miles. This not only saved 19½ miles, but provided an easy, practically direct route within a short distance of the Missouri River all the way.

In point of time the saving is greater than might appear from the figures, as the 224 miles between Omaha and Kansas City are now frequently covered in a day, whereas the additional 19½ miles, over a circuitous route with many turns, usually made it necessary to stop overnight on the way. Recently an association has been formed, principally among the business men of the river towns, to develop and promote what has since been formally called the "Omaha-Kansas City scenic route." A great deal of improvement work is in progress, especially the building of concrete culverts and bridges, the road is already well graded and "dragged" as needed. It is the purpose of this association to keep this route in good condition at all times; and as a result an increasing amount of through travel is going over it.

While the saving of time and mileage by the building of the Plattsmouth bridge is in itself an exceptional case, it is only typical of the rapid improvements constantly being made on the trunk-line route in the central and far west. Within the past five years several complete transcontinental routes have been linked up out of what were formerly almost isolated roads, mostly without signboards and very difficult for the stranger to travel over. The time required for a long cross-country trip has easily been cut in half, and will be further reduced as present and prospective improvements are realized.

The Bridge That Shortened the "Trail to Sunset" 19½ Miles, and Put Plattsmouth and Nebraska City, Neb., on the Omaha-Kansas City Through Line

NEW CLUB IS FORMED IN WASHINGTON

WASHINGTON, D. C., June 24.—Growing out of a feud or near feud which has been taking place between the two motorcycle clubs which Washington has been blessed with for the past few years has come one grand organization, the Washington Motorcycle Club, which came into being on Sunday last, June 18. The new organization came as a direct result of the disbanding of one of the older clubs which resulted in the prime movers for the new body calling a meeting on Tuesday night, June 13, when it was decided to interest all the riders hereabouts and cement the new organization on Sunday last. For the purpose a run was announced to Boonsboro, Md., 65 miles out of Washington, where arrangements were made with a hotel where the meeting was held. Some 25 riders took part in the run and became charter members of the new Washington M. C.

August Zimmerman, well known in Washington motorcycle dealers' circles, was chosen to head the new organization temporarily, and G. D. Cochrane assumed the post of vice-president. J. McL. Seabrook was elected secretary-treasurer.

JANKE WINS DODGE CITY GRIND

(Continued from page 16)

are holding tenaciously to their positions during the nineteenth lap. Then Johns' compensator begins to slip; Stokes and Wells Bennett, both on Excelsiors, edge by him, leaving the Wigwam man in sixth place.

Duels for Position

The contest for first place between Clymer and Janke is a very pretty one, but even more keen is that between Stokes and Bennett for fourth position. Twenty laps pass—and Stokes is in fourth place; twenty-one and Bennett has shot ahead of him. Yet another and Stokes, all in, is trailing Wolter. And in the meantime Boido has visited the pits with tire trouble and has gotten under way once more.

A roar from the grandstand calls everybody's attention that way at the end of the twenty-fourth, and you get an "eyeful" of the deputy sheriff who has got mixed up with Hilliard coming into the Excelsior pit, much to the dismay of that official. The spectators see that in the collision the sheriff has lost part of his trousers and the crowd laughs hilariously.

Pit Visits Increase

Two more laps go into history without the slightest change in the first four places and no details of greater importance other than pits are visited by Bennett and Don Johns. Dave Kenny, Indian, follows pitwise in the twenty-eighth, and Johns, having made one circuit again, heads in the Indian repair camp, while Stokes is seen riding to the Excelsior pit. The latter had been running fourth right behind Wolter.

Carbureter trouble bothers Harry Brant during his thirtieth circuit and he stops on the back stretch. Unfortunately, he cannot get his bus rolling again and Harry is called out. Wells Bennett, who has been burning up the track for the past few laps in fifth place, grabs opportunity by the forelock when Stokes is at the pit and climbs by Wolter into third berth. And still there is no change among the leaders.

Clymer Rides Consistently

The scorer has gotten into the habit of checking Clymer off as regularly as clock work every minute and a half or thereabouts; and he catches a glimpse of Janke a small fraction of a second afterward, as Janke follows every twist and turn of the premier rider in an effort to keep Clymer's pace.

And now, with the thirty-fifth lap passing into history, the news is spread about that Johnston's illness proves to be a very serious and the game youngster is, against his will, forced out of the great race.

But the spectators' attention is again drawn to the track as the motors flash past; and suddenly the grandstand reverberates with lusty cheers as Glenn Stokes gets under way. That joy is short-lived, however, for Stokes again steers for the pits at the completion of the 38th lap with a ruptured tank.

Excelsiors Creep Upward

The scorer is chalking lap forty-one, forty-two and forty-three, and then as the spectators' eyes wander back to the track, they see the two Harley-Davidson leaders, Clymer and Janke, beginning to allow the gap separating them from Wolter and Bennett, to grow smaller. These Excelsiorites, holding third and fourth places, uncork a roar of approval from the grandstand.

But Clymer and Janke lap the bunch on the fiftieth round and the chief timer megaphones the news that Clymer's time for the century circuit is 1:11:45, which is 2 minutes and 25 seconds faster than the time made by Carl Goudy last year. The crowd goes wild over the announcement and the steel throats of 1,000 Klaxons bear evidence that Clymer's feat is keenly appreciated.

Wolter Hangs On

In the meantime pit folks are kept busy replacing tires and making small adjustments. And suddenly the chief interest of the crowd is focussed on the timely display of generalship on the part of Joe Wolter, who, although lapped by speeding Harley-Davidson riders, has succeeded in getting into Janke's pace, and what is more is very cautiously making sure that he will not be shaken off.

Uneventful laps then follow and in the sixty-fourth circuit Joe Wolter still hangs on tenaciously. But the breach is widened on the sixty-fifth circuit. And as competition for first place between Janke and Clymer becomes keener, Wolter continues to lose their pace.

Armstrong Out of It

For a brief instant Janke assumes the leadership in the 70th lap, only to be displaced again by Clymer in the next lap. Such is their great burst of speed that they again lap Wolter in the 72d turn. When the cheering dies down, the 25,000 fans present learn with sorrow that "Red" Armstrong, who piloted his Indian into the pit a few laps ago, has encountered trouble of a sort that can't be fixed up in time for him to start again.

Announcement is then made that "Spot" Bruggerman, Excelsior, who slid by the pits in his effort to stop on his 72d lap and then pushed back again, has been disqualified and will not start again.

Three laps more and some one is yelling, "Man down!" Paul Gott, Harley-Davidson, some one says, was seized with cramps on his 77th lap and could not straighten up in time to avoid a spill. And a few minutes more the crowd sees Gott carried in, apparently badly shaken up but not seriously injured.

Don Johns comes walking in slowly when Gott has been safely stowed away in a cot in the Harley-Davidson camp and declares that 78 laps is all he will do.

Clymer Still Ahead

All this while Clymer is still in the lead and sets the pace when half the triple century is over, his time for the one hundred and fifty miles being 1 hour, 50 minutes and 41 seconds. Janke is clinging closely to him, and Wolter is in third berth, though a lap behind the leaders. And as Clymer checks in the 78th turn the scoreboard still shows that only Janke has not been lapped.

At that stage of the race Wolter has been lapped once; Walker, Indian, has covered 75 laps; Sam Correnti, Harley-Davidson, 74; Harry Crandall, Harley-Davidson, 72; Ray Weishaar, Harley-Davidson, 70, and Bruggerman, Excelsior, 70.

Janke Takes the Lead

Clymer's leadership terminates for a space in the 81st lap, when his rear tire blew and he slides crabwise home to the Harley-Davidson pit, leaving the pacemaker's task to his teammate, Janke. Clymer thus loses two laps and when he comes back he is running in third place, two laps behind the leader and one lap back of Wolter, now the second man.

Clymer, however, is making up for lost time on his speeding bus, and by the 95th circuit is only a half lap behind Wolter, and is coming up strong.

The time-keeper announces that Janke has covered 200 miles in 2 hours 27 minutes and 22 seconds, or at an average speed of better than 82 miles per hour. Hardly has the leader passed the two-thirds mark when Wolters ambles home for gas and oil, and Clymer, taking advantage of the Excelsiorite's stop, rolls into second position, and in two more turns again assumes the lead, as Janke follows Wolter's suit.

Clymer-Janke-Wolter

Again Wolter and Janke get going, and once again the trio begin to cross the tape

Digitized by Google

on even terms as to distance, with Clymer slightly in the lead, Janke on his heels and Wolter trailing.

A couple of bad-news bearers from the pit come to visit the press stand and report that plug and carbureter trouble have eliminated Harry Crandall on his 89th lap, and Correnti's broken gas lead put him out after completing 91 turns of the course.

But the crowd's first cry of real despair goes up when Clymer fails to pass the tape on the 110th lap, and investigation later proves that a broken inlet valve has overtaken the speediest contestant of the day and put him out of the running.

Now Janke goes to the fore, and with Wolter begins to round the turn with a monotonous regularity. Ray Weishaar, who had completed 109 laps while the leaders rolled up 115, landed safely in third berth without a great deal of competition. Gradually but steadily Janke begins to creep up and widen the breach between him and Wolter, while "Speck" Warner on an Indian, who has been keeping steady pace through the entire race, creeps up on Weishaar, and finally wrests that coveted position from him, while the leader is whirling round the oval for the 124th time.

Janke Laps Wolter

On the 131st lap, Janke succeeds, after a stiff battle, in lapping Wolter and in making his leadership certain and unchallenged. Round after round the two front-rank riders hold the same relative positions, Janke checking in first every time, with Wolter a lap behind, Warner seven laps to the rear in third place, and Weishaar ten laps back of Janke.

On his 147th lap, Warner fails to check in, and Weishaar hops into his place before "Speck" can nurse his mount back to the pits for a change of plugs.

And then came the supreme moment of the race. Janke and Wolter receive the checkered flag amid a deafening din, before the Indian pilot can again get running. Janke flashes cross the tape, with Wolter behind, and Weishaar, Warner, Gene Walker and Graves stringing out in the rear in that order. When the last rider has shot past, the timekeeper announces that Janke's time of 3:45:36 is better by over ten minutes than that made by Otto Walker, Harley-Davidson, last year at Dodge City.

FLASHES FROM THE FRONT

FORT WORTH, Texas, claims the honor for having brought the greatest number of riders form over a 500-mile distance, 35 having turned up at the track to cheer on Al Hilliard, the Excelsior rider, and Sam Correnti, Harley-Davidson. Most of the Texans came by motorcycle.

Interest was somewhat intensified by a little side bet of $5 between "Speck" Warner and Don Johns as to which would make the best mileage showing in the race.

Wells Bennett, the Excelsior man, rode out from the Coast in five days flat on a stock twin, and entered as Carl Goudy's team-mate.

The "magneto trio"—Mike Toepel and Jack Neis, of Splitdorf, and Eugene Trefy, of Bosch, were on hand early, and were all with the "soup" insofar as it was in their control.

Messrs Culp and Napier did the honors for United States tires, with the capable assistance of L. A. Brown, of Kansas City; J. J. Watt, of Oklahoma City, and M. Jordan, of the traveling staff.

Goodyear, with every machine shod with Blue Streaks, was on hand in force. At the pits were Messrs. Brunswell and Thomas, while Messrs. Ritchie from Akron, and also from Kansas City, assisted by Horace Jenkins and Jack Cameron, did the "glad hand" work.

And still speaking of tires, there were M. Walker, of the B. F. Goodrich forces, and S. R. Meeks and Harry E. Hawes, of the Firestone factory, with P. B. Talbott, of the Kansas City Firestone branch, all right on the job.

That "two by twice" swimming pool, which Dodge City boasts of, cleaned up enough during the meet and practice days to lay off for the rest of the season. Everyone was in the pool every night.

Bob Perry on Sunday found himself a victim of misdirected effort. With characteristic thoroughness he applied himself to his laundry work, only to discover that he had industriously washed Glenn Stokes' sweater instead of his own.

Sort of out of the swim, but a first-class spectator was H. J. Krackowiszer, of the Cleveland forces. Everyone who was not otherwise engaged tried the little "two-stroker," including Joe Wolter, who went back to town on it Sunday to have a bit of machine work done.

About the first folks on hand were the Harley-Davidson boys, who checked in on Wednesday of last week.

Harry Brant, of the Harley-Davidson team, kept the folks on the anxious seat. He was due on Thursday from Portland, Ore., but got mixed up with the wrong train at Denver, and never reached the trackside until late Sunday night.

Morty and Mrs. Graves, with Dave Kenney, of the Indian team, began to make the Harvey House rich on Wednesday. They had the able assistance of Messrs. Toepel, Neis, Krackowiszer and Ted. Hastings.

On Thursday the Indian factory boys arrived and began to make things hum, while on Friday night most of the Excelsior men exercised their pens on the Harvey House register.

Chairman Johnson, of the F. A. M. competition committee, with Merwin, his youngest son, blew in on Sunday morning. Following them came W. J. Ash, of the Chicago Cycle Supply Co., and Walter W. Whiting, who "Harley-Davidsoned" over from Denver in 10:45 flat.

They appeased "Bill" somewhat by making him clerk of the course, but he had hoped to find that package well iced up upon arrival, and on that score was inconsolable.

It wasn't so much the fact that Pliny Simpson got the refereeship which he had hoped for, if not expected, but that Pliny failed to collect a very important package from the Rock Island depot on Saturday. This made "Bill" Ash good naturedly snub Pliny all Sunday.

Hard luck attended the best efforts of the "road manicurists," who endeavored to roll the adobe down into decent shape. An auto served fairly well as a roller to work down the most bothersome soft spot, but, despite their best efforts and two tank wagons of oil, which were accidentally wasted, the riders proclaimed the course two seconds slower than last year.

Pre-race dopesters who tried to pick a winner from the practice showings had their work cut out for them, for, after all, it was anybody's race right up to the last minute. Machines and riders were about evenly matched.

Mrs. Ray Weishaar rode in on Sunday from Wichita with Fred Darigrand as sidecar passenger.

Frank Rodger, who takes care of the publicity for the Harley-Davidson, began immediately upon his arrival to put the race on the map via the newspaper route. Frank kept the papers both far and near well informed, and got considerable publicity for the big event.

Just about every member of the First Battalion, Massachusetts Signal Corps, which had a four-hour stop-over at Dodge City on Friday night, went out to give the track the once-over. They went away, sadly debating the chances of this rider and that.

Newby Brothers, handling Thor, Henderson and Flying Merkel at Kansas City, were on hand passing out suitably-engraved pencils.

P. E. Zimmerman, of the Excelsior, came in on the first train Monday morning, as did Mrs. "Speck" Warner and her mother.

Bill Ottoway, who put the finishing touches on the Harley-Davidsons at the pit,

By Way of Emphasis—

On top of its recent mountain climbing feats, the other day a Thor in Dayton, Ohio, ran against the classiest field of riders ever assembled. This group included such stars as Creviston, Jones, Pineau, Mathews, Johnston, Luther, Taylor, Verril, Weishaar, Morrison and Streifthan.

What happened? Simply this: Rider Marks on his powerful Thor opened up! Whizzz!!! Away it went around and around the track and shot in an easy first!

This victory, together with other recent Thor feats, is convincing evidence that when you want to ride or sell a terrifically powerful and enduring motorcycle, you will ride or sell a

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

A Talk By Graton & Knight Belt Makers

AS the largest belt makers in America we believe in belts and know that the belt is the logical drive for the coming popular motorcycle, the Lightweight Motorcycle.

We suggest belt drive for Lightweights because we know it is the right drive when the belt is right; we stand back of that belief too, because we know that there is a big field for a good Lightweight using belt transmission.

We invite all interested in the motorcycle of the future—the Lightweight—to consult with us. Dealers or manufacturers who have belt problems to solve will be given every attention—we do not so much seek orders for belts, but desire to post those who want to know the advantages and possibilities of belt transmission using the

CROSS-COUNTRY MOTOR ROUTE IS ONLY FAIR

Harding and Edison Had Few Delays but Experienced Pretty Hard Going on Trip from Los Angeles to New York

Edison and Harding on Their Arrival in New York

NEW YORK, July 1.—L. S. Harding and Andrew C. Edison, who drove a Henderson sidecar combination from Los Angeles to New York by way of advertising a feature photo-film entitled "Civilization," report that the machine gave them no trouble on the way over. As told in the June 25 issue, they left Los Angeles May 9 over the Santa Fe Trail. They crossed the Mojave Desert and then traveled through Arizona and New Mexico on the way to Denver, Col.

They struck the Lincoln Highway from Denver to Omaha, Neb., and then followed the River-to-River road from that city to Chicago. After leaving the riders had rain most of the time. They waited in Chicago four days for the skies to clear and finally had to continue in the rain. They stopped six days in Detroit and paid a visit to the Henderson factory.

From Detroit to Toledo the roads were bad, no end of mud being encountered. From Toledo to Buffalo, N. Y., the roads varied between good and bad. From Buffalo to New York City the roads are reported as almost uniformly good, but on that leg of the trip they had two blow-outs.

The riders left New York a day or two ago for Portland, Me., where they will close their trip. Their latest report showed that they had covered 4700 miles. A large number of side trips were made.

The tourists consider the cross-country route pretty bad as a whole, and report the Lincoln Highway as poor. Lincoln Highway improvements are now under way in Arizona and New Mexico.

FIRESTONE LIBERAL WITH MILITIA EMPLOYEES

Patriotic Policy Adopted by Tire Company in Allowing Substantial Sums to Guardsmen Who Have Answered Country's Call

AKRON, O., July 2.—The Firestone Tire & Rubber Co. has issued the following to its employees with reference to the arrangements that have been made to assist those who have been called out to join the National Guard units:

"Until further notice, and in no case to extend beyond the period that the National Guard is acting under call by the U. S. Government, this company will allow the following compensation to its employees enlisted in the National Guard:

"Employees enlisted on or prior to June 1, 1916, and who have been in continuous service of company three or more years, full wages less all money received from State and National Government.

"Employees in continuous service of company between one and three years, two-thirds of wages less all money received from State or National Government.

"Employees in continuous service of company less than one year, one-half of wages less all money received from State or National Government.

Employees who enlist after June 20, 1916, will be allowed wages as follows:

Those in continuous service of the Firestone Company three or more years, full wages less all money received from State or National Government.

Those in continuous service between one and three years, two-thirds of wages less all money received from State or National Government.

Those in continuous service between six months and one year, one half of wages less all money received from State or National Government.

Those in continuous service less than six months, no allowance.

The average wages earned per month for three months prior to enlistment will be amount allowed piece workers.

THREE MORE GET PRIZES IN MEMBERSHIP CONTEST

WESTBORO, Mass. — Secretary-Treasurer G. B. Gibson, of the F. A. M., announces three additional winners in the membership prize contest, which started on May 7. These are B. H. Bond, of Huntington, Ind.; William R. Jacobs, of Wilmington, Del., and Carl J. Turner, of Dodge City, Kan.

Bond gets the prize for the greatest number of applications recommended for the week of June 11-17, his number being 9. Jacobs led in the week of June 18-24, with 5 applications, while Turner had the largest number recommended for the week of June 25-July 1, an even 20.

CHICAGO AND FRISCO AFTER 1917 F. A. M. MEET

WESTBORO, Mass.—Secretary-Treasurer G. B. Gibson, of the F. A. M., has received an invitation from Secretary Webb of the San Francisco, Cal., Convention League for the 1917 F. A. M. meet. He has also received another invitation of like character from the Chicago, Ill., Chamber of Commerce Convention Bureau.

RACING INTEREST GROWING

KANSAS CITY, Mo., June 26.—As a result of the interest being taken in the building of the new track at Kansas City, the dealers are preparing for a big season in motorcycles and bicycles. E. B. Saufley, of the Saufley Supply Company, recently received an order for a big-valve Excelsior which a local rider intends to use on the tracks about Kansas City.

ANOTHER TRACK FOR PRINCE

KANSAS CITY, Mo., June 26.—Jack Prince is promoting a new track at Kansas City, near 85th street and Prospect avenue, and according to his associates, a lumber man and a real estate promoter, he will stage automobile, motorcycle and bicycle races. The track is now under construction and will be a mile and an eighth oval. Mr. Prince still has his board track at St. Joseph but it has not been formally opened this season.

SIDECAR BUGLER GETS RECRUITS

KANSAS CITY, Mo., June 26.—When the Third Regiment of the National Guard of Missouri was called to camp with the expectation of being sent to the border very soon, it was found that the Kansas City regiment lacked enough men to bring the organization up to war strength. The regiment then opened recruiting offices. The best work in this line has been done by Ross Landes, salesman for Charles Hanson, the Indian agent. Mr. Landes is an expert bugler and decorating his sidecar with flags and signs and patriotic emblems he has been gaining many recruits for the regiment by sounding calls on the streets.

SCOTT TAKES INDIAN

PASO ROBLES, Cal.—Alger B. Scott has just been appointed Indian agent in this city. His initial order, placed with C. Will Risden, is for a Powerplus, a sidecar and a Featherweight.

DOMESTIC AND EXPORT CYGNET ORDERS HEAVY

BUFFALO, N. Y.—Orders for Cygnet Rear Cars, both for export and domestic orders, have been rapidly on the increase of late and the manufacturers regard the showing so far this season as eminently satisfactory. Although the company shipped its first car in January of this year there is hardly a civilized country in which Cygnets are not now being satisfactorily used, and reports to the factory indicate that the adaptability of the rear car to the needs of the public is practically unlimited.

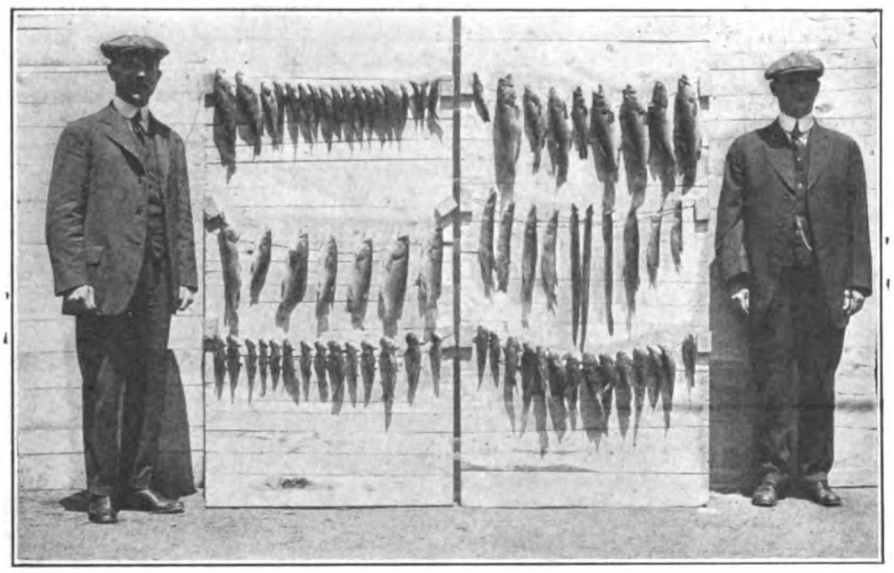
DISPLAY RACKS FOR PENNSYLVANIA TIRES.

JEANNETTE, Pa., July 5.—Special display racks for Vacuum Cup tires and each of the Three Star line of bicycle tires have been gotten up by the Pennsylvania Rubber Company. The racks are striking and decorative, being printed in colors, and will not buckle, bend or collapse. They are substantially constructed of the strongest 15-ply waterproof cardboard.

As shown in the illustration, the tire is inserted in the slot of the rack, the two firmly supporting each other, thus obviating unsightly brackets and braces. The racks, with tires inserted, can be placed in prominent position in the dealers' windows, on the floor or counters of the store. They are most compact and occupy but little space.

WIGWAM FISHERMEN AT ANNUAL POW-WOW

Indian Outing Club Holds Two-Day Angling Competition and the Losing Team Pays for a Dinner; Fishing Scores Kept by Points



General Superintendent Loose, Red Captain, and Production Superintendent Spencer, Blue Captain, with Catch Taken by Both Teams

SPRINGFIELD, Mass.—Indian Outing Club of the Hendee Manufacturing Company held its annual fishing contest June 24-25, at Congomond Lake, Southwick, Conn., where the Indian Camp is located. The members were placed on contesting teams, one of which, called the Reds, was captained by General Supt. T. L. Loose, while the other aggregation, named the Blues, was led by Production Supt. Charles A. Spencer.

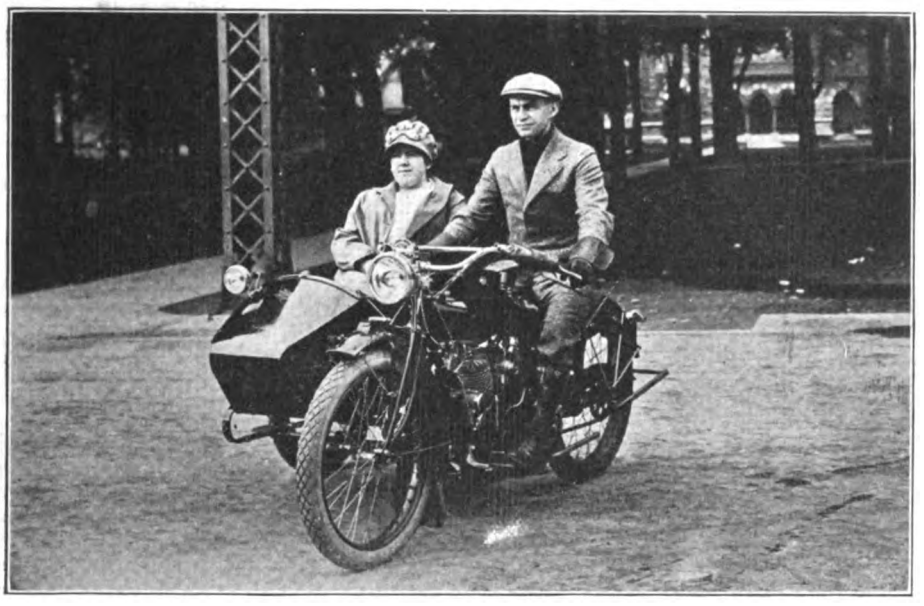
The first line was cast shortly after noon on Saturday, and the fishing continued until noon on Sunday, after which the contestants returned by motorcycle or sidecar to the State street factory, where the fish were weighed in, and the score computed by a point system which allowed a certain number of points per pound of the several varieties of fish caught.

Victory this year went to the Blues, who had a score of 880 points as against 528½ points for the Reds.

As is the annual custom, the losing side spread a banquet for the winners at the Highland Hotel, which took place on the Tuesday following the contest. An excellent menu was disposed of, after which Captain Spencer, of the winning Blues, served in the capacity of toastmaster and led a merry pace in the quip-chasing which brought nearly every man to his feet before the evening was over. Out of the raillery which sped around the table, there finally arose a challenge, voiced by Captain Loose, of the losing Reds, which resulted in the scheduling of another contest by the same teams.

The fishermen and their guests who were present at the banquet were Charles Gustafson, H. C. Lewis, Carl Modig, H. E. Madden, L. D. Chapin, H. S. Barrows, J. D. Stephens, J. H. O'Brien, B. F. Humphrey, J. B. McNaughton, W. Langland, George Hall, H. A. Smith, N. H. Smith, C. F. Johnson, F. Adams, Charles Spencer, Walter Morrison, E. W. Bjorkland, A. A. Anderson, E. O. Redfield, J. A. Popp, J. J. Toomey, F. DeCormier, H. C. Shaw, George Parker, T. Mohrien, J. Diegle, George Dowd, P. C. Johnson, J. Abrahamson, W. Shields, E. W. Jackson, T. L. Loose, C. Duggan, W. Kelley, F. J. Weschler, E. R. Johnson, C. Hinckley.

TOURISTS FROM BATH, N. Y., ENJOY A LONG TRIP



Floyd and Mrs. Cox with Indian Outfit Used on Tours

NEW YORK, July 3.—Floyd Cox, Indian representative in Bath, N. Y., dropped in at the office of **Motor Cycle Illustrated** today for a friendly call and also to let it be known that he is making a motorcycle tour with several companions. Mr. Cox is driving a Powerplus Indian and has as his sidecar passenger Claude Gilbright. The third member of the party is Clarence Hill, who is using a solo Indian.

Mr. Cox and party left Bath on July 1 and made the run to Albany in 13 hours. At that point they boarded the boat for New York. After taking in the races at Sheepshead Bay they will start on Wednesday for Boston. On the way up they will stop off at Springfield, Mass., and make a trip through the Hendee factory.

Mr. Cox belongs to the new school of hustling motorcycle dealers and believes that one of the best ways for an agent to advertise his machine is to ride it himself and keep it on the road. Mrs. Cox accompanies her husband on many of his tours.

The Plug with the Green Jacket

If you've the motor, we've the right plug for it.

SPLITDORF ELECTRICAL CO.
NEWARK, N.J.

Look for the name SPLITDORF on the Green Jacket, which is hexagonal in shape. Refuse imitations or "just as good" substitutes. The SPLITDORF Trade Mark appears on every SPLITDORF PLUG. and the Trade Mark carries the SPLITDORF GUARANTEE

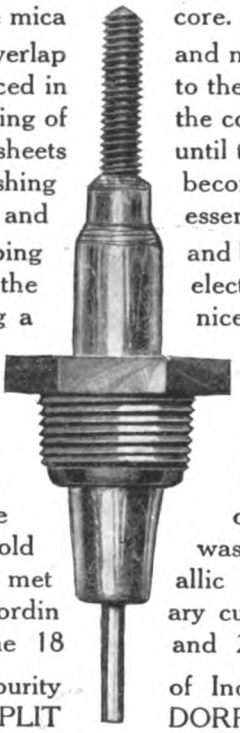
Digitized by Google

The laterally wound mica core is the dominating feature of SPLITDORF SPARK PLUGS from the actual usage standpoint. The distinguishing green jacket, while adding a finish to the plug, really serves as a protection to the mica core — and it is the mica core insulation that places SPLITDORF PLUGS in their position of supremacy.

Automatic machinery accounts for the conversion of sections of solid round steel into finished shells, and likewise the bushings and spindles, but the human equation enters more strongly into the most interesting and important process of wrapping and completing the mica core.

The sheets must overlap and must be built up preparatory to being forced in to the bushing. Machinery takes care of the setting of the core in the bushing and compressing the mica sheets until the mica between the spindle and the bushing becomes as solid as though it were one sheet and essentially homogeneous.

Trimming and shaping and boring for the electrode and riveting home the electrode, are all precise operations, demanding a nicety of exactitude only possible with the most complicated automatic machinery, but the lateral packing of the mica cores in SPLITDORF Spark Plugs is a feature that gives them their pre-eminence in the hardest usage.



The Laterally Wrapped Mica Core

There is no chance of oil seeping through, as in the case of the old washer process, and even were it possible for a metallic substance to get between the layers, no ordinary current could possibly puncture through the 18 and 20 layers used.

Flexibility and purity of India ruby mica are great points in SPLITDORF Plug construction. Skilled operators scale it to sheets of marvellous thinness — the process is long and costly, but the results achieved in manufacture and usage warrant the outlay.

It is never necessary to throw a SPLITDORF Plug away — the whole core and bushing can be easily removed. The whole plug, as a matter of fact, is simplicity itself in the taking apart for inspection, renewal or cleaning.

There are no acute angles in the shell, and this enables it to be easily and thoroughly scoured. A little gasoline and a piece of coarse cloth will invariably remove all carbon and renew the mica core.

Look for the name SPLITDORF on the Green Jacket, which is hexagonal in shape. Refuse imitations or "just as good" substitutes. The SPLITDORF Trade Mark appears on every SPLITDORF PLUG, and the Trade Mark carries the SPLITDORF GUARANTEE

BOB SPEARS AGAIN BEATS CHAMPION KRAMER

Takes Two Out of Three Heats in Two-thirds Mile Match Race—Dupuy Humbles Cavanagh in Brassard Race—Eddie Carroll Shows Fine Form in Amateur Ranks

NEWARK, N. J., July 3.—For the second time this season, Bob Spears, the lanky Australian, succeeded in defeating Frank Kramer, the national champion, in a match race. Spears turned the trick at the Velodrome in Newark on last Sunday, defeating the champion in two out of three heats of a two-thirds mile affair. Spears won the first heat and the last one, Kramer taking the honors in the second.

Rides Around Kramer

Spears' best performance was in the first heat when he had to ride around Kramer to win. It is very seldom that any cyclist succeeds in riding around the champion, but Spears did it yesterday although his margin of victory was only one of inches. He came with a great burst of speed in the home stretch and nipped the "pride of East Orange" at the tape. Kramer won the second heat riding from in front. Spears tried hard to overtake and pass him but was not able to turn the trick. In the third and deciding heat, Spears got out in front and remained there right to the finish. This time it was Kramer who was giving chase and he was unable to ride around the fast going Australian.

It was a great performance for Spears to beat the champion and any cyclist who can turn the trick is always treated to a great ovation. Spears, of course, was no exception and the Velodrome rang with applause for him.

Grenda's Rough Riding

Alfred Grenda came pretty near inciting the fans to riot in the ten mile open for the professionals, which was won by Reggie McNamara after a hard ride. Grenda, McNamara and Jackie Clark entered the last lap on practically even terms, almost riding abreast. There was a battle for the lead as they swung into the first turn and Grenda using his elbows to advantage sent Clark sprawling. Oscar Egg and Marcel Dupuy, who were coming fast, went down also. Grenda finished second but was disqualified for rough riding. The fans hooted and jeered at him while one spectator went further than this and threw a "pop" bottle at his head; luckily it missed its mark. John Bedell finished third and Menus Bedell was fourth.

Frank Cavanagh, who has been reaping a harvest in the Brassard races every Sunday, was beaten by Marcel Dupuy, the speedy little French rider. Dupuy opened a substantial lead on the last lap and Cavanagh quit in the home stretch.

In the two mile invitation for the professionals, Lloyd Thomas, better known as "Cat," was a winner by a length and one half over John Bedell. Jake Magin got third place and Willie Hanley finished fourth. The entire quartet were closely bunched at the finish.

Carroll Wins Pursuit Race

In the amateur ranks, Eddie Carroll, of San Francisco, won the Australian pursuit race which was the feature event on the card for the simon-pures. Carroll passed

Bob Spears

Gus Lang after riding 3 miles, 2¼ laps. Ben O'Sicky, of Cleveland, was third and William Spencer, the Toronto boy, who has beaten Carroll twice in pursuit races, finished fourth.

Edward Byron, of Australia, won the two-thirds mile handicap for the amateurs. He had an allowance of 20 yards. William Spencer, who started from the same mark, got second place, while William Beck with a hundred yard handicap was third.

C. B. Soper, of Newark, won his novice in a half-mile race with C. A. Coffey second. The summaries:

Half Mile Novice (Amateur)—Won by C. Soper, Newark; C. A. Coffey, Newark, second. Time, 1:23⅘.

Two Mile Invitation (Professional)—Won by Lloyd Thomas, San Francisco; John Bedell, Lynbrook, L. I., second; Jacob Magin, Irvington, third; Willie Hanley, San Francisco, fourth; Charles Piercey, Australia, fifth. Time, 4:00.

Two-Thirds Mile Handicap (Amateur)—Won by Edward Byron, Australia (20 yards); William Spencer, Toronto (20 yards), second; William Beck, Newark (100 yards), third; Eric Paetz, Germany (60 yards), fourth. Time, 1:17

The Brassard Race, at One Mile (Professional)—Frank Cavanagh, Newark vs. Marcel Dupuy, France. Won by Dupuy. Time, 3:00⅗. Last eighth mile, 0:12⅘.

Two-Thirds Mile Match Race (Professional)—Frank L. Kramer, East Orange vs. Robert E. Spears, Australia. Won by Spears. First heat won by Spears. Time, 1:58. Last eighth mile. Second heat won by Kramer. Time, 2:11⅘. Last eighth mile, 0:12⅘. Third heat won by Spears. Time, 2:03⅖. Last eighth mile, 0:13⅘.

Half Mile Handicap (Professional)—Won by Charles Piercey, Australia (55 yards); Gordon Walker, Australia (55 yards), second; Lloyd Thomas, San Francisco (55 yards), third; Floyd Krebs, Newark (70 yards), fourth; Reginald McNamara, Australia (scratch), fifth. Time, 0:54⅘.

Australian Pursuit Race (Amateur)—Won by E. J. Carroll, San Francisco; Gus Lang, Irvington, second; Ben O'Sicky, Cleveland, third; William Spencer, Toronto, fourth; Eric Paetz, Germany, fifth. Time, 8:10⅕. Distance, 3 miles, 2¼ laps.

Ten Mile Open (Professional)—Won by Reginald McNamara, Australia; John Bedell, Lynbrook, L. I., second; Menus Bedell, Lynbrook, L. I., third; Harry Kaiser, Bronx, fourth; Edward Madden, Newark, fifth. Time, 21:04⅕. Alfred Grenda, Australia, finished second, but was disqualified for rough riding.

HUDSON WHEELMEN WILL STAGE BIG MEET

BAYONNE, N. J., July 5.—Several handicap events are being planned for the meet of the Hudson County Wheelmen to be held on the Boulevard here on August 30. The number of events and the distance of each have not been decided, but the officials of the Hudson Wheelmen promise that there will be variety aplenty. They expect to find 200 riders entered and are now completing arrangements with the county commissioners to keep the course free from all traffic while the meet is in progress. Several races have been held by the Hudson County Wheelmen this season, each of which proved highly successful, due to the large number of new clubs which have sprung up in this section.

BRIDE MAY INCREASE SALES

LOS ANGELES, Cal., July 1.—Julius Smith, manager of Edwin F. Merry's store in Los Angeles, is doing some tall hustling to get a whole lot more than his share of sales of the 1916 million bikes. Julius has a special incentive now. A few days ago he was married to Miss Frances Whitcomb, formerly of Minneapolis.

KANSAS CITY DEALERS HAVE NEW OFFICIAL STAFF

KANSAS CITY, Mo., June 26.—The Kansas City Bicycle Dealers' Association met at the motorcycle establishment of W. Bell, recently, and elected officers as follows: President, H. Vetten, manager of the bicycle department of the Schmelzer Arms Co.; secretary, R. V. Cusack, manager of the bicycle department of the Richards & Conover Hardware Company; treasurer, C. B. Chaeffer, buyer for the Bunting Hardware Company.

This association will endeavor to promote interest in the bicycle business in Kansas City by giving a great deal of its attention to races and to bettering the sport for the local riders.

BICYCLE MEN TO EXHIBIT AT REGULAR SHOWS

Meeting of Bicycle Manufacturers Held in Buffalo—Publicity Plans for 1917 Discussed—President Schack Is Host at Luncheon

BUFFALO, N. Y., July 1.—That the bicycle manufacturers will exhibit with the motorcycle makers at the shows to be held in Chicago and New York on the dates chosen by the latter, was decided upon at the meeting held today at the Lafayette Hotel by the Bicycle Manufacturers' Association. With President H. S. Wise in the chair and H. M. Huffman acting as secretary, two lively sessions were held at which important business matters were thoroughly discussed.

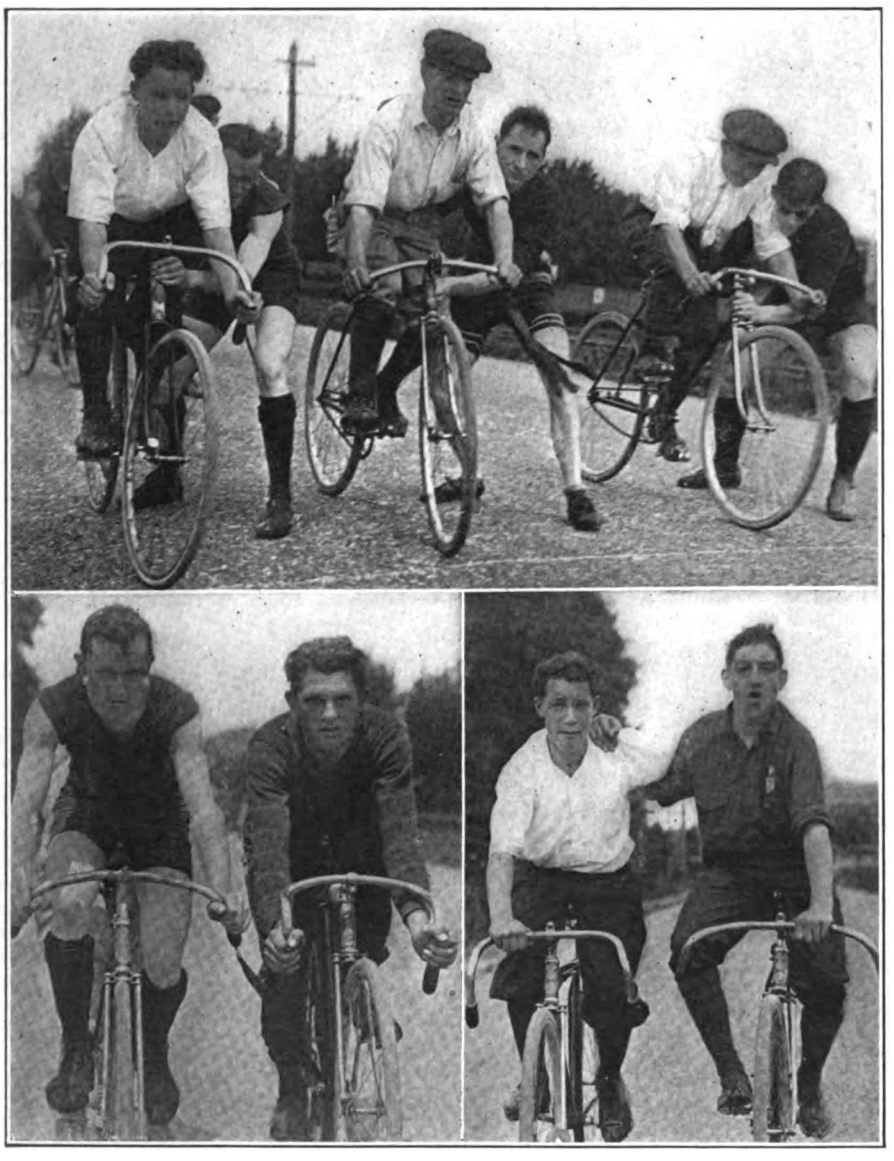
Preliminary plans for bicycle publicity during 1917 came up for consideration, though no definite action was taken. The excellent work of the "Million Bicycles" committee was highly commended and unanimously endorsed by the bicycle makers.

Adjournment was called at one o'clock for luncheon, at which Mr. Schack acted as host. This role is no new one to the president of the Emblem company and he played his part in his usual bountiful manner.

The meeting reconvened at 1:30, and after discussing other vital subjects it was voted to adjourn until the meeting of the Allied Trades Association at Atlantic City in August.

Those present were: H. S. Wise, Miami Cycle & Mfg. Co.; J. P. Fogarty, Westfield Mfg. Co.; P. P. O'Horo, Excelsior Cycle Co.; Ignaz Schwinn, Arnold Schwinn & Co.; W. G. Schack, Emblem Mfg. Co.; P. P. Pierce, Pierce Cycle Co.; E. J. Lonn, Great Western Mfg. Co.; Col. F. T. Huffman, Davis Sewing Machine Co.; H. M. Huffman, Davis Sewing Machine Co.; Fred. L. Brown, Pierce Cycle Company.

CRESCENTS STAGE HANDICAP RACE ON THE FOURTH



Above, Start of the Limit Men in the Ten-Mile Crescent Handicap. Below, (1) Sanborn and Leishaar, Time Prize Winners; (2) Doersch and Wright, Place Prize Men

BALTIMORE, Md., July 4.—The glorious Fourth was fittingly celebrated in Baltimore by a ten-mile handicap road race, promoted by the Crescent Bicycle Club. The day was fine and the course perfect. Walter Doersch, riding from the six minute mark, proved to be the winner, Wilbur Wright finishing second, and John Henkel third. Fred M. Sanborn, Crescent Bicycle Club, riding from scratch, accounted for the first time prize, George Leishear of the Woodlawn Cycle Club getting second prize.

Wm. H. McAvoy, who also rode from scratch, spilled near the halfway point, but remounted and won the fourth time prize. The race was run over a two and a half mile straightaway course on Park Heights avenue, which was in splendid condition, none of the competitors being put out of the running by punctures. Summary:

	Time	Hdcp.
1—Walter Doersch	28:56	6 mins.
2—Wilbur Wright	28:15	5 mins.
3—John Henkel	28:20	6 mins.
4—Rudolph Leimbach	28:32	5 mins.
5—W. K. Upton	27:58	4 mins.
6—John G. Stricker	28:17	4 mins.
7—George Leishear	27:20	1 min.
8—Wm. T. Wright	31:30	5 mins.
9—G. Gochnauer	30:58	4 mins.
10—F. M. Sanborn	27:00	Scratch
11—Wm. H. McAvoy	28:06	Scratch
12—L. M. Sanborn	29:01	2 mins.
13—Lester Nickles	40:36	6 mins.
14—R. Sanner	42:55	1 min.
15—W. W. Shaw	42:40	7 mins.

TIME PRIZE WINNERS.

Name. Club.	Time.
Fred. M. Sanborn—Crescent	27:00
George Leishear—Woodlawn	27:20
W. K. Upton—Woodlawn	27:58
Wm. H. McAvoy—Crescent	28:06
Wilbur Wright—Crescent	28:15

PORTUGAL WANTS U. S. BICYCLES FOR ARMY USE

A LETTER from representatives of the government of Portugal, A. Mahony & Amaral, of Lisbon, with office at 253 Broadway, New York City, states that they are desirous of securing bicycles for the use of the Portuguese army. American manufacturers are invited to correspond with them. Their letter follows:

"Gentlemen—As subscribers to **Motor Cycle Illustrated,** I hope that you will be kind enough to let us know if you are acquainted with any manufacturer of bicycles who is building a model of bicycle suitable for the use of the army, as we have an inquiry on this line from our government.

"Anticipating our thanks, we are,

"Yours very truly,

"C. MAHONY & AMARAL,

"Per Luiz Rembado."

FACTORY ADDITION FOR BUFFALO METAL GOODS

BUFFALO, N. Y., July 5.—The Buffalo Metal Goods Co. broke ground this week for a new addition to its plant. This new factory building is being erected to take care of the increased business, which for some time past has been threatening to overflow the present accommodations. It will be similar to the present building in general construction. Machinery was ordered some time ago for this extension.

CAUGHT CYCLE THIEF

LOUISVILLE, Ky.—Clyde Berry, manager of the Cycle Shop, on Third street, was instrumental in the arrest of Clarence Dudley, of New Albany, Ind., who endeavored to sell Berry a bicycle which the latter had sold to a messenger boy on the previous day. Berry called the police and Dudley was captured in the store.

PRIZES STILL NEEDED FOR CONVENTION RACES

Surre and Morehouse Send Out Second Appeal for Atlantic City Racemeet Prizes; Want Record List of Entries for Big Event

ERIE, Pa., July 2.—A second appeal has been issued by Messrs. Morehouse and Surre, constituting the arrangement committee of the Cycle Trades Convention at Atlantic City, for prizes to be used in connection with the bicycle road races which will be a feature of the trade meeting. The appeal in part is as follows:

"We wrote you some time ago, requesting that you contribute something towards the prize list for the road races to be held at Atlantic City during the Cycle Trades Convention and, thus far, we have received quite a number of prizes but not nearly enough to make these races a success.

"The only way to do this, is to have a large number of entries and in order to secure these, we must have a large and attractive prize list. Prizes are not coming in nearly so fast as they did last year, and we thought that possibly the matter had been overlooked by you.

"Some of the manufacturers are under the impression that if they have donated prizes for the races promoted by the "Million Bicycles" committee, these will take care of convention races also. Such, however, is not the case. The "Million Bicycles" committee is a separate and distinct affair, and the prizes it is soliciting are not for the road races to be held at Atlantic City during the convention.

"Please notify C. E. Morehouse, c|o The Standard Co., Torrington, Conn., or W. J. Surre, c|o Continental Rubber Works, Erie, Pa., of any action you take in this direction and send the prizes to the Haverford Cycle Co., Atlantic City, N. J."

TISDALE PROVES THAT QUALITY COUNTS

Sumpter Pope Dealer Has Made a Specialty of High Grade Wheels; Sells 700 Westfield Bicycles a Year

Interior View of H. L. Tisdale's Store in Sumpter, S. C., and (Below) a Glimpse of the Repair Shop and the Facilities for Storage

SUMPTER, S. C., July 3.—That quality tells in the bicycle business as well as in any other line, has been adequately demonstrated by H. L. Tisdale, who handles Pope and Westfield-made bicycles in this city. Mr. Tisdale has been in the bicycle business for well nigh a score of years and during all that time he has laid special emphasis on selling high priced, better quality bicycles, with the result that at the present time practically all of the 700 machines which he puts out in the course of a twelvemonth are of the better grade.

It may make some of the less progressive dealers sit up and take notice, or if they are "doubting Thomases" raise their eyebrows to learn that Mr. Tisdale thinks nothing of putting from 15 to 20 of the highest priced Pope bicycle products in the hands of his customers in the course of a day; this, of course, during the good season. A fair proportion of Mr. Tisdale's customers are drawn from among the working class, especially from the plant of the Dixie Magneto Co., which only goes to prove that the first class workman is better satisfied with high class products than with something which is less than that, despite the difference in cost.

Has Big Stock on Hand

Handling Columbia, Cleveland and Crescent wheels, Tisdale believes in stocking up on these to the full capacity of his showroom and it is rarely that he has not at least 50 or 60 bicycles on hand. The repair end of his business is a source of great profit and it is the usual thing for him to have 40 or 50 bicycles in his repair shop at a time, keeping two repair men busy for the greater part of the year.

WILEY WINS 50 MILE RACE AT POINT BREEZE

PHILADELPHIA, Pa., July 1.—George Wiley, the Syracuse Flyer, won the fifty mile motor-paced race at the Point Breeze Velodrome last Thursday night, after one of the most sensational battles ever witnessed by local fans. Menus Bedell, of Long Island, finished second, and Victor Linart, of Belgium, third. Clarence Carman, who was the favorite in the event, came in fourth, after riding a remarkable race for twenty miles. He was forced to retire because of puncture and chain trouble. The time for the race was 1 hour, 3 minutes and 21 3-5 seconds. In the early part of the feature the pace set by Wiley was terrific, the five miles between the fifteenth and twentieth mile being covered in 5 minutes and 2 seconds.

LOEB IS BUSY

LOUISVILLE, Ky.—Max Loeb, the Market street bicycle dealer, is managing to keep good and busy on sales of new bicycles and also on repair work. Loeb also recently disposed of two good second hand motorcycles which he had taken in.

DAYTON POWER BICYCLE ON COMMERCIAL VAN

Outfit Built by M. Worksman, New York, Which Is Giving Satisfaction to Small Manufacturer in Distributing Product Locally and in Suburbs

DECKS ARE CLEARED FOR SAN JOSE RELAY

SAN FRANCISCO, Cal., July 2.—Plans are now nearing completion for the thirty-mile relay race to be held at San Jose, July 9, under the auspices of the California Associated Cycling Clubs. There will be six men on each team who will contend for the cup offered by the United States Tire Company, which has now been in the possession of the Garden City Wheelmen for one year, three wins being necessary to secure permanent ownership of the trophy. Tryouts are now being held by the New Century Wheelmen, Olympic Club, Samson Wheelman, Sacramento and Garden City Wheelmen, to determine the teams which will sport their colors in the big race.

JENKINS, VETERAN CYCLIST, DIES SUDDENLY

LOUISVILLE, Ky., July 2.—Charles H. Jenkins, of this city, once a noted bicyclist, was stricken with heart trouble while attending a convention in Atlantic City last week and died. The body was brought to Louisville for interment. At the time of his death Mr. Jenkins was 54 years old.

Back in the eighties he won national fame as a cyclist when racing claimed the interest and attention of thousands. On July 4, 1882, at Louisville, in a five-mile relay race, he aided a team in winning the championship of the United States. Four days later at Baltimore, he won the fifty-mile open track event, one of the star events of the season.

32-YEAR-OLD BIKE RETURNS

NEWFIELDS, N. H., July 3.—Jas. A. Spead, a local bicycle dealer, now has a 60-inch Columbia high wheeler at his store, which he sold to a customer in 1884. It was used much in the days of the old high wheel, but was finally discarded. It was discovered a few months ago by Spead, who immediately purchased and put it on exhibition in his establishment.

WANTS BICYCLE TRACK FOR SAN FRANCISCO

SAN FRANCISCO, Cal., July 2.—Frank Carroll, San Francisco manager of the Goodyear Tire & Rubber Company, has just received a letter from Hans Ohrt, asking if some action can not be taken toward securing a bicycle racing track in San Francisco. He says the eastern riders are all enthusiastic over the idea of having a meet in San Francisco, and a big affair could be pulled off if it were only possible to get a suitable track.

WILEY DEFEATS WALTHOUR IN REVERE RACE

BOSTON, Mass., July 1.—Covering the 25 miles in 35 minutes, 53 2/5 seconds, George Wiley romped home the winner of the motor-paced race which was a feature of last Wednesday night's program. Bobby Walthour, the old boy from Atlanta, finished second, while Leon Didier was third. Didier was in the lead for the first five miles, when tire trouble put him in the rear. The time made was the fastest for the Revere track this season.

The five-mile professional was one of the best races of the evening, Ned Chanler, the colored rider, just nipping Tim Sullivan, of New Haven, at the tape. L. C. Rollins, of Everett, landed in third place.

The races at the Revere saucer are now drawing record crowds.

BALTIMORE BICYCLISTS RESPOND TO MILITIA CALL

BALTIMORE, Md., July 1.—The bicycle athletes of Baltimore, in common with those of other cities, have not been slow to respond to their country's call. Three members of the Crescent Bicycle Club, S. Roland Bishop, Thomas W. Baker and Wm. H. McAvoy, have reported for duty as members of the National Guard. Bishop is a corporal in Company M of the Fifth Regiment; Baker is a sergeant in Company K and McAvoy is a private in the Naval Militia. In addition to these three, Walter V. Iglehart is also in the employ of Uncle Sam, being a special dispatch-bearer between Baltimore and the camp at Laurel, Md. His ability to cover the ground quickly on his bicycle makes him a valuable man for this service.

CYCLEMOTOR EXPORT BUSINESS IS INCREASED.

ROCHESTER, N. Y., July 3.—The Cyclemotor Corporation of this city reports that foreign business in the Cyclemotor continues at a rapidly increasing pace. On an average of fifty of the motor attachments are being shipped monthly to Holland, while nearly forty a month are going to Portugal.

Announcement

To the Bicycle Trade

Digitized by Google

Our Policy and Purpose.

Since the Bicycling World was absorbed by MOTOR CYCLE ILLUSTRATED, the bicycle trade has not had effective representation through a separate, live and wide-awake bicycle journal, equal to all its opportunities, and qualified to faithfully record and give proper publicity to the wonderful work now being done by the Million Bicycles Committee.

The trade needs a booster paper, one well able to keep pace with those trade boosters whose mark is a million bicycles a year.

As a result of eighteen months' experience, we have determined to our satisfaction that the exclusive bicycle dealer demands a journal devoted entirely to the promotion of the best interests of the bicycle business.

Therefore, our decision to separate the old Bicycling World from Motor Cycle Illustrated and issue the former bi-weekly beginning the Saturday succeeding the Atlantic City Convention of the Cycle Trades, that is to say, on Saturday, August 5th. There will be no change whatsoever in Motor Cycle Illustrated.

We believe we understand the trade's requirements, and intend to adopt a high standard of quality in the publication of the separate Bicycling World. In the first place, the new journal will be printed throughout on coated paper, particularly to make a fine impression upon the merchant who is not now selling bicycles, but is a good bicycle dealer prospect.

And to interest new and high-class merchants in the sale of bicycles will be our constant and most important endeavor. We shall make a special effort to interest the sporting goods dealer and the hardware merchant.

We shall prove to them that selling bicycles is a good and profitable business. And we shall do all in our power to create enthusiasm in the heart of the already bicycle dealer, through a journal which will not be too trady, but whose every page, lavishly illustrated and beautifully printed, will supplement in a most effective way the remarkable work which the Million Bicycles Committee is now doing.

On the following page are samples of the articles which will appear in the forthcoming issues of the new BICYCLING WORLD, which will be issued every two weeks under the direct supervision of a business and editorial management which thoroughly understands the bicycle trade. In other words, this work will be done by men who know how. Their knowledge is the result of years of experience. They intimately know everybody of consequence in the trade. They are active, progressive and enthusiastic.

The BICYCLING WORLD is necessary. It's going to be your paper as well as ours. We propose to make it so intimate that you will have a certain affection for it, and read it with as much interest as the smallest dealer in the country. It will appeal to everybody in the bicycle trade, and everybody who can be interested in bicycles. It will be a trade paper without trade prosiness, a journal which will breed enthusiasm and good cheer from cover to cover, and it will be dressed up as handsomely as a trade paper can be.

Digitized by Google

A Line On Our Method.

Specimen articles to appear in the forthcoming issues of the BICYCLING WORLD:

BOY SCOUTS AT WORK

A simple drill.—How the bicycle is making boys into manly men.

THE BICYCLE FOR THE Y. M. C. A.

Some suggestions for dealers how to popularize the use of the bicycle among members of the various Young Men's Christian Associations in their town.

BICYCLING FOR GIRLS

A delightful sport for pretty women. They are all taking it up everywhere.

THE MESSENGER BICYCLIST

It means increased efficiency and economy, as well as a satisfied boy.

DOCTORS PRESCRIBING

A form of economical exercise over which physicians are enthusiastic. Some of the reasons why.

HOW TO ARRANGE A LOCAL RACE

Dealers, there is no better way to keep up local interest than through a bicycle race in your home town. How to go to it.

PORTRAITS OF THE MONTHLY CHAMPIONS

Cycle speedsters who carried away the honors during the past month or so.

FACTS EVERY DEALER SHOULD KNOW

How to go about trade building. Who are your prospective customers. Safe and unsafe installment methods. Interesting the parent in bicycles for his children. A series of bicycle sales letters. Also suggesting how to make the best use of them. Creating enthusiasm in your prospects.

EDUCATION THROUGH THE BICYCLE

How the senses are developed by riding. The brain and the eye, as well as the boy getting good development.

THE BICYCLE FOR BUSINESS PURPOSES

Any dealer can develop sales of bicycles to be used in commercial pursuits. The way to do it.

THE LATEST THINGS IN BICYCLE ACCESSORIES

EDITORIAL COMMENT OF THE LIVE WIRE SORT

WHY A BICYCLE AGENCY IS A GOOD BUSINESS ASSET

BOOST AND IT WILL BUILD UP YOUR BUSINESS

Finally, The BICYCLING WORLD will be a powerful factor in the splendid movement which will ultimately make possible a million bicycles a year. The BICYCLING WORLD and the Million Bicycles Campaign will be as one. They will succeed together.

Respectfully,

J. LEO SAUER, Editor.

Digitized by Google

Bicycle Dealers, Hardware and Sporting Goods Merchants

In a recent issue, the New York Times said:

"Bicycling is again attaining prominence in the world of sport. Devotees of this splendid recreation have watched with enthusiasm the renewed activities this spring and summer. There have been many road races which in number of entries equalled many events in the halcyon days of the sport. There have been 200 men at a time pedal to win, and better yet, they know that brighter days are in store for bicycling during the remainder of the year.

"And this is as it should be. There is no more entertaining amusement than a trip through the country on a bicycle. It is fine exercise, and invigorating. A plentiful supply of money is not needed. It is one of the cheapest, and still one of the most enjoyable of sports. Its return to popularity is deserved."

Bicycle Has Come Back.

Mark you, Mr. Dealer, this is not reprinted from a trade paper, but from a big and unprejudiced daily. The handwriting is on the wall—the bicycle has come back, and everybody acquainted with trade conditions believes that it has come back to stay. It's to make it stay that we have decided to separate the Bicycling World from MOTORCYCLE ILLUSTRATED, and issue the Bicycling World every two weeks, on Saturdays, as a separate, EXCLUSIVE bicycle journal.

The Bicycling World, the first number of which will be issued August 5th, will have no rival in promoting the best interests of the trade and in arousing enthusiasm in behalf of the sport. The Bicycling World will be conducted and edited by a staff which thoroughly understands cycle trade conditions, and knows the men in it. The result will be a live, vigorous and independent paper, issued just often enough to be right up-to-date, just the sort of journal a bicycle dealer or a hardware or sporting goods merchant interested in bicycling will want to read.

Only $1.00 a year—26 issues—If you subscribe now

If you are already a bicycle dealer, or even contemplate handling bicycles, you will need and will enjoy the Bicycling World from its very first re-issue. You will find it an accurate, faithful and competent guide to trade conditions. You will say, when you receive your first copy: "That's just the paper I've been looking for."

Yes, it will be your paper just as much as ours. It will be particularly valuable because of our purpose to give effective publicity and the heartiest kind of co-operation, to the splendid work which the Million Bicycles Committee is doing. The Bicycling World will be constructive; it will point the way to better and bigger things in the trade. The opportunities are there, and the editorial staff of the Bicycling World will make the most of them.

Now Is the Time to Subscribe.

By subscribing now, you will get the benefit of the low $1.00 a year subscription rate. Just pin a dollar bill to the subscription blank below, after carefully signing your name and address, and mail it today to

SWIFT PEDALING FROM BALTIMORE TO PHILLIE

Account of Interesting Trip Over 208 Miles of Varying Country Accomplished in Two Days; Delayed by Showers

By FRED M. SANBORN

ALTHOUGH the distance between the two cities is not great, the rider making the trip from Baltimore to Philadelphia will find that he traverses all sorts of country and views all kinds of scenery. I have never had this impressed on me more forcibly than on a recent trip to Philadelphia, after covering the 108 miles of hilly, rolling, and level roads that make up the route.

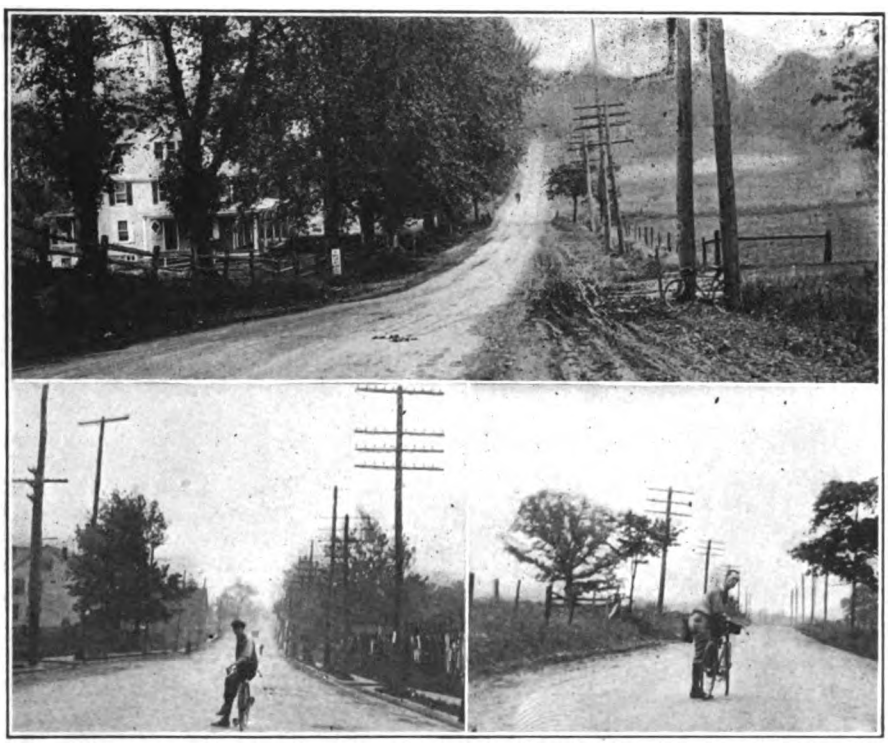
I had intended to start at noon, but owing to some unforeseen delays was not able to get away till 2 p. m., and I had arranged with my friend in Philadelphia that he start at about the same time and meet me halfway. I determined to "beat it" in order to make up the lost time. The first twenty-five miles of the route, Baltimore to Belair, are very hilly and the road passes through a prosperous and fertile farming section, lots of truck-farming being done near Baltimore; but the eighteen miles from Belair to Havre De Grace are much different, the country being mostly level and much of it being used for grazing cattle and horses.

Paced by Motor Bus

I made fast time pedaling to Belair, reaching there in an hour and forty minutes, and had the good luck to catch a bus going to Havre De Grace which paced me all the way to that point in an hour, so that I covered the first 43 miles in two hours and forty minutes. Thinking that I was now up to my schedule, I rode more leisurely from this point, crossing the Susquehanna River on the old toll bridge for a dime (automobiles, by the way, pay $1) and, proceeding over a succession of steep hills, pass through the fifteen miles of barren and desolate stretches of stunted woodland, relieved by a clearing here and there, to Elkton.

Easy Riding from Newark

I ate lunch here, and seeing no signs of my friend, kept on over the splendid State road to Newark, N. J. From Newark on, for a good many miles, the country is almost as level as a table—the fine, well-cultivated farms seem on every side affording quite a contrast to the barren woods left behind. Approaching Wilmington the road becomes a bit more rolling and continues smooth, with the exception of a few miles after leaving this city. Hard plugging was required to reach Chester.



Snapshots Taken on Sanborn's Journey to Philadelphia: Above, Rolling Road in Pennsylvania. Below (1) Leaving Chester Behind and (2) Approaching Newark

The route through Chester is remarkable, the streets being as flat as a floor and splendidly paved with vitrified brick, wooden blocks and asphalt for nearly eight miles. Leaving Chester the cyclist encounters what I consider the finest toll road I have ever seen, known as the Chester Pike. This runs for six miles, from Chester to Darby, and is as smooth as glass, and well maintained, holes in the pavement being unknown. The grades, too, are easy. Darby is practically on the outskirts of Philadelphia, although the traveler has still some ten miles to go to reach the City Hall.

Warmly Greeted by Friend

I had not that far to ride, however, my friend living in the western part of the city, and I was certainly glad of it when I reached there at 11 p. m., after having ridden for three hours in pitch darkness. Will Yorke (who I might mention, is one of the few "real" bicycle riders in "Phillie") welcomed me warmly, and my reception was worth the long ride. He explained that he had ridden as far as Wilmington when it started to rain and returned home.

The next morning dawned dismally, rain coming down pretty steadily and stopping about ten o'clock.

I determined to take a chance and started out, only to hop off after going less than a mile to replace a rubber plug that had become loosened. It was soon fixed, and I continued with no more trouble than that occasioned by dodging showers now and then till I neared Havre De Grace, when observing a big black cloud coming up, I hit up my best speed, but to no avail.

Then the Rain Came Down

Just as I reached the north side of the river the rain came down in torrents, forcing me to take shelter beneath a railroad bridge crossing the road. The rain soon ceasing, I continued my way homeward without further incident, reaching home at 8.30, safe, sound and dry.

BICYCLE TAGS TELL INTERESTING STORY

HUTCHINSON, Kas., July 3.—The "I told-you-so" triumph which is being enjoyed by the local dealers over City Clerk Metz is not making that official all uncomfortable. He estimated that 2(bicycle tags—the city fathers here demanded that every machine be numbered—would be more than enough for the season. But the dealers, feeling the brisk call for bicycles this year, told Metz that "he had the wrong dope."

And sure enough! The two hundred tags went like hot cakes. Then one hundred more were ordered. These, too, were gone in less than no time. "We have ordered still two hundred more," confided City Clerk Metz to one of the dealers yesterday, "and the way people have been coming in asking for them, I expect we'll get a couple hundred additional." Even though Metz "had the wrong dope" and the dealers are grinning, he isn't worrying for he feels that the bike deserves its great popularity.

PROVIDENCE WILL HOLD SECOND ANNUAL RACE

PROVIDENCE, R. I., July 4.—The second annual bicycle road race, under the auspices of John Montecalvo, a dealer in bicycles at 129 Spruce street, will be held on Sunday, July 9, over the course at Auburn known as the Reservoir-Park avenue course.

There will be two races, one an 8-mile novice handicap and the other a 16-mile amateur handicap. The first race will start at 2 o'clock

A liberal number of prizes will be awarded, these having been donated by various dealers in motorcycles, bicycles and accessories. The time cup will be donated by Montecalvo. In the event of rain, the races will be held on the following day, Sunday. The entry fee for the big event is $1 and for the smaller one, 50 cents.

HOW TOLEDO (O.) SPORTING GOODS CO. INTERESTS LADIES IN CYCLING

At the Left Are Shown Members of Bicycle Club Recently Formed by the Company; at the Right Appears Department Store Display with Bicycle—An Idea Suggested by the Proprietor of the Sporting Goods Establishment

HAMILTON FINDS IT'S A BICYCLE CENTER

With 100,000 Population, Canadian City Has 10,000 Bicycle Riders —Business Is Fine in All Cycle Lines

HAMILTON, Ont.—It is estimated by Hamilton motorcycle and bicycle dealers that this city of 100,000 people is one of the bicycle centers on the North American continent. There are, roughly, 10,000 bicycles in use here, which means that one out of every ten persons rides a wheel. According to the figures of local tradesmen there are also 300 motorcycles in operation in Hamilton.

Indian Business Doubled

When interviewed a few days ago by the Canadian representative of **Motor Cycle Illustrated**, Nelson Chambers, the pioneer agent in Hamilton handling the Indian, declared that his business this year had doubled that of 1915 already. Everybody in Hamilton is prosperous, and some of the working men are making from $6 to $8 per day in local factories, which is reflected in Chambers' business. A good demand has arisen for Indian bicycles. According to Mr. Chambers the motorcycle business has been handicapped through the scarcity of good mechanics. He had advertised for a mechanic for three weeks, and did not receive one application for the job. In previous years an advertisement for three days brought scores of applications. No dealer had been able this year to build up a stock of second-hand motorcycles.

In spite of good business both members of the firm of Sturgess Brothers, agents for Excelsiors and Hendersons, have enlisted in the army. Harry Sturges is now with the Royal Flying Corps, and Bert Sturgess has joined the 129th Infantry Battalion. The affairs of the company are now being conducted by the chief mechanic of the repair department.

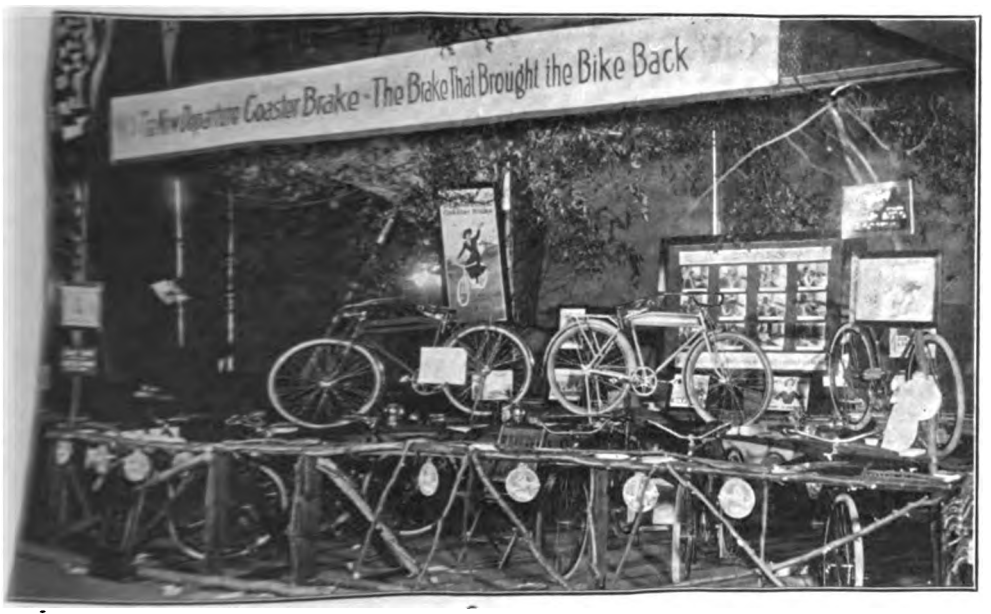
E. J. Dixon, a representative bicycle dealer and an officer of the Hamilton Bicycle Dealers' Association, figured that he had sold twice as many bicycles this year as he had disposed of in 1915. Motor attachments for bicycles have not sold well, however, he declared, because the prices, with duty added, were a little high. Bicycle deliveries were very slow, as the manufacturers had not apparently anticipated such a demand. Many women also desired to become wheelwomen, but the lady model bicycles were difficult to obtain from the factories. With a little boosting, hundreds of women would become converts to cycling, he believed, but there was really little attempt to sell to the women because of the scarcity of open-frame models.

Slow Shipments Handicap

Webb & Underhill, who took over the bicycle business of Dan Allen last winter, have made good progress this season, although they, too, complain of slow shipments from the factories. They could sell more wheels if they could keep larger stocks on hand.

The Wentworth Cycle Works, representing the Harley-Davidson motorcycle, have also secured a good share of business this year and they are preparing for even bigger things next season.

FEATURING COASTER BRAKE AT SPORTSMAN SHOW



Original Exhibit Staged by the Kaufman Bicycle Store, of Pittsburgh, Pa., at a Recent Show Held in the Smoky City

WILL TOUR TO YELLOWSTONE

WESTFIELD, Mass., July 2.—Two more riders have joined the ranks of transcontinental bicycle tourists. Myron Hulse, on a Crescent bicycle with a two-speed coaster brake, and Ed. Norton, on an Iver Johnson, have just left their native town, Hartford, Conn., and will make an attempt to pedal out to Yellowstone Park. They are carrying a dog tent, cooking utensils and other camping equipment on luggage carriers.

ACMES IN TWO RACES

BRONX, N. Y., July 2.—The Acme Wheelmen held their fourth set of cork and brassard races on the Pelham Parkway, over twenty-five riders participating. L. Hartman, from the limit mark, came in the winner of the cork race, just beating out Goebetz and DeBruyn, who finished in that order. Messner won in the Class A Brassard, beating Grundig; while Marcello licked Markey in the Class B.

DAYTON B. C. OUTING

DAYTON, Ohio, July 2.—Wednesday last the Dayton Bicycle Club held its first outing of the season at Halycon Heights, Englewood, Ohio. Games and contests of all sorts were participated in.

BITS OF GOSSIP PICKED UP AT DODGE CITY CLASSIC

(Continued from page 35)

tried out an air-cooled plug of his own design. It is fitted with radiating fins at the end to keep the electrodes cool.

Goodyear, Excelsior, Harley-Davidson and Indian pennants made the hotel lobby and dining room most attractive to the eye.

Joe Wolters rode the gamest race of the day. During the last 100 miles he hung on just by sheer grit, for he was suffering great pain from an exhaust-scorched foot.

A new machine for Boido arrived the night before the race, and he burned midnight oil getting it into shape.

Crandall and Johnston of the Harley-Davidson team were under the weather at the start, and Harry Brant sadly needed practice on the track.

The Dodge City race for 1917 is assured, Secretary Turner having already paid a sanction fee to Chairman Donovan.

Dave Kenny, astride an Indian, was still running when the race was called, with but a few laps to go.

On the 103rd lap, the leading trio, Clymer, Janke and Wolter, sped past the grandstand neck and neck.

All of the twenty-one entrants qualified by turning a lap in 1:36, or better, on the first trial.

Alfred LeRoy, the legless and one-armed cripple, who is making a trip around the country on a special Harley-Davidson outfit, dropped in to see the race. He has already covered 5,500 miles of his proposed trip.

About the busiest men about town were Carl Turner and Hiram Burr of the Speedway Corporation.

Wm. Joerling was chief checker with eleven assistants, while Henry Miller, with as many helpers, kept the times right.

Hilliard, with his foot still game from a fence encounter he received last week at Columbus, O., fought an uphill battle only to be forced out when he had reached fourth place at the 250th-mile post. First his tank burst, causing him to lose five laps when the race was still young, then the gas lead broke, setting him back a few more rounds. Then the gas pipe clogged, and the bunch went by him for another gain. But he plugged ahead until his rear shoe blew out on the back stretch.

Floyd Clymer, Harley-Davidson, was the first rider to get to the track, arriving at Dodge City on the Thursday before the race. And incidentally it is said to have been the first time he ever straddled an eight-valve Harley-Davidson.

Harry Crandall held number thirteen in the race. "No. 13 is a hoodoo!" he mocked with a grin. "I should say not. Thirteen is a dandy number. You never have to leave thirteen out on my account."

Ray Weishaar and Wells Bennett were two of the most popular boys on the track. Both are natives of Wichita, Kan., and their fellow staters took great pride in that fact.

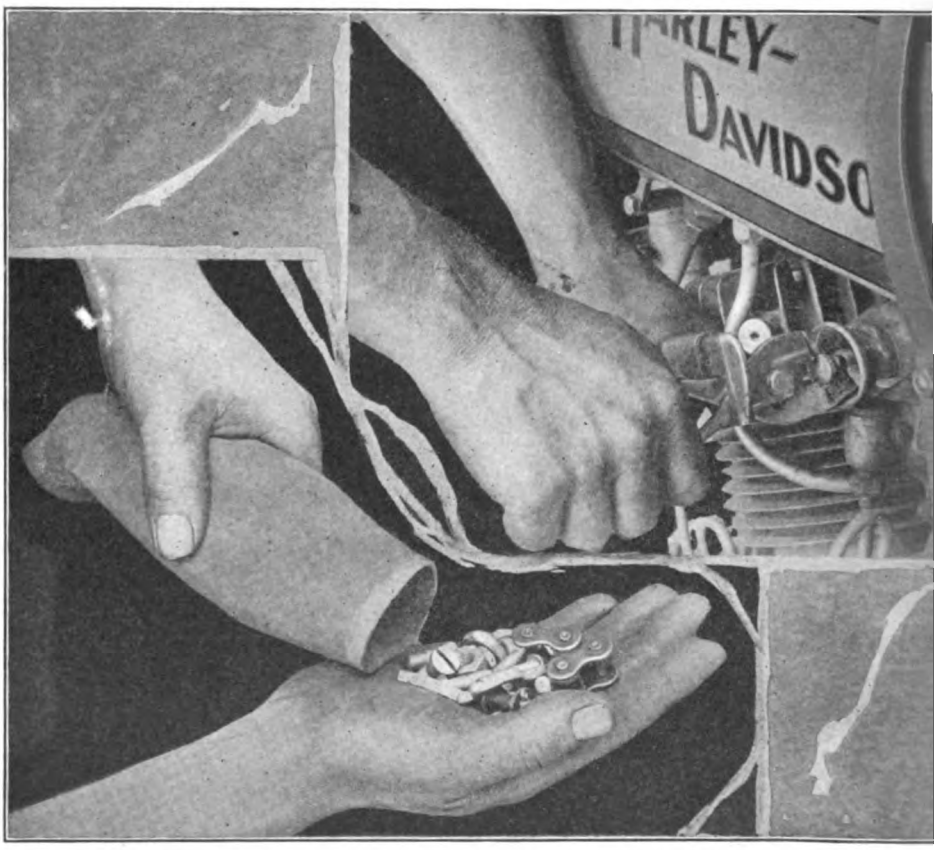
"I still need more rooms!" was the unofficial slogan adopted by J. R. McClure, secretary of the Industrial Club, long before the day of the race.

The Cowboy band which entertained the visitors had been practising assiduously for nearly a week. "Corner" concerts were held for several days preceding the big race, and the lips of every one of the "horn blowers" were in fine condition on the day of the triple century grind.

RUBSCH WANTS COMBINATION RUN TO NEEDLES

LOS ANGELES, Cal.—George Rubsch is boosting for a motorcycle run to Needles or Phoenix, to be in the nature of a combination long distance race and endurance run, with the finish at the same place and time as the big annual beach picnic of the Los Angeles Motorcycle Club

TWO USEFUL KINKS FOR THE VACATION RIDER



ONE of the most convenient ways of carrying chain parts and small screws so that they will be right at hand and at the same time kept from injury or dirt, is that suggested by Frank B. Rodger, of the Harley-Davidson Motor Co. Rodger's stunt consists of forming a holder from a section of inner tube, one end being closed by vulcanization. The end section of an old butt-end tube is fine for this purpose. The open end of the holder or bag formed thus can be folded over and held in place by a rubber band or by string. The parts within are easily dumped into the hand and will stay clean, instead of having to be fished for amid the grime which is inseparable to many tool boxes. They will also not rattle as when they are kept in a metal box.

Another of Rodger's ideas relates to t removal of the air valve casing on t Schebler carbureter, when it is necessa to change the tension on the air val spring. This spring is inside the carburet and the adjustment is made by turning nut on the inner end of the shaft.

The later models of Schebler have a be mouth on the air valve casing, with t hexagon of smaller diameter than the b The older models had a large hexagon the projecting part of the casing. To c viate the use of a wrench, Rodger sa time by inserting the jaws of a pair flat-nose pliers inside the casing, and w their edges abutting against the ribs with On a wrench being applied to the pli close to the joint, the casing can be eas and quickly removed and replaced.

The Two Big Guns of the Rollfast TRADE MARK -made to last Line

The ROLLFAST Line is a remarkably complete one. When you become the exclusive ROLLFAST dealer in your town you have a line to be proud of.

The two tires shown here are strictly new and very handsome and efficient treads. The tire on the left is made of red rubber throughout, with *real automobile tire fabric.* It has wonderful riding properties, combining resiliency with just the proper amount of suction grip to hold, without retarding the wheel turn as is common with deeply cut suction treads.

The tire on the right is our famous CHAIN CUP TREAD, our leader of which we are justly proud. The combination of perfect traction, absolute non-skid protection and classy appearance has made this tire one of the heaviest sellers of the year.

WRITE FOR MORE INFORMATION TO YOUR NEAREST DISTRIBUTOR. REMEMBER, THE ROLLFAST AGENCY BRINGS WITH IT THE EXCLUSIVE SELLING AGENCY FOR YOUR SECTION.

In the Dealer's Realm

HARD WORK BUILT WALTERS' TRADE

Father and Sons in Butler, Pa., Kept Plugging Along and Made Sales Under Most Adverse Business and Road Conditions—How First Indian Was Sold

By FRED GOHS

NINTH IN A SERIES OF SUCCESS STORIES ABOUT DEALERS

Long and steady uphill struggling against odds which might daunt a less determined man has brought success to G. H. Walter, Indian dealer in Butler, Pa. His success is of that kind which demanded aggressiveness and an unwavering devotion to the practice of dealing fairly with everybody—and he had both. He heads the firm of G. H. Walter & Co., of which the co-partners are his sons, C. S. and H. R. Walter.

Thirty-six years ago, G. H. Walter started in business in a small way in Butler, a little manufacturing town. Indian motorcycles and supplies were the main line and bicycle repairing helped out during the winter months. Business in Butler was always uncertain and spasmodic, owing to the community's complete dependence upon its one big manufacturing plant. Walter, however, plugged faithfully along, making a good living for his family and rearing them in comfort.

The Company Is Formed

Finally the time arrived when the boys were old enough to assist their father in his business. They applied themselves diligently, soon becoming expert bicycle repairers and salesmen. With their advent the business seemed to take on new life. The reason of the new energies and enthusiasm which they brought as their contribution and soon the "& Co." resulted from their efforts, for they went into partnership with their father.

The latter, in a recent interview, told how the first motorcycle sale was made by him. Somehow, the future of the motorcycle had never been very strongly impressed on the Walter brothers. An Indian catalog had reached them every week and beyond devouring its contents, they saw apparently nothing more to do. They were busy, for one thing and there were no prospects among the young men of Butler. But one day late in the fall, the boys' opinions on the subject were to be revised.

The First Inquiry

One day an unobtrusive little fellow, of sixteen years, stepped into the Walter store and asked whether motorcycles were sold. H. R. Walter replied that they were and that they didn't have one in the store just then. He then showed the boy over the catalog and went over the matter with him. The prospect then asked if he might take the catalog home, to which Walter assented, not that he figured the prospect as a future buyer, but just to be accommodating. He warned the prospect to bring it back for it was the only one in the store.

An hour later, the lad returned with the catalog and also an order for a motorcycle—one of the 1907 "camelbacks"—upon which he made a cash deposit. That machine was the first machine that appeared in Butler, and it created quite a stir. Let it be added here, that this same lad who bought the first machine in Butler, two years later bought a loop frame which was the first of that style that the town ever saw.

Going After Them

Well, that first sale—made so unexpectedly and late in October—roused the Walter boys to the realization that right in their own town lay the opportunity for expansion which they had been wishing and hoping would some day come their way. To be sure a single sale was not the sure index of an existing market, but it was an indication that there *might be* a market if they got out and did their level best to create one. The fact that a fellow knowing fully the condition of the roads in the vicinity of Butler came in and *asked to buy* a machine indicated that to some extent the objections to poor roads would be overcome if the man who became interested in the motorcycle could be made to think that he could get full enjoyment out of his machine, in spite of the limited circumstances existing about him. Anyhow, the Walter brothers got the idea and they immediately set out to test it.

H. R. Walter

They got among the fellows of their town and hustled. They made it their business to acquaint every fellow within reach with the fact that motorcycles existed, what they looked like, what they would do in the way of pleasure and business, and with every other fact that could possibly operate to interest those to whom they carried their message. They talked Indian as fervently as a small boy plays "Indian"—although of a different kind.

They Sell Twelve

The following spring, 1908, a demonstrator machine was obtained, and the ceaseless hammering of the Walters was renewed with even greater vigor. The results of their efforts was the sale of about a dozen machines, not to mention the arousing of considerable interest upon which they were later to cash in.

Then came the panic year of 1909 in which sales dropped back to three machines. However, with the economic situation more nearly normal, their undaunted efforts brought about a big jump in sales for the year 1910, that is, it was a big jump for a small town like Butler where the riding conditions were far from attractive. From then on the number of machines put out by G. H. Walter & Co. increased steadily, reaching finally in 1915 the high mark of thirty-two.

Studied Selling Methods

Each year that the Walter brothers have been in the motorcycle business they have been students of progressive selling methods. They have always made persistent use of the dealer helps which have been sent to them from time to time by manufacturers and each year their application has been rewarded by an appreciable increase in sales and profits. In all the campaigning that they have done, they have held faithfully to certain fundamental principles of salesmanship and to these they attribute a large part of their success. A square deal to all is one of these. Hence, they have a large and faithful following of Indian riders who swear by the Walter boys.

With eight years of successful motorcycle selling behind them, the Walter brothers are determined to make their showing

Digitized by Google

for 1916 a record-breaker. They started after every man in town. They used the telephone and it brought excellent results. "We call a man up," said H. R. Walter, "and make a date with him. At the appointed time we are there with a sidecar demonstrator and he gets a ride. We explain things during this ride—even to each small detail of the machine's operation. Then we keep everlastingly after him.

"We ride him every chance we get," he continued. "Then he gets the fever and eventually sells himself. That's our system, and we find it unusually successful. But the whole secret of it is keeping everlastingly at him and then treating him square after he is sold."

As proof of the genuine worth of the selling methods of G. H. Walter & Co. there stands the undeniable index of its success in an increase in sales thus far in 1916 amounting to over 100 per cent. Enthusiasm, hard work, and right methods have won out for them, and their record may well be held up as an example of progressive salesmanship.

SELLS THREE HENDERSONS IN ONE DAY

SAN FRANCISCO, July 1.—The Motorcycle Sales Company, local agent for the Henderson, had quite a run of business last Saturday, when sales of three new Henderson machines were closed in the one day. Mr. Laudenclos of this company is confident of an active fall trade.

Tennant Lee of Los Angeles, Henderson distributor, who has been riding through the northern California towns, made sales in nearly every town he struck last week. He is now riding through the San Joaquin district.

CAN'T GET ENOUGH SILENT GRAYS, SAYS FRASER

SAN FRANCISCO, Cal.—Manager Fraser, of the local branch of the Appeal Mfg. & Jobbing Co., has just returned from a short trip to the Los Angeles office. He says business is holding up in good shape and that, although he anticipated the needs of the trade as far ahead as possible, he still finds it impossible to keep up with orders. The carload now due has been sold out for some time.

THIS RIDER NEGLECTED TO SETTLE HIS BILL

CLEVELAND, O., June 27.—Dealers and riders are requested to keep a lookout for Edgar H. Dubois, late of 1414 Walnut street, this city, who left the city June 23 with a 17 model big-valve short-coupled Excelsior, the motor number of which is A-398. Dubois's license number is 14920. The machine carries an E-N tandem. There is still a large amount due the Haverford Cycle Co.'s branch, where the machine was bought, and information should be sent there. It is believed that Dubois and a tandem passenger headed for Detroit or a Canadian point.

KIPP TAKES ON DOUGLAS

TORONTO, Ont.—The H. M. Kipp & Company, Limited, Toronto Indian agents, have secured the sales privileges for the Douglas motorcycle, formerly handled in Toronto by W. Porter. A shipment of three motorcycles has already been received and further deliveries have been promised in spite of the demands of the British War Office. The Kipp company now handle the Indian, Douglas, Tiger and Dayton for the Toronto territory. Mr. Kipp reports the sale of a large number of Tiger and Dayton motor-bicycles to enthusiasts of outside points.

TRADE ASSOCIATION FORMED IN ROCHESTER

ROCHESTER, N. Y., July 3.—The Rochester Cycle Trades Association was formed here last week by the cycle dealers of this city, its chief object being to popularize the two-wheeler locally for commercial and pleasure purposes. The publicity campaign of the association will be ably handled by C. Pippincott, G. Miner and F. B. Towner.

DRAPER HAS HIS TOWN "BOTTOM UP"

SANTA CRUZ, Cal., July 2.—Draper, the motorcycle man of Santa Cruz, seems to have a cinch on the business of that community. He is the only dealer in that popular summer resort, and has agencies for the Excelsior, Harley-Davidson and Indian lines, in addition to which he is ready to take orders for any make of machine desired. He is giving good service and has made his establishment a popular resort both for local riders and visitors from other points, of whom there have been a great many this summer.

MOTORCYCLES IN SHANGHAI

In a recent consular report from Consul General Thomas Sammons, at Shanghai, China, it is stated that there were 27 more motorcycles licensed in the international municipality in 1915 than in the preceding season. The taxes on motorcycles in the municipality are $3 per quarter.

Over 11,000 Miles

On Vitalic Tires!

What ordinary bicycle tire could come anywhere near that record? None! It took VITALICS to do it.

Out of over 60 tires used during a period of 25 years by Dr. F. S. Cate of Florence, Cal., the Vitalic was the only one to reach anywhere near this mileage. Among the 60 tires used were the *very best* of other makes, a number of them much higher priced than the Vitalic. But Vitalics ran *more than three times* the average mileage of the seven next best makes of tires used (based on an accurately kept mileage record sworn to before a notary).

It is this unmatched *mileage* which Vitalics are giving wherever used that proves beyond question their unequalled standard of construction; highest quality of rubber instead of the cheaper grade put in ordinary tires; two plies of heavy *motorcycle* fabric, frictioned with pure rubber, instead of common bicycle fabric; an extra heavy inner tube of pure white rubber.

Write for the testing section and examine these features of construction thoroughly.

VITALIC TIRES
TRADE MARK
For Bicycles

Dealers—

Think what you could do with a tire like that!

There isn't any room for doubt—Vitalics have proved their supremacy over **all** other bicycle tires wherever comparison has been made.

Thousands of dealers rely on the Vitalic to make their tire profit. Once introduced, it easily brings a better price than ordinary tires, and always sells over and over again to the same trade, because it never disappoints.

Translate It Into Terms He Understands

WE of the trade are apt to think of a motorcycle in terms of power-delivery, spring construction, gear control and all the mechanical details.

But to your average prospect these things are often not important unless translated into terms he understands.

That the Pope overhead valve motor delivers a maximum of 18 h.p. may mean much or nothing to him. But when you tell him it will carry him easily up the steepest hill in the neighborhood—that with it he can travel at the rate of a mile a minute, if he wishes—that it will run 60 or 65 miles on a gallon of gas—you are giving him facts that he can grasp at once.

He wants to be told that with the

Pope Three Speed Twin and Side Car

he can take his wife or friend to a point sixty miles away in two hours or so—that the Pope spring suspension and spring fork give automobile comfort—and that the three-speed construction gives automobile control.

He is interested in the noiseless operation, the cleanliness and the absolute dependability of the Champion of the Hills. Go over these points in a way he'll understand—then demonstrate them on the road.

Try this with your next prospect and see how quickly he becomes a customer—not only for a Model T-16 but for a sidecar and all the fixin's.

Westfield Manufacturing Company

HERTWICK & WEILHEIMER DISSOLVE PARTNERSHIP; WEILHEIMER IN NEW STORE

FRESNO, Cal.—The old established firm of Hertwick & Weilheimer, who have been handling the Indian motorcycle for years, has been dissolved. Johnnie Hertwick will continue to do business at the old stand, handling a full line of sporting goods, bicycles, fire-arms, etc. Louie Weilheimer, the junior partner, who has been the promoter of the last two successful motorcycle meets in Fresno, has taken over the agency for the Indian for the valley, and has equipped a fine store, having in the rear a complete motorcycle garage and many original features.

The workroom proper is partitioned off so that the public will be excluded, but provision has been made for a little tinkering by anyone who wishes to do a little work of his own. A bench with some tools and a roomy place to work in has been reserved for this.

Special attention has been given to the display window by Mr. Weilheimer. He has remodeled the entire front of the building to conform to his own ideas as to window space, and one glance at it reveals the fact that he knows how to deliver the goods. Large, spacious windows well filled with everything in the sporting line, including several Indian machines, makes a strong appeal.

NO SLUMP IN "X" SALES

PHILADELPHIA, Pa.—While it is often assumed that motorcycle sales fall off materially at this time of year, the Haverford Cycle Company apparently does not anticipate such conditions during the present season, as they have just instructed the Excelsior company to continue shipments at the rate of a carload of Model 17-3 machines per day to Philadelphia and the same number per day, made up of several models, to be furnished the different branches of the Haverford Cycle Company.

PHILADELPHIA, PA.

WM. G. RHODES, Reading Standard Agent for Philadelphia, and Charles Humphreys, of Philadelphia, were visitors at the R. S. factory quite recently. While in that city they were acting as secret timers for the Philadelphia Motorcycle Club during the recent run.

THE U. G. I. CO., of Philadelphia, has recently been conducting an extensive advertising campaign, featuring a quick service which that company rendered during the 24 hours of each day. This company uses the R. S. machine exclusively and have 160 machines in every day service. Thus far they have ordered 70 additional R. S. machines this season. After making comparative tests they have found the motorcycle to be the most economical method of delivery known.

Many other gas companies throughout the country are adopting the motorcycle in their service department, and the R. S. Company reports business exceedingly good in that line.

HOEGEE OPENS RETAIL DAYTON STORE

W. H. HOEGEE COMPANY, of 133 South Main street, Los Angeles, have openel a new retail store for Dayton motorcycles and bicycles in the heart of the Motorcycle Row at 911 South Main street. Al. Glodt is manager of the store. A fine line of clothing and accessories is carried in addition to the Dayton. The wholesale distribution of the Dayton and the accessories carried by Hoegee will continue to be handled from the main store at 138 South Main street, where William Larissey has general charge of the cycle department.

Atlanta, Georgia, Office, Candler Building

SAN FRANCISCO, CAL.

JOHN M. BAUMGARDNER, San Francisco Indian dealer, says an unusual number of sidecar outfits have been sold this season, and they seem to be gaining in popularity, especially for family use. A lot of people, he says, are beginning to learn that a good sidecar is an easier-riding vehicle than most automobiles, and this fact sells a good many machines that would not be sold otherwise.

THE DAYTON motor bicycle has started off with a bang at the little town of Fortuna, Cal., where the first demonstrator appeared last week. Fred Simons, a dealer of that town, was in San Francisco a few days ago to visit W. E. & W. H. Jackson, the Dayton distributors, and took the chance to make the closer acquaintance of the motor bike, which he had formerly seen only in illustration. As a result he took home a demonstrator, which he sold almost the minute it was off the car, and he took a deposit on a second the next day. He is now waiting for another, as the Jacksons are all out of stock and are awaiting a lot that will be shipped this week.

EDWIN F. MERRY, distributor of the Excelsior, says the sale of the lightweight "X" has picked up noticeably during the last few weeks, especially in the San Joaquin valley. This he attributes to the fact that a lot of the younger riders are earning money during their school vacations with which to buy the long-coveted machines. Mr. Merry reports the arrival this week of two carloads of bicycles, which will put him in a strong position in that department for some time to come, and the shipment is especially welcome, as everybody is having difficulty in getting further deliveries.

THE COLD AND WINDY WEATHER of the last few weeks, worse than usual for this time of year, has rather put a damper on the local motorcycle game, and several dealers report sales nothing extra; though the season still compares favorably with former years, and business is keeping up well in most parts of the country.

THOR dealers are taking a great deal of interest in the new 17 model Thor, the first shipment of which, due to arrive about the first of July, is very anxiously awaited.

THE local store of the Appeal Manufacturing & Jobbing Company has just received a car of bicycles, which were badly needed, and are expected to move out very fast.

ROBERT K. LARSH, factory service representative of the Davis Sewing Machine Company, is making a visit to the Dayton distributors along the Pacific Coast. He is now in southern California, where he will spent about three weeks, and will later spent a fortnight with W. E. & W. H. Jackson in San Francisco, going north from here.

ERIC CHEMNITZ, formerly motorcycle salesman for Johnson's sporting goods house at Stockton, Cal., has joined the force of W. E. & W. H. Jackson of San Francisco, for whom he will cover the San Joaquin valley.

READING, PA.

C. E. WILLIAMS and the Barbour Bros., of Hopeville, N. J., have recently paid a visit to the Reading Standard factory while on a prolonged pleasure trip throughout the country. These boys are great motorcycle enthusiasts and take extensive trips throughout the vear.

Mr. Williams is a newly appointed Reading Standard Agent for Hopeville, and has disposed of a large number of machines this season.

THIS MUCH IS CERTAIN

Electric Lamps and an "Exide" Battery furnish the most efficient and reliable light for motor cycle use

"Exide" Battery, Type 3-ZA-5 with cable type terminals

You no doubt realize the numerous advantages of electric light for motor cycle use.

The reliability of an electric lighting system is of course dependent upon the storage battery which furnishes the current.

The "Exide" Battery, type Z, especially designed for this service, is a quality-product, manufactured and backed by the oldest and largest battery maker in the country.

The battery is contained in a one piece, three compartment vulcanite case, having heavy walls and substantially re-enforced.

It is fitted with a one piece cover, having a flange which fits around all sides of each compartment.

The "Exide" Battery is equipped with a flood proof filling plug which overcomes slopping and spilling, and also limits the amount of water that can be poured into a cell to the exact amount needed to replace that lost by evaporation. The result is a clean, dry, and attractive battery.

Motor cycle dealers and users should write us at once and secure the name of the "Exide" Distributor nearest them.

THE ELECTRIC STORAGE BATTERY CO.

Do You Know How?

It is often necessary to write a word or phrase exactly in the center of the paper. It is simple on the L. C. Smith & Bros. typewriter. Do you know how?

Do you know the best way to insert a large number of sheets of paper and carbons at the same time, so that the edges will all come even?

Do you know how to "half-space" so that you can write in an extra letter and still have the work look well?

Do you know why the use of the Variable Line Spacer increases the life of the platen?

Do you know what can be done with our Variable Line Spacer that can not be done with any other?

Do you know the best way to insert a sheet of paper?

Do you know how to "front feed" envelopes?

If you cannot answer "yes" to all these questions, it will pay you to send for the booklet—"*The Silent Smith.*" It's yours for the asking. Drop a card to

IWIN JACOBS HIGH-SCORES IN JACK PINES RUN

(Continued from page 20)

end of the noon hour, he laid the machine gently on its side, stood firmly on its thorax and tried to pry the bias out of the fork, straightening it enough so that he was able to continue.

The last man to arrive was Vandenberg, Excelsior, who checked in just as the last of the others was ready to leave for the afternoon trip. His oiler had been holding him up persistently, but he stopped at the noon control long enough to fix it, so that from this time on he expected to "roll to it" strong.

After leaving the noon control, most of the riders lost a few more points before they got to Roscommon, for the roads grew worse if anything. Sand was tastefully interspersed with corduroy road and marsh, so that when they weren't sloughing in the deep powdery stuff they were bumping the cross logs and fighting to keep out of the deep, slimy pools in the ditches.

Baker and Jacobs showed their mastery of hard road riding by making this stretch on time. Most of the others were close, though Vandenberg and Long were of course quite late because they had delayed so long in Houghton Lake to fix up their machines.

The last few miles into Roscommon were fine ging, with a hard gravel road winding among the thickets of short, dense evergreen. The song birds trilled their songs from the underbrush to the accompaniment of the deep bass purr of the motors.

The thick green carpet of grass was sprinkled with white clover blossoms and wood flowers that grew by the roadside. The scent of the pine needles struck pungently in the nortrils of the riders as they hurried along.

Such stretches as this put all the joy back into life again after the terrible battles in the sand that had been fought earlier in the day, and though this good stretch didn't last long it was enjoyed to the limit while they were on it.

The riders checked at the Roscommon House, the chief hotel, and then sallied north again with their helms set for Alpena, the night control—and with many another long hot siege of loose, powdery sand and sticky swamp mud to be conquered before they reached that point for a well-earned night's rest.

HELPS THE TIRE REPAIR MAN

HUNDREDS of vulcanizers have asked for the new Goodyear Manual of Tire Repairing. One of them has this to say about the book:

"I think it is a great help to any one just beginning to work at tire repairing. I know that it has helped me a great deal, because since I have read the Manual through, I have more confidence, and also know that my work has improved."

Any vulcanizer who has not received his copy of the Manual should write to Dept. P, The Goodyear Tire & Rubber Co., Akron, Ohio.

"A DAY WITH THE INDIAN MACHINE GUN"

A NEW folder headed "A Day with the Indian Machine Gun" is now being distributed from the Springfield factory. It shows seven striking views of the latest Indian machine gun motorcycle outfit, in various phases of field activity, and also embodies descriptive matter relating to the machine gun combination and its capabilities.

The folder also expresses the willingness of the Hendee staff to confer with military officials at any time relative to adapting the Indian motorcycle to angles of army service, for which special designs have not so far been worked out.

ACTIVITIES ARE MARKED AT HENDERSON STORE

LOS ANGELES, Cal.—The Henderson store in Los Angeles has been completely re-arranged with accessory counter and shelves near the front of the store. F. A. Sutphen has taken another step in advance in the matter of window dress, having framed the machine in a figured cretonne drapery, which adds a great deal to the appearance of the display. Mr. Lee, one of the proprietors of the Henderson Motorcycle Sales Corporation, is again traveling in the northern part of the State, and reports good business conditions and interest in the 4-cylinder machine. He has just appointed Steam Vulcanizing Works agent for the Henderson at Vallejo.

Irving Beck (Service Station), 1493 Fifth Ave., New York

NAMES—NAMES—NAMES!

By the hundred, or the thousand, as many as you want—Mr. Dealer and Mr. Manufacturer—Names and addresses of the motorcyclists and automobilists who are registered at the New York State Capitol. The motorcycle registration law just went into effect, and here is a splendid opportunity to get business by circularizing the riders of any part of, or the entire State of New York.

We Furnish These Names at Lowest Prices

We copy official automobile and motorcycle records in the Capitol here and can compile a list of the auto or motorcycle owners for your section of the State, at lowest rates, sending you supplements, giving the additional registrations. We can compile a list of owners of any particular motorcycle or automobile you may wish a list of.

We can also furnish a list of owners of any city, county, district or territory you may desire.

Dealers are making good money, and creating a lot of new business by using our lists. Now is the time to write riders in your territory for repair work and new accessories. Get our list now. Beat your competitor to it.

STREAKS

Good-bye Street Car!

IF WE can get the bicycle dealers of America to explain the significance of these three words to the Straphangers of America, there will be fewer crowded street cars and many more happy bicycle riders.

And your own bicycle business will probably double.

As for tires, Goodyear Blue Streaks are the only standardized tires on the market—one tire, one price, one guarantee.

Do you see how this standardization eliminates confusion on the part of the tire buyer? Do you see how it enables you to carry a smaller stock of tires because you need carry only *one* style and *one* size?

Because it takes less money to stock one tire, Blue Streaks, you are left more capital for other lines.

Buying the Blue Streak way is prudence, foresight, good business. It is the way of over 10,000 bicycle dealers who are now Goodyear Bicycle Tire Dealers.

Write for particulars concerning this Goodyear square deal policy—or better still, ask the Goodyear salesman.

HARLEY-DAVIDSO

Fourth of July victories on mile and half-mile tracks should not be overlooked because of the overwhelming importance of the cleansweep on the two-mile speedway at Sheepshead Bay and the two-mile dirt track at Dodge City. The Harley-Davidson with good riders is a consistent winner in all kinds of competition.

In the midst of the congratulations on again winning the Dodge City race—breaking all records right straight through from 3 miles to 300 miles—and on making a cleansweep at Sheepshead Bay—the F. A. M. Two Mile Championship—1st, 2nd, 3rd, 4th and 6th in the 100-mile—1st, 2nd and 3rd in the 10-mile—"etc., etc."—we must stop to write down in history that a lot of good fellows in other places were—at the same time on the Fourth—riding the Harley-Davidson to victory.

Boise, Idaho, and Bellingham, Wash., were the two western-most states where there were race meets of importance. At Boise on a mile track the Harley-Davidson ridden by Williams won the 10-mile races for stripped stock in 9:25 and 8:50 respectively and in the 10-mile race for fully equipped machines brought home the bacon in 10:30. The fastest mile of the day was made by Williams, 50 seconds—on a Harley-Davidson of course. Frank Joyce and his Harley-Davidson romped home at Bellingham against big valve and short coupled machines of other makes.

At Grand Island, Neb., the Harley-Davidsons had further two-mile track opportunities. They finished 1st and 2nd in the 15-mile club race, and in the 25-mile free for all against eight valves again finished 1st and 2nd. Lewis Stotts on a Harley-Davidson was the big winner at Temple, Tex., taking all three events July 4.

In the half-mile track races at Greenville, O., Smith on a Harley-Davidson got a poor start, but picked up all the other contestants one by one and beat them all over the finish line. The above races were with pocket valve Harley-Davidsons.

And the four valve? Lou Crist was doing things at Pittsburgh while the eight

Digitized by Google

CONSISTENCY

valves were cleaning up at Dodge City and Sheepshead Bay. On the half-mile track at Pittsburgh he not only won but in the 10-mile was pitted against four valve and ported machines, and in the 5-mile reduced the track record from 5:57 to 5:53 3/5.

At Baltimore on the Fourth the title to the 2-mile State championship of Maryland was won by Freddie Tiemeyer on a Harley-Davidson. Gus Heinz, Harley-Davidson, won the 5-mile sidecar race, and in the 10-mile sidecar race it was Paul Mammock 1st and Gus Heinz 2nd, both on Harley-Davidsons. "They all inhaled Harley-Davidson gray smoke today at Moundsville," was the introductory sentence of a telegram announcing that Lawrence Keys and his Harley-Davidson were still on the job.

At West Virginia, in the races which were held July 8, Keys won the 5-mile, 10-mile and 5-mile handicap, and in the 5-mile time trial he lowered the track record by 2 seconds. The 3-mile sidecar race was won by Beyers, also on a Harley-Davidson. July 9 was a big Harley-Davidson day in Nebraska, the riders on Gray machines winning 1st, 2nd and 3rd. In the 50-mile State championship, on the half-mile dirt track at Nebraska City, Pete Petersen won the race in 1:16:35. Ray Roland was second in 1:20:18, and Otto Remer 3rd, in 1:20:27:

The Harley-Davidson can be counted on always. It is the motorcycle for you.

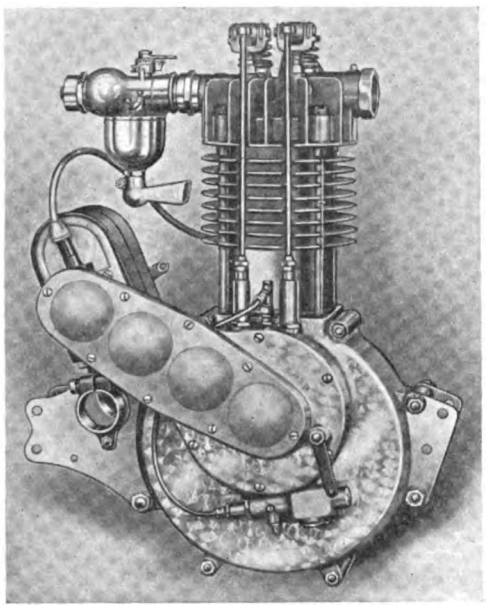
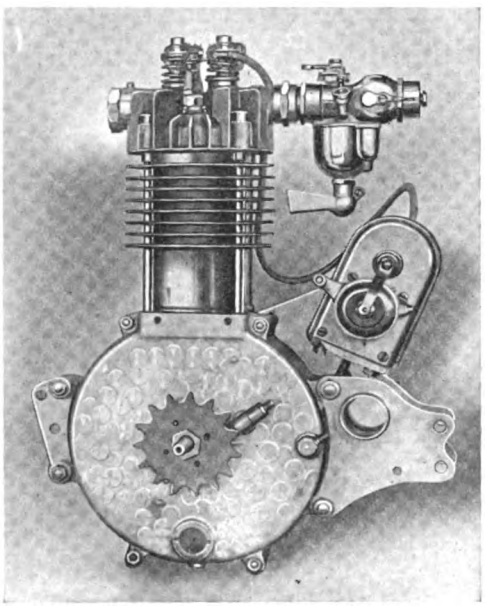
Simple as A-B-C



Right-hand View



Left-hand View

The Powerplant of the *Pope* Big Single

The simplicity of the Pope single cylinder motor influences many new riders to choose Model M-16. Their timidity about things mechanical vanishes when they see how few and how easy to get at are the parts of this single's powerplant.

In this model they gain extreme simplicity without sacrificing power, speed or comfort. The M-16 motor develops from seven to ten horsepower, it speeds up to fifty-five miles an hour and it is equipped with the famous Pope rear suspension and spring fork that protect rider, tandem passenger and motor from shocks and vibration.

The Pope Big Single has achieved a reputation for conquering hills and pulling through bad spots that leave many twins helpless. It is recommended by its light weight, big gasoline tanks and low price.

If you haven't a Model M-16 on your floor, get one today. It will pay you.

U. S. Gov't Chooses Blue Streaks

There doesn't seem to be a doubt as to the National Government's preference in tires.

Goodyear Aeroplane Tires were long ago adopted as standard equipment for aeroplanes used by the United States Army and for the land machines of the United States Navy.

Goodyear Truck Tires were specified on 167 Packard Trucks recently purchased for the Army Service.

Goodyear Blue Streaks were the specified tires on the 51 Indians sent with the Army into Mexico.

Such a tire verdict seems to be proof positive of the sturdiness and dependability of all Goodyear Tires and justifies your belief that Blue Streaks are the best motorcycle tires made.

United States Tires Win

On July 4th at Sheepshead Bay, Richard Buttlar won the 25-mile New York State Amateur Motorcycle Championship in 18 minutes and 34 seconds. Buttlar also won the 10-mile Amateur Motorcycle Championship in 7 minutes and 35 2/5 seconds. These records were made on a Harley-Davidson motorcycle equipped with United States Tires.

On the same day I. F. Jacobs won the Jack Pine Endurance Run at Grand Rapids, Michigan, on an Indian Motorcycle equipped with United States Tires, thereby winning the title of F. A. M. National Road Champion, which prize was at stake for the first time.

These records prove the amazing speed and endurance qualities of United States Motorcycle Tires both for track and road work.

If you want thorough tire satisfaction on road or track, use United States Motorcycle Tires.

EIGHTEEN MANUFACTURERS JOIN NEW ASSOCIATION

Membership of Motorcycle and Allied Trades Association Is Brought Up to 42 by Inflock of Trade Folk Who Realize Its Import—All Show Enthusiasm for the Movement in Membership Applications and Promise Whole-Hearted Support

NEW YORK, July 11.—That baby association which was born in Milwaukee the middle of last month and christened the Motorcycle and Allied Trades Association, is fast acquiring its full growth as more and more of the cycle trade folk are brought to a full realization of its aims and purposes and the immediate possibilities of their accomplishment. During the last week eighteen new members allied themselves to the original 24 manufacturers by whose efforts the body came into being. Included in the number are two motorcycle manufacturers—the Reading-Standard Co. and the Schickel Motor Co. The other sixteen are parts and accessory producers.

The newcomers and their expressions of approval accompanying their membership applications follow:

Stevens & Co., New York—"Always in sympathy with any movement that will tend to assist in the popularity of either the bicycle or motorcycle."

Can Count on Eclipse

Eclipse Machine Co., Elmira, N. Y.—"You can count on us to do everything we can to boost and stimulate the motorcycle business."

Reflex Ignition Co., Cleveland, Ohio.—"We assure you that if we can be of any use in the way of lending influence to the betterment of the motorcycle business, we will be glad to do so."

Seiss Mfg. Co., Toledo, Ohio.—"You can count on us as members of this association."

Schickel Motor Co., Stamford, Conn.—"This company will be very glad indeed to lend its name and support to the objects and purposes of the Motorcycle and Allied Trades Association."

The Silvex Co., New York, N. Y.—"We are pleased to co-operate in a policy of uplift in the motorcycle business."

Ericsson Mfg. Co., Buffalo, N. Y.—"We are certainly interested in every movement which will increase the sale of motorcycles and we are glad to endorse the efforts of this association."

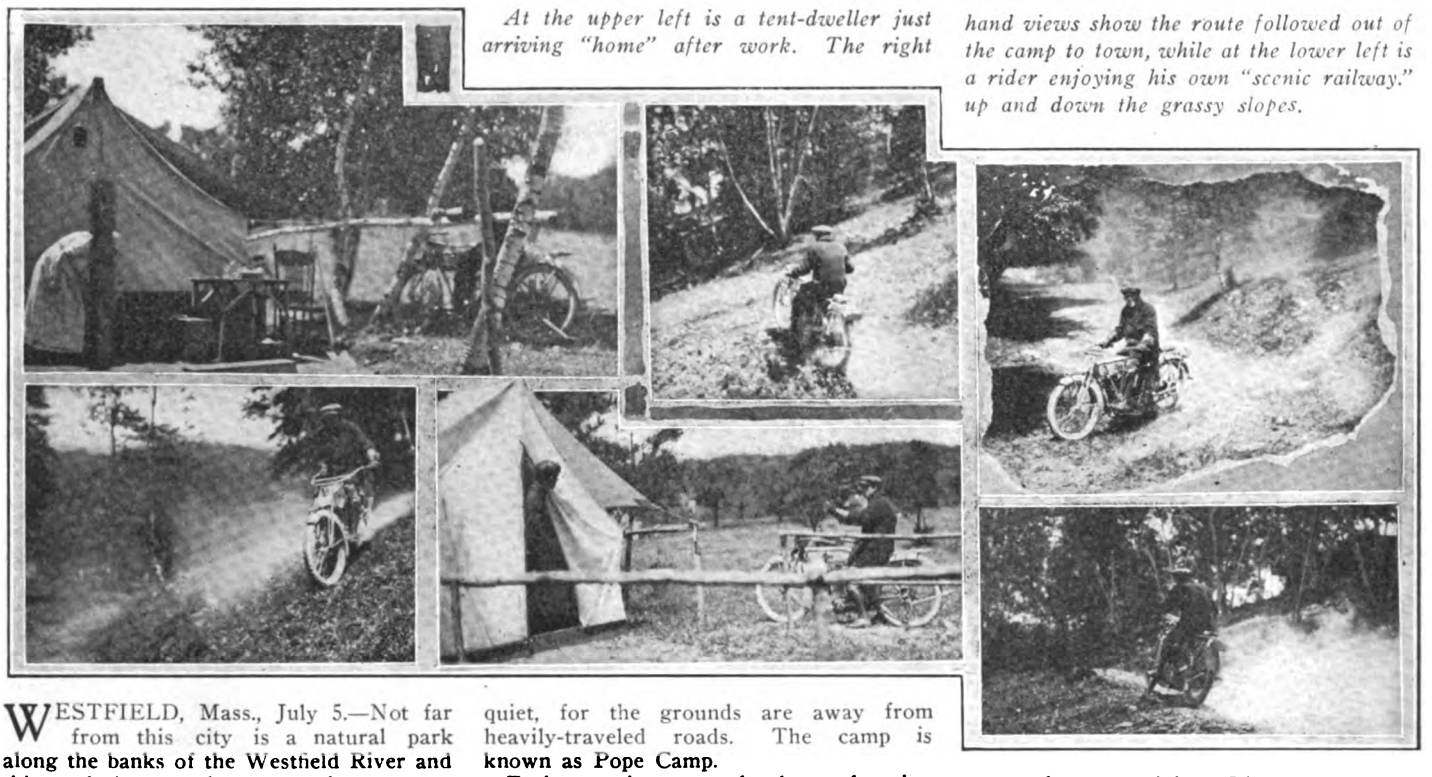
WESTFIELD MEN ENJOY LIFE AT POPE CAMP

Employees of Veteran Cycle Company Establish Summer Colony Under Canvas and Use Their Motorcycles to Travel To and From Work Each Day



At the upper left is a tent-dweller just arriving "home" after work. The right hand views show the route followed out of the camp to town, while at the lower left is a rider enjoying his own "scenic railway." up and down the grassy slopes.

WESTFIELD, Mass., July 5.—Not far from this city is a natural park along the banks of the Westfield River and this park is now the scene of a summer camp of a number of the boys from the Westfield Manufacturing Co. On the gentle slope toward the river are to be seen numerous canvas homes, some with rustic fences and gardens and flower beds, and others not so pretentious. There is good drainage, abundant wood and water and quiet, for the grounds are away from heavily-traveled roads. The camp is known as Pope Camp.

Each morning sees the boys chugging merrily to work on their Popes, while their families are left to the boating, fishing and other pleasures of camp life. Each noon and evening sees the Westfield workers back again, enjoying the vacation of their lives.

On holidays, this novel camp is the scene of great activity. Riders are everywhere, chasing each other about the flat sections, doing stunts on their Popes up and down the slopes and starting for town on errands. The unanimous opinion of the crowd is that nothing can beat life in Pope Camp, and that motorcycles made this life possible.

PROVIDENCE GOODYEAR IN NEW QUARTERS

PROVIDENCE, R. I.—Manager Smith, of the Goodyear Tire & Rubber Company, has taken up new quarters in this city. with a larger amount of floor space for display and storage. He has taken a store for a salesroom adjoining that of the Dodge Automobile Co., with a cellar for shipping and storage purposes. His private office is right on the sales floor.

There are conveniences for shooting tires into the cellar after adjustments have been made by means of an incline, while another chute carries the stock to another level. As the Goodrich firm is occupying a block nearby, this has become the tire center of Providence.

WANTS ADVERTISING FOR CONVENTION PROGRAM

PROVIDENCE, R. I., July 11.—B. A. Swenson, chairman of the committee of arrangements for the F. A. M. Convention, is sending out an appeal to manufacturers and others for advertising in the big souvenir program. The program will measure 6¼ by 9¼ and will consist of 48 pages. It will be well illustrated.

OPTICAL EXPERT FOR CHICAGO EYE SHIELD

President Malcolm Obtains Services of Dr. Brenneke to Head Optical Department—Luxwell Goggle Is Latest Offering

CHICAGO, Ill.—President Malcolm, of the Chicago Eye Shield Co., in line with the firm's policy of meeting the optical wants of every motorcyclist, has obtained the services of Dr. Herman Brenneke as head of the company's optical department.

Dr. Brenneke has been head of the optical department of the Fair Department Store in this city for 14 years and is an expert opticist. He will devote much time to the development of glasses for the acetylene welding trade as well as for motorists.

The latest goggle from the Chicago Eye Shield firm's plant is the No. 129 "Luxwell Goggle." This is being furnished in a 12-carat gold mounting and may be had with amber, amber-green and smoked lenses. The retail price for this goggle is $3.50 and it has all the earmarks of a $5 goggle.

The firm has won its appeal in the suit instituted against it by the F. A. Hardy Co., of Chicago. In the lower court the decision went in favor of the Hardy company, but on appeal the Chicago Eye Shield Co. had the verdict returned in its favor, the court claiming that the goggle made by the latter firm did not infringe upon the goggle made by the Hardy company. The Chicago Eye Shield Co. is therefore now free to manufacture this goggle.

SEND SPANISH TELEGRAM TO LATIN-AMERICAN AGENTS

MILWAUKEE, Wis.—As further evidence of the care taken by the Harley-Davidson Motor Company to keep its agents posted on all important doings in the cycle field is a telegram in Spanish sent out on July 6 by the Latin-American Department of the company. This telegram gives the results of the Dodge City and Sheepshead Bay races of July 4, and was despatched to all Spanish-speaking agents of the company throughout the world.

WAKEFIELD MEET FOR JULY 15

READING, Mass.—The card of races which were to be held at the Wakefield track in this city this week, has been postponed until Saturday, July 15 at 2 p. m.

Digitized by Google

HEAVY MOTORCYCLE REGISTRATIONS IN MASS.

BOSTON, Mass.—Figures which have just become available show that 8,314 motorcycles have been registered in Massachusetts for 1916, as compared with 7,704 which were listed for 1915. Registrations throughout the first six months of the current year were unusually large, and the state authorities were very favorably impressed by the readiness of motorcyclists to comply with state requirements.

The total receipts for motor registrations this year are well above the million mark, the exact figures being $1,232,164.63. For the first six months of last year the receipts did not quite reach the million mark.

SHAMOKIN DEALER LINING UP VOLUNTEERS

SHAMOKIN, Pa.—Walter Rhodes, of Shamokin, has been notified by military officials that his co-operation will be appreciated in the enlistment of a company of motorcycle owners for volunteer war service. It is unlikely that this squad will be called upon unless Uncle Sam has more serious trouble with Mexico, but Mr. Rhodes will proceed to line up his riders as fast as possible. As soon as he received the communication asking his assistance, he got in touch with a number of motorcycle enthusiasts and received a favorable response in nearly every instance. Rhodes has received instructions from the military officials which will assist him in acquainting the motorcyclists with army requirements.

About twenty motorcyclists of Shamokin will probably be enlisted for the new company, and an offer to co-operate with army officials has been sent to Major-General Charles M. Clement, at Mt. Gretna.

WHAT RIDERS ARE DOING FOR KANSAS ROADS

TOPEKA, Kan.—That motorcyclists are doing their share toward keeping up the county roads of Kansas is indicated by the fact that $13,332 has been paid by riders of the two-wheelers within the past year for registrations. This money will be devoted exclusively to the improvement of roads, and officials were somewhat surprised to find that motorcyclists were playing such a prominent part in the building and maintenance of highways.

The total license fees paid by motorcyclists for the past year amounted to $17,776, of which $4,444 went to the state and the balance to road funds of the various counties from which the licenses had been issued. Licenses were issued for 8,888 motorcycles in all.

SHERIDAN COPS GET MOUNT

SHERIDAN, Wyo.—The police department of this city has purchased a Harley-Davidson three-speed motorcycle with sidecar. It will be used for traffic and other purposes.

A NEWSY HOUSE ORGAN

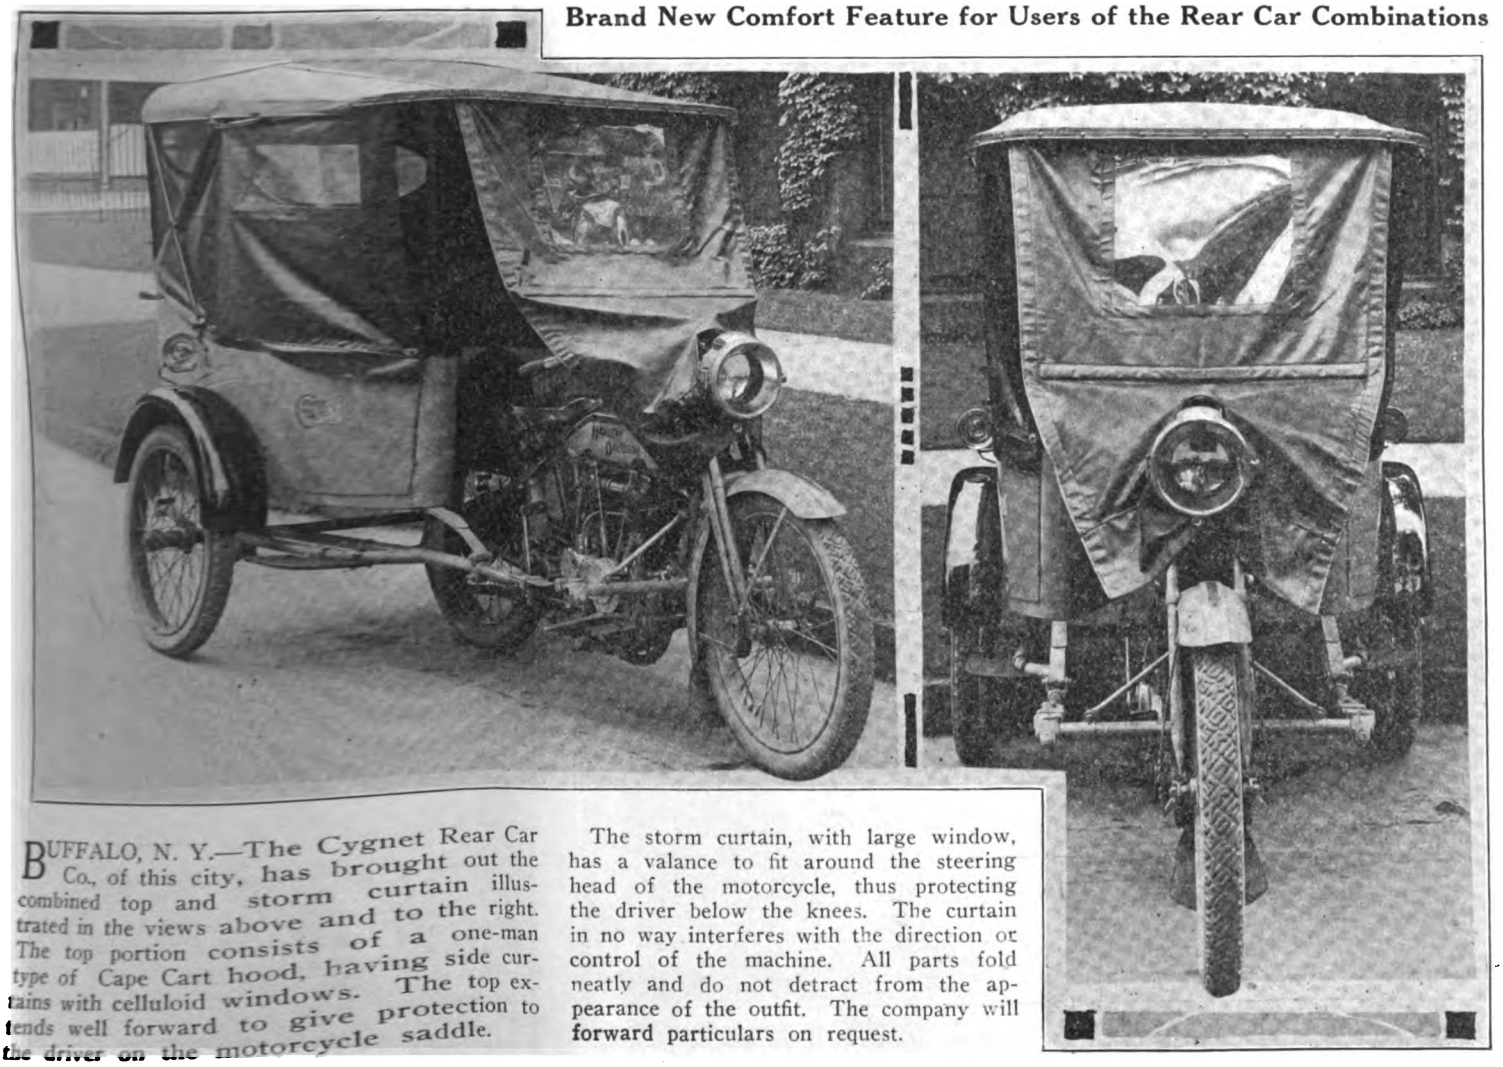
The June number of the *Tire Merchant*, the snappy house organ published by the Continental Rubber Works, of Erie, Pa., carries a number of unusually attractive half-tone illustrations. Both automobiles and bicycles figure in the pictures, and all in all the paper is one that should prove interesting to trade men. The first page illustration is one of the most attractive, along bicycle boosting lines, that has appeared in a long time.

3,266 LICENSES IN NEBRASKA

LINCOLN, Neb.—Secretary of State Charles W. Pool has issued 3,266 licenses to motorcyclists in this State so far this year, and says that the demand is still continuing. During June, 250 motorcycle licenses were issued. 1916 is the first year of registration under the present law.

GIVING WEATHER PROTECTION FOR CYGNET ENTHUSIASTS

Brand New Comfort Feature for Users of the Rear Car Combinations



BUFFALO, N. Y.—The Cygnet Rear Car Co., of this city, has brought out the combined top and storm curtain illustrated in the views above and to the right. The top portion consists of a one-man type of Cape Cart hood, having side curtains with celluloid windows. The top extends well forward to give protection to the driver on the motorcycle saddle.

The storm curtain, with large window, has a valance to fit around the steering head of the motorcycle, thus protecting the driver below the knees. The curtain in no way interferes with the direction or control of the machine. All parts fold neatly and do not detract from the appearance of the outfit. The company will forward particulars on request.

Digitized by Google

RUBBER EXPORTS TO U. S. SHOW BIG INCREASE

IN a recent report to the Bureau of Foreign and Domestic Commerce, Consul G. H. Pickerell, of Para, Brazil, states that exports of crude rubber to the United States from Para during the month of April totaled 3,718,991 pounds as compared with 2,603,860 pounds for March. From Manaos for April there were 1,871,256, while for March, 1,533,736 pounds went to this country.

In February 296,575 pounds of crude rubber were shipped to American ports from Iquitos, Peru, while April shipments from the same port to this country totaled 620,238 pounds.

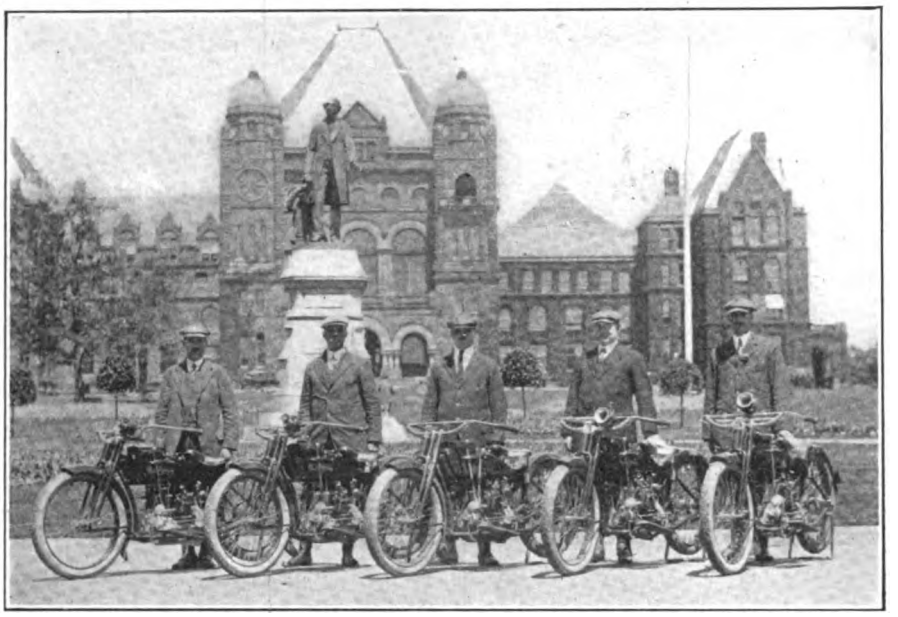
KEYSTONERS FORM A COMPANY

HARRISBURG, PA.—Twenty-five members of the Keystone Motorcycle Club of this city have volunteered to serve in a motorcycle company in the event of hostilities with Mexico. Their names have been filed with Col. Finney at Mt. Gretna. The list is still open, and riders who wish to line themselves up with the Harrisburg patriots are requested to make their intentions known without delay.

BERNARD IS COMMISSIONER

PRESIDENT A. B. COFFMAN, of the F. A. M., has appointed Harvey A. Bernard to be State Commissioner for Pennsylvania, dating from July 3.

TORONTO POLICE ADD SIX HENDERSONS TO SQUAD



Five of the New Hendersons and Their Police Riders at Queen's Park

TORONTO, Ont.—The City of Toronto has purchased six Hendersons from Percy McBride, local dealer. These will be used by the traffic squad within the city limits.

The Toronto officials figure that one motorcycle patrolman can do the work of four footmen, and therefore estimate that the six motorcycle men will be equivalent to 24 ordinary police constables. The shortage of men in the police department, due to so many being at the front, makes this efficiency particularly important, and there is plenty of work for the motor-cops.

UNCLE SAM CO-OPERATES WITH TOURISTS

U. S. Department of Customs Extends Non-Bonding Period For British and Canadian Motorcycle Visitors to 21 Days

NIAGARA FALLS, Ont.—Notification has just been posted regarding another new concession for international touring motorcyclists. According to the announcement here, the United States Department of Customs has decided to extend the non-bonding period for British and Canadian motorcycles entering the States at the ports of Niagara Falls or Buffalo, Rochester and Ogdensburg from ten to twenty-one days. This conforms with the free touring privilege of three weeks granted by the Canadian Department of Customs recently.

It is understood that the American department will soon take the necessary action to grant the twenty-one days' unrestricted stay in the United States to Canadian motorcyclists entering the American Republic at other ports along the border.

According to an announcement by W. A. McLean, Deputy Minister of Highways for Ontario, this Province intends to abolish the use of even registration permits in connection with the temporary stay of American tourists in Ontario. Since license reciprocity was arranged between Ontario and some twelve American States, American tourists have only been called upon to fill out a permit form, a copy of which was surrendered upon departure from the country.

THE CLEVELAND GETS A MILITARY TRY-OUT

W. S. Bouvier, Arthur Chapple and G. H. Hallock, of 1st Armored Battery at Camp Whitman, Peekskill, "Feeling Out" the Lightweight

UTICA WILLING TO HELP

UTICA, N. Y.—Major H. J. Cunningham has asked the Utica Chamber of Commerce for co-operation in acquiring a Harley-Davidson sidecar machine gun outfit. The Utica men agreed at once to lend their aid, and it is practically certain that subscriptions will be forthcoming at once to cover the cost of the motorcycle combination.

"WOULDN'T BE WITHOUT IT"

Editor, Motor Cycle Illustrated:

I have read your magazine for four years, and have never missed a copy. I wouldn't be without it—either as a dealer or a rider.

Five-mile National Championship; medals, value $75; 1st, 2nd, 3rd.
Fifty-mile Open Pro.; cash, $250 to winner, $100 for second, $50 for third, $25 for fourth and $10 for fifth place.
All entries close on July 24. Post entries will be double fee and no entry will be accepted after 12 noon on July 27 and 29. Entry fee is $1 per event.

MISS GAST TO BE FEATURE AT PROVIDENCE

Champion Lady Rider Will Perform at Rocky Point Motordrome for Benefit of Visitors on Outing Day—Has Won Many Medals

Miss Margaret Gast, the "Flying Merkel Star"

PROVIDENCE, R. I., July 11.—As one of the big features of the F. A. M. Convention, to be held in this city in the last week in July, motorcycle enthusiasts the country over are to have an opportunity to see Miss Margaret Gast, the champion lady motorcyclist of the world. Miss Gast is riding at Rocky Point, the popular summer resort near Providence, this summer, on her Flying Merkel, and is trying to persuade her manager to allow her to give several free performances as a compliment to the visiting officials and delegates of the F. A. M. on the outing day—Friday, July 28—of the convention to Rocky Point.

Miss Gast's performance is made in a small motordrome or well, in which she rides at top speed and performs a number of hair-raising stunts. She uses a single cylinder Flying Merkel for this purpose, and smiles all the time during the exhibition. Here attraction is one of the most sensational ever seen in this part of the country.

Some idea of the nature of Miss Gast's performance will be gained when it is realized that some of the more timid spectators quit the motordrome before she finishes, stating that they don't wish to see her killed or badly injured. Many have done this at Rocky Point, and Miss Gast says she appreciates their doing so as it proves she is not playing a bluff game. She has about 100 medals won in motorcycle competitions with male riders on the flat and on saucer tracks.

HIGHFILL WINS DOUGLAS-TUCSON ON MERKEL

TUCSON, ARIZ.—Ernest Highfill, riding a Flying Merkel single cylinder, won the Douglas-Tucson 140 mile road race on July 4 in 3:20:46. Frank Barnett, of Douglas, on a Harley-Davidson, came second in 3:32:20. Howard Reynolds, Indian, was third in 3:59:27. Reynolds was followed by Bill Cox, Harley-Davidson, ten seconds later in point of time. The last man to finish was Leo Ortman, New York, on an Indian.

Highfill got first money and $25 extra for being second man into Bisbee. Barnett got $50 for entering Bisbee first in the race. Ortman got a consolation prize of $10. There were 13 starters and ten finishers.

Highfill used Bosch magneto, Splitdorf plug, Goodyear Blue Streak tires, Troxel saddle, Renold chains, Schebler carbureter and Musselman brake. Barnett had Wright plugs, Bosch magneto, Kelly-Springfield and Firestone tires, Troxel saddle, Duckworth chains, Schebler carbureter and Harley-Davidson brake. Reynolds used Dixie magneto, Splitdorf plugs, Goodyear Blue Streak tires, Duckworth chains, Schebler carbureter and Troxel saddle.

PLANNING MANY HELPS FOR MOTORCYCLE DEALERS

CHICAGO, July 9.—A fruitful meeting of the Dealers' Betterment Committee of the Motorcycle and Allied Trades Association was held here July 7, Chairman Charles E. Speaks, of the Firestone Tire and Rubber Co., presiding. Those in attendance in addition to Mr. Speaks were: C. B. O'Hare, Aurora Automatic Machinery Co.; E. J. Muller, Harley-Davidson Motor Co., and Frank G. Effinger, A. O. Smith Motor Co.

The committeemen threshed out at length a number of interesting plans which will be presented in detail at the meetings to be held in connection with the Cycle Parts Convention in Atlantic City. The members of the Dealers' Betterment Committee have kept in close touch with one another since the recent Milwaukee meetings, and were able to get down to work effectively when they met in Chicago on July 7.

No details are obtainable at this time concerning the plans of the Dealers' Betterment Committee, owing to the fact that all proposals will be tentative until they have been approved by the Executive Committee. It is stated, however, that much progress has been made, and that the report to be submitted at Atlantic City will be indicative of much practical work done by Chairman Speaks and his associates.

THOUSANDS OF MOTORCYCLES IN USE BY ALLIES

TORONTO, Ont.—Flight Sub-Lieutenant Tommy Webber, formerly a red-hot motorcycle enthusiast of Toronto and now a member of the Royal Flying Corps, has returned to Toronto to act as an instructor at the local aviation school. Lieut. Webber, who was injured last spring, declares that military motorcycles are used by the thousands in both France and England. The British War Office has adopted the Indian, Triumph and Douglas. The output of the Rudge-Whitworth works goes to the Belgian army in France and the Royal Flying Corps is equipped with the "P. and M."

"A motorcycle gets many a scout or despatch carrier out of a tight hole," declares Lieutenant Webber, who is probably home for keeps.

DONOVAN TELLS THE WHY OF DODGE CITY

Chairman of F. A. M. Competition Committee Says That All Around Enthusiasm and a Few Other Things Make Kansas Town Logical Scene of America's Classic

By JOHN L. DONOVAN

THE fellow from the big city or from anywhere near the big city can't seem to appreciate the reasons why a small town of perhaps 5,000 or 5,500 inhabitants like Dodge City can stage and successfully stage America's annual motorcycle classic, if it is not for a fact the motorcycle classic of the world. Especially unappreciative is he, when he realizes that this little Kansas town is hundreds of miles from anywhere; that the nearest real city to it is Kansas City, and that a full night's ride away.

When these Kansas boys first proposed staging a 300-mile race at Dodge City over three years ago, I was inclined to laugh at them and in the correspondence which followed their initial request, I told them flat-footed that the thing was impossible. And then followed an invitation to me to come down and look Dodge City over and size up the track; to get their "slant" on the subject generally.

Became Enthusiastic

And I did. I made a special trip down that neck of the woods, met up with the committee which stages the meet and even before I had half seen the town, I began to feel a bit of their enthusiasm. Somehow or other the spirit seems to be in the air. The folks behind the race are genuine enthusiasts. The people in the town are full-fledged motorcycle fans and Kansas folks for hundreds of miles around Dodge City are not less so. That is the underlying reason for the success of the Dodge City race. They all work together, every body is boosting and there is not the slightest friction.

When I arrived in Dodge City just before dusk on that initial trip, the boys got a machine and ran me forthwith out to the track. And a sorry looking affair it was; scarcely 20 ft. wide and on that first night, having been well drenched by a downpour of rain, the mud seemed almost bottomless. That tempered the enthusiasm they had instilled in me—in fact it almost nullified it—but not so with them. They invited me to come out and take another look at 11 o'clock the next morning before passing final judgment. And I did.

I was some surprised, I must confess, for what had been "adobie" mud the night before, had been baked by the morning sun into a substance resembling concrete. You could not chip it with an axe and they sped a couple of machines around the course to show me that it was practically dustless. So, with their promise to widen the course sufficiently to render the track safe, I gave my consent and the first race went off without a hitch and proved a money maker. And even bad weather did not diminish the enthusiasm of these Kansas fans enough last year to make the second annual race a financial failure. And blessed with fine weather this year and with competition of the keenest sort which made it any man's race from start to finish, the third annual race which has just been run has proved the best ever.

I fully believe that Dodge City has proved its ability to handle America's motorcycle classic as it should be handled, and with 20,000 people watching the speed boys, as they did on July 4, some coming as far as 500 miles to see the race, it is safe to say that this little city in the middle west is the logical place to stage the affair. If other reasons are called for, there is the dustless and fenceless track and a three-year accidentless record without a rider, official or spectator hurt in the slightest way. And enthusiasm! They are so full of it that they have already paid their sanction fee for the 1917 contest.

OLIVER CABANA TO ENTERTAIN DEALERS

President of Buffalo Specialty Co., Who Is Also a Breeder of Prize Cattle, Will Play Host at His Pine Grove Farms near Buffalo

BUFFALO, N. Y., July 10.—An unusual treat for cycle dealers in Buffalo, Niagara Falls, Lockport and surrounding territory has been planned by Mr. Oliver Cabana, Jr., president of the Buffalo Specialty Co., who will take his trade friends on a tour of his Pine Grove farms, located about 13 miles from Buffalo, on Wednesday, July 12. The guests will meet at the office of the Buffalo Specialty Co. at noon and will be taken out to the farms in automobiles, where lunch will be served. When the lunch has been disposed of the tour of inspection of the farm will be started.

Mr. Cabana is widely known as a breeder of prize cattle, and in order to keep up his standard of blue-ribbon stock he has equipped Pine Grove farms with everything that could possibly contribute to its success. He is the owner of some of the highest priced cattle in this country, including Rag Apple Korndyke 8th, ranked as the greatest bull in the world. Another aristocrat of the Cabana farms is Albina Josie, champion of the world for amount and quality of milk, whose value is placed at $10,000. There is a certain quartet of cows on the Cabana farms with a higher official standing than any other four cows in the world owned at one farm, and throughout the whole long list of Pine Grove cattle the same high standard is adhered to.

A feature of the Pine Grove farms is the milking system, thousands of dollars having been spent to make the whole plant sanitary.

LUDLOW WON THE HILL-CLIMB

T. C. Butler, Jr., manager of the motorcycle department for C. Will Risden, Los Angeles, Cal., calls attention in a letter to the fact that **Motor Cycle Illustrated** credited Wells Bennett with winning the recent hill-climb at San Diego, and points out that the climb really was won by Fred Ludlow, who used an Indian.

LABOR DAY MEET FOR SHEEPSHEAD

NEW YORK, July 11.—Pointing to the Independence Day meet at the Sheepshead Bay track as a motorcycle achievement of the first water sort, both from the angle of good sport and financial return, the Sheepshead Bay Speedway management goes a step further than merely hinting that Labor Day, September 4, will witness the staging of a similar racemeet. If things go according to the tentative program, a prize purse of $3,000 will be hung up for the occasion with "primes" of $100 for each record shattered. It is planned to organize tours from nearby cities to the seaside track, as was done on July 4th.

FIRST CONVENTION MEET ON JULY 26

PROVIDENCE, R. I., July 11.—A change in the date of the first day's racemeet at the Narragansett Park Speedway has been announced by Chairman B. A. Swenson. The meet will be held on Wednesday, July 26, and not on the day following as originally announced.

The stores in the city will close on July 26, which is one reason for the change of date. A bigger attendance at the races will therefore be looked for.

Gene Walker, Indian, Fifth in the Dodge City Race, Whose Photograph Was Not Available for the "Winners' Row" Accompanying the Story Last Week

CYCLEMOTOR RIDE TO HAMILTON

TORONTO, Ont.—Three factory men of the John T. Wilson Company, Toronto, original manufacturers of the Cyclemotor, recently took a trip over the rough roads between Toronto and Hamilton, a distance of forty-five miles. In spite of detours because of road construction work and several badly-rutted highways, the wandering trio made the dash in three and one-half hours.

A recent local purchaser of Cyclemotors was H. E. MacDonnell, an official of the Dominion Express Company, who bought one motor for himself and a second for his son's bicycle. These men each own an automobile but they have been using the Cyclemotor-equipped bicycles to a considerable extent.

PETITION TO OPEN YOSEMITE

SAN FRANCISCO, July 9.—A good many riders in San Francisco are talking about prospective trips to Yosemite, planning to start some time within the next month. The Valley is still closed to motorcycles, but the machines can be stored at El Portal, leaving a 14-mile stage ride. It is hoped that enough signatures can be secured to the petition to have the park opened by next year.

CREVISTON WINS 200-MILE RELAY AT DETROIT

Indian Rider Is Victor with Verrill as Partner in Interstate Association Feature—Also Bags Five-Mile Preliminary

DETROIT, Mich., July 10.—The Creviston-Verrill pair won the 200-mile relay race which was the feature event of the Interstate Racing Association meet at the Detroit track yesterday. The winners' time was 2:52:52 1/5. Creviston came across the tape at the finish for the team. Both rode Indians.

The Hilliard-Wolters (Excelsior) teams came in second in this race, with the Millen-Ellis (Indian) pair third and the Kemp-Whittler (Henderson) team fourth. Nine teams were entered in the big event. Creviston took the lead at the gun, with Gene Walker, Indian, next, and Glenn Stokes, Excelsior, third. Crevvy led till the 35-mile mark, when Perry, Stokes' partner, came on and passed the Indian speedster. There was much see-sawing, until at 59 miles Joe Wolters was ahead.

At the century mark Creviston again came to the front and was never in danger of being passed. Wolters finished for his team in second place and Kemp in third.

Creviston took the five-mile pro. opening event in 4:08, with Gene Walker, Indian, second. As the contestants in the relay were all top-notchers, the attendance was huge. The track was in first-class condition.

GIBSON SIMPLIFIES MATTERS FOR F. A. M. DELEGATES

WESTBORO, Mass.—With a view to simplifying the work of his office, Secretary G. B. Gibson, of the F. A. M., has adopted a new scheme for keeping track of club delegates to the forthcoming national convention. He is sending out slips notifying the various clubs of the number of delegates to which they are entitled, and if a club is to send representatives to the convention it is only necessary to fill out the slip and return it to the secretary. Should the club be unable to send a delegate, no action at all is required.

In past years Secretary Gibson has sent out credentials to all the F. A. M. clubs, but a great many of them were never used. By the new system all the clubs will be given proper attention and there will be no lost motion in the secretary's office.

Clubs desiring to send delegates to the convention are requested to advise Secretary Gibson of the delegate's name without delay, by using the slip referred to. The slips now being sent out will be recognized as credentials, and will entitle the holder to vote at the business sessions.

MORE RUN AND TOUR DETAILS ARE ARRANGED

PROVIDENCE, R. I., July 11.—Convention and endurance run details are occupying B. A. Swenson and his aides these days. The endurance run and race meet blanks have been issued to a large number and more are being sent out each day. Chairman Swenson is completing plans to have an automobile to convey the officials of the endurance run over the course on July 24 and 25. An automobile tire company has offered to donate the use of the car and it may be accepted.

A great number of applications have been received for both the endurance run and the race meets. M. M. Counsel, Vermont F. A. M. Commissioner, will act as tour director from St. Johnsbury, Vt., and vicinity. He is now procuring checkers to be stationed at the Profile House and Crawford Notch controls on the big run.

The official flag for the run will be a pennant with the words "Providence" and F. A. M. and symbol thereon. These flags are now being made up.

The order for the Bosch Trophy has been placed with the Gorham Mfg. Co. in this city and designers are now working on it.

LEMEN, ON INDIAN, STARS AT ROBINSON

ROBINSON, Ill., July 5.—Torrence Lemen, riding an Indian, won the 10 mile open, the 25 mile and unlimited pursuit races in the first meeting ever given in this part of the country, on July 4. His time for the 10 miles was 13:16; for the 25 miles, 33:12 and for the 27 miles ridden in the pursuit, 36:52. H. D. Humfry, Indian, won the 15 mile consolation in 20:25.

Chester Tipton, on an Eagle, came second in the 10 mile. L. E. McClintock, Indian, took third place in the 10, and second money in the consolation. Russel Field, Indian, was second in the 25 mile, while William Rilland, Excelsior, got third place in the 25 and the consolation.

MAY GIVE GUN TO TROOP

PROVIDENCE, R. I.—Citizens of this city have offered to give Troop A, Cavalry R. I. National Guard, a motorcycle machine gun outfit, and Governor Beeckman has asked the War Department for permission to buy the gun from the Springfield arsenal.

GASOLINE PRICES TO DROP IS RUMOR

WASHINGTON, D. C.—While the result of the Federal Trade Commission's inquiry into the gasoline situation is still a matter of conjecture, the rumor is going about that the forthcoming report will arraign the big oil interests on the score of what is stated to be a system of price-control. It is believed that the release of the report will be followed by a reduction in price of fuel to a more reasonable figure.

STANLEY GILLARD DIES IN SOUTHERN CALIFORNIA

DENVER, Colo.—Stanley Gillard, branch manager in this city for the Goodyear Tire & Rubber Company, died in Southern California recently, after a long illness. He left the branch in this city over a year ago to live in the milder climate of California and conducted his managerial duties from the latter location.

Stanley Gillard was one of the original Dunlop Tire men in this country. Following the settling of affairs of the Dunlop firm, Gillard went with the Hartford Rubber Works and still later came to Denver with the Goodyear interests. He was an ardent cyclist and motorist as long as his health permitted and his loss is mourned by his many friends.

TELLING OF FRASSE'S 100-YEARS' GROWTH

"ONE Century in Business" is the title of a most interesting and intructive book issued by Peter A. Frasse & Co., Inc., of 417-421 Fulton street, New York, which traces the growth of this firm from the original establishment of Henri F. Frasse, at 95 Fulton street in 1816 down to the present day. The book relates, among other details, that the founder of the thriving firm of the present day, made the clockwork for the torpedoes of Robert Fulton, as well as the model for the engines of the *Clermont*.

Shortly after Henri Frasse set up in business for himself as a watchmaker and machinist, he commenced importing small tools from Switzerland, his native home, and thus established the root of the machinists' supply trade in the United States. The record is then traced page after page down to the present location in a modern fireproof structure, with a delineation of the picked staff which conducts the present Frasse affairs. The book is finely illustrated with portraits and views and gives an excellent idea of the size and scope of the various Frasse plants. It was prepared under the supervision of C. W. Oliver, advertising manager.

PEDERSON WINS CHAMPIONSHIP AT OMAHA

OMAHA, Neb., July 10.—Carl Pederson, riding a stock single cylinder Harley-Davidson, won the 50-mile State Championship race at Nebraska City yesterday, in 1:16:35. Roy Roland, Harley-Davidson, was second, and Otto Ramer, on a similar machine, third. The three Harley-Davidsons were shod with Firestone tires and had Bosch ignition.

Roland, who hails from Lincoln, won the five-mile event in 6:25, with F. C. Clark, of Nebraska City, second, and Pederson third. Birdie Lutz, of Omaha, on an Indian 4-valve, won the time trial, covering the mile in 1:18, with Pederson next and Dan Reader, Thor, third.

BURDICK STAR AT NORWICH MEET ON JULY 4

NORWICH, Conn.—Burdick, riding an Indian, captured two five-mile races and the final at the meet in this city on July 4. His times for the five miles were respectively 6:05 and 6:10. Palazzo, Harley-Davidson, won the 10-mile race in 13:07 and the three-mile sidecar event in 4:40.

Steves, Indian, got two second places and two thirds. Baldwin, on a similar mount, took one second, a third and a fourth.

AN ATTRACTIVE JULY ISSUE

GOODRICH activities in the motor vehicle and bicycle lines are treated in picture and print in the July issue of *The Goodrich*, the house organ of the B. F. Goodrich Co., of Akron, O. War scenes at the Mexican border and an excellent article on the loss occasioned by uncertain business methods are features of this issue. Two pages are devoted to the reminiscences of Conn Baker, a veteran bicyclist.

MULTIBESTOS DIVIDEND

FRAMINGHAM, Mass.—The Standard Woven Fabric Co., maker of Multibestos brake and clutch linings, has declared a semi-annual dividend of $3 a share, payable July 1, to stockholders of record on June 30.

GUARD AGAINST SPEEDERS

TORONTO, Ont.—Tourists who have imagined that the curves in the new Hamilton-Toronto boulevard, which is rapidly nearing completion, had been straightened out in order to provide a speedway between the two cities have been rudely shocked by the announcement that the Hamilton-Toronto Highway Commission had arranged for the placing of a squad of motorcycle patrolmen on the new cement highway in order to catch speeders. The speed limit of twenty miles per hour is to be rigidly enforced.

O'RYAN DISPLACES TROOPERS FOR MOTORCYCLISTS

Two Privates of First Armored Motor Battery Will Serve General as Orderlies; Both Motorcycle Couriers and Machine Gun Squads Are Rounding Into Fine Shape at Peekskill

By CORPORAL ARTHUR G. CHAPPLE
Special Representative of Motor Cycle Illustrated

PEEKSKILL (N. Y.) Mobilization Camp, July 9.—Nothing very exciting has developed here today for the members of the First Armored Motor Battery, but our motorcycle boys are constantly pounding over the roads and hills on their machines and getting hardened for service. We are also working our motorcycle machine gun squads regularly, and it is only fair to say that they are rounding into excellent shape.

Some of the boys are still carrying dispatches for the Headquarters Staff. Before coming to camp, and since, the motorcyclists have been consistently busy and the battery as a whole has measured up to all expectations.

May Go to Border Soon

There is a rumor—and how the boys do pass it along!—that we are slated to leave for the Border in a few days, but no one here can tell positively. At any rate, we are hoping for the best.

Lts. Hubbell and Starr, both former officers of Troop A, are busy these days getting used to their new gasoline mounts.

Commissary Sgt. Sanger now has the mess kitchen staff fully organized and we are getting regular army "eats."

Privates Dresser and Converse have been transferred from the Motor Battery to General O'Ryan's staff as dispatch orderlies and leave for the Mexican Border with their motorcycles immediately. This marks another advance for the motorcycle as these riders displace six mounted troopers who have been acting as orderlies to the general's staff.

Riders Well Cared For

Army regulations require that each corporal be responsible for his squad's comfort, appearance and loyalty to their oath, and Corporal George Peabody is establishing a record by his efforts to keep his squad from missing the many comforts left behind when the mobilization call came.

Private Marcus Munsell has donated a new 90 h. p. Crane-Simplex car to be fitted with an ammunition supply body and used as a supply unit for the motorcycle machine gun section. This means that the boys behind the motorcycle guns will always be well taken care of in the matter of ammunition.

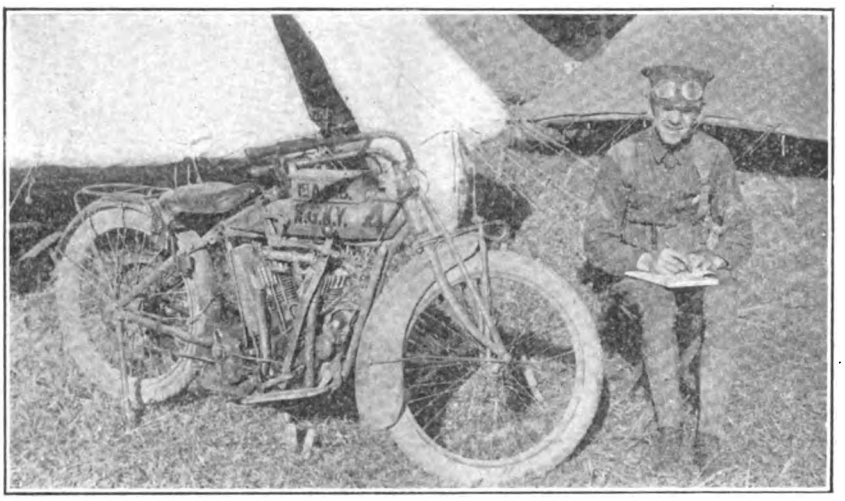
The First Armored Motor Battery, with its 50 motorcycle riders and five armored cars, the latter mounting machine guns and carrying eight men to each car, arrived at the camp on Thursday, June 29. Immediately upon our arrival we got into position on the camp grounds with tents, field kitchens and motor supply trucks.

The entire command, comprising 160 men, came over the roads as a unit and under their own motor power. While it is impossible to speak definitely, it is believed that this arm of the service will see service at a very early date, either along the border or in Mexico. It is the intention to use the Motor Battery, or parts of it, to make flying dashes into Mexico if it becomes necessary to resort to such tactics in order to protect American property interests over the line.

That our motorcycle boys have been of great value as dispatch bearers for the various commanders of the New York National Guard units is attestd by the fact that they have covered hundreds of miles over all kinds of roads and never failed to deliver the goods. Some of the lads have been on duty for 48 hours without a break. Last Friday and Saturday many a tired and dusty motorcycle courier chugged into camp after hard trips between New York city and the State camps. In spite of the terrific pace demanded of the motorcyle couriers and the various risks involved the injured have been very few. Corporals Harry Wilson and J. Deckert are laid up after combats with farm wagons at sharp turns.

The first night in camp the boys were tired and all hands were under covers before "taps" sounded; what's more, they were up again at daybreak. The camp has already established a reputation for its businesslike appearance, with its motorcycles lined up in a long straight row on the company street.

Nicknames have been tacked to the various aisles between the tents, such as Gasoline Alley and Carbureter Row.



Corporal Chapple at Peekskill Camp Preparing One of His Newsy Letters for Motor Cycle Illustrated; "Nothing Much Is Happening Here," Bulletins Chapple—and Then He Proceeds to Write a Crackerjack Article on How the Motorcycle Boys Are Contributing to the Efficiency of the Empire State's Military Organization. Watch for His Articles.

ANOTHER LIST OF RIDER-PATRIOTS

"READY AT ANY TIME"

Editor Motor Cycle Illustrated:—

Of course I wish my name enrolled with the others to help out our Uncle Samuel if necessary. I have been riding machines since May, 1912, and now have a 1915 three-speed Indian with sidecar. I hope to own several more before the U. S. needs men as volunteers, but am ready at any time that men with dependent families are needed to swell the numbers.

R. P. FISHER.

Holcomb, N. Y.

"I WOULD NOT HESITATE"

Editor Motor Cycle Illustrated:—

Your "Serve Your Country" article noticed for the second time. I would not obligate myself for service under ordinary circumstances, but in case of emergency would be only too glad to offer myself for service. I have a new three-speed Pope due here in a couple of weeks, which I will always keep in the best of shape. Again I state that I would not hesitate to try and serve my country, but only in face of National Peril.

Yours respectfully,
EUGENE MANGIN.

Biloxi, Miss.

"TO SERVE MY FLAG"

Editor Motor Cycle Illustrated:—

I am ready to serve my flag and will be glad to have my name on the list. I have had military training at Agricultural and Mechanical College of Texas.

J. A. McMICHAEL.

DeKalb, Texas.

"PUT OUR NAMES DOWN"

Editor Motor Cycle Illustrated:—

Please put our names down on the list

Digitized by Google

of motorcyclists who are willing and ready to serve our country. We ride respectively a Henderson and a Harley-Davidson.

Yours truly,
RICHARD J. AUNE.
52 Selden Avenue, Detroit, Mich.
WALTER E. BERGER.
36 Selden Avenue, Detroit, Mich.

"READY TO RESPOND"

Editor Motor Cycle Illustrated:—
Should Uncle Sam call, he would find me as ready to respond as my faithful Powerplus.

ALFRED A. AMIRAULT.
16 Crest Avenue, Revere, Mass.

"GLAD TO OFFER SERVICES"

Editor Motor Cycle Illustrated:—
I should be glad to offer my services with my 1916 Harley-Davidson and sidecar, if needed.

RALPH JOHNSON.
55 Holly Street, Lakewood, N. J.

"WILL JOIN THE COLORS."

Editor Motor Cycle Illustrated:—
I am ready to join the colors via motorcycle.

RAY BOSHER.
2014 Tenth Avenue,
Huntington, W. Va.

"DRIVE MACHINE GUN OUTFIT"

Editor Motor Cycle Illustrated:—
I noticed your item on motorcycles for army use. I would say that I would not only be willing to serve in case of war and being called upon, but that I would at once like to get a job of driving a motorcycle machine gun outfit.

Yours truly,
CYRIL C. BABIONE.
Fremont, O.

"PUT MY NAME ON LIST"

Editor, Motor Cycle Illustrated:—
I am ready to serve my flag in the event of national peril, with my 1916 three-speed Harley-Davidson and sidecar. Put my name on your list.

LEE J. SHIELDS.
Crawfordsville, Ind.

"I SURELY WILL GO"

Editor Motor Cycle Illustrated:—
I got hold of a copy of Motor Cycle Illustrated the other day and noticed the article asking for names of riders willing to enter active service in case of trouble with some foreign power. Add my name to your list, for I surely will go if they take me and the occasion of a call for volunteers ever comes.

My machine at present is a three-speed Indian twin, of 1915 model.

ROBERT S. BEATTY.
1112 Reddour Street,
Pittsburgh, N. S., Pa.

OVER 11,000 TONS OF RUBBER IN MONTH'S IMPORTS

WASHINGTON, D. C.—Rubber shipments from South America and the Straits Settlements during the past few months have assumed huge proportions. During the 31-day period, from May 19 to June 19, no less than 22,675,150 pounds reached to various ports of the United States for the manufacture of tires and other rubber goods.

Barely two seasons ago the entire imports of rubber into this country per annum were less than the imports of a single month of 1916. Indications point to still larger amounts for the future. The Straits Settlements now supply about 80 per cent of the rubber imported into the United States, while the Brazilian imports are way below normal. Crude rubber lists at from 60 to 70 cents at present.

DELAY AT GATES PREVENTS HOLDING CONVENTION

SHEEPSHEAD BAY, N. Y., July 7.—A lamentable hitch in the arrangements for the New York State F. A. M. Convention and race meet on July 4, resulted in such a lengthy delay at the gates of the Speedway during the morning that it was impossible to hold the convention at all. Riders and delegates who arrived in ample time for the stated opening at 10 a. m. could not get into the Speedway, and many refused to attend the meeting when they were finally permitted to enter almost at noontime. This was the only thing to mar the day's program.

Commissioner George Ellis has not as yet announced the place and date of the reholding of the State Convention.

GUTERMAN HURT IN MOTOR BUS COLLISION

NEW YORK, July 10.—Lou Guterman, the well-known veteran motorcyclist, was the victim of a collision on Lafayette street, this city, yesterday. Guterman was driving the Reading Standard combination with A. Radliem as passenger when a sight-seeing car shot out of a side street and struck the outfit, wrecking it badly. Guterman was spilled and broke some small bones in his hand, but is now well on the road to recovery. The passenger is still in the doctor's hands.

FLXIBLE SALESMEN MEET IN ANNUAL CONFERENCE

LOUDONVILLE, O.—The annual convention of the sales force of the Flxible Sidecar Company was held in this city on June 27. Before going into executive session, a visit was made to the site of the new factory. This was followed by a trip through the present factory.

The mapping out of the sales campaign followed, after luncheon was served. General Manager Hugo H. Young directed the convention throughout.

FINDS MACHINE INVALUABLE IN GETTING RECRUITS

Sergeant Gibson and His Recruit-Getting Motorcycle Outfit

MACON, Ga.—Sergeant F. B. Gibson, of the U. S. Army Recruiting Service, has been using his 1916 Harley-Davidson machine during the past two months to get new men into the Army, under the direction of Lieutenant Height, the officer in charge of this service in Macon. He covers on an average of 100 miles per day in his work, and when the photograph shown above was taken had just returned from a two-day trip in which he rode 295 miles.

The sergeant says that the lettering on the tank does much to impress prospective recruits of the up-to-dateness of the Army. He is endeavoring to get a picked squad of recruits from among riders in the vicinity of this city and form them into a motorcycle squad. He says that the Harley-Davidson is invaluable in his work and has been the means of bringing many men to enlist who could not have been otherwise reached.

Doings on the Pacific Coast

FRISCO RIDERS ENJOY TRIP TO SANTA CRUZ

Many Participate in Run Through Scenic District Over Smooth Boulevard; Games and Swimming Feature Outing

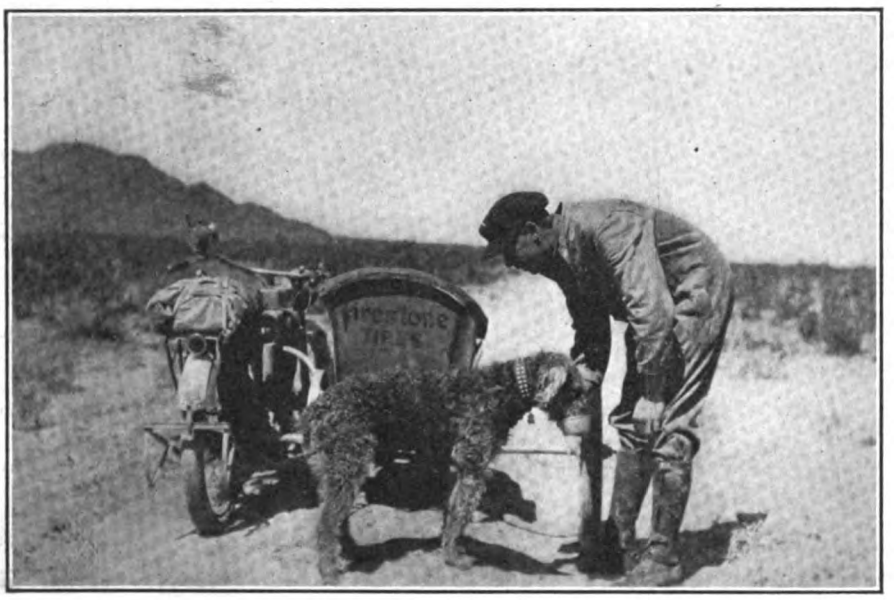
SAN FRANCISCO, Cal., July 2.—The country between this city and Santa Cruz is a real motorcyclists' paradise, according to the members of the San Francisco M. C., who participated in the recent run to the city down the coast. Some forty machines left this town, to be joined by a party of twelve riders from Gilroy and as many more from San Jose. Some of the riders went down the night before, and not a few speed fans "hit it up" and got into Santa Cruz an hour before the crowd.

But most of the way the riders remained together, the Frisco boys easily completing the trip in three and one-half hours. After luncheon the crowd enjoyed an afternoon at games and swimming on the beach, most of them staying until 5 p. m.

The San Francisco cyclists returned over the new boulevard which crosses the summit back of Los Gatos, a perfect road all the way, passing through some of the prettiest country in the state. From the summit the outlook on one side is over the Santa Clara valley and the whole San Francisco Bay, and, from the other, over Monterey Bay and the ocean beyond a great panorama of wooded hills.

With fine weather this run was, therefore, very much enjoyed, especially as it was not marred by punctures, spills or other accidents, the jinx remaining at home.

FIRESTONE RIDER REMEMBERS HIS DUMB FRIEND



Stewart Slosson, of the Firestone Coast Staff, Giving His Airedale Mascot a Drink on a Recent Southern California Trip

SAN FRANCISCO TRADESMEN KEEP HUSTLING

SAN FRANCISCO, Cal.—Mr. Z. Barton, manager of the local branch of the Thor, is back from his trip through Santa Clara, San Benito and Monterey Counties on his motorcycle. He says that the roads were fine except on the stretch along Monterey Bay between Slainas and Watsonville which was deep sand. Business was fair, he reports, and lots of money is being circulated in the fruit country where the dealers are getting ready for a big increase in sales within the next two months.

Barton rides a motorcycle because he likes it; because it get him to his destination conveniently and without loss of time and finally, because it is good business.

EFFORTS were made to get all the motorcycle houses in San Francisco to shut up shop July 3, giving their employees a chance to get away for three days; but some of them felt that they could not give their customers proper service if that was done, and as a result most of the stores were open. The only ones closed all day were John H. Baumgardner and Fred H. Bente.

ROBERT K. LARSH, service man from the factory of the Davis Sewing Machine Company, has just arrived in San Francisco, and will make his headquarters for a few days with W. E. & W. H. Jackson, the Coast representatives. This is the first time a service man from the factory has been sent so far west, and his coming is regarded as evidence of the growing importance of this territory.

THE fact that the motorcycle business in California is in a healthy condition is shown by the June registrations with the State motor vehicle department, the number of motorcycles licensed during that period being 1,215.

MR. ANGWIN, of the Motorcycle Sales Company, has been at Marysville, going for the races July 3.

EMPIRE STATE BOYS LEAVE COAST FOR THE EAST

SAN FRANCISCO, Cal.—John Bruns, of Port Jervis, and Jack Slee, of Poughkeepsie, N. Y., have left San Francisco on Harley-Davidsons for a cross-country trip to New York. They are taking the Valley route, and expect to reach New York City in about twenty days. Bruns is the lad who rode from the New York Y. M. C. A. to San Francisco last summer on a bicycle. The two riders are known as the Mutt and Jeff of cycledom. Bruns is 6 feet 3 inches tall, and Slee rears skyward just 4 feet 7 inches.

INDIAN SIDECARS IN DEMAND

SAN FRANCISCO, Cal.—A. Freed, head of the Pacific Motorcycle Supply Co., distributing the Indian in this city, is doing a big business in sidecar combinations this summer and reports unprecedented popularity for the third-wheel attachments. He also says that there is a large demand for sidevans. Back orders are now piled up, amounting to nearly a carload, according to Freed, and he has been anxiously awaiting for two cars of new machines which were lost somewhere between Springfield, Mass., and Chicago a short time ago and are not yet located.

INVITED TO PARADE

SAN FRANCISCO, Cal.—The New Century Wheelmen have been invited to parade in the San Francisco preparedness procession, which is slated for July 22. The club has accepted the invitation and expects to have about 75 riders in line.

GIRLS BECOME CLUB MEMBERS

TUCSON, Ariz.—The Tucson M. C. of this city has voted 13 girls into membership, the nominations and voting being received with enthusiasm on all sides. It is believed that this is the largest lady membership in any motorcycle club.

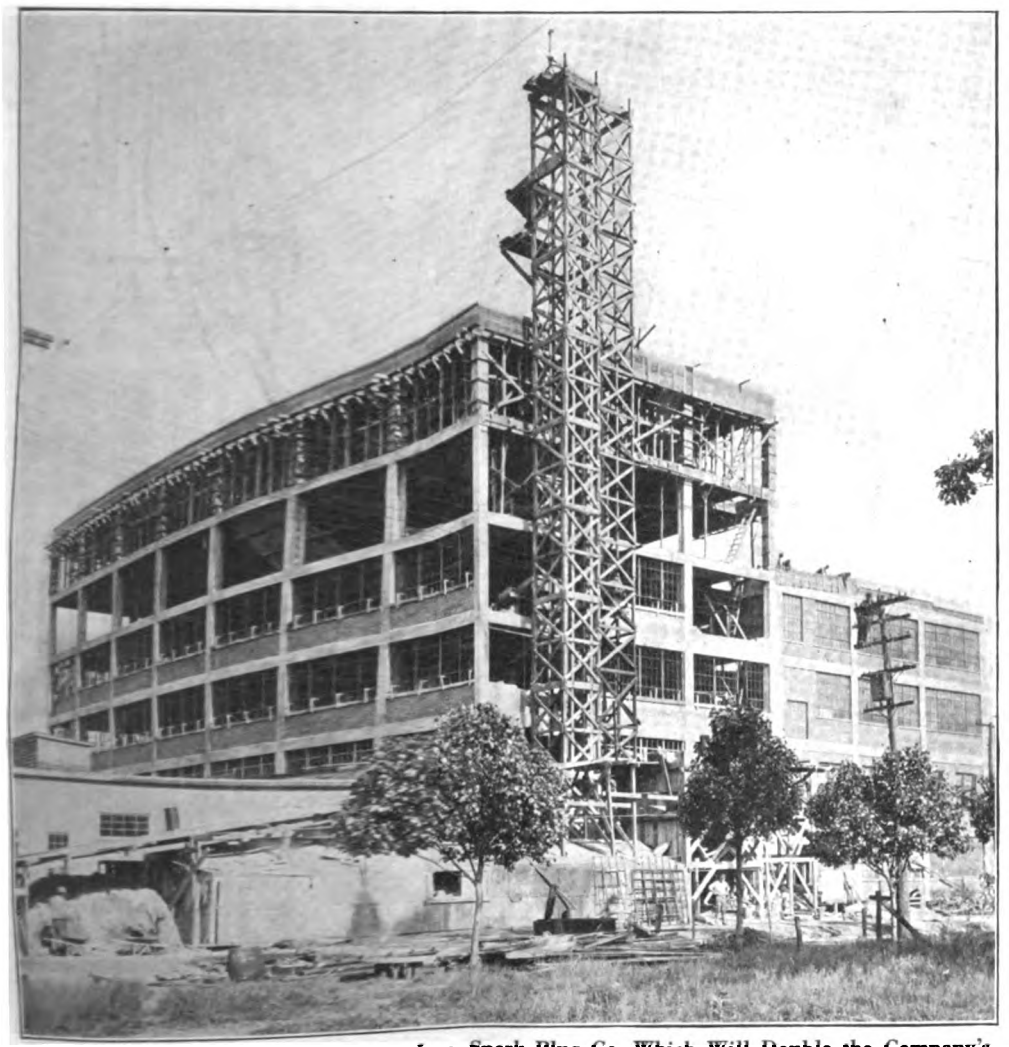
HOW CHAMPION SPARK PLUG CO. HAS GROWN

Output of Toledo Company Is Now Nearly 15,000,000 Plugs Per Year and New Buildings Will Greatly Increase Facilities



New Addition to Plant of Champion Spark Plug Co. Which Will Double the Company's Already Large Output; It Will Be Finished Soon

TOLEDO, O.—From the small output of a plant which had its home in a down-town office loft with 3,000 square feet of floor space to three huge buildings with a capacity and actual production of 55,000 Champion sparkplugs a day, is the story of slightly less than five years' growth of the Champion Spark Plug Co., in this city. In 1911 the modest loft was in use; in 1912 a one-story factory building was erected, with a floor space of 8,000 square feet; in 1915 another four-story building, four times the size of the first structure, was erected immediately beside it. That year, the firm produced over 7,000,000 complete plugs.

It is figured that the production for 1916 will be about 15,000,000 sparkplugs, at the present day rate. But orders have come in to such an extent that this number will not supply the demand, so that with admirable foresight early this season, President R. A. Stranahan and Treasurer F. D. Stranahan planned an addition of six stories, now under way, which has again doubled the floor space of the Champion factory.

Gives Increased Output

In the new building, from 75,000 to 100,000 plugs can be turned out per day. Between 1,400 and 1,500 employees will be engaged in their manufacture. Immediately adjoining the new addition is another new building for the drawing of steel. This department will process all steel used in making Champion plugs, about 40 tons a day.

The lower floor of the building, measuring 140 x 190 feet, will house 150 multiple-spindle screw machines, countless secondary and finishing operations and special apparatus. The second floor will be given over to the manufacture of gaskets, mica insulators, terminals, etc. Every modern improvement in the manufacture of such parts is used in the various departments.

Production Increased 100 Per Cent.

A fair conception of the size of this department may be had when one learns that nearly 2,000,000 parts are assembled here each day. With the added facilities in the new building, this number will be doubled. The third and fourth floors will be devoted to assembling the metal parts with the insulators. Every minute 105 complete plugs are at present being turned out, and in the new building this production will be increased 100 per cent. On the fifth floor of the new addition will be a modern restaurant with a seating capacity for 250 people. For more than a year the firm has conducted a successful dining-room for employees, hence the establishment of the larger restaurant.

Offices will occupy the entire sixth floor, with a passenger elevator operating at all hours of the day. Directly across the street from the main building are the engineering and experimental departments, with two electric pyrometers constantly in service for testing and developing new plugs. The Champion folks claim that with the exception of several of the largest automobile makers, no other plant in the country has a testing and developing department equal to this.

Other Buildings

The chemical laboratory is completely equipped for all kinds of analyses. There is also a modern garage with 10 automobiles for plant service and testing out. Alongside the inspection building will be erected a recreation structure. This will contain handball courts, pool tables, bowling alleys and shower baths. The Champion company boasts already of fast baseball and basketball teams, and in the new building contests between various departments will be encouraged in bowling, etc.

STARR LEAVES POPE TO GO WITH SCALE CO.

WESTFIELD, Mass.—Only a few miles Starr has resigned his position as assistant sales manager of the Westfield Mfg. Co., and become associated with the eastern selling organization of the Toledo Scale Co.

During the many years that Mr. Starr has been connected with the cycle trade he has not only won a host of friends but has obtained recognition as one of the trade's strongest boosters. Before leaving the Pope headquarters, he was presented with a handsome leather brief case and a pair of diamond cuff-links by his co-workers.

FAIR PRICES AND QUALITY GOODS

Experience Proves That in Most Cases the Price-Cutter Could Obtain the Full Rate by Standing Firm and Using Better Salesmanship; Why It Pays to Boost the Quality Product; Some Observations Based Upon Actual Experiences

By A. W. PARRY

"I Guess It's Worth the Difference," Said the Buyer, "You Can Put 'er on the Bus for Me."

KEEN and unbiased observers of conditions in the cycle and accessory trades assert that price-cutting is an increasingly serious problem, and also point out that in ninety per cent of cases where it is resorted to it is unnecessary. In other words, the dealer who cuts his price could in nearly every instance obtain the list price for his wares by employing improved methods of salesmanship and holding out for his legitimate profit.

No motorcycle dealer slashes his profits simply for the sake of building up a cut-price reputation. He does it because he believes that unless he follows such tactics some one else will under-figure him and take his business. But the fact remains that the most successful dealers in the country today are those who stand by their prices; they are not afraid of price-cutters, so the theory that the price-cutter gets the bulk of the business must be erroneous.

Motor Cycle Illustrated is unqualifiedly against the cutting of prices, because sooner or later the practice is bound to hurt the dealer.

The hard-working dealer makes a mistake when he puts too low a price on his goods or his labor. He errs again when he offers a two-dollar article to a patron who is able and willing to buy a four or five-dollar article. The following article, based on actual investigations, deals with those two points.

NOT long ago the writer happened to be in a motorcycle salesroom in a Southern city when a boy approached the counter to pay for a slight repair on his bicycle; the proprietor handled both motorcycles and bicycles.

"How much?" asked the lad.

"Fifteen cents," was the dealer's reply.

The boy had a quarter in his hand. He had paid a quarter for that kind of job before, and expected to pay that price again. Incidentally, twenty-five cents was the price agreed upon by the dealers' association of that town for such a repair job.

The lad received ten cents in change and went out,—taking with him the dealer's profit on the job. My sympathy went out to that dealer immediately, for I saw that he was a hard worker and a well-meaning chap,—and I also saw that he was operating on the wrong policy.

After introducing myself to the dealer, I said: "I thought the dealers in this town all charged a quarter for such a repair job as that boy had."

"The other dealers do," he answered, "but I can't."

"Why not," I continued, "don't you do as good a job as any of them?"

"It isn't that," was the explanation, "but everybody that comes here has the idea that this is a sort of junkshop and they expect to get things more cheaply than elsewhere."

"When did you first notice that folks were getting that impression?" I asked.

"It's been coming on for a long time,—and now it has just about reached the limit."

"Why don't you put your foot down and stop it?"

"I'd go out of business if I did. People expect me to cut prices all to pieces and if I stood out for my just profits now they'd go somewhere else."

All of which was true.

But there was a time when the buyers of that town would have paid my friend just as much for a repair job or a piece of merchandise as they would pay anyone else. They must have known that he had to have some profit in order to remain in

Digitized by Google

business, and they would have been willing to pay a fair price,—but once the price-cutting was started they took full advantage of it.

"Don't you find that the character of your trade is less desirable now than when you were getting fair prices for your goods and your work?" I asked.

"Yes," was the prompt reply. "The better class of people seem to go to other dealers. They can pay the prices asked, and do not wish to do much haggling over their purchases. Besides, the dealers who get better prices for their stuff are able to keep up bigger and brighter stores. I'm up against it no matter how you turn."

I strongly advised a general clean-up of the store and repair shop and the publication of an advertisement in the local paper stating that there would be no more price-cutting in the —— ——— cycle shop. The dealer promised to act upon my suggestion.

"I can't go on this way," he admitted, "so I might as well stand out for my honest profits."

I believe he is doing it today.

A Repair Bill Protest

In another motorcycle agency I found a rider disputing his repair bill with the proprietor. He asserted that he could have done the job himself in less time than the shop mechanic required.

"I'll buy your gasoline for a month if you can prove that claim," said friend dealer, smilingly. "You're a good sport, I know, and I'm willing to prove that I'm game also. I don't allow my mechanics to loaf over a machine, and I charge only a reasonable profit for the work done here. I know this charge to be O. K. and I'm willing to prove it.

"You don't want slip-shod repair work on a good machine like yours; you don't want to get 50 miles out on the road and then find that I have given you a cheap job; you don't want to have your machine thrown together so that it will deteriorate faster than normal. Now, do you?"

"Well, maybe you're right," admitted the rider. "I suppose it's worth something to have your guarantee on the work."

"You bet it is," asserted the dealer, "and in order to stand behind my work I have to charge a fair price,—a price that I am willing to prove is fair."

"All right, Joe, old scout," said the rider as he started for the door after paying his bill, "you always stand out for what's coming to you but I feel safer with my machine in a reputable shop than if I had it where I knew I was getting a cut-price job, so I'm going to quit kicking."

Firmness and Tact

That dealer had just the right system. He was as firm as rock about the price of that repair job, but he held his ground in such a way that the rider's good will was retained. What's more, that rider went out with increased respect for friend dealer and his methods. He'll say a good word for that shop when opportunity offers.

I was in a motorcycle and bicycle shop ten days ago when a youth entered and asked for a bicycle pedal. The proprietor reached up to a shelf at once and took down a box of pedals.

I was in another motorcycle agency a week ago when a rider,—evidently not long in the game—entered and said he wanted a horn "or something of the kind." The visitor was neatly dressed and sensible-looking.

The proprietor showed him a warning signal of a rather old type that sold for about $1.50, and after glancing about the salesroom inquiringly the rider "guessed that would do the work for him."

But he wasn't satisfied, that much was evident. He reached into his pocket for money, still gazing rather questioningly at the horn and then around the salesroom.

Then I butted in.

"Have you ever considered one of these horns?" I interrupted, tapping the show-case over a $5 product. "A whole lot of the boys are using them, they stand up well under long wear and they certainly look well on the motorcycle."

"That's more along the line of what I had in mind," assented the visitor. "Let's see that one."

The horn was taken out of the case and the rider tooted it a few times and looked it over carefully.

"How much?" came the query finally.

"Five dollars," said the dealer.

"I guess it's worth the difference," said the buyer quietly, "you can put 'er on the bus for me."

"That man not only bought the higher-priced horn without argument, but I could see that he was somewhat hurt by the fact that he had been offered the lowest-priced horn in the store at first. He had been under-valued, and that's not a pleasant sensation.

"You should have offered that buyer the best horn you had in stock at first," I said to friend dealer, "and then let him come down to a lower-priced one if he wanted to."

"I believe you're right," agreed the dealer. "There's no harm in showing the best product I have in stock, even if I feel that the buyer is going to buy something at a lower price in the end. I misjudged that man, but I won't make a mistake of that kind again."

Pedal Expert Gives a Lesson

A well-known and capable staff official of a company that makes many thousands of pedals yearly told me of an incident in which he figured. It fits in well right here.

He was in an agency when a youth entered to buy a pedal. The dealer showed him a thirty-five-cent product and the patron bought it. When the youth went out the pedal expert asked if that was the best pedal the proprietor had in stock.

"It's not the best I have," was the retort, "but it's the best that fellow will pay for. I know my trade pretty well."

"I'd like to try an experiment if you don't mind," said the pedal expert. "Let's have a pair of your best pedals, the kind you sell at about seventy-five cents."

He took the pedals and crossed to the opposite side of the street where the youth was preparing to put the newly-purchased pedal on his bike. A short sales talk followed with the dealer watching from his doorway. Then the bicyclist decided to take the seventy-five-cent pedal instead of the thirty-five-cent one.

"On a good machine like yours it is a shame to use one new pedal of high quality and one old battered one," remarked the pedal expert. "Why not put 'em both on new. You'll feel better about it in the end and you'll know that you have the real goods under your feet."

"I'll take both of them," assented the rider. "You have the right dope."

That's all there was to it, and the dealer threw the extra silver into the cash register with a grin.

"I guess I haven't been making the most of my sales opportunities," he remarked, "but you can bet that I'm going to be a little more enterprising in the future."

These little reports of actual occurrences in motorcycle agencies are given to prove my opening contentions: that the dealer

(Continued on page 50)

YOU ARE ENTITLED TO FAIR PRICES, MR. DEALER

¶ To maintain your reputation for repair work and for reliable goods, you must have a reasonable profit. If you cut that profit you must cut your service also — or lose money. You don't want to fall down on your service, nor should you be obliged to lose money. Therefore you must have a fair price on your work and on your goods. You can get it.

¶ If other dealers in your town are cutting prices, you need a dealers' association. Start one. It may not go with a bang at first —but start it. You'll get results. Then fix your prices on a fair basis. Your patrons will be better satisfied, because they'll know they are paying for dependable goods and repairs—that you can afford to stand behind all that you sell and do.

¶ Never sell a mediocre product when you can put out a better one. The sale of a quality product means a better honest profit for you and better service and longer satisfaction for the buyer. Grade your stock, of course, and sell the lower-priced article when necessary, but talk quality goods and you'll never go wrong.

COMMERCIAL SALES ADD TO SOLIDITY OF MOTORCYCLE TRADE, SAYS J. B. CLARKSON

Well-Known New Zealand Distributor, and Representative of the Excelsior, Explains Why Application of Motorcycle to Business Life Is Keeping Up Buying Activity in Spite of War

IN spite of the heavy demands made upon the young men and the resources of New Zealand and Australia by the European war there has been little or no falling off in the call for motorcycles, largely due to the fact that three out of five motor two-wheelers sold in those countries are intended for commercial or general utility service.

This is the most significant point made by J. B. Clarkson, of Wellington, N. Z., one of the best known and most influential figures in international motorcycle circles, in the interview printed below. Mr. Clarkson admits that the number of New Zealanders who buy motorcycles for purely pleasure purposes is negligible, and asserts that the demands of the utility field alone will keep his firm very busy throughout the season.

In brief, it is the commercial motorcycle field that withstands the heavy drains of the war—remaining a solid, dependable branch of the cycle business—while the purely pleasure sales are hardly worth considering. This point is presented for the serious attention of dealers in the United States. It is by no means an argument for slighting the possibilities of pleasure sales, but is the strongest kind of a plea for more systematic and enthusiastic activity in behalf of the motorcycle as an adjunct to the many-sided and boundless business life of the nation.

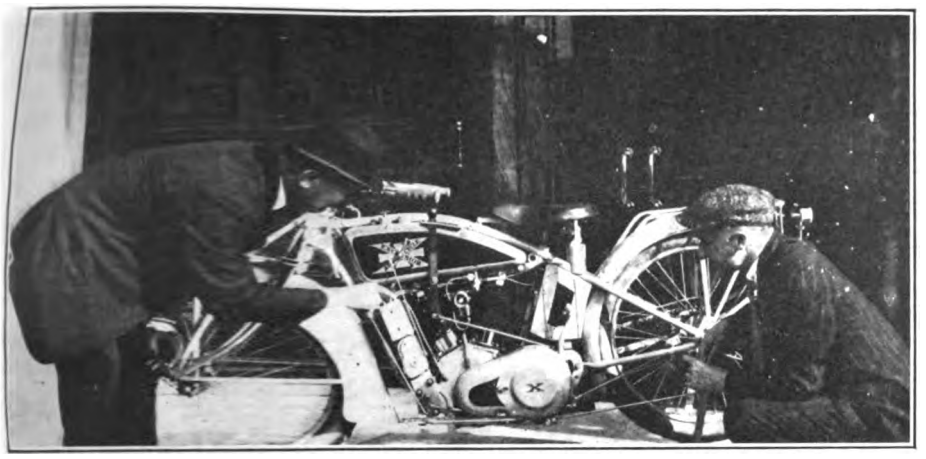
"AFTER a number of visits to the United States and quite carefu consideration of cycle conditions here, it strikes me that the greatest lack at present is serious attention to commercial motor cycle business," said Mr. J. B. Clarkson, of the Clarkson Company, Ltd., o Wellington, New Zealand, in an interview a few days ago at the office o **Motor Cycle Illustrated.** Mr. Clarkson has been in this country about month, during which time he conferred with the Excelsior Motor Mfg. & Supply Co., at the factory in Chicago, concerning his firm's allotment o Excelsior motorcycles for the year.

"I don't mean to say that you are entirely neglecting your utility field, continued the energetic New Zealander, "for on all sides I note evidences c increasing activity in that direction, but I am merely stating the facts whe I say that our commercial business in New Zealand and Australia is abou 75 per cent. stronger than yours.

"It is the rule here at present to sell motorcycles and bicycles for purel recreation purposes, while such sales are certainly the exceptions in ou country. Our people are keen about the buying value of money, and whe they invest in a motorcycle they know, in nine cases out of ten, just ho they are going to get their money back with big interest. They may c some pleasure riding, on the side, as you say, but primarily they purcha their motorcycle with a view of making it a part of their workaday live

"I do not mean to say that the heaviest part of our sales involve the use of vans, understand, but rather that our machines are used by inspectors, solicitors, real estate agents, collectors, officials, and all the great variety of workers who find it necessary to cover considerable ground in performing their duties. We sell quite a few motorcycle vans, it is true, but by far the great number of our machines are in use by m who ride them solo. You would really surprised if you could understand the e tent to which motorcycles have thus be applied to the business life of our countr It seems that there is hardly a branch activity to which the motorcycle cannot

Digitized by Google



J. B. Clarkson (at Left) Discussing Striking Features of Model 17 Excelsior with Sales Manager Fred Mathis at the Factory

applied, if only the dealer operates along the proper lines and the public can be brought to a full realization of the motorcycle's wonderful adaptability.

Trade Is on Sound Basis

"At the present time so many of our young men are with the fighting forces in Europe that the motorcycle industry would be rather hard hit if it were not for the great demand for commercial motorcycles. You see, we have our trade on a sound basis by working up the interest in the utility motorcycle, and in spite of all the strains now imposed upon the country we are going to sell as many motorcycles this year as in any previous season. We do not expect any falling off. That ought to be a good point for American dealers to consider,—the stability that comes with proper and consistent attention to the commercial motorcycle. We feel that our efforts to popularize the commercial two-wheeler have paid us very well indeed.

Will Sell 1,000 Excelsiors

"We are confident that our sales of Excelsior motorcycles this year will total not less than 1,000. This includes lightweights as well as the heavier models. Three hundred of the little fellows were on the ocean when I left home and I assume that by this time they are making a name for themselves in New Zealand and Australia. Some idea of the standing of the Excelsior in New Zealand will be gained from the fact that, owing to the difficulty of shipments, we had no spare parts for these machines last year,—and we did not need them. When a firm that sells hundreds of machines of a certain make can get along without spare parts for that make it certainly means that the machines must be giving remarkable service.

"There is one angle of our motorcycle field that will no doubt surprise students of the trade in the United States,—we have comparatively little of the social and pleasure spirit that seems to be quite strong here. I can explain that condition partly in this way: When a man has used his motorcycle every day throughout the week in a commercial or semi-business way he is not so much inclined to take his mount out for a long run over the week-end. Thousands of our riders practically live on their motorcycles, and the purely social aspects of riding therefore do not appeal to them strongly.

"We have some sporting events, of course, such as hill-climbs and reliability trials, and our boys go in for them very keenly. They do not care so much for racing in general, or for the so-called endurance run. They love to tune their machines up to the last minute and then compete on a close technical basis. They demand that every little twist and turn of the contest be officially observed, so that in the end there is no doubt as to the best machine and rider coming out on top.

"I do not know that your motorcycle field in the United States can be cultivated as intensively for commercial sales as ours has been; I am not sure that the utility end of the industry can ever be brought uppermost in your country—it is possible that your pleasure riders will always be in the ascendancy—but I do honestly feel that every American cycle dealer should turn at once to his commercial possibilities and make the most of them. It strikes me that your country had wonderful possibilities in that direction, especially when you consider that you are able to sell good motorcycles at much more moderate prices than we can,—considering our shipping costs and the duty."

Mr. Clarkson is about to sail for Europe and will return in about a month to cross the United States and take ship for New Zealand.

CYCLIST GOT ORDER THRO' IN QUICK TIME

MYSTIC, Conn.—The motorcycle proved its military value in an emergency once again, when the commanding officer at Fort Wright, N. Y., needed supplies badly from the Connecticut State Arsenal, the other day. The executive officer found that trains could not be depended upon to get the requisition through in time, so Sergeant James Chadwick volunteered to carry the order to the arsenal, in Hartford, on his Harley-Davidson.

Leaving the fort on the Government ferry at 11:30 he arrived at New London by 12:22 and rode into Hartford at 2:53. Leaving Hartford at 3:20, Chadwick reached New London at 5:30 and ferried across to the fort. He had no trouble on the trip.

1,330 LICENSES RECORDED IN KENTUCKY

FRANKFORT, Ky.—Commissioner of Motor Vehicles Byars recently issued a statement giving the records of licenses granted to motorists during the first six months of 1916. A total of 1,330 motorcycle licenses, amounting to $5,205.22 was recorded.

While this is not a very large number of licenses for a State, it is probably far below the number of machines in actual operation, as outside of the principal cities riders are not bothered much about their licenses.

TOLEDO'S NEW LINEUP OF MOTORCYCLE COPS

JIMMY ROURKE'S VACATION TOUR

The Daring Motorcyclist Starts Off to Deliver a Message on His Machine and Fights His Way Through in Spite of the Conspirators' Attempts to Check Him—He Arrives Safely at Washington and Saves the Situation

PART II

By PAUL J. BAILEY

"Rourke's Revolver Swung Up and the Sharp Report Rang Out"

IN the first installment, Jimmie Rourke, a motorcyclist, who is seeking a hotel after the day's run, is assaulted by thugs and is rescued by an army officer, for whom they mistake him. They both go to the officer's room and during the night the army man is attacked and wounded. He entrusts Rourke with a belt containing an important message and tells him that it must be delivered by a certain time to officials in Washington. Rourke consents to carry the message and gets under way.

IN the room next to the lieutenant's, a small, swart figure crouched silently, with his ear pressed against the panel, listening intently to the sounds that filtered dimly through. Occasionally he glanced at the clock on the wall, and an evil smile flitted over his face as he saw that the day had begun when the critical meeting at Washington would take place.

Suddenly he grew tense and excited as a new sound came to his ears. Conway had become conscious. The swarthy little man cursed venomously under his breath, for he heard Rourke volunteer to substitute for the wounded messenger. The plot of the conspirators had seemed certain of success, and now at the last moment there was a chance that the nerve and daring of this sturdy motorcyclist would foil their efforts.

Hastening to his accomplices, he warned them and they rushed to the garage just in time to see the motorcyclist launch himself down the street on the start of his wild ride to carry the message to Washington.

But they could still block him, they thought.

Their confederates in towns ahead could be warned of Rourke's coming, and he could easily be detained. Only eight hours for him to cover 280 miles of road if he was to reach Washington on time, and there should be many ways of delaying hi sufficiently to prevent delivering the me sage on time.

"Twisting and Turning Through the Woods"

Hastening to a telegraph office they se a message to a confederate in a town 1(miles ahead on the road to Washington- a message in private code, "Bedga lmna dsan motorcycle 7624 kliff."

Delivered to a thin, sallow, bearded ma in the other city, it aroused him to e: cited activity. Hastily summoning a ha dozen of his men, by telephone and me sengers, a consultation was held and t party embarked in two automobiles a left in separate directions, the leader a two men starting to meet Rourke and t other party going on in the direction Washington to intercept him later if got past the conspirators at this point.

At a Breathless Pace

With the motor roaring its song speed under him, Rourke sped over t highway at a breathless pace. He flew o the good roads with the speed of an e press train, plowed through long stretch of deep sand like a boat cuts the water, t powdery sand being thrown in a flying spr for yards on each side.

Opening the throttle he hurtled up t hills like a rocket, flashed over the cre and swept down the slopes with undimi ished speed. Round the bends of the ro he roared at full speed, sliding sidew in breath-taking skids that threw up sho ers of dust and loose gravel from the f ing wheels, but with the skill of long e

Digitized by Google

perience he kept the machine under control, righted it masterfully after sliding around the turns, crouched over the bars, plunging steadily on.

Dawn was breaking as he sped into a little town 100 miles from the city where he had left the lieutenant. Shutting off his motor he drew to a stop in front of a garage to refill the tanks of his machine, risking no delay from having his fuel supply exhausted on a country road.

At the same time a big touring car approached from the opposite direction and its occupants gazed intently at the license number on the motorcycle, the driver nodding knowingly to the others as the car stopped.

Watching Rourke with apparent carelessness the three men from the automobile casually approached him as he directed the garage attendant in filling the gasoline tank. Their eyes fastened on the leather pouch at his belt, their glances exchanged signals, and just as the last of the gasoline was gurgling into the tank of the motorcycle the three dark-faced strangers sprang upon the motorcyclist.

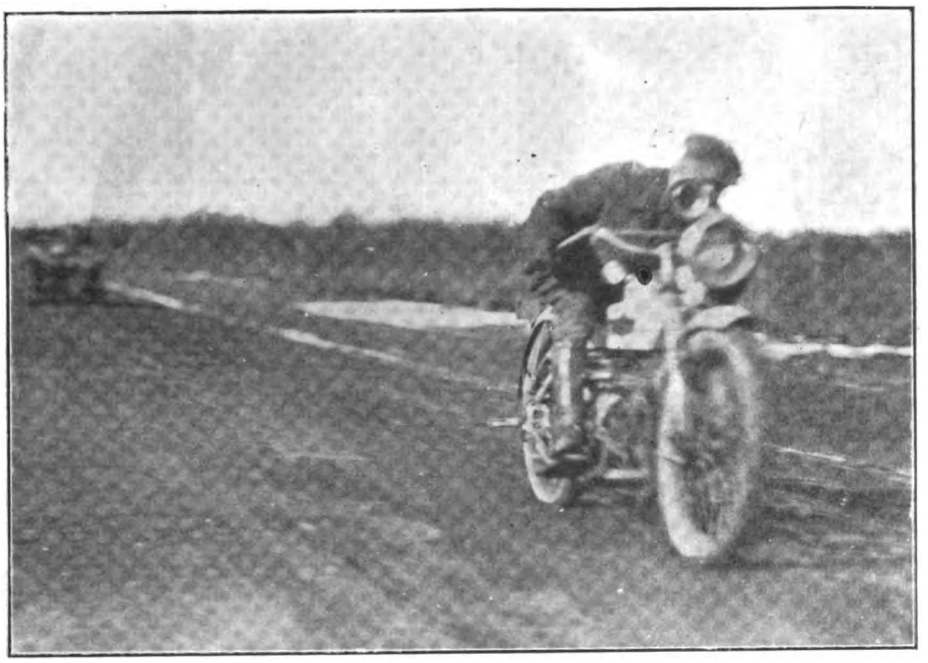
While two of his assailants rained blows upon Rourke and overpowered the garageman, the third whipped out a knife, deftly cut the pouch loose from his belt and snatching it in his fingers darted toward the touring car. The other two immediately ceased their attack, ran to the automobile. The driver banged in the clutch and they sped away.

His Fighting Blood Rose

For a moment Rourke was dazed, both by the blows he had received and by the unexpectedness of the attack. Then his fighting blood was up and he vaulted into the saddle and opened the throttle to the limit as he headed his motorcycle after the flying touring car.

The exhaust belched flame in a steady jet and the growl of the four cylinders merged into an unbroken bass roar as the speedometer hand moved up to 40, 50 and 55 miles an hour, swung past the 60 and 65 miles figures, and then trembled toward 70.

The automobile was a powerful, speedy machine, but it was no match for the swift two-wheeled Nemesis that was on its trail.



"Rourke Opened the Throttle and Bent Over the Bars"

With the wind screaming in his ears and the road flying underneath in a blur of gray, Rourke drew up on the speeding car. A shower of grit and sand thrown by its rear wheels stung his face as he shot up behind it, then he drew alongside, steering with one hand while the other sought the revolver in the bolster.

The driver was crouching over the wheel, his eyes intent on the road and every faculty concentrated on coaxing the last ounce of speed from the big car. Rourke's revolver swung up and the sharp report rang out above the thunder of the motors.

Again he fired.

Then the touring car lurched wildly and slackened its speed; and as he shot ahead of it Rourke caught a glimpse of the driver slumped down in the seat limply, the man at his side bending over and grasping the wheel to keep the machine in the road.

Slapping on the brake Rourke skidded to a stop and turned to run back to where the car had halted half down in a ditch.

"One Man Jumped from the Machine and Fled into the Bushes"

One man dodged down behind the body of the car and opened fire on the motorcyclist with an automatic pistol, but the other, abandoning the front seat, jumped from the machine and fled into the bushes. But not before Rourke recognized him as the one who had snatched his pouch.

While the man seemed covered behind the motor car, Rourke darted after the sallow, bearded figure fleeing through the bushes. A bullet clipped the twigs a foot from his head and he answered with a shot as the figure of the other showed for an instant through an opening in the bushes.

The sallow man broke through the foliage into an open spot some 20 yards wide and dashed madly for the concealment of the brush on the other side. Dropping grimly on one knee Rourke took careful, deliberate aim and fired, and the flying figure plunged forward to the ground, his face convulsed with pain as his hands clutched his hip where the bullet had shattered the bone.

The Pouch Once More

Covering the fallen man with his revolver Rourke advanced upon him, extending his left hand significantly. With a snarl the other man drew the leather pouch from his coat pocket and flung it at Rourke, who caught it deftly, slipped it into his pocket, picked up the pistol that his quarry had dropped in his fall, then ran back to where the motorcycle stood.

As he reached the machine a yell of rage floated to his ears from the automobile standing 50 yards behind, and a bullet whistled past. With a mocking laugh he gave the motorcycle a shove, vaulting to the saddle as the motor started running. A rumble sounded from the automobile motor and looking back Rourke saw that the man who had concealed himself behind the car had apparently regained his courage and ran the machine up onto the road again. He started after Rourke, steering with one hand and firing wildly with the pistol in the other.

HOW TO MAKE THE MOST OF SEASONAL OPPORTUNITIES

Simple and Effective Design for a Motorcycle Vacation Window

By G. A. SMITH

In Charge of U. S. Rubber Company's Window Displays

GRASPING seasonable opportunities is a well-known factor in good methods of advertising, and no less is it true of the window display, window trimming being one of the best methods of advertising and one which can be greatly strengthened through timely displays if you will only grasp the opportunities offered.

With all the different occasions throughout each year, the dealer has an unusually wide scope to introduce new schemes in the way of featuring merchandise; but in order to do this in a thorough and practical manner the dealer must use a little ingenuity to be able to prepare a creditable showing for the event. This is a very simple matter if you only stop to think and make use of the materials closely related. These, when worked up into a decorative idea in the shape of a setting, are bound to create and inspire an interest in the merchandise on display. It is by the show window that real comparisons in the different stores are drawn. The public is naturally interested in attractive displays. It is not so much the merchandise displayed as the manner in which the goods are shown that attracts or fails to do so.

Striking the Keynote

In fact, the dealer or display man must be awake to all opportunities offered in the way of special features for exploiting his merchandise. He must also be able to create ideas that are fitting to the occasion. He must be in sympathy with his work and through his keen understanding of what is wanted be able to sound the keynote of the psychological moment which will start public interest vibrating.

The most effective displays of merchandise for the vacationist are those in which the merchandise is shown amid settings which strongly suggest the uses to which the merchandise may be put.

With vacation time now at hand, an unusual opportunity is offered the dealer to feature his goods appropriately.

The all-important step to be taken in a display of this sort of merchandise is that which will introduce the vacation spirit into the display and suggest the need of vacation requisites to the beholder. Thus the vacationist is often induced to make his plans for the necessary outfitting in advance of the going-away period.

If you merely place the goods in the window in hackneyed forms, any old way,

C. R. C. A. ON THREE-DAY TOUR TO PHILADELPHIA

Eight New Yorkers Cover 323 Miles on Trip Down the Jersey Coast to the Quaker City; Sandy Roads and Sultry Weather Test Stamina of Riders; Sight-Seeing Stop at Atlantic City

By SYLVAIN SEGAL

1, Resting After a Bite to Eat; 2, Waiting for the Others to Catch Up; 3, At Start, St. George, N. Y.; 4, Line-Up at Atlantic City; 5, Over Stony Road in Philadelphia; 6, Leaving Princeton, N. J., on First Day

NEW YORK, N. Y., July 11.—When dawn spread its uncertain rays over the big town on the morning of July 2 and revealed the gilded hour hand of the old City Hall clock slowly creeping toward the future five, a party of eight cyclists, neatly attired in conventional bicycle costumes, broke the sepulchral quiet of narrow Nassau street with happy songs and cheery whistling, bound for Philadelphia on a triple century ride.

Little would weary pedestrians have wondered at this exuberance of joy at such an early hour of the morning could they, like the merry wheelmen, have conjured up in their minds a picture of the exhilarating sport held in prospect by the annual three-day tour of the Century Road Club Association.

Meeting the Missing Link

As the riders neared the ferry to Staten Island and swung into Broad street, they vociferously hailed the "missing link," the ninth man who completed the party. But it was not until the paddles of the boat began to churn the water and the chilly breezes of New York Harbor swept the decks that the wheelmen considered the journey really under way.

Billy Winquist squirmed into his coat. "Gosh, it's cold," he muttered. But Georgie Steppello didn't seem to mind it at all; he pulled a magazine out of his pocket and started to read a detective story. Ray Caldwell and his brother Joe were peering into the green waters of the harbor looking for sharks, while Willie Knecht and Harry Aron were swapping fishing yarns. Syl Segal, however, was in his usual serious mood, and since he was to accompany the tourists only as far as Princeton Syl gave both Carl Brohm and Pete Brock "rock-bottom" advice gathered from his wide experience in century riding, admonishing them to keep an eagle eye on the fellows and "to see that they behave themselves properly, for," he added, "you've got some 325 miles to cover."

The ferry soon brought the riders to Tottenville, Staten Island; they mounted their machines and in a jiffy were at the dock of the boat which was to take them to Perth Amboy, New Jersey. Reaching the Jersey side, the fellows struck out for New Brunswick, finding the roads in excellent condition and recording surprisingly good time to that point. Dayton and Monmouth Junction were the next towns on the route, and the road leading into the latter place conferred upon Caldwell the honor of scoring the initial puncture. This gave the boys an opportunity to quench their thirst at a spring found on a nearby farm.

Then the journey proceeded to Kingston where Winquist's tire "blew" and afforded another breathing spell for the party. Princeton, on top of a winding three mile grade, was next reached, and Segal, after treating the cyclists to a "farewell" soda, turned his wheel homeward, leaving the eight tourists to continue on to Trenton, the dinner stop.

Reach Philadelphia Ferry

Having fully satisfied the "inner man," the octet encountered poor roads to White Horse and Bordentown, but even this gruelling going failed to daunt the husky New Yorkers, for they reached Burlington on schedule time at 3:50 in the afternoon

McNAMARA AND BYRON SPLIT VELODROME HONORS

Former Takes Five-Mile Open Professional and Wins One-Mile Team Match Race with Spears as Partner; Byron Is First in Half-Mile Amateur Handicap and Second in Two-Mile Novice

NEWARK, N. J., July 9.—Reggie McNamara, the gritty Australian professional, and Edward Byron, the fast amateur who hails from the Antipodes, divided the honors at the Newark Velodrome on Sunday afternoon. McNamara, teamed with Bob Spears, won the one-mile team match race and took first place in the five-mile open. Byron was a winner in the half-mile handicap for the amateurs and took second place in the two-mile open for the simon pures, following William Spencer, of Toronto, over the finish line.

In the team match race, Frank Kramer and Frank Cavanagh finished second, with Alfred Goullet and Alfred Grenda third. Three heats were ridden to decide the race. Spears, who did the sprinting for the Spears-McNamara team, finished first in the first and third heats, while Kramer led the way home in the second heat. In all three heats, Goullet finished second. McNamara was fined $15 in the second heat for fouling Goullet as the riders were going into the bell lap.

Lloyd Thomas opened up a big lead in the five-mile open and held it until half a lap from home. At this point McNamara overtook him and, sprinting hard for the last half lap, won the race. Goullet, who was in fourth position going into the last lap, tried hard to ride around McNamara, but did not quite have the distance to do so. If the race had been five yards longer, "Goullie" would have probably won out. John Bedell hung on to McNamara's wheel for the last half lap and got second place. Frank Corry followed Goullet in, and Bob Spears was fifth.

The Velodrome fairly shook with applause when Arthur Spencer, the youthful Canadian cyclist, beat Marcel Dupuy, the speedy French rider, in the Brassard race, at one mile. Spencer rode around Dupuy on the last turn of the last lap and beat him in the stretch by two lengths. Spencer really beat Dupuy twice, but the first time the race was re-ridden when Dupuy protested that Spencer had forced him down on the flat. The consensus of opinion was that Spencer had won on his merits, and the fans were pretty sore when the referee ordered the race run over. But when the race was re-run and Spencer triumphed over his French rival, the fans went wild with glee.

The unknown distance race for the professionals which turned out to be just two miles went to Frank Cavanagh, the big Newark rider. When the gun was fired at one mile and four laps, telling the riders that there were two laps to go, Willie Hanley had quite a substantial lead. He could not hold out, however, and Cavanagh beat him in the homestretch, with Lloyd Thomas finishing second.

In a blanket finish Tommy Smith won the half-mile handicap for the professionals from Tommy Grimm and Joe Kopsky. Kopsky died at the finish and was beaten out by Smith and Grimm.

Byron started from the fifteen-yard mark in the half-mile handicap for the amateurs and won by two lengths from William Weimar, of the Bay View Wheelmen, who had a handicap of fifty-five yards. August Lang was third. The two-mile open for the amateurs was a hard race, with William Spencer finally winning out, and Byron crossing the line second. R. C. Lipsett, of the Century Road Club Association, won his novice in the two-thirds mile novice race. The summaries.

Two-thirds mile novice (amateur)—Won by R. C. Lipsett, Newark; Tom Baker, Passaic, second. Time, 1:36⅗.

Half-mile handicap (professional)—Won by Thomas Smith, Irvington; Thomas Grimm, Irvington (55 yards, second; Joseph G. Kopsky, Newark (60 yards), third; Frank Corry, Australia (30 yards), fourth; Harry Kaiser, Bronx (25 yards), fifth. Time, 0:53⅘.

One-mile team match race (professional)—Won by Robert E. Spears and Reginald McNamara, Australia; Frank Kramer, East Orange, and Frank Cavanagh, Newark, second; Alfred Goullet and Alfred Grenda, Australia, third. First heat won by Spears and McNamara; Goullet and Grenda, second; Kramer and Cavanagh, third. Time, 2:24. Second heat won by Kramer & Cavanagh; Goullet and Grenda, second; Spears and McNamara, third. Time, 2:28⅘. Third heat won by Spears and McNamara; Goullet and Grenda, second; Kramer and Cavanagh, third. Time, 2:36⅘.

The Brassard race, one-mile (professional)—Arthur Spencer, Toronto, vs. Marcel Dupuy, France. Won by Spencer. Time, 3:10⅘. Last eighth mile, 0:13.

Half-mile handicap (amateur)—Won by Edward Byron, Australia (15 yards); William Weimar, Bay View Wheelmen, second; August Lang, Irvington (20 yards), third; Ben O'Sicky, Cleveland (45 yards), fourth. Time, 0:56⅘.

Unknown distance race, invitation (professional)—Won by Frank Cavanagh, Newark; Lloyd Thomas, San Francisco, second; William Hanley, San Francisco, third; Harry Kaiser, Bronx, fourth; Worth L. Mitten, Davenport, Ia., fifth. Time, 4:10⅘. Distance, 2 miles.

Two-mile open (amateur)—Won by William Spencer, Toronto; Edward Byron, Australia, second; Eric Paetz, Germany, third; Thomas Fitzsimmons, East Orange, fourth. Time, 4:27.

Five-mile open (professional)—Won by Reginald McNamara, Australia; John Bedell, Lynbrook, L. I., second; Alfred Goullet, Australia, third; Frank Corry, Australia, fourth; Robert Spears, Australia, fifth. Time, 10:17⅗.

TWO PROVIDENCE HANDICAPS FOR AMATEURS

T. Hendrickson, of Brockton, Wins 16-Mile Event and T. Marroce, of Providence, Captures 8-Mile; Second Annual Speed Program

PROVIDENCE, R. I., July 9.—The second annual races of amateur bicycle riders in this State and Massachusetts were held here today over the Reservoir-Park avenues granolithic course. There were a large number of entries and some keen competition.

The events, consisting of 8-mile and 16-mile amateur handicaps, were pulled off without any accident. John Montecalvo, 129 Spruce street, a dealer in bicycles, had general supervision of the program.

A. Colonna, placed at scratch in the 16-mile race, broke his chain in the first lap of that race, and was forced to repair it himself. He finished seventh, however, in the race over 34 contestants. Alfred Marciano, who finished fourth, broke a pedal in the second lap and changed wheels. Tony Lancellotti, who last year was considered one of the fastest riders in the city, met his waterloo today, finishing second in the 16-mile event. The summaries:

Sixteen-mile amateur handicap—Won by T. Henrickson, Brockton (scratch); Tony Lancellotti, Providence (scratch), second; Antimo Lancellotti, Providence (30 sec.), third; Alfred Marcinao, Providence (30 sec.), fourth; R. M. Torrey, Revere, Mass. (30 sec.), fifth; R. Greenbaum, Revere (30 sec.), sixth; A. Colonna, Providence (scratch), seventh. Time, 44 min. 44 sec.

Eight-mile novice—Won by T. Marroce, Providence; W. Cole, Taunton, Mass., second; C. Cole, Taunton, third; L. Matarese, Providence, fourth; E. Marciano, Providence, fifth. Time, 23 min. 45 sec.

Officials—Starters, E. Montecalvo, of Providence, and L. A. Barber, of Taunton. Timekeeper, J. Montecalvo.

SCRAPELLO NOSES OUT ACME SCRATCHMEN

NEW YORK.—With 20 starters facing the gun, the Acme Wheelmen staged the fifth of a series of handicap road races over the Pelham Parkway course on Sunday last, July 9. Starting with a handicap of two minutes, George Scrapello managed to lead the scratch men over the tape.

Line-Up of Acme Wheelmen on Pelham Parkway, Ready for the Gun

LONDON CYCLE SALES SHOW GREAT INCREASE

Business Done by Agents in Ontario City Indicates Pedal Machine Has Taken City by Storm—Over 400 Now in Use—Motorcycle Business in Thriving Condition

LONDON, Ont.—The bicycle has taken this city by storm, according to statements made by representative local dealers to the Canadian news-gatherer for **Motor Cycle Illustrated.** The London agents secured excellent bicycle business during May and June in spite of almost incessant rain but with the clearing of the skies for the July-August summer vacation season they have looked forward to still greater sales this year. The motorcycle trade continues steady so that now there are about four hundred machines in operation in this city of 58,000.

Sold 98 Bicycles

"I sold 98 bicycles in May, 1916. In the corresponding month last year I disposed of 33 wheels," declared Mr. G. A. Wenige, head of the London Bicycle & Motor Company, whose store is a model establishment. "So far my bicycle business has been three times greater this year than during 1915. The bicycle is again making a big hit in London. I am selling as many motorcycles as ever also but the big jump is in the bicycle department. I cannot get wheels fast enough. In previous years I conducted a bicycle livery but I have not been able to do any renting this year because the people have bought up all my used wheels.

"I had two carloads of bicycles in stock last spring and I had only four odd models left at the end of June. In the meantime I was trying my best to get shipments from the factories. This year the bicycle business has been just as important and profitable in my case, at least, as the motorcycle trade."

Wenige is handling the same lines as before. He features the Indian and sells many Pope motorcycles which were his original stock-in-trade. He is the sales representative for Dunham sidecars and he handles Brantford bicycles.

"I believe in concentration," declared Wenige in speaking about the makes which he represents. "I believe in putting all my eggs in the one basket and then watching that basket. Too many agencies and too large territories are features to be guarded against, I believe." Wenige is doing well this year with Hendee Featherweights and Indian bicycles.

E. M. Bissett, one of the pioneer dealers of London, is trying two new lines this season and is securing great success. The two new makes are the Henderson and the Dayton Power-Bicycle. Both have created a lot of attention and Bissett is securing more sales than ever before. The London City Council abolished Sunday street cars during several months this spring and Bissett boosted the idea of riding a motorcycle on Sundays instead of walking. Many people caught the idea.

The store of W. Thompson is a busy place. Thompson is the big Excelsior booster here and the Excelsior interests here are in good hands. He recently had a new front put on his store and he is making good use of his location near the city market. Thompson also does a good bicycle trade and has a busy repair department.

Mr. F. Benson is putting a goodly number of Harley-Davidsons into commission in London. Benson is practically the only motorcycle dealer on Dundas street, the main thoroughfare, and many people know all about the Harley-Davidson. Benson is one of the oldest bicycle dealers here also.

Selling Cyclemotors

Gurd & Company look after sales of Cyclemotors. This is a new line for the company and several of the tack-weight motors are already in use.

F. W. Kerr, in East London, represents the Smith Motor Wheel with which he did a large business both last year and this. Kerr has sold bicycle-boosters to ministers, collectors, pleasure-seekers, commercial travelers and others.

There will be no motorcycle racing in London this year for the simple reason that the horsemen who control the local dirt track are jealously keeping the oval to themselves. The local dealers are arranging for the organization of a bicycle club here and the first bicycle races in London for years will be seen next September when several road races are to be staged.

MAKING THE JOB MUCH EASIER FOR DADDY

Formerly the Head of This Detroit Family Had to Pedal the Folks to the Scene of Their Week-End Picnic; Now the Motor Wheel Does It

SILVERSTEIN WINS SYRACUSE SECRET TIME RUN

SYRACUSE, N. Y.—Of the 56 starters who participated in the five-mile secret time bicycle race promoted by local bicycle dealers on Independence Day, H. Silverstein made the closest approximation of the time set by the committee for the distance when he covered the course in 37 minutes and 5 seconds. His time was just 1 minute and 50 seconds faster than the committee's time.

Morrell Murphy made the second best approximation of the time over the course which extended from the Court House to Kirk Park, while Hyman Koldin and J. Meagher were next in the order named. Tony Vendetti took first honors in the racemeet which was run on the Kirk Park track following the secret time run.

CENTURY BOYS MAKE NIGHT RUN TO SAN JOSE

SAN FRANCISCO, Cal.—The New Century Wheelmen held a club run to San Jose a few nights ago, the distance being 50 miles each way. The boys left the clubrooms at 10:30, immediately after the meeting, and everything went well until Walter Hammitt, the Century captain; Arthur Page and Harry Spence, who were setting the pace, crashed through a barrier of boards that had been placed across the unfinished highway. There was no light on the barrier.

The riders reached San Jose without further trouble, but were unable to get sleeping accommodations, owing to the fact that an old-fashioned round-up was being staged in the city. They found a hay-loft that was not occupied, however, and managed to get a few hours' sleep. They started back the next day.

ENTRY BLANKS OUT FOR ATLANTIC CITY MEET

Complete List of Prizes Received Up to July 3 Announced by Messrs. Surre and Morehouse; 56 Manufacturers Contribute Awards

ATLANTIC CITY, N. J., July 11.—Entry blanks are now out for the races which will be held here on August 3 in connection with the Cycle Trades Convention and are being distributed by Max Sladkin, 503 Market St., Philadelphia, and W. R. Stroud, 2213 Winton St., Philadelphia. Entries close on Monday, July 31.

As was previously announced there will be four races in all, a five-mile handicap, one-mile Atlantic County championship, five-mile motor wheel race and ten-mile handicap. These events will be open only to amateurs registered with the National Cycling Association.

The scene of the race will be the Ventnor Boulevard and the course, which will require four complete laps for five miles, is to be positively cleared of all traffic while the meet is in progress. The bicycle race having the greatest entry list will be allotted the largest number of the more valuable prizes. Referee Stroud announces that there will be no time prizes, and that no entry fee will be required.

Up to July 3, Messrs. Morehouse and Surre, of the Convention arrangements committee, acknowledged receipt of the following prizes:

A. O. Smith Co., Smith motor wheel; Eclipse Machine Co., coaster brakes; Emblem Mfg. Co., Emblem bicycle; Fisk Rubber Co., bicycle tires; Corbin Screw Corp., coaster brake; Racine Rubber Co, Racine tires; Troxel Mfg. Co., six saddles; Frank Mossberg Co., assorted wrenches; Badger Brass Mfg. Co., Solar lamps; Diamond Chain & Mfg. Co., roller chains; Persons Mfg. Co., one track racer saddle; Firestone Tire & Rubber Co., two pair bicycle tires; Chicago Handle Bar Co., one Shelby bar.

Splitdorf Electrical Co., one silver cup; American Wood Rim Co., six pair rims; The Crosby Co., $10; The Standard Co., $15; B. F. Goodrich Co., two pair tires; Continental Rubber Works, Vitalic tires; Federal Rubber Mfg. Co., tires; Buffalo Metal Goods Co., brake; Davis Sewing Machine Co., 5 pair pedals; H. & F. Mesinger, saddle; New York Sporting Goods Co., one pair Palmer-Armstrong tires, Wolverine Leather Goods Co., one razor strop.

Pierce Cycle Co., one pair hubs; Spalding & Co., two jerseys; Coggins & Owens, one pair C. & O. Auto-Bike tires; Chicago Cycle Supply Co., one pair Chicyco tires; Mead Cycle Co., one pair Samson racing tires; Bearings Co. of America, $10; Hendee Mfg. Co., one Indian bicycle, $40; Rose Mfg. Co., one lamp; Kokomo Rubber Co., one pair Everlaster tires; Majestic Mfg. Co., 1 steel carrier; Empire Rubber & Tire Co., one 28 x 3 M. C. case.

Noera Mfg. Co., one-half dozen drinking cups. Indiana Rubber & Ins. Wire Co., one pair bicycle tires; Bevin Bros. Mfg. Co., six assorted bells; Seiss Mfg. Co., two horns; Elyea-Austell Co., one pair Vitalic tires; Kelly Handle Bar Co., 2 pair stems, two racing bars; Holland-Baden-Ramsey Co., one pair tires; Reading Cycle Mfg. Co., one Reading-Standard bicycle; A. Schrader's Son, one special tire gauge.

International Stamping Co., two sets side guards; Excelsior Cycle Co., one pair Deluxe tires; New Departure Mfg. Co., one gold watch, chain and fountain pen; Westfield Mfg. Co., one silver loving cup; City Supply Co., one pair De Luxe racing tires; Hawthorne Mfg. Co., one bicycle lamp and electric outfit; Twentieth Century Mfg. Co., one bicycle lamp; Pacific Motor Supply Co., San Francisco, $15; Van Cleef Bros., one bicycle repair outfit; Wald Mfg. Co., assorted carriers and baskets; National Screw & Tack Co., nipples and spokes.

WRIGHT IS FIRST IN MOTOR WHEEL RACE

JAMESTOWN, N. Y.—Ivan Wright, of this city, came in first in the Motor Wheel race of 3½ miles held on July 4 on the State Road. His time was 6:27. He won the solid gold watch fob presented by the William H. Cahn Co., Eastern representative for the Smith Motor Wheel.

There were ten starters, although 17 entries had been received. Wright went slightly ahead at the start and kept up a good pace for the entire distance, crossing the line closely followed by most of the field.

ANTONIO LANCELOTTI WINS TAUNTON HANDICAP

TAUNTON, Mass.—Antonio Lancelotti, of Providence, R. I., won the five-mile handicap race held at the Fair Grounds track on July 4, in connection with the race meet of the Gentlemen's Driving Club. Manuel Souza, of Taunton, was second; O. Collona, of Providence, third, and August Souza, of Taunton, was fourth. Fred Marsiano, Providence; Antimo Lancelloti, Providence, and M. Slattery, Taunton, took fifth, sixth and seventh places respectively.

There were sixteen starters. M. Slattery was distance man with 300 yards, while M. Souza and A. Souza were at 200 yards. At scratch were O. Collona, Antimo Lancelloti, Egisti Cini, F. Marsiano and Antonio Lancelloti. Slattery led till the last mile, when most of the scratch men passed him. Cini fell in a collision and withdrew. A. E. Barber was starter, with George Clapp and Thomas Reilly as judges, all officials being local dealers.

Few Dealers Give Better Evidence of the Solidity of the Bicycle Business Than Joe Holle, of Frisco, Who Has Been Selling Two-Wheelers at This Fine Store for a Quarter of a Century

BELIEVE IN BETTER BICYCLES

R. H. Whitmore and Son, Memphis, Tenn., Who Do a Brisk Business in High-Grade Machines

BICYCLE IS POPULAR IN LOUISVILLE, KY.

LOUISVILLE, Ky.—That the bicycle is getting more and more popular in this city is shown by the fact that Carroll V. Robinson, chairman of the Mogul Bicycle Club, has sent a challenge to the cyclists of Frankfort, Ky., to clubs whose members are under 18 years of age. There is no limit to the numbers to compete.

The challenge was printed in the Frankfort State Journal, and it is expected that clubs in the State Capitol will soon answer Robinson's letter.

TANDEM TEAM GOES EAST

SAN FRANCISCO, Cal.—Tom J. Shea, of Windsor Locks, Ct., and William Thompson, formerly of Texas, started for the East June 19, riding tandem on a 1916 Indian Powerplus, and going by the Placerville and Ogden route. Cards have just been received from them, stating that they reached Denver on the 29th, having covered probably the worst part of their trip, with no trouble.

BICYCLE MEN TO START GENERAL PUBLICITY SCHEME

SAN FRANCISCO, Cal.—Bicycle advertising and especially bicycle news in general has been conspicuously absent from the San Francisco papers for several years, with the exception of a fair amount of space given to the Bicycle Day last Spring. The effects of that event were so satisfactory that the local bicycle and supply jobbers have been discussing a project for starting a general publicity campaign in the newspapers, involving the allotment of some space for the featuring of bicycle news.

Nothing definite has come of it yet, but it is hoped that sufficient interest can be aroused to put the scheme through. The riders would certainly appreciate it, and there are a good many people who would ride except for the idea that nobody does it any more.

LIGENFELDER PROMOTING LOS ANGELES BICYCLE DAY

LOS ANGELES, Cal., July 2.—Eddie Ligenfelder, formerly a track star and now head of the big Goodyear tire branch in Los Angeles, is boosting for Bicycle Day in the city. Eddie put over a great preliminary announcement, getting a six column lay-out with a special cartoon on the front sporting page of the Los Angeles Times and a two-page write-up that made it look like a sure thing for July 22.

Mentioned among old timers who will be active participants are John T. Dye, Harry L. Owesney, Bill Ruess, Johnny Boss and George Cline.

Eddie is urging the trade to get behind the proposition and make it the biggest selling argument that has ever been featured in the Southwest.

A. D. T. GETS LONG MILEAGE ON EVERLASTERS

KOKOMO, Ind.—In a recent letter to the Kokomo Rubber Co., maker of Everlaster and Kokomo Kord cycle tires, John F. Dickson, a messenger from Dallas, Texas, states that his actual mileage to date was 16,574 on a set of Everlaster pneumatics.

"I bought the tires from the Cortines Supply Company, in Dallas, and have averaged nearly 100 miles daily," says Dickson in the letter. "My greatest mileage was 121 in one day and my lowest 85 miles. I am now riding the original tires which are still in good shape."

The Kokomo firm has incorporated this letter in an attractive folder recently issued to dealers.

LEVER ON SOUTHERN CYCLE TRADE

NEW YORK.—That cycle business conditions in the South, and especially in Jacksonville, Fla., are of the sort to make an optimist even of the fellow with the pessimistic tendencies, comes from Henry Lever, of McGraw Bros., Jacksonville, who dropped in to visit the D. P. Harris Hardware Co. At least a measure of the good business is to be credited to the general prosperity marking business conditions in America at the present time, according to Mr. Lever, but not a little of it in Jacksonville, at least, results from the influx of tourists which has put a whole lot of money which in former years reached Europe, in circulation in the Southern resort cities.

As far as his particular company is concerned, Mr. Lever states that it has practically doubled its business since October, 1915, and demonstrating the quality of hustle which this Southern jobber puts into the selling end quite as much as the salability of Rollfast tires, is his statement that McGraw Bros. are selling on the average a carload of Rollfasts a month. The name of the concern will be changed to the Southern Hardware & Bicycle Co. on July 1, with H. S. O'Dell and H. Lever as firm members.

HADDEN WINS 10-MILE RACE IN NORTH TONAWANDA

NORTH TONAWANDA, N. Y., July 8.—The ten-mile handicap bicycle road race held in this city, in which 28 riders participated, was won by Robert Hadden. Glenn Anderson finished second, while third place was taken by Thomas Welton, fourth by Lester Grainge and fifth place by Wilfred Trombley. Trombley took the first time prize, while Robert Hadden and John Mollnow took the second and third time prizes. The contestants finished in this order:

Name of Rider.	Handicap.
Robert Hadden	3 minutes
Glenn Anderson	4 "
Thomas Welton	3 "
Lester Grainge	5 "
Wilfred Trombley	scratch
Howard Meyers	2 minutes
John Mollnow	scratch
John Evans	1 minute

C. R. C. A. ON THREE-DAY TOUR TO PHILADELPHIA

(Continued from page 31)

and then pushed on to Camden, where they met the ferry to Philadelphia.

Lodgings at a very moderate price were secured in the Quaker City, and no sooner had the tired riders "tucked away" a dinner when they "hit the hay"—all but Steppello who was still deeply engrossed in unraveling the plot of the detective story and sat up until the "wee hours of the morn" to see the villain tight in the clutches of a Sherlock Holmes.

Late Start for Atlantic City

Because no one had thought of bringing along a Big Ben, a rather late start was made for Atlantic City, the sight-seeing stop of the second day's ride. In fact, it was not until after eight o'clock that the riders left the Quaker City and, crossing on the ferry, hit the trail for Berlin, N. J. Here ice cream soda again played the role of a "life saver" and put the riders in "pedaling" condition.

The day was certainly a scorcher and riding over the sand into Hammondstown hardly improved the spirits of the party. It was ninety in the shade, and the roads for a greater part of the distance were taking a sun bath. Aron turned a pretty somersault in the sand, which was witnessed by a kind-hearted farmer, who, much relieved by the fact that Aron quickly got on his feet again, saw that the hot sun was telling on the cyclists and invited them to partake of raspberries and cream.

Rest Up at Egg Harbor

Another puncture had to be repaired on the road just out of Hammondstown and then the ride continued to Egg Harbor City, where the cyclists stopped to check up their century forms and take a well-earned rest.

Atlantic City was reached at two o'clock in the afternoon, sixty-five miles having been clicked off on the cyclometers from Phillie to the oceanside resort. A short tour was made of the city, scenic post cards were mailed home, and then the cyclists sat down to a dish of oyster stew, after which the ride was resumed on to Absecon, that town being entered at five in the afternoon.

The sandy roads into Absecon caused Knecht to spill, Winquist bumping into him and sprawling out on the sand. Fortunately neither was badly hurt. A refreshing quaff of cool water put both into fighting form again, and the journey continued without accident through Port Republic, over the swamp and rickety bridges into New Gretna, thence Manahawken and Tuckertown, where the boys, all tuckered out, decided to spend the night, having recorded one hundred and three miles for the second day.

What They Got for One Dollar

At Tuckertown Lieutenant Steppello showed his business acumen by completing arrangements while the host of the cyclists to furnish lodgings, supper and breakfast, all for the modest sum of one dollar. After supper five of the fellows sauntered around the little town and went to the movies; but Brock, Brohn and Knecht selected to retire early.

A substantial breakfast and Tuckertown was left behind at seven o'clock in the morning. Bay View loomed into view at 8:45, where ice cream again saved the day. Then Tom's River became the next objective, strong winds preventing the riders from making fast time into that village.

Strike Perth Amboy at 7:10

The lunch stop was Lakewood and then the course pointed to Asbury Park. Long Branch, Elberon and Red Bank were passed through, the cyclists resting for a while at the last mentioned point. Over the hills and sandy roads the party pedalled into Morgan and after eating a light luncheon arrived at Perth Amboy at 7:10 in the evening.

Here everyone began to show the strain of the tour and a slow pace was taken up into Annadale, the supper stop, after the cyclists had ferried to Staten Island. Saint George was reached quite late on the night of the Fourth, where the tired riders broke up into two groups, one ferrying to Brooklyn and the other to Manhattan.

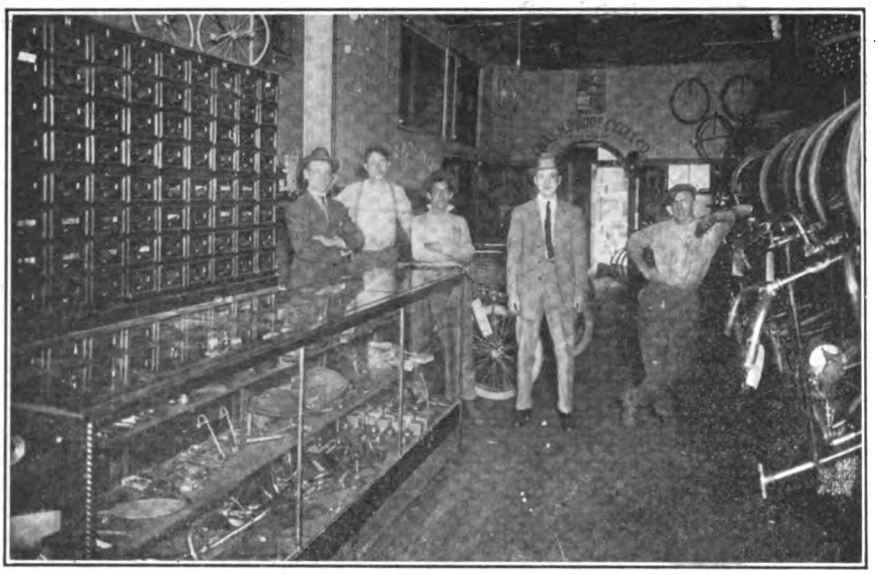
The total mileage for the three days was 323 miles; the daily mileages follows:

July 2—New York City to Philadelphia, 105 miles.

July 3—Philadelphia to Tuckertown, 103 miles.

July 4—Tuckertown to New York City, 115 miles.

"A PLACE FOR EVERYTHING AND EVERYTHING THERE"



That's the Slogan Adopted by the Chas. H. Budde Cycle Co., of St. Louis, and the Neat Appearance of the Store Speaks Well for the Efficient Staff of Men Who Translate the Slogan Into Action

MARQUART ROMPS OFF WITH C. R. C. A. POINT RACE

NEW YORK, July 9.—The weekly point race held over the Fordham Road course by the Century Road Club Association, was won by Johnny Marquart, from scratch, after a hard sprint in which he managed to nose out Eddie Jensen. V. Cestone was just behind the leading pair, and Stepello came in fourth, eight seconds to the bad.

Sattler was the leader at the half-way turn, but the mud caused by the heavy rain just previous to the race proved his undoing, causing him to skid and fall while rounding the turn. The spill retired him from the race. The distance was measured as six miles. The summaries:

1. John J. Marquart, scratch, 16 minutes 2 seconds; 2, Edward Jensen, scratch, 16 minutes 2⅕ seconds; 3. V. Cestone, 1 minute, 17 minutes 2⅖ seconds; 4. George Steppels, 1 minute, 17 minutes 10 seconds.

After next Sunday's race the run will be taken to Coney Island, and the cycle track at Steeplechase Park will be visited and a series of impromptu events will serve to while away the afternoon.

The members of the association are strong for both the pleasure and competition ends, and the Coney Island run will be one of several leading events in the former category.

HOFFMAN TAKES TWO AT SCOTTISH GAMES

SAN FRANCISCO, Cal.—Fred Hoffman, of the Olympic Club, of San Francisco, won the one and two mile bicycle races held July 4 at Shellmound Park. The races were held as a feature of the San Francisco Scottish Thistle Club's annual picnic and athletic games.

Jerry Slyerdall, also of the winged O's, sailed into second place, and Vic Spence, of the New Century Wheelmen, finished in third place. The times were fast and a large crowd enjoyed the speedwork. Summaries:

One-mile—Won by Fred Hoffman, Olympic Club; J. Slyerdall, second; Vic Spence, New Century Wheelmen, third. Time, 2:34.

Two-mile—Won by Fred Hoffman; A. Wiseman, Acme Wheelmen, second; Vic Spence, third. Time, 5:23.

In the Dealer's Realm

WHITE RETURNS FROM TOUR TO DENVER ON HIS HENDERSON

HUNTINGDON, Pa.—W. A. White, who sells the Henderson in this city, has just finished a tour from Huntingdon to Denver, Colo., and return. His trip totaled more than 4,000 miles and was made without mechanical trouble of any sort.

White left this city in the Spring, using a 1916 two-speed model, and rode leisurely westward, stopping in various cities for a few days. He visited the big tire factories in Akron, O., then went through Indiana, and Illinois. He crossed the Mississippi at Clinton, Iowa, and traversed the Lincoln Highway to Omaha and Cheyenne. He reports roads fine through Ohio and Indiana, but rough west of the "Father of Waters."

At many places in Nebraska and Wyoming he followed a mere trail through sand and over the prairies. After spending four days in Denver he rode to Colorado Springs and then turned eastward and rode to this city by easy stages. He had four punctures as his only troubles.

On returning, White found that business had developed in a very satisfactory way during his absence. The manager who had been left in charge had worked up a number of good prospects and closed several sales. White's experience on this tour has provided him with a number of first-class selling ideas and he is getting busy closing up several sales with hesitating prospects.

AGENT STURGES OUT WITH CONNECTICUT NATIONAL GUARD

NEW HAVEN, Conn.—Shelton Sturges, the popular Indian agent in this city, is now out with the Second Infantry, Connecticut National Guard, at the Mexican border as a mounted scout. He is a non-com. in the regiment, and answered the call by President Wilson to mobilize the Guard right on the dot.

Meanwhile, Henry, Shelton's brother, is running things at the shop. He will be in charge for a few weeks, when Simon Kaletsky, Sturges' right-hand man, will conduct the business until Shelton returns. Since Shelton left, Henry and Simon have sold two new machines, one with a sidecar and one used motorcycle. Still, all hands will be glad to see Shelton on the job once more.

DANVILLE, KY.

CONN & ARNOLD, local Harley-Davidson representatives, are advertising a big sale of used motorcycles and autos, in an effort to clean up on used goods. The firm recently suffered a loss in a gasoline fire which wrecked its plant and is maintaining temporary offices at the Mahan & Bethurum garage on 4th street.

KLINES FIND VULCANIZING PLANT GREAT AID TO DEALER

LOUISVILLE, Ky.—Kline Brothers, handling the Harley-Davidson in this city, are now firm in the opinion that a vulcanizing plant is a great aid to the motorcycle dealer. They advise all dealers to install such a plant if they have the room.

Mr. Kline advances the argument that the vulcanizing plant is especially valuable to the motorcycle dealer during the winter months when sales of new machines are slack. During the summer, the dealer can build up a nice business in vulcanizing bicycle, motorcycle and automobile tires, and the latter business helps out during the months when otherwise bench warming would be about all the average dealer would find to do.

To Make It Pay

The firm took over the store of an automobile supply house nearly a year ago, and the vulcanizing plant was part of the equipment. In order to make it pay it was necessary to get automobile business, and the boys managed to get it through advertising and personal solicitation.

At the same time it was necessary to work out a system whereby this work could be done without interfering with sales of motorcycles or supplies, and at the same time not run the operating expenses up too high by employing additional men.

The following system was worked out and is being handled to advantage: The boys get to the store at 5 o'clock in the morning, but the doors are not opened for business until about 8 o'clock. This gives Herbert Kline three full hours to clean up the vulcanizing which came in on the previous day, and Pete Kline gets a chance to clean up on repair work to some extent. The consequence is that the work is nearly cleaned up when the store opens, and as business is light until 10 o'clock things are in excellent shape by that hour, The cementing is all done on the previous evening, and the tires are ready for the vulcanizer the first thing in the morning.

Routine Not Affected

Under this arrangement Herbert Kline is enabled to get out on the street and hustle for new business after ten o'clock, and the general routine is not cut into greatly by the new department. At the same time his brother has managed to get the motorcycle repairs up in good shape and is in position to be in the store and handle things himself.

Ever since first starting in business the firm has endeavored to clean up all repairs on the day they came in regardless of how late they had to stay in the evening, unless it was cases where parts had to be brought in from the factory. The result has been that the concern has established a record for service in all of its undertakings.

BELOIT, WIS.

R. S. MAXWELL, with Mrs. Maxwell, started out on July 4 for a tour of the Middle West and will be gone for two or three weeks. Maxwell is the local Harley-Davidson dealer and uses a 16-J sidecar combination for the trip.

LOUISVILLE, KY.

HARVEY BERNARD, representing the Hendee Manufacturing Company, was a recent visitor to Louisville. He called upon the Century Cycle Co., local Indian dealers.

Smith Motor Wheel
DETACHABLE

Motor Wheel Prosperity

What the Smith Motor Wheel Is Doing for Dealers

From Frank Wheaton, dealer in Kalispell, Montana

"The Motor Wheel had a very enthusiastic reception here—created more interest than any other thing I ever saw—equal to the old days when even the elect were enthusiastic over cycles. Have already lined up a host of prospects and sold a number of machines."

From Maine to Montana and from Seattle to St. Augustine come letters brimful of enthusiasm for the Smith Motor Wheel.

Dealers everywhere are joy-riding into bigger business and easier profits.

And they're all a big happy family of money-makers.

Their biggest business booster is the Smith Motor Wheel, itself,—the spunky red motor which is the greatest self-advertiser on the roads. It wins friends everywhere and people look naturally for Motor Wheel Headquarters.

A little newspaper advertising helps link up the dealer with the big national advertising in the magazines and returns begin coming in at once.

One Smith sells another and new bicycles, tires and accessories move faster.

The Smith Motor Wheel is a lively money-maker for live dealers. We may have an opening for you. Write for particulars.

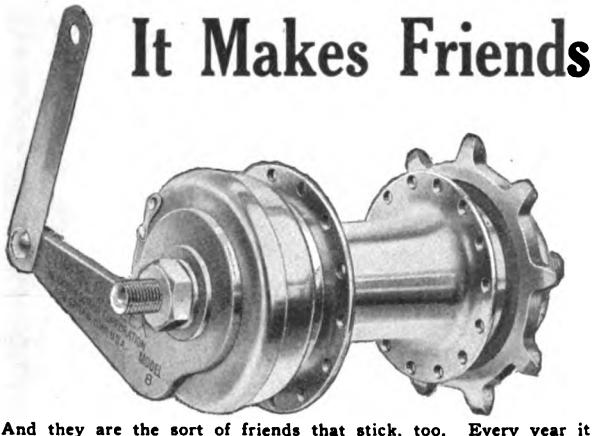
It Makes Friends



And they are the sort of friends that stick, too. Every year it makes more of them—hosts of them. Probably every bicyclist in America has heard of it. Thousands upon thousands use it—the famous

Corbin Duplex Coaster Brake

There is no deep secret of its success. Any rider that has ever used one can tell in a few words the reason for its remarkable popularity.

It delivers the service—that's all. It delivers the service and keeps right on delivering it. Its grip, smoothness of action, durability and general utility are unequalled.

That's why the majority of brake equipped bicycles carry the Corbin equipment. And that's why dealers in all parts of the country carry now, and have carried for years, the famous Corbin Duplex Coaster Brake.

Dealers: Get in touch with your jobber. Specify the Corbin when ordering bicycles. All manufacturers of bicycles furnish it. Price list and Catalog on request.

Riders: Equip the Corbin to your wheel. Investigate today. Write for catalog.

QUEBEC DEALERS HAVE GOOD SEASON IN SPITE OF DISADVANTAGES

ST. LOUIS DU HA-HA, P. Q.—In line with the extension of the scope of the motorcycle in the United States, dealers in Quebec Province have opened the season well, in spite of a rainy spring and other disadvantages. They are of the opinion that the year 1917 will be a star season for the power two-wheeler and are intent on having reductions made for the coming year in the cost of licenses, etc.

"The season for the motorcycle is very short," says J. A. Moreau, of this city, and gasoline is high. The roads are not good, either. What with the cost of upkeep, license and registration fee, the motorcyclist with an average salary is hard put to it to make ends meet. We—the dealers—are uniting to represent conditions to the government of each Province, in order that fees may be reduced in 1917."

FRANKLIN, KY.

FRANKLIN CARRIAGE CO., has taken the agency for the Smith Motor Wheel, in addition to its line of bicycles. These lines are carried with buggies and tricycles. The bicycle business has been a brisk one and shows little signs of letting up even at this portion of the season.

WARNERKROS IN NEW LOCATION

FRESNO, Cal.—A. U. Warnerkros, the Excelsior dealer, has recently moved from his old location, due to a big fire some time ago that destroyed his store and stock on "I" street, to a large and well appointed store on "K" street, where he has everything that a modern motorcycle store and garage would call for.

JIMMIE ROURKE'S VACATION TOUR

(Continued from page 27)

"Fine chance you have, Archduke," laughed Rourke as he opened the throttle and bent over the bars. The motorcycle leaped into its stride with a deep-throated roar from the quadruple exhaust, the road swept backward from the thrust of the rear wheel, and Rourke looking back a few minutes later saw the car diminished to a dust-dimmed speck in the distance, hopelessly left behind in this contest of speed.

"Fooled them that time," he muttered with a short laugh, adding as he glanced at the watch strapped to his gauntlet, "but they cost me several minutes' time that I couldn't spare very well. Guess we'll have to beat it a little faster, son."

And the miles were reeled behind him even more swiftly than before, on and on, as he flashed on his breathless course to Washington.

Twenty miles farther he sped over the summit of a hill and quickly shut off power as his eyes swept down the long slope before him. A quarter of a mile ahead an automobile stood at the edge of the road, and as he flashed into sight it turned and moved slowly straight across the highway, blocking the road, while three men scrambled out and took up positions on either side as if to make sure of no one passing.

It was the third party of conspirators.

With the quick thinking born of long experience in the saddle, Rourke's plan of action was laid out instantly. He couldn't pass the motor car, for it blocked the whole width of the road, and with his revolver empty there was no chance to fight his way through the line.

Almost upon the threatening gang, his quick eyes discerned a narrow, winding foot path that branched off the road and wandered back into the woods, turning here and there between the trees. Swinging his weight against the handlebars he turned the machine with a suddenness that skidded the rear wheel round in a quarter-circle, shot off the road onto the path, up the grassy bank and, ducking his head to avoid the twigs and branches that whipped sharply as he brushed past, he roared back along the path through the woods, twisting and turning skillfully as he followed the sinuous bends of the narrow thoroughfare.

A yell of baffled astonishment and a rain of wild shots came from the conspirators as he swung off the road, but a moment later he had disappeared among the underbrush, leaving them raging impotently at the ease with which he had outwitted them.

On through the shady woods he rolled for perhaps a half-mile, until the path brought him out into a narrow back road,

(Continued on page 44)

which he followed to the main highway.

Again he looked at the watch on his gauntlet. A little more time lost. It was going to be close work—a desperate chance, but one on which he was determined to make good if it was humanly possible.

"For Uncle Sam is depending on you now, old man," he muttered to himself as he bent over the bars again and pushed the throttle open for the final dash.

A very grave group of men faced each other at the secret meeting of the cabinet at Washington. Only a few minutes remained before 11 o'clock when an answer must be given to the foreign ambassadors—and the message upon which that answer depended had not arrived. Information had been received saying that a secret messenger had been dispatched to take it to the Capitol, but he had never arrived.

It Meant War

And the only answer that the cabinet could give without the message meant war.

With a weary shake of his head the gray-headed leader of the State Department spread his hands hopelessly.

"Gentlemen, there is only one answer possible as the situation stands. And that answer means war," he said slowly.

The hour had arrived. The foreign delegation marched in solemnly. With a punctilious formality the American statesmen received them. Then there was a vacant pause before the real object of the meeting was touched. The cabinet men knew that their answer must be given then and there, knew that but one answer was possible without the information given in the missing message.

Loath to deliver this answer, they delayed by needless technicalities, empty forms, and evasions, but at last the leader of the foreign delegation insisted upon an answer.

The time had come.

Steeling himself to meet the issue, the veteran statesman who acted as spokesman for the Americans, rose to deliver his answer.

A commotion outside the entrance drew the attention of all in the room at that moment. The door burst open and a dusty, travel-stained figure, breathless with haste, but with the fire of determined purpose in his face, plunged into the room, hastened to the gray-haired man standing ready to speak, straightened up stiffly with a military salute and extended a hand holding a battered, torn and blood-flecked leather pouch.

With trembling fingers the statesman tore open the pouch, withdrew the folded sheets within, and his eyes skimmed rapidly over the pages.

A great relief lighted up his face, and a smile of deep content played on his lips as he read.

"Gentlemen, the message which I have received is the best answer that could be given you," he said slowly to the group of foreign ambassadors. "I will read it to you."

And he did.

Crisis Was Passed

The diplomatic crisis was passed with honor and satisfaction for all the nations involved. The representatives of the European nations departed after expressing renewed devotion and sincere friendship with America. The possibility of war vanished like a puff of vapor in the noonday sun. Though surprising in some of its phases the message Rourke had carried had proved the perfect solution of the problem that had so tangled diplomatic relations.

The cabinet men, of course, pressed Rourke for his story after the foreign delegation had gone, showing intense interest as he related the adventures met by Lieutenant Conway and himself, and congratulating him heartily on his success in the perilous mission.

When out in the open air again Rourke patted his motorcycle fondly, as a horseman would his favorite mount, and looked back at the big white building looming up above the green lawns.

Into his mind flitted the thought of his original plans for a quiet, leisurely vacation tour—and of the events that had just happened.

Stretching his arms wide he grinned lazily, and summed it all up in two short words: "*Some tour.*"

LOS ANGELES-BEACH RUN TO BE HELD IN AUGUST

LOS ANGELES, Cal., July 1.—The annual run of the Los Angeles M. C. to Beach will take place in August this year. The committee has already been appointed to take charge of preliminary arrangements and to see that the event is well advertised. It is figured that over 1,000 machines and close to 2,000 riders and passengers will attend, judging from past performances.

The committee in charge consists of Lester Miles (chairman), Paul J. C. Derkum, F. J. Michael and T. C. Butler, Jr.

THEFT-PREVENTION PLAN LACKS SUPPORT

Jobbers of Southern California Worked Out a Scheme to Trace Stolen Bicycles, but Sufficient Co-operation Was Not Offered

LOS ANGELES.—The plan for an effective theft-prevention campaign to prevent the stealing of bicycles, which is going on at an extraordinary rate in Southern California, has fallen through for lack of support. The jobbers subscribed considerable money and put a great deal of effort into working out a plan which was considered to be absolutely effective, but the bicycle dealers apparently did not guarantee the necessary financial support for putting it into operation.

Julius Smith, manager of Edwin F. Merry's store in Los Angeles, was chairman of the committee which worked out the plan, and the jobbers are still hopeful that the trade will eventually see the necessity of putting it into action. There is no question that the liability to theft is a great bar in Southern California to a much better sale of bicycles than is being had at present.

Briefly stated, the theft prevention plan was to establish serial numbers on all new bicycles sold by the respective dealers—the serial numbers to indicate the dealer as well as the wheel. Each dealer would stamp every new bicycle in his store with his initials, a code for his town and a consecutive number, on the cranks, forks and frames. Every stolen machine would be reported immediately by this code to the proposed Dealers' Association of Southern California, and twice a month bulletins covering all thefts would be sent out to every dealer member, to be posted in a conspicuous place in his store.

Investigation has practically established the fact that all the machines stolen in Southern California are sold in some other part of this region. It is probable that 300 a month are stolen in Los Angeles. Based on actual experience of his customers, Julius Smith offered to bet that he could have ten machines stolen in a single day.

By the identification stamp and bulletin plan it would make no difference whether a machine was sold in San Diego, San Francisco or Riverside, it would be immediately identified as a stolen machine and the dealer who sold it notified promptly.

Furthermore, to take care of the selling objection existing in the theft situation, the proposed association would allow each of the members to display a large poster, guaranteeing to the purchaser of every bicycle the protection afforded by the existence of the association and its recovery plan.

MOIST PROMOTING TOUR FROM LONG BEACH

LONG BEACH, Cal.—Charles Moist, representing the Indian here, is interesting a number of husky riders in mountain touring. Moist himself is frequently seen on the long jaunt on his Powerplus, taking in the fishing at Big Bear Lake among other things. He was one of the first to catch a limit at this lake.

FRASER STRONG FOR COMMERCIAL SALES.

SAN FRANCISCO, Cal., July 9.—Mr. Fraser, San Francisco manager for the Appeal Manufacturing & Jobbing Company of Los Angeles, is starting an active campaign for larger sales of Harley-Davidson commercial solo side-car outfits. He is convinced that there is a great field in this line, which has so far been practically untouched by the motorcycle dealers.

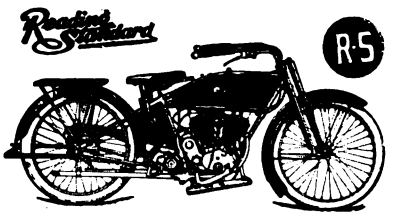
His aim at present is to stir up the retailers to an appreciation of the possibilities of the motorcycle and to give them some suggestions as to how they can get results in their particular business. He has just received a new carload of motorcycles, but has orders booked ahead from his dealers for nearly two cars.

K. C. RIDERS FORM OUTING CLUB

KANSAS CITY, Mo., July 8.—As a result of the interest developed by the outings of the Indian riders in Kansas City, a club has been formed which is known as the Indian Outing Club with headquarters at the Wigwam of Charles Hanson, who is the guiding spirit of the organization. R. J. Millard, has been elected president; Frank Archer, vice-president; Albert Hanson, secretary, and Ross Landes, treasurer. The Indian bunch, especially the sidecar users, have been enjoying weekly spins into the country.

Have You Investigated the

R-S



Have you compared it, feature for feature, with the other makes? Didn't you find it far in advance of the others in every constructive detail? Emphatically YES. The R-S is built by men who KNOW, in a factory where modern ideas and modern facilities prevail. The result—a thoroughly modern machine acknowledged to be the Finest Motorcycle in the World.

The Largest Gasoline Cars in the World are fired by Splitdorf Plugs

The 300-H. P., self-propelled, McKeen gasoline rail cars are used for most difficult service in Australia, Mexico and the United States. The high efficiency of these great gasoline cars is another testimonial for the

SPLITDORF SPARK PLUG

With the Green Hexagonal Jacket

Ninety per cent. of all engine troubles are due to faulty ignition. Seventy-five per cent. of them can be remedied at once and forever by the use of Splitdorf Plugs.

These plugs are practically indestructible, positively gas and oil tight. They are as nearly soot-proof as a plug can be. Dozens of times they have run 20,000 to 30,000 miles without ever having been cleaned.

Made in all sizes and in types to suit every car, motorcycle, motor truck, motor boat, aeroplane, tractor, and stationary gasoline motor. Write for Splitdorf Directory which tells which plug to use in *your* motor.

Splitdorf Plugs sell for one dollar everywhere. If you can't get them from your dealer, send to us for them.

Prest-O-Lite For Motorcycles

The Choice of Experienced Riders

Everywhere the experienced motorcyclist uses Prest-O-Lite. Notice the mounts shown below—Prest-O-Lite equipped Harley-Davidson motorcycles recently purchased by the Police Dept. of Rochester, New York.

Prest-O-Lite is used by more riders than all other systems combined. You can get it on any motorcycle you buy.

Prest-O-Lite gives perfect riding light; is simple and trouble-proof, and not injured by jolts and bumps. Prest-O-Lite will not fail in emergencies—it's as sturdy as your motorcycle itself.

From a money standpoint, Prest-O-Lite costs less to buy and less to use. It needs no attention you yourself cannot give easily and inexpensively. An attractive combination is "Prest-O-Lite, a lamp and a good mechanical horn." Ask your dealer about it.

DEALERS: Start the rider right with Prest-O-Lite. Every equipment combination you sell like the above makes a friend. You give the rider the most for his money in brilliancy, reliability and economy.

Send today for one of the most profitable and satisfactory offers a dealer can make. Details on request.

"149"

The Peer of Motorcycle Chains

Accurate Every part is micrometer gauged for accuracy and pitch and each chain is carefully inspected and tested before leaving the factory.

Strong The breaking strength is several times what is needed for actual service. This provides a good factor of safety.

Durable No. 149 will give steady, day after day service when operated under anything like normal service conditions.

Diamond Chain & Mfg. Co.
Indianapolis, Indiana

YOU WANT AN OIL

that is manufactured especially for your Motorcycle. The makers of

HARRIS
TRADE MARK REG. U.S. PAT. OFF.
OILS AND GREASES

produce a special lubricant that will give your motorcycle increased efficiency—longer life—greater service—one that an air-cooled motor will not carbonize. This oil is called

HARRIS MOTORCYCLE OIL

Put out in four grades—Extra Heavy, Heavy, Medium and Light.

"A Little Goes a Long Way and Every Drop Counts."

Ask Your Dealer or Write.

A. W. Harris Oil Company
326 S. Water St., Providence, R. I.
Branch: 143 No. Wabash Ave., Chicago, Ill.

ANAHEIM, CAL.

W. H. BOON, representing the Harley-Davidson in Anaheim, has moved to a fine new location with shop in rear of his store since going into business for himself. Boon's friends consider his place sets the pace for Orange County cycle establishments. Everything is kept clean and in perfect order and all parts and accessories are stocked in showcases and cabinets, and are instantly accessible. The shop has all necessary equipment, and is finely lighted. This, together with the reputation of Boon and his experience, is an assurance of fine work.

In the selling end Boon has been reaping a fine reward for his new policy of featuring sidecars. Up to last year he says he did not realize what sidecars would do for a dealer, but he woke up to the proposition and began using one himself and boosting for their sale. The result is that he has not only sold a good bunch of sidecars but has sold more machines than he would without the sidecar idea as it enables him to overcome the ideas of the man who has begun to think of a four-wheeler.

Up to the first week in June he had sold 10 new Harley-Davidsons and five sidecars and had a deposit on another new machine and sidecar. So he has put through sidecars for more than 50 per cent. of the machines. Boon has just taken on the Cleveland and when the **Motor Cycle Illustrated** representative called had his two demonstrators in stock and was lining up prospects. He finds that the lightweight opens up an entirely new field and expects to do a good business.

CLEVELAND A LIGHTWEIGHT TOWN

CLEVELAND, OHIO.—One of the cities in which the lightweight has taken particular hold is Cleveland, Ohio. The Cleveland branch of the Haverford Cycle Company is selling an average of three Excelsior lightweights a day. They report that the sale of these machines does not indicate that they are taken in place of the heavier models,—that is, that their sale causes a corresponding falling off in the sale of the large machines, but that they seem to be bought by customers who have not considered the heavier and comparatively expensive three-speed twins.

DAYTON MEN AT CONVENTION

H. M. HUFFMAN, manager of the cycle department of the Davis Sewing Machine Company, and S. H. Ankeney, Advertising Manager, were in the Dayton Ad Club party that spent the week of June 26 at Philadelphia, where the Associated Advertising Clubs of the World held forth in their annual convention.

NEWARK, N. J.

THE HAVERFORD CYCLE CO. has just ordered from the Excelsior factory, twenty Model 17-3, three-speed Excelsiors with electric lighting equipment for the Police Department, of Newark, N. J.

This particular police department has changed mounts a number of times and have at various times used practically every machine on the market.

This order was fought for hard by the representatives of all the leading manufacturers, each feeling that the getting of the order was a mark of approval on their particular machine.

SAN DIEGO, CAL.

JIMMY URQUHART, representing the Indian in this city, has sold 37 machines to date and is awaiting another shipment from Risden, the distributor. Jimmy reports the demand as increasing with the advance of the season.

Morrow

Safeguards the Rider in Vacation Land

When outfitting your customers for their vacation trips, impress upon them the necessity of having upon their wheels **the one sure guide to a safe riding season**—the MORROW.

For smoothing the "stiff" hill to boulevard level, for coasting for miles without a pedal push, for the quick, velvety halt in any emergency, the MORROW has gained a deserved popularity. It has made the bicycle easier to sell—easier to ride and SAFEST.

Therefore, before starting the "boys" off on their vacation trips, look to their equipment. See to it that their enjoyment of the wide, sun-flecked, shadow-patched roads, their delight in views from lofty heights of field and stream is not marred by trouble—in other words, see that they are MORROW-equipped.

FAIR PRICES AND QUALITY GOODS

(Continued from page 23)

who feels that it is necessary to cut his prices could in most cases get the full price of his goods if he stood out for his rights and used good salesmanship, and also that it is a mistake to begin by offering the lowest-priced article in stock to any patron.

"Service" must be the watchword of every successful motorcycle agency, and the dealer who shaves his profits, or wipes them out entirely, cannot continue to give service. If he does, he is going to do it at a loss.

The motorcycle is a well-made product, with the best possible engineering skill behind it, and the accessories are in the same class; so why shouldn't a dealer get what his goods are worth? He should,—that's all there is to say. And he will, when he realizes that friends made through clipping prices are in the end only liabilities.

GAPPEN BUYS OUT HARRELL

GREENFIELD, Ind.—A. A. Gappen has purchased the motorcycle and bicycle shop of Esta Harrell and will combine it with his West Main street store.

SCHWARTZ THINKS HARD

NEW HAVEN, Conn.—Sam Schwartz, local representative for the Miami Power Bicycle, has started to think hard. His contract calls for 100 of the little four-strokers, and he has sold 50 already. This leaves him 50 for a ten-months' distribution, and Sam figures that soon he will have nothing but catalogs to show instead of Miamis.

MAKING THE MOST OF SEASONAL OPPORTUNITIES

(Continued from page 30)

and without a story to tell, you will fail to get a display that will be salesproducing in a large way. What is necessary is to so arrange the merchandise with some carefully conceived and prepared ideas that the uses of the articles will be forcibly suggested and an increased longing stimulated for participation in cycling.

SUGGESTION FOR VACATION WINDOW DISPLAY

We herewith show an original display which can be very easily employed to produce such results as we have indicated. This idea can be prepared and installed with very little expense and labor. The sketch is intended for featuring motorcycles for the vacationist, and is one that may be installed in a window of almost any size.

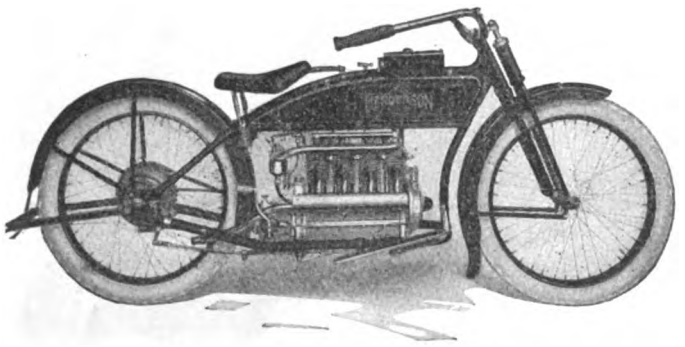
It can be made as follows: First outline on a piece of sign, painters muslin or heavy white paper, a map of the United States which can be mounted on a light framework made of wood or narrow strips of wood may be attached to top and bottom instead. Lettered in black inside of the outline of the map is the wording "See America First on a Motorcycle. It's the quickest, pleasantest and most economical way to spend your annual vacation. Let us show you."

Placed at each side is a guideboard made up from rough lumber. The crosspiece is sawed out in the shape shown and is securely nailed to a wooden upright. These can be painted grey with a streaked tone of green mixture to produce a weathered effect, or you may use them plain. They carry the wording, "To an Economical Vacation," "To a Pleasant Vacation Ramble." Placed around the base are a few rocks, flowers, etc., to produce a natural effect. A small tent is shown erected in the center of the window. Directly in front of this is an imitation campfire, showing broiler, frying pans, cups, etc. These can be easily secured from some friend, employee or your local sporting goods store. They will only be too glad to lend them to you, providing you place a card in connection stating by whom they were loaned.

If you feel that you wish to go into this a little more extensively you can use natural or artificial boughs, etc., in the background. Scenic paintings can also be utilized to good advantage in this connection. This, of course, is left to your own imagination. A motorcycle is placed at each side of the window in such a position that it will show up to the best advantage. Accessories, etc., in connection with road guide books and maps are arranged around over the floor of the window.

A window worked out along these lines possesses the punch and human interest, so essential to display work. Prices of motorcycles and any other information you wish to give to the public may be lettered on small cards and placed to advantage.

Convinced—and Glad of It



WHEN a rider has looked 'em all over carefully, has weighed values critically, and has finally decided that the four-cylinder Henderson has so many advantages that he can't be satisfied with anything else—and then when he has ridden the machine and finds its actual performance even better than he had expected—that's the kind of enthusiastic satisfaction that boosts business for Henderson dealers.

HENDERSON MOTORCYCLE CO., Detroit

Jobbers—Remember!

The goods you sell must sell not only on their merits, but they must also have the added "punch" of distinction. When you handle the "strongest motorcycle chain in the world," proven to be so by competitive tests, you are assured of a ready market—always.

A HANDSOME DAYTON CATALOG

DAYTON, O.—The catalog just issued by the Davis Sewing Machine Company, for its Dayton Motor Bicycle, is one of the most attractive ever sent to the cycle trade. The cover is printed in four colors and depicts a young man and young lady mounted on Motor Bicycles gracefully riding along the crest of a Western divide with the purple haze of the mountains in the far background and tall, steeple-like mountain pines in the foreground. The colors are vivid and beautiful in their simplicity. The figures on the Motor Bicycles carry at once the impression of unalloyed joy, comfort and cleanliness.

The interior pages give full specifications and show the machines in their natural colors. A number of photographs of the Dayton Motor Bicycle in actual use also lend life to the pages. A supply of the catalogs has been sent to all of the Dayton dealers.

CHICAGO, ILL.

IN CHICAGO they are applying the safety first idea in a new direction. There has recently been completed several miles of cement road leading out of the city and beyond the corporate limits. This eliminates the City Police Department, and the natural result has been that these roads immediately became unsafe on account of the speed fiends that appropriated them for their own use.

There is in Chicago a special commission known as the Public Safety Commission and their officers are empowered to work either in the city or the suburbs. To put a stop to speeding on the above-mentioned roads, two of the public safety officers have been provided with new Big Valve 17-3 Excelsiors and detailed to gather in the speeders. They have so far been kept busy.

LE ROY REACHES DENVER SAFELY

ALFRED LE ROY, the Los Angeles phenomenon who pilots his Harley-Davidson 1916 three-speed and sidecar although crippled by the loss of both legs and one arm, is now on is way from Denver to Omaha. In a letter to the Los Angeles Harley-Davidson agency from Denver he stated that he made the trip from El Paso to Denver, 850 miles, in two and one-half days, and after crossing the desert his only word of criticism of road conditions was the simple remark that "there were no boulevards in the distance."

LOUISVILLE, KY.

KLINE BROTHERS, local Harley-Davidson dealers, were compelled to postpone a scheduled run to Lincoln Farm on account of rainy weather and bad roads. June was one of the worst months experienced in several years, it raining for 23 days during that month.

MERRY DISTRIBUTING CYCLEMOTOR

EDWIN F. MERRY, the San Francisco and Los Angeles bicycle jobber, has taken the State distributing agency for the Cyclemotor, manufactured in Rochester, New York. One of the little powerplants is on display in Merry's Los Angeles store and about the middle of July he will personally tour the principal Southern California cities and towns to close arrangements with applicants among the bicycle dealers for the local agency.

FINDS DAYTON MOTOR BICYCLE O. K.

A. N. HUBBARD, auditor for the New York Automobile Garage, Union Hill, N. J., picked the Dayton Motor Bicycle as the one best bet for his purposes and writes the factory that it is all O. K.

TAKE all that's latest and newest and best in the three speed "Champion of the Hills"
—reduce the weight by thirty-five pounds
—chop a dollar off the price for every pound
—and build up a machine that combines the big Pope features with the simplicity of the Pope single cylinder motor

Then you will have Model TM-16, the finest Single ever made.

It is the machine with seven to ten horsepower of "Push"—generated in the economical overhead valve way.

Its starter, with crank easily reached from the saddle, turns the motor over three times at a single stroke of the foot—acting directly on motor shaft.

Its full suspension—swinging rockers and leaf springs in the front; famous Pope suspension in the rear—makes it glide over the road, protecting rider and engine from jolts and jars.

Its other features: always-in-mesh gears, combination foot and hand control of clutch, brake and gear release, big tanks, jack stand, comfortable footboards, extra heavy chain, and splasher panels on front wheel; add to comfort and convenience in a way that spells genuine satisfaction to the owner.

Are *your* customers among the satisfied ones?

United States Tires Win

On July 4th at Sheepshead Bay, Richard Buttlar won the 25-mile New York State Amateur Motorcycle Championship in 18 minutes and 34 seconds. Buttlar also won the 10-mile Amateur Motorcycle Championship in 7 minutes and 35 2/5 seconds. These records were made on a Harley-Davidson motorcycle equipped with United States Tires.

On the same day I. F. Jacobs won the Jack Pine Endurance Run at Grand Rapids, Michigan, on an Indian Motorcycle equipped with United States Tires, thereby winning the title of F. A. M. National Road Champion, which prize was at stake for the first time.

These records prove the amazing speed and endurance qualities of United States Motorcycle Tires both for track and road work.

If you want thorough tire satisfaction on road or track, use United States Motorcycle Tires.

PROVIDENCE READY TO WELCOME F. A. M. DELEGATES

Final Arrangements Completed for National F. A. M. Convention—Elaborate Program Will Keep Things Humming Throughout the Week—Chairman Swenson Will Start Endurance Run from Albany, N. Y.—At Least 1,500 Delegates and Members Are Expected

PROVIDENCE, R. I., July 18.—The bustle and bustle of preparation for the fourteenth annual convention of the F. A. M., which opens here next week, has changed the usual quiet aspect of Providence and dotted the town with scenes not unlike those of a military concentration camp. Khaki clad figures are hurrying about the streets, some on foot and other on their power steeds, executing the final instructions of Chairman B. A. Swenson in rounding out the elaborate program that promises to make the meet next week a record-smasher.

Prepare for Huge Crowd

Last night Chairman Swenson after putting in a hard and enthusiastic day's work, announced that he had nearly everything in readiness for the 1,500 or more F. A. M. riders who will swarm to the city on the opening day of the convention. There will be variety aplenty and every minute from the time the convention opens until it disbands will be chock full of thrilling and exhilarating sports. And not only the men have taken into consideration in adding the finishing touches to the program, but the ladies also will be royally entertained.

A recapitulation of the various events scheduled shows that no stone has been left unturned to put a heap o' pep and punch into the national meet. From the endurance run which leaves Albany, N. Y., next Monday morning right down to the excursion which will be the pleasing finale of the convention on Sunday, every detail of the program has been carefully worked out that the business sessions, sports and entertainments may proceed without a hitch.

The Convention Program

A birdseye view of the program, as now arranged, is given below:

Monday, July 24—Start of the 560-mile endurance run from Albany, N. Y.

Tuesday, July 25—Continuation of the run to North Conway, N. H.; the first machines expected to reach Providence at [illegible]

[illegible]—Business session, opening at ten o'clock at the Crown Hotel, the official headquarters of the convention.

Races start at the Narragansett Park Speedway at 1:30 in the afternoon.

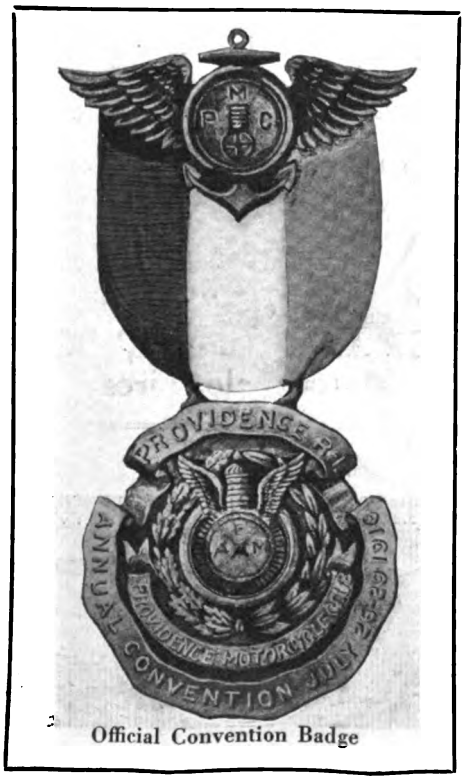
Thursday, July 27—Luncheon and entertainment for the ladies at the Casino, Roger Williams Park, at 10:30 in the morning; business session at the Crown Hotel at same time.

Friday, July 28—Outing at Rocky Point. Boat leaves at 10:30 in the morning for sail down Narragansett Bay.

Saturday, July 29—Races at Narragansett Park Speedway at 1:30 in the afternoon.

Sunday, July 30—Excursion to Newport.

In connection with the endurance run, Mr. and Mrs. Swenson will leave Providence at ten o'clock Saturday night and ride by motorcycle and sidecar to Albany, N. Y., in order to receive entries for the run all day Sunday and to make necessary arrangements for the contestants. The run will get under way Monday morning, four o'clock. One hour after the last entries are checked out Chairman Swenson will wire the checker at Newport, N. H., concerning dinner arrangements, and he will also telegraph the Sunset House, North Conway, the night stop, regarding the room reservations. Both Mr. and Mrs. Swenson will be in Providence by Monday morning.



Official Convention Badge

Controls and Checking Stations

Controls and checking stations in the endurance run on the first day have been established at Pittsfield and Greenfield, Mass.; Keene, N. H.; Newport, N. H.; noon control, Crawford and North Conway, N. H., night stop; official hotel, Sunset House.

On Tuesday the contestants in the run will leave North Conway at six o'clock in the morning, checking stations and controls being provided for at Portland, Portsmouth, Newburyport, Boston and North Attleboro. The riders will finally check in at Exchange Place, Providence.

With but few exceptions, checkers for the various stations have been selectd: Albany, N. Y., motorcycle dealers and Chairman Swenson; Pittsfield, Indian and Harley-Davidson dealers; Greenfield, Smeed Bros.; Newport, Mr. Johnson; Franklin, Mr. Stevens; Portsmouth, Mr. Lowd; Portland, E. E. Haggett; Keene, C. C. Wilbur; Boston and Newport, members of the Bay State Motorcycle Club.

Members of the Attleboro Motorcycle Club will be on hand at Plainville, Mass., which is located fifteen miles from Providence, a checking place not previously included in the schedule. They will have wash basins, towels and "thirst quenchers" ready for the contestants. At that point a card will be issued to all riders, apprising them of the fact that they are nearing Providence and giving them the entrance route into the city. They will also be warned against breaking speed laws and of the muffler laws which are being strictly enforced in the towns of Attleboro and Pawtucket.

Mr. Swenson announced today that medals will be presented to winners just as soon as their scores are figured out, and that all awards will be made during

Digitized by Google

HERE'S THE LAST CALL FOR THAT F. A. M. ROUNDU

the convention. Flags for use along the course of the run have been designed and are now being made up.

The Convention Races

The switching of the racing card scheduled for Thursday to Wednesday afternoon was done because of the fact that the stores in Providence observe a half holiday on Wednesday afternoon and this, Swenson believes, will bring a large crowd to witnees the speed fest.

There are several national championships to be settled at the meet and the opinion is general that some fast riders will enter. The Wednesday programme will consist of the one-mile national amateur championship, the ten-mile national amateur championship, the Rhode Island five-mile pro-championship, the fifty-mile national amateur championship and the twenty-five-mile national pro. championship. In the amateur events three prizes valued at $75 will be awarded. The Rhode Island event will have silver trophies, while the pro. race will offer medals and cash prizes of $50, $25 and $10.

The racing card on Saturday will include the one-mile national pro. championship, the two-mile national amateur championship, the twenty-five-mile national amateur championship, a ten-mile pro. sidecar race and a fifty-mile, or an hour, open pro. race. For national pro. championship race will be medals valued at $75, and cash prizes of $25, $10 and $5 for the first three men. In fifty-mile race cash prizes of $250, $100, $50, $25 and $10 are hung up for the first five men. Medals valued at $75 will be awarded in the amateur events.

Luncheon for the Ladies

The ladies' committee has provided a luncheon for their sex at the Roger Williams Park, the big playground for the Providence grownups. The menu arranged by Mrs. Swenson will be as follows: Puree of tomato, bread sticks, olives, radishes, rolls and butter, roast stuffed chicken, giblet sauce of chicken a la Maryland, mashed potatoes, variety ice cream, fancy cakes and coffee. The ladies on the committee are Mrs. C. K. Joslyn, Mrs. C. S. Joslyn, Mrs. J. C. Edwards, Mrs. B. A. Swenson, Mrs. H. W. Lewis and Mrs. L. Burlingame.

Registration of Delegates

At nine o'clock on Wednesday morning at the official headquarters, the Crown Hotel, the registration of delegates and members will begin under the direction of Secretary Gibson. Each F. A. M. member in good standing will be given the official badge, a convention souvenir program and printed details of special convention arrangements.

Mayor J. H. Gainer, of Providence, will make the opening address to members and delegates at the business session on Thursday morning. His honor will also assist in starting the races on Wednesday afternoon.

A smoker for the men at the Edgewood Yacht Club will be held on Thursday evening, while the ladies will form theatre parties.

A special steamer has been chartered for Friday in connection with the excursion to Rocky Point, which is 12 miles from Providence. Another boat, with which no arrangements have been made by the committee, leaves for Rocky Point at 10 o'clock in the morning. Trolley cars for the Point leave every 30 minutes and there are especially good roads for motoring to the amusement resort. There are many attractions such as merry-go-rounds, loop-the-loops, etc., at the Point, and there will be athletic games for F. A. M. members for which valuable prizes will be hung up. It is expected that the various amusements at Stony Point will take up the whole of Friday.

F. A. M. business held over from Thursday will be resumed on Saturday morning and in the afternoon a card of races will be run off.

Trip to Newport on Sunday

Those who wish to visit Newport on Sunday are advised that a boat leaves at 10 o'clock in the morning and that the electric trolley line has cars running to that city from Providence every 30 minutes. A highly interesting day of sightseeing can be enjoyed at Newport.

Roger Williams Park affords many attractions to the visitors. They may fish in lakes for a charge of 25 cents an hour (the park department guarantees that there are real fish in the lake), ride the ponies, take a sail in the steam launches, or a pleasant row.

TOURS WILL CONVERGE ON PROVIDENCE

Will Start From as Far West as Buffalo; Four of Five Tours Will Be Merged Into One at Springfield

PROVIDENCE, R. I., July 18.—Five tours, reaching from as far away as Buffalo, N. Y., on the west, St. Johnsbury, Vt., on the north, and Newark, N. J., on the south, will converge on Providence on Tuesday next, and carry the body of the riders who will attend the F. A. M. convention to the city. The western tour will start from Buffalo on Sunday next at 6 a. m., and will reach Springfield, Mass., on Monday evening, where it will be merged with the tours which start from St. Johnsbury and Newark on Monday morning; the consolidated tours will bear down on Providence at 6 o'clock on Tuesday evening. There also is a tour which will start from Portland, Me., at noon on Monday and which is scheduled to reach Providence at the same time as the other four.

There are medal awards for those who finish with their divisions not later than 6 o'clock Tuesday evening as well as diamond medals for the best appearing riders in both solo and sidecar divisions and to the captain conducting the neatest division; a silver cup also is offered to the F. A. M. club finishing the greatest number of riders. The entry fee is $1, and entries close on July 20. Entries should be sent to Jes Campbell, 74 Huntington avenue, Boston, Mass. The schedules of the respective tours are as follows:

DON POPE SCALPS FIELD IN READVILLE MEET

READVILLE, Mass., July 15.—The twice postponed racemeet scheduled at the local track under the auspices of the Bay State Motorcycle Dealers' Association was run off with great eclat today. Four thousand spectators saw the classy races in which Donald Pope, Indian, cleaned up in three out of six events. Charles Gustafson, Indian, was the victor in the professional sidecar race at five miles. The summary:

Ten-Mile Professional—Won by P. A. Crocker, Mattapan; second, C. E. Crout, Mattapan; third, Gene Walker, Ala.; fourth, Earl Gove, Brockton. Time, 9:02.

Five-Mile Amateur—Won by Sidney Dean, Brookline; second, Fred J. Corey, Springfield. Time, 4:45.

One-Mile Time Trials—Won by Donald Pope, Boston; second, Gene Walker, Ala., and Earl Gove, Brockton; third, Teddy Carroll, Springfield. Time, 0:49⅘.

Five-Mile Sidecar, Professionals—Won by Chas. Gustafson, Springfield; second, H. S. Henrikson, Providence, R. I.; third, Coray De Long, Boston. Time 6:15.

Ten-Mile Special Match Race—Won by Donald Pope, Boston; second, H. F. Smith, Medford. Time, 9:54.

100-Mile Professional—Won by Donald Pope, Boston; second, Amie Theuanalt, Springfield; third, P. A. Crocker, Mattapan. Time, 88:29⅘.

MACDONALD GIVES DEALERS HELPING HAND

NEW YORK.—Educational work on broad lines is being done by E. C. MacDonald, a traveler for the Cygnet Rear Car Co., of Buffalo, who is now covering several of the eastern States. After visiting many dealers throughout New York State Mr. MacDonald dropped down to this city, and will make his next tour through Pennsylvania.

On arriving in a city with his Cygnet combination, which carries the new top and curtains, Mr. MacDonald visits all the motorcycle dealers and gives them his co-operation. He demonstrates the outfit from every imaginable angle, and will also go out and talk business with any prospect that a dealer may have in mind.

Since leaving Buffalo the last week in June, the Cygnet traveler has covered about 1,500 miles, and has experienced no trouble, although traversing all kinds of roads.

After covering his Pennsylvania territory "Mac" will head for Providence to attend the F. A. M. convention. He was formerly connected with the Harley-Davidson branch in Atlanta, Ga., and is a seasoned roadster and all-round enthusiast.

SWENSON GETS F. A. M. CALL—HESITATES

Providence Indian Man Feels That He Is Too Busy to Do the Presidency Justice—Agitators Are Insistent

PROVIDENCE, R. I., July 18.—If things go the way certain agitators in this neighborhood would have them, B. A. Swenson's hat will be right in the center of the F. A. M. Presidency ring when the delegates assemble to elect national officers and consummate other business at the F. A. M. convention here next week. The fact of the matter is that about every motorcycle enthusiast in Rhode Island, if not in New England, is anxious for Swenson to announce his candidacy, and while Swenson himself is fully conscious of the call and deeply appreciative of it, he feels that his private business keeps him altogether too busy for the job.

However unwilling to assume these added duties the Providence Indian dealer may be, the fact remains that the thing is in the air, so to speak, and will not down notwithstanding Swenson's efforts to deny his candidacy, and those in the know are confidently expecting that their choice for the post either will reconsider the matter and accept the call, or that his admirers will place his name in nomination at the convention without awaiting his consent.

Writing on the subject of his reported candidacy to **Motor Cycle Illustrated,** Swenson has this to say:

"Will say that anything in that line is nothing but a dream on the part of those who have proposed it. Many have urged me to announce myself as candidate, but I am altogether too busy to assume anything in that particular line no matter how much I would like to serve the F. A. M. in that capacity. If the rumor that I am a candidate has reached you, kindly take note of this statement."

M. & A. T. A. COMMITTEE IN BUSY SESSIONS; BROAD PUBLICITY PLANS THRESHED OUT

MILWAUKEE, Wis., July 18.—The publicity committee of the Motorcycle and Allied Trades Association held a meeting at Chicago today and tentatively outlined a campaign which will be submitted for ratification at the coming meeting of the association at Atlantic City on Wednesday, August 2. Those present at the gathering besides Chairman Lacy Crolius of the Harley-Davidson Motor Co., were Louis G. Fairbanks of the Firestone Tire & Rubber Co., R. F. Rogers, Rogers Mfg. Co., and Frank Effinger of the A. O. Smith Co.

The tentative campaign outlined includes a recommendation for the stricter enforcement of muffler cutout regulations and a co-operative campaign between motorcycle dealers and local newspapers to that end, which it is expected will go a great way toward eliminating unfavorable publicity in the daily press. It is urged that this step be taken before agitating for favorable newspaper publicity since it will pave the way for better results later. Legislation prohibiting tank riding will also receive the hearty support of the publicity committee, and it is the idea of that body that the promotion of tours and runs with prizes for the neatest appearing riders cannot fail to redound to the benefit of both trade and sport. Plans were considered for putting motorcycle clubs on a stronger financial basis, and the committee went on record as against the use of twin-cylinder machines on dirt tracks, favoring the four-valve single for the purpose.

The Dealers' Service Committee also met in Chicago and Lacy Crolius was appointed to draft a set of tentative rules outlining the extent to which the dealer should render free service to his customers. The rules are to be submitted to a sub-committee comprising Frank J. Weschler, of the Indian, and Fred B. Mathis, of the Excelsior, for revision before being submitted for ratification at Atlantic City.

The Dealers' Betterment Committee held its second meeting at the Hotel Wisconsin here today. Those in attendance were Charles E. Speaks, Firestone Tire & Rubber Co.; E. J. Mueller, Harley-Davidson Motor Co.; Frank Effinger, A. O. Smith Co. The committee considered tentative plans for presenting to the dealers throughout the country a mass of helpful educational matter along selling lines.

CYGNET REACHES HAMILTON

HAMILTON, ONT.—Cygnet rear-cars have made their appearance in Hamilton. Two of the attachments are here.

CONTINENTAL SALESMEN IN ANNUAL CONFERENCE

Travelers of Continental Rubber Co. from All Parts of Country Gather at Plant for Business Sessions and Top Off the Program with a Crackerjack Picnic

ERIE, Pa., July 16.—Salesmen of the Continental Rubber Co., of this city, met in annual convention at the factory during the week ending July 15, and participated in a busy program which included both business and social features. Business sessions were held daily at the company's office, during which all the angles of tire salesmanship were discussed. Several banquets were also held during the week, at which all the salesmen were called upon for brief speeches.

The program closed with the annual picnic, held Saturday afternoon, when the big party traveled by automobiles to the beach at Northeast, Pa., about 20 miles from Erie. There were sports to suit all hands, including trap shooting, horse-shoe pitching, baseball, bathing and a number of others. Trap shooting aroused most interest, and there was keen competition until C. H. Fleek, foreman of the company's automobile tube department, took the lead and won the cup.

Walter Tullis had an unbroken score in the shoot, having taken fifty shots without a single hit. He was not alone, however, as C. O. Coleman, the company's treasurer, also scored five misses out of five tries.

Then Came the Dinner

When the sports were over a fine dinner was served, right on the picnic grounds. The menu ranged all the way from baked beans to ice cream. Dancing followed the refreshments, and in the late afternoon the trip back to Erie was made—everybody expressing the opinion that this year's showing fully justifies the holding of another picnic next summer.

Advertising Manager R. W. Hall was very active throughout the week, and at the picnic, seeing that everyone was well taken care of. Mr. Hall was overseer of the entire program, and was complimented upon the smoothness with which the features were handled. He also had printed a number of handsome programs covering the events of the week.

C. A. Griffith, who has just joined the Continental sales force, traveling out of the Chicago branch, was very deeply impressed by the spirit of the entire Continental force. "These men know how to play as well as work," remarked Griffith, "and I must say they do both very well."

Roland Sisson, who has been with the Continental folks for nine years, and who has helped to represent the company at a number of shows and conventions, has been promoted to manager of the adjustment department.

A. E. Caldwell, assistant sales manager, who is the newest Continental newlywed, refused to be separated from his bride even when the sports were at their height, although the other picnickers made many efforts to kidnap him.

Fred W. Fee, Chicago branch manager, had an informal Turkish bath just prior to starting for the picnic. In some unaccountable manner he mislaid his tickets back to Chicago and for an hour while he was looking for the precious pasteboards the perspiration simply bubbled from every pore—and Fee has his share of pores.

Walter Tullis came all the way from San Francisco to attend the conference. He had a hand in everything that went on, wore his usual big smile and made arrangements to head back for the Pacific coast after a brief visit to New York.

Snowman Lost His Necktie

Big Ben Snowman, of the New York branch, lost his Continental necktie, and put up an awful kick about it. He was finally forced to put on his own neckgear, but didn't like the idea for a cent.

Throughout the week and during the picnic no one was busier than Bill Surre, of the company's official staff, and one of the best known trade men in the industry. But activity comes natural to W. J., and besides he is in training for another record-breaking week at Atlantic City during the Cycle Parts convention.

R. Merkle, an R-S Booster, Is in the Saddle

RESIGNS AS N. Y. SPORTING GOODS PRESIDENT

Powhatan Robinson Gives Up Office to Have More Time for Recreation, But Accepts Chairmanship of Board of Directors

NEW YORK, July 17.—Powhatan Robinson, founder of the New York Sporting Goods Co., and for nearly 20 years its president, tendered his resignation as president of the company at the meeting of the directors held July 14. Mr. Robinson explained that he wished to be relieved of handling the details of the business in order that he may be able to spend more time in hunting and fishing and in other forms of recreation.

Mr. Robinson's resignation was accepted with the understanding that he would become chairman of the board of directors so that the company may continue to profit by his advice and long experience in the sporting goods field.

The new officers of the company are: Powhatan Robinson, chairman of the board; Frederic A. Baker, president; James A. Murray, vice-president and treasurer; Andrew C. Imbrie, second vice-president; Henry T. Fowler, third vice-president; A. W. Law, secretary.

INCREASE OF 38 PER CENT IN FIRESTONE BUSINESS

AKRON, Ohio.—An increase of 38 per cent. in volume of business is announced in current advertisements of the Firestone Tire and Rubber Company. The Firestone factory is now doing a total business of nearly twenty-five million dollars yearly, and an increase of even five or ten per cent. would, under the circumstances, represent a splendid showing.

The Firestone increase of 38 per cent. is doubly significant in view of the fact that the pace which permitted of this remarkable showing is still being maintained, and in the near future is likely to be still further stimulated.

THOR AGENCY IN DES MOINES

Carl Larson has taken the agency for the Thor motorcycle for Des Moines, Iowa, and Polk County, and has delivered two twin mounts to the Des Moines police department.

EXPERT RIDERS ONLY, FOR 71st MOTOR BATTERY

Captain Schroeder, of Motorcycle Division, Lets Out 35 Men Who Do Not Measure Up to Mark; Sergt. Guterman Looking for 25 Good Riders to Join the Company

NEW YORK, July 18.—Feeling that the work to be accomplished by his company demands riders of experience, Captain E. C. Schroeder, in charge of the motorcycle machine gun division of the 71st Infantry, New York National Guard, has "let out" some 35 recruits who on rigid road examination failed to measure up to the mark of motorcycle efficiency which Captain Schroeder and Sergeant Louis Guterman are wont to believe the urgency of the present war situation demands. Instead, therefore, of entraining for the border along with the motorcycle division, the 35 rejected ones are Texas-bound along with the main body of the 71st Infantry. Ten of the men were replaced by riders of proven ability before the Reading-Standard mounted machine gun division left for the border on Thursday last, leaving Sergeant Guterman behind to recruit 25 new men to bring the division up to its full strength of 75 men and three officers.

In casting about for suitable material for the company, Guterman points out that it is much easier to make a soldier of a motorcycle rider than it is to reverse the process and with this in mind he is endeavoring, through dealers in the Metropolitan district, to get in touch with riders of proven riding ability, who have the physical requirements for army service. The qualifications are: height 5 feet 6 inches or over; weight, 135 pounds or better; perfect physical trim; expert motorcycle rider; ability to do minor motorcycle repairs on 1916 twin machines.

The arrangement of the machine gun division of the 71st is unique and quite distinct from other motorcycle divisions. Aside from the lineup of machine guns, each gun served by a corps of seven mounted men who do advance guard duty as well as courier and dispatch bearing service, there are eight sidevans which carry an excess supply of gasoline, oil and ammunition, enabling the division to stand on its own feet, so to speak. In other words, this machine gun company can strike out for a distance of 200 miles from its base of supplies, and by emptying the sidevans and sending them back for more supplies, it can make its stand and stand alone. Including the ammunition carried on the sidevans, the machine guns and on pannier boxes and a luggage carrier box on each of the solo machines, the company carries with it 750,000 rounds of ammunition.

Eight of the men of Company F have, with their machines, been detailed to do courier work at Division Headquarters under General O'Ryan, replacing several horse-mounted couriers who formerly served headquarters staff.

Sergt. Guterman expects to recruit the needed 25 men within the next few days, when he will leave for the border with the remainder of the company. While on border duty, Guterman will act as special military correspondent for **Motor Cycle Illustrated**, sending a news letter each week along with any pictures of interest which he is lucky enough to get by the military censor.

NEW BOOKLET TELLS OF HEAVY DUTY VAN

Harley-Davidson Motor Co. Will Provide Assortment of Three Van Bodies; Herrington to Specialize on Commercial Sales

WITH a view to following up closely the commercial motorcycle field, in which it has already made notable progress, the Harley-Davidson Motor Co. is sending out a new booklet in which special emphasis is placed upon the advantages of the company's new heavy duty commercial van. The company is convinced that there is a big field for a van of this type, and will give an assortmnt of three types of bodies to fit this particular chassis. In other words, Harley-Davidson dealers will be enabled to approach a merchant in any line of business with the assurance that they can exactly meet his particular requirements.

Arthur Herrington has been designated to handle the inside work concerning the Harley-Davidson operations in the commercial field.

Investigations by Harley-Davidson officials and traveling men indicate that a great many motorcycle dealers are "scared" of making the proper appeal to merchants and big corporations because they fear that they will not be able to meet the demands. This has been shown to be a wholly unjustified attitude, for live dealers on all sides are placing commercial motorcycle outfits about as fast as they can procure them.

"It is only the dealer who lacks knowledge of his outfit, and who has failed to make a study of the needs of his prospective buyer who experiences trouble in getting a hearing," says Assistant Sales Manager E. J. Mueller, of the Harley-Davidson staff, "and we hope through consistent educational work to convince all our dealers that they have the best possible kind of a proposition for the business man."

THE SUBJECT OF THIS IS "NEVERLEAK"

G. T. Austin, Assistant Sales Manager, W. G. Lewis, Assistant General Manager, and Martin Cabana, of the Buffalo Specialty Co., Talking Prosperity

TORONTO M. C. SUSPENDS BUSINESS

TORONTO, ONT.—President J. G. Jones, of the Toronto M. C., has decided to call no further meetings of the club until Wednesday, September 13, when a start will be made for a fall and winter campaign of amusement and recreation. Only a few riders have attended recent business sessions, but the Sunday pleasure trips and picnics have been well attended. The social tours will be continued regularly for the remainder of the "open season."

FAVORS MOTORCYCLE GUNS

DENVER, Colo.—Maj. P. J. Hamrock, in command of the First Separate Battalion of infantry, is again on record in favor of motorcycle machine guns. He is convinced that the motorcycle outfits would be invaluable in the event of field operations in Mexico.

HENDERSONS GOING STEADILY

NEWARK, N. J.—Bert Coryell, manager for the Estate of F. C. Cornish, says that the warm weather seems to suit the Henderson fans, two more of the four-cylinder mounts leaving the shop this week.

WELL-KNOWN COMEDIAN USES INDIAN-CYGNET OUTFIT

Gus Fay and Mrs. Fay on His "Cygnetized" Indian

NEW YORK, July 15.—Gus Fay, the well-known comedian in burlesque and a motorcycle enthusiast for six years in the bargain, has just purchased a new Indian with Cygnet rear car. With Mrs. Fay as driver, he left Buffalo on July 13 for a trip to New York, arriving here this morning. William Fay, the son and heir of the Fay family, occupied the rear car with his father.

In an interview with a **Motor Cycle Illustrated** correspondent, Mr. Fay stated that he preferred the motorcycle to several automobiles which he had owned, because the motorcycle could be easily put in their baggage car and used for recreation purposes in the different cities when on the circuit. He chose the Cygnet, he said, because he found it rode easier than a high-priced automobile.

The Fays will use the outfit while in this city, and will make towns outside of the metropolis with it. Mrs. Fay acts as driver on all occasions.

USES MOTORCYCLES ON TOUR OF U. S. ARMORIES

BOSTON, Mass.—A new application of the motorcycle to army service has been discovered by Lieut. Julius S. Hatcher, of the Ordnance Department, with headquarters at Boston. Lieut. Hatcher started recently on an Indian motorcycle to visit U. S. armories at Watertown and Springfield, Mass., Watervliet, N. Y., the Sandy Hook Proving Grounds, Pictatinny Arsenal, N. J., Frankford, Pa., the Naval Gun factory at Washington, the Naval Academy at Annapolis and the Army Remount Station at Front Royal, Va.

The chief value of the motorcycle in this case is that it makes the traveler independent of all train schedules.

RAY USES SIDECAR OUTFIT

Raymond Ray, Harley-Davidson traveler for Iowa and northern Missouri, is covering his route this year with a Harley-Davidson sidecar outfit. He finds that he can make better time and save money. In addition, he is enabled to give much more effective demonstrations along his route. Ray is accompanied by his wife on most of his travels, and they have just finished a vacation trip of several thousand miles.

PRIEST BECOMES HENDEE ADV. MANAGER

SPRINGFIELD, Mass.—John A. Priest, who for the past year has been assistant advertising manager of the Hendee Mfg. Co., has been appointed advertising manager to succeed R. L. Harriman, who resigned recently.

Mr. Priest brings to his new position a long newspaper and general publicity

Advertising Manager Priest

experience, and a keen insight into the Indian sales organization, the latter derived from a conscientious study during the past twelve months of the possibilities of the motorcycle industry and the requirements of Indian dealers all over the country. Mr. Priest gave up a promising newspaper career to join the Hendee staff, and his conviction that the motorcycle is a national business and recreation necessity has already made itself felt impressively in Indian advertising.

NEW U. S. RUBBER DIVIDENDS

The United States Rubber Co., New York City, has declared a quarterly dividend of 2 per cent on the first preferred stock and of 1½ per cent on the second preferred. Both dividends are payable July 31 to stockholders of record on July 1.

VANTINE SHOWS FORM AT NASHUA RACEMEET

A NEW riding star was discovered in a racemeet held at Nashua, N. H., July 8, when Donald Vantine, a local boy, cleaned up the 15-mile, 20-mile and 25-mile professional races against several riders from Boston and other places, including Mercer, Crocker and Crandall of Boston. There were nine entries in the 25-mile and the other classes were well filled. Vantine's time for the 25-mile was 31 minutes, 22 seconds. He rode an Indian. Charles Adams on a 1916 Powerplus won the amateur race.

GOODYEAR APPOINTS FOUR NEW MANAGERS

AKRON, O.—The Goodyear Tire & Rubber Company, of this city, announces the appointment of M. D. Montgomery as manager of the Denver branch of the company. Mr. Montgomery has been acting manager during the illness of the late S. E. Gillard.

F. C. Moyer, who has been in charge of the Des Moines Branch of the Goodyear firm, has been appointed to the managership of the Minneapolis branch, vice G. H. Barmore who is now manager at Milwaukee, Wis.

F. W. Telford is now manager of the Des Moines Goodyear branch. He was formerly supervisor of motor truck sales at Chicago.

Following the death of G. F. Dennis, T. J. Fitzgerald will fill the managership for Goodyear at El Paso, Texas.

CHICAGO SIDECAR CLUB HAS NEW OFFICE STAFF

CHICAGO, Ill.—The following officers were elected at a recent meeting of the Chicago Sidecar Club: C. Joy, captain; C. Givern, second vice-president; E. Anderson, first lieutenant; W. Dowland, chairman of touring committee; Miss H. Edison, chairwoman of entertainment committee; R. Whipple, treasurer; Miss E. Beers, photographer. Louis Getz, Walter G. Roberts and Pauline E. Wilson were continued in office as president, vice-president and secretary, respectively.

HAD A NO-TROUBLE TRIP WITH HEAVY LOAD

Providence Rider Completes Tour to Montreal and Return with Camping Equipment Which Makes Machine Weigh 600 Pounds

Raymond Wilson Snapped on His Arrival in New York

PROVIDENCE, R. I.—Raymond Wilson, who appears in the accompanying photograph with his outfit, has just completed a trip that is somewhat out of the ordinary. In addition to carrying a tandem passenger, he found room on his machine for a large tent, a stove, and a great variety of camping equipment, the total weight of the motorcycle being no less than 600 pounds. With this unusually hefty cargo Wilson left Providence and toured to Maine, then rode through Vermont and on to Montreal. From Montreal he proceeded to Niagara Falls, then romped down to the Delaware Water Gap, and finally headed back for Providence. In spite of the fact that roads of all kinds—good, bad and indifferent—were encountered on the tour, Wilson reports that he had no trouble with motorcycle or its equipment. He is especially interested in having it known that he did not have even a puncture in his Firestone tires throughout the journey.

The photo shows Wilson and the outfit upon arriving in New York City. "I did not keep close track of the mileage," said Wilson, in an interview with a **Motor Cycle Illustrated** representative, "but you can take it from me that this machine saw some pretty hard service. We did not have the slightest trouble from start to finish, and if it were necessary I would not hesitate to start on a duplicate of the trip tomorrow. Even tourists who have no motor trouble on the road usually come back with reports of some tire trouble, but my Firestones never gave me a moment's worry."

TO USE SIDEVANS IN FIGHTING FOREST FIRES

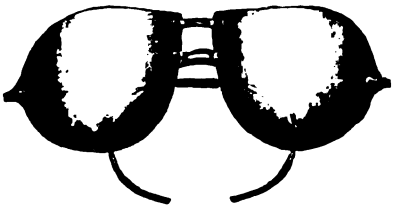
ALBUQUERQUE, N. M.—Forest officials here announce the purchase of several motorcycle van outfits for use in rushing tools and food supplies for fire-fighting crews.

The purchase of the machines is in the nature of an experiment.

One of the big problems in fighting forest fires has been to keep up the effectiveness of the fire fighters by supplying them promptly with all the equipment needed, and as the base of supplies is often far from the scene of the fire, wagon transportation is too slow and automobiles are too expensive.

LUXWELL GOGGLE A NEW HELP FOR RIDER

CHICAGO, Ill.—The Chicago Eyeshield Co., of 128-134 South Clinton street, this city, has brought out an attractive addition to its extensive line of eye protectors



in the No. 129 "Luxwell Goggle." This goggle, shown in the illustration, is to be had in a 12-karat gold mounting, with either amber, smoked or amber-green, lens. It retails for $3.50.

DODGE CITY RACE CERTAIN FOR JULY 4, 1917

DODGE CITY, Kansas.—Promoters of this year's 300-mile race on the Dodge City speedway have expressed their satisfaction over the financial outcome of the event, and it is practically certain that the speed classic will be repeated in 1917. It is understood that all of the men interested have gone on record of continuing the big race and that they have been assured of the continued support of the motorcycle manufacturers. It is also stated definitely that the Speedway can be leased for July 4, next year. Application has been made for another F. A. M. sanction.

WALLS GIVES 14 SAFETY FIRST TIPS FOR RIDERS

D. R. WALLS, Advertising Manager of the Splitdorf Electrical Co., and a consistent booster for the motorcycle, has prepared a table of fourteen "Don'ts" for riders of the power two-wheeler which is printed below. "If motorcyclists would observe these points," writes Mr. Walls, "they would do a great deal towards avoiding road trouble and at the same time they would help to place the motorcycle in its proper light before the general public."

Here are the suggestions,—every one of them worth the most serious consideration of motorcycle owners:

Don't drive carelessly on wet streets or roads.

Don't fail to sound the horn when rounding a curve.

Don't cut corners.

Don't get into the congested district if you are inexperienced.

Don't get into the mountains with loose brakes.

Don't "hog" the road.

Don't try to pass another vehicle on the wrong side.

Don't forget that many pedestrians walk in their sleep.

Don't drive fast past schoolhouses.

Don't speed on the more frequented county roads and boulevards.

Don't drive with one hand.

Don't speed at night because you think it is harder for you to be apprehended.

Don't see how close you can come to cars and trains.

Don't wait for the other fellow to stop; do it yourself.

BOSCH PRESENTS THE 1916 TROPHY

Veteran Magneto Firm Offers Handsome Silver Cup For Best Performance in National Amateur Championship Races

NEW YORK, July 13.—Following the custom inaugurated five seasons ago of offering a handsome trophy each year to the rider making the best performance in the National Amateur Championship races, the Bosch Magneto Company, of 225 West 46th street, this city, has again had made up a Bosch trophy and donated the same to the amateur winning the most points in the F. A. M. competitions for simon-pures. The 1916 Bosch trophy, designed by the Bosch advertising department and made by the Gorham Mfg. Co., is of solid silver more than two feet high and has a value of more than $300. It is entirely different from the five previously offered.

As in former seasons, the winner of the trophy will be determined on the Bosch Point System. In this system, the winner of the one-mile amateur championship will be credited with 4 points; the second man with 3 points and the third with 2 points. In the two-mile championship, the winner will receive 6 points; second man 4 points and third man 2 points. In the five-mile championship, the winner will be credited with 7 points, while the second man will receive 5 and the third 3 points.

Calculating Points

The ten-mile championship winner will receive 8 points; the second man 6 points and the third man 4 points. In the 25-mile championship race, the winner will be credited with 12 points toward the trophy, while the second man will get 7 points and the third 5 points. The winner of the 50-mile championship will receive 15 points, while the second man will get 10 points. The third man will receive 8 points.

The Bosch Magneto Company is of the opinion that the backbone of motorcycling is the amateurs who race purely for the sport. Hence the offering of the Bosch trophy. This is in line with Competition Chairman Donovan's idea, for in a recent interview he said: "I believe it is a conservative estimate that fully 70 per cent. of races among amateurs arise as the result of good motorcycle argument as to which is the best machine and who is the best rider. The only satisfactory method of settling such arguments is to go out and have a little contest wherein the durability of the machine and the endurance of the rider are demonstrated.

"These free contests promote the interest of both the machine and the rider and do much to keep up the fraternal feeling which exists among motorcyclists. I believe a good deal of credit is due the Bosch Company for their donation of a trophy each year, which when won is substantial proof of the ability of the amateur winning it. I am sure the amateurs themselves appreciate what the Bosch Company is doing to uphold a sport which at present is clean, wholesome, exhilarating and exciting."

Attention is called to the fact that the Bosch trophy is offered free and clear of any restrictions. Winning it is an out and out win.

The 1916 Bosch Trophy, Which Goes to the Best Amateur

FUNKE INCREASES ORDERS AT CLEVELAND FACTORY

CLEVELAND, Ohio.—One of the visitors at the factory of the Cleveland Motorcycle Company during the past week, was H. F. L. Funke, of New York, eastern distributor for the Cleveland line. Mr. Funke spent several days at the plant and left additional orders for immediate shipments of Cleveland machines. He expressed himself as well pleased with the progress he has made in handling the Cleveland lightweight, and called attention to the fact that August will bring the first anniversary of the Cleveland product.

SUPERIOR SADDLE BUSINESS IS GROWING RAPIDLY

CLEVELAND, O.—The Superior Metal Products Co. of this city informed a staff representative of Motor Cycle Illustrated a few days ago that the present season is one of the best that has been experienced to The company is now furnishing saddles the Cleveland Motorcycle Mfg. Co. as part equipment, and the concern has also closed a contract with the Great Western Mfg. Co. of La Porte, Ind.

H. A. Jackson, manager of the company, called attention to the fact that work has been started on the new addition to the factory, which will be finished about October 1. The extension will be the same size as the present plant, and will be used for the production of Superior saddles.

F-N TANDEMS ADVANCED IN PRICE TO $11

DETROIT, Mich.—Owing to the greatly increased cost of materials that enter into the manufacture of F-N tandems, the Fentress-Newton Mfg. Company, of Detroit, has found it necessary to advance the retail price of F-N tandems to $11.00. The company will supply new prices to the trade promptly upon application.

APPROVE PLAN TO SPEND $75,000,000 ON ROADS

THE five years' plan of federal good roads work embodied in the Bankhead-Shackleford legislation in Congress, has met with universal approval, and has been signed by President Wilson. Under this plan the sum of $75,000,000 will be spent by the federal government upon arterial roads selected by the highway authorities of the forty-eight States, subject to the approval of the Secretary of Agriculture. The States will spend an equal amount, dollar for dollar, in co-operation with the federal government, and provision is made for the proper upkeep of these roads.

TAYLOR SUCCUMBS AFTER OPERATION ON LEG

HAMILTON, O., July 17.—L. S. Taylor, one of the best known motorcycle racing men in the country, and long allied with the Indian camp, died at Mercy Hospital in this city Sunday, following the amputation of his leg.

Taylor had a leg broken in a spill in a Fourth of July race and gangrene set in. When it was seen that the leg could not be saved the surgeons amputated it without loss of time, but the infection had gone too far to be controlled.

Taylor had ridden many notable races, and was counted upon to be with the leaders wherever he competed. He was a skilful speed pilot and a good sportsman.

NATIONAL COIL PLANT SOLD

The Reo Motor Car Co., Lansing, *Mich.*, has bought the National Coil Co., and will use its plant in order to enlarge the manufacture of Reo cars.

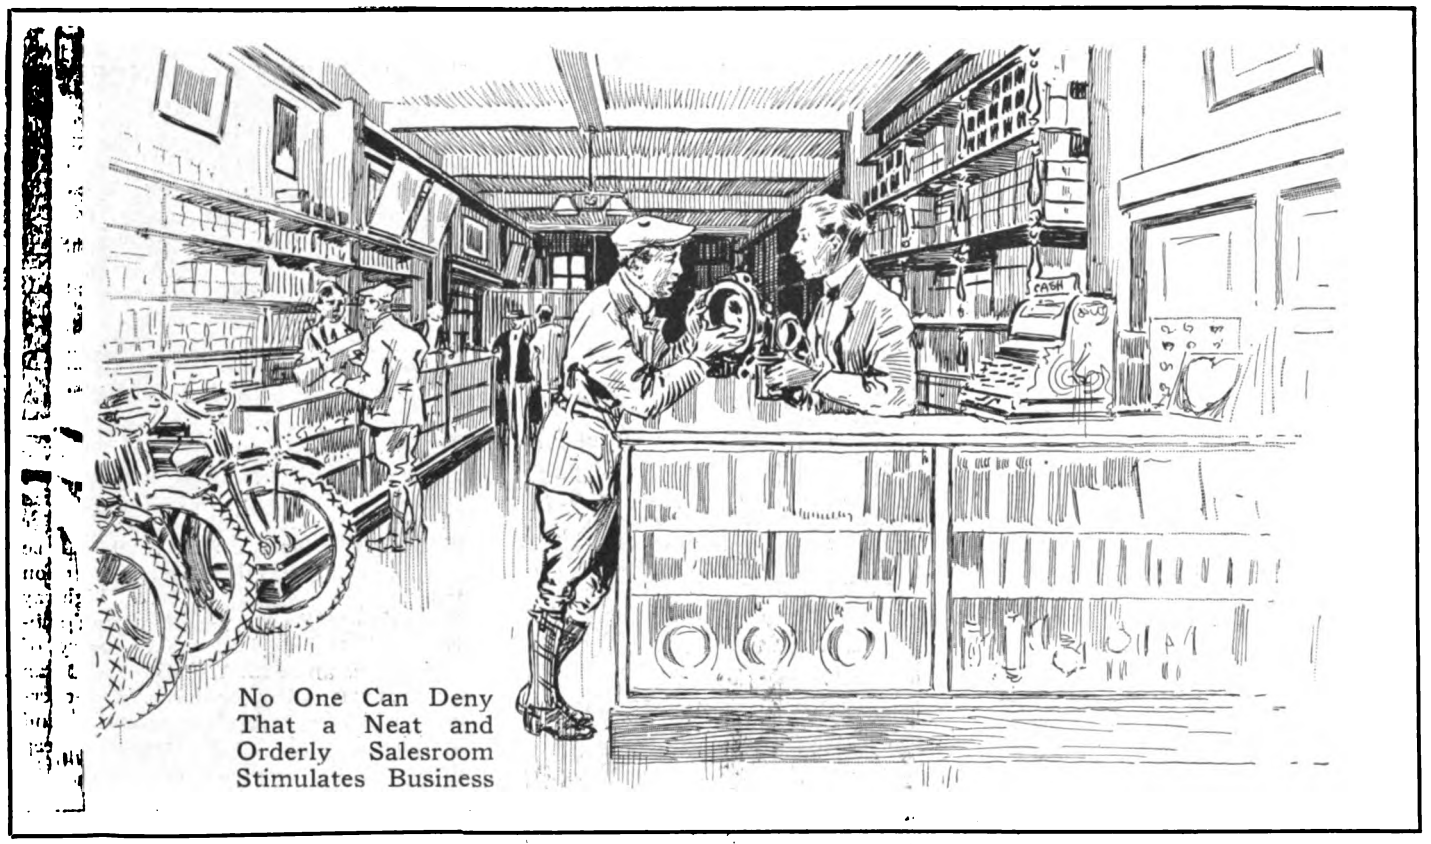
A PLACE FOR EVERYTHING; EVERYTHING IN PLACE

Twenty Suggestions for the Enterprising Motorcycle Dealer Who Desires a Clean and Orderly Establishment, but Who Can't Decide Just Where to Begin His Work of Improvement; No Heavy Expenditures Are Required

By RODMAN BARRY



No One Can Deny That a Neat and Orderly Salesroom Stimulates Business

SO much has been said and written concerning the benefits derived from cleanliness and systematic arrangements in a motorcycle agency that the subject has been theorized to a frazzle, and it will be the purpose of this article therefore to present as many of the hard facts as possible; to point out how dealers who operate neat and orderly establishments went about obtaining the desired results. That's a considerable job, and would easily furnish material for half a dozen articles, but a constructive start can at least be made with the data in hand.

Forget That Old Theory

It is only fair to state at once that ninety-five per cent. of our motorcycle dealers have a desire to keep their salesrooms tidy and attractive and their whole establishments business-like, but they are deluded by the old-fashioned idea that no one expects to find a motorcycle agency clean and that time spent in systematizing and cleaning could be better devoted to other work—especially during the selling season. That's all wrong, of course.

Sales boosting and general educational efforts are obviously important—nothing could be more so—but it profits a dealer little if he works a prospect by outside operations and then loses him through lack of facilities to create a good impression when the would-be buyer finally visits the agency. Strange as it may seem, a lot of business is lost in just that way.

The class of men who buy motorcycles is improving every day; professional men are rapidly coming over to the economical and simple two-wheeler, and on all sides the tendency is upward. Women are also interesting themselves, because of the widely demonstrated efficiency and comfort of the sidecar, and merchants throughout the length and breadth of the land are sitting up and taking notice. You can't appeal to such prospects through slipshod methods, a slovenly salesroom and lax business policies. If you do not prove yourself a worthwhile man of business they have no faith in you—or in the product you handle.

Neatness Worth All It Costs

Admitting, therefore, that a clean and orderly establishment is worth whatever it costs, how are we to go about improving conditions? Assuming that we have a very ordinary store to start with, and one which affords no special opportunities for striking displays—what can we do to create the good impression that we wish to have the prospective buyer receive when he walks in? And what can we do to heighten that impression while the prospect remains? We can do quite a few important things.

Let's start the ball rolling with twenty of them. There are others, but if we get twenty suggestions for improvement firmly fixed in our minds today, we'll be on the right track—and going some!

"Everything in Its Place"

1. Have a definite location for every article in the salesroom—and let it be understood by all concerned that this policy must be adhered to. This is a big job, but not an impossible one by any means. Every successful dealer in the country has mastered it.

2. Place your display machines well to the front of the salesroom, arrange to give them all the light possible and keep them clean. Dust suggests stagnation.

3. Have at least one neat showcase

Digitized by Google

for accessories. Arrange the articles in the case so that they can be inspected; don't pile them in. Keep the case clean and the accessories bright. Have the top of the case free from debris.

4. Keep your counter free from articles that don't belong there—oily rags and oil-soaked waste are excusable in the repair-shop, but nowhere else.

Use Care in Displaying Posters

5. See that the floor of the salesroom is cleaned, and mopped, if possible, every morning. Put a ban on loose papers, cardboard boxes, pieces of crates, etc. Above all things, avoid having broken parts or damaged machines in the salesroom.

6. Be careful about sticking up all kinds of posters and cards on the walls. Several posters concerning the motorcycle, or motorcycles, you handle can be displayed to good effect, but stop there. One or two good posters will attract attention—fifteen or twenty won't get a glance.

7. Keep the paint bright in the salesroom. The matter of painting is a most important one. Attend to it once a year at least. Have the lower walls wainscoted, if possible.

8. Use labels on the shelves for accessories, and see that every box or package goes back where it belongs. Below the shelves have drawers, also labeled, for parts.

9. Have the repair-shop completely shut off from view of the salesroom by a partition. Near this partition place your desk. Keep your desk clean. Papers piled a foot high were taken as an indication of business activity years ago—but no longer. Neatness these days is known to be the side partner of efficiency.

Value of a File

10. Have a filing cabinet and make the most of it. File the literature from the factory—all that you do not have on a neat table beside your desk; file the letters you receive and copies of your replies; file the engraver's plates that you have made; file your list of prospects, by the card system; file the good motorcycle photographs you obtain, all that you do not show in a tidy frame on the wall—file everything that you may at any time wish to refer to.

11. Fight shy of burned out bulbs and worn-out gas mantles on your lighting fixtures. Keep your lighting fixtures clean and up to maximum illuminating efficiency. Remember that 80 per cent. of buyers gauge a store's prosperity and standing by its brightness at night.

12. Wash your front window, or windows, at least once a week. Clean the floor of the window and dust the display every second or third day, and change the layout of the window display (even if you do not change the articles themselves) every week or ten days.

13. Decide upon a simple bookkeeping system, and stick to it. One of the surest ways to drive away a patron is to give him the impression that you are guessing at the amount of his bill. Have a neat billhead and render your bills promptly on the first of the month.

Typewriting Machine Will Help

14. Have a typewriter; some one about the store will be able to operate it. Typewriting machines are no longer expensive. They improve the tone of your letters, bills, etc., 50 per cent. and sometimes prevent costly and otherwise unpleasant errors. The writer has two such cases in mind.

15. Keep your file of the trade journals complete. You may wish to refer to them at any moment. Set aside a place for them on the table which holds your factory literature, pamphlets, etc.

16. Keep your mechanics out of the salesroom. Have a signal by which they can call you if it is necessary to confer with you while there are patrons in the salesroom—but it goes without saying that you should not be interrupted by repair-shop matters while there are people in the sales department. We shall have more to say on that point in another article.

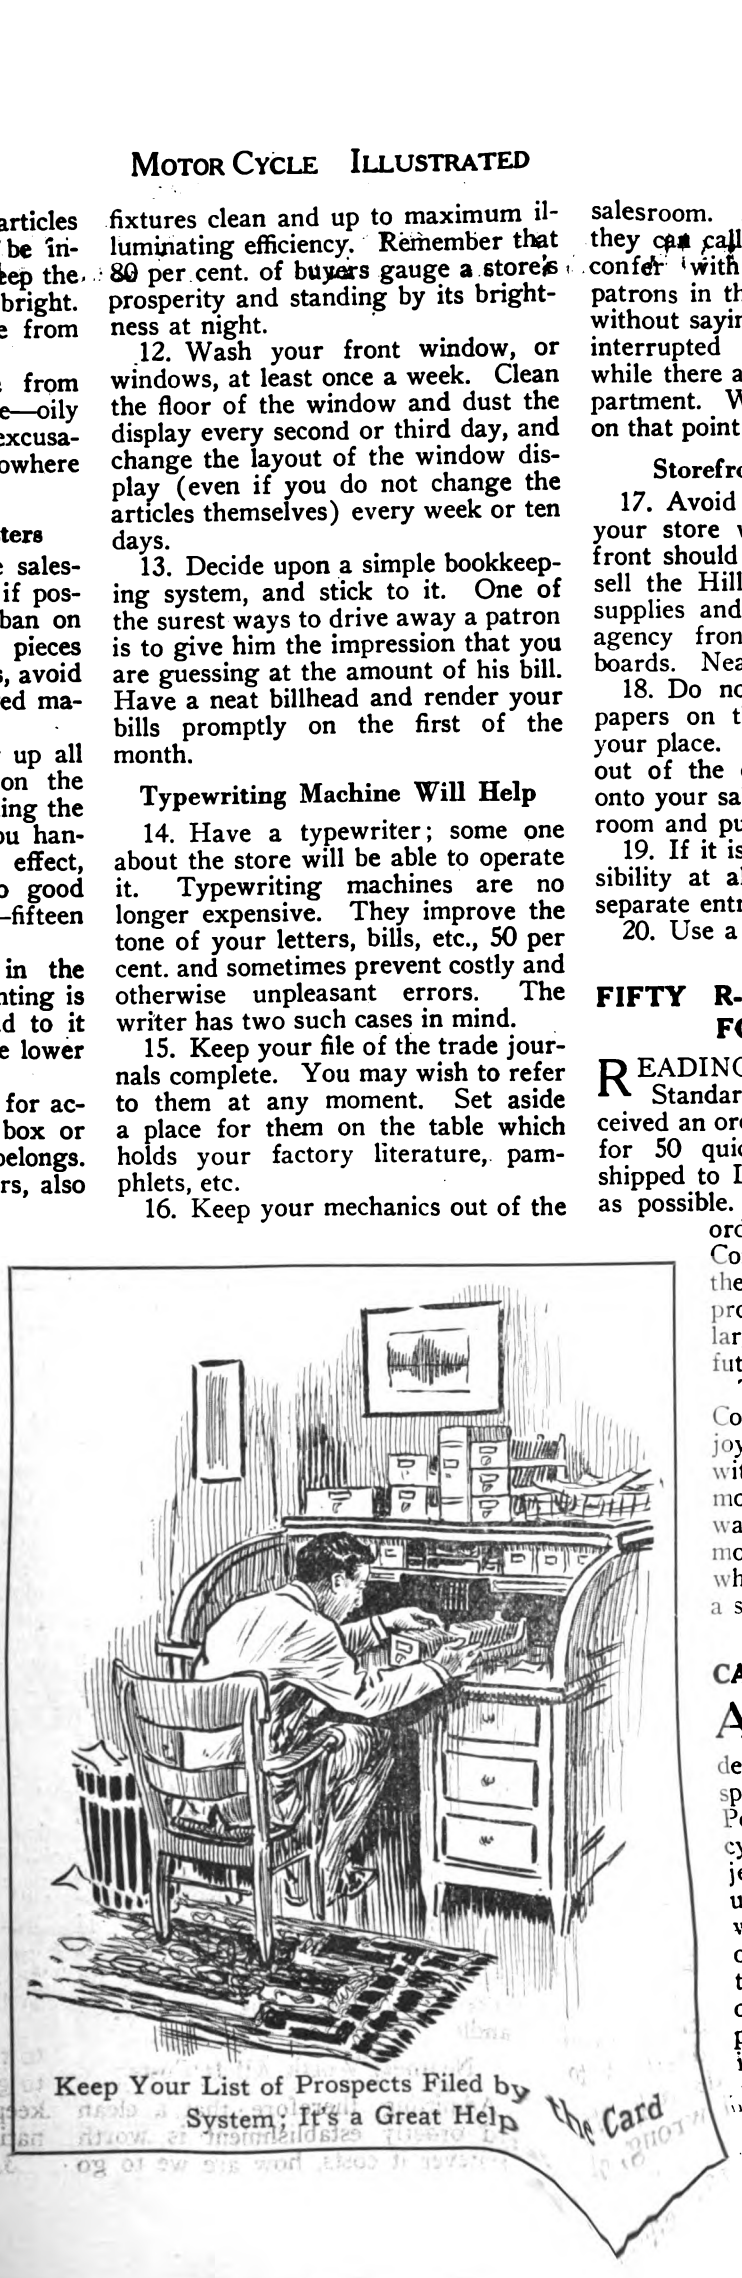
Storefront Should Be Tidy

17. Avoid covering the front of your store with signs. Your storefront should tell just this: That you sell the Hill-Climber motorcycle and supplies and accessories. Too many agency fronts resemble circus billboards. Neatness means simplicity.

18. Do not have boxes, crates or papers on the sidewalk in front of your place. Once the motorcycles are out of the crates, get the machines onto your sales floor or into the storeroom and put the crates out of sight.

19. If it is within the range of possibility at all do not fail to have a separate entrance to your repair-shop.

20. Use a cash register.



Keep Your List of Prospects Filed by System; It's a Great Help The Card

FIFTY R-S VANS ORDERED FOR LONDON

READING, Pa.—The Reading Standard Company has just received an order from its foreign agent for 50 quick delivery vans, to be shipped to London, England, as soon as possible. This is the third large order the Reading Standard Company has received for these vans from London, and prospects look bright for larger orders for the near future.

The Reading Standard Company has also been enjoying a very large trade with Italy for the past six months, and has just forwarded another carload of motorcycles to that country, which is to be followed by a second carload.

CATCHY POPE FOLDER

A NEW folder from the Westfield Mfg. Co. is devoted exclusively to the speed capabilities of the Pope Model L-16 motorcycle, and presents the subject strikingly through the use of a cutaway cover, which causes the first glance of the reader to be concentrated upon an illustration of the new Pope motor, emphasis being placed upon the improved one-inch carbureter, the larger intake passages and the increased size of rocker-arm yoke stems.

HOW VAN BUREN GIRLS STARTED FOR COAST

Some Sidelights on the First Leg of the Motorcycle Journey Which Will Carry New York Misses to San Francisco; Reach Chicago After Fighting Storms and Bad Roads

By ADELINE VAN BUREN

FROM childhood, my sister and I have always been interested in athletics. Running, jumping, swimming, diving, rowing, canoeing and skating we enjoyed with equal zest. Later we turned to horseback riding, and finally to the motorcycle. Motorcycle riding is the sport which has supplanted all the others with us.

Last season, we covered over 8,000 miles in daily trips around New York. It is only 3,800 miles to the Pacific Coast, so we decided to still make those daily trips, with one variation: instead of starting each day from New York city we would make the start from a different place, namely, the resting point of the night preceding.

With a good motorcycle, no special overhauling or preparation is necessary for these daily trips around the city. Then why worry about 35 successive daily trips which will bring one to the Coast?

The Misses Van Buren. Miss Adeline, Who Is Writing the Story of the Trip for Motor Cycle Illustrated, Is at the Right. Note the Amount of Luggage and the Firestone Carrying Bags

Start for Coast

As a direct result of this viewpoint, my sister and I started on our coast to coast trip on July 4. We are riding three-speed Indian motorcycles, each girl on her own machine. Each of us purchased two waterproof canvas bags for our luggage. These we strapped on each side of the luggage carriers. However, we soon changed this arrangement, transferring one bag to the handlebars over the front fork. This does not interfere with the steering in any way and gives much steadier riding.

At Sheephead Bay, N. Y., everyone was interested in two girls attempting a transcontinental trip all alone. This was on July 4. Reporters crowded up to interview us and take our pictures. The races lasted so long that we delayed our start until the next morning. Then, the rain was pouring down as we got under way, but that was a good omen—a bad beginning should make a splendid finish.

Springfield Is Reached

In spite of the constant rain we made Springfield, Mass., the first day. The roads are now in good shape, only three detours being necessary. The second day we rode through the Berkshires; up Jacob's Ladder and across to Albany, Schenectady and Amsterdam, N. Y. The third day's trip was the longest: we rode from Amsterdam to Syracuse and on to Buffalo, over 300 miles. The roads were in good shape, except east of Albany.

We stopped over a day in Buffalo and were given a splendid time by Alvah Stratton, Indian man there, who was formerly a racing man. Our fourth riding day smacked of an endurance run. Outside of Buffalo was a boulevard which was too good to last; then we ran into deep, deep sand and bad roads to Erie, Pa. From Erie to Ashtabula, O., the roads were hard but thickly covered with dust and sand which permeated every nook and crevice in our clothing. We arrived in Ashtabula July 9.

My sister and I feel that we have satisfactorily solved the clothing problem both from the standpoint of neatness and as regards durability and comfort. We wear all-leather outfits: coat, riding-breeches, hat, puttee leggings, shoes and gloves. Each outfit looks well, is waterproof and will stand very hard usage. It is lighter than any khaki outfit made.

Up to the present our only exciting experience was with a balky horse which took a sudden and desperate fancy to my sister and lovingly kicked her and her Indian into a ditch. No damage was done except to her affection for horses in general.

To Train Girls

While motorcyling is our chief sport, preparedness claims much of our attention. We hope to prove by our transcontinental trip that women can help the men and even take their places in time of war. In a national society organized to train women we have registered our names as motorcycle despatch riders. When we return we will teach all the other girls who wish to take up the delightful sport of motorcycling, besides training them to give efficient service in case of national disaster.

We hope the boys will get added confidence in taking long trips when they realize what two girls, unaided, are doing.

At the end of four more days of riding we hope to reach Chicago, the Windy City.

(To be continued)

VAN BUREN GIRLS REACH CHICAGO; BAD ROADS

NEW YORK, July 17.—Wallace Stewart, one of the live wires of the New York Sporting Goods Co., received a postcard from the Misses Van Buren today, dated July 14, at Ligonier, Ind., on which the fair tourists stated that they would be in Chicago that day. They reported bad roads over most of their run to the Windy City, with a number of severe rainstorms. In spite of these drawbacks, they made a determined effort to keep up with their schedule and managed to make steady progress. Both girls have figured in spills, owing to the muddy roads, but have sustained no injuries.

GRAND RAPIDS CYCLISTS TO FRONT

GRAND RAPIDS, Mich.—At least three members of the Western Michigan Cycle Club have given their services to their country and enlisted for border services; and it is expected that others will follow suit. The trio of enlisted riders is headed by C. Taylor, who was the winner of the five-mile invitation at the club's last race-meet; the others are L. McMaster and E. Esmond.

SELLING MANY CYCLEMOTORS

CALGARY, Alberta.—The Reliance Auto-Cycle Company, 7th Avenue, have been made the Calgary representatives for the Cyclemotor and already several motored bicycles have been placed in commission on local streets.

PLEASURE CYCLING FORBIDDEN IN GERMANY

AMSTERDAM, Holland.—Word has been received from Germany that cycling for pleasure in that country is now prohibited in all sections. Bicycles of offenders will be confiscated, and this will be followed by the seizure of all tires from owners who do not obtain a license to ride, it is rumored.

The new ruling is said to be the cause of much dissatisfaction among the working classes.

Applications for licenses are to be dealt with by the local authorities according to the merits of each case. Brainworkers can ride their bicycles on Sunday, but manual workers will be forbidden to ride on that day.

MOTORCYCLE MACHINE GUNS GO TO BORDER

Indian Outfits Bought by Popular Subscription in Springfield Are Now on Way to Second Massachusetts Regiment

SPRINGFIELD, Mass.—Machine gun motorcycles for the Second Massachusetts Regiment left Springfield a few days ago. The car which carried them was attached to an express for New York, which was delayed 12 minutes for this purpose. The motorcycles were dropped at New Haven, and there attached to a troop train bearing Connecticut recruits which left that city at 5 in the evening. The outfit will be delivered directly to the Second Regiment at the border. The charge for transportation will be borne by the government.

Maj. Gen. Leonard Wood accepted the machine gun unit on behalf of the War Department. C. F. Duggan, traffic manager of the Hendee Manufacturing Company, made a trip to Boston to place the matter before Adjt. Gen. Cole, who communicated with Washington immediately. Mr. Duggan arranged for a government bill of lading and the motorcycles were shipped forthwith.

This is the equipment which was raised by subscriptions from private individuals in Springfield for the machine gun company. Several of the boys from the Hendee factories are members of the machine gun troop and familiar with the operation of Indians.

Further instruction in the use of the machines will be given by Foreman H. S. Barrows of the repair department, who has gone to the border. Mr. Barrows recently returned to Springfield from El Paso after serving with the army couriers and is assigned once more to field duty of a similar nature.

MOTORCYCLE BIDS CALLED FOR

JERSEY CITY, N. J.—Bids for furnishing six Indian motorcycles, all of the twin class, have been called for by the Board of Commissioners of Jersey City. The proposals will be opened by the board in Jersey City, July 18, at 2 p.m., in the Assembly Chamber, City Hall. Blank forms of bid and all necessary instructions may be obtained at the office of the Chief Engineer, City Hall.

A BIGGER JOB FOR AYERS

Vice-President E. H. Broadwell, of the Fisk Rubber Co., announces the appointment of Fred H. Ayers, New England district manager, and for 13 years connected with Fisk tire affairs, as supervisor of districts. This brings Ayers into charge of the entire outside organization of the company.

WALKER JOINS BERLING STAFF

H. E. Walker has joined the sales staff of the Ericsson Mfg. Co., Buffalo, N. Y., and will visit the automobile factories in the interests of the Berling magneto. He was formerly with the S.K.F. Ball Bearing Co.

ELECTRIC STORAGE EXPANSION

As the first step in a material enlargement of its plant, the Electric Storage Battery Co., Philadelphia, Pa., has purchased a large part of a city block near 19th street and Allegheny avenue, near the present factory. The property now is occupied by 44 houses.

WHEELER AND SEEDS ALLIED

F. H. Wheeler, president of the Wheeler & Schebler Carbureter Co., and Russell M. Seeds, head of the Russell M. Seeds Advertising Agency, have formed the Bales Distributing Co. at Indianapolis, and will develop a national sales campaign for the Bales Puncture Plugger.

NO SPEEDING IN OMAHA

OMAHA, Neb. — Motorcyclists are warned to be on the lookout for traffic cops in passing through this city, in view of the fact that police officials have clamped the lid tightly on speeding. The local police magistrate is fining all the riders brought before him for traffic violations.

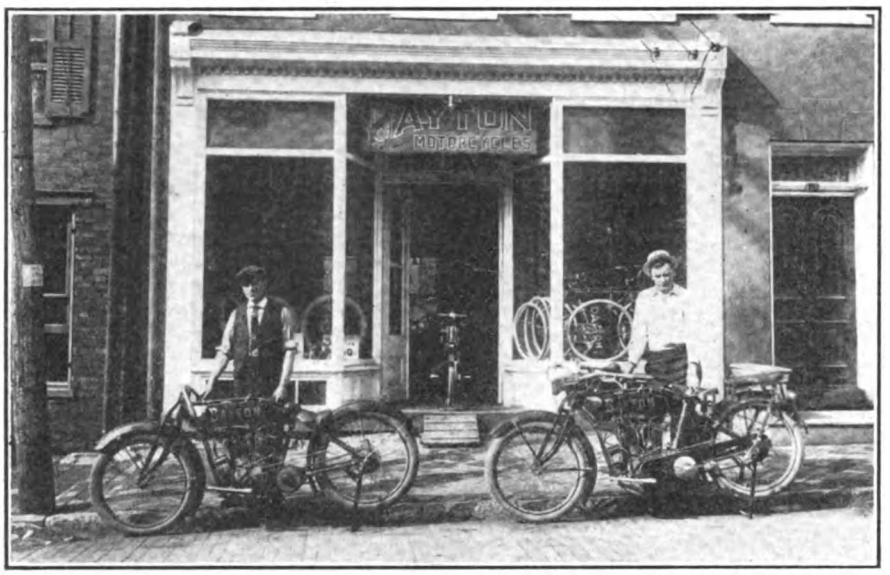
WIDE-AWAKE DAYTON AGENT IN HAGERSTOWN, MD.



G. L. Mease Is Proprietor of the Store Shown Above, and Has Built Up a Highly Satisfactory Trade in Dayton Motorcycles and Bicycles

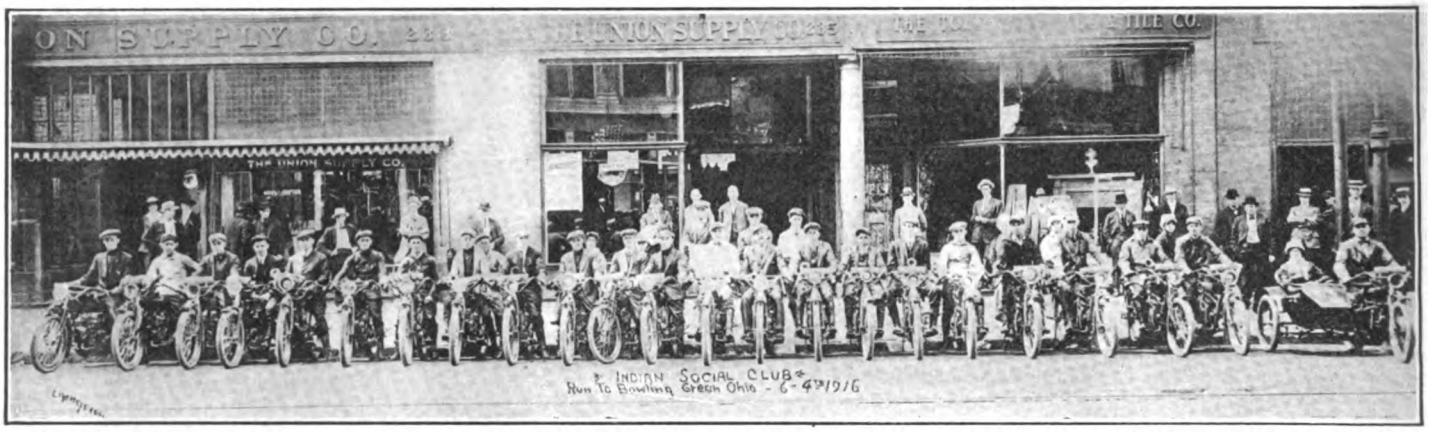
TRADE PARAGRAPHS FROM KANSAS CITY CIRCLES

KANSAS CITY, MO., July 14.—Albert Hanson, of the Hanson wigwam at Kansas City recently made a trip to Odessa, Mo., and several surrounding towns accompanied in the sidecar by his wife. Mr. Hanson says that it was a most wonderful visit and that he intends to extend his trips henceforth.

W. BELL, agent for the Pope at Kansas City says that the business has been very good during the past two weeks. Mr. Bell has several new mounts upon his sales floor but is bemoaning the fact that they are all sold. A new shipment is expected soon, but as Bell says, "I might have them all sold before they arrive."

ANNOUNCEMENT has been made that during the first racing meet on the new track now nearly completed in Kansas City there will be no motorcycle races. The dealers and riders in Kansas City are greatly disappointed.

THIS BUNCH ENJOYS LIFE ON THE WIGWAM PRODUCTS IN TOLEDO



Line-Up of Indian Social Club for Recent Run to Bowling Green. Runs of This Sort Are Frequently Indulged in by the Clubsters. The Headquarters Are at Union Supply Co., Wigwam Agency

SELLS 11 LIGHTWEIGHTS

SANTA ANA, Cal.—A. H. Small has been doing particularly well with Lightweights this year. Up to the first of July he had sold 11 Indian Featherweights and was looking for more to satisfy his prospects. He reports eight Hendersons sold this year.

HAVERFORD MOVES

CLEVELAND, O.—The Haverford Cycle Co. has moved from 239 Superior avenue, N. W., to 405 on the same street. The new quarters are much larger than those previously occupied. The Excelsior and Smith Motor Wheel are handled.

TWO FOR ELIZABETH

ELIZABETH, N. J., July 16.—Upon recommendation by Mayor Mravlag, the Board of Police Commissioners has reported favorably on the purchase of two motorcycles for the local force. The machines will be used to patrol Westfield avenue and North Broad street, both part of the Lincoln Highway.

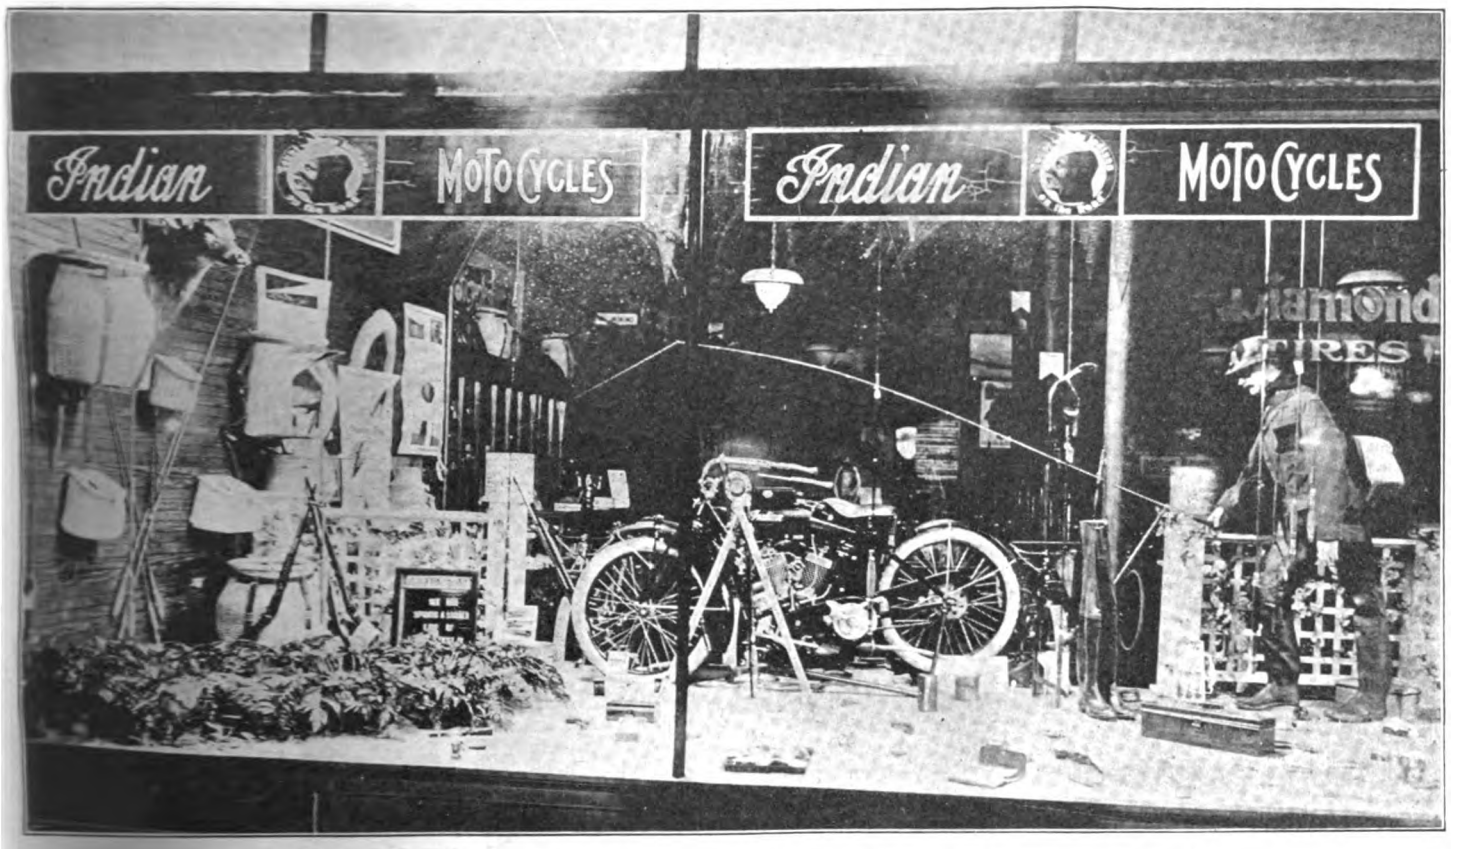
ATTRACTIVE SUMMER DISPLAY OF MOTORCYCLES AND SPORTING GOODS.



This Window, at the Headquarters of Phay B. Rutan in Elmira, N. Y., Won a Prize of $100

NEWS FROM THE HOME OF DAYTON CYCLES

DAYTON, O., July 18.—Bob Larsch, head of the Dayton testing forces, is now out at San Francisco and reports that unusual interest is being taken by Pacific Coast dealers in the Dayton Motor Bicycle. Larsch is on a demonstration trip and is meeting with much success.

W. A. Harland, a Dayton traveler, is now journeying in the East, where, he writes, dealers are disposing of a goodly number of the motor bicycles. Prospects in the East, Harland states, were never better.

The Dayton factory is all agog over the picnic which is planned for the employes on August 5. It will be held at Kil Kare Park, one of the summer resorts near the city. Col. F. T. Huffman has ingratiated himself with all the Dayton factory folk by the announcement that he will supply as much ice cream, cake and lemonade as they can consume. A bicycle race will feature the picnic.

KLUCZEK IS GOING SOME

NEWARK, N. J.—Watson Kluczek, Reading Standard, sold three machines in two days last week, one of the motorcycles and sidecars to be finished in blue. He has also placed a delivery van with the French Shop, the leading ladies' suit house in town.

BIG POWERPLUS DEMAND

STOCKHOLM, N. J., July 16.—George W. Lewis, Indian agent for Sussex County, has had a busy season, putting out about twenty-four big twin Powerplus models, several lightweights and a Cygnet rear car. He has had a steady demand for second-hand machines and has disposed of all of the Indian bicycles he could get.

BUNKIN IS ON THE HOP

The Haverford Cycle Co., Excelsior and Smith Motor Wheel distributors in Newark, N. J., is busy these days. Not content with having closed an order for twenty Excelsiors with the police department, M. I. Bunkin, manager, has been very much on the job, putting out four machines on Saturday alone.

SHOWMAN RIDES MOTORCYCLE

ALBANY, N. Y.—Arthur F. Hill, manager of Villecita's Indian Leopards, a traveling amusement enterprise, recently bought an Indian motorcycle and sidecar for the use of himself and wife on their travels with the show.

MINISTER'S SON IS AGENT IN BATON ROUGE

MILWAUKEE, Wis.—Francis Gehring, of Baton Rouge, La., whose father is a preacher of the Baptist faith, has proved that selling motorcycles can be made a profitable occupation for a minister's son. Mr. Gehring was in attendance at a convention in Chicago last week, and took occasion to run up to the Harley-Davidson factory in Milwaukee.

"Three of my recent sales were to ministers," said Mr. Gehring, in discussing his business, "who are using the motorcycles in visiting connecting parishes.

"I have also sold two machines and sidecars to individuals who will use them for livery work. Salesmen who visit Baton Rouge have asserted that since using motorcycle outfits for transportation, they would not think of going back to the automobile or horse and buggy."

Another interesting sale referred to by Mr. Gehring is one in which he exchanged an electrically equipped Harley-Davidson for a practically new Ford automobile, on an even exchange basis. The automobile was owned by a salesman who told Mr. Gehring that the cost of maintaining it was rather high, and that the motorcycle was far more economical and efficient.

ASK RHODE ISLAND RIDERS TO JOIN CLUB

PROVIDENCE, R. I., July 15.—To stimulate a greater interest among motorcyclists in Rhode Island, the Providence M.C., of this city, has sent out cards to all riders asking that they enroll. The cards state that the National Convention will be held in this city, July 24-29 and that the club is seeking the aid of Rhode Island riders to give a good representation for the State at the convention. This will be attained by riders joining the club.

That next year's convention will not go begging for a location is shown by a letter recently received by Chairman Swenson. This letter was from Mayor Hetrick of Asbury Park, N. J., and invites the F. A. M. to hold its 1917 business session in that city. The letter has been acknowledged and the matter will be presented to to the federation in due course.

EDUCATING CANADIAN PAPERS

TORONTO, ONT.—The John T. Wilson Co., 89 Jarvis street, Toronto, Canadian manufacturer of the Cyclemotor, has started a campaign for the education of Canadian newspapers. This company is endeavoring to impress upon the editors the advisability of publishing reports of social tours, picnics and other similar features in preference to "playing up" the stories of accidents and cases of reckless speeding.

FAST JACKSONVILLE-TAMPA TRIP

JACKSONVILLE, Fla.—Record time by a motorcycle from Jacksonville to Tampa, a distance of 315 miles, was made a few days ago by Elmer Wallace, of the Bicycle Garage. He completed the run in 12 hours and 15 minutes, with a stop of one hour at Florence Villa on account of rain. Wallace declared on his return that he would have made the trip in less time but for the wet roads he encountered. It will be noted that his actual time in the saddle was 11 hours and 15 minutes.

MORE BIDS FOR ROADS

COLUMBUS, O.—The Ohio Highway Commission will open bids on July 20 and 21 for the improvement of 108 miles of highways in 31 counties in the State. The estimated cost of construction is $1,249,714. With the opening of the bids. Commissioner Cowan will have awarded contracts aggregating 456 miles providing for an expenditure of close to $6,000,000 during 1916.

TAKE ON HARLEY-DAVIDSON

PETERSON BROTHERS have taken the Harley Davidson agency for Oskaloosa, Iowa, through Raymond Ray, the Harley Davidson traveler for the State. Their repair shop is located in the quarters formerly occupied by the Mahaska Cycle Co.

SIDECARS GOING WELL

H. P. MILLER and his brother, R. F. Miller, have formed a partnership and taken the agency for the Harley-Davidson in Polk and Warren counties, Iowa. They have opened a modern cycle shop in 101 East Locust street, Des Moines, and so far report sales of seven sidecar outfits.

OFF FOR A MONTH'S VACATION

BLOOMINGTON, Ill.—Lyle Lauth and H. M. Johnson have left this city on a motorcycle trip which will last a month. They intend to visit Denver, Colorado Springs, Manitou, Pikes Peak and other points of interest in Colorado. They are traveling by way of Rock Island, Davenport and westward through Iowa, using Indian motorcycles.

DEMONSTRATING ITS RELIABILITY

HAMILTON, Ont.—As a demonstration that a motorcycle and sidecar are more efficient and reliable on extremely rough roads than an automobile, Nelson Chambers, Indian representative in Hamilton, has suggested that rival riders of Indian and Matchless motorcycles take part in an endurance test over the worst roads to be found in Ontario.

NEW FIRM IN DES MOINES

DES MOINES, Ia.—A new company has taken over the agency for the Indian motorcycle from Otto Gugenschwanger at Des Moines. The members of the new firm are: Seymour Miller, formerly foreman of the repair shop of the Iowa Cycle Co., and F. P. Schultz, an old Capital City rider. The new firm has sales rights for six counties in central Iowa, and will open a salesroom at 417 Twelfth street, the location now occupied by the Diamond Rubber Co. The latter company will move to new location in a few weeks. F. B. McFadden, the Iowa road man for the Indian, put through the deal for the new agency.

MOTORCYCLE ESCORT FOR FRISCO RECRUITS

SAN FRANCISCO, July 10.—Citizen soldiers to the number of over 600 went out from San Francisco yesterday, having volunteered to take two weeks of training for war under regular military discipline at the Presidio of Monterey, Cal., together with many hundreds of other volunteers from other parts of the State. The contingent from San Francisco was taken to the destination in a procession of 150 passenger automobiles, contributed by local dealers and interested owners; and the amateur troops were escorted by a party of over a score of scouts and messengers mounted on motorcycles of various makes.

Interest in the affair among members of the San Francisco Motorcycle Club was so great that this was made a regular club run; and while many outside the club signed the list of those willing to do scout duty, those who actually showed up at the starting point at 8:15 Sunday morning were with one or two exceptions club members. Several other riders joined the procession at points along the route, quite a crowd coming in at San Jose; so it may well be said that the motorcycle riders contributed an important part toward the success of the mobilization, and fully demonstrated their possibilities of usefulness in more serious military work.

WINNERS AT AMARILLA, TEX.

AMARILLA, Texas.—C. Straub, R Murray and Len Rodgers were th winners of the motorcycle races held a Glenwood Park. Straub and Rodger rode Indian machines, and Murray use a Harley-Davidson. Straub won th five-mile amateur, Murray captured th five-mile professional and Rodgers too the five-mile free-for-all.

FIREMAN RIDES TO CINCINNATI

SAN ANTONIO, Tex.—Dan Gordon, member of the San Antonio fire depar ment, is making a motorcycle trip to Ci cinnati. His outfit is attracting much a tention along the route, and the tourist being entertained by various fire depar ments.

GARLO WINS AT WILLIMANSETT

WILLIMANSETT, Mass.—A. G. Gar riding a Pope stripped stock, took fi prize in the 15-mile feature on Eagle's fi day in this city. Garlo covered the d tance in 17:12.

MAINE TO FLORIDA TOUR

DOVER, N. H.—W. F. Boothby, Rogers street, announces that he has ma plans for a motorcycle trip between Po land, Me., and Jacksonville, Fla. He c templates using a sidecar combination a expects to have a friend accompany him

ANOTHER MOUNDSVILLE MEET

WHEELING, W. Va.—The Moun ville Motorcycle Club, which recen staged a successful race meet, is now ranging for another speed program. report on the last meet showed that was successful financially.

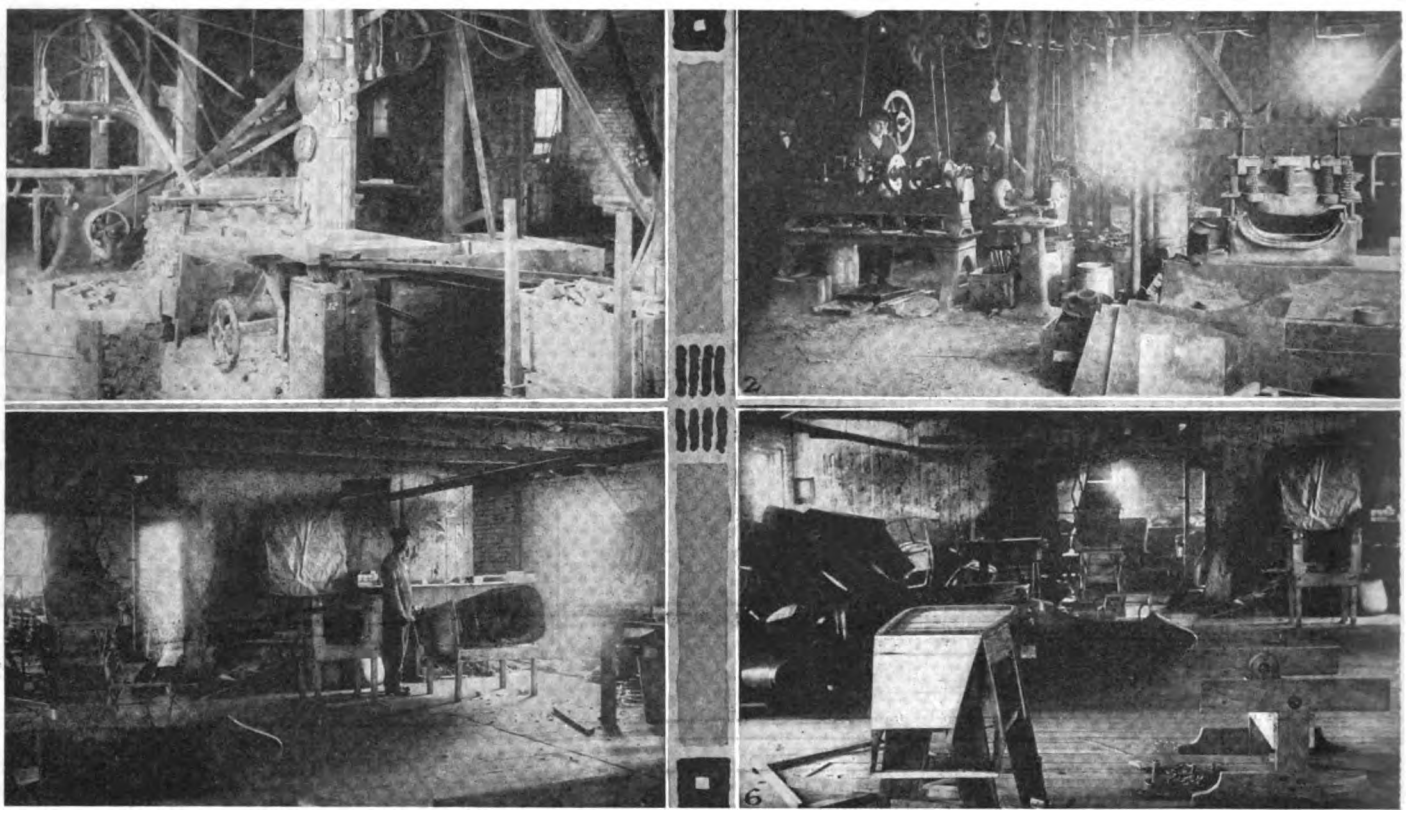
WHERE STABILITY AND COMF(

What a Visitor Sees at the Plant of the Svensgaard Sales Corporation, in Ionia, Mich.; From Rapid Production on a Quality Basis; Knock-Do



The Upper Picture at the Left Shows a View in the Svensgaard Wood Working Department, Where U-to-date Equipment Permits of Turning Out Work at Top Speed; Top View at Right Shows the Machine Room; Below at Left Is a Section of the Assembling Room, Where the Passenger Attachments Begin to Take Definite Form; At Right Is Another View of the Assembling Department, With Some of the Cars in the More Advanced Stages of Development

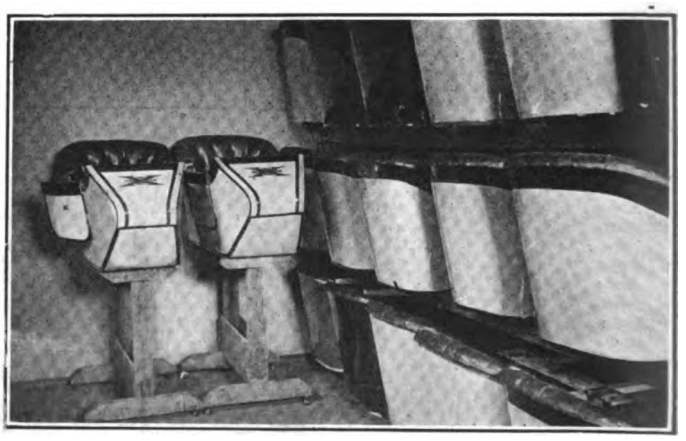
IONIA, Mich.—That the sidecar industry has kept abreast of the latest features in construction and design is clearly manifested by a trip through the home of the Pullman sidecar factory in this city. This factory, which is the property of the Harry Svensgaard Sales Corporation, of Detroit, Mich., is devoted to the production of a coach-built sidecar with tubular steel chassis. One of the most noticeable things about the tour of the factory is the time and care taken on all work, and the processes through which the material is passed in building each car.

The first stages in building a Pullman sidecar take the visitor through a complete machine shop with lathes, drill presses, cutting-off machines and other mechanical devices, each doing a special operation. All the forgings used are machined and finished in this department, as is also the sheet metal used in the body. Great knives cut this latter to pattern, instead of its being stamped.

Wood-Working Department

The next department is the wood-working department, with its whirring circular and band saws, and the drone of its other wood-working machinery. No small amount of such machinery is required in a coach-built car; in fact, this department resembles the interior of a small furniture factory. All wood used in building the frame, doors, seats, etc., is cut and finished here, and is trucked to the steam bending department.

In the latter department pieces of wood which require bending are placed in large steam tanks, and after being put under steam for two or three hours are removed. The pieces are then very pliable. The workman wraps a strong piece of ash and clamps it in iron forms like so much rubber tubing. Work is quick once the wood has been steamed.



A View in the Drying Room, With the Sidecar Bodies All Spick and Span. It Will Be Noted That the Bodies Are Made Up in Various Styles of Finish.

The next point of interest is the brazing bench. Here is found an ingenious device for brazing all joints in one operation. This prevents any possibility of uneven expansion. Gas or oxygen can be used on this bench with equal facility. Shelby steel tubing connected by nickel-steel drop-forgings makes up the entire chassis, and after being assembled, the chassis is brazed in one operation. The springs are afterward fitted and the chassis goes to the japan room.

The blacksmith shop is at once recognized by the forges, anvils and trip-hammers. Here the mudguard stays are made, and all general smithing done. Next comes the assembling room, where the steam-bent pieces are removed from the forms after

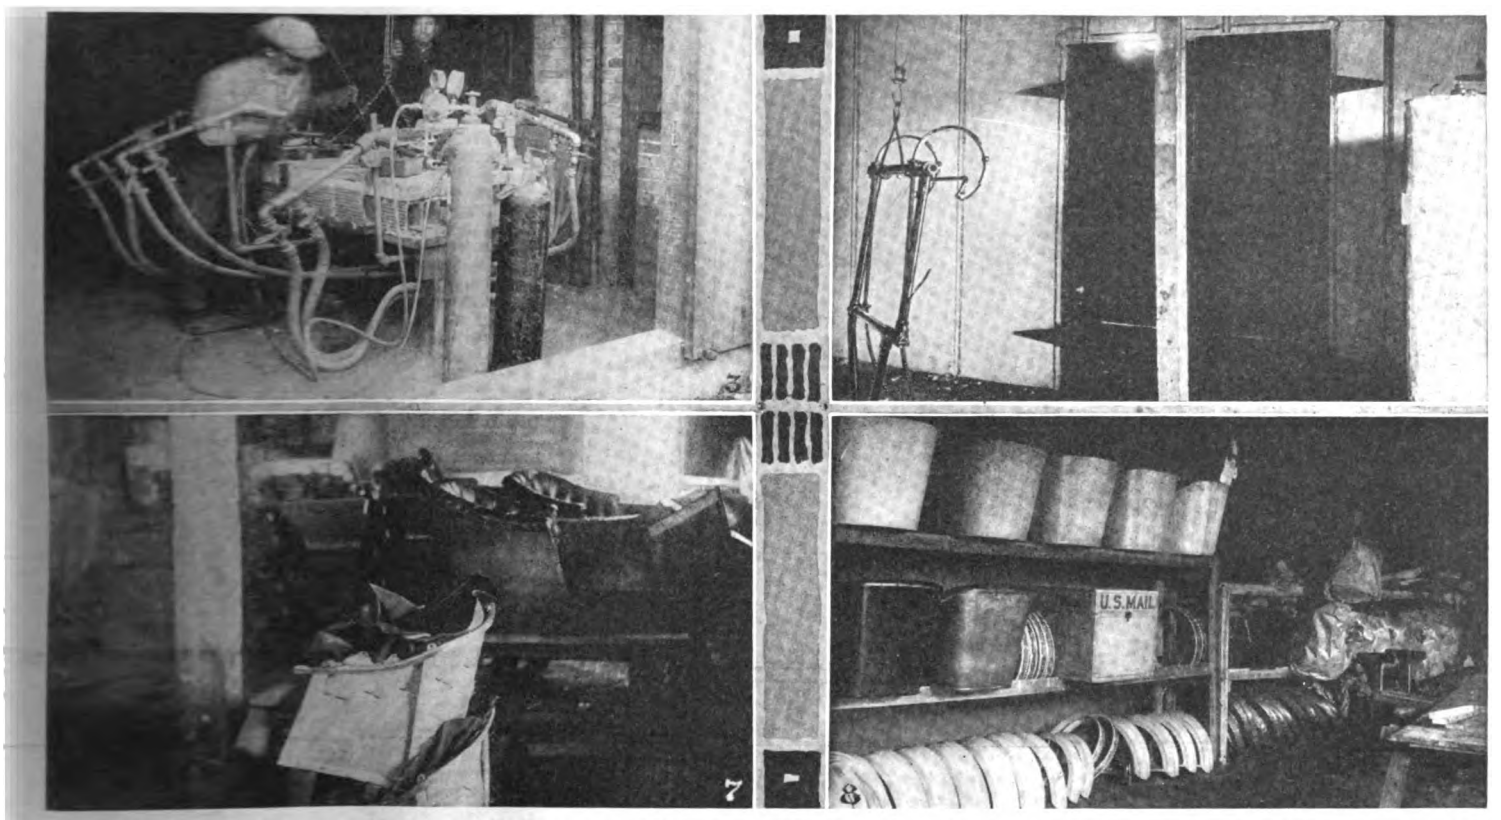
ARE BUILT INTO PULLMAN SIDECARS

Working Department to the Final Assembly, a Well-Organized Staff and Modern Equipment Assure for the Export Trade Now Demand Much Attention



Upper Photo at Left Shows the Brazing Apparatus, One of the Most Interesting Features of the Plant; At Right Is the Large Oven in Which the Svensgaard Chasses Are Baked After Finishing; Below at Left Is the Upholstering Room Where the Company Builds the Comfort Into Its Products, and at Right Is a Section of the Drying Room Where the Various Parts Are Sent After Leaving the Hands of the Experts Who Apply the Finishing Coats.

48 hours in the dry kiln; glued, screwed and after another treatment in forms under pressure are assembled. The frames are now covered with the steel body panels, and the whole takes the appearance of a sidecar. The bodies go next to the upholstering department.

Knock-Down Bodies

An interesting sight in this room is the making of a knock-down body for export. The Pullman is a very popular car abroad, and as a considerable number are shipped, quite a saving is effected each season.

In the upholstering department the hair flies, figuratively speaking. A material known as moss is used throughout, and in very generous proportions; the moss is held securely in place by numerous burlap straps. After more padding it is covered with a leatherette material, which is claimed to be superior to leather. The seats are also built in this department, a single piece of bent ash being used. After setting a series of coil springs the cushion proper is built, making a light and very comfortable seat.

In the enameling department all bodies are rubbed with a cleanser to take off spots and foreign particles. When thoroughly dry the first coat of paint is applied, this being a primer coat. Next follows the color coat, the most important of all. Many different colors are to be found in the shop, enough to match the enamel of any machine on the market.

After getting the color and drying it, the transfers are applied and two coats of the finest varnish are given each body. The body in each case is then taken to a dust-tight room having a temperature of 110 degrees, and kept there for two days. From thence the bodies are passed on to the stockroom, where they are carefully wrapped in paper and placed on shelves for future delivery.

This Photo Finishes the Series and Shows the Svensgaard Products on Their Way to Be Shipped; a Special Type of Truck Is Used to Facilitate Handling.

Japanning the Frame

The chasses are also japanned in the enameling department. A large oven with a capacity of 100 chasses at a charge is provided for this purpose. The temperature is maintained at 300 degrees throughout the japanning process.

From the enameling room the next step is to the shipping department. Here are crates being built and cars being crated. One might well say it is but a short step to the rider, and then many happy days for him.

The Pullman factory is running under full headway these days, and every indication within the works points to an indefinite continuance of the same. On the outside, this will be a banner year for the Pullman if signs are of any value.

DUTCH BUYER IS HERE

INDIANAPOLIS, Ind.—Barend J. Ten Dam, a motor dealer and business man of Holland, is here to buy automobiles and motorcycles. He states that the material he will purchase is not for war use. The Dutch visitor has not yet decided what make of motorcycle he will buy, and intends to visit several of the large factories before making a selection.

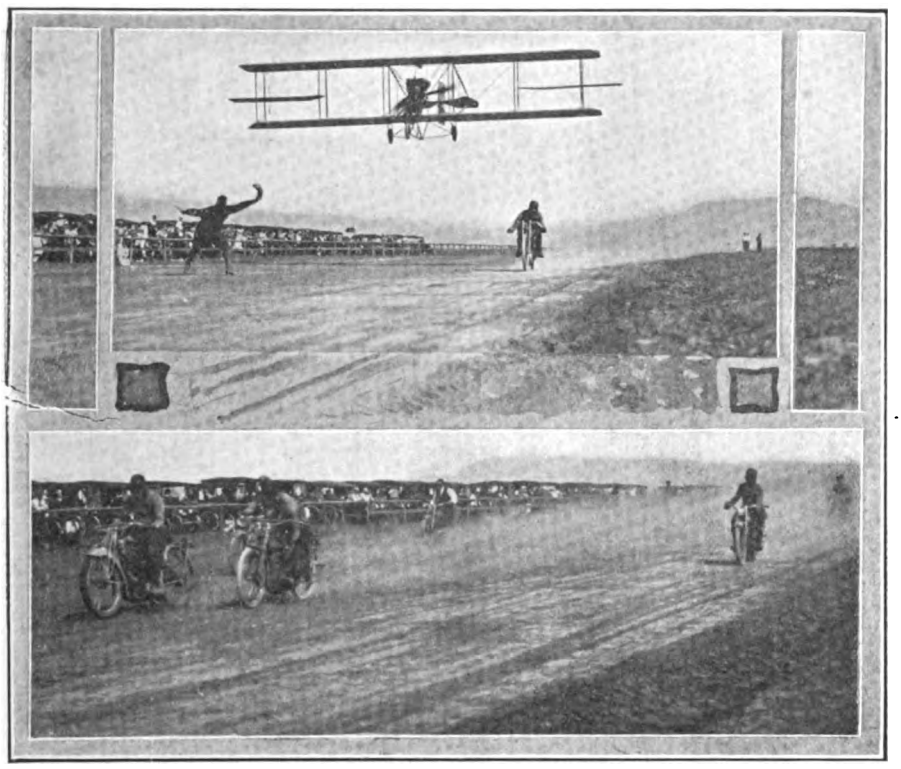
ALL READY FOR THE GUN AT LA GRANDE

Strong Lineup of Speedsters Is Assured for Big Racemeet and Large Crowd Is Expected; La Grande Motor Club in Charge



Two Slants at the La Grande Speedway, Showing the Excellent Condition of the Course Which Is to Be the Scene of the Saturday and Sunday Program. The Pictures Were Snapped During a Recent Racemeet

LA GRANDE, Ore., July 18.—Only good weather is needed to insure the success of the big race meet on the speedway here July 22-3, for all other details have been excellently handled by the committee in charge of the arrangements. A strong lineup of speedsters is assured, and with the track in perfect condition it is expected that some new speed marks will be set up. In recent races it was demonstrated that at least 80 miles an hour could be depended upon, and the management feels sure that this pace can be considerably improved upon when the perfectly-tuned machines are turned loose on the 22nd and 23rd.

Until a few days ago the La Grande Motor Club, which is promoting the big meet, had received very little outside cooperation, but the sportsmanlike spirit of the club has led the business men of the city to take an interest in the program and enthusiasm is now growing proportionately.

Films of the Races

Arrangements have been made to have a motion picture company film the speedfest, from beginning to end, and these films will be shown throughout the country to demonstrate just how well the La Grande boosters can handle a big affair.

Roscoe Neal is race manager for the club, Jay Van Buren, referee and Fred B. Curry, advertising man. Mr. Neal is assisted with the club's racing affairs by Chase Bohnenkamp, G. A. Frosdick and P. A. Foley.

TORONTO NEWS USES HALF DOZEN MOTORCYCLES

TORONTO, ONT.—The first motorcycle delivery service of comprehensive size in Canada is being inaugurated by *The Daily News*, Toronto, for its circulation department. When arrangements for the service are completed there will be six sidecar outfits in use for the fast delivery of papers to outlying sections of the city. During this war time many extra editions of newspapers in Canada are being issued and it is for the purpose of providing an express service of delivery for these issues that the motorcycles and sidevans are mainly required

The use of automobiles in this work has been found to be expensive. *The Daily News* has decided to use the motorcycles and various makes are being tried out for the present. A display advertisement in a recent edition for the machines attracted the attention of local dealers and others. Considerable interest is being taken in the venture.

"BEST AT ANY PRICE"

Editor:

Enclosed find subscription for Motor Cycle Illustrated, for another year. I am a subscriber to two other motorcycle magazines, but find this the best all-around magazine at any price.

CROSS-COUNTRY TRAVELER PRAISES THE BERLING

BUFFALO, N. Y.—The accompanying photo shows Acting Mayor Malone, of Buffalo, congratulating Harding and Edison, the transcontinental Henderson travelers, upon their successful performance, as they were passing through the Bison City. As has been fully told in previous issues, Harding and Edison rode from Los Angeles to New York by way of advertising the new Ince movie feature, "Civilization."

"We made the journey in 30 days," said Harding, in talking with the Acting Mayor, "and as chief executive of the City of Buffalo you will doubtless be interested in learning that our Berling magneto, a Buffalo product, gave us faultless service throughout. I have driven the Henderson machine about 7,000 miles in the last few months, and the Berling was always there with the spark."

80 Miles An Hour for 300 Miles!

Another World's Record Shattered

At Dodge City, on the 4th, an SKF-equipped Harley-Davidson broke all records for dirt track performances. This grinding tear of 300 miles at an average speed of 80 miles an hour was just the sort of test to bring out the sterling qualities of SKF Ball Bearings.

Again, at Sheepshead Bay on the 4th, a Harley-Davidson fitted with SKF-Self Aligning Ball Bearings captured first place in the big 100 mile Professional Championship Race.

In both cases, the motorcycle ran more smoothly, with infinitely less friction than if it had not been fitted with SKF.

Are *you* going to ask for
SKF Equipment on your next motorcycle?

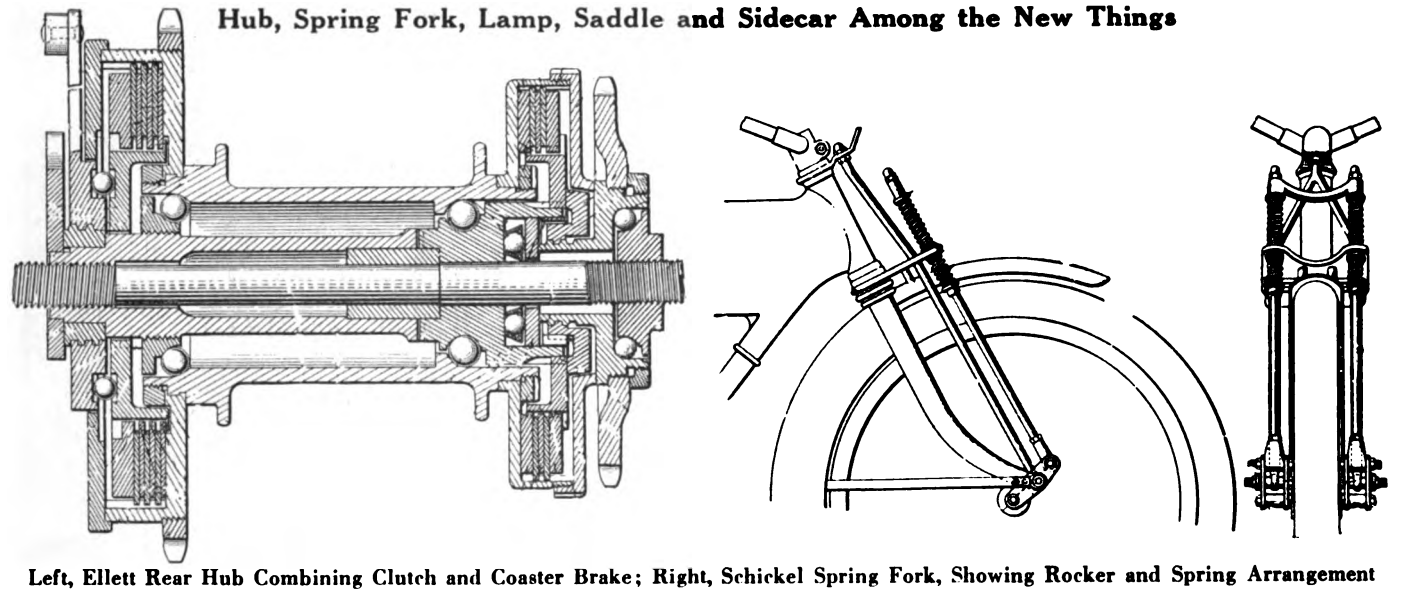
RECENT PATENTS OF INTEREST TO MOTORCYCLISTS

Hub, Spring Fork, Lamp, Saddle and Sidecar Among the New Things



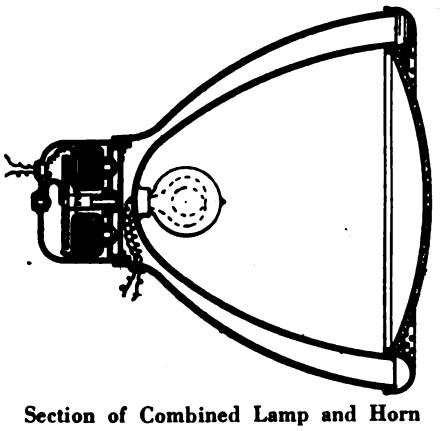
Left, Ellett Rear Hub Combining Clutch and Coaster Brake; Right, Schickel Spring Fork, Showing Rocker and Spring Arrangement

ELLETT REAR HUB

FREDERICK S. ELLETT, of Elmira, N. Y., has been granted a patent on a rear hub for motorcycles, combining a free wheel, a multiple disc clutch and a coaster brake of the disc type. The patent, No. 1,189,355, also embodies an emergency brake operable independent of the coaster brake. The specification shows the hub adaptable for both belt and chain driven machines. The braking devices are arranged on the exterior of the hub barrel where they are readily accessible without disturbing the bearings of the hub. The multiple disc clutch is arranged at the left side of the hub and is operated by suitable face-cam mechanism, while the coaster brake with its discs is located at the right side and is operated by worm and nut mechanism. The hub is shown at the left.

WALES LAMP AND HORN

Patent No. 1,185,740 has been issued to N. B. Wales, of Boston, Mass., for a combined lamp and electric horn. The shell of the lamp is made in two parabolic

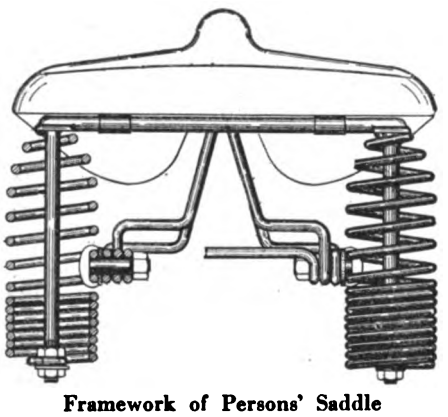


Section of Combined Lamp and Horn

forms, one within the other, the inner carrying the electric bulb at its rear. To the rear of the outer shell is fitted a cylindrical casing carrying the magnets, etc., for operating the vibrating diaphragm of the horn. The annual space between the inner and outer shells serves for a bell for the horn, and the front flange is perforated to allow the sound to pass out.

PERSONS SPRING SADDLE

Charles A. Persons, of Worcester, Mass., the inventor of the well-known Persons saddles, has been granted a patent on a



Framework of Persons' Saddle

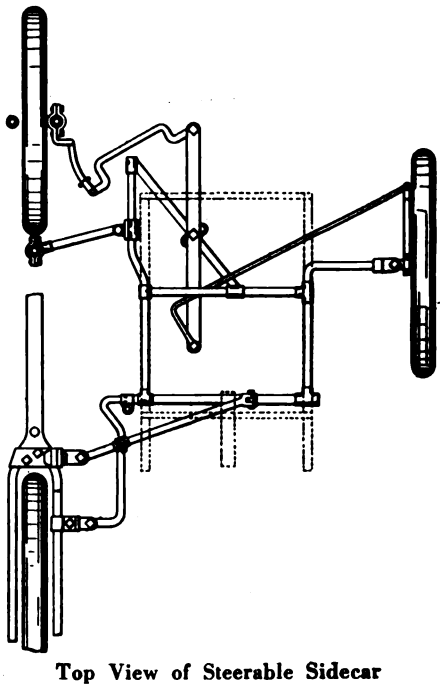
spring saddle for motorcycles, the number being 1,186,603. The seat frame is supported by an extensible spring carried substantially from the frame at its upper extremity, together with a rod depending from the seat and having its lower end secured to the corresponding extremity of the extensible spring. The compressible spring is designed to be attached at any point in its length to the frame. The patent is assigned to the Persons Mfg. Co.

SCHICKEL SPRING FORK

PATENT No. 1,189,874, relates to the spring fork of the Schickel motorcycles, and has been granted to Norbert H. Shickel, president of the Schickel Motor Co., of Stamford, Conn. The axle of the front wheel is pivotally connected with rockers to the central portion of which the bottom ends of the front fork are attached. The forward ends of the rockers are attached to rods which carry spiral springs at the upper ends. These springs are engaged by a plate attached to the steering head. The arrangement provides a springing for the fork and is so constructed that the breakage of a spring will not cause trouble, the rocker seating and forming a rigid member.

METZE SIDECAR CHASSIS

Patent No. 1,185,120 has been issued to Oscar Metze, of Columbus, O., for flexibly-attached sidecar which incorporates steering with the sidewheel. To the front wheel of the motorcycle is attached a pair of levers, the outer one of which attaches to a centrally-pivoted arm on the chassis. This arm carries a rod and drag-link on its inner end to connect with and move the steering-pivot mounted sidewheel. The



Top View of Steerable Sidecar

sidecar chassis connections are provided with springs at their inner ends to absorb road shocks, etc. The sidecar is attached further forward than the normal position.

PREST-O-LITE TANKS — UNITED STATES TIRES

Van Wert, Ohio, June 19, 1916.

The New Departure Mfg. Co.,
Bristol, Conn.

Gentlemen:

We have received sample mailing cards you are sending out for us and will say that it is one of the finest advertising propositions that we have ever seen.

We have sold four from this list and have also sold nine other wheels, a nice increase over last year. We are now specifying New Departure Brakes exclusively.

We have some more good prospects and if you will send us another blank we would appreciate your sending them this same literature. We expect to stock ladies wheels in the very near future.

Trusting that you willgive this matter your prompt attention and thanking you for past co-operation, we remain

Yours very truly,

DEPARTMENT OF MOTORCYCLE ILLUSTRATED
"ALL THE BICYCLE NEWS EVERY WEEK"

POPULARITY

Charlie O'Neil Enjoys It—And Also the Largest Exclusive Bicycle Business in the South and a Fine Establishment

JUST take a glance at Charlie O'Neil's smiling countenance. It tells the story of his success in the bicycle business. One look at Charlie's face and you immediately conclude that he's the type of man known as a "good mixer." O'Neil is all that, and more—he's a mighty shrewd business man.

Has Thousands of Friends

Down in Savannah, Georgia, where O'Neil's splendid three-story bicycle establishment is located, friends will tell you that few men in the city enjoy as widespread and solid a popularity as Charlie does. He numbers thousands of men, women and children among his friends and acquaintances, and they like him not alone for the fact that O'Neil is a genial, companionable and optimistic fellow, but also because his business dealings are "straight," he gives every one of his customers the squarest kind of a deal.

"I make it a point to sell good bicycles," he said recently, "to sell them not with the object of disposing of machines and then letting a sale rest there, but to give absolute satisfaction and the right kind of service. People know that a bicycle bought at O'Neil's is bound to be as sturdy and serviceable as it can be built at the price, and they also know—this fact is important—that if a machine does not come up to the mark, I am ready to receive and adjust all complaints.

A Millionaire's Theory

"Now some folks seem to think that they they are self-sufficient, that they are not dependent upon a community for their existence, and accordingly they regulate their conduct. For the heir to a millionaire's estate," smiled Charlie, "that theory might be all right, but for the business man it's all wrong.

"I make it a point to secure as many friends and acquaintances as I can. I naturally like people, and I suppose that feeling is reciprocated.

"You can't win the friendship of people, however, on any other basis but that of sincerity and the readiness to be of genuine service. And unfortunately the business men in any community who possess these qualities are so much in the minority, that the live man who does possess them very often stands head and shoulders above the other merchants in his town. Of course that fact is unfortunate for the business men in general—very frequently it drives trade out of a city—but the sincere and service-giving type of merchant profits by it."

To give some idea of the character of O'Neil's establishment, it should be noted that the store with its various departments covers three floors, each 22 feet by 60 feet, giving a total area of 4,000 square feet. He employs a bookkeeper, collector, and two delivery boys, O'Neil himself taking active charge of sales. The entire place from the cellar to the top floor is kept in spic and span condition; his windows are always clean and neat, his salesroom attractively arranged. Perhaps the best way of summing up the impression created by

Charles O'Neil

O'Neil's establishment is to quote the opinion generally shared by traveling men: "Charlie's store is a corker—it's one of the best and most modern to be found in any section of the country!"

Carries Big Stock

O'Neil carries a very complete stock for a city of one hundred thousand population. The total value of the bicycles carried the year round alone averages $2,500. He represents the Racycle, Columbia, Merkey, Yale and the O'Neil special. Almost every make of tire can be found in his store, a tire stock valued at $2,000 being generally carried. And then there is his investment in accessories and parts, amounting to several thousand dollars.

For nearly twenty years O'Neil has been in the bicycle business, starting at the tender age of ten as an office boy for a firm known as Berry & Oakman, which handled bicycles as a sideline. So rapid was Charlie's rise in business that after three years he entered into partnership with Oakman, who left Berry, and for sixteen years O'Neil and Oakman worked together. In 1911, however, the young partner decided to withdraw and he established the new concern of O'Neil & Burch. After three and a half years of splendid success in this combination, O'Neil branched out for himself and opened at his present location.

Several years ago Charlie took an active part in bicycle racing and today he has several trophies and medals to bear witness of his speed and skill awheel. O'Neil has always taken a very keen interest in public affairs and he is a member of some very influential and highly esteemed organizations.

Wants to Be Biggest Dealer

Still a young man, he is more enthusiastic than ever over the bicycle's prospect, and his one ambition is to become, if possible, the largest exclusive bicycle dealer in the country. Charlie O'Neil is a consistent reader of **Motor Cycle Illustrated** and in speaking of its value to him in business, he said: "With the ideas I get from **Motor Cycle Illustrated,** I am constantly building up my business and putting it on a more solid foundation. Without it I would feel lost. Its *Bicycling World Supplement* is certainly a great asset to the bicycle field, and I will continue always to be one of its heartiest boosters."

BROOKLYN WHEELMEN POINT RACE

BROOKLYN, N. Y., July 18.—The five-mile point race of the Brooklyn Wheelmen, staged last Sunday over the Shore Road, was won by E. Schwaner, with a handicap of 1 minute. The pace was fast from start to finish, the scratch men being forced to do some tall hustling in order to overhaul the handicap riders. Ray and Joe Caldwell finished second and third respectively. Schwaner's time was 14:25⅗. The best time was made by Ray Caldwell, 13:26.

BOYS TO RIDE TO NEW YORK

COLORADO SPRINGS, Colo.—Joe Bruce and Lester Atkinson, two Colorado Spring boys, have reached Galesburg, Ill., on their way to New York, after having traveled 1200 miles in 13 days. It is their intention to make the return trip also by bicycle in time for the fall term of school.

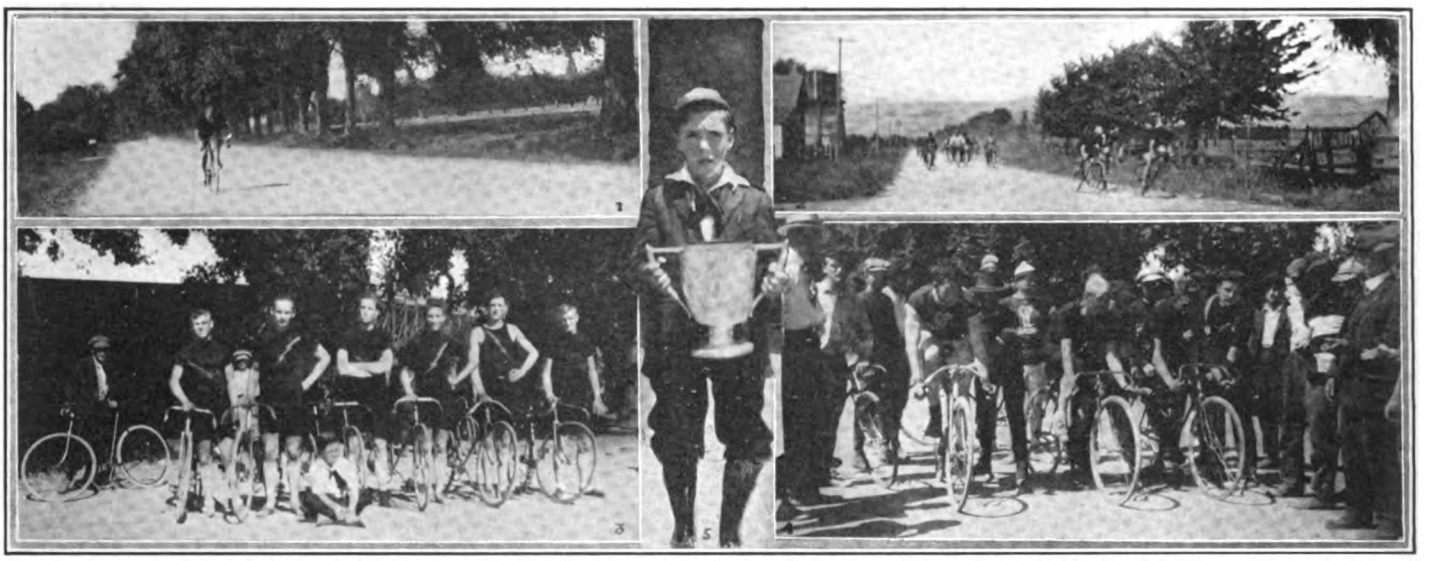
NEW CENTURY WHEELMEN CAPTURE BIG TROPHY

San Francisco Boys Set Pace in the Thirty-Mile Relay of the California Associated Cycling Clubs; Win Five Ont of Six Heats with Huge Leads; Hold U. S. Tire Co. Trophy for One Year



Snapshots Taken of Thirty-Mile Relay Race at San Jose. 1--W. Hammit, Leading in the Third Relay; 2—On the Last Turn During First Heat; 3—New Century Wheelmen, the Victors; 4—Start of First Relay; 5—The United States Tire Co. Cup.

SAN JOSE, Cal., June 15.—The honor of capturing the famous Pacific Coast classic of the year—the thirty-mile relay team race of the California Associated Cycling Clubs—went to the New Century Wheelmen last Sunday afternoon, and now the handsome silver trophy offered by the United States Tire Company adorns the headquarters of the N. C. W. for one year.

The husky team of the New Century Wheelmen showed fine form, and nailed all but one of the six relays or heats. It required one hour, eighteen minutes and twenty-two seconds to complete the thirty miles.

The race was started promptly at 2.30 p.m. by R. A. Greeninger, president of the C. A. C. C. over the famous Berryessa course.

A thrilling blanket finish marked the first relay, while in the second Les. Drury just managed to nose in first. The New Centuries demonstrated their superiority, however, in the third, when Walter Hammitt jumped the field on the back stretch and presented his clubmates with a comfortable lead of 300 yards, and this was steadily increased by Milton Castillo in the fourth relay.

Keep Adding to Lead

Then the fifth saw the N. C. W. one-quarter of a mile to the good, and in the sixth and final heat, though heroic efforts were made to cover the gap between the field and the N. C. W. man, De Brie, the race was handily won by the San Francisco "lightning streak." The summaries:

First heat won by Moon, Garden City Wheelmen; second, L. Nelson, New Century Wheelmen; third, A. Anderson, Samson Club. Time, 13:15.

Second heat won by L. Drury, New Century Wheelmen; P. Rondoni, Garden City Wheelmen, second; M. Smith, Samson Club, third. Time, 13:18⅘.

Third heat won by W. Hammitt, New Century Wheelmen; W. Plummer, Garden City Wheelmen, second; M. Alnerson, Samson Club, third. Time, 12:06 (fastest time).

Fourth heat won by M. Castillo, New Century Wheelmen; E. Shingler, Samson Club, second; C. Hershey, Garden City Wheelmen, third. Time 12:06.

Fifth relay won by Ralph Welch, New Century Wheelmen; H. Horner, Samson Club, second; C. Flint, Garden City Wheelmen, third. Time, 12:13.

Sixth relay won by H. De Brie, New Century Wheelmen; G. Simondi, Garden City Wheelmen, second: A. Horner, Samson Club, third.

TRAVIS NOW A BICYCLIST

NEW YORK.—Among prominent visitors at Garden City, L. I., during the Metropolitan golf championships was a bronzed and grizzled man, who held an umbrella and leaned interestedly over the handlebars of a bicycle, as he stood with the spectators. The cyclist proved to be Walter Travis, former national and British amateur golf champion. The veteran has given up professional golf and taken to bicycling for recreation and exercise.

C. R. C. A. Boys Enjoying a 40-Lap Race on a 20-Foot Track

CRESCENTS PILE UP RECORD MILEAGE

If Present Pace Continues, New Mark Is Expected for Baltimore Riders; Semi-Annual Election of Officers Held by Oriole City Club

By FRED M. SANBORN

ALTIMORE, Md., July 18.—The century mileage report of the Crescent Bicycle Club up to the end of June shows that Wm. T. Wright, who has been in the lead since the beginning of the year, still holds first place, with Walter V. Iglehart second.

Further down the list, however, several changes have taken place. Fred Sanborn has dropped from third to fourth position, Strickler having jumped into Sanborn's former niche. The most remarkable showing has been made by H. B. Iglehart, who though a member of the club for but a comparatively short time, has hopped from the bottom of the pile into fifth position, and, provided he continues the pace, will soon be nearer the top.

Iglehart has done most of his mileage riding down in Cuba, where he is at present employed, and reports that there are many miles of fine roads on the island.

The mileage thus far reported is greatly in excess of the records for the same period in previous years, and, the struggle for the lead continuing as keen as it has been, the end of the season will in all probability see a new mark hung up.

Summary of mileage report of first ten men:—First, Wm. T. Wright; second, W. V. Iglehart; third, Jno. G. Strickler; fourth, Fred. M. Sanborn; fifth, H. B. Iglehart; sixth, J. E. Nitz, Jr.; Seventh, Lester Nickles; eighth, Walter Doersch; ninth, S. Roland Bishop; tenth, L. M. Sanborn.

The semi-annual election of the Crescents hardly changed the list of former officials, the only change, in fact, being in the vice-presidency which is now held by Walter Doersch. Other officers for the next half year are: President, Wm. T. Wright; captain, L. M. Sanborn; secretary-treasurer, F. M. Sanborn; color-bearer, W. V. Iglehart.

KRAMER AGAIN THE AMERICAN CHAMPION

Clinches Title for Sixteenth Time by Defeating Bob Spears; One More Title Race Scheduled, But Frank Has Safe Lead; Grenda and Goullet in Third and Fourth Places

NEWARK, N. J., July 17.— Frank Kramer won the bicycle championship of America for the sixteenth time in succession by copping the two-mile national titular race at the Velodrome yesterday afternoon. There is still one more race to be decided, at five miles, but this will not have any bearing on the final outcome of the championship.

Between Kramer and Spears

The titular tussle narrowed down to Kramer and Bob Spears, the elongated Australian, who twice this season disposed of the champion in match races. Kramer rode a splendid race and clearly outrode his Australian rival, leading every inch of the entire two miles.

Kramer went into the last lap of the race leading, but Spears was putting up a tough fight to take the lead away from him. "Big Steve" beat him to the first turn and led him around the back stretch. Going into the Munn avenue turn another fight ensued; but Kramer went into the home stretch in the lead.

Spears kicked hard at his pedals coming down the stretch, but Kramer, too, with his face a bright crimson was exerting every effort to win and clinch the title. Frankie smiled broadly as he crossed the tape in the lead by half a length.

Grenda Licks Goullet

Alf Grenda beat Alf Goullet in the heat to decide third and fourth places. Grenda led all the way and although Goullet forced Grenda to ride the last eighth mile in 11-4/5 seconds, he was unable to get around him. Grenda flashed over the finish line a winner by a length.

Kramer rode against young Art Spencer in his first semi-final and the young Canadian boy made the champion extend himself to the limit to win. In the grand semi-final Goullet was pitted against the East Orange "bear cat." Goullet made a good race out of it, giving Kramer a battle on the last turn and forcing the issue right to the tape where Kramer won by a little less than a length.

Frank Has 23 Points

Kramer has a total of twenty-three points for the championship. Bob Spears, who is second, is credited with 12, Grenda has nine and McNamara 5. Goullet has but 3.

Goullet rode a strong race in the five-mile open for the "pros" and proved the class of a field of thirty-two. A hard, stiff pace was set the entire distance. Goullet went into the last lap in third place being preceded by Reggie McNamara and John Bedell. On the last turn Goullet drew even with McNamara and beat him down the stretch to the tape. Bedell, the "sleigh ride king," hung on to McNamara's rear wheel and got third place. (It is getting monotonous to see Bedell sleigh ride into a place in every race in which he enters.) Alf Grenda finished fourth and Frank Corry fifth.

Arthur Spencer retained his Brassard title by vanquishing Willie Hanley in the one-mile match race. Hanley led up until within ten yards of the tape when Spencer overtook him and beat the San Francisco boy out at the tape by a length.

The Australian pursuit race between Reggie McNamara and Oscar Egg was easy for the Australian rider. McNamara overtook Egg after riding two mile and a half lap. Before the race had gone a mile it was easy to see that "Mac" would have little trouble in winning.

George Cameron, better know as "General Villa," plugged hard and won the two-mile invitation race for the professionals. He led the "angry mob" around the entire last lap and was followed over the line by Willie Hanley, Jake Magin and Lloyd Thomas.

Amateur Record Almost Broken

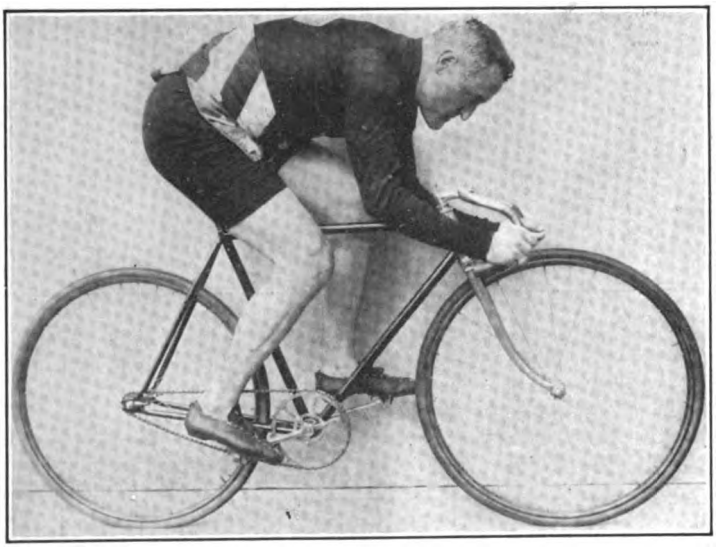
John Staehle came mighty near breaking a world's record in the one-mile handicap for the amateurs. He won the race from scratch in the excellent time of 1 minute and 56 seconds. The record is 1 minute 55-3/5 seconds made by J. B. Hume at Salt Lake City on July 28, 1906. Staehle won out by a length, with Gus Lang second, and Albert Baker, of Nutley, third.

Bruno Sarlund, of West Orange, won the one mile novice race with George Lupert second. The summaries:

One-Mile Novice (Amateur)—Won by Bruno Sarlund, West Orange; George Lupert, Newark, second. Time, 2:49⅗.

One-Mile Handicap (Amateur)—Won by John L. Staehle, Bay View Wheelmen (scratch); August Lang, Irvington (15 yards), second; Albert Baker, Nutley (100 yards), third; William Spencer, Toronto (20 yards), fourth. Time, 1:56.

The Brassard Race, at One Mile (Professional)—Arthur Spencer, Toronto, vs. William Hanley, San Francisco.—Won by Spencer. Time, 3:13⅘. Last eighth mile, 0:12⅗.



Frank Louis Kramer After Winning the American Championship for the Sixteenth Time

Two-Mile National Championship (Professional)—Won by Frank L. Kramer, East Orange; Robert E. Spears, Australia, second; Alfred Grenda, Australia, third; Alfred Goullet, Australia, fourth. Time, 5.02⅗. Last eighth mile, 0:13⅕.

Two-Mile Invitation, Handicap (Professional)—Won by George Cameron, New York (60 yards); William Hanley, San Francisco (20 yards), second; Jacob Magin, Newark (scratch), third; Lloyd Thomas, San Francisco (60 yards), fourth. Time, 4:03⅗.

Australian Pursuit Match Race (Professional)—Reginald McNamara, Australia, vs. Oscar Egg, Switzerland.—Won by McNamara. Time, 4:29⅗. Distance, two miles and a half lap.

Miss and Out (Amateur)—Won by Edward J. Carroll, Oakland, Cal.; Edward Byron, Australia, second; Chris Dotterweich, Newark, third; Harry Horan, Newark, fourth. Time, 5:51⅗.

Five-Mile Open (Professional)—Won by Alfred Goullet, Australia; Reginald McNamara, Australia, second; John Bedell, Lynbrook, L. I., third; Alfred Grenda, Australia, fourth; Frank Corry, Australia, fifth. Time, 9:50⅗.

WILL BOOST CLUB MOVEMENT IN KANSAS CITY

KANSAS CITY, Mo., July 18.—So great was the success of the bicycle race which was held on July 4, that the local dealers' association has decided to inaugurate a movement for the formation of bicycle clubs throughout the city. It is believed by the dealers that the existence of clubs in various sections of the town will simulate keen competition and wholesome rivalry among riders here and tend to increase the interest in cycling.

The chief exponent of the club movement is H. Vetten, president of the dealers' association. Plans for establishing clubs are to be thrashed out at the next meeting of the trade body. The next racemeet will be held on July 27 and will include a five-mile open and a one-mile race. At least one more racemeet is to be staged this season and a big road race.

HOFFMAN STARS IN FAIR MEET

WOODMERE, L. I., July 15.—Three bicycle races were held today in connection with the County Fair here. Hoffman, of the Glencoe Athletic Club, New York, unloosed a speed which could not be matched by the other cyclists. Summaries:

1 Mile Race—Won by George Hoffman, Glencoe A. C.; Louis Hoban, Glencoe A. C., second; Stanley Crocher, Big Mac A. C. Time, 2:29 1/5.

3 Mile Race—Won by George Hoffman; Louis Hoban, second; Stanley Crocher, third. Time, 7:50.

5 Mile Race—Won by George Hoffman; Crocher, second; Hoban, third. Time, 14:51 3/5.

HOME TRAINER OUTFIT PROVIDES BARRELS OF SPORT

This Home Trainer Outfit Has Been Rigged Up by Two Columbus Cyclists in an Empty Lot Near Their Home—The Speed at Which They Travel on the Rollers Is Indicated by the Diminutive "Riders" on the "Track" in the Foreground

WALTHOUR-LINART WIN IN REVERE FEATURE

BOSTON, Mass., July 13.—Bobby Walthour and Victor Linart defeated Leon Didier and Georges Colombatto in a 40-mile motor-paced team relay race at the Revere track last night. The final was 56 minutes 52 1-5 seconds. It was the second event of its kind held on Nat Butler's oval.

The five-mile open event was won by Fred Herbert of Fall River, Patsy Logan of South Boston was second and Tom Connolly of Everett third. The time was 11 minutes, 38 4-5 seconds.

John Barry of Cambridge won the two-mile amateur contest in 4 minutes, 38 3-5 seconds.

A three-quarter-mile professional handicap was taken by Saxon Williams of Buffalo. Patsy Logan of South Boston was second.

John Hackett was an easy winner of the half-mile amateur handicap in 56 3-5 seconds.

BIG DEMAND FOR BICYCLES

GRAND JUNCTION, Col.—Herman Vorbeck announces that the demand for bicycles in this city and vicinity has increased so rapidly of late that he is finding difficulty in meeting the requirements of his patrons. He states that the current season is by far the best he has ever experienced.

PRO BIKE RACES FOR ASBURY PARK

NEWARK, N. J., July 18.—The management of the Cycle Racing Association, the Newark Velodrome promoting body, announces that a series of racemeets will be held at Asbury Park beginning with August 5. The scene of the races will be a third-mile gravel track on what is known as the Athletic Field.

There will be five meets in all, the dates being Aug. 5-12-19-26 and Sept. 3. The entire proceeds of these races will be divided among the professional riders.

ACME HOLD SIXTH WEEKLY HANDICAP RACE

NEW YORK, N. Y., July 18.—The sixth of the handicap series staged by the Acme Wheelmen was held last Sunday over the Pelham Parkway. With an allowance of two minutes, Bendi, Reichart and Sheppard held the lead for three quarters of the distance when the scratch men came up with the entire field. Sheppard then broke away from his markers and held his lead to within 100 yards of the finish. At that point Woisin, a scratchman, passed "Shep" and pulled him into second place. Hartman was third and Yroh fourth, both starting from the thirty second mark.

$500 IN PRIZES FOR RACE

WHITINSVILLE, Mass., July 18.—A fifteen-mile amateur road race, with a prize list of merchandise valued at $500, will be held in this town on Saturday, July 22, under rules and sanction of the N. C. A. The entry fee is fifty cents; blanks can be procured from Andrew Buma, of this city.

ROCHESTER DEALERS FORM ASSOCIATION

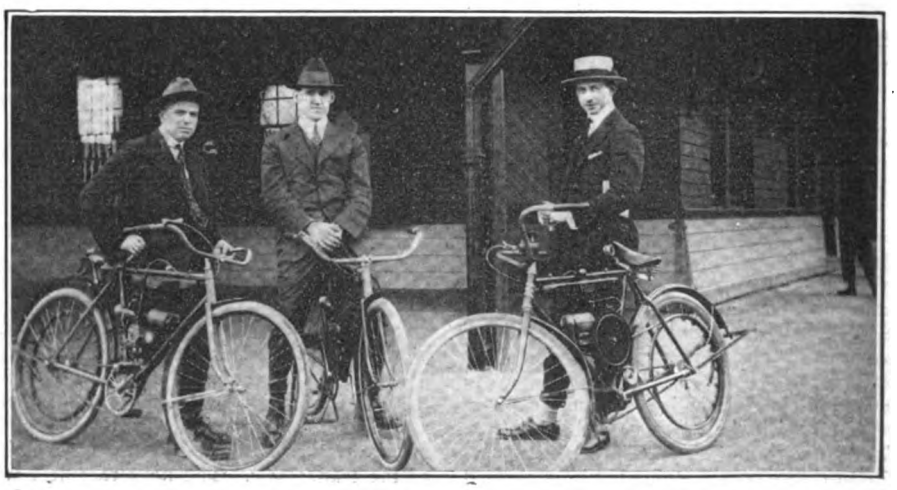
Under the Guidance of Cyclemotor, Goodyear and Atherton Men, Cycle Tradesmen in Flower City Pull Together

ROCHESTER, N. Y., July 13.—As a result of the efforts of E. R. Perrin of the Cyclemotor Corporation, and T. R. Thomas, of the Goodyear Tire & Rubber Company, bicycle and motorcycle men in this city have formed the Rochester Cycle Trades Association. The association will be a co-operative one and will devote its energies to promoting the general welfare of the trade in Rochester and vicinity.

No less active in getting the tradesmen to combine was W. F. Emerson, of the Buffalo Metal Goods Company, and D. G. Anderson. Committees were appointed and a meeting date set for the week of July 10-16. At this meeting every dealer in the city is expected to be present.

The Promotion and Publicity Committee of the new organizations is composed of George Miner, C. Lippincott, and F. B. Towner. It will aim to educate dealers and the general public in the value of the two-wheeler for commercial and other purposes. It will inaugurate a contest such as was held at Buffalo, N. Y., recently—an amateur bicycle race over a 20-mile course through the city kept open by motorcycle police.

The Membership Committee appointed consists of E. R. Perrin, L. W. McCracken



T. R. Thomas, of the Goodyear Co., Manager Anderson and E. R. Perrin, of the Cyclemotor Corp., Who Are Boosting Rochester Ass'n

Digitized by Google

and F. S. Booth. No election of officers was held at the first meeting, but this will be done as soon as possible.

The motorcycle speed-maniac came in for a hard rap by the association. "Such roadburners" said the resolution adopted in this connection, "inspire enough adverse criticism of the motorcycle and its ways to counteract the influence of the millions that cycle and accessory men are spending for advertising."

In an address to the members, Mr. Emerson said that while there is less purely-for-pleasure riding than formerly, bicycles carry thousands of men to and from their daily work. Altogether there must be nearly three million bicycle riders in the country. Twenty million dollars are invested in the bicycle and allied lines.

THIRTY-FIVE PRIZES FOR C. R. C. A. CARNIVAL

NEW YORK, July 18.—The list of prizes to be offered for the various contests in the Annual Carnival of Sports and Pleasure Run of August 6, and promoted by the Century Road Club Association, has recently been greatly augmented by the addition of a set of prizes received from the million bicycles committee. The new list totals about 35 prizes, and the committee announces that the first prize of each event will be worth at least $10, and the second and third prizes in proportion.

Entries are already beginning to come in rapidly, and the chairman desires to announce a positive closing of entries for the competitive events on July 31.

The division being formed for the purpose of bringing together the real veterans of the sport has received a great boost within the past week, as promises of attendance have been received from at least ten old-time enthusiasts, who will surely ride in the parade to start from Columbus Circle.

Entry blanks have now been fully distributed, but further blanks and information may be had by applying to Thomas F. Lockhart, 948 Second Ave., New York City.

YOUNG BICYCLISTS ON HIKE

WATERLOO, Iowa.—Twenty-five Waterloo boys recently made a 20-mile bicycle hike to Independence and return, starting and finishing at the Y. M. C. A. building in this city.

Nearly all the members of the party were Boy Scouts, and the trip was under the auspices of the Y. M. C. A. officials. The round trip of 40 miles was made without a hitch

"MANY VALUABLE SUGGESTIONS"

Editor, Motor Cycle Illustrated:

For the years that I have read your excellent magazine I have come to like it very much and many valuable suggestions were gotten from it. Typographically, if I may give my opinion of your paper, I think it is one of the neatest and best in style of "make-up" that I have ever seen for a paper of its nature.

Marshall, Minn. P. M. Menard.

VISIT CONEY ISLAND ON CLUB RUN

The C. R. C. A. Riders on Cycle Path of Ocean Parkway, Pedaling Out to Coney Island; Below, the Party at Luna Park, Coney Island

NEW YORK, N. Y., July 18.—The weekly point race of the C. R. C. A. over the six-mile course on the Fordham Road was captured last Sunday by Jas. Tomasulo, with a handicap of 1 minute and 30 seconds, riding against a field of nine contestants. J. Marquart, a scratch rider, finished in second position, close behind the winner. Another race will be held next Sunday.

In the afternoon several of the association boys participated in a run to Steeplechase Park, Coney Island. After making a round of the many attractions at the park, the party sat down to supper and did not quit the island until ten o'clock P. M.

EMERSON BOOSTS THE COMMERCIAL BICYCLE

In New Sales Help for Dealers, He Tersely Calls Attention to the Rapid-Fire Service Made Possible by the Two-Wheeler

BUFFALO, N. Y., July 18.—Live wire publicity material has long been a characteristic of the promotion department of the Buffalo Metal Goods Co., maker of the Atherton coaster brake, and every new sales help issued by that concern has been received with keen appreciation by the dealers. One of the recent contributions by the Buffalo company to sales literature is entitled "A Timely Hint," in which the place of the commercial bicycle in a storekeeper's business is forcibly brought home.

"GET A MOTOR WHEEL!"

The Old Cry "Get a Horse" With Which Stranded Autoists Are Often Taunted Won't Apply in This Instance

Under the caption of "Business Friendship," President Emerson, of the Buffalo Metal Goods Company, tersely sets forth an effective sales argument on the commercial bicycle.

"Many times something is forgetten,—the important one thing most needed, you neglected to order, without which the job is at a standstill. But—'a happy thought,'—you 'phone the store and a cheerful voice assures you there will be no trouble in sending a boy on a bicycle with the desired article. A sigh of relief—and painstakingly the job is completed, on time.

"A kindly feeling draws your continued business to that dealer who provides a quick delivery bicycle and a cheerful willingness to use it.

"The bicycle for prompt service delivery is an economical method of cementing

Digitized by Google

friendship between housewife and storekeeper. It will hold old customers and gain new ones. The quick delivery is made necessary by the telephone and special order. Every small order promptly and courteously handled assures you of the larger order and permanent account.

"People will buy from up-to-the-minute, progressive merchants, and the commercial bicycle—one equipped with package carrying devices, where cost is little and upkeep is nothing, provides the means to his continued success.

"In our busy streets the Atherton Coaster Brake will give instant control. It is rugged and dependable, and will stand the heavy service required of the commercial bicyle."

BIG BIKE DEMAND CONTINUES

BALTIMORE, Md., July 18.—The bicycle business in Baltimore continues to be brisk, the Holland-Baden-Ramsey Co. reporting all three of their men are now busy on the road. Bob French, local agent for the Racycle and Miami bicycles, who recently ordered twenty-two machines, has disposed of the entire lot and ordered eleven more.

A MERE REPAIRMAN?

No! This Is J. L. Caldwell, One of the Big Bicycle Merchants of Atlanta, Ga.; J. L. Doesn't Meet His Customers in These Togs; the Cameraman Coaxed Him Out While He Was Working on a Repair Job; Caldwell's a Stickler for Neatness

PUNCTURE JINX FOLLOWS RYAN AT POINT BREEZE

PHILADELPHIA, Pa., July 16.—Martin Ryan, of Newark, rode in hard luck when he lost the 40-mile paced race to Manus Bedell, of Long Island, at the Point Breeze Park Velodrome last night.

Ryan, who was paced by St. Yves, rode in grand form and took the lead from Madona and Bedell in the 10th mile and soon had a lap on his field. He held this lead until the 39th mile, and looked a sure winner, when misfortune overtook him.

Just as he was about to make a spurt for the last mile of the race he punctured a tire, and before he could recover by getting a new wheel the pistol of the finish was fired and the race was over and Bedell won by less than 10 yards.

SYDNEY SEES RACE OVER HILLY COURSE

Twenty-Mile Event Stirs Up Renewed Interest in Cycling Among New South Wales Riders; Victorians and Queenslanders Are Active

By H. G. GORDAN

Left, J. N. Doddy, Who Made Fastest Time in Twenty-Mile Race; Right, Jack Fittler, One of Australia's Crack Short Distance Riders

SYDNEY, Australia, July 5.—Bicycle racing seems to be taking a new lease of life in Australia. A very interesting event has just been staged by the Ashfield-South Sydney League Club, and announcement has been made that some big feature will soon invite the attention of the fans.

Because of the hilly character of the course the twenty-mile race held by the Ashfield-South Sydney League Club proved to be a very severe test of the riders' endurance. This event was run between the ancient settlements of Parramatta and Windsor, a five-mile grade facing the riders at the very outset; several other stiff pinches kept the fellows plugging.

T. J. Wilson, of the promoting club, with a 4 minute and 5 seconds handicap, won in 1 hour, 2 minutes and 5 seconds, with M. J. Cruise, also of the promoting clul second, and F. Watson, of Central Cum berland Club, third. The fastest time wa made by J. N. Doody—59:35.

An impressive list of cycling events fo amateurs and simon pures has been ai ranged to be held on the first Monday i October, in connection with the annu: labor demonstration. Several profession: events are scheduled for the immediat future, along with races for "lily whites.'

Down in Victoria the amateurs have ke pluckily going, racing for war certificat and donating their prizes to the patriot funds, while the Queenslanders have gor serenely ahead in spite of war troubles. I New South Wales, the oldest state in tl Commonwealth, only a half dozen clul have shown any interest in cycling.

CARMAN TAKES BRASSARD FROM CRACK TRIO

Defeats Linart, Walthour and Seres in Feature Event at Revere Beach Track; Five Races Held on Monday Night

BOSTON, Mass., July 17.—Clarence Carman won the much-coveted Brassard easily at the Revere Beach track this evening, defeating Victor Linart, the holder, by seven laps, and Bobby Walthour, who was third, and Georges Seres by larger margins.

Both Walthour and Seres lost more than a mile on account of mishaps. Linart was not in his usual form and lost his pace repeatedly when trying to prevent another rider from passing him.

Seres Changes Wheels

Carman was only 30 yards ahead of Georges Seres at the end of half an hour when the latter had to change wheels. The riding of Seres was a feature. Hailed as one of the fastest in France he has failed to show anything until this evening When he regained his motor and got going on a spare wheel, he easily passed Carman.

Fred Herbert of Fall River rode brilliantly in the five-mile open, professional, and surprised the fans and riders alike when he jumped into the lead three laps from the finish and held his margin easily, despite the efforts of such fast men as Tim Sullivan and Pat Logan, who had to be satisfied with second and third, respectively.

Barber Wins Amateur Race

Mike Barber again won the amateur handicap to the delight of the fans. Frank Jeehan of New Haven finished ahead of Barber, but was disqualified for riding inside the pole on the last turn. The summary:

Half-mile handicap, amateur—Won by Michael Barber, Brighton (5 yards); Clem Robinson, Boston (65 yards), second; Robert Fox, Beachmont (95 yards), third; Lewis Hill, Revere (55 yards), fourth. Time, 58⅗.

Two-mile open, amateur—Won by J. B. Rollins, Everett; John Fardig, Orient Heights, second; Frank Jeehan, New Haven, third; Frank Keenan, Revere, fourth. Time 4:26⅘.

Three-quarter mile handicap, professional—Won by L. C. Rollins, Everett (20 yards); Hugh McPartland, Boston (100 yards), second; Warren Holbrook, South Boston (125 yards), third; Dennis Connolly, Everett (120 yards), fourth. Time, 1:24⅘.

Five-mile open, professional—Won by Fred Herbert, Fall River; Tim Sullivan, New Haven, second; Pat Logan, South Boston, third; Paul Suter, Zurich, Switzerland, fourth. Time, 11:27⅗.

PLAN BUREAU TO ADVISE ON FOREIGN CREDITS

NEW YORK.—Because of the great volume of foreign business now coming to the United States there is a growing interest in the subject of foreign credits. While the United States government can aid in the opening of new markets for American goods, it cannot undertake to pass on the credit features of the trade, that is to say it cannot vouch for the foreign buyer or dealer who evinces a desire to handle American-made goods.

Lack of this information has been a serious handicap to American exporters, and it is now planned to establish a central office where trustworthy information concerning the credit of a foreign dealer or merchant may be obtained by bona-fide inquirers. The bureau probably will be established under the auspices of the National Association of Credit Men, the members of which expressed themselves as in favor of the plan during the recent national convention at Pittsburgh.

BETTER EACH WEEK

Editor: I wish I could be like Motor Cycle Illustrated and grow better every week.

F. S. MORSE, F. A. M. Comsr., New Hampshire.

R. S. BICYCLES USED WIDELY BY CITY DEPARTMENTS

READING, Pa., July 18.—Keyser Fry, president of the Reading Cycle Manufacturing Co., announces that a substantial number of R. S. roadsters are being sold this year to municipal governments, the majority of orders being for the park and police departments. Public service corporations are also proving a fine market for the sturdy R. S. roadsters.

A new juvenile model is now being manufactured with a 17-inch frame and 26-inch wheels, enameled in the R. S. green-brown combination.

Shipments of raw materials are coming along at a lively clip, and the R. S. plant will be running at full speed the entire year.

INTERESTING CYCLING GOSSIP FROM ENGLAND

Some Features of John Bull's Bicycles—Description of Rover Chainless and Humber Roadsters—Week-End Tours Popular with Munition Workers

By OLD RAMBLER

CHAINLESS bicycles are by no means extinct in France or in the United States, but in England they have become very rare in late years. The French Acatere had a vogue in its own country and in Britain some seasons ago; and that bevel-driven machine had a rival on which I rode thousands of miles, viz., the quadrant cross-roller gear.

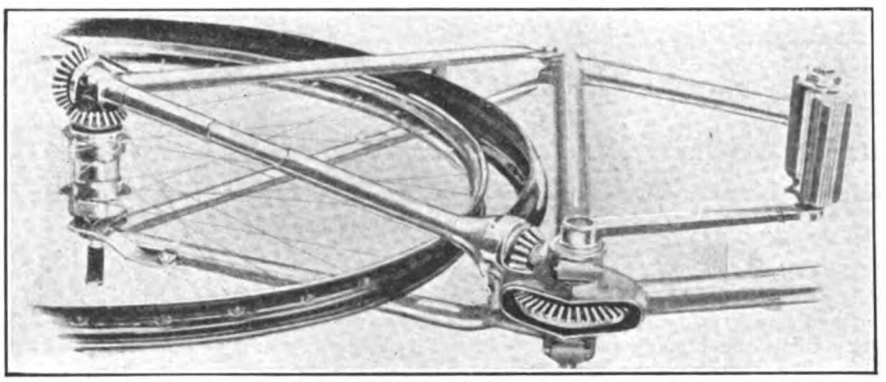
Gear Wheels With "Teeth"

Instead of bevel for transmission of power, this machine had gear wheels with "teeth" set at right angles to each other. The word "teeth" is an inaccurate description, for the place of each tooth was taken by a small pin with a roller on it, exactly like a section of a roller chain. The drive was positive, as in the case of bevel gears; there was never any "slack" or "back lash" as when a chain wants tightening.

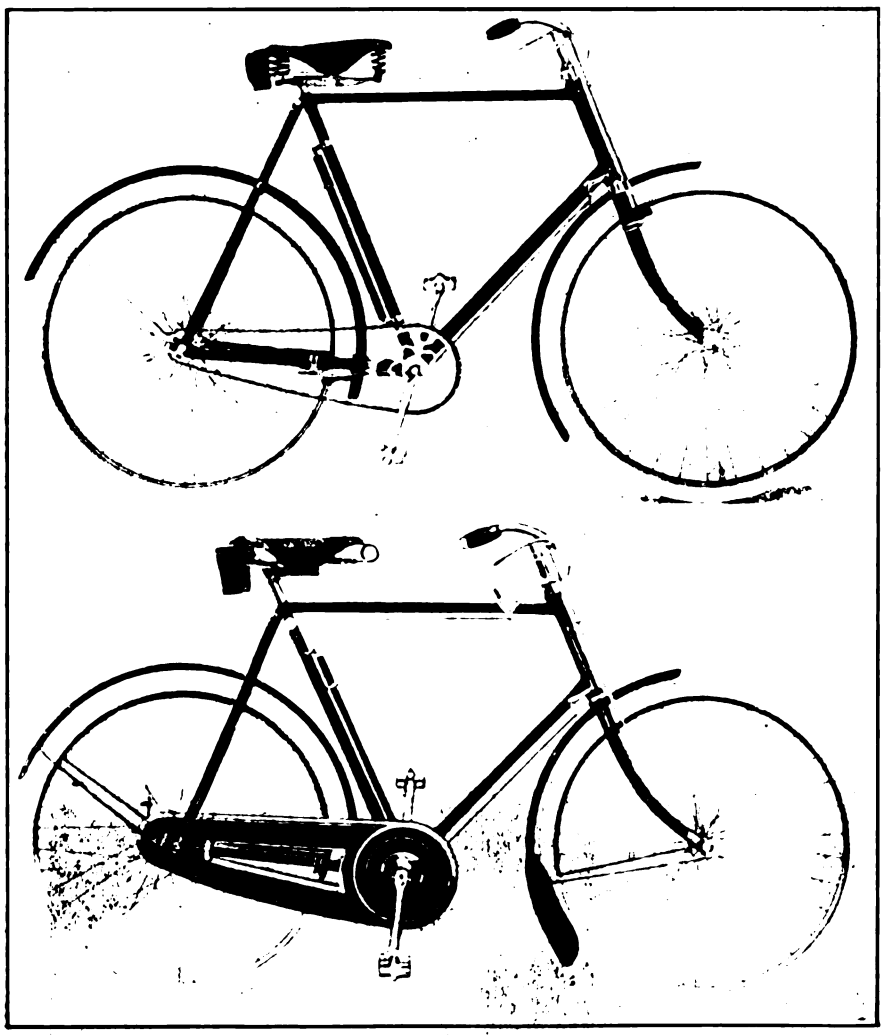
The great Rover Company, which first introduced the safety bicycle to the world, has a chainless model on the market, but the war has interfered with its prominence and publicity. I am able, however, to forward an illustration showing a view of the gear as fitted, seen from the underside of the crank hanger.

Features of the machine that will strike an American are: 1—The foreguard, or foreward extension of the front mudguard for six or seven inches in front of the fork crown; 2—gear, 70-inch; 3—cranks, 7-inch; 4—price, for Great Britain only, $52.50.

The Rover people candidly state that their chainless models embody no claim to the introduction of a new principle; but—evidently remembering the woes and worries of some bevel gear bicycles of years ago—they point out that the making of bevel gears nowadays is a positive science with mechanical exactitude. The absence of sprocket wheels means reduced weight and no need for chain adjustments and the embodiment of a coaster hub brake. This last was a thing unknown with early chainless models.



View of Gear on the Rover Chainless Model



Above, Light Humber Roadster. Below, Humber Touring Model with Chain Guard, Variable Speed Gear and Rim Brake

Some Facts About Crank Lengths

I have mentioned that the Rover crank length is 7 inches. That size is pretty well standard in the British market; but it took some of us hard writer-riders years to convince the factory fellows to adopt them. For years everybody, whether a 5-foot midget or a 6-foot-2 rider of the Daddy Long Legs type, was offered a bicycle with 6½-inch cranks.

Some of us tried cranks up to 9 inches, and frames had to be especially built; otherwise the pedals would catch the front mudguard or tire when we turned corners. One of my friends still insists that 9-inch cranks are best, and he has a number of disciples. Personally I found 8-inch cranks the biggest for my own comfort, and I never use less than 7½. If you want to experiment on something sensible, try different sizes of cranks: the extra leverage will be found a revelation to those who use 6½ and 6¾-inch cranks.

Get out on a hilly course and you will find the driving virtues of 7½-inch cranks make the 6½-inch pale into paltriness.

Rambler's Touring Gossip

I have been recently over some of the best-known hill country in England; and my old Rudge did its work as faithfully as ever. It is a fine sample of the sensible bicycle *à l' anglais*. It was made to dispense with work; to be ridden and not to be everlastingly in need of "elbow grease" and polishing material. The handlebars, even the handle grips, also the hubs, cranks and

BLUE STREAKS

The Square Deal Tire

Bicycle tire dealers have found out that the Goodyear Square Deal Bicycle Tire Policy makes a very favorable impression upon careful buyers.

Workingmen, who enjoy the freedom and pleasure of bicycling to and from the factory, are quick to grasp the justice and good business sense of such a policy.

They appreciate the guaranteed security that comes with every Blue Streak Tire.

They are glad to know that there is *one tire* they can bank upon absolutely.

That the Blue Streak price, the Blue Streak quality, the Blue Streak guarantee, are the same everywhere and to everyone.

Their knowledge of manufacturing methods has taught them that concentration on one product means a better product at a lower price.

They know that because Goodyear makes only one bike tire—the single tube Blue Streak—it must be of superior quality.

And they understand why the Blue Streak price can be as low as $2.50 when the tire itself gives better service than any other tires at very much higher prices.

Bicycle dealers, who keep one eye on the future, are quick to see the profit and value in permanent, satisfied customers, made by selling them Goodyear Blue Streaks.

In the Dealer's Realm

NEWARK DEALERS TO CLOSE 3 SUNDAYS A MONTH

NEWARK, N. J.—"Closed all day Sunday, except the first one in each month," is the sign that has been displayed in five of the largest local motorcycle agencies. In addition to this, each man has sent out a postcard announcing this move to every one of his customers.

Finding that their trade adapted itself readily to an earlier closing hour in the evening, makes the various agents sure that their riders will accustom themselves to making all necessary purchases on Saturday evening when the stores are open until 10.

Those who are interested in the Sunday closing move are the Carl W. Bush Co., Harley-Davidson and Cleveland; Walter Goerke, Indian; Estate of Frank C. Cornish, Henderson; Chas. Krebs, Pope, and William R. Spears, Thor.

Although there is no dealers' association in town, there seems to be a gradual drift toward a mutual agreement among the more progressive agents.

BUSH COMPANY TAKES ON THE CLEVELAND

NEWARK, N. J.—The Carl W. Bush Co., Harley-Davidson distributor, has taken over the Cleveland lightweight agency, the Smith-Fraser Co. dissolving partnership when E. S. Fraser went to the front with his regiment and L. B. Smith had increased duties to perform at the Bosch Magneto Company's New York branch, necessitating giving all of his time to the magneto business.

The Bush Company has a Cleveland lightweight hooked up to an English "Fitsu" sidecar, an attachment that weighs but 44 lbs., with which they demonstrate the two-strokers ability to prospect. They have opened up a vigorous campaign of advertising that is bringing them results.

GETTING CLOSE TO SOME COAST DEALERS

SAN FRANCISCO, CAL.—Edwin F. Merry, distributor of the Excelsior motorcycle, has just returned from a fortnight's trip in northern California.

Charles Meyer, in charge of the stockroom of the Pacific Motorcycle Supply Co., is planning a trip through Nevada next week.

S. Barton, Coast manager for the Thor, is spending the week in southern California.

J. Fink, Harley-Davidson agent at Stockton, was in the city a few days ago.

Frank Oliver, who has just taken over the Newman Cyclery, at Newman, Cal., has the Harley-Davidson and Excelsior motorcycles.

TO RETIRE FROM BUSINESS

The Iowa Cycle Co., of Des Moines, which has been distributor for the Excelsior for the past two years, expects to close out its stock during the next sixty days and retire from the motorcycle field. W. M. Moore, manager of the Cycle Co., intends to enter another line of business.

SIDELIGHTS ON TACOMA DEALER ACTIVITIES

TACOMA, Wash.—Claude Austin has joined the forces of the Harley-Davidson headquarters here and is adding his efforts in the selling line to those of manager Glasgow. He is covering the outlying districts on a Harley-Davidson demonstrator and the plan has proved a ready means of getting in touch with prospects.

Ray E. Day made an impressionist dent on motorcycling circles in and around Tacoma when he uncrated a stock Powerplus Indian at his wigwam and without doing more than putting it together and filling up the tanks, speeded it up to 75 miles an hour on the speedway.

The Fuller Motorcycle & Supply Co., Cleveland agents, have succeeded in getting a number of young ladies in and around Tacoma interested in the lightweight and have landed several sales in suffragette quarters.

GOERKE'S ALLOTMENT IS ALL SOLD OUT

NEWARK, N. J.—Walter Goerke has disposed of his allotment of Indian motorcycles and is seeking more, the mid-season demand exceeding his expectations. He has placed a sidevan outfit with the Sterling Tire Co. that is finished in yellow, trimmed with red, the trade mark colors of the tire company. He has purchased a piece of property on one of the main streets of the city and has broken ground for the erection of a large store and service station that is to be completed before winter.

WINS ECONOMY TRIAL

SAN ANGELO, Texas.—T. A. Pugh, mounting a Harley-Davidson motorcycle, won the economy contest conducted here recently by the Tucson Motor Cycle Club, covering 23½ miles on one quart of gasoline. The same rider, on a recent outing, covered 93 miles between Nogales, Sonora, Mexico, and Tucson, on slightly less than one gallon of gasoline.

ANGLO-AUSTRALIAN RECORD

The Australian mail brings news that O. Parker on a 2¾ h.p. Douglas has succeeded in breaking the 350 c.c. half-mile record on Lake Perkolilli. His time for the half mile was 28 3/5 seconds, which gives a speed of 62.93 miles per hour. The previous best was on a 2¾ h.p. Sunbeam (1½ seconds slower).

The course on which Parker made the record consisted originally of a salt lake, but the red soil from the surrounding hills has in ages past drifted down over its surface, and this, combining with the salt of the lake itself, has produced an even and vitreous surface of the utmost smoothness, and is claimed to be as fast as any man-made track.

Over 11,000 Miles

On Vitalic Tires!

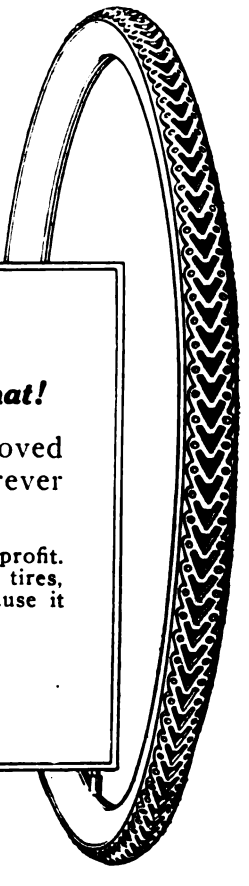
What ordinary bicycle tire could come anywhere near that record? None! It took VITALICS to do it.

Out of over 60 tires used during a period of 25 years by Dr. F. S. Cate of Florence, Cal., the Vitalic was the only one to reach anywhere near this mileage. Among the 60 tires used were the *very best* of other makes, a number of them much higher priced than the Vitalic. But Vitalics ran *more than three times* the average mileage of the seven next best makes of tires used (based on an accurately kept mileage record sworn to before a notary).

It is this unmatched *mileage* which Vitalics are giving wherever used that proves beyond question their unequalled standard of construction; highest quality of rubber instead of the cheaper grade put in ordinary tires; two plies of heavy *motorcycle* fabric, frictioned with pure rubber, instead of common bicycle fabric; an extra heavy inner tube of pure white rubber.

Write for the testing section and examine these features of construction thoroughly.

VITALIC TIRES
TRADE MARK
For Bicycles



Dealers—

Think what you could do with a tire like that!

There isn't any room for doubt—Vitalics have proved their supremacy over all other bicycle tires wherever comparison has been made.

Thousands of dealers rely on the Vitalic to make their tire profit. Once introduced, it easily brings a better price than ordinary tires, and always sells over and over again to the same trade, because it never disappoints.

LAWRENCE PROCESS CURES SCORED CYLINDERS

NEWARK, N. J.—Scored cylinders, due to loose wristpins or foreign matter getting in between the piston and the walls, are now being treated effectively by a new process in the works of L. Lawrence & Co., 292 Halsey street, this city. The process, which is patented, consists in filling the shallow or deep scores with a silver and nickel alloy, applied electrically and smoothed down to the face of the cylinder wall.

The alloy used has unusual heat-resisting qualities. While very hard when applied, it forces its way into the pores of the iron, amalgamating with it and becoming a part of the cyilnedr. It extends and contracts, it is claimed in the same ratio as the cylinder itself.

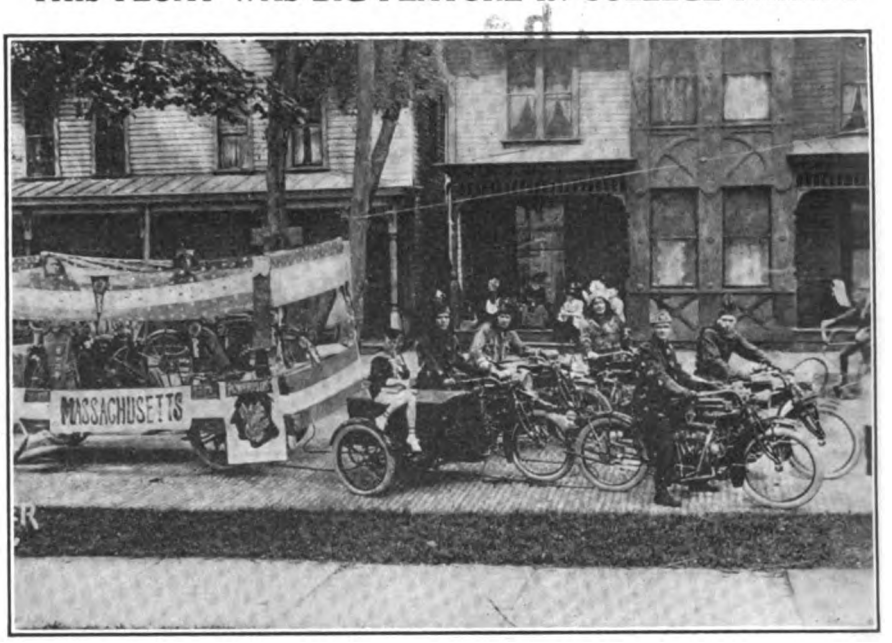
During the process, there is not enough heat used to warp the cylinder. Grinding and boring are eliminated and the fitting of new pistons and rings eliminated. The work is completed within 24 hours of receipt, and is absolutely guaranteed.

Western trade is taken care of from the firm's Chicago works, at 1522 Michigan avenue. Those interested should apply to the nearest works for terms, etc.

ORDER MOTORCYCLE MACHINE GUNS

ENGLEWOOD, N. J.—The Englewood Rifle Association, a military organization of private citizens, has decided to include motorcycle machine guns in its equipment. The company recently placed an order for five Indian motorcycles and two machine guns.

THIS FLOAT WAS BIG FEATURE IN COLLEGE PARADE



WASHINGTON, Pa.—One of the chief attractions in the fraternity convention held by the Greek letter men of Washington & Jefferson University recently was a series of floats, each from a chapter in the college, which were paraded one afternoon. Each float represented some industry typical of one of the States. That of Massachusetts consisted of Indian motorcycles. It is shown above.

The Indian float was mounted on a large wagon decorated with bunting and Panama Grand Prize banners. Several up-to-date machines appeared on the platform, and other machines, furnished by Wigwam dealer, T. W. Long, hauled the float. The riders wore feather head-dresses and Indian garb.

NEW EXCELSIOR SUB-AGENCY

COLUMBUS, Ohio.—The Franklin Rubber Company, of Columbus, agent for the Excelsior in three counties in central Ohio has placed a sub-agency with Frank Monesmith of Delaware. The company reports a good demand for Excelsiors.

AWAITING FOURTH CARLOAD OF GRAY FELLOWS

NEWARK, N. J.—The Carl W. Bush Co. is anxiously awaiting the arrival of its fourth carload of Harley-Davidson motorcycles this season. Not one bit less impatient are a score or more of prospective riders itching to get their hands on those machines.

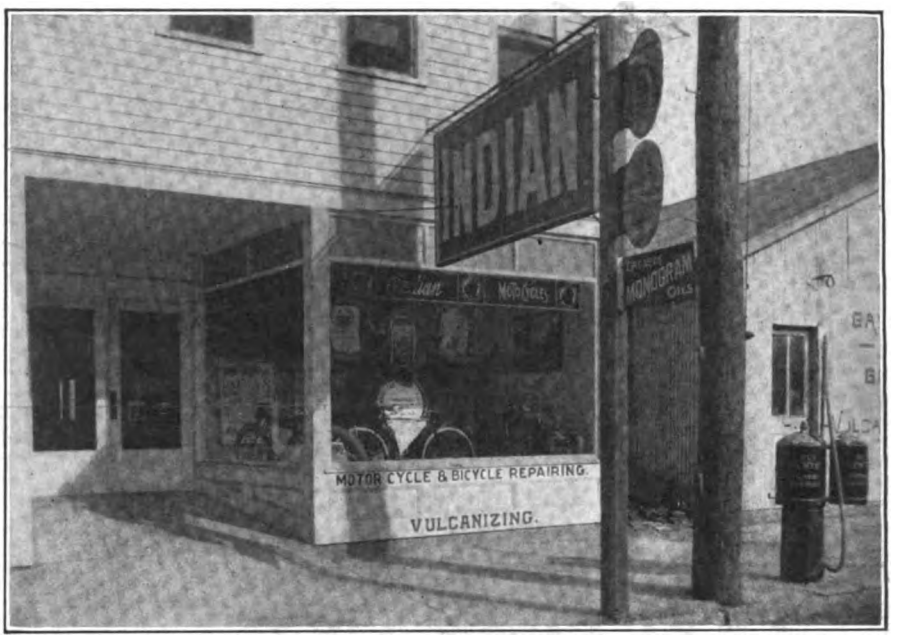
"It has been a wonderful year for motorcycles," says Carl W. Bush, president of the firm, "and our sidecar sales are running far above last year's figures. Our only difficulty is in supplying the demand. We have also broken into the commercial field, disposing of over two dozen sidecar or delivery van outfits to the merchants of this city. We are about sold out on second-hand machines as well. Four carloads of motorcycles and sidecars, so far in 1916, is the record in this section, and is what we will have to shoot at next year."

Carl W. Bush will go to Providence, R. I., to attend the F. A. M. National Convention, while Lincoln Holland, Jr., sales manager, will go over the Ideal Tour through the White Mountains and then cross New York State to view the Falls when Bush returns.

HAS FREAK MOTOR VEHICLE

DALLAS, Texas.—A 14-year old negro boy has created something of a sensation here by constructing a motor vehicle which is made up of a combination of motorcycle, wheelbarrow, spinning wheel and baby-carriage features. That the outfit looks queer, goes without saying, but it actually gets over the ground.

NEW STORE OF HOFF & LOVELAND IN SALEM, N. J.



Note the General Air of Cleanliness

THE above photo shows the new Wigwam of Hoff & Loveland, who handle Indian motorcycles and bicycles and accessories in Salem, N. J. The picture was taken at 6 o'clock in the morning, which accounts for the fact that there is no one in sight.

The Hoff & Loveland headquarters has a ground area of 28 by 90 feet and is divided into three parts—store, storeroom and repair shop. There is also an oil room and a lounging room for patrons. In addition to carrying a heavy stock and operating an up-to-date repair shop, the company conducts a Goodyear tire service station, specializing on repairs of motorcycle and bicycle tires. The store is open every day the year round and the proprietors have built up a big patronage by being able to deliver the goods at all times.

2-STROKE Cyclemotor HIGH-SPEED

During hot weather, especially, city salesmen, collectors, repairmen, reporters, etc., turn from strap-hanging and tiresome pedaling to the more pleasant, quicker CYCLEMOTOR way of doing business.

A bright new CYCLEMOTOR demonstrator in your window is the key to this brisk business, and the easy sales that follow will keep your cash till working overtime.

The Boys Who Use Bosch Prove Bosch Magnetos Good

The Bosch Line-up in Dodge City's
300 Mile Record Race

1st—Irving Janke	Gene Walker	Lorenzo Boido
2nd—Joe Wolter	Bob Perry	"Red" Armstrong
3rd—Ray Weishaar	Glen Stokes	Burt Bruggerman
Wells Bennett	A. E. Hilliard	Sam Correnti
Paul Gott	C. Johnson	Floyd Clymer
Harry Crandall		Harry Brandt

These Boys Know—They All Use Bosch

There is no difference of opinion among these close students of the motorcycle. They use Bosch Magnetos without a question, not only because Bosch is more speedy, not only because Bosch is more capable, but mainly because Bosch Magneto Ignition is absolutely reliable. Because of their choice, Bosch won—and finished 2nd, 3rd and 5th, too.

If You Want Reliable Ignition—Be Satisfied—Specify Bosch

CYCLING GOSSIP FROM ENGLAND

(Continued from page 36)

pedal spindles, are coated by the special process that Rudges have, viz., with black celluloid. The machine seldom gets more than a half minute wipe-down. I consider it an ideal mount for the tourist and all-weather rider.

Touring as we understood it up to three or four years ago is not largely undertaken at present, because of the war; but on week-end holidays it is amazing what thousands of riders are out and about. What finer tonic can our munition workers want than a few exhilarating hours awheel—away on the byroads and anon a spurt on the highroads; a lull and a rest at a bosky dell, where violets peep, and the great foxgloves are now beginning to raise their cathedral spires of ruby bells; or a climb to some hill top "where every prospect pleases and only man is vile"?

Browning when in the States yearned, as he said, "to be in England now that April's there." He ought to see it in June and July, when England is a joyland, bounteous in scenic splendors. Unfortunately many of our roads, especially within easy reach of the great military camps, are a bit in need of the road mender and his goods; but there are many thousand miles of lovely surface.

Lamps Are Lit Early

Recently I was traversing over our Great North Road, which links London with Edinburgh, and it was like a fairyland after sundown. Lamps have to be lit on bicycles and motors a half an hour earlier during wartime than used to be the case; and every machine has to have a rear light in addition to the ordinary white headlight.

To see bevies of boys and galaxies—of all ages—whatho! having the time of their lives, rolling joyously home with but one sad thought to cloud their delight, namely the reflection of the fact that the world is at war, was a sight that did one's eyes good.

This is the time of the year when some of the clubs have been wont to engage in all-night rides. Starting about 8 or 9 at night, they cycle through the hours of darkness and then watch the peeping of the sun in the eastern horizon. Have you ever indulged in the rich revel of an all-night saunter and heard the hum of your tires suddenly enlivened by the accompaniment of the first of the early morning birds? If not, get a club party up. But I'm getting sentimental—the hearty cyclist very often does. But back to practical points.

Features of Humber Bicycles

The good old Humber factory produces as fine a range of bicycles as ever. The special Duplex front fork is fitted to some of the highest grade models: it is made of tubing of 8-section; in other words, each fork consists of two tubes, but these converge into one near the fork-end, so that the hub-ends are very neat. It is claimed for the Duplex tubing that it helps to absorb vibration.

Humber brakes are operated by outside levers on rocking shafts, and power is then transmitted by steel rods. Some firms and many riders still prefer the inverted handle grip, with Bowden wire running inside the handlebar frame and tube. This system is very neat.

The Beeston-Humber, shown here, is a fine sample of the highest class British bicycle, with three-speed gear operated from the top tube; mudguard with forward extension, also a wide flap to catch ground splashes; gear-case that provides an oil-bath, and so on. The rims are not of steel, but of a special alloy called "luminum," the chief component of which can readily be guessed from the name.

This model costs $94, so the age of the recherche bicycle has by no means passed by. An all-black Humber (one of the labor-saving machines that belong to the same category as my Rudge aforesaid) is offered at $68, and can be had also for $62.50 without certain refinements.

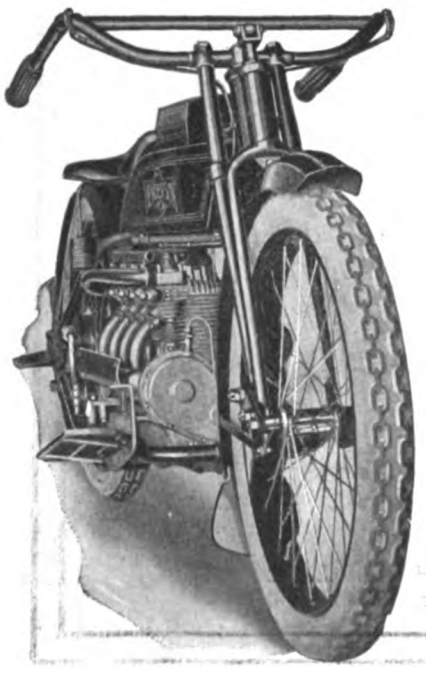
The Standard Humber Model No. 6, here illustrated, typifies the average British light roadster bicycle, except that fellows exercise their own ideas about handlebar patterns. This model, with single gear, is offered at $46.50; a three-speed hub costs $6 extra.

YPSILANTI COPS TO GET ONE

YPSILANTI, Mich.—Members of the police department in this city are testing out a motorcycle which the city is contemplating purchasing to regulate motor speeding.

The make of machine to be purchased is not yet decided upon.

Earned Confidence



Dealers and riders have learned that the four-cylinder Henderson will really do all that we claim it will. They have found that it makes good in actual performance.

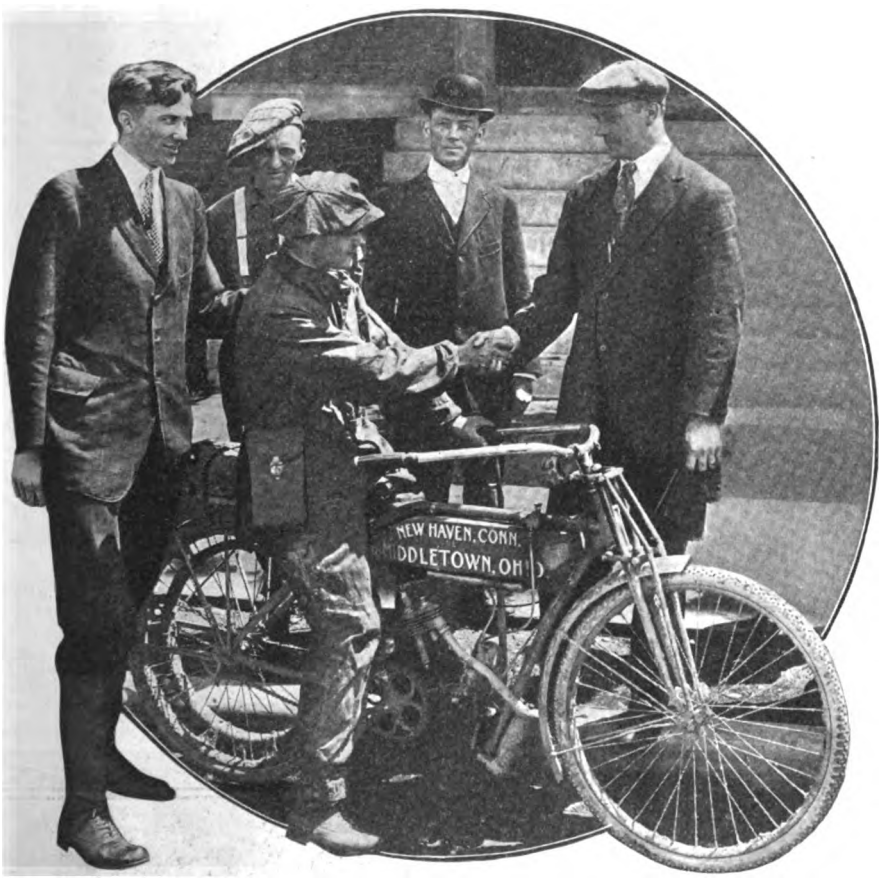
THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS



Congratulations

MR. C. F. PINEAU in demonstrating the ruggedness and dependability of the Miami Power Bicycle, drove from New Haven, Conn., to Middletown, Ohio, 1,102 miles, in 65 hours running time. It was not a "speedfest," but a plain demonstration of what a Lightweight could do when it took to the heavy going of long distance touring.

It lived up to all expectations, and more.

This Miami Power Bicycle, like all others, used belt drive, just as all successful Lightweights eventually will—it used belt drive successfully even though it rained 2½ days, and mud was almost hub deep. The same belt that made this trip had been in use for 2,000 miles before this strenuous test —3,000 miles of real rough going, but said Mr. Pineau—"I have had absolutely no trouble with the belt—that's because it's a

DUBUQUE MOTOR-COPS DISCIPLINE SPEEDERS.

DUBUQUE, Iowa.—Because of a storm demand for protection by the public following a series of bad auto accidents, Chief of Police Giellis, of Dubuque, Iowa, has declared war on the "speed maniacs," and to assist him in bringing violators of the city ordinances to justice has put two policemen on motorcycles who will give their whole attention to the matter. E. Vosberg and J. Dolan, the two policemen chosen for the work, both have had considerable experience with motorcycles.

No certain territory has been mapped out for them, but violators of city ordinances have been warned that they can expect to meet them anywhere within the city limits. Nor need they be surprised if at any moment they are arrested by an ordinary looking motorcyclist in ordinary clothes, who shows a star and informs them that they have been violating the city ordinances either by exceeding the speed limit, operating a motor vehicle without a license, without lights, without two license numbers, front and rear, not keeping the right side of the street, or not waiting when passengers are being taken on or discharged from street cars.

SPEEDY SIDECAR JOURNEY

DENVER, Col.—Paul G. Smith and his daughter Helen, with a motorcycle and sidecar, recently drove from Tabernash to Denver in four hours and 15 minutes. The distance is 84 miles, and in view of the rough traveling encountered the time is considered excellent for a sidecar combination. It is stated that the best previous time for the trip by a sidecar outfit was about six hours. In passing over Berthout Pass they found the temperature close to the freezing point, and in Denver they experienced a temperature of about 90 degs.

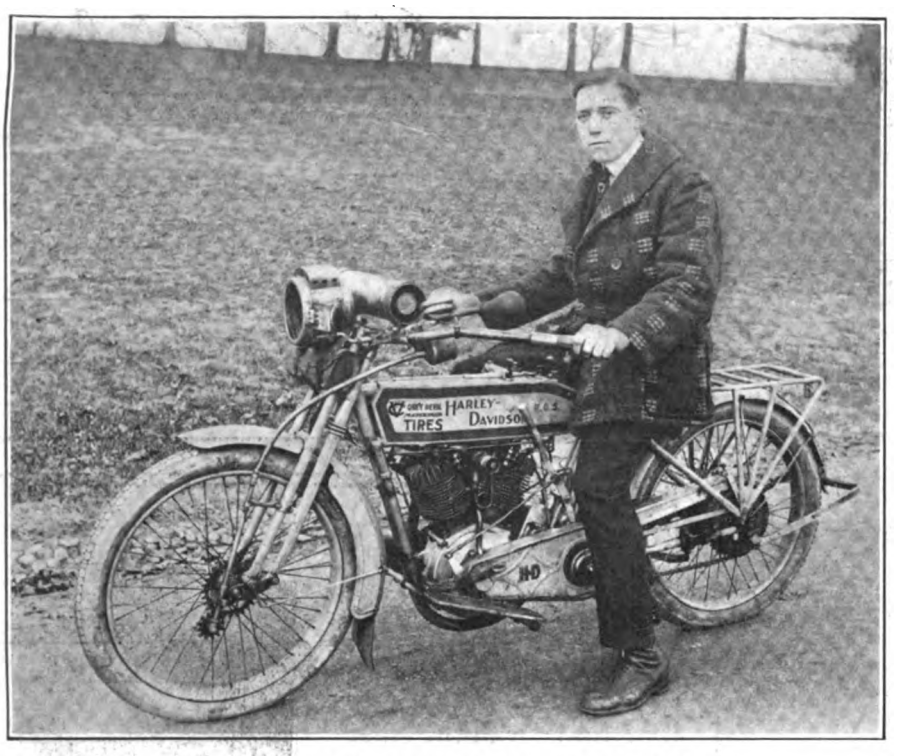
HAD TOP SCORE IN MARYLAND M. C. RUN.



Frank G. Schenuit, High-Score Man in Maryland Contest

BALTIMORE, Md.—Frank G. Schenuit, Harley-Davidson, received the top score of 999 in the fourth annual endurance run of the Maryland M. C., held Sunday, June 24, with F. O. Boyd and Bert Heinz, on Harley-Davidsons, and Carey Mears and T. Lowenstein, on Indians, not far behind him with scores of 997 each. Schenuit is a member of the firm of Schenuit Bros., Baltimore distributors of Pennsylvania Vacuum Cup tires. He holds a number of medals and other trophies as the victor in speed and endurance contests.

The scores of the other finishers in the Maryland run, which was run over a 128-mile course in western Maryland and Pennsylvania, ars as follows: A. W. Bosley, Harley-Davidson, 996½; H. Moat, Harley-Davidson, 996½; "Gus" Heinz, Harley-Davidson, 995½; I. Sandruck, Excelsior, 995½; R. Waltham, Harley-Davidson, 995; G. C. Sandruck, Excelsior, 995; Becker, Harley-Davidson, 994½; Paul Mamock, Harley-Davidson, 992½; Merriman, Dayton, 992½; Nessmith, Excelsior, 989; Irving Hammond, Indian, 988½.

19,300 MOTORCYCLES IN OHIO

COLUMBUS, Ohio.—W. H. Walker, Ohio registrar of automobiles, who also looks after the issuing of motorcycle licenses, had registered 19,300 motorcycles up to July 12. During the same period the department issued licenses to dealers and manufacturers to the number of 140. The total registration of motorcycles, both by owners and dealers and manufacturers last year was slightly in excess of 22,000.

TO RIDE IN LA GRANDE RACE

BOISE, Idaho.—A number of speedy local motorcyclists have left for La Grande, Ore., to participate in the big race meet which will be held there July 22-23. T. J. O'Keefe, of Portland, representing the U. S. Rubber Company, carried the news of the big La Grande program to this city, and worked up much interest among the local riders.

COMFORT + SERVICE

When you consider what a really comfortable tandem is called upon to do, then you begin to study its essential features. The careful buyer, invariably selects a Stoll Tandem because of its substantial construction and its comfort features. The long, enclosed springs work in oil, and will not break. The entire frame work is sturdy, and is pivoted at all joints where there is a strain; this, together with the springs, guarantees a smooth, flexible action on the road. There are many other important features in the Stoll Line. Look them over. Get our descriptive folder free.

STREAKS

A Profitable Policy, Plus Publicity

IF YOU will consider the Blue Streak sales plan in all of its progressive steps, you will find that we told the truth when we said that you will not be presenting something old, but something new in the trade.

The Goodyear Square Deal Policy—one tire, one price, one guarantee—and the advertising of this Policy, in and of itself, automatically and immediately puts all other bicycle tires into a less positive quality class than Blue Streaks.

It persuades bicycle riders to give Blue Streaks precedence in their minds over any other tires.

Moreover, this policy clearly makes an issue between long wearing, guaranteed Blue Streaks and inferior tires of doubtful make and guarantee.

It points out to the public that there is a difference in bike tires which the public has not known to exist.

It inclines the buyer to be more careful—to ask, in fact, for Blue Streaks—because the one price is known and the guarantee is positive.

Inasmuch as there is only one standardized bicycle tire on the market you can imagine what the result has been.

Blue Streaks have been the most profitable tire for dealers because they have brought permanent, satisfied customers and a quicker and larger volume of sales.

That Harley-Davidson

With the steady, unrelenting, onward sweep of a forest fire, the Harley-Davidson track corps is sweeping everything before it. At La Grande, Oregon, July 22nd, Tracey Hollister opened the Harley-Davidson festivities by grabbing the big Northwestern Championship in the fast time of 46:20-$\frac{4}{5}$. It was exclusively a Harley-Davidson race, second and third place being also annexed by the Silent Gray Fellows.

On the second day of racing, Otto Walker, mounted on a 1916 stock Harley-Davidson, won the Far Western Grand Prize Hundred Mile event in the wonderful time of 85:42-$\frac{4}{5}$. Irving Janke, of Dodge City fame, was well in the lead

Clean-up at La Grande

when he ran out of gas at the 96th mile. Then, and then only, Walker, with his body flattened against the tank, his nose on the handlebars and riding for all he was worth, "zoomed" by with his motor purring like ten thousand cats, and took the lead to the end. It was a great race but nothing to it but Harley-Davidson.

Otto Walker then capped his day's performance by cleaning up in the Five Mile Open, winning handily in three minutes, thirty-eight and four-fifths. Hollister also repeated and captured the Five Mile Race for Local Riders in 3:49-$\frac{4}{5}$.

"East is East and West is West"—but Harley-Davidson victories reach from Coast to Coast.

Otto Walker, Oakland, Cal.

Irving Janke, Milwaukee, Wis.

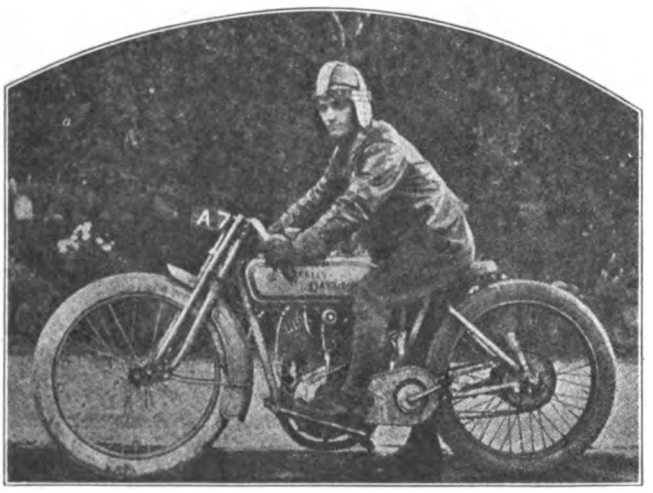
And Australia Too

Three more road records have been added to the Harley-Davidson string of Australian records by H. A. Parsons of Melbourne, according to cabled news from Bennett & Wood, Ltd., Sydney.

Parsons' latest exploit was to ride one mile in 46 2-5 seconds; five miles in 4:11 4-5; ten miles, 8:28 2-5—and all on the road—mind you.

The Harley-Davidson Holds—
Australasian Quarter Mile Record
One Mile Road Record
Five Mile Road Record
Ten Mile Road Record
World's 100 Mile Road Record
Canberra Club (100 Miles) Trophy
Christchurch Heavyweight Trophy
Sydney Motorcycle Club 24 Hours Reliability Trophy



Parsons' Most Famous Achievement was in the road race at Mortlake when he rode 101.7 miles in 97 minutes, but now he evidences intentions of capturing all Australian records

BLUE STREAKS

Everybody—Clean Up!

Grime and grit are all right on the race track, but they were never intended for pleasure riding.

It is perfectly true, as every motorcycle dealer knows from actual experience, that a very appreciable number of motorcycle sales are lost because some riders, some motorcycles, some shops and some salesmen don't "look" as though the sport of motorcycling is all the fun claimed for it.

It's the happy smile—not the grimy face—that makes men want a motorcycle.

And it's the clean, bright, silent motorcycle—not the greasy, snorting demon—that will attract a larger and larger number of pleasure riders.

We think you will agree with us that motorcycling is for the many and not the few—that if motorcycling were made cleaner for the rider it would be a more popular sport. And popularity means increased motorcycle sales for dealers.

The Goodyear Dealer Helps are offered for the purpose of assisting motorcycle dealers in presenting the motorcycle to possible purchasers in the best possible light.

We want you to sell Blue Streak Tires. We show our faith in the profit and prestige Blue Streaks can bring your store by offering you ways and means of increasing your motorcycle sales as well.

These Helps we gladly send you—most of them free or at a trivial cost. Posters, Window Cards, Window Displays, Good-Will Gloves, Motion Picture Slides, Newspaper Advertisements, Goodyear Letter Service and the beautifully enameled Goodyear Blue Streak Service Station Sign.

Whether you are a Goodyear Dealer or not, makes no difference. We want you to see samples of these Selling Helps. Write us today.

United States Tires Win Jack Pines Run and at Sheepshead Bay

I. F. Jacobs riding on United States Tires won the recent Jack Pines Endurance Test.

"Babe" Buttlar riding on United States Tires won the 10 and 25 mile amateur race at Sheepshead Bay.

Thus, under the severest road conditions and on track as well, United States Tires made good.

Also Baker on United States Tires broke every road record from 1 to 1,000 miles in Australasia last winter.

Here are three of the many proofs to our contention that for road service there are no motorcycle tires quite so good as those made by the United States Tire Company.

JOHN F. ALVORD SUCCEEDS HENDEE

New Yorker Becomes President of Hendee Mfg. Co. and Will Assume Active Control—Hendee's Entire Holdings Are Sold to Alvord and His Associates—Had Long Desired to Retire From Business—Hinckley Resigns as Secretary—New Executive Is Head of Splitdorf and Torrington Companies

NOTHING RESEMBLING A MERGER IS UNDER WAY, IT IS STATED

SPRINGFIELD, Mass., July 26—George M. Hendee has resigned as president and director of the Hendee Manufacturing Co., and disposed of all his stock holdings in that company.

Mr. Hendee is succeeded as president by John F. Alvord, of New York, president of the Torrington Company, head of the Splitdorf Electrical Company and various other enterprises, and a man who has made a marked success as a manufacturer.

This important announcement was made following a meeting of the Hendee company directors on Tuesday, July 25. It was further officially announced that Charles H. Hinckley, secretary of the Hendee company, had resigned to accept a position with the Willys-Overland company.

What other changes there will be, if any, has not yet been announced, nor is it known who will be selected to be general manager. While taking active control, Mr. Alvord will not, it was said on good authority, make his headquarters in Springfield.

The stock interest of Mr. Hendee has been acquired by Mr. Alvord and his New York associates. Of the details of the transaction nothing definite was divulged, but it is understood that the holdings of the Springfield men interested are not increased.

EMPHATICALLY, it was stated, that nothing resembling a merger is under way. Though the Hendee company has business relations with the Splitdorf and Torrington companies, the reasons for Mr. Hendee's sale to Mr. Alvord and his associates are:

1—Mr. Hendee's strong desire to retire from business.

2—The confidence of the New York men in the Hendee company as a thriving concern.

The company has an authorized capital issue of $12,500,000, of which $2,500,000 is preferred stock and $10,000,000 common. Of the preferred shares $300,000 have been retired. Mr. Hendee and his friends have had control of the common stock, though his personal holdings are a minority interest.

After the meeting of the directors on Tuesday, the following statement was issued:

"The desire on the part of George M. Hendee to retire from the activities of the Hendee Manufacturing Company has been known among his associates for the past three years, but only recently was the desire made possible through the larger interests hinting that they would not be adverse to further increasing their holdings in the Hendee Manufacturing Company.

A Good Opportunity

"This gave Mr. Hendee the looked-for opportunity which would allow him to retire and enjoy to its full extent his beautiful estate in Suffield, Conn., with the result that a deal was consummated, not only for the sale and purchase of his entire holdings in the Hendee Manufacturing Company, but also he was to be relieved from active duties, to become effective not later than August 1.

When Earl Resigned

"It will be remembered that about two years ago when Clarence A. Earl entered the Hendee organization, Mr. Hendee was about to realize his desire to retire at that time, but shortly afterward Mr. Earl received a call to join forces with the Willys-Overland Company, which necessitated Mr. Hendee reluctanctly getting back into harness.

"At the regular monthly meeting of the directors, held this day, July 25, the resignation of Mr. Hendee as president and director was tendered and accepted, and the following reso-

Digitized by Google

lution was passel: 'Resolved, That the directors with deep regret accept the resignation of George M. Hendee as president and director, and include in this vote an expression of their appreciation of his large service to this company and this community in upbuilding thoroughly and, with energy, integrity, generosity and foresight, from small beginnings, this great industry, indeed, the greatest of the motorcycle world.'

Mr. Hendee's retirement will be of great interest to manufacturers, but to the community where he has lived and won a brilliant success there is an added touch of romance. Mr. Hendee is not yet 50—though he will be in October—and he has made his "pile." Not so many years ago, it seems, he was a hero in the bicycling world, the king of the high wheel and a popular favorite. Springfield people know how he was able to capitalize sport and how, with the inventive genius of Oscar Hedstrom—now back again with the Hendee company—the motorcycle business was built up, first slowly, and finally with a rush that made it Springfield's leading manufacturing concern. It now has about 1,700 employes.

George M. Hendee

"John F. Alvord, president of the Torrington company, was elected president and director to fill the vacancy caused by Mr. Hendee's resignation.

Hinckley Resigns

"Charles N. Hinckley, secretary of the company for the past two years and a half, also handed in his resignation, which was also accepted, he having had offered to him an important position with the Willys-Overland Company."

Glad and Sorry

Mr. Hendee said on Tuesday that he was both glad and sorry to leave the company.

"For three years," he said, "I have been hoping that before I reached the age of 50 years I might retire from the great activities of the Hendee Manufacturing Company, and that I might in full enjoy my beautiful estate at Suffield. I do not mean by this that I intend to lie down and die, for such is very far from my mind, as I intend to keep very much alive and in touch with the times.

"It is with a great deal of regret and a great deal of pleasure that I lay down my connection with the company, the upbuilding of which has been my life work. I also have deep regret in leaving those who have been in our organization and who have always been so loyal to me and to the company. The pleasure comes from laying aside the heavy duties incumbent on the offices which I have held, and to devote myself to many pursuits which are not as arduous.

His Attractive Farm

"I am very much in love with my farm down in Suffield, and we are doing some interesting things there. We have a herd of about 70 Guernseys that cattle experts say are first class; we are growing alfalfa and the first cutting this year shows it to be a success. I have about 265 acres down there and I am going to get all the pleasure and value out of it I can." He added that he was glad to be able to sell his holdings advantageously and to step down and out with, he believed, the best of good wishes from every source.

Regarding the future of the company, he said, after referring to Mr. Alvord's fine abilities, "It is not the intent to make any radical changes in the management. Frank J. Weschler, treasurer and sales manager of the company, will no doubt find his duties considerably added to, and the other officials and members of the organization will no doubt remain. Oscar Hedstrom, who rejoined the forces on July 1, will still lend his strength on the mechanical end.

Outlook Is Fine

"The business of the company so far this fiscal year is far in excess of the business for the like period of last year, and the official showing made this year will unquestionably be very satisfactory. The models for 1917 are all decided upon and material purchased, and the outlook for 1917 is very bright, indeed. In fact, the outlook is better than it has been during the past two years."

The Hendee company preferred stock has lately been quoted at 97 bid, 99 asked. The common stock in the last two weeks has shown a marked rise. On July 11 the quotation was 23 bid, 27 asked. Tuesday they were 32 bid, 32½ asked.

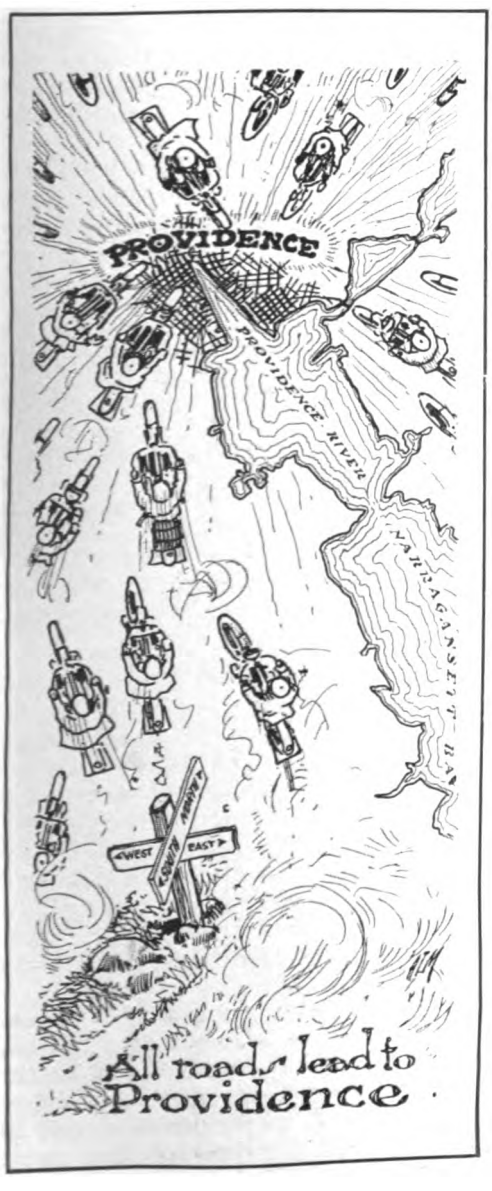
Running "off" the races in the lobby of the Crown Hotel.

CONVENTION RACES ARE CALLED OFF; PROVIDENCE SAUCER DECLARED UNSAFE AND F. A. M. SANCTION IS WITHDRAWN



"Plain Suicide to Let Out Big Twin on That Track," Says Red Parkhurst—And After Tryout Other Speedsters Refuse to Compete on Narragansett Speedway—Donovan Backs Up Speedsters' Stand

CONVENTION PROMOTERS ANGERED AT RIDERS' ATTITUDE

Insist That Speedway Is Safe and Want National Body to Refund $1,600 to Cover Loss from Abandoning Championship Events; More Than $500 Tied Up in Prizes—Rumor That Titular Races May Be Staged at Boston or Sheepshead

F. A. M. HEADQUARTERS, Providence, R. I., July 26.—Unexpected developments on the racing salient of the first line Federation trenches, taking the form of a refusal by the professional speedmen to compete on the Narragansett Speedway because they believed it unsafe for high-powered motors, upset all the plans of the headquarters' staff today and forced the abandonment of the F. A. M. championship meet scheduled for this afternoon. The racers were supported in their stand by Competition Chairman John L. Donovan, who decided, after a formal inspection of the track, that the objections were justified.

Competition Committee Firm

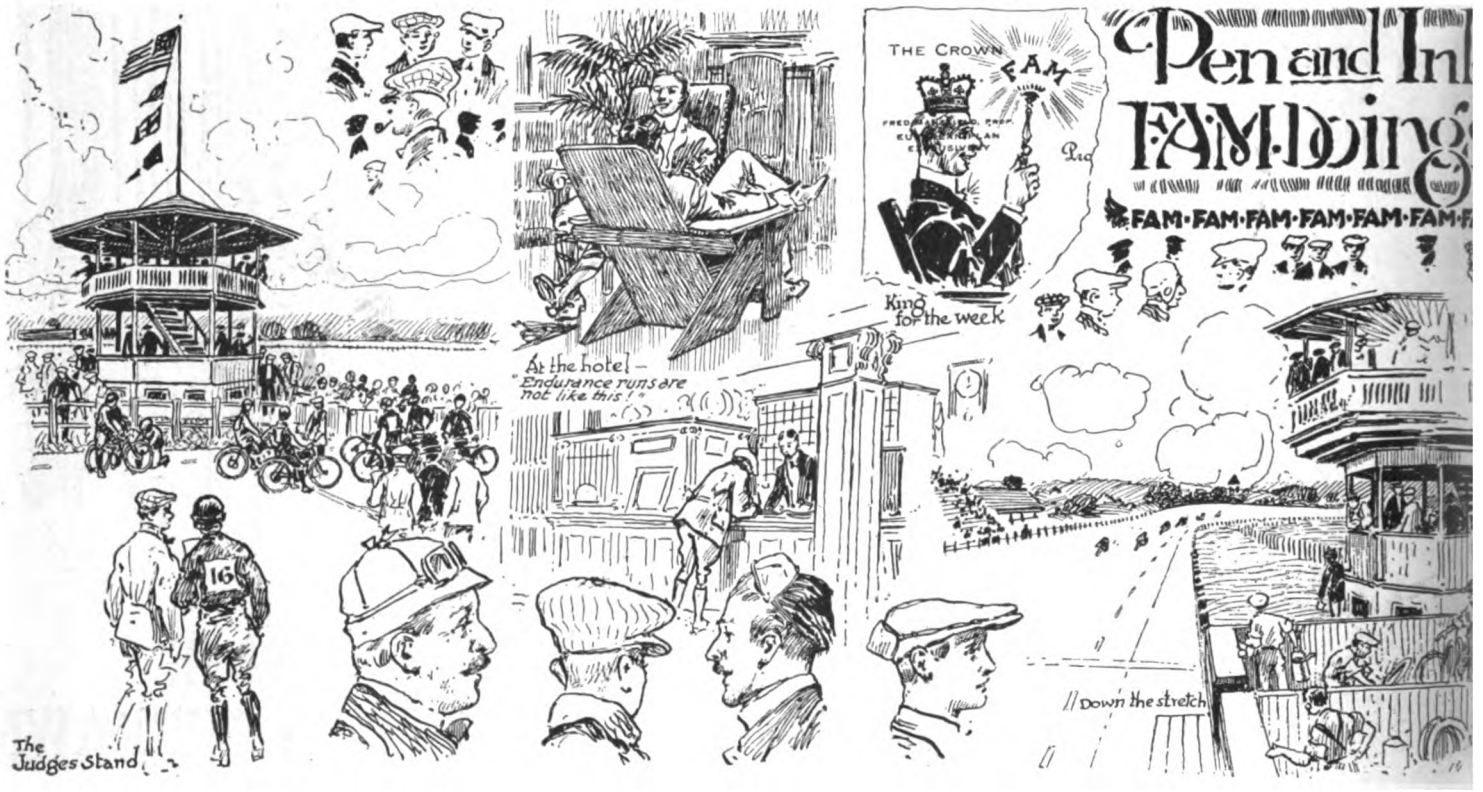
Sporadic skirmishing in the lobby of the Crown Hotel and vicinity is still relieving the tedium of the front line conventionites as this is written, but the F. A. M. competition committee remained firm and has consolidated its position. There will be no championship races under F. A. M. sanction on the Narragansett Speedway in connection with the present convention. So much for the war news.

Riders Hold Conference

A rumor that some of the best known speedmen present feared the consequences of using high powered motors on the Narragansett track gained circulation yesterday afternoon, and last evening a meeting of the racing men and some factory representatives was held. The racers attending the conference were: Don John, Ray Creviston, Gene Walker, John Constant, Morty Graves and Ted Carroll, of the Indian camp; Bill Brier, "Red" Parkhurst and Ray Weishaar, of the Harley-Davidson speed squad, and Bob Perry and Glen Stokes, the Excelsior riders.

The factories were represented by Oscar Hedstrom, E. M. Jackson and J. A. Priest, of the Indian, and Arthur Davidson and Frank Rodger, of the Harley-Davidson. Legal Actions

Digitized by Google



Why Do the Speedway Scenes Predominate These Clever Pen Sketches When No Races Were Held?

Chairman William M. Johnson, director Jes. Campbell and B. A. Swenson were also present. The racers were unanimous in their statement that high speed work on the Narragansett track could be undertaken only at peril of life. They explained that the concrete bed of the track is quite rough and that both inside and outside fences around the course are so constructed as to invite disaster.

No Danger, Swenson Says

B. A. Swenson, chairman of the general convention committee, argued that races were successfully held on the track last fall and that the success could be repeated. He contended that good racing could be provided on the speedway without letting the big twins out to the full and that the riders would thus be in no danger. A number of Providence riders supported Chairman Swenson in this claim.

Before last night's meeting was over it was practically decided that the championships were off, so far as the Narragansett Speedway was concerned, and a second meeting this morning clinched the matter. The matter came to a head when Arthur Davidson turned to Ray Weishaar and asked:

Harley-Davidsons Withdrawn

"Do you feel that you are going to be hurt if you ride at speed on that track?"

"I certainly do," answered Weishaar.

"That settles our end of it," said Mr. Davidson. "I now withdraw the Harley-Davidson racing team."

The Excelsior riders, Perry and Stokes, also withdrew at this time. It was unnecessary for the Indian representatives to go on record formally, as the withdrawal of the Excelsior and Harley-Davidson racers had eliminated the element of competition.

Chairman Swenson vehemently objected to the attitude of the racers, and insisted this morning that races would be held this afternoin. Referee Donovan then announced that any such contests would be without F. A. M. sanction. Mr. Swenson then demanded a written withdrawal of the sanction, and in the discussion which followed, it developed that the actual sanction papers had not been turned over to Swenson. This was only one of a dozen interesting twists that the situation took in the course of the next few hours.

$500 in Prizes Tied Up

Swenson called attention to the fact that something like $500 had been spent for race prizes, and that other expenses had been incurred by the convention committee. He stated that he would expect the F. A. M. to refund $1,600 to cover the loss that would be occasioned by the abandonment of the championship races. Legal Actions Chairman Johnson assured Mr. Swenson that his rights would be fully considered later.

About 4 o'clock this afternoon an attorney representing the convention committee held a conference with Legal Actions Chairman Johnson. He was told that the F. A. M. felt morally compelled to call off the races and that the matter of finances would be taken up in due time. One of a dozen reports now circulating through the crowd is that a suit for $25,000 against the F. A. M. is contemplated. But this is not taken seriously.

Skillful Riding—That's All

When requested to state his position, Mr. Swenson told the staff representative of **Motor Cycle Illustrated** that he was absolutely sure that the races could be conducted on the Narragansett Speedway with no more danger than on any other track, but that skillful riding rather than

Digitized by Google

Well, Everybody Talked Racing and a Few Speed Trials Were Staged on Tuesday. And That Was Enough!

headlong speed would be required, which arrangement did not satisfy some of the racing men.

Still Would Hold Races

"I have been the means of bringing a big crowd to Providence to witness races on a track which I believe to be safe," said Mr. Swenson, "and if it is in any way possible I am going to hold races. I do not feel that I am getting a fair deal in this matter, and I plan to get some of the best local speedsters together and put on a program tomorrow (Thursday)."

After visiting the track with Directors Johnson, Campbell and Holton and several factory representatives, Chairman Donovan called a meeting of the F. A. M. directors, sitting as the competition committee. Directors Daentz, Ash, Hunt and Castle were represented by proxy. Only Director Pixley's vote was lacking. The committee made its decision as follows:

"After consideration and discussion the action of the referee was unanimously sustained and the refusal of the riders to compete was justified by the board of directors sitting as a competition committee."

Those Refusing to Ride

The statement of racers was presented to the committee, signed by the following: Ray Creviston, Glen Stokes, Ray Weshaar, Bob Perry, Morty Graves, Edward Carroll, L. E. Parkhurst, S. Dean, William Brier, Don Johns and Gene Walker. They summed up their objections by saying: "We know it (the track) to be unsafe at high rate of speed."

There has been some talk of taking the F. A. M. championships to the Readville track, near Boston, and the Sheepshead Bay Speedway has also been considered for a future date. There are strong indications tonight, however, that no sanctioned championship races will be held in connection with the convention.

Narragansett Speedway is slightly banked at the outer edge, and both inside and outside fences are built of six-inch poles, on which railroad irons have been used instead of wooden rails.

"It would be just plain suicide to let out a big twin on that track," said "Red" Parkhurst after making several tryouts.

"If we race on that track someone is almost certain to be badly hurt," was Ray Creviston's comment.

"An attempt to make a mile in less than fifty seconds on the Narragansett Speedway would be almost sure to mean a smash," declared Bob Perry.

MANY DELEGATES SIGN AT HEADQUARTERS

PROVIDENCE, July 26.—The delegates who have registered with Secretary G. B. Gibson and received credentials up to noon on Wednesday are as follows:

Ernest Broadbent, Attleboro, Mass.; Irving W. Barnard, New York City; F. S. Smith, Waterbury, Conn.; Axel Anderson, Waterbury, Conn.; J. S. Seidell, Central Kansas M. C., Ellsworth, Kan.; J. U. Constant, Brooklyn, N. Y.; G. B. G. Pompeji, Motorcycle Club of Philadelphia, Pa.; E. B. Holton, Newark, N. J., St. F. A. M. commissioner; Alexis Waldrow, Blackstone Valley M. C., Blackstone, Mass.; Fred Carr and Director Wm. M. Johnson, Chicago; Gene Coughlin, Crotona M. C., Bronx, N. Y.; William Miller and George Fassberger, Bronx Co. M. C., Bronx, N. Y.; F. P. Doyle, New Jersey M. C., Newark, N. J.; P. N. Stevens and W. H. Bergfels, N. J. M. C., Newark, N. J.; I. A. Foizie, Berkshire County, Mass.; C. W. Waughop, N. J. M. C., Newark, N. J.

MOVE TO PUT F. A. M. ON SOLID FOOTING; REJUVENATION PLANS LAID AT CONVENTION

Want to Consolidate Offices to Increase Efficiency and Minimize Expenses—Strong State Organizations Necessary —Advocate Closer Co-operation With Trade Bodies and Dealers—Would Exercise Political Power of Motorcyclists and Boost Touring and Good Roads Movement

F. A. M. headquarters, Providence, July 27.—Looming significantly above all other developments of the present F. A. M. Convention is the fact that the National organization has reached a stage in its career at which definite and far-reaching plans along reconstructive lines must be acted upon, and such plans are in hand. The outgoing officers have submitted for the consideration of the Federation a series of suggestions, based upon experience gained during the past term, and designed to bring about a number of innovations in addition to improving the organization features already operative.

The suggestions and recommendations referred to were talked over at length in a conference at which President A. B. Coffman, and Directors William M. Johnson, Jos. Campbell and E. B. Holton were present. Directors Gus Castle, W. J. Ash and F. L. Hunt were represented by proxy, and Director C. F. Pixley's vote was the only one not accounted for.

Following are the plans suggested for application in the nation-wide campaign of F. A. M. reconstruction and advancement, which is now being launched:

1. Consolidation of the F. A. M. offices as far as can be made possible, with the view of increasing efficiency and at the same time minimizing expense.

Part of Fee for State Unit

2. Starting of a national movement for State F. A. M. organizations. It is the conviction of the out-going officers that a solid national body cannot be obtained without carefully operated State organizations. In this connection it is suggested that the initial membership fee remain $2, with the understanding that $1 in each instance shall go to the support of the State organization.

3. More systematic work along membership lines, with special emphasis placed upon bringing in all motorcycle dealers. It is pointed out that the aid of the Motorcycle Manufacturers' Association can be solicited to good effect in this work.

F. A. M. Highway Department

4. Co-operation of the F. A. M. highway department with all good roads movements, and arrangements to observe and report on road conditions and prospective improvements. The work of this committee would also involve keeping in touch with appropriations for road improvements to see that money intended for highways is apportioned properly as intended by the acts and laws of the various States, which apply registration and license fees of motorcyclists to highway improvements. The F. A. M. highway department exists at present, but has been inactive.

5. The extension of the scope of the touring department so that touring will be systematically fostered in every way possible, in addition to furnishing road data, maps, etc., the touring department at present, because of its limited facilities, does not attempt to do anything more than furnish road information.

6. A plan to exercise the political power of motorcyclists so that constructive results can be obtained. Attention is called to the case of Rhode Island, where a five-dollar sidecar registration fee recently became effective. The last election was carried by only about 950 votes, and there are 1,500 motorcyclists in the State. Co-operative work by the riders could have defeated the political party which has since proved antagonistic to motorists.

Advocate Advisory Board

7. The organization of an advisory board to be made up impartially from representatives of the various interests affected, whereby the F. A. M. president may put in force any necessary plans to meet emergencies, or to further the interests of the federation, under circumstances which may arise between annual conventions.

8. Less red tape concerning membership applications. The wish to unite with the F. A. M., accompanied by the fee, is all that ought to be required. At present the application blanks are supposed to be signed by two vouchers for the applicant.

9. An arrangement by which the M. M. A. can effectively co-operate with the national competition committee, with a view of placing racing on a more satisfactory and controllable basis.

10. The launching of a campaign of education by the legal actions' committee to acquaint motorcyclists with the laws and regulations of the various States, and to emphasize particularly the necessity for observing speed rules.

12. A movement for cleaner machines and neater riders on the road, and for the proper observance of all rules which will help to impress the general public favorably, and to guarantee reasonable treatment of other road users.

Dealers as Recruiting Sergeants

13. Dealers to be requested to keep a stock of F. A. M. literature on hand at all times, and to make a strong effort to bring into the federation ranks each new purchaser of a motorcycle.

14. A systematic effort to obtain better and broader publicity for the F. A. M. through co-operation of the trade, in return for the excellent publicity given the general industry by F. A. M. activities.

These suggestions were drawn up by Director Johnson, with the approval of the other officers in attendance, and were submitted by him in the general convention.

"I have received the checkered flag at last," wired Carl F. Goudy to Bob Perry, by way of announcing his marriage to Miss Hazel Bane, of Fairbury, Ill., Carl's old home. The ceremony was performed at the Hotel Congress, Chicago, on Tuesday, with Frank Schwinn as best man. Mr. and Mrs. Goudy are leaving for San Diego, where Carl conducts the Excelsior agency. "No more racing for me," asserted the new Benedict in his telegram to Perry.

A. B. Coffman, flashing sparks of F. A. M. enthusiasm as usual, and with a dozen ideas up his sleeve for the advancement of the national organization, was an early arrival. Mr. Coffman is so busy in other directions that he will be mighty glad to turn over the executive chair to some one else, but he has made it plain that he can be counted upon to continue the general boosting work that has made him a national figure.

NOVEL SCHEMES FOR INCREASING F. A. M. RANKS

Many Clever Suggestions Made by Delegates—Hold Informal Meeting to Thrash Out Subjects of Vital Importance to National Organization

F. A. M. HEADQUARTERS, Providence, July 26.—Just a forerunner of the things that are to be spilled at the first, last and only business session of the F. A. M., to be held in Providence during the present convention, was brought out at a more or less informal meeting of the delegates tonight for the purpose of mapping a course to be followed in the business meeting tomorrow morning, so as to expedite matters and eliminate the details and discussions which prevent the accomplishment of real work. The net result of the meeting held in the convention room of the Crown hotel tonight was the appointment of a committee of nine to confer with a committee of motorcycle manufacturers and map out a course for straightening the tightening affairs of the F. A. M. at once, and decide upon a line of action to be followed in the future, which will result in a bigger, a more prosperous organization.

Aside from the several recommendations to be made by the outgoing officers to their successors, which were touched on lightly by legal action chairman Johnson, several other plans for increasing the organization membership and usefulness were broached, the most promising being set forth by Stewart Slosson of the Firestone Tire & Rubber Co., who suggested that the body make some sort of an agreement with an insurance company whereby members coming into the association will receive insurance at attractive rates, a plan, which, if followed to its logical ends, cannot fail to influence membership. Mr. Slosson's idea, and he quoted figures to substantiate it, was that fully 90 per cent. of the machines sold are used not for pleasure riding, but for utility purposes, and that the F. A. M. in its present state held out little of interest to this particular class of riders. With the insurance as an attraction, however, these riders could easily be brought into the fold.

C. W. Waughop, of the Cleveland, suggested that the manufacturers come to some arrangement whereby each purchaser of a motorcycle will automatically become a member of the body, and pointed out that the cost of such a policy would amount to only four cents for each new F. A. M. member to every member of the newly formed Motorcycle and Allied Trades' Association, provided that body could be induced to foot the bill.

Jes Campbell, of the Harley-Davidson, suggested reorganization which would vest all of the detail work in a paid business manager, and centralize the officers to eliminate expense to a greater or less degree. Gene Coughlan, the Bronx, New York, Harley-Davidson dealer, suggested the proposition of adopting means to induce all dealers to join the ranks be put up to the motorcycle manufacturers. Coughlan also suggested that if the dealers, by agreement or otherwise, were relieved of the burden of paying the freight charges on their machines, making the pur-

FIFTY-FOUR COME IN WITH TOURMASTERS

Solo and Sidecar Men Ride to Convention From Many Sections With Quartet of Picked Road Captains—What Happened to Various Squads

PROVIDENCE, R. I., July 25—If saneness and neatness, quietness and good fellowship are the qualities of a motorcycle tour which go toward popularizing the motorcycle, then the four tours which bore down on this city this afternoon in connection with the fourteenth annual convention of the F. A. M. are, without doubt, the greatest little boosters ever. All told, in the four tours there were 54 riders from all four quarters of the continent, and among the number there was scarcely a single one who, as to appearance and conduct, did not do the sport proud.

Forty Come From West

About forty riders came out of the West this afternoon at half after one; they were the main body of the merged Southern and Western tours under the respective leaderships of E. B. Holton, of Newark, N. J., and E. R. Durkee, of Milwaukee, Wis. A few minutes after they checked in at the Crown and parked their machines along all sides of the hotel, Jess Campbell led in his following from the New England States. About half-past four this afternoon the "elite" section of the Southern tour pulled up to the convention headquarters after having spent an hour or so "dolling up" on the outskirts of the city, only to find that the diamond medals which were the contributing cause of the sudden epidemic of neatness, had already been won and walked away with.

Southern Tourists Few

The Southern tour, with Holton on a Cleveland at its head, and C. W. Waughop on a lightweight of the same make serving as lieutenant, pulled out from Newark on Monday morning at 9 o'clock six strong. The other members of the party were Wm. Bergfels, of Jersey City, on a Cleveland; Frank P. Doyle, of Short Hills, N. J., on a Harley-Davidson; August Charton, of Newark, on a Harley-Davidson, and Guido Pompep, of Philadelphia, who balanced his 200 pounds of beef on a yellow Flying Merkel. The number was swelled to eight at Columbus Circle, New York, when Mr. and Mrs. E. F. Hallock, on an Indian and Rogers sidecar combination, joined the ranks, and the party proceeded with considerable expedition to Greenwich, where George Barnes, the Harley-Davidson dealer, joined the party.

Many Loose Punctures

Hallock and Waughop gathered in all the loose punctures on the Boston road throughout the first day and kept the remainder of the party busy keeping track of the lost minutes resulting from the tire trouble, and figuring how far behind schedule their supper hour at Springfield was going to be. The party reached Springfield at half-past eight on Monday evening, and learned that the Western tour, seven strong, had gotten there on time and snatched up all the Hendee hospitality that was released that night, which same hospitality comprised a good square meal and a trip about town on the latter, of which the Western tourists were occupied on the arrival of the Southernites.

With Durkee's Bunch

The Western tour left Buffalo on Sunday morning, with E. R. Durkee on a Harley-Davidson sidecar combination, with Albert H. Peters as passenger, at the head of the procession. The lieutenant and all-around slavey for the party showed up in the person of Louis F. Bradburn, who carted the luggage on his Harley-Davidson sidecar—which same generous act cost him the diamond medal for the neatest rider in the sidecar division—and took care of all the little details incidental to the trip, such as looking up the "eats" and scrubbing the tar from the surface of the newly tarred roads. A. R. Windemuth, of Cumberland, Md., also astride a Harley-Davidson, completed the original party which was not augmented. Pittsfield, Mass., was reached on Monday, when James A. Foize and M. F. Fitch, on Harley-Davidsons, fell in line. At this point, too, F. S. Smith, who has Waterbury painted behind his initials on his suit-case, attached himself to the party.

Westerners Reach Springfield

The Western tour reached Springfield at five o'clock on Monday, and together the tours started for Providence this morning from Armory Park, taking on a lot of new recruits at the Indian factory, which was reached just a couple of minutes after the start. This little thoughtfulness on the part of the Wigwam folk, which was extended to everyone in the tour regardless of the nameplate on his machine, was deeply appreciated by everyone connected with the tour. At the Indian plant, too, the party was lined up against the curb while the chief wigwam snapshot artist pulled a camera-trigger on them.

More Tire Trouble

The road from Springfield to Palmer proved rough going, and the same sort of jinx which affected Waughop's tires the day before began early to get in his good work, with the result that practically all of the folks who had come in on the Southern tour stopped up to aid Waughop in changing his shoe and became separated from the main body and did not again meet up with them. From Palmer into Worcester the roads were of the unbeatable sort, and the riders made exceptionally fine time, but from that point right on into Providence the poor stretched, including one five-mile detour, that for pure badness should have been ashamed of itself, outnumbered the good ones in the proportion of about three to one, the tour partook of the nature of an endurance run, and August Charton of Newark sprung a good one by pulling a "secret control" on the party on a blind section of the road. While under these conditions nothing exceptional in the way of speed could be expected from a party of tourists; for the most part the party lived up to the 18-mile-an-hour schedule, and those who straggled into Providence after the main party were few and far between, with the exception of Holton's Southern tourists, who, as was said before, became detached early in the morning.

Sunset House, North Conway, N. H., Where the Endurance Riders from Albany Stopped Over After the First Day's Trip

Party Grows En Route

The party was considerably augmented along the route, each city providing its quota of riders, and riders from nearby cities, Worcester alone bringing in a detachment of about a score. When Providence was reached, or at least the outskirts of it, the diamond medal seekers sought out the roadside garages and bent to the shining up task; and that completed, "dolled up" a bit themselves before final judgment was passed. The entry of the party into the city with the riders clean and the machines cleaner was both auspicious and impressive, and folks here are fully agreed that for boosting motorcycling and allaying prejudice against the motorcycle, the "tour's the thing." Those who came in with the tours are:

PRIZES AWARDED FOR NEATEST F. A. M. TOURISTS

A. R. Windemuth, of Cumberland, Md., With Mileage of 876, Is Winner in Solo Division; Mr. and Mrs. C. C. Jordan, of Portland, Me., Receive Sidecar Decision; Many Honorable Mentions

PROVIDENCE, July 25.—F. A. M. riders who participated in the official tours to the National Convention found Providence bunting-decked and expectant when they rolled into the city this afternoon. Crowds began to line the curbs when the first motors appeared, and as soon as the leaders had come to rest at the Crown Hotel, the convention headquarters, throngs of eager questioners surrounded the newcomers. Those who formally entered the tours did not number over seventy-five, by far the greater number of rider-visitors having made arrangements to travel individually or in small unofficial parties.

Committee Judges Riders

Immediately upon the arrival of the main body of tourists a committee composed of President A. B. Coffman, Legal Action Chairman William M. Johnson and J. H. Donehue, Editor of **Motor Cycle Illustrated,** was named to pass upon the neatness and general fitness of the riders and motors that had completed the tours. This was a task that kept the committee steadily at work for several hours, with new arrivals cropping up to claim attention from time to time.

The awards were finally made as follows: To A. R. Windemuth, of Cumberland, Md., for the best-appearing solo outfit; to Mr. and Mrs. Clifford C. Jordan, of Portland, Me., for the neatest sidecar combination. Windemuth had 876 miles to his credit, and Mr. and Mrs. Jordan had covered 175 miles. Both winners piloted Harley-Davidsons. The general committee has announced that these riders will receive special medals.

The distance covered by a contestant naturally had a vital bearing upon the awards, and quite a number of bright and attractive sidecar and solo outfits could be given only passing mention because their mileages on the tour were comparatively low.

Given Honorable Mention

Honorable mention was given to Mr. and Mrs. Charles Latterman, of Park Ridge, N. J. They had traveled 340 miles with their Harley-Davidson combination since leaving home, but were credited only with the distance covered after joining the official tour. They joined at Boston, and could therefore lay claim to only 47 miles under the rules of the contest.

The spotless Indian sidecar combination of Mr. and Mrs. A. G. Gruendler, of Springfield, Mass., attracted much attention but the comparatively low mileage covered prevented the committee from giving anything more substantial than an honorable mention to the outfit.

L. F. Bradburn, of Canandiagua, N. Y., also received honorable mention for his showing of 425 miles with a Harley-Davidson combination. The fact that he was carrying suitcases and other luggage in his sidecar instead of a passenger, when the committee made its rounds, deprived him of his chance at the sidecar prize.

Guido G. F. Pompeji, of Philadelphia, Pa., with a Flying Merkel, made a strong mileage showing but had collected considerable dust along the route. He had 342 miles on his speedometer, and only his coating of dust kept him from being a serious contender for the prize. He was given honorable mention for his heavy mileage.

Axel Anderson, of Waterbury, Conn., with his solo Indian, also figured among the honorable mentions. He had covered the 160 miles from Waterbury to the convention city with very few marks of travel.

Two Cygnet Rear Cars, attached to Indian motorcycles, were included in the main body of tourists. One of the outfits carried A. F. Waldo, Walter Ranson and James McCauley, with Waldo in the saddle. The other Cygnet combination was piloted by Neil H. Rand, who had Mrs. Rand and Miss Margaret Smith as passengers. Both outfits made a good appearance, but out of courtesy to the ladies the Waldo party requested that the special mention by the judges be given to the Rand party. Both of these parties joined the western tour at Worcester, Mass.

E. R. Durkee and A. H. Peters, with a Harley-Davidson combination, had traveled from Pittsburg to Buffalo and thence to Providence, piling up a mileage of 754. Their factory connection, however, kept them out of the list of contenders for the prize, as it had been decided to eliminate factory travelers in order that other riders need not be subjected to trade competition.

The New York delegation was represented in the neatness contest by Fred C. Kiser and Irving W. Barnard. They used an Indian combination and covered 268 miles. It had been pretty dusty on the way up, however, and—well, they were just travel-stained enough to lose out.

Three Year Old Mascot

William H. Smith, of Worcester, Mass., attracted considerable attention because his sidecar carried a mascot in the person of three-year-old Francis Smith. Smith piloted an Indian combination and covered miles.

Fred A. Carr, of Blackstone, Mass., received honorable mention for the smart appearance of his Indian tandem mount, on which he had Warren Ramsey as passenger. Pilot, passenger and mount were quite spick and span after their 75-mile trip.

Morton C. Madison and Joseph Bartlett, both of Blackstone, Mass., and Arthur Jacobs, of Woonsocket, Mass., rode Indian Featherweights to Providence, accompanying the Blackstone Valley M. C.

The Blackstone Valley M. C., captained by Arthur Ellison, of Uxbridge, Mass., brought the highest percentage of its members to the convention city, and is to receive a reward. This club had 27 riders in its party.

Mrs. E. F. Hallock, of Brooklyn, N. Y., was the only lady enthusiast to pilot a motor into Providence with the tourists. She whirled into the city with five-feet, eleven inches of her husband flapping idly from the sidecar, and scored quite a hit.

Mr. and Mrs. E. L. Brackett, of Worcester, Mass., rode in on an Indian tandem mount, Mrs. Brackett being the only lady tandem passenger to participate.

C. W. Waughop and E. B. Holton arrived on Cleveland lightweights with the New York and New Jersey party, having brought the little fellows through the tour alongside standard twins without a whimper.

FIFTY-FOUR COME IN WITH TOURMASTERS

(Continued from page 17)

E. B. Holton, Newark, N. J., Cleveland; C. W. Waughop, Newark, N. J., Cleveland; Wm. Bergfels, Jersey City, N. J., Cleveland; August Charton, Newark, N. J., Harley-Davidson; Frank P. Doyle, Short Hills, N. J., Harley-Davidson; E. F. Hallock, New York, Indian; Mrs. E. F. Hallock, New York, Indian; Guido Pompep, Philadelphia, Pa., Merkel; George Barnes, Greenwich, N. Y., Harley-Davidson; Irving W. Barnard, New York, Indian; Fred Kaiser, New York, Indian.

E. R. Durkee, Milwaukee, Wis., Harley-Davidson; A. H. Peters, Buffalo, N. Y., Harley-Davidson; A. R. Windermuth, Cumberland, Md., Harley-Davidson; L. F. Bradburn, Canandaigua, N. Y., Harley-Davidson; James A. Foize, Pittsfield, Mass., M. F. Fitch, Pittsfield, Mass., Harley-Davidson; F. S. Smith, Waterbury, Conn., Harley-Davidson; A. Anderson, Waterbury, Conn., Harley-Davidson; Howard Ramsey and Louise Ramsey, Uxbridge, Mass., Indian; Arthur Ellison, Worcester, Mass., Indian; Napoleon Boutotte, Worcester, Mass., Indian; Miss Elenor Brachet, Worcester, Mass., Indian; Alexis Waldo, Whitesville, Mass., Indian; Wm. H. Smith, Woonsocket, R. I., Indian; Mrs. Wm. H. Smith and Miss M. B. Smith, Woonsocket, R. I., Indian; Earl Seagrave, Woonsocket, R. I., Indian; Oscar Vands, Uxbridge, Mass., Indian; H. W. Ramsey, Uxbridge, Mass., Indian; Walter Ramsey, Uxbridge, Mass., Indian; H. Rand and Mrs. Rand, Northbridge, Mass., Indian; Wade B. Pheonx, Uxbridge, Mass., Indian; James M. Cauly, Uxbridge, Mass., Indian; Morton Matteson, Blackstone, Mass., Indian; L. E. Latelle, Uxbridge, Mass., Indian; Arthur Jacobs, Woonsocket, R. I., Indian; Ephrem Henley, Northbridge, Mass., Indian; Arthur Ellison, Uxbridge, Mass., Indian; Joseph Damour, Uxbridge, Mass., Indian.

Fred Carr, Blackstone, Mass., Indian; Chas. Cohen, Woonsocket, R. I., Indian; Eleon Brackett and Mrs. Brackett, Uxbridge, Mass., Indian; Mrs. N. Boutotte, Worcester, Mass., Indian; Joseph Bartlette, Mendon, Mass., Harley-Davidson; T. C. and Mrs. T. C. Babcock, Hadley, Mass., Harley-Davidson; A. F. Gruendler and Mrs. Gruendler, Springfield, Mass., Indian; Clifford and Mrs. Jordan, Portland, Me., Harley-Davidson; Cyrus Winch, Bangor, Me., Harley-Davidson; Victor Jorgenson, Bangor, Me., Harley-Davidson.

ENDURANCE RUN WAS GRAND SCENIC TOUR

560-Mile Two-Day Ride from Albany Proves Pleasant Long-Distance Event, Although It Rained at Intervals on the First Day—Sixteen Complete the Course

PROVIDENCE, R. I., July 25.—Take it from the fellows who went through—and there were sixteen who checked in here today at the finish—the 560-mile endurance run from Albany to this city was little more than a scenic tour. Aside from some steep gradients and one or two bad spots which rain converted into mud-wallows, it was mostly a ride through fine country, taking in five New England States.

Just Nineteen Start

Just nineteen of the hardiest riders which the motorcycle factories shelter awoke to the buzz of alarm clocks yesterday morning in the New York capital and checked out at 4 a. m. They rode through occasional rain-showers all day, and only three failed to sign the sheet at the Square tonight. And while the Plainville, Mass., check sheet has not yet reached Providence and final results are not determined, it looks as though most of the riders who succeeded in completing the run did not linger long enough enjoying the scenery to put any kind of a crimp in the 1,000 point scores they started out with.

ENDURANCE RUN ENTRY INTO PROVIDENCE

Upper, Checking Out at Finish of Endurance Run; Lower, First Squad of Endurance Riders to Arrive at Providence, Tuesday Afternoon

The following finished the run: Harvey Bernard and H. G. Heil, Indian sidecar; Iwin F. Jacobs, Indian solo; Erwin G. Baker, Indian solo; E. H. Tracy, Indian solo; R. L. Veazey, Indian solo; John Lang, Harley-Davidson solo; F. O. Brown and Marie Brown, Indian sidecar; H. B. Putnam, Harley-Davidson solo; C. E. De Long, Indian solo; O. G. Underhill, Harley-Davidson solo; H. S. Robinson, Indian solo; J. U. Constant and T. J. Sullivan, Indian sidecar. Underhill and Lang checked in late at a control, but the others are believed to have perfect scores, if the Plainville sheet shows no penalizations.

Joy Ride to Franklyn

Up to Franklin, N. H., which is 203 miles out of Albany, the trip proved so much in the way of a joy ride that none of the entrants were penalized even as much as a point for lateness or earliness at the controls. At that point, however, William Hausweller and John Lang, both astride Harley-Davidsons and who were endeavoring to keep each other's company, miscalculated on their time and checked in nine minutes late at the Franklin Garage where the control had been established.

Jinx Trails Howard O'Brien and Earl Armstrong

The bad luck jinx overtook Howard O'Brien of the Indian factory, who was piloting Earl Armstrong in his sidecar combination somewheres between Franklin and Profile, N. H., and the pair was missing when the other 17 signed the checking sheets in plain sight of the old gentleman on the mountainside. Just what put O'Brien and Armstrong out of the running and kept them out has not yet come to light, but it is whispered about that some accident or other resulted in a broken frame and it must have been with ill-concealed chagrin that the Indian parts department man realized that for once he was lacking an Indian essential.

Hausweller Retires

Something of the same sort, perhaps, resulted in the resignation of Hausweller on the Harley-Davidson, who was among the missing when North Conway, still in New Hampshire, and the night control was reached. Hausweller went bad somewheres near Crawford Notch and evidently did not get things righted again in time to continue in the run. The total day's run was 313.6 miles, speedometrically speaking, and the riders checked in beginning at 7:11 in the evening.

Long Trail for Final Day

Today's card called for the negotiation of some 244.4 miles, carrying the riders from North Conway through Portland, Portsmouth, Newburyport, Boston and Plainville to Providence. All the survivors checked in on time, except O. G. Underhill, Harley-Davidson, whose watch went back on him and caused him

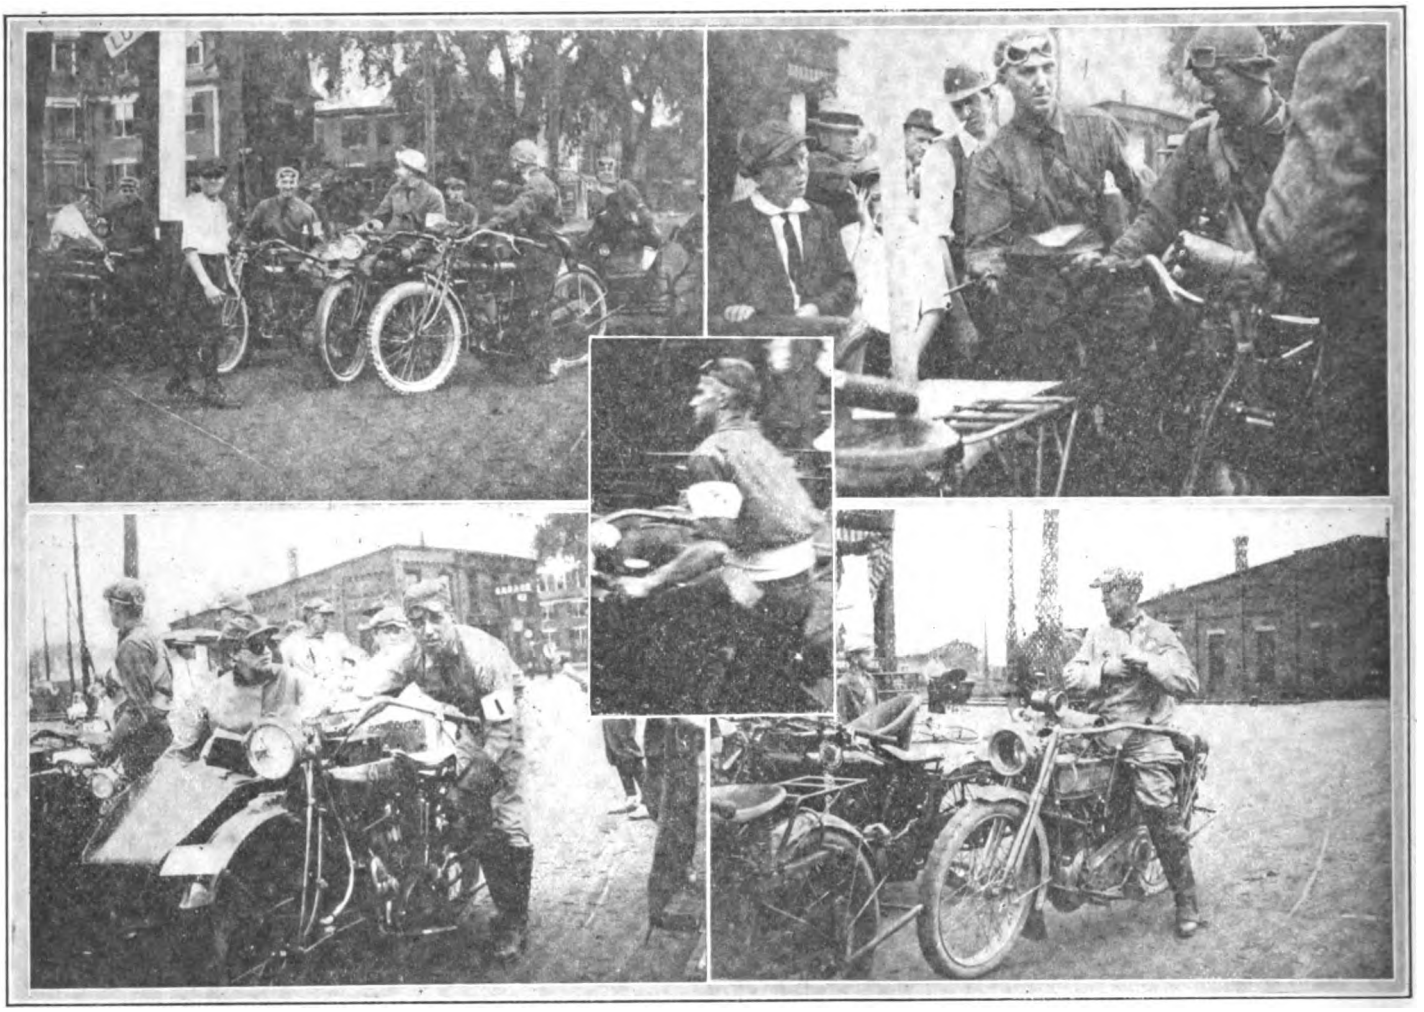
CONVENTION ENDURANCE RIDERS CHECKING AT KEENE, N. H.



Upper Left, Waiting Outside of Control Till Time Elapses; Right, E. G. Baker Signing Sheet While Iwin Jacobs Makes Sure Job Is Done Correctly; Lower Left, Mr. and Mrs. F. O. Brown, Ready to Start Toward Newport, Noon Control; Right, Hausweller, Looking Around After Checking Out; Center, Shooting Off From Keene to Make Up Lost Time

to check in three minutes late. All of the riders were on time at each of the other controls along the route, not including Plainville, which is still to be heard from.

Cards in Lieu of Maps

In lieu of road maps, which owing to some untimely delay were not forthcoming, the riders were provided with neat little cards naming the towns to be passed through in the correct order so as to obviate taking the wrong route. At Plainville, which is 15 miles out of Providence, the Convention Committee of Providence M. C. passed to each of the riders a card bearing the following:

"TO ENDURANCE RUN CONTESTANTS

"First, welcome to all. We are glad you got this far. Providence, R. I., is now but 15 miles further. We now ask you for the good of motorcycling from now on to keep your mufflers closed and be careful in passing through North Attleboro, Pawtucket and into the center of the city of Providence. Observe the traffic laws, do not pass trolley cars on the right while cars are stopped to take on or discharge passengers. Stop at once when a traffic officer signals you. Have proper regard for the rights of others and control yourself so as to be a credit to motorcycling."

Riders in Good Shape

All the riders finished in good condition and when the check sheets were signed, old Warhorse Baker took off enough time to cheerfully announce that this 560 miles made just 11,929 miles that he has reeled off. This included both motorcycle and automobile mileage, he said, and covered a period of five months without a puncture in his United States tires.

NOVEL SCHEMES TO INCREASE F. A. M. RANKS

(Continued from page 16A)

chasers foot the bill, most of them would be willing to make each buyer a member of the body for a year or more.

Chairman Johnson moved that a committee be appointed to confer with the manufacturers' committee, and consider all of the points raised, and upon being duly seconded and carried, President Coffman appointed Jes Campbell as chairman of the committee, with the following associates: Wm. M. Johnson, chairman legal action committee; H. S. Quine, Goodyear Tire and Rubber Co.; Al Bartsch, Bosch Magneto Co.; E. B. Holton, New Jersey F. A. M. commissioner; E. F. Hallock, secretary Motorcycle Manufacturers' Association; Stewart Slosson, Firestone Tire and Rubber Co.; R. F. Rodger, Harley-Davidson Motor Co.; A. B. Coffman, president F. A. M.

A committee comprising George Wagner, Rochester, and Gene Coughlan, New York, was selected to ask the motorcycle manufacturers' committee, then in session, whether the race meets were to be staged on some other track—perhaps Readville—and reported back that the manufacturers could see nothing but complete financial failure in such a course, but that the remainder of the convention program would be carried through.

DOVE PARTIES FORMED

The Ladies' Reception Committee, headed by Mrs. Cleveland Joslyn, is forming "dove parties" for such intervals as the men visitors are going stag, and a nice program has been laid out for the fair visitors. The committee consist of Mesdames Cleveland Joslyn, C. S. Joslyn, Edwards, Swenson, Lewis and Burlingame.

Convention Brevities

ADVERTISING MANAGER JOHN PRIEST and E. M. Jackson, of the Hendee Mfg. Co., were in the middle of the convention doings from the time of their arrival and devoted considerable time to conferences with Indian racing men. Johnny Constant, of Brooklyn, a veteran speedster of the Indian camp, was also in attendance at many of the impromptu meetings of the boys who chase the records.

"What do you think of Otto Walker winning that 100-mile race at La Grande, Ore., when he was full of splinters from head to foot, only three weeks ago?" inquired Bill Brier, of the Harley-Davidson speed squad. "Otto's a star and mighty modest; you have to hand it to him."

Incidentally, you have to hand it to Brier himself, for there are few better racing men in the country today, and it's practically impossible to make him discuss his accomplishments.

Stewart Slosson, the Firestone representative, stretched a big Firestone banner in colors across the corridor leading to the dining-room in the Crown Hotel, and then went off smiling. "That's the way to get 'em," he remarked. "Three times a day everybody will parade in the direction of the eats, and all hands must march under our banner as they go in." Which is just a mild way of suggesting that Slosson is not overlooking any bets. He is also passing out neat Firestone armbands —orange letters on a blue background.

Teddy Hastings, of the Indian factory, joined the squad of trade decorators Tuesday night and added effectively to the display in the Crown Hotel lobby by putting up several big Indian banners and a flock of pennants. The same Ted was in great demand when he started to pass out Indian match boxes.

George Shapcott and J. J. Hanse, of New York, and the local representatives of the United States Tire Co., served up an unusually attractive line of display cards featuring U. S. tires for the benefit of the conventionites, and also arranged to have a special window decoration in the Providence branch.

John L. Donovan, as busy and cherubic as ever, blew into the middle of a tough problem when he found the racing men objecting to competing on the Narragansett Speedway on his arrival. "The boys know their business, and if they are afraid of the track there must be good grounds for keeping the big machines off it," was his immediate decision.

C. F. Olin, of the New Departure Mfg. Co., breezed into official headquarters Wednesday morning, and as usual managed to combine business with pleasure. He had an appointment with H. S. Quine, of the Goodyear company, who arrived Wednesday afternoon.

No visitor at the convention was kept busier at handshaking than Oscar Hedstrom, whose return to the Indian camp has helped to give the convention headquarters something of the old-time F. A. M. atmosphere. "It feels mighty comfortable to see so many old friends all in one party," remarked the Springeld motor wizard, and while farming has its compensations, I think that active participation in manufacturing will afford me considerably more satisfaction."

Jack Cameron, of the Goodyear Tire & Rubber Company's staff, arrived Wednesday morning and put his O. K. on the display of snappy Goodyear posters which help to adorn the lobby of the Crown Hotel. In his few idle moments the redoubtable Jack was to be found booking opponents for the water polo and golf contests which will be among the features of the Cycle Parts convention in Atlantic City next week. "I want to get enough athletic competitors lined up to keep me busy at the seashore," was his explanation, "and it is only by booking 'em in bunches that I can be assured of real competition."

Mr. and Mrs. Morty Graves and Ray Creviston, accompanied by Don Johns, are found together as usual among the convention enthusiasts. After leaving Dodge City, the trio first named spent a week at Chicago and then a few days at Creviston's home at Lake Warwasee, Ind.

Jack Cameron, the man who can always be depended upon to talk a Blue Streak, G. E. Wood, Harley-Davidson distributor in the metropolitan district, "Babe" Buttlar, who flashed into popularity at Sheepshead Bay on July 4, A. W. Parry, of **Motor Cycle Illustrated,** and Captain H. A. Williams, of *Motorcycling*, reached the scene of convention activities early Wednesday morning, after anxious hours spent in watching the weather on the night boat from New York.

Secretary-Treasurer G. B. Gibson, assisted by Mrs. Gibson, opened his convention headquarters in rooms 107-108, at the Crown Hotel, and has been kept pretty busy receiving visiting riders.

E. R. Thomas, the Goodyear educational worker, who has been touring the country and lining up dealers' organizations, is among those very much present. Thomas has been doing a lot of remarkable things in the Middle West and predicts big improvements in the way of trade co-operation.

Arthur T. Merrick, staff artist for **Motor Cycle Illustrated** has set a new sartorial record for F. A. M. conventions. In addition to flashing out in his usual spotless garb he has been strolling into the lobby of the Crown Hotel with a different style of cap every three or four hours.

Frank Rodger, of the Harley-Davidson publicity department, came in as a sidecar passenger with the Western Tour. He hopped back from Dodge City, helped to put Milwaukee on the Preparedness map, caught up with three weeks' office work and packed his toothbrush for the Providence jump without even working up perspiration. Next stop, Atlantic City!

LA GRANDE TWO-DAY SPEEDFEST A BIG SUCCESS

Otto Walker and Keeney Share Stellar Limelight, With Chambers and Hollister Scoring Two Wins Apiece; Far Western Championship Goes to Walker in 100-Mile Event

By A. W. NELSON
(By Telegraph to Motor Cycle Illustrated)

LA GRANDE, Ore., July 23.—Otto Walker, mounting his Harley-Davidson, carried off the Far Western championship over the 100-mile route on the La Grande Speedway today, when he finished the century in 85 minutes 42⅘ seconds. J. Keeney, astride an Indian, crossed the line in second place in the 100-mile race, with Campbell, of Walla Walla, on a Harley-Davidson, third; Chambers, of Boise, on an Indian, fourth, and Hollister of La Grande, on a Harley-Davidson, fifth.

The two-day program, which was promoted by the La Grande Motor Club, opened yesterday with a free-for-all race at four and a half miles. Keeney, Indian, was first over the line in this event, with Otto Walker, Harley-Davidson, second. Iving Janke, winner of the Dodge City classic on July 4, and Walker's team mate in the La Grande program, had some trouble and did not finish. The winner's time was 3:16⅘.

The second event, at five miles, was for local riders (Walla Walla to Boise), and was won by Chambers, of Boise, on an Indian. Mills, of Walla Walla, was second on an Indian; Hollister, of La Grande, brought his Harley-Davidson through in third place, and "Red" Williams, Harley-Davidson, was fourth. Winner's time, 3:52½.

Chambers and his Indian captured the 10-mile event for Northwest riders, with Hollister, Harley-Davidson, second, and Rose, of Portland, on an Excelsior, third. Winner's time, 7:44⅕. Hollister finished a fifth of a second behind Chambers in this event, so the fans were treated to a fine finish.

In the time trials, Keeney, Indian, made the circuit in 1:03⅗, or an average of 83 miles per hour. Otto Walker piloted his Harley-Davidson around the track in 1:04⅘, or an average of 82 miles an hour.

In the Northwest Grand Prize race at fifty miles Hollister, the La Grande rider, went through on his Harley-Davidson in 46:20⅘, with "Red" Williams, Harley-Davidson, second in 48:11, and A. Williams, of Boise, on a Harley-Davidson, third in 48:36.

The racing on the second day (Sunday) opened with a five-mile event for local riders (Walla Walla to Boise). Hollister and his Harley-Davidson took first money in 3:49⅘. Mills, of Walla Walla, riding an Excelsior, was second, and Swartz, of Walla Walla, on a Harley-Davidson, third.

Keeney, on his Indian, took first money in the 10-mile free-for-all in 7:31⅕, with Otto Walker, Harley-Davidson, second. Irving Janke and his Harley-Davidson encountered the jinx for the second time during the meet, and Irving retired.

Otto Walker showed a flash of form again in the five-mile free-for-all, which he won in 3:38⅗. Keeney and his Indian were second over the tape, and Rose, of Portland, brought his Excelsior through in third position. In this race Walker averaged 83 miles an hour. Following this event came the 100-mile dash for the Far Western Championship.

KEEPING PACE WITH F. A. M. MEMBERSHIP

WESTBORO, MASS.—Harry E. Sechrist, of Harrisburg, Pa., who recommended an even 25 new members, walked off with the F. A. M. membership contest prize for the week ending July 8, and H. G. Ramsey, whose endeavors brought in 17 new members, earned the token for the week ending July 15, according to Secretary-treasurer G. B. Gibson.

Gibson also reports that during the past fortnight 141 new members have joined the F. A. M. fold, while 104 members have renewed. Included in this number are the members of one newly affiliated club, the Kansas City M. C. The Canton M. C. of Canton, Ohio, has reaffiliated.

The Hadfield-Swenson Co., 21 Myrtle street, New Britain, Conn., and D. M. Page, 338 West Fourth street, Williamsport, Conn., have registered as F. A. M. repair shops, swelling the total of official repair shops up to 1,244.

CINCINNATI IS OUT FOR 1917 F. A. M. MEET

WESTBORO, Mass.—Secretary-Treasurer G. B. Gibson, of the F. A. M., reports receiving an offer from the Chamber of Commerce, Hotel Men's Association, and Mayor of Cincinnati, O., for the 1917 F. A. M. meet. With the offer came a guarantee fund. The offer will be brought up formally at the business meetings of the F. A. M. in Providence this week.

INDIANA TRI-STATE COURSE A STIFF ONE

Route of 1916 State F. A. M. 24-Hour Run Has Fast Schedule and Severe Road Conditions—Five Classes Provided For—Valuable Prizes Offered

INDIANAPOLIS, Ind., July 24.—Entry blanks for the Tri-State 24-hour endurance run of the Indiana F. A. M., for August 12 and 13, have been issued and already a strong support for this classic is promised. This is the annual F. A. M. run for this State and, in the opinion of those who have organized the affair, will be a corker. In fact, Indiana Commissioner Jack Carr, who is back of the run, states that only the hardiest riders can hope to come through with a score which is unmarred, for the schedule is high and the run a severe test of man and machine.

Through Four States

This year's run will take in all the important cities in central Indiana, Ohio and Kentucky. The daytime schedule will be 24 miles per hour, while the night schedule will be 20 miles per hour. There will be checking stations at intervals of not more than 40 miles apart for the whole of the contest, and some of the checks will be as close as 20 miles between. There will be no secret checks.

Solo entrants will cover 434.2 miles. A special schedule and route will be laid out for sidecar and lightweight entrants. The course will be thoroughly marked with red and white painted figures. Officials will follow the run by automobile.

The start will be made from Indianapolis at 5 p. m. on August 12, and the first leg will be to Louisville, Ky., via Martinsville, Bloomington, Bedford, Salem, Jeffersonville and New Albany, the midnight control. After a rest of one hour the riders will start toward Cincinnati via Madison and Lawrenceburg Junction, with breakfast control at Cincinnati.

From Cincinnati the course will lead toward Indianapolis via Brockville, Newcastle and Muncie, with a control at the latter place. From Muncie the riders will go to Frankfort, then south through Lebanon and on to Indianapolis. The course will include [illegible] riding at night, sand plugging in [illegible]thern part of Indiana and in Ke[illegible] Finish will be at Soldiers and S[illegible]mment in this city at 5 p. m., A[illegible]

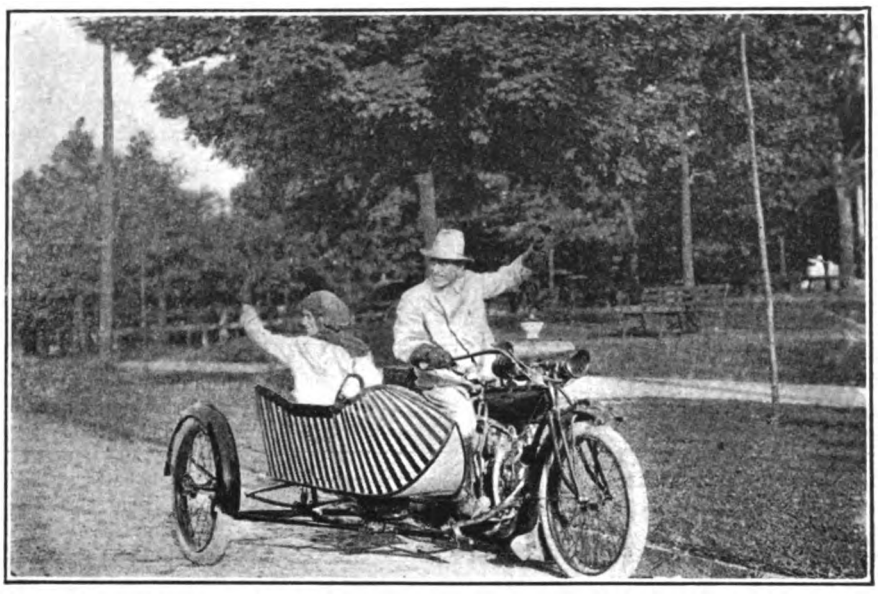
Cups and Medals

A [illegible]oving cup has been donated by the [illegible] States Tire Co. for the best fac[illegible]m performance. A diamond medal will be awarded to the highest individual medal and consistency scorer. Factory entries will be permitted to participate for this medal. Gold medals will be given to all perfect scorers, and bronze medals will be given to all riders finishing with medal scores of 950 or better. Merchandise awards will be given to all survivors of the run.

There will be five classes: A, factory teams, professional; B, profesional; C, amateur; D, sidecar (driver only competing); E, lightweights. Entry fees are: A, $10; B, $5; C, $3; D, $3; E, $3. Entries close on August 6. Address Jack Carr, Indiana F. A. M. Commissioner, 52 West New York street, Indianapolis.

Coincident with this run will be held the annual State convention of the Indiana F. A. M. at the rooms of the Consolidated M. C. in this city. The officers for 1917 will be elected at this meeting. At least 100 members will attend the convention. It is figured that Fred Dyer has a strong chance of becoming the next State Commissioner, since Jack Carr will not run for re-election, owing to pressure of business interests. There will probably be a number of "dark horses" in the field also.

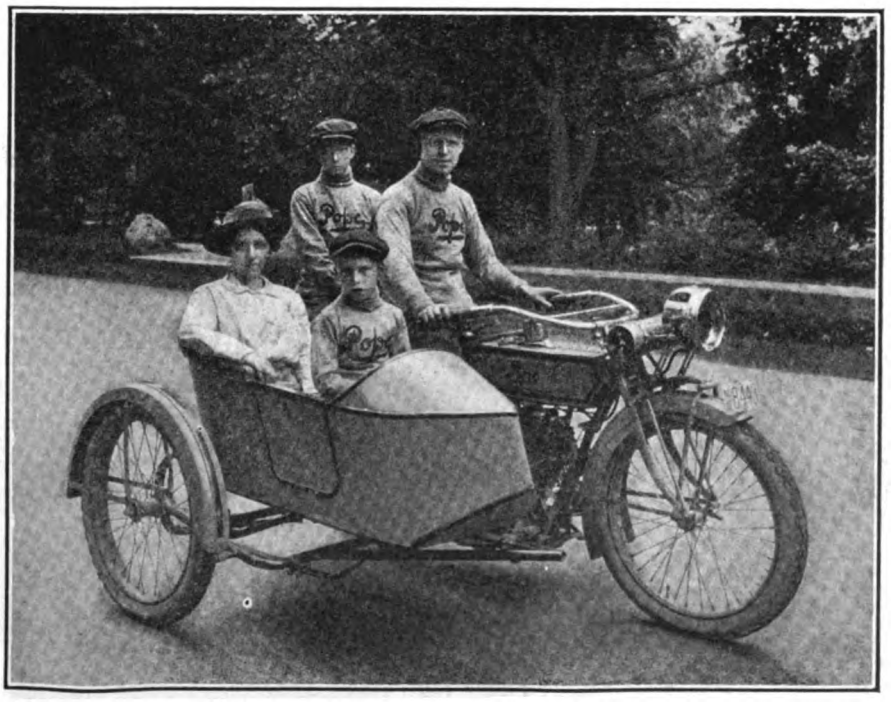
A STRIKING FLXIBLE SIDECAR OUTFIT



AN unusually attractive sidecar finish, which is suggestive of the higher grade English models, has just been applied to a Flxible sidecar body which will be used by L. E. Fowler, one of the travelers for the Flxible Sidecar Company, who is now covering the eastern States and closing up a lot of fat orders. The Fowler outfit follows the general lines of the standard Flxible products.

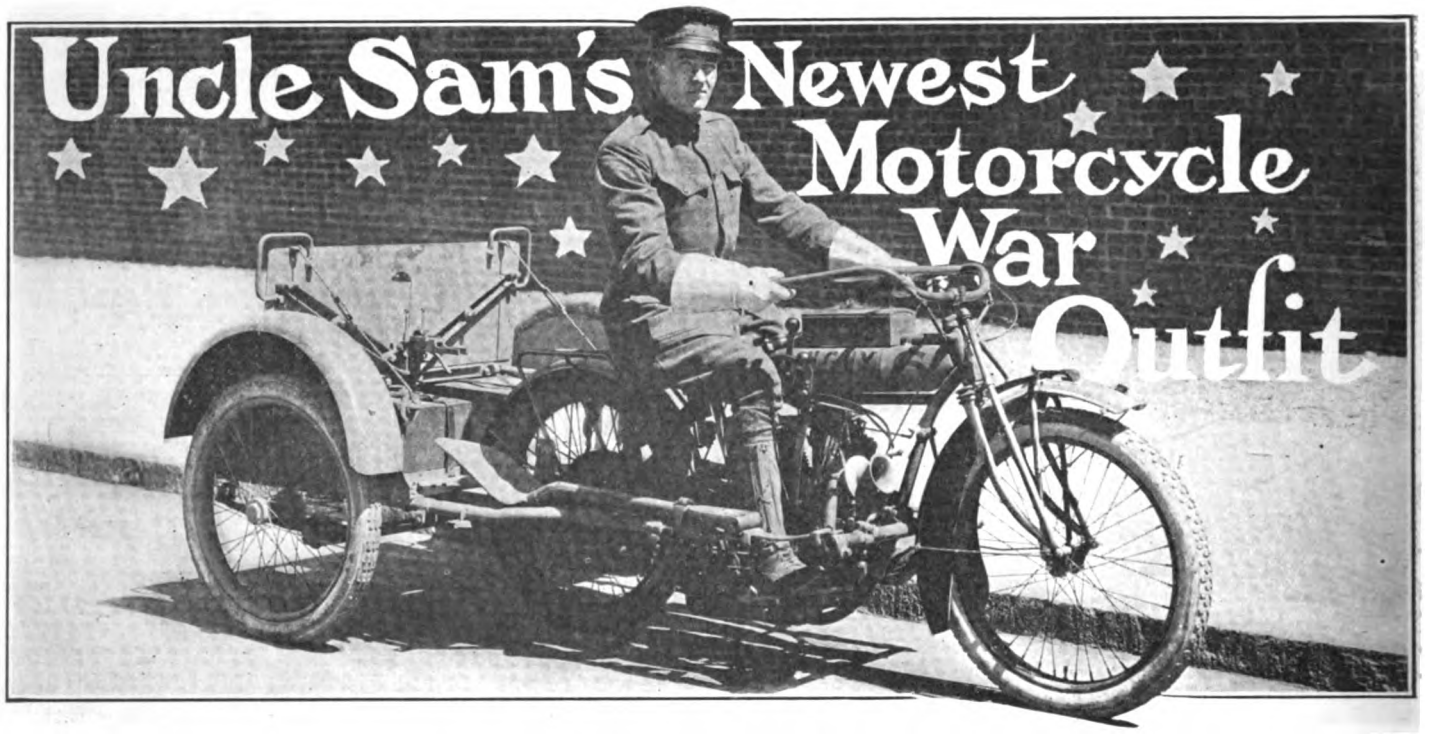
The Flxible company now has its 1917 model ready, and Mr. Fowler and other Flxible travelers are experiencing no difficulty in signing up dealers.

STRONG POPE ENTHUSIASM IN THIS FAMILY



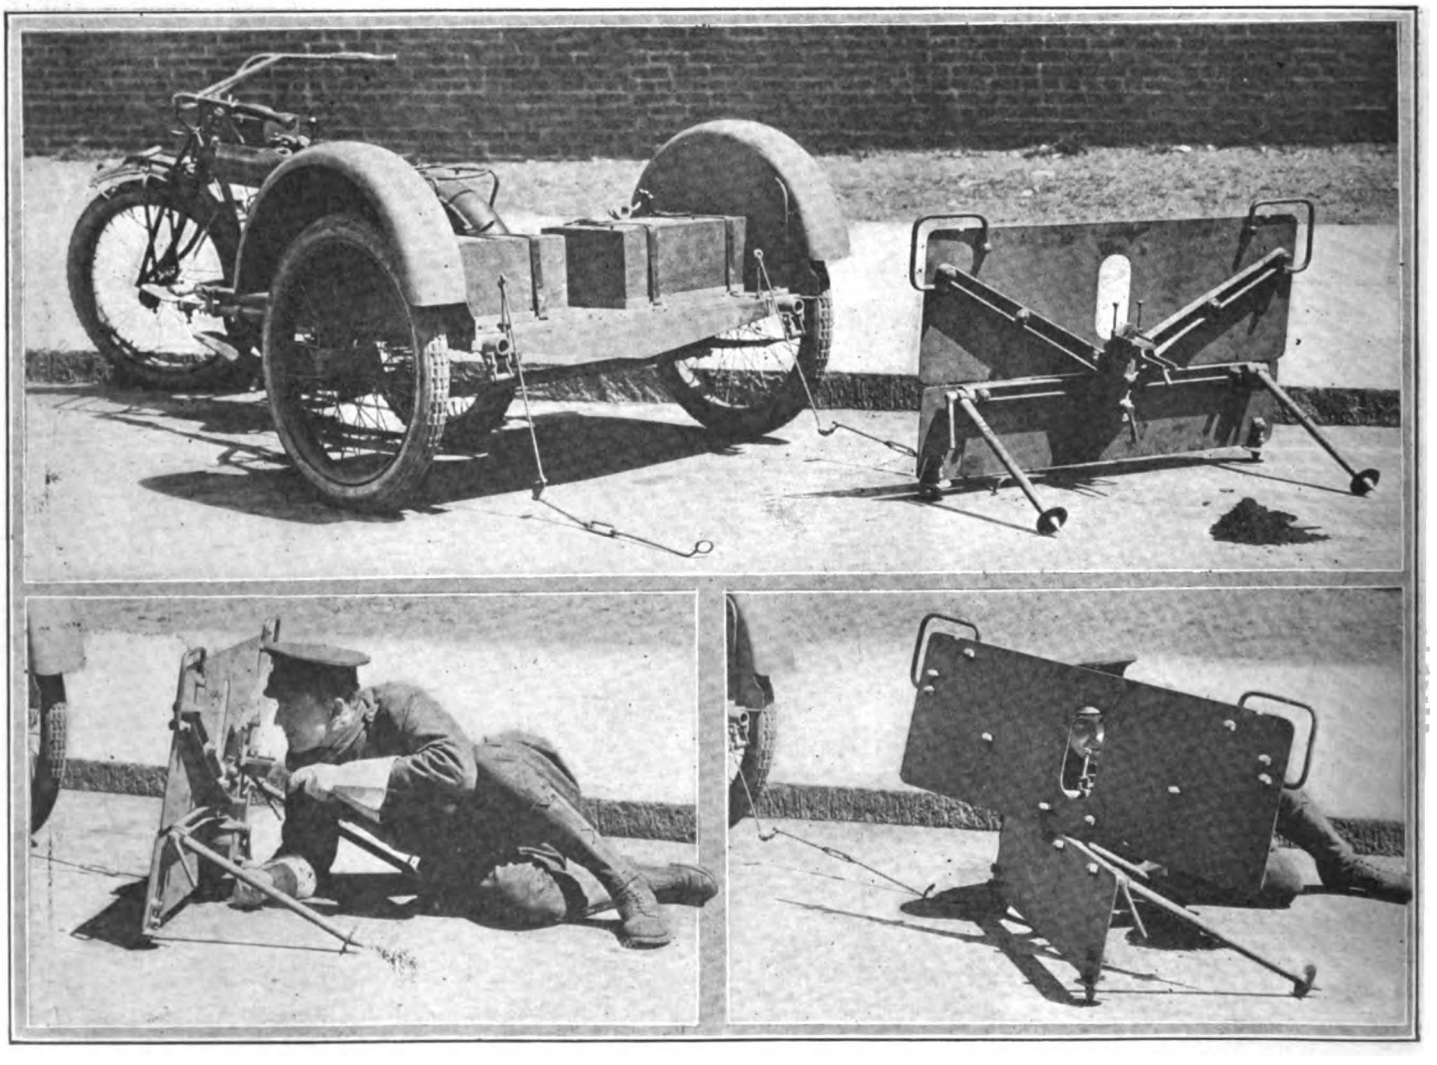
Robert MacDonald, with His Wife and Sons, on a Run Through One of the Parks of Worcester, Mass., Where "Mac" Handles the Pope Products

Digitized by Google



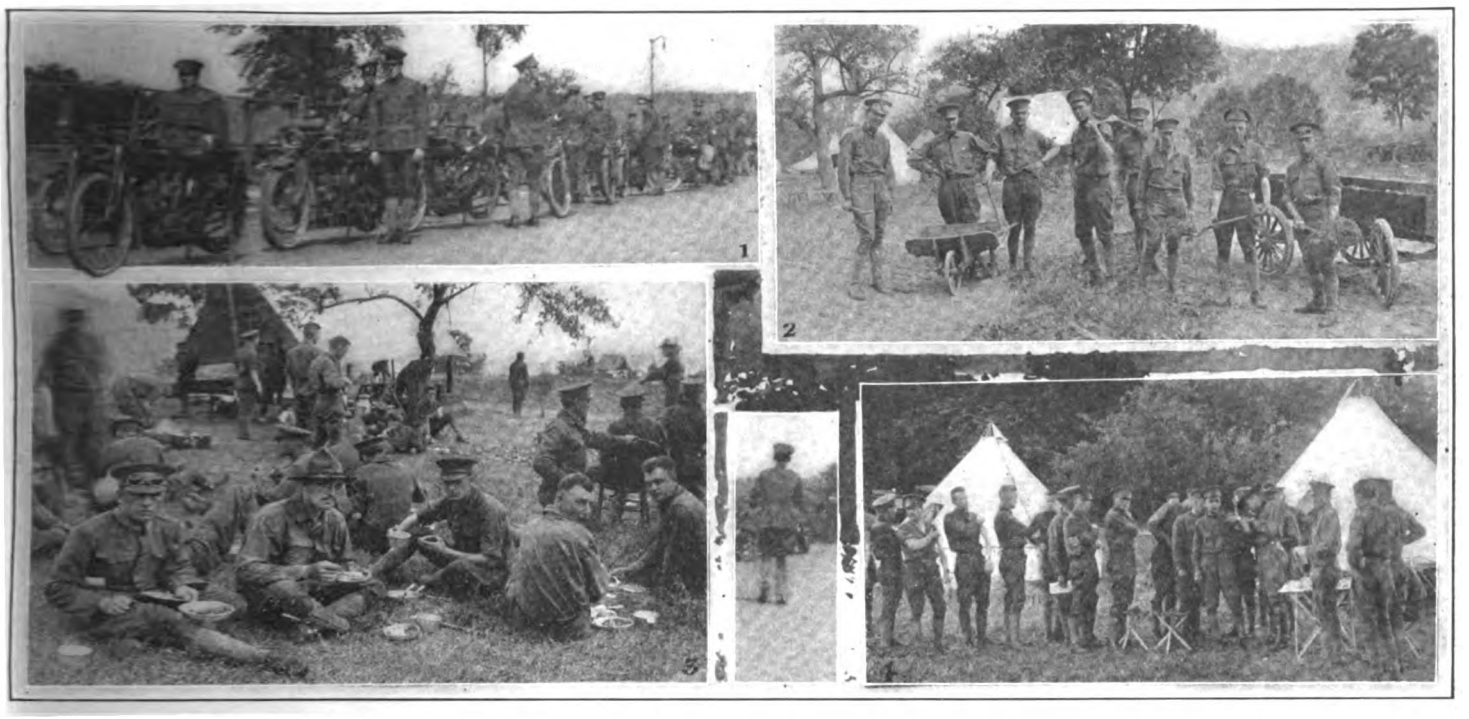
NEW YORK.—The photos show a new motorcycle machine gun outfit, the gun-carriage having been designed under supervision of Captain H. G. Montgomery, of the First Armored Motor Battery of New York, and A. F. Masury, chief engineer of the International Motor Co., also of New York. The gun-carriage, or trailer, was specially constructed by the Cygnet Rear Car Co., of Buffalo, and an Indian motorcycle is used, the battery being equipped throughout with Indians.

It will be noted that the shield is made in two pieces, the lower part being provided with a spud at each bottom corner, and a cast bracket which forms a fulcrum and permits of pivoting the upper part of the shield. With this arrangement the gun



Digitized by Google

WITH ARMORED MOTOR BATTERY RIDERS AT PEEKSKILL, N. Y.



1, Ready for a Practice March; 2, Policing Camp—Fatigue Party Under Corporal Arthur Chapple Cleaning Up; 3, At Mess—Members of First Armored Motor Battery, N. Y. N. G., Live Under Service Conditions; 4, In Line for Vaccination

can be swung horizontally, at the same time giving the gunner full protection. Two legs are hinged at the ends of the fulcrum bracket and are also provided with spuds. These legs can be locked rigidly at any angle by means of a specially-constructed joint, and with only a slight turn of a handle. This permits of setting the shield at any angle, and when the legs are locked they form a solid base for the shield and gun. The armor plate used for the shield is two inches thick, and will resist service ammunition at fifty yards.

The gun and shield can be dismounted from the trailer in thirty seconds. Handles are provided so that two men can carry the whole firing unit and place it in fighting position. Intrenching tools are carried on the side of the trailer in such a way that they can be very quickly detached.

MACHINE GUN ROOKIES HAVE QUIET TIME

New Members of Special Company of 71st New York Infantry Waiting for Uniforms and Equipment at Fort Hamilton

By SERGEANT LOU H. GUTERMAN

NEW YORK, July 24.—Recruits to the motorcycle machine gun company of the 71st New York Infantry are having rather a quiet time just now. They are at Fort Hamilton, near Brooklyn, waiting to be fitted out with uniforms and full equipment, but will be shipped to Texas after being supplied with the necessary articles. Each man will be vaccinated and also inoculated for typhoid before entraining for the border.

There are still a few vacancies in the company for expert riders. Captain Schroeder is starting a recruiting campaign today through Westchester and Orange Counties for men for this company and also for the various infantry companies of the 71st, and will have recruiting tents erected in the various towns for the next week. He will try to fill the regiment to war strength.

From the camp at M'Allen, has come an interesting letter from Corporal Joseph Grohs, in charge of Headquarters motorcycle detachment. There are eight men in the detachment, all of whom carry despatches for Major-General O'Ryan, of the New York Guard. The letter states that all hands were feeling fine and that the trip down was made in Pullmans all the way.

Stops were made at hotels in the different towns en route and first class meals were had, the letter says. At Tulsa, Okla., the company was taken for an auto ride and a swim, followed by a big dinner. The temperature is stated as 110 in the shade. The motorcycle detachment started in to pitch its tents and fix up its portion of the headquarters camp, in addition to message-carrying on their machines, as soon as it arrived.

Corporal Grohs says that he has to drive a motor truck in addition to riding his Reading Standard. He says that it is some riding, as there are no roads in the neighborhood. The Reading Standard machines used are standing up finely, in spite of the sand and high temperatures under which they have to work. The men are most enthusiastic over their mounts.

RUBBER MEN, BUT THEIR NERVES ARE OF STEEL

MOTORCYCLE PATRIOTS STILL FILING NAMES

Several of Those Who Communicated with Motor Cycle Illustrated Are Now Enlisted in Motorcycle Army Units; Are You On the List?

NEW YORK.—Several of the motorcyclists who filed their names with **Motor Cycle Illustrated** and signified their willingness to serve with their machines in the Army have been enlisted in various motor units, and only a day or two ago several of these riders joined the motorcycle company of the Seventy-first Regiment at the armory in this city.

Two More Willing

The latest additions to the list are William R. Bryan, of Arnold, Pa., who states that he has an Excelsior motorcycle with Rogers sidecar, and Robert T. Farmer, of Jackson, Tenn. Mr. Farmer has ridden motorcycles for years, but does not at present own a machine. He is ready to enlist for motorcycle service, however.

Those who were previously mentioned as having expressed their willingness to serve the flag in a motorcycle unit are as follows:

W. H. Encll, 508 West 180th street, New York City.

James E. O'Connell, 40 Fourteenth street, North Troy, N. Y.

Charles E. Keniston, 314 Parkville avenue, Brooklyn, N. Y.

R. P. Fisher, Holcomb, N. Y.

Eugene Mangin, Biloxi, Miss.

J. A. McMichael, DeKalb, Texas.

Richard A. Aune, 52 Selden avenue, Detroit, Mich.

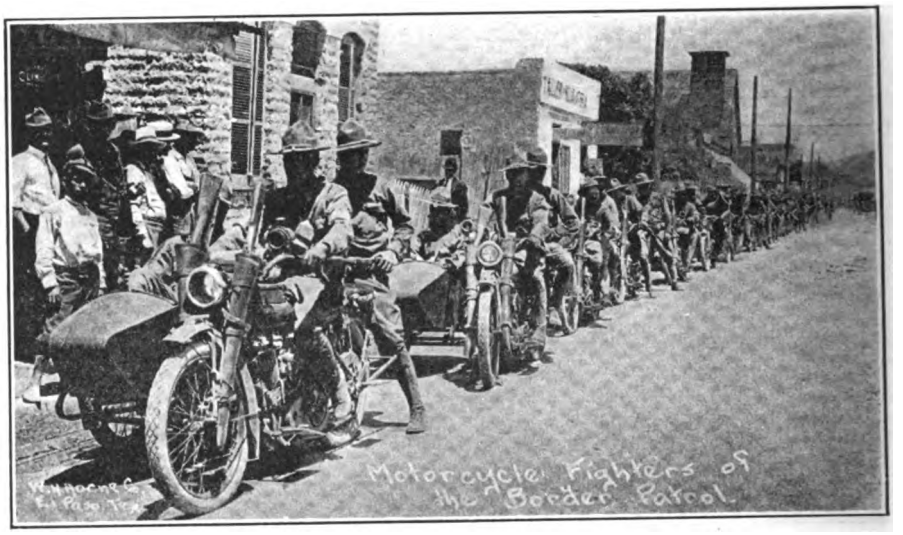
Walter E. Berger, 36 Selden avenue, Detroit, Mich.

Alfred A. Amirault, 16 Crest avenue, Revere, Mass.

Ralph Johnson, 55 Holly street, Lakewood, N. J.

Ray Bosher, 2014 Tenth avenue, Huntington, W. Va.

Cyril C. Babione, Fremont, Ohio.



Sidecar Combinations Employed by United States Infantry in Patroling Mexican Border. Powerplus Indian Models Are Here Shown. Note Rifles in Boots on Forks

Lee J. Shields, of Crawfordsville, Ind.

Robert S. Beatty, 1112 Reddour street, Pittsburgh, N. S., Pa.

RACES AT SALISBURY, MD.

SALISBURY, Md.—The Wicomico Fair Association will stage motorcycle races on Tuesday and Wednesday, August 16 and 17. These are the two big days of the annual fair, and the management is putting on motor races as an extra attraction for the immense crowds that visit the grounds each year on those days. There will be about $400 in purses for the four five-mile professional races to be run. Entry blanks can be secured from E. A. Hearn, Salisbury, Md.

BLANKS OUT FOR MEET AT BELMONT ON AUGUST 19

PHILADELPHIA, Pa., July 24.—The official entry blank for the meet of the Motorcycle Club of Philadelphia on the Belmont track at Narberth, on August 19, has been issued. The card shows that seven events will be run off: a five-mile novice, a five-mile amateur, a 15-mile pro., a 15-mile amateur, a five-mile amateur sidecar and a 100-mile pro., open. There will also be a mile-time trial. The long race will be the feature event, the winner to get $100. Application for entries should be made to C. G. Mueller, Franklin Bank building, Broad and Chestnut streets, Philadelphia.

WITHDRAWS TEAM FROM ALL SPEED CONTESTS

OMAHA, Neb., July 24.—Declaring that races tend to decrease interest in the sport rather than boosting it, Vic Roos, Harley-Davidson agent here, has announced the permanent withdrawal of his racing team from any further speed contests.

The Gray Fellows during the past year have annexed both the metropolitan and State titles, so it will be seen that it isn't lack of ability on the part of either the machines or riders that is forcing the withdrawal. Carl Pedersen, Otto Ramer and James Fisher, comprise the team.

OMAHA SPEEDWAY RACES ON AUGUST 8.

OMAHA, Neb., July 25.—W. E. Dewey, F. A. M. referee here, has announced a racing meet for the Omaha Speedway grounds on August 8, consisting of four events ranging from five to fifty miles. The races will not be held on the board track, but on the one-half mile oval within the speedway. Cash prizes of $100 are offered to riders in the 30-60 class. Sanction for the event has already been obtained from the F. A. M.

RACES AT K. C. SPEEDWAY

KANSAS CITY, Mo., July 24.—Motorcycle fans here have been thrilled by the news that Jack Prince, the speedway promoter, will stage the initial motorcycle meet on his new saucer on August 13.

THESE TOURISTS CARRY A COMPLETE OUTFIT

THE accompanying photo shows the interesting outfit with which Mr. and Mrs. J. A. Robinson, of Tulsa, Okla., are making a motorcycle tour to Boston, Mass. The trip is to be made via Kansas City, St. Louis, Indianapolis, Columbus, Pittsburg, Washington, D. C., Baltimore, Hayannis, Mass., and to Boston. The Robinsons carry a complete camping outfit, including a good-sized tent and kitchen.

STRINGENT NEWPORT REGULATIONS

NEWPORT, Ky.—The City Commission is considering the enactment of a traffic ordinance which will regulate stringently all varieties of motor and other traffic. It will provide for a speed limit of 15 miles an hour in the city on the straight, and 8 miles at corners. Dimmers must be used on headlights, unnecessary use of horns will be penalized, and the use of muffler cut-outs will bring about to fines. Passing street cars which are taking on or unloading passengers is another point which will be covered.

SIEBERLING PASSES ON

JONESBORO, Ind.—James H. Sieberling, the veteran president of the Indiana Rubber & Insulated Wire Company, of this city, died here on July 7. Mr. Sieberling was in his eighty-first year and was one of the founders of this company. His death is greatly regretted by his many friends.

WESTMORELAND MEET SEPT. 9

YOUNGSWOOD, Pa.—The Westmoreland Fair Association has made arrangements to stage a motorcycle racing program on September 9, under F. A. M. sanction. Entries are now being received, and application may be made to Ted Holtzer, 956 17th street, Altoona, Pa.

GAS CO. BUYS FEATHERWEIGHT

The Central Hudson Gas & Electric Co., operating in the Hudson Valley, with main offices at Poughkeepsie, has just purchased an Indian Featherweight.

CENTRAL KANSAS M. C. TO HAVE 300-MILE RUN

Endurance Trial Will Be Held from Ellsworth to Wichita and Return August 5-6; First Big Contest Since Short Grass Club Disbanded

ELLSWORTH, Kansas.—From Paul "Speck" Warner comes the announcement that the Central Kansas Motorcycle Club will stage a 300-mile endurance run, from Ellsworth to Wichita and return, on August 5 and 6.

This is the first run of importance to be held by a Kansas club since the Famous Short Grass Club disbanded, and riders are sending in entries from far and near. About 15 solo machines have been entered so far, and five sidecars are also on the list. Merchandise prizes, aggregating $200 in value, will be awarded to the winners, and a trophy will go for the best score.

The route will be from Ellsworth to Salina, over the Golden Belt road, then south to Wichita, over Meridian road, and back as far as Lyons by way of Hutchinson over the Sante Fe trail. The run will then proceed back to Ellsworth. Most of the roads are in good condition, but considerable sand will have to be traversed. There will be seven checking stations and two secret controls.

All the dealers along the route are cooperating with the committee, and are offering free oil and gasoline to the riders. Special arrangements have been made for refreshments.

The run will start from "Speck" Warner's Indian shop in Ellsworth, and he has offered to fill up all the tanks with gas and oil free of charge, regardless of the makes of machines used.

CINCINNATI SHAKES 'EM DOWN

CINCINNATI.—The sudden determination of local authorities to enforce every little provision of the traffic laws resulted in the arrest during the past week or so of hundreds of citizens, including motorcycle riders, on various charges, ranging from too much light to no light at all, and from having no license to having one too old. Fines of $2 and costs were assessed, as a rule.

SEVERE TEST FOR MOTOR BICYCLE

H. N. Baker, who rode to San Francisco from Boston on a Dayton bicycle last summer, has started his return trip on a Dayton motor bicycle. This is the word received from the Wm. H. Hoegee Co., of Los Angeles, Cal., by the factory. While the temperature in the Imperial Valley sometimes reaches 140 degrees at this time of the year, Mr. Baker has decided to direct his course over that route in order to give the motor bicycle the most severe test that it is possible to find.

FEATHERWEIGHT FINE IN DESPATCH WORK

Indian Two-Stroke Stands Up Under Severe Service in Big Training Area—Routes to Camp Outlined

CAMP BORDEN, Ont.—An Indian Featherweight motorcycle belonging to the 164th Halton Battalion, now in training in this tented city of 35,000 soldiers, seems to be filling the bill in a very satisfactory manner. This machine is being driven through the deep drifts of light sand, over and around stumps and across pathless plains practically all day long and it goes sailing along where three-ton motor trucks frequently get stalled. Soldiers by the hundreds pause in their work to watch the despatch rider of this battalion dash over the rough and sandy country on the small machine. Sometimes it dances a Highland fling in the deep stuff but the two-cycle power-plant never halts. The variable gears come in very handy for the rough riding around these parts.

For the information of Toronto motorcyclists who are arranging week-end trips to the big camp, which is seventy-five miles from Ontario's capital, the following routes are outlined: Out from Toronto the rider will follow Yonge street to Holland Landing, thence to the left to Bradford, to Bondhead, to Cookstown, to first concession road East of Alliston, thence Northward almost to Angus where a road running to the West will be found. This leads to Camp Borden. This route is sign-posted all the way and will be found the best way to reach the camp from Toronto. Other routes are more scenic but not so good.

CANADA CYCLE BUYS LAND FOR FACTORY

WESTON, Ont.—A tract of land, comprising 26½ acres of land adjoining Eagle avenue and the Canadian Pacific Railway tracks, has been purchased by the Canada Cycle & Motor Company, Limited, for the new bicycle and accessory factory of the company. The cost of the land was $52,000 and the purchasers have already started the erection of a $100,000 building on the site. The ground was formerly used as an aviation field and was owned by W. G. Tretheway. The present Canada Cycle factory near Toronto was bought by the Willys-Overland Company. It was in this plant that the Cleveland bicycle was made in the so-called boom days. The 1917 production of the Canada Cycle Company will be turned out in the new Weston works.

CYCLE OFFICIAL TRAINING AT CAMP BORDEN

CAMP BORDEN, Ont.—One of the prominent cyclists among the 35,000 Canadian soldiers now undergoing training at Camp Borden is Private William Marr of the 180th Sportsmen's Battalion of Toronto. Private Marr is the ex-president of the Toronto Bicycle Riders' Association and now represents the interests of the military cyclists on the executive board of the association. He has also been manager of the Classic Bicycle Club, Toronto, of which Arthur and William Spencer, now performing at Newark, are members.

SASKATCHEWAN ROAD GUIDE FILLS LONG FELT NEED

REGINA, SASK.—Owing to the lack of many landmarks throughout the Prairie Province of Saskatchewan, motorcycle touring has been rather uncertain. There is considerable long-distance riding, but it has been rather easy for a strange tourist to become lost. A road map of the Province, compiled from Government records, has just been issued, however, and it has met a popular demand. This map shows all churches, school-houses, cemeteries, bridges, railway crossings, sidings, stations and centers of habitation. Summer resorts, watering places, lakes and other scenic attractions are also indicated.

THEY RODE "ORDINARIES"

VANCOUVER, B. C.—During the periods of a recent lacrosse match here, Jack Mason and Jimmy Deane, two cycle veterans, engaged in an exhibition bicycle race on wheels of the old "ordinary" type. The bicycles are at least twenty-five years old and had not been ridden for twelve years. One of them belongs to Fred Deeley, the local dealer.

TELLS OF DISPATCH RIDING IN FLANDERS

Canadian Courier Writes of Thrilling Work in Conveying Messages on Western War Front—Was Slightly Hurt

TORONTO, Ont.—The story of the life of a motorcycle despatch rider on the Allied front in Flanders is coming back to Canada little by little but the piecemeal tales are now giving a fair idea of the experiences through which an army speedster passes. A very interesting letter has just been received by William Wyndham, of 92 Olive avenue, from his son, Ellis Wyndham, who is serving as a despatch carrier with the Canadian army.

"I tell you it is some excitement," wrote Wyndham. "Ammunition going up and empties coming back; mile after mile of galloping horses; trucks going and coming; everyone swearing and yelling to keep to the right. We ride up in the centre of the road just as fast as we can go. All this is done at night and no lights can be used. In the day-time there is not one one-hundredth part of the traffic that one sees at night. But in the daytime we can see hundreds of dead horses. I have had pretty good luck so far until last night a shell landed right beside me on the road and blew me off the machine into the ditch. A piece grazed my arm and made just a little cut but I hurt my knee in the spill, so the doctor told me not to ride for a week. My machine was smashed."

Wyndham has been behind the firing line for more than one year. He is enjoying his work immensely, and intends to stick it out to the finish.

This Is Private Marr of the Sportsman's Battalion, Toronto, Who Is Ex-President of the Toronto Bicycle Riders' Ass'n

CRACK RIDER IS MEMBER OF ROYAL FLYING CORPS

TORONTO, Ont.—Word has been received by President F. A. O. Johnston of the Canada Motorcyclists' Association that J. A. McNeil, the well-known motorcycle and bicycle racer, is now a full-fledged flier of the Royal Flying Corps. McNeil made several notable performances on the board tracks at Minneapolis, Omaha, Buffalo and Toronto in the summers of 1914 and 1915 and while racing in Toronto he decided to throw in his lot with the Canadian Overseas Army. He joined the 166th Battalion and was transferred to the 83rd Battalion which proceeded overseas early this year. After reaching England McNeil found an opportunity to become a birdman and worked hard to get his certificate.

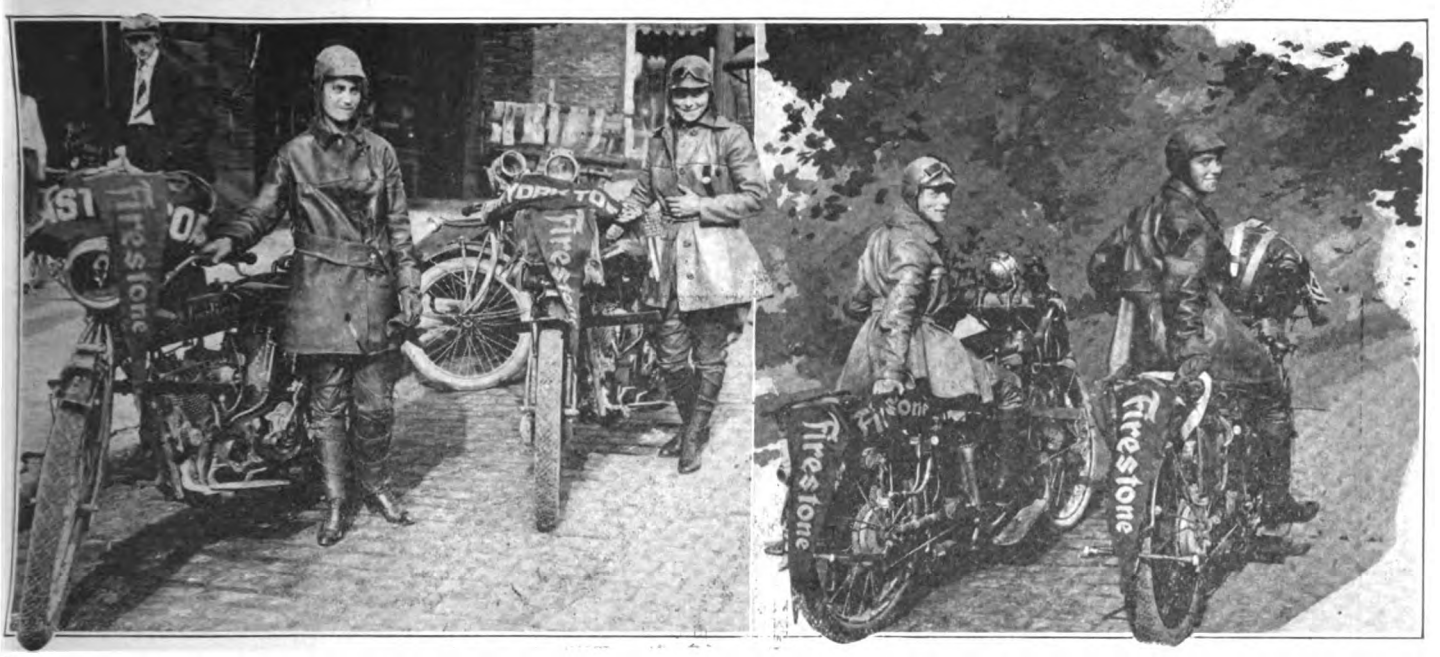
VAN BUREN GIRLS WARMLY WELCOMED IN TIRE CITY



Transcontinental Tourists Snap-Shotted on Arriving in Akron, O., and Again as They Said Good-bye; A Trip Through the Firestone Plant Was a Feature of Their Stay and They Enjoyed Every Minute of the Time

AKRON, O.—One of the longest stops made so far by the Misses Adeline and Augusta Van Buren, on their cross-country trip with Indian motorcycles was in this city, where they were given a warm welcome by trade folks and the general public. The chief feature of their visit in Akron was a tour of inspection of the Firestone Tire & Rubber Company's big plant. In view of the fact that they have selected Firestone tires for their coast-to-coatst grind, the girls were deeply interested in the processes of manufacture.

"After seeing the care, the skillful workmanship and the quality materials put into Firestone tires and the high standard of the whole organization behind the Firestone products we are now able to understand why our tires are giving us 'no-trouble' service over all kinds of roads," said Miss Augusta. "Our trip through the factory has shown us that Firestones are as good inside as they look outside."

"It is hardly necessary to state," continued the fair New York tourist, "that our Indian motorcycles are doing all that we expected of them—and then some. We have done lots of traveling over storm-washed roads, and have had a few spills, but our Indians are at top-notch efficiency."

LITTLE DOING AMONG AUSTRALIAN RIDERS

Clubs Hold Only Minor Sport Events, But Sidecar Outings for Wounded Soldiers Are Found on Most Fixture Lists.

SYDNEY, Australia.—Motorcycle matters are very quiet throughout the Commonwealth of Australia just now. The Victoria M. C. has just announced that, excepting for certain annual challenge trophies for which competitions must be held, it will promote no speed events during the next twelvemonth. In New South Wales, the clubs are only promoting events of an unimportant character. Down in Tasmania, S. Stearns, who will hop it on a 7 h. p. Dunlopshod Indian, intends still further reducing the Launceston-Hobart record of 2:33:30. The distance is 121 miles.

A new club has made its appearance in New South Wales, or perhaps it would be better to say an old one has been brought back from the dead. It is the Newcastle M. C., in the second city of the State, the center of the biggest coal field in Australia. In the club's first run—a 100-yards acceleration trial—G. Hoffman on a 2¾ h. p. Douglas beat W. Thomas, 6 h. p. M. A. G., from a standing start, covering the 100 in 0:09 4/5.

Half a dozen years ago there was a strong motorcycle club at Newcastle and some of our finest riders came from the coal fields. The most notable were S. L. Bailey, who attained international fame on the Douglas at Brooklands, England, and in the Isle of Man T. T.; J. E. Yee and J. Lynch.

Many Australian motorcycle clubs are now arranging sidecar outings as part of their regular fixtures. These outings are for the benefit of returned veterans of the Gallipoli, Egyptian and other campaigns in which Australian soldiers are doing their share to keep the flag of the British Empire flying. The Motorcycle Club of New South Wales is prominent in these fixtures.

DEMONSTRATING TWO-STROKE

Representative Cameron, of San Francisco, Cal., Putting Indian Featherweight Through Its Paces

HOW MOTORCYCLE AIDED IN THE MOBILIZATION

BOSTON, Mass.—Sergeant H. F. Drake, of the National Guard of Massachusetts, answered the call for troops in a unique manner by riding 306 miles on his motorcycle in nine hours from a summer camp to headquarters. He had just set up his camp at Fairhaven, N. Y., with several other young men, and was preparing to enjoy his vacation when the call for mobilization was issued. Drake states that he averaged 34 miles an hour all the way back to Springfield, Mass.

HOW REPAIR MAN SAVES TIME

LOUISVILLE, Ky.—J. H. Rouark, a repair man for the Columbia Graphophone Company's Louisville office, has just purchased a new 1916 electrically-equipped Harley-Davidson, which he is using in handling calls for repair and service work with talking machines and dictating machines. Mr. Rouark claims that with this machine he can cover as much ground in three hours as was possible in a day and a half on street cars. One repair man is now employed in place of two.

WEATHER SPOILS ACTIVITIES OF MILWAUKEE RIDERS

MILWAUKEE, Wis., July 25.—Now that the weather in these parts is beginning to show a little bit of reason the entertainment committee of the Milwaukee Motórcycle Club is laying out a program of outdoor events to stimulate the sporting blood of its members. The annual hill-climb at Becker's Hill, Menominee Falls, Wis., about nineteen miles from Milwaukee, will be held Sunday, July 30. This is limited to club members and is purely an amateur affair. H. E. Baldwin, State F. A. M. referee, will officiate as starter.

The club's annual fish fry at West Bend is scheduled for August 13, and the hare and hounds contest, which has been postponed several times on account of rain, will take place August 23. Rudolph Fischer is in charge of this contest.

YOUNGSWOOD MEET AUGUST 13

ALTOONA, Pa., July 24.—Plans have been completed for a motorcycle race meet to be held at Youngswood, Pa., by the Youngswood Racing Association, on August 13. Six events will be carded, one at eight miles, two at ten miles, one at five miles, one at 15 miles, and the final a ten-mile free-for-all. For information concerning the races address Ted Holtzer, 956 17th street, Altoona, Pa.

COULDN'T CATCH THIS FOX

SCHENECTADY, N. Y.—The Schenectady Motorcycle Club staged a motorcycle fox chase a few days ago, and Edward Clute, who acted the part of the fox, managed to elude his pursuers for five hours. He returned home finally and was awarded a five dollar gold piece for his good road work. More than 40 motorcyclists chased Clute across country without being able to capture him.

BIG ATTENDANCE AT GRAND RAPIDS PICNIC

GRAND RAPIDS, Mich., July 24.—More than 300 persons are expected to take part in the annual picnic of the Grand Rapids M. C. at Camp Lake on July 30. A splendid program of sports, including races has been provided for, and the affair is expected to be the most successful in the history of the organization.

No one will be allowed to go on the picnic unless he rides a motorcycle and is accompanied by a fair companion. Grand Rapids riders believe in sharing their pleasures with the girls and this occasion will be no exception to the rule.

TO FOIL THE CONSTABLES

CINCINNATI.—Local motorists who have suffered from the various roadside courts established by country magistrates for revenue purposes will have the benefit hereafter of a system of picketing established by the Cincinnati Automobile Club. The club proposes to maintain pickets on both sides of the roadside courts, warning all motorists to slow down to a walk in order to leave the country justices no room whatever for imposing fines. There is no intention of attempting to defend speeders, but the club has found that motorists are being held up as easy marks by many magistrates, and is determined to put a stop to it.

WELL REPRESENTED IN RANKS OF N. Y. GUARD

NEW YORK, July 25.—The Harlem M. C. of this city is well represented in the headquarters detachment and machine gun company of the 71st New York Infantry. Among the members are Sergeants Lou Guterman and Alfred Leach, Corporals Joseph Grohs and Abe Sacks, Lance Corporal Forbes Mackenzie, Lance Sergeant Arthur Freibel, Privates Edward Killmer, Leo Newman and Edward Guterman.

LONG PULL FOR TANDEMITES

ST. PAUL, Minn.—Earl Winslow, a former St. Paul boy, and Ross Mitchell of Saint Joseph, Mo., have arrived here from Milwaukee, having ridden about 450 miles in three days. The boys are using a tandem machine, and report very little trouble in spite of the fact that bad roads were encountered.

KLEBES HAS NEW MOUNT

PHILADELPHIA, Pa.—Harry Klebes, one of the best known local speed men, has just purchased a stock Harley-Davidson of the 1916 three-speed type. Klebes says that he has not entirely given up racing and may be seen in competitive events again before the summer is over.

CUMBERLAND COUNTY RACES

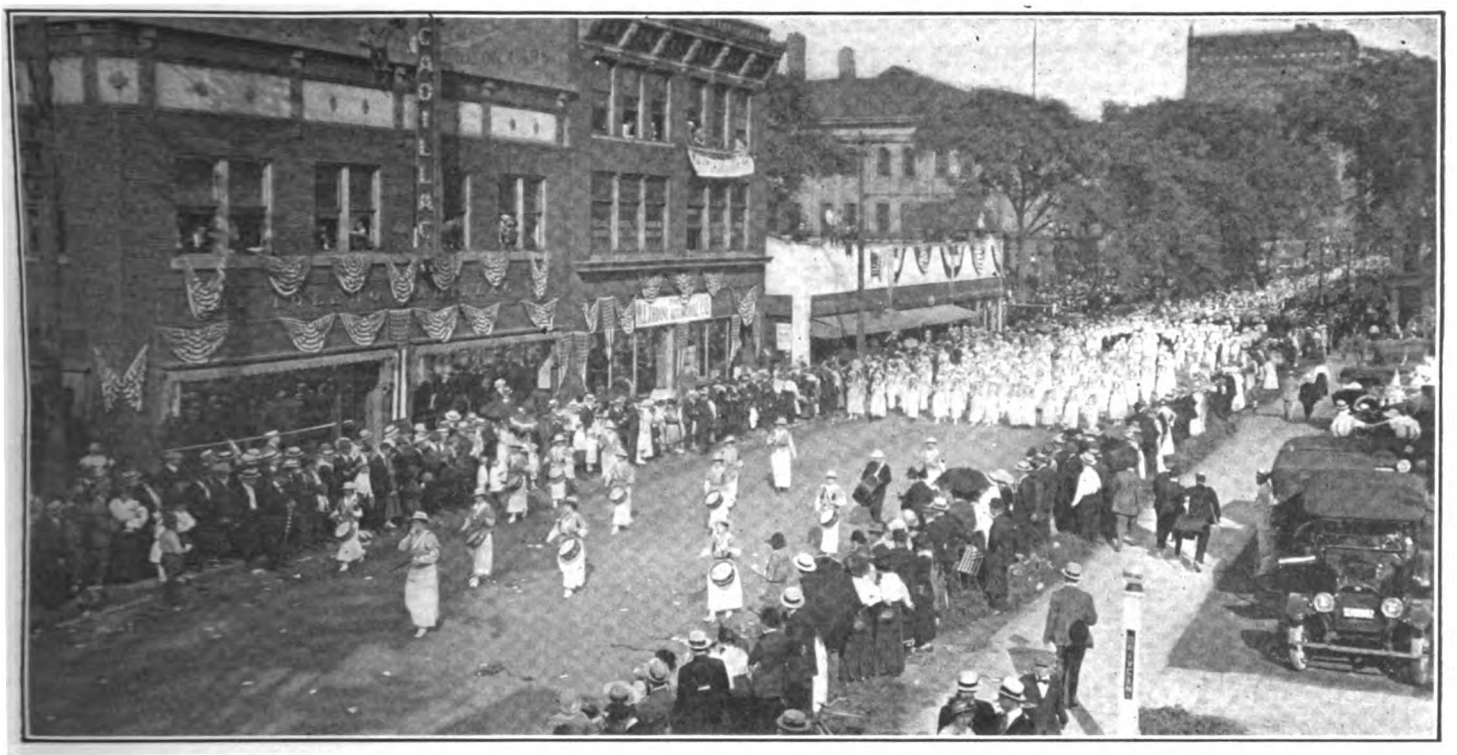
ROBINSON, Ill.—A race meet will be staged by the Cumberland County Fair Association, Aug. 31, for single-cylinder motorcycles on the half-mile track at Greenup, Ill. H. W. McKlintock, Indian dealer in Robinson, is helping to lay out the program. For information address Nelson Tharp, secretary, Greenup, Ill.

MADE FINE SHOWING IN MILWAUKEE'S PREPAREDNESS PARADE

Headed by the Clerical Staff of Girls in White, With American Flags, the Employes of the Harley-Davidson Motor Company Formed an Imposing Unit in City's Big Turnout in Aid of American Defense

Digitized by Google

300 CHAMPION PLUG EMPLOYES IN TOLEDO PREPAREDNESS PARADE



TOLEDO, O.—Nearly 25,000 people participated in the big Preparedness Parade recently held in this city, and one of the most attractive divisions in line was that representing the Champion Spark Plug Company. The accompanying photograph shows the special drum corps of the Champion delegation, with the main body of Champion employes following. The girl drummers made a big hit with the crowds of spectators.

The Champion company had about 150 girls in line and an equal number of men. Because of the attractive costuming of the Champion marchers the judges declared this to be one of the most impressive groups in the entire procession. Each Champion girl carried an American flag, while following the girls came two mammoth banners, carried by the men, with the slogan: "We believe in preparedness."

FIRESTONE PICNIC TO BE BIG AFFAIR

Annual Outing of Tire Company Employees Has Elaborate Sports and Entertainment Program Laid Out—Date Is Set for July 29

AKRON, O.—Saturday, July 29, is the big date for the employees of the Firestone Tire & Rubber Company, of this city, it being the occasion of the annual picnic at Silver Lake Park, near Akron. Elaborate preparations are now being made to keep the picnic in harmony with the huge growth of the company during the last year.

Special cars will carry the picnickers to the Lake in the morning. The activities of the morning will include a soccer game and a baseball contest between department teams. At noon the "family basket" idea will be recognized with due formality. There will follow a continuous round of sports for all hands, until the time for departure.

In the evening there will be an elaborate display of fireworks, including a number of large set-pieces. The fireworks will be set off from an island in the center of the lake. It is expected that during the course of the day and evening, at least 25,000 people, composed of Firestonites and their families, will be in attendance.

FINE ISSUE MARKS FIRST YEAR OF "FIRESTONE"

OVER one-half of the attractive pages of the anniversary number of *The Firestone*, the house organ of the Firestone Tire & Rubber Company, of Akron, O., are devoted to the motorcycle. The principal motorcycle features are the United States riflemen at the Mexican border, Arizona pictures from Traveler Stewart Slosson, and the race achievements made on Firestone tires. The number, dated July, 1916, celebrates the first anniversary of this interesting publication.

HUFFMAN'S INTERESTING TRIP

H. M. Huffman, cycle department manager of the Davis Sewing Machine Co., returned from a two-weeks' trip Saturday, July 22. During the course of his auto trip through Wisconsin, he had occasion to talk business with a number of Dayton dealers, whom he found very enthusiastic over the large business that they had this year, and having high hopes of breaking their record during the coming fall and spring. In the course of his wanderings he met several Dayton motor bicycles and the riders were invariably enthusiastic over the front-wheel-drive machine.

GIVES INNER TUBES FREE

NEW YORK.—Starting July 15, the Pennsylvania Rubber Co., of Jeanette, Pa., maker of Vacuum Cup and other tires, has been giving an inner tube free to each purchaser of a new casing at the local branch. The same procedure is being followed out in Brooklyn at the branch in that city.

The tubes are given when the purchase takes place also through a dealer, but in the latter case, if the consumer price is paid, the dealer has to buy the tube from the company at 50 per cent of the actual cost.

FLXIBLE BACKER CLOSES A $7,000,000 DEAL

DAYTON, Ohio.—Charles F. Kettering, who is financing the Flxible Sidecar Co., at Loudonville, recently received $7,000,000 for his interest in the Delco company, of this city. At the same time E. A. Deeds sold out his Delco interests for a like sum. Mr. Deeds was formerly president of the Dayton Engineering Laboratories, and Mr. Kettering held the office of vice-president.

At the time of the consummation of the negotiations, by which the Delco plant was transferred to the United Motors Co., it was stated that Messrs. Deeds and Kettering received for their interests the approximate sum of $7,000,000 each.

FOUNDRY RESUMES OPERATIONS

BEAVER DAM, Wis., July 25.—To accommodate its increased business the Western Malleables Company, which took over the properties of the defunct Beaver Dam Malleable Iron Company two years ago, has resumed operations in the big South street foundry which has lain idle for the past two years.

In the Commercial Field

UPKEEP OF COMMERCIAL OUTFITS

Dealers Should Instruct Van Purchasers Fully and Co-Operate with Them in Keeping Motorcycle at Maximum Efficiency

By JOHN O'BANNON

SUCCESS in the selling of motorcycles for commercial purposes depends in a large measure upon the upkeep of the machines after they have been taken over by the purchasers. If the outfit in each case is kept in first-class running condition, the dealer has a satisfied customer and one who will recommend his goods to others. If, on the other hand, no care is taken of the outfit, it may reach the stage where a visit to the repair shop is needed. In such a case, the purchaser will naturally feel aggrieved, as it will spell loss of the use of the machine for a time, and mean money out of his pocket for repairs, etc. If the dealer replaces parts which have failed by neglect to lubricate, for example, the dealer is out of pocket. So for the sake of both parties, co-operation in regard to upkeep between the dealer and purchaser is most desirable.

The fact that the outfit will work at its best when properly cared for should be impressed upon the prospective purchaser. There is nothing delicate in a first-class motorcycle which needs concealing from a would-be buyer, nor a procedure which requires hours of careful grooming, minute adjustment and the services of an expert. In fact, if some buyers are not told about caring for the machine until they take it over, they will start to look for trouble and may invent what they don't actually find.

The way to go about telling the prospect about the maintenance of the commercial outfit depends upon the business in which he is engaged. If he has used machinery, the dealer should point out that the motorcycle needs regular oiling, wiping down, etc., it being machinery of a high order, yet not of a type that needs "babying." If he has been a horse-user, it should be put up to him just what kind of a team he would have if the horse was never groomed, the wagon washed or the harness not kept in condition. And this should be followed by a demonstration of how much simpler it is to care for a motorcycle outfit.

The prospect should be impressed with the fact that a spick and span machine is a first-class advertisement, while a dirty outfit will turn trade away, besides bringing it in course of time to the shop for repair. Just how much work will have to be done to keep the machine in the pink of condition should be pointed out. If this information is not in the hands of the salesman or dealer, he can easily get it from the instruction book or the factory.

If the purchaser does not desire to have his driver do this work, here is the dealer's opportunity. The latter should offer to have the work done for him for a certain sum per month or week. Incidentally, a strong point can be made that the dealer, with his shop and tools and familiarity with the motorcycle, is the logical man for the job.

If, on the other hand, the buyer wants his driver to do the maintenance work, the dealer should offer to look over the machine at stated intervals to see that all is correct and to forestall anything which may arise out of abnormal usage. In other words, it is to the advantage of the dealer to keep the machine in service all the time, hence it will pay him in the long run to make regular inspections of the machine.

When the dealer does these things, he is going a long way toward getting more customers. He makes the purchaser a booster for his machine as a commercial proposition, and the latter will be only too glad to recommend it to others.

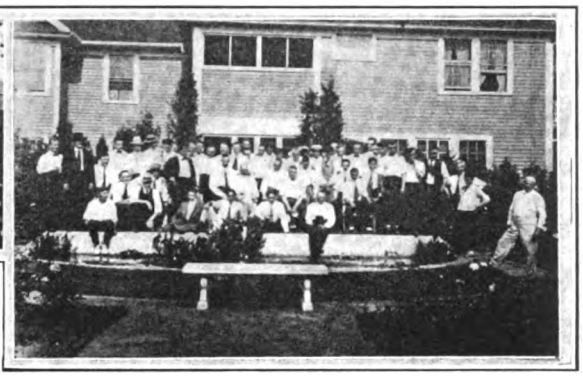
OLIVER CABANA IS HOST TO BUFFALO DEALERS

Gives Picnic to Trade Men of the Bison City and Nearby Towns at His Pine Grove Farms; John W. Henry Makes Rousing Speech, Asking for Dealers' Co-operation

By GEORGE W. GRUPP



At Left, Outing Arrangement Com.; Above, Dealers at Luncheon in Pine Grove; Right, "Those Present"

BUFFALO, N. Y., July 25.—More than three score dealers from the Bison city and nearby towns, the majority of whom are members of the Buffalo Cycle Dealers' Association, were the guests of Oliver Cabana, Jr., president of the Buffalo Specialty Co., at an outing given by him on his Pine Grove farms, at Elma Center, last week.

The day was ideal and the dealers enjoyed the exhilarating ride over thirteen miles of splendidly-paved State roads, running through a beautiful scenic valley that led out to the farms. Pine Grove farms is one of the show-places of the Buffalo suburbs and among its many novel and interesting features is a half-mile dirt track. No sooner had the party reached the farms, when Martin Cabana and John W. Henry headed their machines for the oval and entered into a race which proved to be as exciting and thrilling as a speedway affair. The battle raged for two miles and in the end Henry covered himself with glory.

Luncheon Is Served

Following this little bit of excitement, Oliver Cabana led his guests to a cool pine grove on the estate, where a long row of tables was streched in the inviting shade cast by the lofty trees. A picnic luncheon was served, and a typical outdoor menu of simple and substantial food occupied the attention of the dealers whose appetites had been whetted to a sword-like edge.

The first course consisted of clam chowder, which was followed by onions, pickles, radishes and olives. Then came delicious shrimp salad, choice cuts of ham and tongue, with home-made rye bread. There were pigs feet, too, for those who wanted them, and crisp potato chips, well salted to arouse thirsts that were frequently quenched by cooling drinks. The teetotalers were given coffee and "kuchen," while something "stronger" was bountifully offered and, in most cases, accepted by the anti-prohibitionists.

When luncheon was over and cigars had been passed around and lighted, the guests comfortably seated themselves back in their chairs and prepared for a round of speech-making. Henry was the first man on his feet, and in terms of glowing appreciation he thanked both Messrs. Martin and Oliver Cabana, Jr., for the splendid luncheon that had been served, and voiced the sentiment of the guests by lauding the keen interest which the Cabanas are taking in the Bison City trade association.

The Speeches Begin

Oliver Cabana responded modestly: "You gentlemen are not only welcome," he said, "but I deem it a great honor to have you with me. And I can assure you that I shall take extreme pleasure in having you here at any other time."

This was followed by one of John Henry's characteristic extemporaneous speeches, which was loaded to the muzzle with oodles of pep and punch. He opened his impromptu talk by the assertion that he was in his "fighting clothes," and was bound to bespeak his mind regardless of the consequences. This was received by his auditors with a great burst of applause. In part, his speech was as follows:

"The Buffalo Cycle Dealers' Association invites all you gentlemen who are not members to become one of us. It will certainly do you good to rub elbows with your competitors. There is no real reason why you should not compare notes with your fellow tradesmen, and there is no better place for doing it than at a trade meeting. The Buffalo dealers should be more united; by joining this association they will form a firm bond of friendship among themselves, and that destructive, ill feeling, often prevalent in trade circles, will entirely vanish."

Henry then launched into a heart-to-heart talk with the members of the association. He said:

"This association will be just what you fellows make it. If it lacks push and 'go-to-it-ive-ness,' it is your fault. Remember, fellows, this association should hold a warm spot in your hearts. Therefore, let us get together, put our shoulders to the wheel initiative, and make this trade body a model for the world. We can do it, if all of us offer a helping hand and work with the officers. And if we do that, the work will be so much easier and results more beneficial to every member of the association.

"At present, most of you fellows are leaners, not lifters, and this lack of interest is the greatest evil to our trade. Every dealer should attend the meetings of the association and heartily volunteer to do some constructive work. At the present time, only a few offer their services, and yet all of you receive an equal share of the benefits. Now let everyone of us get together, bury the hatchet and unite for the general good of the trade."

Rosenthal's Address

Then Morris Rosenthal, general chairman of the outing committee, addressed the picnickers and said that another dealers' outing would be held in the near future, in connection with a decorated bicycle parade and bicycle road races.

When the speech-making was over, Oliver Cabana gave an interesting description of his farms, prior to showing his guests over the estate. The big feature at Pine Grove that elicited great admiration from the guests was the herd of prize cattle, said to be superior to any in the country.

Bicycle races were held after the guests had inspected the estate. There were three events in all, each at a distance of half mile. The first event was for the dealers who had passed their forty-fifth year, the second for those who had cast their fifth vote, while the third was a merry free-for-all.

BROWN NOW VICE-PRESIDENT OF PIERCE COMPANY

Many Congratulations Received; Has Achieved Remarkable Success With Pierce Cycle Company, Starting As An Agent; Sales Show Huge Increase Under Brown's Management

BUFFALO, N. Y., July 25.—Congratulations are pouring in on Freddie Brown, the genial sales manager of the Pierce Cycle Company, felicitating him on his appointment to the vice-presidency of the Pierce concern. Brown never knew, he says, that he had so many friends in the trade until the postmen and the hustling messenger boys started to pile the congratulatory letters and telegrams on his desk immediately after the formal announcement of his election to the new office.

Brown is one of the many men in the bicycle field who has forged ahead up the ladder of success, rung by rung, coping with hard knocks by consistent and conscientious application to business. As a boy he was a "bicycle crank." Thirteen years ago he assisted his father in a small general store out in Golden, Colo., and sold Pierce bicycles as a side line.

Attracted Attention of Botterill

Being a live young dealer, Brown soon attracted the attention of Tom Botterill, then manager of the Denver branch of the George N. Pierce Company. Their acquaintance grew into friendship, and as Botterill's branch business expanded, he took Brown on as assistant manager.

In the fall of 1907 the Pierce company scoured the country in search of a capable man to put in charge of its interests on the Pacific Coast, and finally decided to send Fred Brown out to Oakland to manage its branch. That position was capably handled by Brown until the spring of 1913, when, with the reorganization of the Pierce company, he was promoted to general sales

Fred L. Brown

manager. Further honors were bestowed on Brown in 1914, when he was elected to the company's board of directors.

Under his skilful management the sale of Pierce bicycles has been steadily increasing, each year showing a big percentage of increase over previous seasons. It is expected that the volume of sales for the current season will be 300 per cent greater than that of 1913—thanks to Brown's management.

Immediately upon taking over the managership of the Pierce company Brown made his influence felt. The first important step he took was to apply his intimate knowledge of bicycle construction to the Pierce machine, with the result that the Pierce models were thoroughly overhauled, and changes have been made from time to time that have brought Pierce bicycles up to a standard of perfection which is well recognized.

Perfects New Pierce Models

Freddie Brown points with pride to the Pierce one-piece crank hanger model and the Kramer special, both of which he created not only from own ideas but also from the suggestions which he was wise enough to accept and encourage from dealers the country over.

All of this hard and constructive work, of course, did not pass unobserved by the appreciative directors of the Pierce company, and the newest honor they have voted on Brown constitutes a strong endorsement of his successful and aggressive managership.

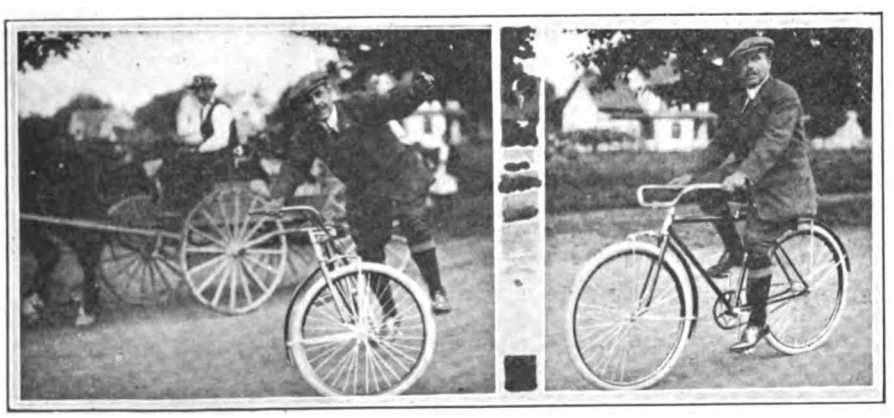
SHOWS HOW TO STAND STILL ON COASTER BRAKE BIKE

WESTFIELD, Mass.—Bubbling over with bicycle enthusiasm, as ever, Fred St. Onge dropped in at the office of the Westfield Manufacturing Company the other day.

He was riding a Seminole Road Pullman, made by this Company, which, although it had been ridden for a great many miles, looked as bright and new as when it left the factory.

In the course of his conversation, St. Onge said that though most people thought it impossible to stand perfectly still on a bicycle fitted with a coaster brake, he knew a way in which it could be done—in fact, he knew two ways—and forthwith demonstrated them, one of which is shown in the photographs.

In the fall of 1915, St. Onge purchased the second Road Pullman put out by the Westfield Company. He rode it all Winter, covering 2,900 miles, and then he says he sold the wheel as practically new.



Fred St. Onge, Trick Cyclist, Standing Still on Seminole Bicycle Fitted with Coaster Brake at Westfield Factory

CYCLEMOTOR ADDITION READY

ROCHESTER, N. Y., July 24.—The new addition to the factory of the Cyclemotor Corporation is now completed and machinery is being rapidly installed and set up in it.

CYCLES REPLACE HORSES

CHARLESTON, S. C., July 25.—In order to give the police horses a much-needed rest in the hot weather, Chief Black, of the police department, has mounted his sergeants on bicycles. The police awheel have been able to cover their rounds more rapidly than when mounted on horses, and the chief is being congratulated by residents on the better protection afforded.

BIG BUSINESS SURE, SAYS HOOD

L. Hood, treasurer and general manager of Walthour & Hood, Atlanta, Ga., made a hurry call upon the Dayton factory recently. Mr. Hood was on his way to Indianapolis, and stopped in to tell about the prospect of big business with the Dayton and Yale bicycles throughout the Southeast.

NEW MORMON CYCLE CONCERN

SALT LAKE CITY, UTAH.—With an authorized capitalization of $2,500, the Meredeth Cycle Co. has been incorporated in this city. The incorporators are: Alfred Meredeth, Adolph Brodbeck, Herman Kesler, Oscar Carlson and Eugene Kesler.

VISITORS FROM NEW ORLEANS

DAYTON, Ohio, July 22.—H. A. Testard, one of the largest bicycle and accessory jobbers in the South, with headquarters at New Orleans, spent Tuesday afternoon at the Dayton factory. Mr. Testard has the agency for southern Louisiana on motor bicycles and bicycles.

MOTOR WHEEL ADAPTED TO RAILROAD VELOCIPEDES

Special Casting Perfected to Attach "Red Buzzer" to Railroad Machines; Outfits Will Be Sold Only Through Regular Smith Dealers; One Concern Orders Hundred Motor Wheels For Velocipedes, and Many Individual Purchases Are Made

MILWAUKEE, Wis., July 25.—Following the extensive tests made by railroad companies, both in this country and in Canada, of the Smith motor wheel as a propelling medium for velocipedes, the A. O. Smith Company, of this city, has perfected a special attachment that will render the "red buzzer" in every respect practical for its new use.

Quick Detachable Fitting

This special attachment consists of a casting which fits between the two lower rails of the velocipede, taking the place of a cross sill. It can be attached and taken off in a few minutes without making any alterations to the little railroad machine. The casting holds the motor wheel securely in place, so that it cannot move either to right or left, but stays constantly on the ball of the rail. The motor wheel is with this attachment able, however, to move freely up and down, and when not in use can be hooked to the back seat board of the velocipede.

The decision to perfect this attachment was made by the A. O. Smith Company only after exhaustive demonstrations and tests, supervised by railroad officials and employees, which proved beyond a doubt the practicability of the motor wheel for the propulsion of velocipedes.

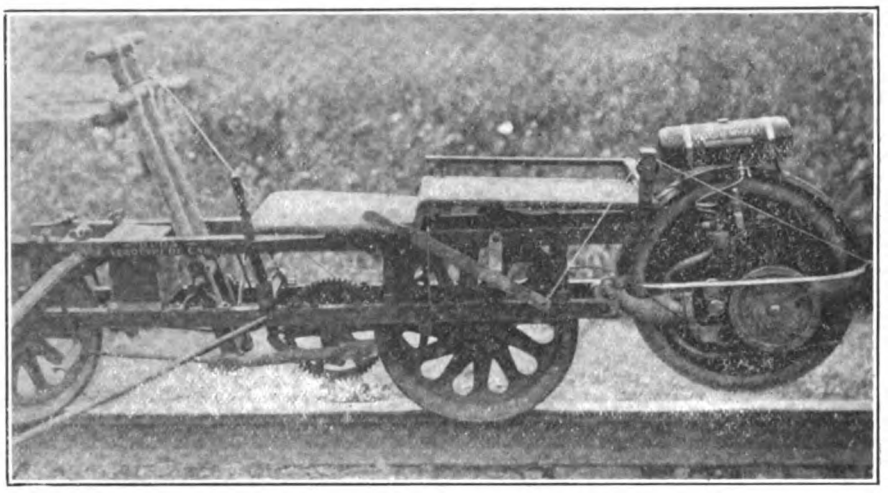
Only Through Dealers

Dealers who handle the motor wheel will be glad to learn that the "red speed demons" for velocipedes will be marketed entirely through them, affording an extensive field for the live dealer to cultivate. But if a dealer in any locality fails to take advantage of the opportunities to interest railroad men in the motor wheel, steps will be taken by the A. O. Smith Company to turn its agency over to a more active local representative.

That the use of the motor wheel to propel velocipedes has passed the experimental stage and is regarded by wise railroad men as thoroughly practical, is shown by the fact that one railroad has already placed an order for one hundred outfits. And in addition to this many individual purchases have been made by signal men, line men, inspectors, pump men, power men, agents and operators whose work requires miles of travel on velocipedes up and down the line every day.

The A. O. Smith Company is confident that any live dealer will find a considerable number of prospects in nearby railroad yards and terminals. Every railroad man, the company says, who has occasion to use a velocipede, will hail the motor wheel with delight, for it will banish the drudgery of hand pumping and will enable him to reserve his energy and strength for the really important work connected with his duties on the right of way.

Extensive plans are now being laid out by the A. O. Smith Company for marketing the velocipede motor wheel, and the new attachment just announced has already been fully covered by patents.



Hanger and Control Device for Adapting Motor Wheel to Railroad Velocipede

LONG TRIP PLANNED FOR MICHIGAN Y. M. C. A.

CADILLAC, Mich., July 25.—An opportunity to take a 200-mile bicycle trip to Grand Rapids and return, which will cover a period of six days, will be given to local boys who are 16 years of age or older, by the local Y. M. C. A. Physical Director Westerman, who is in charge of the tour, plans to have the youngsters leave this city on the morning of August 21, taking two days for the trip to Grand Rapids; to spend two days in the latter city and return home in the same time. Only minor details remain to be completed to make this one of the most enjoyable tours ever indulged in by local cyclists. One feature of the trip arranged for by Mr. Westerman is that of having Clarence Fuller, a local bicycle dealer, inspect and make minor adjustments on all bicycles used in the tour.

TO HOLD ROAD AND TRACK MEET AT TAUNTON, SEPT. 4

TAUNTON, Mass., July 14.—Albert E. Barber, who has promoted a number of successful bicycle races in this city this season, is planning to hold a big race meet here on Labor Day, September 4. The tentative program includes a ten-mile road race in the morning, starting from Broadway, while in the afternoon, a track meet will be held in connection with the scheduled races of the Gentlemen's Driving Club.

BIG CALENDAR OF EVENTS FOR ST. LOUIS CLUB

ST. LOUIS, Mo., July 25.—That the latter part of the outdoor season will be active for the St. Louis Cycling Club is evidenced by the calendar of events recently announced by the secretary. There will be three race meets, a picnic, a derby and a tour. The program follows:

Saturday, Aug. 5—Races, Fairgrounds Park. Sunday, Aug. 13—Annual picnic to Cromwell's. Sunday, Aug. 27—Annual Bicycle Derby through St. Louis County. Sept. 2-3-4—Annual Labor Day Tour. Saturday, Sept. 9—Bicycle Field Meet. Sunday, Sept. 17—Annual Bellefontaine Road Race.

CHICAGO CYCLING FANS SEE SNAPPY RACING

CHICAGO, Ill., July 24.—Two snappy cards of racing were staged for the patrons of the Riverview Velodrome last night and on Saturday night. Spills were numerous last night and almost every event on the card had a tumble or two; none of the riders, however, suffered serious injuries. Egisto Davini, the Italian favorite, and Ernest Kockler, last year's Velodrome star, divided the big honors last night, Davini accounting for the five-mile open and Kockler the third-mile open. R. Vanderpalt, the Belgian, and Davini won the feature sprint races on Saturday night's card, while Ralph Scheppens defeated Paul Kell and Olaf Lodal in a 15-mile paced race in 24:30. Summaries, Saturday, July 22:

Half-mile novice—Won by C. Braeckelaere; second, D. Cichini. Time, 2:18.

One-mile open, amateur—Won by Earl Stasch; second, Nick Becker; third, Fred Vinch. Time, 2:25⅕.

Third-mile repechage handicap, amateur—Won by Egisto Davini; second, Andrew Andresen; third, V. Baldacci. Time, 38⅘ seconds.

Three-mile open, amateur—Won by R. Vanderpalt; second, Willie Kell; third, Ernest Kockler. Time, 6:36.

Fifteen-mile motor-paced, amateur—Won by Ralph Schepens; second, Paul Kell; third, Olaf Lodal. Time, 24:30.

Summaries, Sunday, July 23:

Half-mile novelty race, amateur—Won by Carl Selbach; second, T. Lawson; third, C. Vansteenkisci. Time, 1:10⅘.

Third-mile open, amateur—Won by Ernest Kockler; second, Egisto Davini; third, Peter Guidotti. Time, 42⅖ seconds.

Five-mile open, amateur—Won by Egisto Davini; second, Ernest Kockler; third, Willie Kell. Time, 11:19.

Miss and out race, amateur—Won by Carl Stockholm; second, Nick Becker; third, H. Chiostri. Time, 2:36⅗. Distance, 1 mile and 293⅗ yards.

Two-mile handicap, amateur—Won by Andrew Andresen; second, Fred Vinch; third, M. Damlos. Time, 4:34⅗.

FRANK KRAMER IN GOOD FORM AT BOSTON TRACK

BOSTON, Mass., July 25.—Frank Kramer, the National champion, made his first appearance of the season at the Revere Beach track last night in a match race with Al Grenda, the Australian. Kramer defeated the Antipodean in two straight heats at a half-mile in rather handy fashion. Fred Herbert, the Fall River rider, won the 25-mile paced race from Charles Turville, Jr., Revere, and George Colombatto, the Italian, in the order named in 36:38 3-5. Dennis Connolly won the five-mile open for the professionals in 12 minutes, and the half-mile handicap for the same class was won by Warren Holbrook. Fred Hansen won the one-mile handicap for the amateurs in 2:02 1-5, and the three-mile open for that class was accounted for by Elmer Duncan. The time was 6:49 2-5.

BICYCLISTS TO AID SOLDIERS

DAYTON, O.—The Dayton Bicycle Club, one of the oldest and best known social and sporting clubs of the city, is planning to keep the Third Ohio Infantry supplied with all manner of supplies if it goes to the Mexican border. The club will act as a clearing-house for packages to be forwarded to the soldiers, and see that everything goes through without a hitch. A man paid by the club is to be stationed with the regiment to take care of things at that end. Only a few companies of the regiment are from Dayton, but the club will take care of the whole regiment.

EXHIBIT FOR ATLANTIC CITY MEET

"Million Bicycles" Committee to Show Poster Drawings, Window Trims and Publicity Results; Cycle Racing to Be Extended; Bicycle Propaganda Recommended

THE "Million Bicycles" committee will have an interesting exhibit at the Atlantic City convention. So large will this exhibit be that it will be necessary to stage it as a permanent feature of the convention in a room directly opposite the convention hall, where there will be some member of the committee in constant attendance.

The exhibit will consist of color drawings of the proposed poster series, window trims, newspaper advertising cuts, etc. A feature of the exhibit will be a large variety of articles suitable for prizes in bicycle races. The committee proposes to give a great deal of attention to bicycle racing during the coming year, and will urge manufacturers to offer general prizes rather than products of their own manufacture. This has already been done to some extent this year and wherever the committee's suggestion has been followed out, larger entry lists and greater interest have resulted.

The committee will make recommendations for a bicycle propaganda beginning the first of September and concentrated for the remaining months of the present calendar year upon promoting large sales of bicycles at the Christmas season. By going at the work early and securing the co-operation of all manufacturers and dealers, the committee is confident that retail sales of bicycles during the holiday season can be increased many times.

The committee assumes throughout its entire report that the time is ripe now for a strong, co-operative effort to increase greatly the sales of bicycles at all seasons of the year and among all classes and so permanently establish the popularity of bicycle riding for pleasure as well as utilitarian purposes.

BEDELL TAKES FEATURE AT POINT BREEZE

PHILADELPHIA, Pa.—To Menus Bedell, who copped the prize in the 40-mile motor-paced race, the day's feature, went the lion's share of the honors in the Independence Day races staged on the Point Breeze track here. Bedell had Bobby Walthour and Vincent Madonna to contend with in the long grind, but the pace soon proved too fast for Walthour and he quit before completing half the distance. Madonna, however, soon grasped the lead away from his adversary, who had gotten away in the lead to a good start, and would, perhaps, have been first across the tape had it not been necessary for him to change mounts. Bedell completed the distance in 51:45⅗.

Three motorcycle races rounded out the card. The summaries:

Forty-mile motor-paced race—Won by Menus Bedell, Long Island; second, Vincent Madonna, Italy. Time, 51 min. 45⅗ sec.

Unknown distance motorcycle race—Won by Billy Armstrong; second, William H. Vanderberry; third, Henri St. Yves. Time, 1 min. 29 sec. Distance, two miles.

Two-mile motorcycle race—Won by Herman Veditz; second, Billy Armstrong; third, Henri St. Yves. Time, 1 min. 26⅗ sec.

Three-mile motorcycle race—Won by William H. Vanderberry; second, Herman Veditz; third, Billy Armstrong. Time, 2 min. 10⅗ sec.

McAVOY NAILS CRESCENT TITLE RACE AT 15 MILES

BALTIMORE, MD., July 25.—In a gruelling sprint of three-quarters of a mile, Wm. McAvoy defeated F. M. Sanborn last Sunday in the fifteen-mile club championship race of the Crescent Bicycle Club. The winning of the race gives McAvoy a lead of one point over Sanborn, who has a similar advantage on W. V. Iglehart, third place man in Sunday's race.

The start of the fifteen-mile saw McAvoy, Sanborn, Iglehart and Sherman at the tape. Iglehart was the first man to be eliminated after the gun, being thrown heavily from his wheel in a jam that occurred three miles from the start. The hot pace set in the first half of the race was too much for Sherman, who withdrew, leaving two riders to battle for the finish. Sanborn and McAvoy were on even terms until three-quarters of a mile from home, when Sanborn by a well-timed jump broke away from Mac. But the latter uncorked a burst of speed and soon covered his rival with dust. Time, 43 minutes, 30 seconds.

KOCKLER WINS TWO RACES AT CHICAGO MEET

HICAGO, Ill., July 24.—Ernest Kockler, champion of the city among the amateur cyclists, accounted for both cycling events at the games of the United Celtic societies, which were held at Gaelic Park yesterday afternoon. In the "Governor Dunne" open, a five-mile event, Kockler won from Peter Himschoot, the Belgian-American Cycle Club star; Egisto Davini, the Italian, and Van Riet, the Belgian, in 14:07 3/5. In the half-mile open for the Sweitzer cup, Kockler defeated Peter Guidotti, the Italian; Roy McWhirter, a former skater, and Andrew Andresen in the order named. The time was 1:19 3/5.

BELGIANS STAGE TWO RACES

MISHAWAKA, Ind., July 25.—Two road races were recently promoted by the Belgian Cycling Club, one at 10 miles and the second at 25 miles. Oscar Spreibroek won the 10-mile event from Rene Van Hove, Henry De Schryver, Emil Van Bruane and Firmin Van Holsbeke in the order named. The longer race, which was featured by a wordy and physical battle, was won by Odiel Volder from Victor Huisse, L. Dhuivetter and Rene Van Hove, who finished as named.

RACING AT SAC COUNTY FAIR

SAC CITY, Iowa.—The Sac County Fair, to be held at Sac City on August 8, will feature motorcycle races. That will be the opening day of the program and the speed events are counted upon to assist in swelling the attendance. Bicycle races for boys under 16 years of age will also be staged. For full information, address the secretary of the fair, at Sac City.

Digitized by Google

CHAMPION FRANK KRAMER TRIUMPHS AGAIN

Defeats Spencer and Spears in Match at Newark Velodrome; John Staehle Is Hailed the New Amateur King; Australian's Clean-Up in Ten-Mile Open

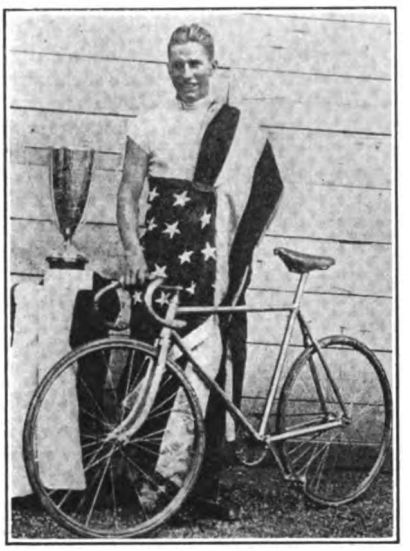
NEWARK, July 24.—Frank Louis Kramer, sixteen times winner of the American sprint crown, added another big win to his string at the Velodrome yesterday, when he defeated Arthur Spencer, the Canadian, and Bob Spears, the elongated sprinter from Australia, in a one-mile match race, Kramer taking the event in straight heats.

In the first heat Kramer went to the front at a little over two laps to go, the other two seemingly letting him ride his own race, while they fought for his rear wheel. Spears finally gave way to Spencer, and at the bell attempted to jump around both of them, but Kramer and Spencer fought off his effort to pass them, and they finished in that order. The second heat was practically a repetition of the first, and the finish was the same as in the first heat. Both Spears and Spencer showed the effects of their fall received in the "Alternance" race on Wednesday night, and neither appeared to be in the best of shape.

Spencer Retains the Brassard

Although beaten in the match by Kramer, Spencer had his opportunity to shine in the weekly running of the Brassard race in which he met Harry Kaiser, the New Yorker. Spencer lived up to all the good things expected of him and defeated the Bronx rider rather handily, reeling off the last eighth-mile in 12 1/5 seconds.

Due to the heat and the strenuous going in the ten-mile open for the professionals only thirteen riders survived out of a field of thirty-odd when the last mile was reached, Frank Kramer being among those who found the going too hard. Reggie McNamara, who, by his aggressive riding of late, has passed Champion Kramer in the all-around points table, went to the front at two laps to go and was never headed, although Alfred Grenda, his countryman, made a good bid for first honors. McNamara won by a narrow margin, and Grenda was nipped for second honors by Frank Corry, another native of Australia.



John Staehle and the Amateur Championship Cup

Eddie Madden, the local professional, and Hans Ohrt, last year's amateur champion, accounted for the other professional races on the card. Madden captured the unknown distance race for the invitation riders, and Ohrt accounted for the half-mile handicap from the 50-yard mark. McNamara, the lone scratch man, was unable to get through and finished fourth.

John Staehle, Newark's champion sprinter, left no doubt as to who is the best of the amateurs at the meet yesterday. Staehle won the two-mile national championship from William Spencer, a Canadian; Edward Byron, an Australian, and Tom Bello, the Brooklyn Italian, thereby further clinching his claim to the 1916 title and the Bamberger cup, a silver trophy donated by L. Bamberger & Co., which goes to the winner of the amateur crown.

Will Spencer Is Second

Staehle has 23 points to his credit, having won four ot the five races ridden and finished second in the fifth event. The others are credited with the following: William Spencer, 10; Tom Bello, 7; Ed Carroll, 6; Harry Hoffman and George Norgar, 3; Ed Byron, 2; Eric Paetz, 1. The two-third-mile handicap for the amateurs was accounted for by Ed J. Carroll, the Californian. Summaries:

Two-mile National championship, amateur—Won by John Staehle, Newark; second, William Spencer, Toronto; third, Ed. Byron, Australia; fourth, Tom Bello, Brooklyn. Time, 4:48.

One-Mile novice—Won by John Miller, Newark; second, William Hammer, Newark. Time, 2:56⅘.

Two-thirds-mile handicap, amateur—Won by Ed. J. Carroll, San Francisco, 20 yards; second, Gus Lang, Newark, 30 yards; third, Eric Paetz, Germany, 55 yards. Time, 1:20⅗.

Half-mile handicap, professional—Won by Hans Ohrt, San Francisco, 50 yards; second, Thomas Smith, Newark, 35 yards; third, Harry Kaiser, New York, 45 yards; fourth, Reggie McNamara, Australia, scratch. Time, 54 seconds.

One-mile Brassard race, professional—Arthur Spencer, Toronto, vs Harry Kaiser, New York. Won by Spencer. Time, 2:56.

One-mile match professional—Frank Kramer, East Orange; Arthur Spencer, Toronto, and Bob Spears, Australia. First heat won by Kramer; second, Spencer. Time, 3:10⅕. Second heat won by Kramer; second, Spencer. Time, 2:12⅘.

Unknown distance race, professional—Won by Eddie Madden, Newark; second, Frank Corry, Australia; third, Jake Magin, Newark; fourth, Charles Piercey, Australia. Time, 6:20⅗. Distance, 3 miles

Ten-mile open, professional—Won by Reggie McNamara, Australia; second, Frank Corry, Australia; third, Alfred Grenda, Australia; fourth, William Hanley, San Francisco. Time, 20:35⅗.

LEON DIDIER EASILY WINS FROM CARMAN

BOSTON, Mass., July 20.—Clarence Carman, the Long Islander, failed to make much of an impression in his match race with Leon Didier, the Frenchman, at the Revere track last night. Carman did not ride with his usual dash and Didier defeated him in two heats at 10 and 20 miles, the Frenchman having a lap lead in the short race and a seven-lap advantage in the longer event. The times were 13:35⅗ and 27:39⅕ respectively.

Ned Chandler, the negro sensation from this city, won the five-mile open for the professionals from Fred Herbert, the Fall River rider, and Tim Sullivan, who hails from New Haven. The above event started off with a bad spill in which most of the field took a tumble, but the majority pluckily remounted and finished. A two-mile tandem race for the professionals furnished plenty of action for the fans and was won by J. S. Grant and H. J. Reynolds, the Lynn-Forest Hills pair, in 4:12⅗. Charley Turville, Jr., captured the half-mile professional open, while the amateur open at a mile went to Fred Hansen of Revere. An amateur miss-and-out went to John Fardig after a plucky ride of a mile and three-quarters.

BICYCLE BUSINESS BOOMED BY DEALERS' RACES

KANSAS CITY, Mo., July 24.—That the local dealers' association in promoting bicycle races has increased interest in cycling and also the demand for machines and accessories is vouched for by nearly every member of the trade body. The publicity resulting from the bicycle activities backed by the merchants here has had a marked effect on sales, and more machines are seen out on the streets this summer than in any previous year. The dealers are now enthusiastically preparing for the races which will be held under their auspices on July 27.

Keen interest in the local association is being taken by W. W. Napier, of the United States Tire Co., who visited this city recently. Mr. Napier has promised to attend the races and will boost the association movement throughout his extensive territory.

VETERANS DIVISION WILL FEATURE CARNIVAL RUN

NEW YORK, July 25.—When the annual "Carnival of Sports and Pleasure" run of the New York Division of the Century Road Club Association leaves Columbus Circle at 9 o'clock Sunday, August 6, for Fordham Road, many of the old-time cyclists of the Metropolitan District are expected to be in line in the "veterans" division, which has been added this year. It is also the wish of the committee in charge to have the ladies participate as well. An excellent card of competitive events and a sumptuous luncheon have been arranged for by the committee.

MOTOR PACING AT CHICAGO

CHICAGO, Ill.—The management of the Velodrome is giving Chicago fans a taste of motor-paced bicycle races, and if the idea meets with approval such events will be continued. Plans are also under way to include motorcycle programs for the rest of the summer.

Digitized by Google

FOURTEEN STATES SHOW SLIGHT F. A. M. GAIN

All the Others Were Less Progressive During Last Fiscal Year Than in 1915; Minnesota Has High Mark with a Gain of 124

PROVIDENCE, R. I., July 25.—The report of Dr. G. B. Gibson on the secretarial work of his office for the year ending July 1, 1916, indicates that the activity of the department was maintained and a great mass of business details handled with no confusion and at minimum expense. Even those who have lamented the fact that the scope of the secretary's office is somewhat limited have been moved to comment upon the loyalty of Dr. Gibson, especially when it is taken into consideration that the F. A. M. Treasury vanished three years ago.

The secretary's office has received 7,337 pieces of mail during the fiscal year, an average of 20 pieces a day, and 28,848 pieces of mail have been sent out, an outgoing average of 78 pieces a day. The secretary handles mail every day in the year, excepting Sundays, no holidays being allowed to interfere with the work of the office.

In spite of the fact that determined efforts have been made in some quarters to stimulate interest in the F. A. M. during the past twelve months, the figures of Secretary Gibson show that gains over 1915 were made in only 14 States. All the others showed losses.

Maine, New Hampshire, Vermont and Massachusetts had membership losses, as compared with 1915, of 10, 79, 16 and 16, respectively. Rhode Island gingered up slightly and showed a gain of two members over the preceding year, while Connecticut struck a better pace and finished with a gain of 38. New Jersey had a loss of 70, New York suffered a falling off of 398 and Pennsylvania was 18 behind the showing of 1915. Little Delaware came through with a gain of 2, but Maryland and Virginia offset this, and then some, by falling off 49 and 5, respectively. West Virginia gained 14, but the District of Columbia, North Carolina, South Carolina, Tennessee and Georgia all failed to maintain the pace of 1915, their losses being 8, 14, 32, 33 and 46, respectively. Florida punched the membership clock for a gain of one.

Louisiana Gains Ninety

Alabama and Arkansas had losses of 27 and 35, respectively, while Louisiana gained 30. Mississippi lost one; Texas, 97; Oklahoma, 77; Ohio, 393; Indiana, 64; Illinois, 251; Missouri, 39; Wisconsin, 74, and Michigan, 66. Minnesota broke the monotony by coming in with a gain of 124, the biggest advance made in Federation membership during the year. North Dakota went behind 96; South Dakota, 20; Kentucky, 6; Nebraska, 4; Kansas, 82; Iowa, 114, and Utah, 29.

Nevada, New Mexico and Colorado helped to somewhat uphold the reputation of the West and Southwest for sportsmanship by showing gains of 22, 2 and 22, respectively. In the loss column, however, were found Arizona, Wyoming, Montana, Idaho, Oregon, Washington and California, the losses being 22, 25, 5, 6, 96, 58 and 98, respectively.

Canada showed friendliness by setting up a gain of five members, the Panama Canal Zone lost 7; the Philippine Islands gained three; Hawaii and Sweden each gained one; Alaska stood pat with a grand total of one member; Cuba had two in 1915 and lost one for 1916, and China stood pat with two members.

The total of affiliated members taken in for the year was 2,318; the unaffiliated list was 1,019; the renewals amounted to 2,589. These figures give a total enrollment for the year of 5,926. The total for 1915 was 8,247, so that the net loss throughout the country during the past twelve months was 2,321.

The comparatively important gain in membership in Minnesota, where 124 more riders were enrolled during the past year than in 1915, was due to the active campaign waged by the Minneapolis Motorcycle Club.

ANNUAL FINANCIAL STATEMENT OF F. A. M.

Treasurer Gibson's Figures Show Balance of $28.62 on July 1, But Salaries Amounting to More Than $2,500 Remain Unpaid

PROVIDENCE, R. I., July 25.—The annual financial report of Secretary-Treasurer G. B. Gibson, as prepared for presentation before the F. A. M. convention, shows that the total receipts for the year amounted to $7,533.48, and that the total expenditures were $7,504.86. The balance carried over on July 1, 1915, was $7.02 and the balance on hand July 1 of this year was $28.62. This apparent surplus is a mere drop in the bucket, however, when it is taken into account that salary bills remaining unpaid foot up to $2,596.63, exclusive of Competition Chairman Donovan's back salary, for which Treasurer Gibson did not have exact figures.

$1,680 Due to Gibson

Of the unpaid salary account, $1,680 is due Secretary-Treasurer Gibson for 48 weeks, dating from August 1, 1915, and $916 is the amount due Chairman William M. Johnson for legal action work, no salary having been paid him since August 7, 1915.

Under the heading of receipts, it is shown that $109.50 was received for 54 registered repair shop signs sold by Secretary-Treasurer Gibson. The sale of F. A. M. novelties, such as pins, cuff-links and other jewelery, brought in $216.75, and miscellaneous receipts of Dr. Gibson's office amounted to $23.05.

During the year 2,318 new affiliated members were enrolled, each paying one dollar. The unaffiliated new members brought in during the twelve months reached 1,019 from whom $2,037.50 was received in fees. The renewals of old members numbered 2,589, each contributing one dollar to the treasury. It will be seen that the membership returns for the year make a grand total of $6,944.50.

The heaviest outlay under the heading of expenditures naturally was for the office of the secretary-treasurer, the salary account for that department amounting to $2,689.80. Added to this amount is a total of $1,158.85 for office expenses during the year.

The expenses of President Coffman's office for the twelve months footed up to $988.35. The more important items under this heading were $104 for office rent and $780 for a stenographer's services. The Touring Bureau entailed an outlay of $36.75 for the year.

Legal Action Committee's Item

The outlay incidental to operating the office of the Legal Action Committee was $1,017.71. Chairman Johnson received $416.65 as salary for five months, up to August 7, 1915, and the next heaviest item was $520 as salary for C. E. Johnson, stenographer to the chairman.

It cost the F. A. M. $200 to settle with O. F. McLain, of Indianapolis, former chairman of the Competition Committee, who brought action to obtain $300 due him in salary. The former chairman compromised upon $150, and a fee of $50 was paid to the attorney in the suit.

Digitized by Google

The expenditures of six State commissioners amounted to $59.32 for the year, the more important outlays being in Indiana and Virginia, in which states considerable circularizing and other membership boosting work was done.

Printing, pennants and badges for the Ohio State convention entailed an outlay of $40 and the Ohio-New York endurance run ran up several small bills amounting to $22.50.

Six official F. A. M. collectors were paid $5 each for work during the year, and rewards for the recovery of motorcycles stolen from F. A. M. members footed up to $75. Three machines were recovered. Miscellaneous ungrouped expenses amounted to $18.61.

Providence M. C. members, headed by President Cleveland K. Joslyn, were active day and night seeing that conventionites were supplied with the needed information about meetings, hotels and other details. Vice-President E. L. Buffington, as vice-chairman of the Convention Committee could count himself, next to Swenson, the busiest man in the city of Providence.

Secretary John Edwards of the Providence M. C. was on the jump all the time. He has the secretariat for the Convention Committee and is clerk of the course for the races, so that, while not so evident to visitors as other club members, John is right on the job.

DONOVAN'S REPORT SHOWS DEFICIT

Annual Statement Shows That Competition Chairman's Office Is Short Nearly $2,000—Liabilities Include His Salary

PROVIDENCE, R. I., July 26.—John L. Donovan, chairman of the competition committee, in his official report, showed that there was an actual deficit of $1,924.30 as regards his office. Of this sum, $965 is due unpaid referees, $975 is salary due Chairman Donovan, and $220 due the manufacturer of medals not yet received. A further sum of $172 is listed, this being an advance made by the chairman from his personal funds during the winter months to keep the office running.

Part of the deficit is explained by the statement that in the Fall of 1914, at the orders of President Coffman, $1,000 was turned over to Treasurer G. B. Gibson and $166.66 paid to Legal Action Chairman Johnson. The report shows that for the fiscal year receipts were $4,096.49, while disursements to the sum of $3,909.36 were made. The balance on hand July 1, 1915 was $285.70.

Following is the report:

RECEIPTS

Balance on hand July 1, 1915	$ 466.29
215 sanctions	2,547.00
Membership applications and renewals	212.00
Medals	600.00
Registration of riders	94.50
Protest fee	5.00
Stamps	.70
Advancement by J. L. Donovan toward maintenance of office during winter months	172.00
Total receipts	$4,097.49

DISBURSEMENTS

Office rent	$ 420.00
Referee fees	696.00
Membership applications and renewals (GBG)	212.00
Medals	149.00
J. L. Donovan, salary to Sept. 30, 1915	850.00
C. E. Johnson, salary to June 30, 1916	795.00
Daily stamp purchases	77.35
Chicago Telephone Company	110.41
Western Union Telegraph Company	37.05
Postal Telegraph Company	64.65
Miscellaneous expenditures as per sheet	451.33
Total disbursements	$3,861.79

LIABILITIES

Unpaid referees	$ 965.00
J. L. Donovan, salary September 30-June 10, 1916	975.00
Medal manufacturer, balance due for medals not yet received	220.00
Total	$2,160.00
Balance on hand July 1, 1915	285.70

MISCELLANEOUS EXPENDITURES

Protested checks	$ 9.35
Protested checks	1.57
Printing	12.00
Exchange on checks	4.85
Wm. M. Johnson, salary advancement by J. L. D. on Legal Action Account	166.66
Expressage	.64
J. B. Newton	17.50
Incidentals	3.68
J. C. Allen, refund on sanction	3.00
Printing	27.96
Printing sanction books	26.50
M. C. Jenkins, refund on sanction	10.00
Exchange on checks	5.10
Baskin, C. W., refund	5.00
Bank charges and exchange	2.50
Incidental	4.62
J. L. Donovan, refund advancement	150.00
Incidentals	.40
Total	$ 451.33

UNFAIR DODGE CITY MEASURE REPEALED

Ordinance Permits Dealers to Stay in Business District, but Requires Fireproof Structures for Garages and Shops

DODGE CITY, Kas., July 24.—The objectionable ordinance, No. 454, which was passed by the Board of Public Commissioners and signed by the Mayor on July 7, has been repealed, much to the joy of Dodge City motorcycle dealers. The old ordinance sought to expel motorcycle "garages" and repair shops from the main business district and gave the dealers only ten days to seek new quarters and move to the same under penalty of $100 fine. A new ordinance replaces the old one.

The victory was obtained with the assistance of the M. M. A., F. A. M. and the business men of Dodge City. The latter stood by the dealers to a man, and freely signed a petition asking the repeal of ordinance No. 454. The business men went further and secured legislation which puts the dealers on a better footing than before the row started.

The new ordinance, No. 456, permits the dealers to open shop anywhere within the business district, but prohibits them from the residence district. It specifies fire-proof buildings for motorcycle garages, also. Agent Combs, representing the Harley-Davidson, will be forced to move under the new legislation, as he is just outside the main business district, while Indian representative Alexander and Excelsior agent Center will probably have to move, build or get a building of the specified requirements. Plenty of time will be given for the dealers to secure the proper locations and buildings.

SENECA LEWIS A BENEDICT

GREENSBURG, Pa.—General Manager Seneca G. Lewis, of the Pennsylvania Rubber Co., of Jeanette, Pa., and Elizabeth Ann McFall McAfee, of this city, were married on July 3 at the home of the bride in Sandusky, O. The Lewises will make their home in this city, which is only a short distance away from Jeanette.

BINGHAMTON RIDERS, BEWARE!

BINGHAMPTON, N. Y.—Chief of Police Cornelius P. Cronin, of this city, announces that mortorcycle riders who have not yet purchased 1916 license plates must get them at once, or put their machines in storage. Motorcyclists who appear on the streets hereafter without the proper plates will be arrested.

MUST BEHAVE IN MERRILL

MERRILL, Wis.—The local Council has voted to put a motorcycle policeman on the force to assist in curbing speeders. Special attention will also be paid to keeping bicycles off the sidewalks within the city limits.

PRIZE AWARDS ANNOUNCED IN DISPLAY CONTEST

BRISTOL, Conn., July 25.—At a recent meeting held in this city the committee of awards of the "Million Bicycles" Committee awarded the prizes in the newspaper advertising and window display contests:

For Ads Appealing to Men and Boys.

First prize $50, Jones Cyclery, Riverside, Cal.; second prize $25, P. B. Rutan & Son, Elmira, N. Y.; third prizes $10 each, Dan H. Willis & Co., Canton, O., and Union Supply Co., Toledo, O.

For Ads Appealing to Women and Girls.

First prize $50, Marshfield Cyclery, Marshfield, Ore.; second prize $25, A. D. Swanson, Galesburg, Ill.

Special Mention.

The George Worthington Co., Cleveland, O.; Landau's, Wilkes Barre, Pa., and the co-operative ad of the Terre Haute Bicycle Dealers entitled "My Life Story."

For Displays Appealing to Men and Boys.

First prize $50, C. R. Mahrer, with H. A. French & Co., Baltimore, Md.; second prize $25, The Remelin Co., Cincinnati, O.; third prize $10 each, Heagy Bros., Harrisburg, Pa., and E. G. Koenig's Sons, Newark, N. J.

For Displays Appealing to Women.

First prize $50, G. H. Westing Co., Indianapolis, Ind.; second prize $25, Meredith Motor & Bicycle Co., Salt Lake City, Utah; third prize $10, J. M. Antes, Jr., Elmira, N. Y.

Smith Motor Wheels

REPAIRING AND SUPPLIES

ST. JOSEPH, MICHIGAN

The most any dealer can say for the Smith Motor Wheel is none too much. We started with it in a sort of skeptical way but now depend upon it to make a good share of our profits. After putting a little punch into the selling of the first few, the sales come easily and quickly.

New bicycles, saddles, handle bars and etc. go with almost every sale, and a machine once sold becomes your best advertisement.

It is worth while to sell something that you know will give no trouble to your customers and do more than you claim for it.

Wishing the Smith Motor Wheel greater success,

Yours truly,

CLARK CYCLE COMPANY.

Dealer Clark has already sold 59 Smith Motor Wheels. Ask us for a thousand other prosperity expressions like that above. Better than that become a Smith Motor Wheel dealer right now, and pocket profits with Clark and 1999 other Smith Motor Wheel Dealers.

In the Dealer's Realm

BRISBANE CHIEFTAIN VISITS THE BIG WIGWAM

AMONG recent visitors to the plant of the Hendee Manufacturing Company at Springfield, Mass., was James Johnston, director of the Canada Cycle & Motor Agency, Queensland, Ltd., of Brisbane, Australia, Indian representative for that section of the Australian continent. Mr. Johnston is a typical Australian, combining the aggressiveness of the Queenslander with the conservativeness of the Briton. He is combining business and pleasure on his trip to this country, taking in as he does the principal points of interest and visiting numerous relatives and friends as well as business acquaintances.

Mr. Johnston made a thorough inspection of the big Hendee plants during his visit and expressed himself in glowing terms as to the thoroughness of the methods of manufacture and organization. He said that in Queensland, Indian sales far outstrip those of all other makes, and that the big red twins with Powerplus motor are in evidence everywhere.

The illustration at the left shows his establishment, in which he is associated with A. V. Dodwell. Messrs. Johnston and Dodwell took over a small store on this site some ten years ago and four years later erected the building shown. It is now becoming too crowded for the firm's business. There are some 170 employees in the plant, and the company has a chain of 400 sub-agents for the Indian throughout Queensland. Mr. Johnston's portrait appears at the right.

SOUNDS WARNING ON ACCEPTING CHECKS

W. D. Isham, Harley-Davidson Credit Man, Speaks Plainly to the Dealer Who Is Lax on This Score—Cites an Instance

MILWAUKEE, Wis., July 18.—Perhaps it does not need even so much as a warning from a credit man to convince most dealers of the fallacy of accepting a check from a stranger as payment for a motorcycle unless the document is certified, but nevertheless, feeling that his words might save many a dollar for some unsophisticated dealer, W. D. Isham, who holds down the credit desk at the Harley-Davidson plant, is sounding a note of warning on this score.

The incident which invited the warning was prompted by a letter from S. C. Hamilton, Pittsburgh, Pa., who accepted a check for $378.75, covering a Harley-Davidson with sidecar, lamp, tank, horn and back rest, from a party who represented himself as Stanford Brock, 227 S. St. Clair St., Pittsburgh, Pa. The check was drawn on the First National Bank of E. Palestine, Ohio, where the alleged Mr. Brock said his father lived and was in the oil business. The check came back from the bank marked "No such party," and now Mr. Hamilton is endeavoring to locate the machine, also the party who purchased it, if possible.

The Harley-Davidson left Mr. Hamilton's place on June 30, 1916, and Mr. Brock is described as being 5 feet 7 inches tall, weighing about 135 pounds, rather dark, good looking, and an excellent talker.

"No dealer should accept a personal check from anyone who he is not certain is perfectly good," said Mr. Isham. "Hamilton has been stung with an old, old story, but on the other hand it is one which most concerns fall for. For the good of the retail motorcycle business at large, more care should be used by dealers in the matter of accepting checks.

"If the customer happens to be from out of town, instead of being afraid of offending him by requesting him to allow you to telephone to find out whether the check is good or not, they should be perfectly frank and honest with him.

"Here at the factory I have no difficulty whatever when a customer presents a personal check and wishes to take away a machine, in getting him to authorize me to call up the bank regarding the check, and invariably at the customer's own expense. By putting it up to the customer by asking him if he would not do the same thing himself, he will have little or no difficulty. Checks should be scrutinized as carefully as money for a counterfeit bill.

An Active Association

"The Credit Men's Association is rapidly passing the Bad Check law on the law books of the several States. At the present time very stringent laws exist in the States of California, Colorado, Florida, Idaho, Kansas, Nebraska, Nevada, North Dakota, Vermont and Washington.. There are laws of a much weaker nature, but still covering this same evil in the States of Alabama, Arkansas, Georgia, Idaho, Indiana, Kentucky, Louisiana, Maine, Maryland, Minnesota, North Carolina, Oklahoma, Rhode Island, South Carolina, Tennessee, Texas, Utah, Virginia, West Virginia and Wyoming.

DEALER WANTS KNOCKDOWN MOTORCYCLES

High Shipping Costs Limit Popularity of American Motorcycles in Australia, Says E. L. Brown—How British Makers Manage

SAN FRANCISCO, July 10.—E. L. Brown, of the house of E. W. Brown, a large motor importing and distributing house of Melbourne, Australia, recently spent several days in San Francisco, and is now visiting manufacturers in the East, where he expects to spend a month or more. Mr. Brown's firm handles several English makes of motorcycles: the Rudge, A. J. S., and J. A. P.; and has for some time had the agency for the Henderson and Dayton lines, which it distributes over a large part of Australia.

Mr. Brown says Australia is a great motorcycle country, and he finds that the American machines are very attractive, the principal drawback being the high price as compared with those of British make, due largely to the high cost of shipping. In this connection his method of handling the British machines is interesting. His firm maintains quite a large and well equipped manufacturing plant, in which English and American equipment are about equally used. Instead of importing the complete machines from England, only the motors are purchased in finished form, the frames being made up and mechanism assembled in their plant, which greatly reduces the cost. It is also of some interest to note that the Eclipse clutch, made by the Eclipse Machine Co., Elmira, N. Y., is used on these machines.

Mr. Brown's principal object in this country is to make arrangements with American manufacturers to ship the machines in knockdown form, as in that way he believes it will be possible to make a price that will give them a fair chance in competition with European makes. He expresses confidence that, on a basis of equal prices, the American motorcycles will find a very large sale in Australia.

SNAPPY TRADE PARAGRAPHS FROM LOS ANGELES

LOS ANGELES, Cal.—C. Will Risden received his 19th carload of motorcycles since the first of January a week ago. Eleven of these carloads were of Indians and eight of Cleveland lightweights. The present carload is awfully sick looking, as most of its contents have been disposed of before it arrived.

MANAGER THOMAS C. BUTLER, JR., of the Risden establishment, is happy over police deals recently closed. The city of Orange has purchased Powerplus models for the water and police forces, and El Centro and Uplands have both bought Indians for their police. The Long Beach police force has also taken an Indian Powerplus. All machines did their 70 miles or better on test and are now running on the road.

The El Centro police business brought Agent Guy Urquhart's figure for the week up to four orders.

BILLY GURR, handling the Indian in San Bernardino, was a visitor to the Risden store on South Olive street the other day, this being his third visit for the year. He came on both business and pleasure. Tommy Butler acted as host to Gurr while he was in Los Angeles.

KANSAS CITY WIGWAM IS SCENE OF ACTIVITY

KANSAS CITY, Mo., July 24.—Charlie Hanson, the local Indian man, is wearing a big, broad smile these days. "Business was never so brisk before," he says. "The Power Plus has made a hit with the riders and they are going fast. I have already sold out my entire allotment of Featherweights and wish I had some more." The volume of business in parts has assumed such large proportions that Hanson has found it necessary to take on Frank Kleuver, formerly of the Hendee branch here, to devote all his time and attention to the parts department.

NEW NASHVILLE COMPANY

NASHVILLE, Tenn.—A charter has just been filed in the Register's Office by the R. M. Rust Company, which will handle motorcycles, bicycles and accessories. The capital stock is $2,500, and the members of the company are Joseph A. DeMattee, Philip Hirsch, Rosa May Rust, H. F. Galloway and T. E. Vaughn.

GOODRICH

Note the famous Goodrich Safety Tread same as used on Goodrich Automobile Tires

ADVERTISED "FAIR-LIST" PRICES

23 x 3 in. (C. C. Rim)	$9.90 each
28 x 2¼ in. (C. C. Size)	$8.85 each
29 x 2¾ in. (OldTypeRim)	$8.85 each

The Jim-Dandiest tire of 'em all—

—You "scoop" the field when you push the sale of Goodrich Motorcycle Tires.

—That tough black BAREFOOT RUBBER used in their treads *alone* puts them in the blue-ribbon class.

—Because *never* has there been such sturdy, long-wearing, puncture-preventing rubber stock.

—It was first used on the famous Silvertown Cord Tires.

—Then on Goodrich Fabric Tires.

—And now on Goodrich Motorcycle Tires (and GIANT Bicycle Tires.)

—No other manufacturer can use BAREFOOT RUBBER.

It's a secret compound—and carefully guarded. Only its black *color* can be imitated—its exclusive advantages, never.

—It has been and continues to be advertised to over 60,000,000 people.

—Everyone has heard about it.

—Behind it is the strongest, most resilient fabric carcass that any motorcycle tire has.

—The "balance" is perfect. The fabric lasts as long as the BAREFOOT RUBBER tread.

—And, believe us, that is *some* length of time.

—Every Goodrich Motorcycle Tire wins you a "booster." Start pushing them and you'll land on top of the heap with business keeping your bank balance fat and rosy.

—Other dealers find it so. Why shouldn't *you?*

—Take a minute now and drop us a line.

MOTORCYCLES FILL A GAP AT CANADIAN CAMP

Every Battalion at Camp Borden Near Toronto, Where 32,000 British Overseas Troops Are Recruited, Has at Least One Two-Wheeler—Replace Horses

CAMP BORDEN, Ont.—The motorcycle has been adopted for many uses at Camp Borden, the new military camp for 32,000 overseas troops recruited in Ontario. The Government area is situated 75 miles north of Toronto in the heart of an unsettled district. Previous to the establishment of the great tented city here, the land consisted of a trackless veldt, known as Pine Plains, and there were many expanses of untrodden bush. The camp grounds, including sections for manoeuvres, rifle ranges, trenches and parade areas, measure about 12 miles square. Incidentally the soil is almost pure sand.

It was soon found that the life of a horse at Camp Borden was not more than one week. This is military parlance and means that a horse was not in a working condition after one week's experience here. A number of officers and men have therefore turned to the iron steed, the motorcycle, as a mode of conveyance through the desert-like sands of Borden. Each of the 32 battalions has at least one motorcycle which is used for special duties and more machines are arriving every few days. The dust arising from the sand is said to be very hard on the chains and other working parts of a motorcycle but they are giving much better satisfaction than horses, which suffered from both dust and heat.

Captain Coventry, intelligence officer attached to headquarters, uses an Indian motorcycle almost constantly in the performance of his duties.

"The Ice-Cream Special" is the name applied to a Harley-Davidson motorcycle and sidecar which is part of the equipment of the 170th Mississaugas. This machine is used mainly in trips to the camp's railway station for loads of ice-cream to be consumed by perspiring officers and men of this battalion. This outfit is driven by Sergeant Celan.

A Place of Distances

Camp Borden is a place of distances. From the camping grounds to the ranges is a distance of three miles and to the ceremonial parade grounds to the administration building is five miles. From the camp hospital to the athletic stadium which has just been constructed is another four miles. A telephone system is in use but the orders are generally written instructions which must be delivered by messenger. About a dozen of the despatch carriers use motorcycles or bicycles in the delivery of these messages.

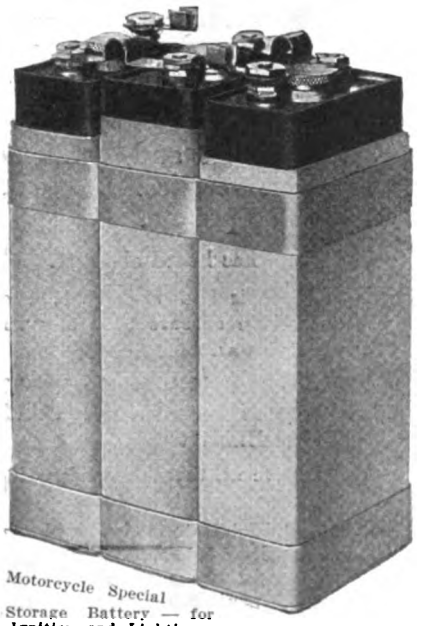
A number of visitors to the camp each Sunday are motorcycle riders from various Ontario cities. A party of six Excelsior and Henderson motorcyclists reached the camp last Sunday from Toronto, headed by Percy A. McBride, the Toronto dealer. The latter came here primarily for the purpose of studying local conditions with a view to showing the military authorities how motorcycles can be still more widely employed in camp work.

MONTREAL SEEMS ASSURED OF A MOTORCYCLE CLUB

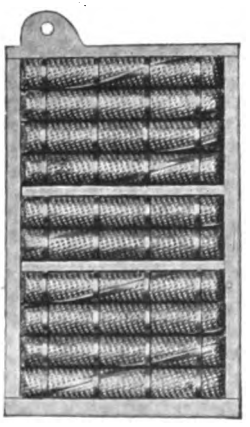
MONTREAL, Quebec.—Still another attempt is being made to organize a motorcycle club in Montreal. The leading spirits in the latest campaign declare that this will be the final effort, as the club looks assured. A preliminary organization meeting was held at 532 St. Catherine street, West, on Tuesday night, July 4, and another session has been called, to be held in two weeks' time. Montreal cannot yet boast of four hundred motorcycles.

UXBRIDGE RACES AUGUST 7

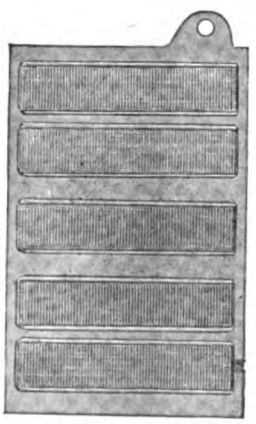
UXBRIDGE, Ont.—Motorcyclists of surrounding cities and towns are being notified by Uxbridge officials that motorcycle races will be held on the local half-mile track on Civic Holiday, August 7. A number of Toronto riders are expected for the occasion.



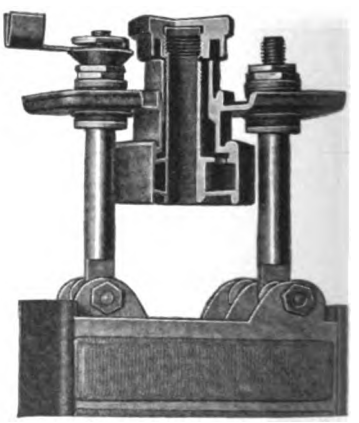
Storage Battery — for Ignition and Lighting.



Positive Plate: Steel Grid Holding Round Tubes of Nickel Hydrate. There are Two Such Plates in the Motorcycle Cell



Negative Plate: Steel Grid Holding Flat Pockets of Iron Oxide. There are Three Such Plates in the Motorcycle Cell.



This arrangement of top allows free escape of non-corrosive gases, but prevents spilling though cell is laid on any of its four sides.

The Non-Acid Steel-Encased

Edison Motorcycle Special

Alkaline Storage Battery

Active materials are not soluble in the solution and are securely held in steel tubes and pockets. Solution is non-acid, non-corrosive, cannot cause sulphation. Container, poles and plate grids are made of steel—unbreakable.

Light, compact, simple to install, inexpensive to maintain and gives genuine Edison light. Occasional filling with distilled water and a renewal of solution about once a year, is the only care required

Always ready—always reliable—may stand idle indefinitely without injury.

Write for Bulletin 883.

JUST five years ago, on May twenty-ninth, the first Pope Lightweight was shipped from the Westfield factory.

Since then thousands of this, the first lightweight model built in our country, have been sent to every corner of the globe.

They have been put to the test of continuous service on the bullock trails of India and on the traffic-congested streets of the biggest American and European cities.

They have covered mountain trails from New Mexico to Newfoundland.

And they have never brought forth anything but praise for their sturdy strength, unexpected power and almost unbelievably small gasoline consumption.

Time, the unprejudiced judge who must pass on every product before it becomes standard, has put the mark of the world's approval on what is now the Most Popular American Lightweight.

Such a machine is one that you can afford to ride, to sell, and to boost with all the power at your command.

Westfield Manufacturing Company

(Successors to the Pope Mfg. Co.)

STOVER MOVES QUARTERS TO MAIN STREET

HUNTINGTON BEACH, Cal.—Charles G. Stover, of this place who has had a bicycle store and repair shop here for the past four years, moved on recently from Third to Main street. In addition to his repair shop and new bicycles of the lines jobbed by Appeal Manufacturing & Jobbing Co., and Pacific Motor Supply Co. of Los Angeles, he carries, in his case, one of the most complete and best arranged parts layouts in Southern California. His window display is an exceptionally complete and well arranged layout of accessories.

Stover finds that by featuring parts and accessories in this open and orderly way riders pick out things they would never dream of ordering if they did not see them. In his repair shop he handles repairs on motorcycles from surrounding country for many miles.

WON DOUGLAS-TUCSON ON BRAND NEW MERKEL

LOS ANGELES, Cal.—T. E. Berry, Southwestern distributor of the Flying Merkel and Miami products, tells how E. R. Highfill won the Douglas-Tucson road race on a machine he had never had a chance to ride until he mounted it for the race.

One June 30, Highfill wired to Berry that he wanted to enter the race and asked him to ship a machine. Berry took a Flying Merkel off the floor, tuned it up thoroughly and expressed it to Douglas, where it arrived in time for Highfill to just get in the race. Highfill had to enter without even making a trial spin. He won by 11 minutes over his nearest competitor.

EXCELSIORS ARE GOING AT BENTE'S PLACE

SAN FRANCISCO, Cal.—There is nothing slow these days around the store of Fred H. Bente, Excelsior agent. He has been getting a big call for used machines right along and now that he has some Series 17 models they are starting off in fine shape, three of the new arrivals having been sold last week.

KIEFFER BACK ON THE JOB

PHILADELPHIA, Pa.—Friends of John E. Kieffer, who is employed by Alexander Klein, the local distributor, as salesman and demonstrator, is reported to be on the way to complete recovery from his recent accident. Kieffer suffered a compound fracture of the right leg, and was confined to a hospital for six weeks. He is now being congratulated on the fact that he is able to operate a motorcycle once more.

A LIGHTWEIGHT'S FINE SHOWING

CINCINNATI.—The Brendamour Sporting Goods Co. has learned that Al. Turner, who recently went on a trip with an Excelsior lightweight, made an average of 25 miles an hour on the road, the total trip one way being 425 miles. He got 45 miles an hour out of the machine now and then, and had no trouble whatever with it.

SELLS MIAMI MOTOR BIKES THROUGH CYCLE STORES

LOS ANGELES, Cal.—T. E. Berry, handling the Miami Motor Bicycle in this city, is extending his sales by placing subagencies in various bicycle shops through out the city. He assists the dealers by putting in special Miami window displays, employing blue and white crepe paper decorations and catchy window signs.

On the dealer's floor is placed an exhibition machine. Berry allows the dealer an additional Miami for a demonstrator, both machines being consigned under option of purchase. The dealer receives a commission on each sale.

HAVERFORD STOCKS UP ON MOTOR WHEELS

PHILADELPHIA, Pa.—The Haverford Cycle Company, anticipating a heavy demand for Motor Wheels during the warm months of July and August, has stocked up on the little bicycle boosters, the number on hand now being close to 90. The rainy season in this section retarded sales to a certain extent, but Manager Breen has seen the fair and warm spell coming and he and his assistants are driving hard for the results that are now due.

SALES RECORD IN MIDDLETON

MIDDLETON, Ohio.—The Butler Motorcycle Company, managed by Mr. Pratt, has sold 22 Excelsior motorcycles this season. This is the best record for motorcycle sales ever recorded in this vicinity.

Positive Grip

due to the generous design and construction—we think it is the best and strongest rat-trap pedal you ever put your foot on.

The No. 4 Standard

is a big, substantial, motorcycle-type pedal. It stands for the utmost mechanical value.

With a pair of these pedals on your wheel you are equipped with correct, up-to-date foot-holds, fairly representative of our business in the cycle industry.

Our products comprise:

Diamond E Spokes and Nipples for bicycles, motorcycles, tricycles, velocipedes, invalid chairs, sulkies, carriages, cyclecars and automobiles. Pedals for bicycles, tricycles, velocipedes and motorcycles. Toe clips for bicycle pedals. Emergency axles for pedals.

SOUNDS WARNING ON ACCEPTING CHECKS

(Continued from page 43.)

"The law in the first-mentioned States reads as follows:

"'Any person who with intent to defraud, shall make or draw or utter or deliver any check, draft or order for the payment of money upon any bank or the depository, knowing at the time of such drawing, making, uttering or delivering, that the maker or drawer has not sufficient funds in, or credit with, bank or other depository for the payment of such check, draft or order in full upon presentation (note, upon presentation, not at the time check is drawn) shall be guilty of a felony and upon conviction thereof shall be fined not more than five thousand dollars or imprisoned not more than five years, or both. The making, drawing and uttering or delivering of such check, draft, or order, as aforesaid, shall be prima facie evidence of intent to defraud. The word credit as used herein should be construed to mean an arrangement or understanding with the bank or depository for the payment of such check, draft or order."

SPEARS AND STAEHLE BEST AT NEWARK TRACK

NEWARK, N. J., July 20.—Bob Spears, the elongated Australian, and John L. Staehle, a member of the Bay View Wheelmen, won the feature races at the Velodrome last night. Staehle strengthened his claim to the amateur championship for the year by taking the one-mile title race for that class, while Spears won two of the three heats run in an "alternance" match race with Arthur Spencer, the Canadian; Frank Kramer, the champion; and Alfred Goullet, another Australian. Spencer, Spears and Goullet went down in a heap in the second heat and all three were badly bruised, Goullet suffering a sprained wrist. Summaries:

Half-mile handicap, amateur—Won by Ed. J. Carroll, San Francisco, 30 yards; second, Tom Fitzsimmons, East Orange, 15 yards; third, Anthony Attardi, Brooklyn, 60 yards; fourth, Frank Small, New York, 70 yards. Time, 57⅘ seconds.

One-mile championship, amateur—Won by John L. Staehle, Newark; second, Tom Bello, Brooklyn; third, Ed. J. Carroll, San Francisco; fourth, Eric Paetz, Germany. Time, 2:38⅘.

One-mile "Alternance" match race, professional—First heat won by Bob Spears, Australia; second, Frank Kramer, East Orange; third, Alfred Goullet, Australia. Time, 2:59⅘. Second heat won by Arthur Spencer, Toronto; second, Spears; third, Goullet. Time, 3:11⅘. Third heat won by Spears; second, dead heat between Kramer and Spencer. Time, 3:17⅘. Winner, Spears, 25 points; second, Spencer, 14 points; third, Kramer, 8 points; fourth, Goullet, 6 points.

Half-mile handicap, professional—Won by Eddie Root, Boston, 45 yards; second, Jackie Clark, Newark, 40 yards; third, Tommy Smith, Newark, 40 yards; fourth, Frank Corry, Australia, 35 yards. Time, 53⅘ seconds.

Five-mile open, professional—Won by Al Grenda, Australia; second, Jake Magin, Newark; third, John Bedell, Long Island; fourth, Reggie McNamara, Australia. Time, 9:31⅘.

LONDON CLUBSTERS MAKING LONG TRIPS

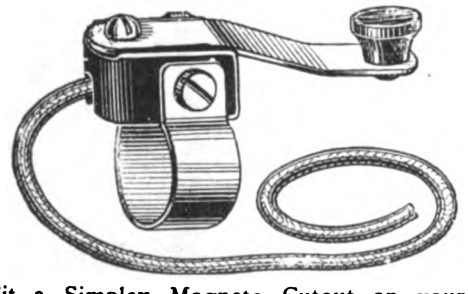
LONDON, Ont.—The London Motorcycle Club arranged for a club run to Springbank and a hill-climb there on Dominion Day, July 1, but this was called off to enable the members to follow their own riding inclinations. The local enthusiasts, accompanied by wives and sweethearts, scattered in every direction, a number of riders taking the short trip to Port Stanley, the Lake Erie summer resort, twenty-four miles away. A notable holiday ride was taken by W. England, acting president of the club, and Ken Clarke, when the pair made a flight to Oshawa, Ontario, 150 miles from here. England straddled his new Henderson while Clarke rode his Indian. They came home on the following day, Sunday.

The roads of Ontario have dried up at last and the riders are getting rid of a lot of pent-up touring enthusiasm. Fairly long trips have become the rule and longer rides are in contemplation.

RECIPROCITY QUADRUPLES CANADIAN VISITS

NIAGARA FALLS, ONT.—While the Canadian Customs officials are not keeping a distinct record of the American motorcycle tourists who have been entering the Province of Ontario since the establishment of a license reciprocity arrangement, the border officers estimate that four times the number of riders crossed the line during last June than in the same month one year ago. Upwards of one hundred and fifty motorcyclists invaded Ontario during the month while less than forty licenses were issued to American riders during June, 1915.

PUT AN EMERGENCY BRAKE ON YOUR MOTORCYCLE AND BE SAFE



Fit a Simplex Magneto Cutout on your handlebar and be prepared for any emergency. The spark can be cut out instantly, without releasing the compression, which then acts as an effective brake.

Reduces Wear on Grip Controls, Clutch, Brake and Tires.

Over 28000 Miles of Service

"It is still in fine condition and I have not had to change any part"

THIS record enabled Vernon P. Cox, Secretary of Boys' Work of the Atlantic City Y. M. C. A., who rode his New Departure equipped wheel from Atlantic City, New Jersey, to Los Angeles, California, and return, to say: "I honestly believe that

The New Departure Coaster Brake

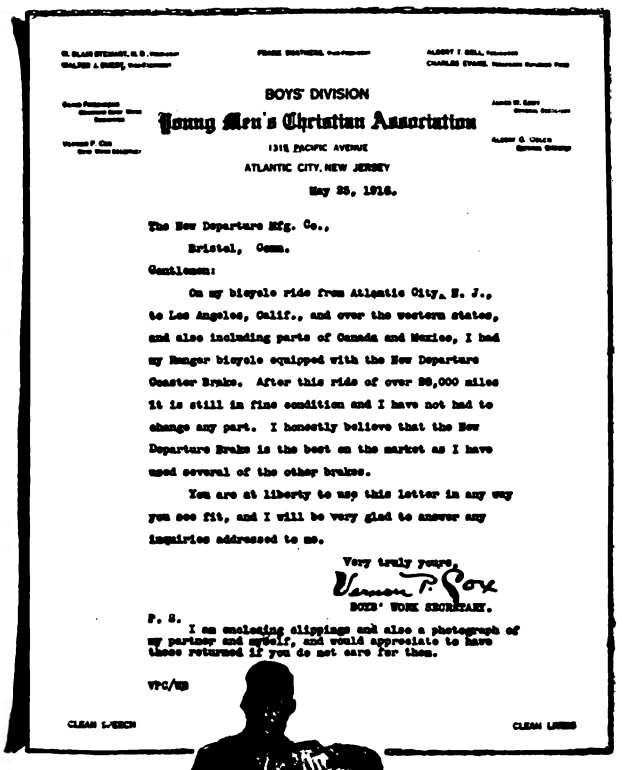
is the best on the market."

This is, indeed, a wonderful record of durability and consistent performance, over roads where often the very life of the rider depended upon the perfect control of his wheel.

There are thousands of New Departure Coaster Brakes in use today that have given even greater mileage during the years they have been in service.

Its ability to endure year after year in every kind of service and to stand up to its work in every emergency, are the great qualities that have made the New Departure the reliance of over 5,000,000 riders.

For these reasons, dealers everywhere now regularly specify the New Departure.



BOYS' DIVISION
Young Men's Christian Association
1316 PACIFIC AVENUE
ATLANTIC CITY, NEW JERSEY

May 25, 1916.

The New Departure Mfg. Co.,
Bristol, Conn.

Gentlemen:

On my bicycle ride from Atlantic City, N. J., to Los Angeles, Calif., and over the western states, and also including parts of Canada and Mexico, I had my Ranger bicycle equipped with the New Departure Coaster Brake. After this ride of over 28,000 miles it is still in fine condition and I have not had to change any part. I honestly believe that the New Departure Brake is the best on the market as I have used several of the other brakes.

You are at liberty to use this letter in any way you see fit, and I will be very glad to answer any inquiries addressed to me.

Very truly yours,
Vernon P. Cox
BOYS' WORK SECRETARY.

P. S.
I am enclosing clippings and also a photograph of my partner and myself, and would appreciate to have these returned if you do not care for them.

GOODYEAR STARTS COMMERCIAL CAMPAIGN

AKRON, O.—The Goodyear Tire & Rubber Company is promoting a "Commercial Motorcycle Campaign" in cooperation with motorcycle dealers throughout the country. The campaign has for its end the interesting of all dealers in the great possibilities of the two-wheeler and three-wheeler in the commercial field, and to prove the possibilities most convincingly.

"We are thoroughly convinced," says an official of the Goodyear company, "that the motorcycle delivery van is more efficient, practical and is a cheaper form of delivery than any other. If the dealers can only be led to see the facts of the case, there is absolutely no reason why they should not become sold on this proposition and the motorcycle industry receive a great boom in this field.

"With this in view, we are sending out a series of eight bulletins to dealers. To agents who will submit to us a list of prospects," concluded the official, "we purpose sending a series of four or five letters to all names on the list, showing where the motorcycle is cheaper, more efficient, etc. In other words, we are attempting to sell the dealer first on this proposition, and second, we are going to help the dealer bring about sales."

MORE THAN HE CAN DELIVER

HUNTINGTON BEACH, Cal.—W. R. Anderson, who has been in this city six months, has a sale for more bicycles than he can get delivered at present. He handles principally the Indian and Excelsior bicycles. Anderson is a man of eleven years in the automobile and motorcycle business. He is the Huntington Beach Indian agent and is an active booster for the Featherweights, which he expects will develop a good market among the industrial population of his city and surrounding ranches.

HELPED IN SUCCESSFUL PARADE

PHILADELPHIA, Pa.—When the Advertising Clubs of the World held their convention here recently, one of the features of the street parade was a squad of motorcycle riders furnished by the Philadelphia Motorcycle Club.

The motorcyclists acted as aids to the Marshal, and contributed largely to the success of the big demonstration. John Clark Simms, chief marshal of the pageant, remarked that it would have been difficult to get along without the services of the efficient motorcycle squad.

STAMPING COMPANY BUILDS

MILWAUKEE, Wis., July 25.—The Milwaukee Stamping Company, West Allis, is about to award contracts for a large factory addition, which it is estimated will cost about $20,000.

HEADS FEDERAL DISTRICT

CHICAGO, Ill.—E. P. Logan is now in charge of the Central District of the Federal Rubber Company, with headquarters in this city. He was formerly manager of the St. Louis, Mo., branch of the Federal firm.

STATEN ISLAND THE MECCA FOR C. R. C. A. RUN

NEW YORK, July 25.—Woodlawn Beach Staten Island, was the destination for the weekly club run of the New York Division of the Century Road Club Association, Sunday last. Arriving at Woodlawn the touring cyclists met other members of the association who went by rail. After lunch was served beach sports and ocean bathing were enjoyed by the entire party.

The return trip began after nightfall and Manhattan was reached after an adventurous ride over the dark and hilly roads. Next Sunday's ride will lead the cyclists to Flushing and North Beach, Long Island, the start to be made at 1 p. m., following the Pelham Parkway six-mile point race in the morning.

WANTS MOTORCYCLE PARTS

COMPONENT parts for motorcycles, such as engines, gearsets, clutches, hubs and bearers, are desired by an Australian manufacturer of motorcycles, now on a visit to this country. Those interested in providing such parts should address Kemsley, Millbourn & Co., Ltd., New York.

There was once a business man who couldn't be bothered answering the questions of his prospective patrons—but the sheriff made him answer a lot of 'em when he went around to spike a notice on the front door.

As a Matter of Record

If for no other reason than that of being able to keep a record of the life of the tires used on your motorcycle, the amount of oil and gas consumed per mile and the rate of speed at which you ride, it would be advisable to equip your motorcycle with a

CORBIN-BROWN SPEEDOMETER

"The Speedometer of Absolute Accuracy"

This is a practical money saving consideration, but there is another one equally important—a speedometer, an accurate speedometer, such as the Corbin-Brown, greatly enhances the pleasure of motorcycling.

It is the sort of companion every motorcyclist needs, for it is constantly telling him interesting things along the road, the speed he made on a certain smooth stretch, the exact mileage of the previous day, the distance between these two towns and numerous other worth-knowing bits of information.

Why forego this pleasure when your dealer is ready now to equip your motorcycle with the famous Corbin-Brown? See him today.

If There Was a Better Brake They Would Use It

Without a moment's hesitation. Men who rent bicycles need the best, have to have it, and they get it. If they could find a brake that did better work for them than the

CORBIN

DUPLEX COASTER BRAKE

they'd take it quicker than a wink. But they have not found a better brake. In fact they have not found one as good. So they use the Corbin Duplex and are perfectly satisfied. It does all the work that is required of it and just a little more.

It stands a hotter pace than any other brake on the market can stand and continues to operate with the same smooth, frictionless action for which it is noted. It is powerful, sturdy and durable and capable of standing up under the hardest strains to which it can be subjected. These are the simple facts of the case.

You can find out more for yourself by asking a man whose business it is to rent bicycles about the Corbin Duplex Coaster Brake. He will tell you and what he says is backed by actual experience.

Catalogs on request.

OLYMPIC CLUB MEMBER CAPTURES A RACE

SAN FRANCISCO, July 25.—Fred Hoffman, a member of the Olympic Club, won the one-mile cycle race, held recently at the Shellmound Park. James Hyerdoll, a clubmate, finished second and Ralph Welch, of the New Century Wheelmen, ran third. The time was 2:34. The race was somewhat marred by numerous spills, but was enjoyed by the large crowd on hand.

On Sunday, August 20, the California Associated Cycling Clubs will hold their semi-annual Australian team pursuit race at the Golden Gate Park. The trophy which goes to the winning team is a three-win affair, with the New Century Wheelmen having two wins to their credit. Entries have been assured from the Centuries, Samson Club, Olympic Club and the Garden City Wheelmen.

N. S. CYCLE ANNUAL OUTING BRINGS OUT VETERANS

MILWAUKEE, Wis., July 25.—The annual outing this year of the North Side Cycle Club commemorated its twenty-fifth birthday anniversary and was one of the most successful celebrations that the organization has ever staged. There were about fifty old-timers on deck for the start. President Louis Pierron was the center of attraction as he rode the same high-wheeler that he used when the club held its first outing, twenty-five years ago.

The old familiar Silver Spring course, going out the Green Bay and returning on the Port Washington roads, was used as the route to and from Thiensville where the participants enjoyed a chicken dinner. Among the prominent veteran Milwaukee wheelmen who attended were: J. W. Warnken, A. C. Runkel, Louis Pierron, Alex. W. Riebs, Charles C. Mass, F. Hausmann, Henry Stenzel, C. A. Rusch, Walter Dusold, Walter Sellke, Emil Kiehn, E. A. Schueppert, Edward Winkler, Dr. Nick Carter, Edwin A. Netz, George H. Schmidt, Alfred Steindler, Brownie Steindler, Otto J. Tank, William A. Zealley, Leo A. Kealner, Paul J. Kealner, F. A. Zimmermann, Fred W. Schmitz and Gerhardt Aussem.

KRAMER AND STAEHLE TIE IN TITULAR RACES

IN the running of the American championships for 1916 both Frank Kramer, the professional winner, and John L. Staehle, the Newarker who has the amateur laurels sewed up, have each scored the same number of points by taking four firsts and a second in the five titular races that have been run to date, each of the winners scoring 23 points. The table of the amateur championships run and the manner in which each rider scored in the races is given below:

Rider	¼m.	⅓m.	½m.	1m.	2m.	Pts.
Staehle	5	3	5	5	5	— 23
W. Spencer ...	1	5	1	0	3	— 10
Bello	0	1	2	3	1	— 7
Carroll	2	2	0	2	0	— 6
Hoffman	3	0	0	0	0	— 3
Norgar	0	0	3	0	0	— 3
Byron	0	0	0	0	2	— 2
Paetz	0	0	0	1	0	— 1

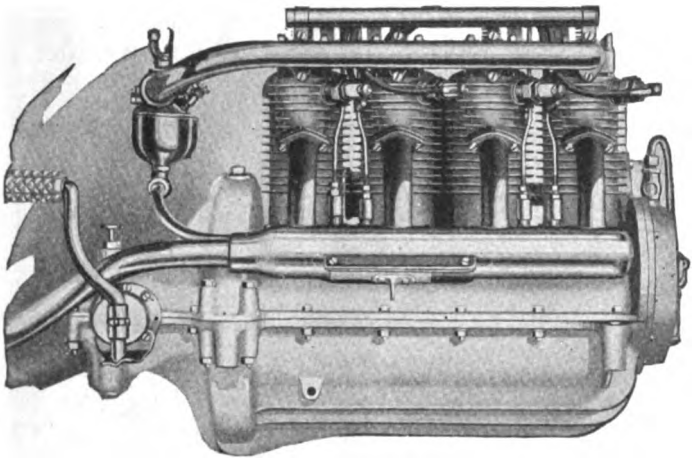
Five points for first, three for second, two for third and one for fourth.

GEORGE SERES DEFEATS CLASSY FIELD

BOSTON, Mass., July 23.—George Seres, the French pace follower, won the 40-mile paced race at the Revere Beach track last night. Seres at the finish had an advantage of one mile and one lap over Bobby Walthour, the Atlanta veteran, who finished second, while Victor Linart, the Belgian, finished a quarter-mile back of the Dixie man. Leon Didier, another Frenchman, was forced out of the race by a fall in the sixteenth mile when his tire gave way. Didier was badly scraped and bruised in the spill. Seres covered the distance in 58:37 3/5. Fred Herbert, the Fall River pro., won the five-mile race for that class from Tim Sullivan, New Haven, and Ned Chandler, the local negro. The time was 11:17 4/5. J. Hackett, Revere, won the half-mile amateur handicap in 58 4/5 seconds and J. Fardig, of Orient Heights, accounted for the two-mile amateur open in 4:34 4/5. A mile professional handicap went to Thomas Cutter, Everett, in 1:58 4/5.

MORE TAKE ON MOTOR WHEEL

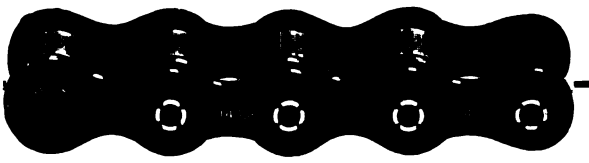
MILWAUKEE, Wis.—During the last two weeks of June, 1916, thirty-five new dealers were added to the Smith Motor Wheel roster. Among recent agents signed up for July, the A. O. Smith Company, makers of the Motor Wheel, announce R. Burk's Cycle Store, Tyler, Tex.; Thomas H. McGuire, Prince Albert, Sask.; and John Clements, Malta, Idaho.



OPTIMISM

Henderson dealers feel confident of *continued* success because their customers who are so pleased with their own machines will naturally advise their friends to buy at the same store. Thus Henderson dealers have seen their business grow consistently, and know that the growth will continue.

HENDERSON MOTORCYCLE CO., Detroit.



"149"

What the Rider Thinks

"I have a 'Diamond' chain on my Thor 9, 1914 model, Motorcycle which to date has been run 6,346 miles, according to the odometer, and I have been so fortunate as to not have a breakage in all these miles. However, some of the pins are slightly worn and before these broke I put in new repair links, to be on the safe side. Myself, I consider this a good record, considering the amount of hard usage I have given the chain, having done a good deal of rough mountain work." (*Name on request.*)

U.S. ARMY USES Prest-O-Lite for Motorcycles

Machine guns dismounted from Harley-Davidson motorcycles, which are equipped with Prest-O-Lite.

The Choice of Uncle Sam

PREST-O-LITE is used on the majority of motorcycles in the service of the U. S. Government. Right now Prest-O-Lite is seeing strenuous service with the U. S. Army in Mexico. Prest-O-Lite is used simply because it is the most reliable—and for no other reason. No frills go with an army; everything is measured by efficiency. And Prest-O-Lite is the truly efficient light—the light that stands the bumps and jolts, and gives safe, sure, penetrating light at all times and under all conditions.

Uncle Sam's choice should be your choice.

No Matter What Motorcycle You Buy

You can have it "Prest-O-Lite equipped." Ask your dealer about it. He can supply you with a very attractive equipment combination which includes **a Prest-O-Lite, a good lamp and a mechanical horn.**

This will start you right, and give you the greatest satisfaction at least cost.

Get complete information on motorcycle lighting now. We'll gladly send it on request.

DEALERS

You are losing good business if you do not handle Prest-O-Lite. "Cash in" on Prest-O-Lite sales in your store. Write for our proposition. It's a business getter.

THIS QUARTET OUT TO MEET ALL COMERS

GRAND RAPIDS, Mich., July 24.—Four riders here believe that they can defeat any picked quartet in the country when it comes to endurance stuff, and are open to offers from any team of the same number in the country. They are Byrne Hull, Red Heth, Johnny Foster and Mud Vandenberg. All are amateurs.

Hull holds the racing championship of this city. Heth has demonstrated his class in the recent Jack Pines run, as one of the three finishers. Hull would have been a finisher in the same run, except for four blowouts in the last stretch and having to ride with a sprained wrist. His time through the 14-mile swamp was the best of the field of entrants.

Foster and Vandenberg are veterans of many endurance contests. Vandenberg has also had considerable experience with aeroplanes and racing automobiles.

SIDECAR IN R. F. D. SERVICE

LOUISVILLE, Ky.—Kline Brothers, the Louisville Harley-Davidson agents, report the sale of a sidecar to Emmett A. Crenshaw, a rural carrier at Shepherdsville, Ky., who will use it in delivery of mails until a special mail delivery van which he has ordered can be delivered.

MILLER DOING WELL

LOS ANGELES, Cal.—Henry Miller, from Portland, Ore., is getting a fine start in the new store, which he opened this spring at Huntington Park. His stock of new bicycles includes the Hudson and Angelus models from F. M. Jones Sales Co., and he notes a strong demand for Fisk tires.

MOTORCYCLISTS PAID $41,155

COLUMBUS, Ohio.—W. H. Walker, Ohio Registrar of Automobiles, in a financial report made public recently, shows the receipts of the department for the fiscal year ending June 30, 1916, to have been $1,200,237. It cost less than $100,000 to operate the department, leaving more than $1,100,000 to be turned over to the Ohio Highway Department for the construction and repair of roads. Receipts from the registration of motorcycles for the year amounted to $41,155.

GIBRALTAR MAN WANTS AGENCIES

A. E. SERFATY, of Gibraltar, is in the market for agencies for motorcycles in both solo and sidecar forms. He is anxious to hear from sidecar makers in America.

Senor Serfaty also contemplates handling the Cygnet Rear Car for his territory, and writes that he has been greatly struck with its performance in this country. His business address is Apartado 106.

RODE ON ENGINE'S COWCATCHER

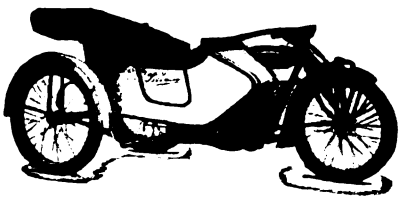
MILLVILLE, N. J.—Charles Norberry, of Fries Mill, while riding his motorcycle at a 30-mile clip in East Millville, was picked up by the cowcatcher of a West Jersey and Seashore Railroad train and carried 500 feet without being injured.

CANADIANS COMPLAIN OF HIGH GASOLINE RATES

TORONTO, Ont.—Hint of an official investigation into the high cost of gasoline is being heard in Government circles. Mr. E. A. Donovan, M. P., recently returned from an automobile tour into the States after which he realized for the first time that the price of "gas" in Toronto is exorbitant. He paid 19c a gallon for gasoline in several American cities and then paid from 31c. to 33c. per gallon for the volatile fluid in Toronto. Mr. Donovan has found that American companies list gasoline at 16c. per gallon for export to Canada. There is a one cent war tax on every gallon imported and there is no duty. The standard of measure in Canada is the Imperial gallon which is about one-fifth larger than the American gallon. The Canadian parliamentarian believes, however, that the difference in price at American and Canadian points is far too great.

A NEAT JOB OF BALANCING

READING, Pa.—Wellington Fleischer, a Mohnton motorcyclist, performed an unusual feat at a picnic near this city a few days ago when he volunteered to carry a full-sized can of ice cream on his motorcycle. Fleischer rode to a nearby town, had the big ice cream can placed on his luggage-carrier and made the trip back to the picnic grounds without a hitch. As it was necessary to balance the 150-pound can of cream on the luggage-carrier, it will be seen that the rider had a ticklish job.



Get Wised Up

If you have the idea that all sidecars are about the same, or if you measure sidecars by such things as lightness, you can't realize that the Pullman sidecar is superior to all others.

The Pullman is heavy enough to hold the road without bouncing around, and yet light enough to run along easily. But the big Pullman feature is the new Triangular Front Brace. It takes all the strain off the motorcycle. Get details.

Brilliant Burners

—THE PERFECT HEADLIGHT—

A NEW ERA IN GAS LIGHTING

Motorcycle Riders!

Do YOU know that with "Brilliant" Burners—

You can get THREE TIMES the light you are now getting.

You can get the same light for much less cost.

You always have a dependable light — absolutely steady, no flicker, no jarring or blowing out — even without the front glass in the lamp.

Your night riding will be safer and more pleasant with the strong "Brilliant" white light ahead of you on the road.

Thousands of these Burners are now in use. They are fully guaranteed. If not obtainable at your dealers, a set will be sent prepaid upon receipt of $2.

DEALERS: Write today for our proposition.

The Monosmith Brothers Co.

Spencer, Ohio, U. S. A.

The H. M. Kipp Co., Ltd., Toronto, Distributors for Canada

YOU SOON NOTE THE DIFFERENCE

More Power—Quicker Pick-Up—Increased Speed

All from the use of

HARRIS

TRADE MARK REG. U.S. PAT. OFF.

OILS AND GREASES

Your Motorcycle is a delicate machine. Proper lubrication is essential. Especially in hot weather is it necessary to insist upon the best oil—quality oil that cools the motor and lubricates without burning.

HARRIS OILS are refined from the best Pennsylvania Crude Stock.

"A Little Goes a Long Way and Every Drop Counts."

DAYTON

Manufacturers of these motorcycles have obligated us to supply them with DIXIE Equipment exclusively for their 1917 magneto requirements. All but two—*Merkel* and *Pope*—have signed their contracts and both of them will contract when their present engagements expire next month.

It clinches the overwhelming mastery of the DIXIE in the ignition field.

And there's only one reason for the practically unanimous choice of DIXIE—it is the best ignition. It is best in simplicity, in effectiveness and durability.

DIXIE claims for superiority are upheld by its clean sweep of the ignition field with the actual business contracted for.

AT THE SEASHORE WITH AN "R-S"

THE R-S, QUALITY and BOSCH

"WE have always considered quality first instead of quantity," writes E. Theurer, general manager of the Reading-Standard Co., "and naturally we must equip our machines with the highest type of ignition, which we consider is the Bosch Magneto.

"When magnetos were first placed on motorcycles, we specified Bosch. During these seven or eight years we have had no trouble whatsoever, and this fact alone compels us to consider only Bosch equipment in the future.

"We do not know what ignition trouble is, our agents are satisfied, and the public demands Bosch."

Be Satisfied

ECLIPSE

THE true test of the value of a motorcycle fitment is to try to do without it.

If all the ECLIPSE CLUTCHES were withdrawn simultaneously from the market and removed from the hundreds of thousands of motorcycles to which they are fitted, the sport of motorcycling would receive such a serious set-back that it would take years to recover!

This statement seems somewhat arrogant and over-confident, but when one considers that the ECLIPSE CLUTCH in the "dark ages" of motorcycling was a leading factor in stimulating motorcycle sales—as it still is today—our statement seems justifiable.

The 1916 ECLIPSE CLUTCH is worthy of the name it bears. With 107 square inches of friction surface, with larger and heavier self-lubricating discs than ever before, the new "CLUTCH OF A THOUSAND SPEEDS" clinches more firmly than ever the solid ECLIPSE reputation.

Literature upon request.

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

Think About Selecting Your Belt Drive Lightweight Now

WHEN you select your 1917 line, don't fail to include a belt drive Lightweight. It may seem a bit early to talk about 1917 now, but it isn't.

You know of the possibilities of the Lightweight, its appeal to the masses is strong. You know when you sell outside of your regular line of customers, you can't talk technical "dope." You know when you start to talk Lightweights you have got to talk "simplicity"; and that is where belt-drive helps—helps wonderfully.

Start now to make known your 1917 wants; select a belt drive Lightweight, because it is free from numerous additional parts, because it has the most simple and cleanest form of drive, and because this type of motorcycle obviously can be made to sell at that price which best interests the new, large field of prospects made available.

Remember especially this one point—the success of belt transmission depends considerably on the belt. When you select your Lightweight, insist that it be fitted with a long-lived and genuine.

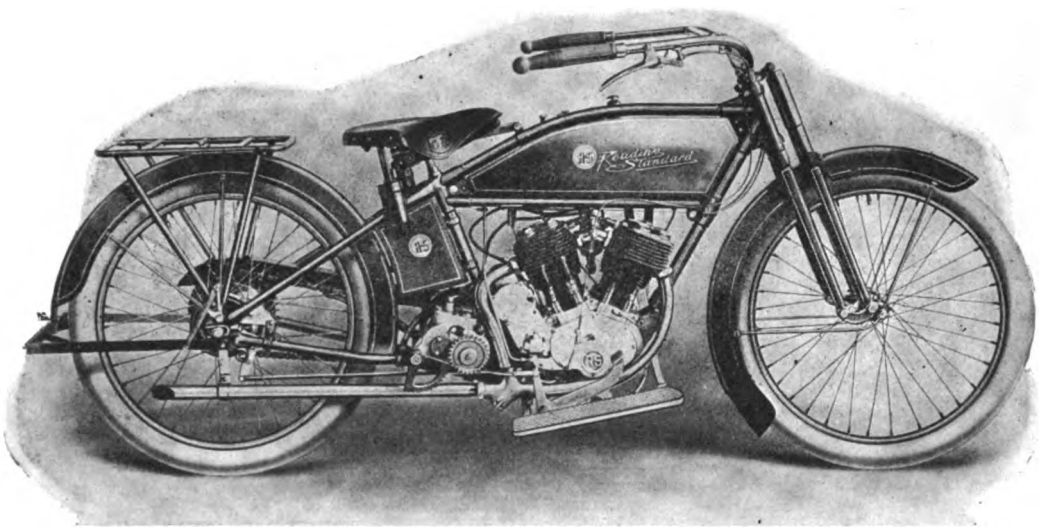
R-S THE ORIGINAL

MECHANICALLY OPERATED SIDE BY SIDE VALVE MOTOR



Time and again, during the past nine years we have demonstrated that the R-S Motor with its integral cams and gears, of specially treated Vanadium Steel, its large cooling flanges, its long stroke, its mechanically operated Valves is the most reliable, flexible, powerful and durable Motor that stands the test of time. It triumphs over the worst road conditions and survives the most gruelling tests, yet remains fresh and sweet through it all—never taxed to its utmost, but always with plenty of power on which to draw.

We are the originators of the Mechanically Operated Side by Side Valve Motor and therefore eight years in advance of all others. The R-S is not an experiment at the expense of the rider.

With such a motor to start with is there any wonder that the other features of the R-S are in keeping with the recognized superiority of the R-S Motor?

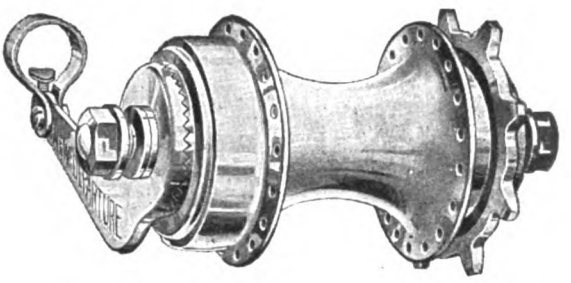
Here is my Best Talking Point



THIS is the opinion that thousands of Bicycle Dealers now have of

THE NEW DEPARTURE COASTER BRAKE

Most of these dealers have told us so in so many words, or by what amounts to the same thing, continuing as enthusiastic New Departure Dealers year after year.

AND THE REASONS ARE PLAIN

It is the brake of few parts. Easily adjusted. Never out of order. Good for a life time of hard usage.

It has most attractive lines. Its fine finish endures for years.

It is thoroughly guaranteed.

FOR THESE REASONS AND BECAUSE

every man, woman and child knows the Brake that Brought the Bike Back, the New Departure has become the best talking point of this host of dealers.

What the New Departure is doing for them it will surely do for you.

THE NEW DEPARTURE MFG. CO.,
Bristol, Conn., U. S. A.

New Departure Service is far-reaching

'CHAIN' TREADS FOR HARD USAGE

Down on the Mexican border where it's sizzling hot—where the going is rough and tires *must* make good, the Machine Gun Company of the 71st N. Y. is using 'Chain' Treads. Here's the reason—

READING STANDARD COMPANY, INC.
MANUFACTURERS OF
RS MOTOR CYCLES

NOTICE: [redacted] AND NOT TO INDIVIDUALS.
Dictated by GEA/JEU. READING, PA., U.S.A. 7/17/16.

United States Tire Company,
Broadway at 58th St.,
New York City.

Attention M.C. Stokes, Manager,
Bicycle and Motorcycle Tire Dept.

Gentlemen:-

You possibly already know that we recently received an order from the Machine Gun Company, 71st Regiment of the New York National Guard, for 65 twin cylinder three-speed models and 8 Light Delivery Vans. This is, undoubtedly, the largest single order ever handed to any motorcycle concern for military use in this country. The order has already been completed, and we understand that the machines are on their way to the border.

We naturally were desirous of furnishing the very best, and we believe it will be interesting for you to know that we equipped these motorcycles and Delivery Vans with U.S. CHAIN TREAD TIRES. We have tested out these tires to our entire satisfaction and, knowing that these motorcycles and Delivery Vans will be subjected to hard usage where the tire equipment is a most important factor, we advised the officials to specify the CHAIN TREAD, which we knew would give them the service they expect.

Yours very truly,

READING STANDARD COMPANY.

G E Atkins

Sales Manager.

If you want tires that will stand up, that will give real ungrudging service, Mr. Atkins' advice is very much worth following.

MOTORCYCLE MEN AT CONVENTION PROPOSE COMBINING M. M. A. WITH RECENTLY FORMED ASSOCIATION TO PROMOTE WIDER PUBLICITY

Committee of Three Is Appointed to Handle the Proposed Consolidation—Matter Will Be Threshed Out with Motorcycle and Allied Trades Association During the Convention—Move, if Successful, Will Create Strong Organization to Arouse New Interest in Two-Wheeler

ATLANTIC CITY, N. J., Aug. 2.—A resolution to combine the Motorcycle Manufacturers' Association with the Motorcycle and Allied Trades Association, recently organized at Milwaukee, was the most important development of the several business meetings of the Cycle Trades Convention now in progress here.

A thorough discussion of the aims and the general policies of the Motorcycle and Allied Trades Association led the Motorcycle Manufacturers to adopt unanimously a resolution to the effect that the industry at large would be benefited through the proposed combination of the two organizations. This resolution also provided for the appointment of a committee of three to devise ways and means of effecting the union of the two trade bodies.

The committee which will handle the proposed consolidation is composed of W. V. C. Jackson, A. O. Smith Co.; J. P. Fogarty, Westfield Mfg. Co., and Arthur Davidson, Harley-Davidson Motor Co. No statement can be made at this hour as to the basis upon which the combination will be effected, but there is a strong inclination to adopt a new name for the merging organizations and to continue for the future on a firmer foundation, with regard for the fact that the Motorcycle Manufacturers' Association has been long in the field, while the Motorcycle and Allied Trades Association is a comparatively newcomer.

Merger Seems Certain

That point and many others will be threshed out at the earliest possible opportunity, and it is certain that the strong feelings and trade fellowship and the desire of the manufacturers for general co-operation will result in a combined organization working toward unprecedented motorcycle publicity.

It was quite late when the Motorcycle Manufacturers, the Cycle Jobbers and the Cycle Jobbers and Accessories associations opened their meetings this afternoon. The second meeting of the Motorcycle and Allied Trades Associations opened at five o'clock and turned out to be simply a formal matter of adjourning until Thursday afternoon at three o'clock. Chairman H. S. Quine, of the executive committee of the Motorcycle and Allied Trades Association, called the meeting to order, but no attempt was made to transact business.

When the association meets tomor-

L. Fairbanks and C. W. Speaks

row afternoon, several matters of prime importance will be discussed, in addition to the plans of the proposed consolidation of the M. M. A.

Much interest centers in the report of the publicity of the Dealers Betterment Committee, which has already been discussed at some length and which will formally be presented at the meeting of the Motorcycle and Allied Trades body tomorrow.

PUBLICITY COMMITTEE LAYS DEFINITE PLANS

THE report of the publicity committee, covering eight typewritten pages and touching upon every condition affecting the motorcycle's appeal to the public, gave highly interesting proof of the thoroughness with which Chairman Lacy Crolius and his associates entered upon their work, following the launching of the new motorcycle and allied trades organization in Milwaukee recently.

A most promising plan evolved for attracting favorable attention to the motorcycle on a national basis calls for a countrywide touring program, with hundreds of small tours radiating from the large motorcycle centers throughout the country. It is the intention to have all the tours start on the same day and pass through as many towns as possible in each district covered by the movement.

Crolius' Idea

The national tours idea originated with Mr. Crolius some time back, and was presented by him at the Milwaukee meetings, at which time it was approved by the motorcycle and allied trade associations. It will be the aim to feature neatness and silent riding on these tours and to have them placed on an annual basis. It is likely that the touring period will be officially referred to as the "Gipsy Holidays."

The national tours proposition was left in the hands of the various motorcycle sales managers at the Milwaukee meeting and they are preparing to act in concert with the publicity committee to put the plan across on a big scale in the summer of 1917.

More General Publicity

The committee reports that steps have been taken to bring about the publication of more articles and stories of motorcycle interest in the general periodicals, and that the power two-wheeler will from now on receive attention from many magazine editors who have heretofore treated it with indifference. Definite plans are being laid to cooperate with publishers of outdoor

Mike Toepel and Dan Walls

and recreation magazines, so that they will be able to procure the kind of motorcycle material most satisfactory to all concerned.

The report states that it is a serious mistake to regard the motorcycle as a makeshift for the motor car, that the proper viewpoint is to consider the motorcycle as the finest and most distinctive sport in the world and to act accordingly at all times.

Open Muffler Scored

Attention is directed in the opening of the publicity report, to the fact that the prevention of undesirable publicity concerning the motorcycle is just as important as the more positive work of obtaining favorable publicity, and in keeping with that idea the committee gave much thought to correction of matters which now help to prejudice the general public.

The open muffler is charged with being the chief cause of public dissatisfaction, and the co-operation of the members of the new association is solicited on plans for curbing the noisy rider. It is recommended that the laws and ordinances concerning open mufflers be strictly enforced, through the combined efforts of the local authorities, the trade bodies and motorcyclists; and that steps be taken to obtain restrictive legislation in districts where there are at present no regulations concerning mufflers.

Would Arrest Offenders

The committee favors arresting open muffler fiends under the public nuisance ordinance, if no other corrective measures can be applied. Motorcycle clubs throughout the country are asked to work with the Motorcycle and Allied Trades Association along these lines.

The speeder is also handled without gloves by the publicity committee. The same drastic methods desired to be brought to bear upon the open muffler fiend are advocated for use against the chronic roadburner.

Tank riding on motorcycles is unconditionally condemned. The committee favors the passage of laws in all States forbidding the carrying of a passenger anywhere except on a regularly accepted attachment.

Abolish the Cut-Out

Motorcycle manufacturers are advised by the committee that the complete elimination of the muffler cut-out would be a move in the right direction. It is admitted that some riders might cut off the exhaust pipes in order to continue their noisy careers, but at least ninety per cent. would accept the motors

1, A. B. Coffman, A. W. Harrop; 2, Charles Miller and Frank Guyon; 3, M. Schweinert and A. M. Tisne; 4, R. M. Barwise

as turned out by the factory, in the opinion of the committee.

Clothing for the motorcyclist comes in for special attention in the report, and a strong appeal is made for abandonment of overalls, soiled khaki and other unattractive riding togs. Motorcyclists are asked to set a good example by using neat suits of good quality, and it is suggested that those who will not join the cleanliness movement be dropped from club rosters and shamed into a realization of their unpleasant position.

Awards for Neatness

Clubs are advised to award prizes for neat riders in every run or contest arranged, and to donate a month's dues to the member who is credited with the highest neatness record for the preceding month. It is recommended that the F. A. M. adopt an official uniform which will meet the requirements and insist upon its use by members. Forestry cloth and moleskin are mentioned as the most satisfactory materials to replace the now commonly used fustian.

The committee also taboos the jersey for road use, and advocates a flannel or woolen shirt. Leather vests are recommended for use instead of sweaters in cold weather. Spiral or formed puttees are approved in preference to the standard leather legging.

The committee viewed the clothing situation from every angle, collected much data, threshed out all possible problems before framing its recommendations, and regards this part of its report as of the utmost importance in connection with the future of the motorcycle in America.

Motorcycle racing has been overdone in the opinion of the committee, and it is argued that accidents occurring at small race meets throughout the country more than offset any advertising value that the contests might have. Motorcycle manufacturers are advised to give their support in future only to programs of national or semi-national interest and that they discourage as far as possible any racing where danger is involved.

Races for specially constructed speed machines, such as the eight-valve models, should in the opinion of the committee be confined to two-mile tracks or larger. Competition of half-mile tracks should be limited to stock singles. The F. A. M. is appealed to for co-operation in the improvement of the racing situation, and its support will undoubtedly be given.

DEALERS' BETTERMENT COMMITTEE REPORTS

Series of Letters Discussing Important Merchandising Factors Will Be Sent to Dealers; Folders Will Illustrate Live Selling Methods

ATLANTIC CITY, N. J., Aug. 2.—A series of six letters, dealing with the high points of a proposed co-operative campaign, and an attractive folder for distribution to the retailers are the outstanding features recommended in the report of the Dealers' Betterment Committee, of which Charles S. Speaks is chairman.

It is the intention to have the first letter tell of the aims of the Motorcycle and Allied Trade Association; the second will emphasize the advantages of a clean and systematic store; the third will give definite sales suggestions for dealers; the fourth is to treat of advertising and general publicity work from the dealer's viewpoint, and the fifth and sixth will discuss time payments and accounting, respectively.

The committee aims to send out the first letter about September 18, and continue them for six weeks. After each letter is distributed every company on the list of the association will be expected to follow it up with letters on the firm stationery, designed to inform the jobbers and dealers that the manufacturer is directly interested in the educational work in hand.

Scope of Folder

The committee is convinced that this systematic follow-up plan will exert a nationwide influence upon the dealers. The folder referred to is designed to include pictures of simple and attractive window displays, and will be so attractive in typographical makeup and sales arguments, as to make a strong appeal to the dealer.

The folders will be supplied at nominal cost to the members of the Motorcycle and Allied Trades Association for distribution to their dealers throughout the country. The first folder is ready to be made up and others will be forthcoming.

Yep, Those Smiles Won't Come Off While the Convention Lasts!

"MILLION" PLANS TENTATIVELY APPROVED

Cycle Jobbers Appoint Committee to Consider Details of New Campaign with Representatives of Other Bodies—Fry Again President

ATLANTIC CITY, N. J., August 2.—Quite the biggest things that occupied the attention of the members of the Cycle Jobbers' Association of America at their meeting here today, aside from the election of officers, was the tentative approval of the plan of action submitted for the consideration of the cycle members of the Million Bicycles Committee. The appointed committee will confer in the morning with a similar body appointed by the other associations and with the Million Bicycles Committee to go over the details of the movement and decide upon a course of action.

Members of Committee

The committee which was appointed at the Cycle Jobbers' Association's meeting was "Doc." Owens, of Coggins & Owens, with J. W. Grady, of J. W. Grady Co., and Fred Baker, of the New York Sporting Goods Co., acting in conjunction with him, while Keyser Fry and John Henry, president and secretary and treasurer, respectively, to the association, were elected to act as ex-officio members of the Committee.

Keyser Fry, of the Reading Cycle Co., was re-elected to the presidency of the association. Frank I. Williams, of the Continental Rubber Supply Co., of Indianapolis, and John Henry, of the Vim Cycle Co., of Buffalo, N. Y., were respectively re-elected to the vice-presidency and secretary-treasurership.

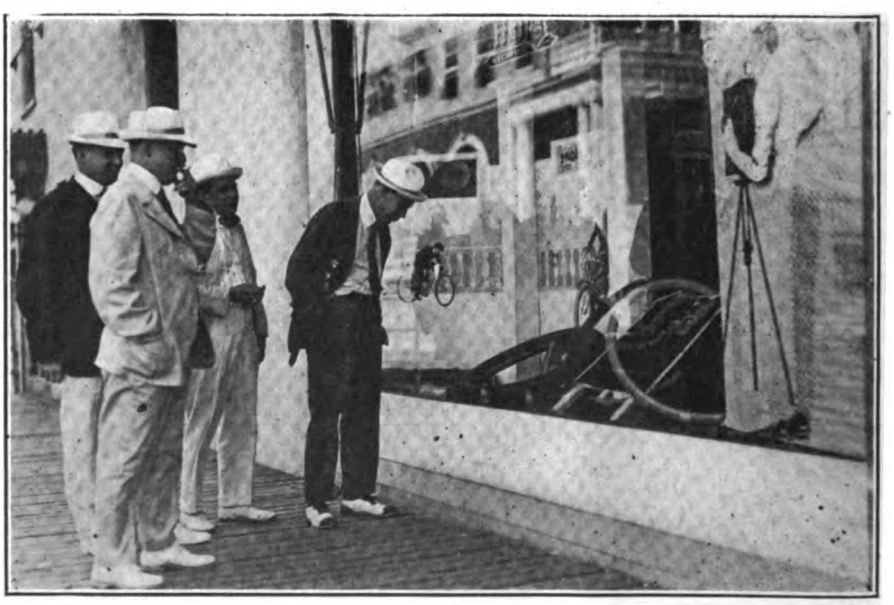
New Board Members

The new Board of Director members are: Fred A. Baker, W. H. Grover, A. Freed, of the Pacific Motorcycle Co., and Fred Grubb, of the Union Supply Co., of Toledo, Ohio.

It was decided after due consideration, in conjunction with the other trade bodies, that the most suitable time for holding the midwinter gathering of the trade bodies is at the time of the Chicago Show, November 13 to 18, in that city.

Edwards-Crist Mfg. Co., of Chicago, Ill; the Holland-Baden-Ramsey Co., of Baltimore, and the Saufley Supply Co., of Kansas City, were elected to membership, while the Southern Hardware & Bicycle Co., Jacksonville, Fla., took the place of McGraw Bros., which it has succeeded in that city.

An invitation from the Chicago



Firestone Men Examining Display in Local Branch. Left to Right, They Are Messrs. Babcox, Fairbanks, Speaks and Slosson

Board of Trade to the association to hold its next convention in the Windy City was recorded, but in view of the fact that the Jobbers' Association has nothing to do with the selection of the convention city, no action was taken on the matter.

ST. ONGE RIDES IN

Fred St. Onge, of the Smith Motor Wheel, blew in on Wednesday astride a Pope Seminole bicycle, propelled by a "bicycle booster," which he had piloted down from Boston. He came equipped with a letter of well-wishes for the cycle trade from the Mayor of Boston.

READING STANDARD RETURNS TO M. M. A.

Pioneer Firm Once More Joins Manufacturers' Ranks—Cyclemotor Application Not Acted Upon—The Dodge City Ordinance

ATLANTIC CITY, N. J., Aug. 2.—One of the interesting developments of the meeting of the M. M. A. at the St. Charles Hotel this afternoon was the return of the Reading Standard Company to the ranks of the organization.

An application for membership was received from the Cyclemotor Corporation, of Rochester, N. Y., but no action was taken in connection with it, pending the outcome of the present plan for consolidation of the M. M. A. with the Motorcycle and Allied Trades Association. When the consolidation is brought about it may affect the membership fee and for that reason the application of the Cyclemotor Corporation was not put through.

How Travellers Helped

A report was submitted to the effect that the action obtained in connection with the objectionable ordinance recently adopted in Dodge City, Kansas, against motorcycle dealers was brought about through the prompt activities of the Harley-Davidson and Indian travelling salesmen in that district. They went to Dodge City as soon as the ordinance was passed prohibiting motorcycle agencies from operating in the business districts of Dodge City, and played a prominent part in having the measure repealed.

Those present at the Motorcycle Manufacturers' meeting were J. W. Hurley, Aurora Automatic Machine Co.; H. G. Alexander and W. S. Quinlan, Cleveland Motorcycle Mfg. Co.; Horace M. Huffman, Davis Sewing Machine Co.; W. G. Schack, Emblem Mfg. Co.; T. W. Henderson, Henderson Motorcycle Co.; Ar-

NEW FIRMS JOIN CYCLE PARTS ASSOCIATION

Eight New Names Are Added to Roster—Former Officers Are Retained—Next Meeting Will Be Held at Chicago Show

ATLANTIC CITY, N. J., Aug. 2.—At the meeting this afternoon of the Cycle Parts and Accessories Association in the St. Charles Hotel, Daniel F. Printz, of the Reading Saddle Mfg. Co., was re-elected to the presidency. Louis Schwab of Stevens & Co. was retained as vice-president, W. J. Surre continued as treasurer and C. E. Morehouse as secretary.

Committees Named

The present Entertainment Committee was continued, with thanks for his excellent work for the past term. A committee of three composed of L. M. Wainwright of Diamond Chain Mfg. Co., H. S. Quine of Goodyear Tire & Rubber Co., and D. H. Wetzel of the Mott Wheel Works, was appointed to confer with the committees representing the other cycle organizations relative to further action based upon the report of the "Million Bicycles Committee."

Nineteen on Roll

The reports showed that upwards of 19 members are now on the roll of the Association and the following new names were announced:

F. A. Smith Manufacturing Co., Rochester, N. Y.; Champion Spark Plug Co., Toledo, Ohio; National Coil Company, Lansing, Mich; Cyclemotor Corp. of Rochester, N. Y.; American Skate & Mfg. Co., Reading, Penn.; Constant A. Benoit, Sheepshead Bay, N. Y.; Elyria Iron & Steel Co., Elyria, Ohio; New England Pressed Steel Co., of Nattick, Maine, and Julius Blum & Co., New York City.

Invitations were received from Cincinnati, San Francisco, New Haven, Norfolk and Niagara Falls, to stage the national convention of the Cycle Trades Industries in these cities.

The next meeting of the Motorcycle and Allied Trades Association will be held in Chicago during the National Convention Show Week.

HOUDINI FEATURE AT THEATRE PARTY

ATLANTIC CITY, N. J., Aug. 2.—The entertainment side of the cycle trades convention program was given added interest this year by the decision of General Committeemen Surre and Morehouse to have two theatre parties instead of the usual one. The convention crowd, and let it be understood that it is the biggest crowd ever attracted to a circle trades program, attended Keith's Theatre on Tuesday evening and on Thursday evening the drama, "Cheating the Cheaters" was witnessed at the New Nixon.

Baffle the Experts

Houdini, the Handcuff King, was the chief attraction at Keith's on Tuesday evening and even such a keen and distinguished committee as Arthur Davidson, W. G. Schack, Marty Stokes, Jim Ash, Scotty and Horace Huffman, could not fathom the performer's stunts, although they went upon the stage and gave his exhibition the double O. Arthur Davidson did not like Houdini's bow to the audience and made one himself which nearly earned him a contract with the management. A trick bicyclist who did some surprising work with only one wheel and a few minor parts of a bike scored a big hit with the convention visitors, and Fred St. Onge, the Smith motor wheel booster, who is a veteran vaudeville bicyclist, was almost inspired to take the stage himself and keep the clever performer company in his stunts. Those who have seen St. Onge in action on the stage say that he is easily in the top rank of trick bicyclists, although for years past he has been a cycle trade traveler.

Both Tuesday's and Thursday's programs were thoroughly enjoyed by the conventionites, the dramas at the Nixon being excellently put on.

The Fair Sex Was Much in Evidence

BIG APPROPRIATION CONSIDERED TO ADVANCE CYCLE BOOSTING CAMPAIGN

In Report to Convention at Atlantic City, Secretary Olin Advises the Expenditure of $90,000 to Further the Work of His Committee—Manufacturers Are All in Favor of Continuing Campaign—Standardization Committee Reports Great Progress—Quine Sees Big Future for Industry

ATLANTIC CITY, August 1.—The joint meeting of the Cycle Parts and Accessories Association, Motorcycle and Bicycle Manufacturers' Associations and the Cycle Jobbers of America opened to a capacity house at 3 o'clock this afternoon, every seat in the big assembly chamber being occupied when President Daniel F. Printz, of the Cycle Parts and Accessories Association, called the session to order.

The fact that such a large number of trade men scorned the lure of the breakers to participate in a purely business meeting on a warm afternoon was accepted as additional testimony to the spirit of earnestness with which cycle matters are being threshed out by the trade leaders.

Remarkable Progress Made

Chairman Printz spoke briefly of the unusual progress that has been made in the cycle industries in the past year, and dwelt upon the increasing inclination towards co-operation and the remarkable impetus given to cycling affairs by the activities of the "Million Bicycles" committee.

"Even the most conservative among us must now be convinced that we have at hand an era of wonderful possibilities for the two-wheelers," said the chairman, "and it is only fair also to state that we have made rapid strides of late towards full appreciation of those possibilities. We see on all sides concrete evidences of an awakening to our responsibilities, and of a desire to combine our efforts for the further upbuilding of what we know to be an industry of world-wide significance.

"We must consider," he continued, "the future of the two-wheeler, both here and abroad, and lay such plans as will enable American manufacturers to reap the benefits of the educational work which is opening the eyes of the world to the true appreciation of cycling."

Standardization Plans Developed

Mr. Printz then called upon Keyser Fry, Chairman of the Standardization Committee, for a report on the accomplishments of that committee since the meeting held at the Hotel

Souvenirs!

Astor, in New York, last winter. Mr. Fry stated that he had been given much encouragement by the cycle trade men and that the plans for greater standardization of cycle parts had been brought to something like a focus.

In reply to the blanks sent out at the time of the New York meeting, calling for replies to questions bearing upon standardization, no less than eighty-two cycle men had filed their opinions, and the sentiment was found to be strong—in fact, practically unanimous — for standardizing cycle parts.

Backed by this support of the trade representatives, the Standardization Committee proceeded with its work, Mr. Fry explained, and had been able to make definite plans for better co-operation along manufacturing lines. Mr. Fry mentioned some of the points upon which the manufacturers and jobbers had reached an agreement, among them the decision that "36 drilling" of rims was most advisable. It was also brought out that 7/16 drilling for rims to take tires larger than 1¼ inches was satisfactory to the majority of manufacturers, and that two thirds of all the rims put out are now drilled with 36 holes.

Majority Favor Two Shows

In reply to an inquiry from the committee concerning the national cycle shows, thirty-four went on record as favoring the continuance of the Chicago exhibition and twenty-four were against it. Twenty-eight trade representatives voted for the continuance of the show in New York, and twenty-one expressed a contrary opinion. There was considerable sentiment favoring the holding of one national show, and that in the West.

In the material received by the Standardization Committee were suggestions as to how the jobber can better co-operate with the manufacturer, and also some pointers for the manufacturer who wishes to improve his

Digitized by Google

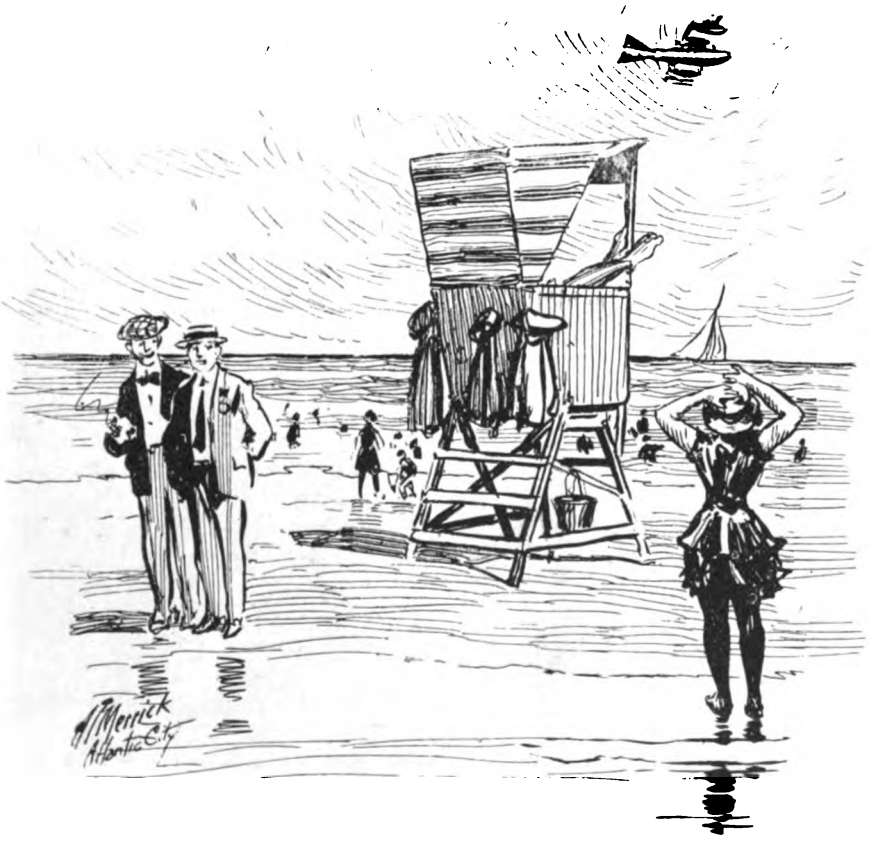
relations with the jobber. Under the first heading it was argued that the jobber should "push" standardized goods, work in harmony with the producer, not demand too many changes in models and settle on plans for the gradual elimination of slow-selling types of cycles.

For the manufacturer it was suggested that improvements would be brought about through having the head of a firm get in direct touch with the jobber and dealer, that better packing of goods should be arranged for, that standardization of models would permit of giving greater general satisfaction to buyers and that prices should be quoted for the entire season, as far as could be made possible.

Benefit to Entire Industry

Messrs. Lovell, Tucker, Rastetter, Coffman, Stokes, Wainwright, Grady, Owen, Henry and Nock discussed various angles of the standardization plans, and agreed that the progress made so far had justified the efforts put forth. Mr. Henry, of the Vim Cycle Co., placed emphasis upon the fact that greater standardization of parts would permit of more satisfactory service to the rider, and that such service in turn would benefit the entire industry. Some time was devoted to a discussion relative to standardizing sprockets, and it was decided that a special committee should be named to take up this matter with the coaster brake manufacturers.

Messrs. Ferguson, of Eclipse Machine Co.; Diehl, of the Corbin Corporation, and Olin, of the New Departure Mfg. Co., pointed out that standardization of sprockets would entail some trouble, but that the companies they represented would be found willing to take up the matter open-mindedly. The motion to have a committee of three appointed to consider the sprocket situation with the coaster brake men was approved unanimously.



Quine Tells of Committee's Work

H. S. Quine, of the Goodyear Tire & Rubber Co., chairman of the "Million Bicycles" Committee, summed up briefly the work accomplished by the bicycle-boosting campaign. He referred back to the New York midwinter meeting at which the movement was started and stated that the committee and its co-workers had "seen a great vision of the bicycle's future."

Mr. Quine emphasized the magnitude of the bicycle industry, called attention to the progress made in the campaign for advancement, though but limited facilities were available during the past year, and informed the cycle trade men that they have in their hands "the recreation of the bicycle industry." Mr. Quine's short address sounded the top note of optimism and was received enthusiastically by his audience.

Charles F. Olin, secretary of the "Million Bicycles" Committee, read an unusually interesting and informative report on the plans formulated and the actual results obtained by the boosting campaign in the past year. He explained that the primary purpose of the committee was to co-operate with the retail cycle dealer to the end of building up a stronger and more business-like national sales organization.

Dealers Appreciate Aid

The first move along those lines was the staging of Bicycle Day, in connection with which the dealers of the country spent about $100,000

Digitized by Google

with the committee's co-operation. The committee itself expended only $800 in direct connection with Bicycle Day, but the results were concrete and widely apparent. Mr. Olin advanced the opinion that the outlay by the dealers was only a small part of what they are willing to spend under systematic guidance.

Reference was made to the impetus given the movement for better window displays, and it was stated that one big store in New England that had not previously featured bicycles to any extent sold thirty bicycles as a result of the ginger injected into the sales work immediately preceding and following Bicycle Day.

Secretary Olin reported that the total expenditures of the "Million Bicycles" Committee amounted to $5,000, and the organizations interested agreed later to consider means for supplying the necessary funds. The outlay of $5,000 was about double that which was originally contemplated, but the quick response of dealers, with the additional expense entailed for circularizing and supplying the general material of the campaign to the unexpectedly large lineup of retailers boosted the figure.

Asks for Three Field Workers

Secretary Olin's report was topped off with a number of significant recommendations, chief among which was one providing for the appointment of three educational workers to go out all over the country with the view of assisting dealers and aiding them to carry out the plans of the "Million Bicycles" Committee. It is the intention to have these missionaries visit every town of 5,000 inhabitants or more.

It was also suggested that an expert be placed in active charge of the work of the "Million Bicycles" Committee, to act in conjunction with the present committeemen, the latter being unable, because of other business obligations, to give the "Million Bicycles" campaign all the attention it requires. The appointment of such a director will be taken up for further consideration.

M. H. Tisne and Jesse Edwards Having a Quiet Chat on the Beach Between the Business Meetings. These Talks Were Regular Functions Each Day.

Another recommendation concerned plans for a national bicycle organization, to appeal especially to boys, and to involve close affiliation with the boys' clubs of Y. M. C. A. bodies throughout the country.

Display Advertising Material

The committee displayed several sample posters and cut-out figures for use in general advertising work, and explained that if the use of this material is decided upon it will be appropriate for billboards, the windows of dealers and local newspapers. The cut-out figures are exclusively for use in window designs. Both posters and cut-out samples brought much favorable comment.

The committee went on record as favoring more bicycle races throughout the country, with prizes other than cycle merchandise offered for the winners. It was argued that the awards of cycle merchandise did not arouse the interest or gain the general publicity that would be obtained through such prizes as watches, fountain pens, etc.

Plans have also been considered for a publication to go to the dealers monthly from the "Million Bicycles" Committee.

Two high spots in the yearly campaign were pointed out, the Christmas buying period and the annual Bicycle Day. Special plans have been partly worked out towards giving these sales

Convention Slants at Motorcycle Men

THE long distance travelling record for the Convention was split fifty-fifty between George Sherman and A. Freed, the latter being Indian Distributor for Northern California. In this connection, it is reported that the Hendee Manufacturing Company is planning to have Sherman carry on, throughout the entire country, the splendid work which he has been doing on the Pacific Coast. That is to say, in all probability, he will spend most of his time calling on dealers with a view of organizing them to the end of broadening the already national scope of the Hendee sales organization.

Max Sladkin, of the Haverford Cycle Co., Excelsior distributor, is a firm believer in the idea that the problem of selling motorcycles is fully 90 per cent. a question of selecting the right kind of merchants. Sladkin cited as an illustration the case of Wilmington, Del., where they have thus far this year sold 60 Excelsiors, as against only five in 1915. In calling attention to this big difference, Max made the point that no doubt the sales in Wilmington were materially helped by the wonderful prosperity surrounding the powder works, but added that the problem was to take advantage of just such opportunities, and that it required a real, live merchant to appreciate favorable conditions and avail himself of the openings thus offered.

The trade will be interested to learn that Dave Troxel, of the Troxel Mfg. Co., of Elyria, Ohio, has a good chance of capturing the Republican nomination for Congress in his district. The nomination is equivalent to an election, and if Troxel succeeds in winning it will probably be the first time that the cycle trades have ever been represented in the national law-making body.

No doubt the most distinctive accomplishment manifested at the convention was George Sherman's ability to write intelligently in Chinese. At least, he claimed that the hieroglyphics he exhibited to the editor of **Motor Cycle Illustrated** were perfectly good Chinese words, and the aforesaid editor took him at his own say-so.

As early as possible after his arrival in Atlantic City, A. J. Musselman, of the Cycle Mfg. & Supply Co., teed off at the links of the Country Club of Atlantic City and quickly demonstrated to the complete satisfaction of the handicappers that the Chicagoan was the man the others would have to beat in order to win first prize in the golf finals on Friday. Musselman is the sort of chap who will go around in 85, and then complain that he is away off his game. It is safe to say, however, that experts like Sundvahl and Bill Holland will do their utmost to make it interesting for Musselman.

The Excelsior Motor Mfg. and Supply Co. was capably represented at both the F. A. M. convention in Providence and the Atlantic City gathering by Sales Manager Fred Mathis. Fred expressed himself as very favorably impressed by the quantity and quality of the constructive work now being done by the various cycle trades associations, and was of the opinion that the substantial enthusiasm, and the tendency to get down to definite plans spoke well for the future of both the motorcycle and bicycle.

Frank Weschler, of the Hendee Mfg. Co., was preceded to the convention by E. M. Jackson and J. A. Priest, of the sales and advertising departments, respectively. Jackson is an oldtimer at motorcycle and bicycle conventions, but this was the first attended by the Hendee Company's new advertising manager. Priest made it a point to attend every one of the business sessions, and incidentally made many friends.

Harden and Edgar, of the Westfield Mfg. Co., came on a day or two ahead of Fogarty in order to get in as much practice as they possibly could for the golf tournament. Edgar told Diehl, of the Corbin Corporation, that if he were to take the amount of handicap to which his scores entitled him, he would feel ashamed to accept the cup, if perchance he should win it.

Messrs. Alexander and Quinlan, than whom there are no more active or conscientious participants in the various movements for the betterment of trade conditions, represented the Cleveland Motorcycle Mfg. Co., makers of the Cleveland lightweight.

The average individual fails to distinguish himself in more than one kind of sporting endeavor. W. G. Schack, of the Emblem Mfg. Co., however, has a right to lay claim to being an expert in at least two, viz., bowling and water polo. There is no getting away from the fact that the Emblem manufacturer is well qualified to compete with the best of them in both sports.

Representing the Miami Cycle and Mfg. Co., of Middletown, were H. S. Wise, Jim Ash and C. R. Miller; Aurora Automatic Machinery Co., J. D. Hurley; Davis Sewing Machine Co., Horace Huffman; Cygnet Rear Car Co., Leadley Ogden; Cyclemotor Corporation, D. G. Anderson and E. R. Perrin and O. W. Adams; A. O. Smith Co., W. V. C. Jackson; Henderson Motorcycle Co., T. W. Henderson.

Among Tuesday's arrivals were Walter Davidson, just back from Europe, and Arthur Davidson, who has been as busy as

Left, W. E. Diehl, Driving Off; A. H. Musselman and B. A. Edgar on Sideline; Right, Frank Chase, at End of Swing.

Digitized by Google

usual right in the old U. S. A. With their wives, the Harley-Davidson officials immediately entered into the spirit of the convention and whether the call of the hour was for recreation or business Milwaukee was certain to be capably represented.

While the conventionites were gathering for the big joint meeting on Tuesday afternoon, with Old Man Humidity still fighting the well-meaning Atlantic City breezes, E. Theurer, of the Reading Standard Company, discovered some striking photographs of Pennsylvania mountains on the walls and heaved a sigh. "Just imagine rolling along one of those shady mountain roads with an R-S motorcycle and sidecar," advised the Reading official, "and you won't feel this heat half so much."

Messrs. Fairbanks and Slosson, of the Firestone staff, spent several hours on Monday evening (while the mercury was trying to crawl through the top of the tube), in laying out a decidedly novel window display just across from the St. Charles Hotel. They rigged up a striking cut-out figure of a moving picture photographer aiming his camera at two "action" posters showing Firestone-equipped motorcycles and bicycles, backed up by a neat spread of Firestone tires—and Mr. Photographer actually turned the crank of his camera. It required some engineering to produce the effect desired, but the attention attracted by the completed arrangement amply repaid the originators of the design for their painstaking and perspiration-generating efforts.

One of the chief topics of conversation from the opening of the convention was the bicycle race, which featured the sporting side of Thursday's program, and nothing helped more effectually to draw attention to that event than the handsome cup offered for the winner by Dan R. Walls, of the Splitdorf Electrical Co. "Dixie" Dan himself answered scores of questions about the

cup, in reply to the queries of enthusiasts, and attendants at the Haverford headquarters, where the 15-inch trophy was displayed, were kept busy receiving an extra run of visitors who "just dropped in to see that cup."

J. R. Ramsey, E. H. Vogt and H. H. Miur

"DIXIELITE" MAKES ITS BOW AT CONVENTION

Newest Splitdorf Apparatus Has Separate Ignition and Lighting Elements in One Casing—Constant Voltage Regulation

ATLANTIC CITY, N. J., Aug. 2.—One unexpected bit of "Newness" of the sort that helps to enliven the midsummer Cycle Trades Convention showed up today when E. C. Robertson, of the Splitdorf engineering staff, rolled into town on an Indian Powerplus sidecar combination, equipped with a new Splitdorf creation which goes under the name "Dixielite," and which, as the name suggests, is a combination of a Dixie magneto and a lighting dynamo.

Its chief feature, aside from the fact that the new tried and proven Dixie magneto which forms the ignition element is retained practically without alteration, is that the ignition and lighting elements are entirely separate from each other, neither one depending in the slightest degree on the other for the proper performance of its various functions.

The only changes made in the orthodox Dixie construction are a slight flattening of the field magnets whereby room is made for the accommodation of the lighting dynamo, and a shifting of the high tension distributor brushes, from the right to the left side of the machine for greater accessibility. The brush holders have been changed in detail only, a spring replacing the brush holding screws formerly employed and giving greater facility in removing and replacing these important elements.

Igniter and Dynamo Elements

As for the rest of it, the Dixie element remains intact, and even the parts of the magneto, aside from the field magneto, are interchangeable with corresponding parts of the regular Dixie igniter. The dynamo is a six-volt shuntwound machine with the armature geared to the rotor of the magneto, the whole being gear driven from the magneto train as usual. Regulation to prevent fluctuation of the lights at varying motor speeds is effected through the intermediary of a voltage regulator of the vibratory type, whereby at speeds above a certain predetermined point, the field circuit is intermittently opened and closed and its strength thereby lessened.

The decrease in the strength of the field causes a corresponding falling off in the output of the machine and maintains the voltage practically constant throughout the full scope of motor speeds. A reverse current relay, connected in series with the machine, serves to disconnect the dynamo from the battery when the motor is inoperative or is running too slowly for the dynamo voltage to equal that of the battery. The new system will be ready for the market about September 1.

A NEW BICYCLE MOTOR

AL. WOODRUFF packed into the St. Charles with a box which he seemed to prize most highly and which bore a return address to his Brooklyn, New York, Excelsior Agency. It developed that Woodruff had all the making of a new type of bicycle motor attachment which he brought down for the enlightenment of the jobbers, who, by the way, were more than ordinarily interested, especially in the price, which is to be in the neighborhood of $40. The attachment fits over the front wheel and the two cycle motor drives the mount through a friction wheel on the motor shaft.

HENDERSON'S WIT TICKLES THE CONVENTION

Asked to Speak on "The Motorcycle," Tom Quickly Disposes of the Subject and Then Launches Into a Batch of Clever Anecdotes That Throw Convention Into Uproar

IN one respect the motorcycle beats every other form of transportation. It has no space for bad habits. When the motorcycle does leave the straight and narrow path and gets itself into the accident feature of publicity, the enterprising reporters discover no empty bottles that once contained whisky anywhere in or on the motorcycle; no beer bottles; no hair pins, no garters or other articles of feminine apparel that mark the trail of the joy riding automobilists.

What is left of the motorcycle is pure and clean; it may be a torn and twisted relic of what was once a joy to see and a pleasure to possess, but it has no storehouse of debauchery wherein the traces of vice are found brazen and unashamed. Since the motorcycle has been equipped with those combination bathtub, old fashioned sofa affairs called sidecars they may fall from grace, but I trust not.

A Case of Embarrassment

What to say on this occasion has long perplexed me. I confess to you that I am embarrassed—as embarrassed as was the minister who was called in unexpectedly to preach a funeral sermon in the home of a family with whom he was unacquainted. It was a hurry-up call, the regular pastor having been detained or not paid for his last services or something.

Anyhow, the substitute parson got into the middle of his discourse before he realized that he had forgotten to inquire the sex of the corpse. He didn't know whether it was male or female in the box besides him. This realization came to him just at that very point where it was necessary that he refer to the dear departed. So leaning across the bier, in a low voice he said to one of the mourners in front:

"Brother or sister?"

"Cousin," came the answer. How that minister got out of his difficulty I don't know; and I am equally perplexed as to how I am going to get out of mine. And then again on occasions like this I think always of the servant who tapped on the door of her mistress' bedroom one afternoon and said:

"A gentleman to see you, mum."

"Tell the gentleman I'm not receiving this afternoon," said the lady in a haughty voice.

"Lord, mum, he ain't delivering nothing," was the reply. "He's collecting."

Wisdom of Fathers

And I—I always wonder whether or not I am going to deliver. I wish I were really wise and had some real message to bring you. I wish I knew something worth while to say. But I don't. I am *not* like the father of a small boy. You know there is one time in a man's life when he is credited with the possession of great wisdom. In the eyes of the trusting boy, his father is the greatest man on earth. Of course, this illusion doesn't last long, so you fathers who are now enjoying that experience make the most of it. The boy will get wise to you all too soon. But a friend of mine has a small son who still believes in him. The boy saw a colored woman for the first time in his life.

"Oh, gee! Pa," he said, "look at that woman with the dirty face."

"Hush, my boy," said the father, "you mustn't say that. That is that poor

Digitized by Google

woman's natural color." The next question was most natural: "Is she black like that all over, Pa?" he asked.

"Why, yes, my son, of course, she is," he answered.

"Gee, Pa!" exclaimed the child, "you know everything, don't you?"

Wide Scope of Motorcycle

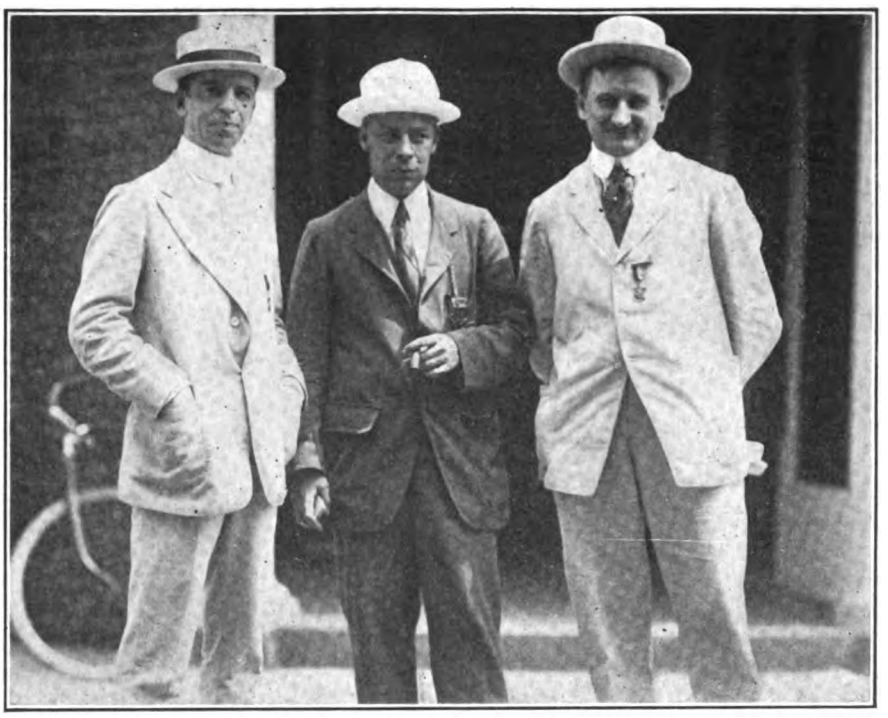
But to get back to the motorcycle. It is playing its part in the great scheme of life and playing it well. It is helping to win the great European war. I like to think of the motorcycle as the aeroplane of the earth. It is swift, sure and dependable. With it battalions are being saved; the wounded succored speedily; and, amid the silences when the big guns rest, can be heard throughout all Europe the "putt-putt" of the motorcycle about its work of communication and defense.

The jokesmiths sneer at it, but the frightened wife at home alone breathes a sigh and a prayer of thanks for the motorcycle which has brought the police so swiftly to her aid, and hundreds of thousands of men, weary and toil stained, ride nightly to their homes in God's fresh air, back to their wives and children and contentment, and call it *friend*.

RUBBER CLUB HOLDS ITS ANNUAL CONVENTION

LOWELL, Mass.—The Rubber Club of America held its seventeenth annual convention in Boston and this city last week, with President H. S. Firestone in charge. The convention this year was noteworthy as being the first occasion in which Western rubber men mingled with Eastern representatives of the industry. Lunch was taken at the Copley Plaza in Boston, with a shore drive and games at Manchester-by-the-Sea, as well as a banquet on Tuesday filled the program. Several business sessions were held.

Among those present from the West were H. S. Firestone, R. J. Firestone and E. S. Babcox, of the Firestone organization; P. W. Litchfield, W. D. Shilts and M. E. Morris, of the Goodyear forces, and W. O. Rutherford, H. K Raymond and W. H. Yule, of the B. F. Goodrich Company.



Al Bartsch, Stewart Slosson and E. Theurer

CYCLEMOTOR AVERAGES 79½ M. P. G.

Little Two-Stroker Shows Remarkably Low Fuel and Oil Consumption in Run From Providence to Cycle Parts Convention

ATLANTIC CITY, N. J., July 31.—While far from being of a boastful nature, D. G. Anderson, E. R. Perrin and O. Adams of the Cyclemotor Corporation of Rochester, N. Y., are pointing with pride at the performance of Mr. Adams, who rode his Cyclemotor-fitted Pierce bicycle from the F. A. M. Convention in Providence to this city in fine style. He averaged 79½ miles per gallon for the trip, while the oil consumption was so slight as to be inconsequential.

Starts from Providence

Adams filled up his tank and put Providence behind him at 3:40 o'clock on Friday afternoon last and rode to Norwich, Conn., 60 miles, arriving at that point at 7:20 o'clock in the evening. He averaged for that three score miles just about 17 miles an hour. Saturday morning he lit out for New York arriving at Gotham in the afternoon and taking the boat for Atlantic Highlands. His average speed for Providence and New York figures out at 15.67 miles an hour, of which Adams and those connected with the Cyclemotor are justly proud.

However, it was in covering the remainder of the distance between Atlantic Highlands and this point that Adams made his best showing. Pulling out on Sunday morning he completed the distance at an average clip of 24.1 miles an hour, letting the machine "all out" for the greater part of the distance. Adams, who is of the precise sort, kept an accurate record of his gas consumption and he figures that he averaged 79.5 miles to each gallon of gasoline. The oil consumption was next to nothing. The performance is one that has impressed folks hereabouts deeply, and cannot fail to be of general interest.

ERECT NEW TIRE PLANT

SPOONER, Wis., July 29.—J. H. Newburg, Warsaw, N. C., together with Akron, O., interests, has practically closed a deal for the erection of an extensive tire and rubber plant in this city. An effort is being made to interest local capital also.

TO STAGE RUNS AND RACES

JOLIET, Ill.—The Joliet Motorcycle Association has just been organized to stage endurance runs and other contests. Frank Uhde is president; William Todd is vice-president and Ray Bassett, secretary-treasurer.

MOTOR WHEEL DRIVEN JUNIOR AUTO FOR A. O. SMITH

Milwaukee Company to Market Miniature Motorcar Having Bicycle Booster as Power Plant —Has Pressed Steel Body and Novel Means of Control

ATLANTIC CITY, N. J., Aug. 1.—Undoubtedly the most interesting announcement that has broken to date at the Cycle Trades Convention here comes from W. V. C. Jackson, of the A. O. Smith Company. It is that the Smith Motor Wheel is to be made the basis of a junior automobile which is to be ready for the market under the Smith nameplate within the next sixty days.

The new product will be made "in toto" at the Smith plant in Milwaukee and will be sold only as a complete unit. It is intended to reach a class of youngsters to whom bicycles with Motor Wheel attachments cannot be sold by reason of parental objections, inability to ride a two-wheeler or other causes.

Details of Construction

In its simplest aspect this newest creation of the Milwaukee plant comprises a pressed-steel frame with members of channel cross-section, providing extreme strength and rigidity without the handicap of excessive weight, mounted, with interposed cushioning springs, on four wire wheels. The arrangement provides a wheelbase of 70 inches and a tread of 40 inches. The wheels are 20 inches in diameter and, as is the case with the Motor Wheel, are shod with 2-inch tires.

The Motor Wheel power plant attaches to the rear axle through the intermediary of special fittings which not only compensate for unevenness in the road surface, but also make allowance for any strains incidental to rounding corners and doing away with the necessity of a differential.

Emphasis is put on the simplicity of this self-contained power plant by the Smith folk, for with the motor and all its appendages, even including gas and oil tanks, contained in the small expanse of this fifth wheel attachment, there is a minimum of complication and weight, while at the same time the working parts of the machine are instantly accessible. Aside from the use of the special fittings to adapt the wheel to this special service, there has been but one change in the Motor Wheel proper which represents the fitting of a starting handle to the disc wheel, whereby the driver can reach over the back and start up the motor. Also emphasizing the simplicity of the arrangement is the fact that by a special pedal arrangement, the Motor Wheel itself is lifted from the ground thus providing a very simple, albeit serviceable substitute for a free engine clutch and opening the way for hand starting of the motor.

The clutch pedal arrangement is such that the clutch can be locked in the inoperative position.

Control Is Simple

A second pedal provides the means for operating the brakes, which following closely automobile practice, are arranged to operate on brake drums positioned on the rear wheels. As for the rest of it, the spark, compression release and throttle control are all vested in a single little lever as with the ordinary Motor Wheel, the lever being fitted on the well proportioned steering wheel.

The pressed steel body is built on classy racing lines, the effect being heightened by the inclusion of a dummy hood and radiator, the latter being hinged so as to swing forward when the filler cap is unscrewed disclosing an ample space for carrying luggage and packages, a fact which it is thought, will induce many merchants to employ Junior Car owners for package delivery service.

The speed of the car is given at about 20 miles an hour and it is pointed out that it will climb all ordinary grades. The Smith company, having specialized in automobile parts for years and being at the present time the largest parts builder in the United States is sufficient guarantee of the quality and durability of the new machine. The price has not yet been announced to the trade.

WALTER DAVIDSON RETURNS FROM TRIP TO ENGLAND

Made Three Weeks' Sojourn in the "Tight Little Isles" to Look Into Details of Foreign Business at London Branch—Royally Entertained by His English Friends

ATLANTIC CITY, N. J., Aug. 2.—That it is no "cinch" to pilot a motorcycle with the sidecar on the left side, a British practice, and that the English buyer is much more deeply impressed with quality than he is with low price, are the chief impressions which Walter Davidson, president of the Harley-Davidson Motor Co., brought back with him from a three weeks' sojourn in the "Tight Little Isles."

His trip terminated happily on Sunday morning last when his steamer docked in New York. Mr. Davidson quietly slipped away from America on June 29 and set foot on British soil for the first time five days later. He put in most of the three weeks he spent there at the London branch of the Harley-Davidson Motor Co., looking into the details of the foreign business.

British Branch Well Stocked

Regarding the trade in Great Britain and the British embargo on the importation of American motorcycles, which hits hard at the business done in American machines in that quarter of the globe, Mr. Davidson says that, through foresight of the far-reaching sort, the Harley-Davidson British branch is well stocked, both with machines and parts, sufficiently so to ensure continued prosperity, despite the embargo. The most disquieting feature of the British business at the present time, according to Mr. Davidson, is the recently adopted war measure requiring all users of "petrol" (gasoline) to take out a license, which is due to go into effect today, and which has given rise to a degree of uncertainty affecting the motorcycle trade.

Mr. Davidson speaks appreciatively of the welcome extended him by the British trade, and especially the British trade press, which organized a Harley-Davidson dinner for his especial benefit at which better than half a hundred covers were laid.

It was on the Saturday after he arrived that Managing Director Duncan Watson, of the London branch, chose to stage a wounded sailors' run, along lines similar to the two highly successful wounded soldiers' runs that had been held previously, and it was while driving one of the crippled sailors, a survivor of the recent Jutland naval engagement, from Westminster Abbey to Lord Northcliffs castle at Guildford, that Mr. Davidson discovered the difficulty of manipulating a left-handed sidecar combination on streets and roadways, with the traffic all taking the left side of the road.

Aside from the business of a special nature with the London branch, which took Mr. Davidson across the pond, he met many other foreign Harley-Davidson agents from various parts of the continent, meetings which not only tended to make his journey thoroughly enjoyable, but which also added considerable to it as a business trip.

BIG APPROPRIATION TO BOOST CAMPAIGN

(Continued from page 25)

occasions the importance they deserve.

The crux of the situation, so far as the work of the "Million Bicycles Committee" is concerned, is that an expenditure of $85,000 to $90,000 should be assured for the year beginning September 1 next, if the campaign already launched is to continue to bear fruit. The advisability of laying out such a sum, or methods of furnishing it, were not entered into.

The cycle representatives present, however, expressed complete satisfaction with the operations of the committee to date, and there appeared to be strong sentiment in favor of a continuance of the boosting and educational efforts on any basis that can be properly financed without undue strain.

A detailed report on the expenditures of the committee could not be given, owing to the absence of Treasurer Fred I. Willis.

L. M. Wainwright offered the motion providing for the acceptance of the "Million Bicycles" report, and embodied in it a provision for the continuance of the present committee, at least until a permanent arrangement can be decided upon.

Following the reading of Secretary Olin's report and supplemental remarks by Chairman Quine, to the effect that the time is at hand to take up a "big matter" with a full appreciation of its significance, the meeting adjourned.

SPECIAL BASEBALL EXTREE! JOBBERS WIN!

With a Score of 18 to 6, the Mfrs. Bow in Defeat; Splendid "Police" Protection Against "Unruly" Spectators; Several Fans Fined

ATLANTIC CITY, N. J., Aug. 2.—This morning's program called the cycle trades conventionites to the Ball Park, where teams representing the manufacturers and the jobbers served up a contest replete with grandstand plays. With Cobb base running and fielding novelties, the ball game with the incidental trimmings, was one of the most spirited features so far staged, and interest in it was heightened by the appearance of the cycle trade "strong arm squad," composed of "Sheriff" John Henry, "Police Captain" Jack Brandt, and "Sergeant Jim Grady."

Brass Buttons and All!

These trade hustlers were dolled up with the full layout of brass buttons and all the fixings of honest-to-goodness coppers, and they lived up to appearances. About two dozen spectators at the ball game were fined a dollar a piece for merely looking pleasant, and the proceeds were used to buy refreshments for the ladies and the perspiring players.

Messrs. Owen and Grover, acting as the grandstand committee, called for reinforcements, and A. B. Coffman and J. C. Ferguson jumped into the breach. From that time forth the sales of candy climbed to astonishing figures, and the spectators who complained to the officers that he had received for candy a few gum-drops for a perfectly good quarter were, in most cases, fined another quarter for being too fussy. It was a genial crowd and a large one.

Hamilton Is Umpire

G. H. Hamilton, of the Federal Rubber Co., and former F. A. M. president, acted as umpire under the guard of "Sheriff" John Henry, supplemented from time to time by "Police Captain" Brandt and "Sergeant" Grady. Seeber occupied the box for the jobbers, with Wagner as backstop; Anderson, of Cyclemotor Corp., handled the slab work for the manufacturers, and Southmayd received him. The manufacturers had Tisne on first base, Horace Hoffman on second, and Schwab, of Stevens & Co., on third. Percy Pierce pulled down the hot ones at shortstop, and Griffith, Ash and Glynn made up the manufacturers' outfield.

The battery of the jobbers was backed up by an all-star aggregation composed of Oliver, Wigmore, Sauffey, Grist, McKenneth, Ramsey and Vogt. There were differences of opinion about the score as usual, but the jobbers claimed a victory by 18 to 6, and the official guardians of the peace let them get away with it.

NEW IMPETUS WILL BE GIVEN LIGHTWEIGHT

Commenting on the announcement of reduction of Ford prices and its effect on the motorcycle trade, R. G. Betts, founder of the F. A. M. and formerly editor of *Bicycling World* and *Motorcycle Review*, thought that it would ultimately result in the more rapid development of the lightweight motorcycle field and especially the development of a lightweight twin machine to sell at a lower moderate price.

HURLEY IS LINKS DEVOTEE

S. C. HURLEY, formerly sales manager for the Diamond Chain & Mfg. Co., of Indianapolis, and now covering central territory for the house, has become quite a golf enthusiast. Those who have seen him play agree that he is rapidly becoming an expert. Other golfers in the trade take notice.

BOIDO WINS INDIANAPOLIS NON-STOP RACE

Phoenix Indian Rider Is Victor in First Continuous Race Without Refilling, Covering 160 Miles in 2:30—Ellis and Fields, on Indians, Get Second and Third Places

INDIANAPOLIS Ind.—Lorenzo Boido, Indian rider from Phoenix, Ariz., covered the greatest distance in the non-stop race in this city, covering 160 miles. His time was 2:30. Johnny Ellis, riding the same Indian on which he has won the last three 100-mile races here, was second with 155 miles before running out ot gasoline. Russell Fields, like Ellis, from Indianapolis, and also Indian mounted, ran 107 miles before going dry. Boido was declared the winner. As the event was the first of its kind ever promoted in this country, it is expected that Boido will be considered as the record holder by the F. A. M.

High Average Speed

A clause in the entry blanks demanding that the winner run at an average speed of not less than fifty-eight miles resulted in making a very close and interesting race from the standpoint of the spectators. Up until 90 miles six of the original starters took part in the race. Joe Wolters, on an Excelsior, was the first man to go out. On the eighth lap he lost an air valve and withdrew. Keller, on an Excelsior, soon afterwards came in limping on one cylinder, after which the race went on for fifty miles without any other riders dropping out. Sandman, of Louisville, on an Excelsior, ran out of gasoline on the sixtieth lap and Hilliard, Excelsior, went out of the race at this point with a broken sprocket.

Only Three Left

The race then narrowed down to Boido, Ellis, and Fields in the positions named. Boido continued to increase his lead over the other two until he was leading them by four miles. He was turning laps at this period in 54 seconds and appeared good to run 100 miles more. At 107 miles Fields' Indian heaved one big sigh and lay down to rest against the inside fence on the west turn. Then Ellis and Boido set down to see who could outlast the other with the chances in the favor of the Chicago man as he carried eight gallons of fuel when he made the start, while Ellis only carried four and a half.

Boido Has Trouble

At the 130 mile mark Boido began to develop trouble of some kind which was soon diagnosed from the pitts as lack of oil. He slowed down considerably at this point and settled down to make it run as far as possible on the small supply in the crankcase. Ellis was still tearing off mile after mile without slackening his speed perceptibly and was seen to be gaining on Boido. The fans in the stand began to wonder if Ellis could repeat again and even his wife moved down close to the track so that she would be in a better position to meet him when he finished and give him her usual kiss of thanks for bringing home the bacon.

Ellis Is Out

Then the strain of waiting was broken, for Ellis was seen to slow up on the back stretch and come very slowly down the main straightaway. When he was a few feet from the judges' stand he straightened up and smiled the smile that has made him a favorite in Indiana. The machine barked its last bark and rolled over on its side. Before Ellis could push the machine off the track down the stretch came Boido, the winner by five miles. He was jerking along spasmodically. Foot by foot he crawled along past the stands and into the east turn, only to come to a dead stop with his motor frozen tight. He had been running for the last ten miles without oil.

The attendance at the meet was a sorry blow to the promoters as less than one thousand fans witnessed the race. Boido won $164 as his share of the prize money while Ellis, who ran a few miles shorter, received $75.

ALL-PRO. MEET DATE SET IN COLUMBIA, S. C.

COLUMBIA, S. C., July 28.—The second annual pro. race meet will be held on Labor Day, September 4, on the mile track of the South Carolina State fair grounds, in this city. The events will be open to riders of machines of 61 cubic inches piston displacement. The following events are on the card: 15, 10, 7, 5 and 3 miles open. Cash prizes aggregating $200 are offered.

The meet is being promoted by George M. Thayer, B. L. Duncan and W. J. Heidt, Jr., the same trio who ran off the first all-pro. meet here last year. Over 3,000 spectators saw the races last season, and a much larger crowd is expected this year. Entry blanks can be had of any of the promoters.

SPRINGFIELD M. C. OFFICERS

SPRINGFIELD, Ill.—William Londrigan, of this city, has been elected president of the Springfield Motorcycle Club. The other officers are: Roy F. Chiles, vice-president; Frank J. Koch, secretary; Herbert George, treasurer.

WAITING FOR THE WORD AT BELMONT PARK TRACK

Starters in Five-Mile Amateur Race at Recent Meet on Philadelphia Track. Joe Pancoast, Dayton (in Center), Has Won Most Events at This Track

BAIRDS ARE WINNERS IN UTICA MEET

UTICA, N. Y.—Walter Baird, Excelsior, won the single cylinder and the free-for-all motorcycle events in the Oriskany Falls hill climb near this city. His times were respectively 1:20 and 1:19. Stuart Baird, Excelsior, made the best time in the twin cylinder class, as well as the best time of the day, the ascent being negotiated in 47 seconds.

George Lochner, Excelsior, was second in the single-cylinder class. Sam Neilson, Excelsior, took second place in the twin cylinder class and Lochner again came second in the free for all. There were five automobile events on the program in addition to the two interesting motorcycle hill climbs.

LABOR DAY MEET FOR SHEEPSHEAD BAY

NEW YORK, July 14.—Pointing to the Independence Day meet at the Sheepshead Bay track as a motorcycle achievement of the first water sort, both from the angle of good sport and financial return, the Sheepshead Bay Speedway management goes a step further than merely hinting that Labor Day, September 4, will witness the staging of a similar racemeet. If things go according to the tentative program, a prize purse of $3,000 will be hung up for the occasion with "primes" of $100 for each record shattered.

INDIAN M. C. MEMBERS TAKE 1,000 MILE TRIP

NEW BRUNSWICK, N. J.—Four members of the Indian M. C. of this city, spent their vacations in riding for six days through Massachusetts, Connecticut, New York, Pennsylvania and New Jersey, covering 1,000 miles during the period. They left on Monday and returned Saturday, having covered the distance with but one mishap, a bent fork due to running off the road. The riders were Wesley De Hart, Russell Pharr, Elmer J. Mills and Fred Leach.

PRESENT TIME RUN MEDALS

READING, Pa.—At the last meeting of the reading M. C., the awards for the recent sealed time run of the club to Harrisburg and return were presented. Paul Maurer, Indian, and Roy Stoyer, Emblem, tied for first place and each received a gold medal. William Buel, Harley-Davidson, received the silver medal, and Raymond Fritz, Indian, got the bronze medal for third place.

KAY EASILY WINS TWO

PHILADELPHIA, Pa., July 28.—Thomas Kay, mounting a Dayton motorcycle, won the two races staged at Point Breeze Park on July 15. One event was over the five-mile route, and the other at ten miles. Kay succeeded in lapping several of the competitors, and, all in all, had an easy time of it. In a trial circuit of the track he reeled off a mile in 48 seconds. Speed fans to the number of 2,500 witnessed the races.

MERCIER WINS AT SHEEPSHEAD FIELD DAY

Indian Amateur Is Victor in Ten Mile Race at National Guardsmen's Benefit at Speedway—Police Champ Makes Circuit in 1:25 4-5

SHEEPSHEAD BAY, N. Y., July 30.—Only four racing motorcyclists showed up for the races and exhibitions that were staged at the National Guardsmen's Field Day at the Sheepshead Bay Speedway, yesterday afternoon, and one of them was eliminated before the start of the first heat of the ten-mile race, the contest being run in four and six-mile legs. The starters in the race were Julius F. Mercier, Brooklyn; John Lindner, Brooklyn, and George Hamilton, Upper Montclair, N. J. Sid Brown, another entrant, lost his driving sprocket as he was warming up for the start of the first leg at four miles and was forced to abandon the contest.

Mercier Wins First Heat

Julius Mercier, mounted on an Indian, won the first heat, with John Lindner in second place. Hamilton trailed in third. The time was 3:04. In the second stage of the race at six miles, Lindner had an easy time of it, winning as he pleased in 4:35. Mercier blew a shoe in the first lap and the heat proved to be a walkover for his fellow townsman. The officials decided that Mercier and Lindner were tied and decided to give the race to the one making the fastest time. As each averaged 46 seconds to the mile when they won their heats the race was decided on the toss of a coin, which was won by Mercier.

Two-mile time trials were also scheduled for the day, but the only time trial indulged in was that of Howard Smith, the champion of the police department, who covered the two-mile circuit in 1:25 4-5. With the exception of Mercier's Indian, the machines used were Harley-Davidsons.

AMATEUR CLIMB WON BY OWEN AT MILWAUKEE

MILWAUKEE, Wis., July 31.—Elmer Owen, the Milwaukee M. C. Beau Brummel, demonstrated his riding as well as dressing ability by winning the amateur event on the club's hill climbing contest program today. M. Kavanaugh was second and Fred Gross third.

Leo Conners won the single cylinder event, while the pro. climb was won by "Red" Lewis Hadfield. No times were taken, owing to the absence of a stopwatch.

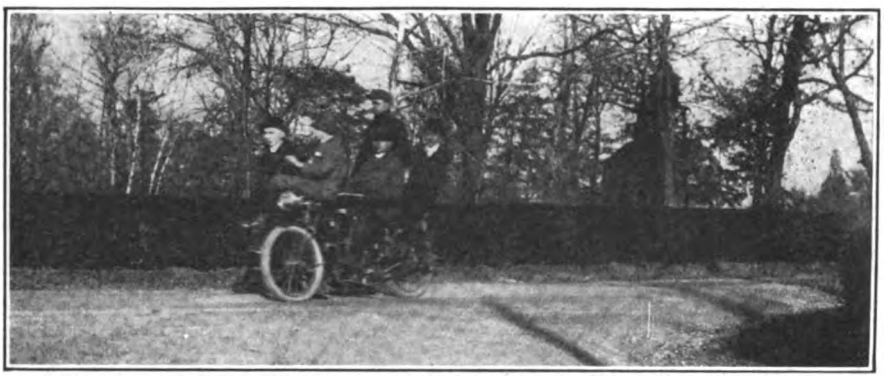
GALESBURG MEET TO HAVE FIVE EVENTS

GALESBURG, Ill., August 1.—Five events comprise the program for the meet of August 7 at the district fair grounds one-mile track, under the auspices of the Galesburg District Fair Association.

The opening event will be a 10-mile pro., while the second will be a 10-mile amateur. Following these two will be a 15-mile pro., a five-mile sidecar and a 25-mile pro. Class B open. In the latter event, first money will be $40, with $30 for second and $20 for third place. Entry in all events is free until August 5, when a post entry fee of $1 will be charged. Application should be made to the association, this city.

TESTING 1916 READING STANDARD AT BALTIMORE



How Agent S. Neshemkin Proves Pulling Ability of Big Brown Twin to Prospects in Maryland Metropolis. Five Are Readily Carried

ARMSTRONG TAKES TWO AT POINT BREEZE

PHILADELPHIA, Pa., July 28.—Billy Armstrong, Indian, ran off with the five mile and three mile pro events at the Point Breeze Motordrome last night. Armstrong's time for the five mile was 3:43, and for the two mile was 2.07 1/5. Henri St. Yves came second in the five mile and first in the two mile, his time for the latter event being 1:27. Herman Veditz took second place in the two mile and three mile events. Over 20,000 fans saw the motorcycle event, as well as a 50-mile motor paced bicycle race, which was won by Clarence Carmen, in 1:09:04.

MEMBERSHIP CONTEST WINNER

C. E. WHITCOMB, of Chestnut and 14th streets, Kansas City, Mo., has been declared the winner of the F. A. M. membership contest for the week of July 16-22, by Secretary G. B. Gibson. Whitcomb recommended six applications, which was high mark for that week.

WEST VIRGINIANS TO RACE

WHEELING, W. Va., July 29.—Arrangements are being made by local cycling enthusiasts to hold a bicycle race during the summer. The event will be staged on the fast track at the local fair grounds, at one time one of the leading courses in this State.

VERRILL IS VICTOR IN TOLEDO 100-MILE RELAY

Indian Speedster Wins Feature at Interstate Meet in 2:05:27—Meyers, Excelsior, Second, and Sudduth, Thor, Third

TOLEDO, O., July 31.—"Krazy" Horse Verrill, riding for the Indian team Verrill-Nixon, won the 100-mile relay teature at the meet of the Interstate Racing Association on the local half-mile track yesterday. His time was 2:05:27. Fritz Meyers, Excelsior, came in second, and Sudduth, of Marks-Sudduth Thor team, third. Mathews, of Mathews-Pineau team, came a poor fourth.

Eight teams in all faced the starter for the long relay feature. For several miles after the flag dropped there was a battle royal between Jones (Harley-Davidson), Mathews, Verrill and Marks, all being closely bunched. Mathews slowly came into the lead, and at 12 miles was slightly ahead of the field. Verrill came next, and Luther, Excelsior, third.

Pineau Comes On

Pineau came on the track in the 16th mile to relieve Mathews, and thereafter the switching began. In the 21st mile Morrison started on the track to relieve Jones, when the latter struck a bad spot and came off. The spill put Jones' mount out of the running, so Morrison had to ride the rest of the race alone. At 25 miles Verrill led, with Mathews second and Morrison third. Time, 29:54⅘.

In the next 20 miles a number of reliefs were effected, but at the 50-mile mark Verrill was still in first place, and Marks on his Thor in second position. Schaefer, Excelsior, was third, and Mathews far back. Morrison was out. Time, 1:01:15. At 75 miles the positions were the same, with Nixon riding for his team mate, Verrill. The time here was 1:34:50⅘.

Verrill Comes Home

Verrill and Nixon kept at it and refused to allow anyone to get within striking distance, Verrill crossing the tape first in 2:05:27. The Marks-Sudduth team were in second place, but lost time in switching, giving Meyers a chance for second.

In the opening five-mile heat Morrison took first place, with Verrill second and Meyers third. Time, 5:54. In the second heat, Jones overtook Mathews in the third mile and held first place all through. Time, 5:53 2/5. Mathews beat Marks for second.

In the final heat Jones shot to the front, but had to withdraw on the second lap due to a loose sprocket. Morrison then went out ahead, with Verrill close, but Morrison held on and finished first. Verrill ran second and Marks third. Time, 6:02.

A one-mile bicycle race followed with a big field of entries. This was won by Scarletto in 2:22. Nagel was second and Leonard third. All were members of the Toledo B. C.

A novelty event followed, this being a three-mile race for automobiles of the vest-pocket variety. Having been widely advertised as "every way superior to the motorcycle," the race attracted some interest at first, but the audience relapsed into boredom while the little machines struggled to make the circuit six times. The winner covered the distance in 4:54⅗ amid a dead silence from the audience.

HAD PLEASANT RUN

LEBANON, Pa.—The Harley-Davidson M. C. of this city, indulged in a Sunday run with chicken dinner accompaniment on Sunday last, the course being to Columbia, Marietta, York, Chickies Rocks, Rocky Springs Park and Lancaster. The dinner stop was at York. The next run will be to Mt. Penn and Reading.

PLANS COMPLETE FOR DIXIE 500-MILE

Two-Day Endurance Run Will Have No Known Checking Stations—Three Divisions Provided For—Regular and Special Medal Awards

ROANOKE, Va., July 27.—All is ready for the two-day, 500-mile endurance run of the Dixie M. C. to Richmond and return, on August 11 and 12. There are at least 40 entries figured upon for the three divisions of the run: lightweight, solo and sidecar.

There will be no known checking stations on this run, only regular controls and a number of secret checks. This unique feature will probably make it difficult for a contestant to get a perfect score unless he rides very close to schedule, even with the two-minute allowance at controls.

Controls and Schedules

The first day's controls will be at Roanoke (start), Bedford, Lynchburg, Farmville, Petersburg and Richmond (night control). For the second day, Louisa, Charlottesville, Staunton, Natural Bridge and Roanoke (finish), are the controls. The schedules will be as follows: lightweight division—15 miles per hour; solo division—20 miles per hour; sidecar division—20 miles per hour.

Gold medals will be awarded for perfect scores; silver medals for scores 990 to 999, inclusive, and bronze medals for scores of 900 to 989, inclusive, in all three divisions. Special gold medals will be awarded as follows: highest perfect consistency score in solo division; highest perfect consistency score in sidecar division; highest amateur consistency score in solo division.

The course will be thoroughly posted with large metal signs furnished by the Firestone Tire & Rubber Company, of Akron, O., and every precaution will be taken to give every contestant fair treatment. Further information can be had from R. C. Horn, chairman of the endurance run committee, 105½ Campbell avenue, West, Roanoke, Va.

SIX FOR OKLAHOMA GUARD

OKLAHOMA CITY, Okla.—Six motorcycles, purchased with part of the fund for the National Guard raised by subscription throughout the State, are now on their way to Llano Grande to the First Regiment, O. N. G. The machines were purchased on the recommendation of Colonel R. V. Hoffman, who stated that they would be of more value to the troops than any other equipment which could be purchased. The make has not yet been decided on.

WANTS TWO MACHINES

RICHMOND, Va. — Superintendent Knowles of the gas works has requested the administrative board to permit him to purchase two motorcycles for his department for repair work. At present the department is using wagons, but the superintendent has tried out motorcycles and says that they are superior in service and economy. In all probability, the machines will be authorized.

NOW HEADQUARTERS ORDERLY

CHAUNCEY BOTTOM, who has been using a Pope twin in the employ of the Government road service, has enlisted in the Illinois National Guard and is now mounted orderly to General Foster, commanding the First Brigade. This is the first time a motorcycle has been used for orderly service in the Illinois Guard.

GASOLINE DROPS CENT A GALLON

NEW YORK, July 29.—The first downward move of the gasoline market in many months was announced yesterday when the Standard Oil Company of New Jersey reduced the price of the precious fluid to 22 cents per gallon, tank wagon basis. The reduction affects the New Jersey district, but it is expected that New York prices will also be reduced.

HARLEY-DAVIDSON IN COBALT

COBALT, ONT.—The motorcycle is now an acknowledged fixture of Cobalt's rock-bound existence. A dozen or more single-trackers are now in daily use in the rough mining district. A recently-appointed agent here is the Milton Cat Hardware Co., and the motorcycle represented by this concern is the Harley-Davidson.

CRACK PROS. FOR PIKES PEAK CLIMB

Stokes, Perry and Wolter of Excelsior Camp, and Glaskin, Indian, Are Entered in Ascent of Noted Mountain on Aug. 10

COLORADO SPRINGS, Colo., July 29.—Four of the country's leading pro. riders have signed for the climb up Pikes Peak which is to be held on Thursday, August 10, under the auspices of the Pikes Peak Auto Highway Company, of this city. The four who have entered for the 13 mile ascent from Crystal Bridge Creek to the summit are Joe Wolter, Excelsior; J. B. Glaskin, Indian; Bob Perry, Excelsior, and Glen Stokes, Excelsior.

Four Events Slated

There will be four events, the first being for sidecars with one passenger, the motor being 61 cubic inches and the machine fitted with a three-speed gear. Glaskin, Wolter, Perry and Stokes are all entered in this event. The second event, an open pro. for solo machines, and the fourth, a similar climb, has the list of entrants headed by Stokes, Wolter and Perry. The third event, for the Colorado State Championship, has no entries as yet.

The climb along the highway is up grades which average 7 per cent., with a maximum grade of 10 per cent. The route is rough in spots and there are a number of sharp turns, on which a miscalculation might be fatal. This has probably deterred a number of riders from entering the climb, but the importance of the event will undoubtedly bring out a considerable number of others, in spite of the risks.

A Big Event

This climb is an annual event, looked forward to by automobile manufacturers all over the country. The automobile events for the climb this season will be held on August 11 and 12, the days succeeding the motorcycle events. The Pikes Peak climb has been received as an automobile classic and it will soon be considered such in the motorcycle field.

LONGSHORE STRIKE KEEPS MOTORCYCLE COPS BUSY

SAN FRANCISCO, Cal., July 26.—Motorcycle police squads of all the seaport cities on the Pacific Coast have had busy times during the last few weeks, owing to the strike of longshoremen which has resulted in frequent disorders along the waterfronts.

It has been manifestly impossible to take care of the situation adequately with the regular waterfront forces, and the superior mobility of the motorcycle squad has brought it into prominence, as it is able to bring reinforcements to any needed spot in the minimum time.

The San Francisco police force has sixteen machines, all Indians, six of which are constantly in regular use, the remainder being usually held in reserve. Four of the machines have been deemed sufficient to look after the special waterfront work here, and the work of looking after motor traffic in other parts of town has suffered no serious interference.

A different story comes from Los Angeles, where a local motorcycle dealer last week observed the automobile traffic practically running wild, speeding on downtown streets, etc. As the traffic there is usually strictly controlled, he was at a loss to account for the change until informed that the motorcycle police had been sent to San Pedro on special strike duty.

AWARDS TAG CONTRACT

COLUMBUS, Ohio.—Secretary of State Hilderbrant has awarded the contract for 1917 motorcycle tags to the Abbott Stamping Company of Detroit at 6.9 cents per set. This is an extreme low price and preclude the state from manufacturing the tags by the use of convict labor. The 1917 tags will be on a yellow background with black letters and will be similar to the 1916 tags as far as design goes.

LIVE SPANISH PAPER

NEWS of all Spanish bicycle and motorcycle events is chronicled each week in "Espana Sportiva," a journal devoted to sports in general. It is published in Madrid, and is of the regulation newspaper size. No less than four pages are regularly devoted to cycling.

15 FOR ILLINOIS BRIGADES

FORT SAM HOUSTON, Tex.—Fifteen motorcycles have been assigned each of the brigades of the Illinois National Guard, for the use of orderlies. Each regiment is to have one machine and three will be used for brigade headquarters.

STAR ENTRIES FOR INDIANA 24-HOUR RUN

"Cannon-Ball" Baker and Iwin Jacobs Head List of 14 Now Signed For Tri-State F. A. M. Contest on August 12 and 13

INDIANAPOLIS, Ind., July 31.—Fourteen entries have been received so far for the Tri-State 24-hour endurance run of the Indiana F. A. M. scheduled for August 12 and 13. At least four factories are expected to send in their entries before the time set for closing on August 6. State Commissioner Jack Carr will positively enforce the ruling calling for double entry fees for post entries, as he wishes to put a stop to the old practice of Indiana riders of coming in at the last minute and causing trouble to the promoters.

Erwin G. Baker is No. 1 on the entry list. He will go over the route with Carr and Van Staden to mark the course. Iwin Jacobs, who won the run last year, has also entered, and will probably ride independently again to try for the diamond medal. Both Baker and Jacobs state that the course is a gruelling one, and that it is doubtful if any perfect scores will be obtained.

The day schedule of 24 miles per hour is expected to bring a number of riders to grief, while the night figure of 20 miles per hour will probably be the cause of several eliminations before Cincinnati is reached. The roads during the day section are good, and should not prove difficult to first-class riders.

Entries should be mailed at once to Jack Carr, 52 West New York street, Indianapolis, Ind.

BENSON IN EAST VISITING MOTOR WHEEL AGENTS

MILWAUKEE, Wis.—J. A. Benson, the live wire traveling representative for the Smith Motor Wheel, is now covering the East visiting dealers who handle the little bicycle booster. He is at present in Pennsylvania, having covered New Jersey, and will soon work the entire territory from New York to Maine.

Benson writes that the Motor Wheel is taking hold stronger than ever in the East. "Dealers are highly enthusiastic," he says, "as the warm weather following the cold spring is producing Motor Wheel sales as the sun brings out the flowers after the rain." Benson is making "Service" his watchword and is giving dealers all along the line a practical course in service work.

LIVE POPE QUARTET FOR ATLANTIC CITY

WESTFIELD, Mass.—The Westfield Manufacturing Company, maker of Pope and Columbia bicycles and Pope motorcycles, will be represented at the Atlantic City convention of the Cycle Parts and Accessories Association by Manager J. P. Fogarty, Sales Manager L. D. Harden, Publicity Manager W. K. Porzer and B. A. Edgar, special representative.

CHICAGO COPS IN GUARD

CHICAGO, Ill.—Several members of the Chicago police force are enrolled in the 7th Infantry, Illinois National Guard. Among them are Captain J. J. Dineen, of C Company; John Murphy, of H Company; John Horan, of the Supply Depot; Arthur Schumaker, of G Company, and Barney Dohney, of the Supply Depot.

The motorcyclist who feels that he has it in him to be a human comet is wasting his time frightening horses and killing chickens on country roads while race promoters are yawping month in and month out for record-breakers on the tracks.

WORKSMAN VAN ADVERTISEMENT

ATTENTION is called by the A. O. Smith company to the fact that the advertisement of the Worksman bicycle van, appearing in last week's issue, in which was shown a cut of the van attached to a motor wheel with the statement, "Retails for $75 complete," might lead some dealers to believe that both the van and the motor wheel sell for $75. That sum covers only the retail cost of the van, the motor wheel being a separate item.

TO ENTRAIN FOR CAMP

BALTIMORE, Md.—August 1.—Latest orders from headquarters state that the first section of the Motorcycle Battery, of this city, will travel to the camp of instruction at Fort Ethan Allen, Vermont, by rail on August 10, instead of riding the machines as at first intended. The return trip, however, will be made on the section's motorcycles, which should prove to be a good test for the battery.

100-MILE PRO. CHAMPIONSHIP FOR DETROIT

Interstate Racing Association to Hold Big F. A. M. National Race at State Fair Grounds on August 13—Factory Stars to Ride

DETROIT, Mich., July 31.—The 100-mile National Professional Championship of the F. A. M. will be run off at the mile track at the fair grounds here on August 13. Chairman Donovan of the Competition Committee has awarded the event to the Interstate Racing Association, which has conducted a successful series of speed events in this part of the country during the past two years.

The big factories have signified their intention of entering the pick of their speedsters for this race. The pro. championship is a plum worth picking off, as the cash prizes are fine, and the Interstate Association has added others for the various place men. It is expected that Creviston, Verrill, Stokes, Wolter, Graves, Perry, Davis, Warner, Boido, Parkhurst, Brier and Weishaar will be at the starting line, as well as a pair of dark horses, who threaten to break into the limelight by crowding the veterans.

The race is being given lots of publicity, newspapers, billboards, posters and other means being used lavishly by the promoters, so that it is practically certain that a big crowd will be on hand. The Detroit track is fast, so that new records are regarded as likely.

The State fair officials are preparing the track for the coming big event. The surface is being treated with calcium chloride to render it free of dust. The turns are being graded and the dirt smoothed and packed. Final treatment will be given the course the day before the race, assuring plenty of speed.

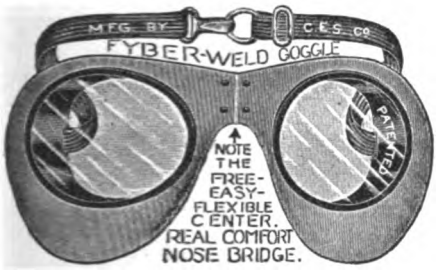
With the Manufacturers

NEW GOGGLE FOR USERS OF WELDING PROCESS

CHICAGO, Ill.—Another new product has just been announced by the Chicago Eyeshield Co. in the form of a goggle for those who use the oxy-acetylene welding



process. Operators of the oxy-acetylene apparatus are always equipped with goggles, but some of those in use do not give perfect satisfaction. To meet all the demands of the situation the Chicago Eyeshield Co. has marketed its latest goggle

The new goggle can be had in any of the standard colors that are suitable for the work, but they are ordinarily fitted with the new lenses recently brought out by the Chicago Eyeshield Co. and called the "No-Ultra" violet lenses. This type of lens positively excludes all violet rays and at the same time gives a perfectly clear vision.

The Fyber-Weld goggle retails at $3 a pair, fitted with the "No-Ultra" lenses. With the ordinary dark smoked, blue or green lenses, or with amber, they sell for $2.50 retail.

SUN NEVER SETS ON UNITED STATES TIRE CO.

NEW YORK.—The United States Tire Company, of 1790 Broadway, this city, makes the claim that the sun never sets on its product. It brings as substantiation the fact that its factories, laboratories, plantations and stores are distributed all over the globe. In addition to this, the United States Tire Company can now boast of being the largest shipper of first class freight in the country.

If all the fabric used by the company in a year was placed in a single strip, 12 inches wide, it would reach three times around the earth. The 206,000,000 pounds of manufactured rubber goods which leave the factories in the course of a year would fill a freight train 112 miles long.

MONOSMITH EXPORTS SHOW RAPID INCREASE

SPENCER, Ohio.—Foreign orders for "Brilliant" burners for motorcycle and automobile headlights are showing a rapid increase, as the record of shipments of the Monosmith Brothers Company, maker of these articles, indicates. Messrs. Backdahl & Co., of Stockholm, Sweden, one of the foreign agents, reports heavy sales in the territory assigned to this firm, which includes Sweden, Norway, Denmark, Finland and Russia. Similar reports come from representatives in Great Britain, France and Spain, as well as Italy.

The domestic business in the "Brilliant" burner is also growing rapidly. Every mail brings orders or inquiries from new dealers and repeat orders from old ones.

GOODRICH DECLARES REGULAR DIVIDEND

AKRON, O.—The B. F. Goodrich Company has declared the regular quarterly dividend of 1¾ per cent. on the preferred stock payable on October 2 to stockholders of record September 1. It has also declared a regular quarterly dividend of 1 per cent. on the common stock, payable on November 15 to stock of record November 3. Net profits for the six months ending July 1 are declared to have amounted to $4,800,000, as compared with $4,000,000 for the corresponding period one year ago.

STEWART-WARNER SHEET SHOWS BIG PROFIT

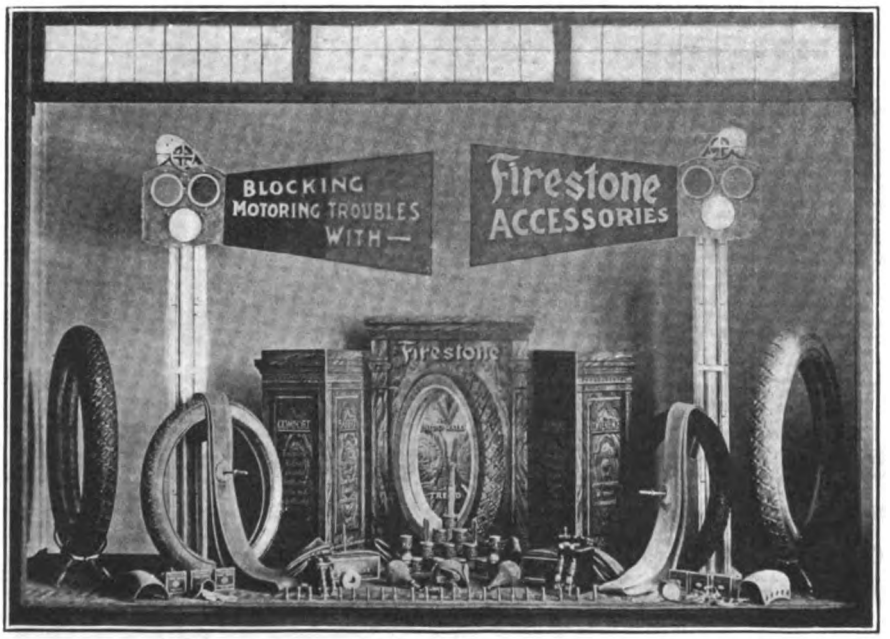
CHICAGO, Ill.—The Stewart-Warner Speedometer Corporation, of this city, has just announced its preliminary balance sheet for the first six months of 1916, and declared a dividend of 1½ per cent. on the common stock, payable August 1 to stockholders of record July 22. The directors voted to retire a large amount of preferred stock, setting aside $307.463 for the purpose.

The net profits for the first quarter of the present year were $572,000 and for the second quarter $703,000, making a total of $1,275,000, or 13 per cent. of the common stock valuation.

McGRATH IN SUMMER HOME

WESTFIELD, Mass.—W. L. McGrath, chief engineer of the Westfield Manufacturing Company, has established a summer home about seven miles from this city. He uses his Pope sidecar combination to travel to and from the factory each day.

FIRESTONE DISPLAY FEATURES ACCESSORIES



AMONG the window displays put forth by the Firestone Tire & Rubber Company of Akron, O., that shown in the accompanying photograph, is one of the most unique and original. It is being used by all Firestone branches and agencies throughout the country and has caused much favorable comment wherever shown.

The display is produced in three colors, and aided by the contrast of the red sidewalls and black treads of the tires, it is decidedly attractive. Accessories are prominently featured in the layout.

The window shown is but one of many which form part of a huge display campaign now being conducted by the Firestone folks. The campaign, though by no means nearing its termination, has already produced excellent results in all quarters.

FINISH 1620 MILE TRIP

BELLEVILLE, Mo.—George and Gustav Jacobs have just completed a 1629-mile motorcycle trip which started from Delta, Colo. The boys rode tandem and were in the saddle eight and a half days.

INDIAN TRIUMPHS

Indian Sets Up Three New World's Road Records!

JACK BOOTH

You have recently read a whole lot about Australian Road Records—READ THIS!

July 25, Jack Booth, mounted on an Indian, hung up three world's road records at Melbourne, Australia, at the same time made a tremendous slashing into the Australian records made by another American make.

1 MILE WORLD'S ROAD RECORD

Booth rode one mile over the road in 37 1/5 seconds! Just think of it—An average of 96¾ miles per hour! Cutting off 9 1/5 seconds from the record of another American machine!

5 MILE WORLD'S ROAD RECORD

Booth covered 5 miles over the road in 3 minutes, 25 3/5 seconds! Here he reduced the record of another American machine by 46 1/5 seconds! A wonderful demonstration of Indian's undisputed supremacy!

10 MILE WORLD'S ROAD RECORD

Indian carried Booth over 10 miles in 7 minutes, 45 4/5 seconds! Once more Booth hacked off the big total of 42¾ seconds from the previous road record!

A most marvelous exhibition of Indian leadership—
Indian's premiership cannot be disputed.
Don't have any regrets—own an Indian.

THE WORLD OVER!

Indian-Powerplus Makes Real Clean-up in F.A.M. Convention Endurance Run!

8 of the 9 machines to finish the F. A. M. Convention Endurance Run with perfect scores were Indians!

Starting from Albany, N. Y., the course extended over 560 miles of widely varying road, through the states of Vermont, New Hampshire, Massachusetts and Rhode Island. Undeveloped country roads were traveled! The rugged White mountains were traversed! All sorts of dangerous and difficult roads confronted the riders!

All well known makes were represented—But the always-reliable Indian-Powerplus carried Harvey Bernard, Iwin Jacobs, "Cannon Ball" Baker, E. H. Tracy, R. L. Veazey, John Constant, F. O. Brown and C. B. Long to the finishing line at Providence, R. I., with Perfect scores! Think it over—8 of the 9 to finish with perfect scores rode Indian Powerpluses!

Just another proof that Indian-Powerplus is the

BEST STOCK MOTOR EVER BUILT!

Questions and Answers

ROUTE TO TORONTO

PLEASE give me the best route to Toronto, Canada, also license requirements for a Maryland rider going to Canada.

O. W. HESS.

Union Bridge, Md.

Your best route is via Gettysburg, York and Lancaster to Philadelphia. Gettysburg is about 16 miles from your home. The route to Philadelphia is through New Oxford, Abbotstown, Thomasville, York, Columbia, Lancaster, Coatesville, Downington, Paoli, Wayne, Bryn Mawr, Ardmore to Philadelphia, 118½ miles. The next leg will be Philadelphia to Trenton, New Brunswick and Newark to New York, 100 miles, all good roads and well posted.

The route will then go to Albany, N. Y., 159 miles, all good roads and posted. Then across to Utica, Syracuse, Rochester and Buffalo, about 308 miles. Go to Niagara Falls, 21½ miles from Buffalo, ride across to Niagara Falls, Ont., then through St. Davids, St. Catharines, Jordan, Beamsville, Grimsby, Hamilton (50½ miles), Aldershot, Freeman, Appleby, Trafalgar, Cooksville, Lambton Mills to Toronto, 98 miles from Niagara Falls. You had better get a New York or Canadian license as Maryland is not included in the latest Canadian tourist privilege. New York is, however, for ten days.

WRITE THESE FIRMS

WE are desirous of getting a number of motors similar to the J. A. P. 8 h p. twin model for a French firm and would like you to give us names of makers of such motors.

D. C. ANDREWS & Co.

New York.

The Reading Standard Co., of 344 Water street, Reading, Pa., makes a motor similar to that of the J. A. P. but of larger bore and stroke. The valves are side-by-side. The Hendee Mfg. Co., of Springfield, Mass., uses a motor very similar in arrangement to the British motor mentioned, and might be able to supply you with a considerable number.

DROP-FORGING FIRMS

I WISH to get some connecting rods and crankshafts for experimental purposes and would like the address of makers of such drop-forgings.

MICHAEL KUCSERA.

Dunellen, N. J.

We doubt if you can find a company these days who will sell just a few connecting rods and crankshafts. Certainly, very few of the regular drop-forging companies will make up less than 1,000 pounds of forgings to order. Why not purchase some rods and shafts from another make of motor having the same bore and stroke as the one you have and experiment with them?

Here are a few drop-forging firms: Western Tool & Forge Co., Brackenridge, Pa.; Consolidated Mfg. Co., Toledo, O.; Cleveland Hardware Co., Lakeside avenue and East 45th street, Cleveland, O. They may be able to supply what you need.

N. S. U. PARTS

I HAVE an N. S. U. machine and would like to get parts for it. Please give me the address of the agent.

HENRY DUDLEY, JR.

Moorestown, N. J.

There is no agent for this make at present. You might try the Metropolitan Motor Cycle Repairing Co., 542 West 127th street, New York, which had some parts for this make a short time ago.

GO TO AN AUTO SUPPLY CO.

I WISH to get some Gredag No. 51½, but do not know to whom to apply. No dealers seem to have it.

GEORGE HURLEY.

Bronx, N. Y.

Go to Charles E. Miller, or the International Acheson Graphite Co., 90 West street, New York. A first class automobile supply house should have it or get it for you.

WRITE MAJESTIC CO.

SOME years ago I had a wicker body sidecar, but sold it, and now, as I am resuming riding, I would like to get a similar car.

New York. ALBERT COX.

We suggest that you write to the Majestic Manufacturing Co., of Worcester, Mass. They used to make wicker body cars and might be able to supply you with one.

MAKERS OF GERHART

PLEASE give me the address of the makers of the Gerhart motorcycle. They made a four-cylinder motorcycle last season.

J. H. G. HEBEL.

Berlin, Ont.

The Gerhart motorcycle, four-cylinder model, was made by the Gerhart Motorcycle Co., of Harrisburg, Pa. We doubt if the firm is making motorcycles at present.

YALE IS NOT MADE

PLEASE tell me who makes the Yale motorcycle and give their address. I wish to get some parts.

L. VAN VOORT.

Hull, Iowa.

It is no longer made. See answer to J. B. Clarke.

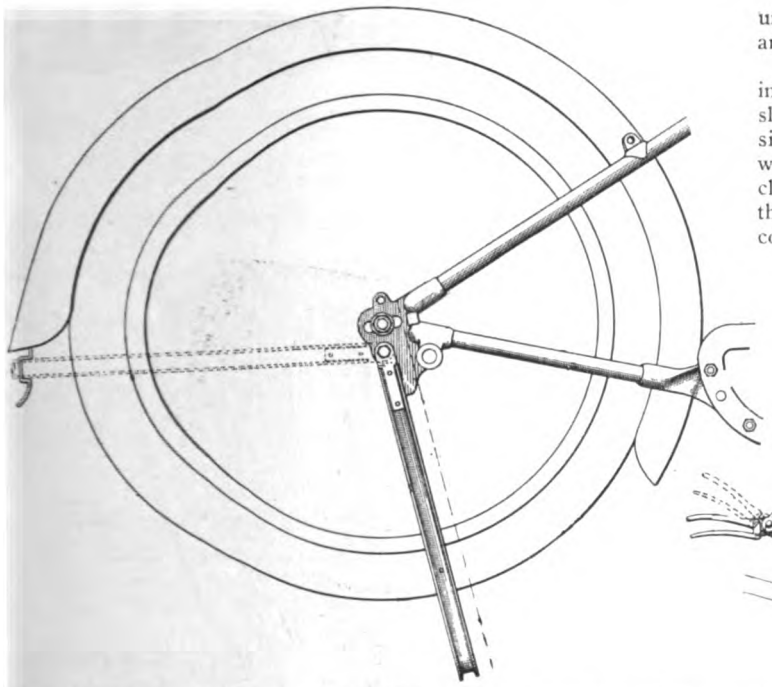
RECENT PATENT GRANTS TO CYCLE INVENTORS

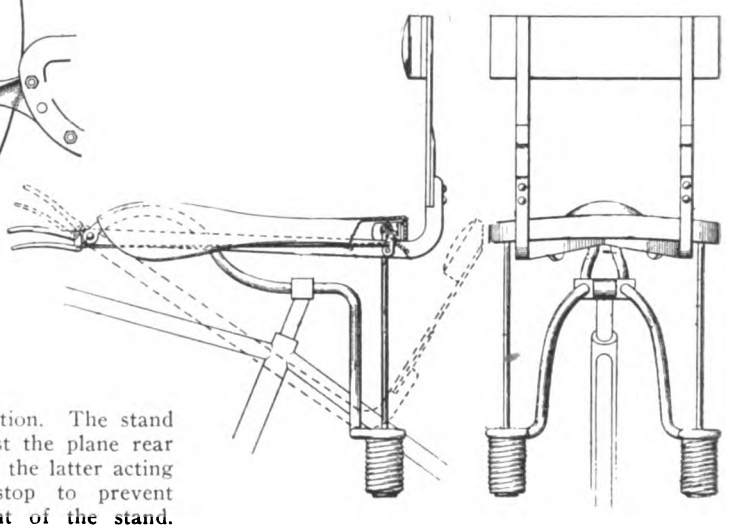
Stand With Long Support and Manually-Operated Backrest Are Latest Offerings



PRESIDENT IGNAZ SCHWINN, of the Excelsior Motor Mfg. & Supply Co., of Chicago, Ill., has just patented a new motorcycle stand construction incorporating a latch of improved type and an anchorage in unit with the slider forks. The stand is held in its raised position by a spring latch attached to the mudguard tail, the latch having an outwardly-bent tongue permitting the stand to slip readily under the same and latch securely.

The anchorage in unit with the slider fork on each side has lugs which are so inclined as to have the stand at the correct angle when in operative position. The stand arms bear against the plane rear faces of the lugs, the latter acting as a positive stop to prevent further movement of the stand. The construction eliminates the braces formerly used. The patent is No. 1,180,956. It is shown at the left.

At the right is a patent, No. 1,190,828, issued to Howard W. Weed, of Stamford, Conn., for a backrest. This rest consists of a pivoted frame carrying a back pad, to be attached to the motorcycle or bicycle saddle. The main frame carries the pad on suitable parallel members, the pivot being under the pommel of the saddle. For the inoperative position (shown in dotted lines), the user lifts the latch on the short arm, thus releasing the frame, which falls downward and offers no hindrance to his mounting or dismounting. For bringing the backrest to the operating position, the user presses down on the arm, and raises the rest to the vertical. The latch releases a catch under the saddle cantle.



INTEREST IN TOURING IS GROWING STRONGER

SAN FRANCISCO, Cal.—The last few weeks have brought out a marked increase in touring among local motorcyclists and every few days some rider starts on a long trip. Two of the local Excelsior riders have just returned from the Sierras, H. M. Brickwedel having gone to Reno, Nev., and return, while Floyd Henion spent his vacation in the Feather River Canyon.

John Gassman, on his Thor, returned a few days ago from Lake Tahoe. He says that the roads are in good shape as far as Auburn, but beyond it was rather rough. Arthur Green and Henry Brandon, members of the Vallejo M. C., have also completed a Tahoe trip.

C. Ballhaus, Powerplus Indian, is soon going to start across the continent, leaving over the mountain route via Folsom and Reno.

Some riders are holding off touring in the hopes that Yosemite will be thrown open to riders soon, while others are waiting for the game season to open. They will then use their mounts to ride to the mountains and camp there.

QUINCY SIDECARISTS OFF FOR NIAGARA

QUINCY, Ill.—Carl and Mrs. Childers and Leo and Mrs. Haley are riding to Niagara Falls by easy stages from this city. Both pairs use Excelsior sidecar combinations, the cars being of Rogers make. At the last writing they were leaving South Bend, Ind. They will be away for two months.

WATCH FOR THIS RIDER; HE IS WANTED AT TRENTON

DEALERS in the South, Central and Middle Western sections are requested to keep a lookout for Albert Campbell, a young man of slight build, light complexion, blue eyes. Campbell lives in Trenton, N. J., with his mother, at 125 Anabelle avenue. He is riding a Harley-Davidson, motor No. 4898-M, with New Jersey license C-1845. The machine is the property of R. S. Woods, Harley-Davidson agent at 145 North Broad street, until fully paid for by young Campbell. If he is found, he is to be detained, and either his mother or Dealer Woods notified at their expense at once.

Campbell deceived his people as to his destination when he returned to Trenton, after a trip to Bridgeport, Conn., and return on July 14. He was traced to Philadelphia and Baltimore and Washington. He was in company with two Michigan riders, carrying full camping kits, on July 14-15. These men rode, respectively, an Indian and a Harley-Davidson. They can probably give some information as to Campbell's whereabouts if seen on the road, as they traveled some distance with him.

MOTOR COPS VALUABLE IN CURBING RIOTERS

NEW YORK.—Predictions made of late that the motorcycle squad of the New York Police Department would render invaluable aid in case of a serious disturbance are being verified by the results obtained in connection with the general tie-up of surface traction lines throughout New York and Brooklyn. Some rioting has already occurred, and the ability of the motorcycle police to cover a great deal of ground and keep in touch with all phases of the outbreak has added considerably to the piece of mind of the municipal authorities.

Solo and Sidecar Mounts

Both solo machines and sidecar combinations are being used by the police, and it has already been demonstrated that the power two-wheeler can be made a remarkable agency for curbing the unruly element. In several instances it became necessary to have fairly large bodies of policemen moved from one center of action to another on a moment's notice, and the motorcycle, under such conditions, offered transportation facilities that could not have been attained in any other way. Just how far the motorcycle squad will figure in the developments from now on is not being made known by the headquarter's officials, but the showing already made has created a decidedly favorable impression.

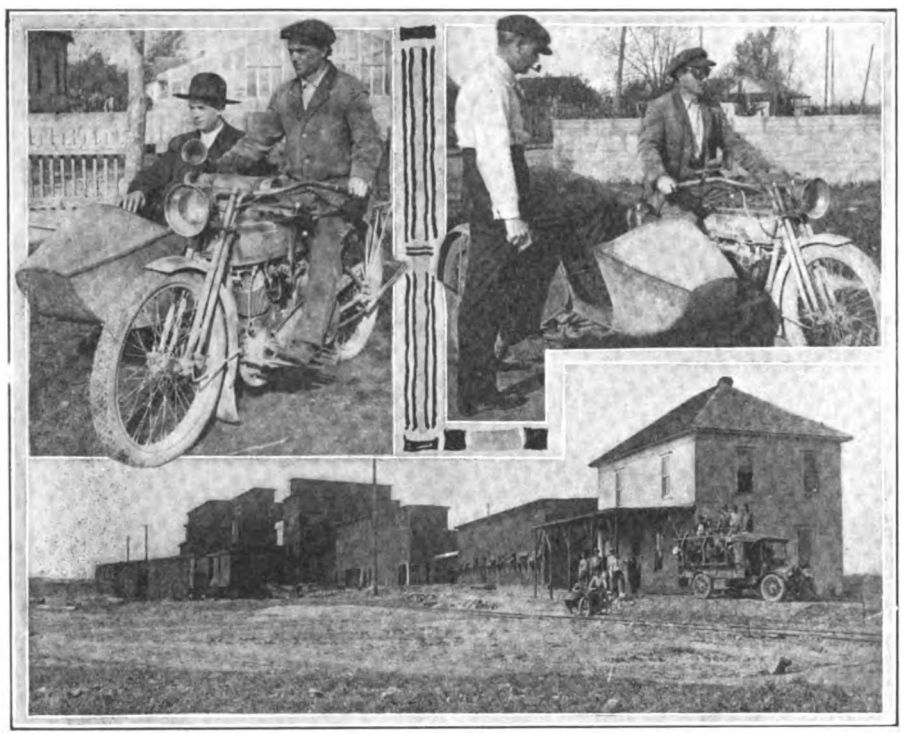
PLEASURE AND PROFIT FROM A MOTORCYCLE

How a Smelter Foreman Showed a Balance in His Favor in Both Directions After One Year's Use of a Sidecar

By J. C. WHITESCARVER



Upper Left, Whitescarver and the Manager Off to Work; Right, Taking a Passenger for Trip to Town; Below, Smelter Where Writer Is Employed

FOR several years I have been "shift foreman" at a lead smelter in a Missouri mining camp. Those acquainted with smelting methods know that the fumes from the works make the immediate neighborhood a very undesirable place within which to live. For this and other reasons, myself, as well as other employes, live in a city twenty miles from the smelter.

Although the plant can be reached by street car, it is such a roundabout course, and the cost so high, that a motor truck receives most of the travel,—at the rate of sixty cents per trip.

As I made the trip 365 days each year, I was out, for transportation, the sum of $219.00. In addition to this, I figure that pleasure trips for myself and family cost me about $100 each year, at three dollars each trip for livery hire.

Purchased a Combination

Finally, I got tired of this and decided to try a new plan, which I did at the expense of much jeering and laughter from my neighbors. I purchased a motorcycle with side-car attachment, paying for same the sum of $300.

I deserted the passenger truck and rode in my own "car" from that time on. The third, and on each succeeding trip, from then on the manager of the smelter rode with me, at fifty cents a trip, and was glad of the chance. We made better time, with far easier riding and both saved money, as I will show in the following accounting. Also, I and my family took many little jaunts into the country that we could not before afford. Horse hire is steep in this section.

Here is how I stand on my experiment for one year. I think the difference is well worth while.

Transportation for one year, to smelter, before car purchase	**$219.00**
Pleasure trips (at $3.00 each)	**99.00**
	$318.00
Cost of motorcycle and side-car	**$300.00**
One new casing	**9.00**
Inner tube	**3.00**
Gasoline	**90.00**
Oil	**35.00**
Vulcanizer and rubber	**5.00**
License	**4.00**
Repairs (Due to carelessness)	**10.00**
"Prest-O-Lite" (Lighting, due to "night shift")	**14.00**
Incidental expense	**10.00**
	$480.00

The $318, fare on truck and livery, and $180 received from the manager for riding, against the $480, leaves a clear profit of $18, in addition to the pleasure trips with the family (four of us) which, otherwise, we could not have taken.

Profit Will Be Larger

And, of course, first cost of car being eliminated, profit for next year will be much larger, for the machine is practically as good as the day I purchased it.

Besides all this, I have earned several dollars (of which I have kept no accounting) from "hurry-up" calls—passengers who were anxious to reach their desired destination in the shortest possible time and thus could not bother with a taxi or street car.

As to the manager, who rode with me, he has saved about $35 in motor truck fare, and has better transportation—faster time and much easier riding.

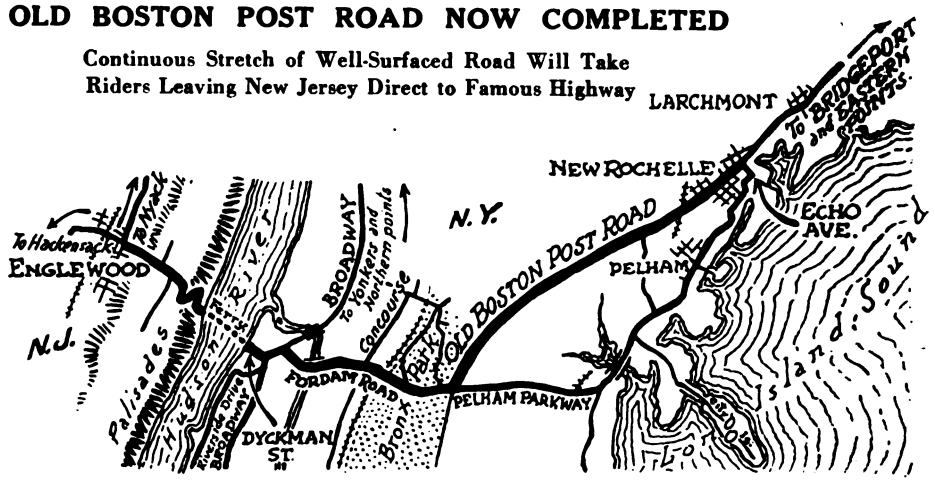
WESTFIELD MEN TO HAVE ANNUAL CLAMBAKE

WESTFIELD, Mass.—Employees of the Westfield Manufacturing Company will hold a clambake at Woronoco Park, this city, on Saturday, August 5. An elaborate program of athletic events and the "big eats" will make this an all-day affair. The big list of prizes and the keen rivalry between the various factory departments give promise of some exciting sport.

The Westfield outings of this type have always been extremely popular, ever since the days of the old Pope company.

OLD BOSTON POST ROAD NOW COMPLETED

Continuous Stretch of Well-Surfaced Road Will Take Riders Leaving New Jersey Direct to Famous Highway



NEW YORK, N. Y., Aug. 3.—Of interest to tourists who have occasion to pass through the Metropolitan District to reach New England States is the recently completed connection making the Boston Post road a continuous stretch of good highway, linking it with the Fordham road. The latter has been broadened, straightened and resurfaced, making an almost direct line from the Boston Post road to the ferry for New Jersey.

This ferry, the dock of which on the New York side is located at the foot of Dyckman street, goes over to the Interstate Park at the Palisades. The road up the Palisades from the ferry is newly brick-surfaced, with sharp turns, and leads direct to Englewood, N. J.

JOHN BULL TIGHTENS HIS GASOLINE REGULATIONS

A SPECIAL war tax of 12 cents has been placed on gasoline by the British government to be reduced to 6 cents per gallon in the case of doctors and veterinary surgeons. Before obtaining any gasoline at all from garages, motorists have to take out a permit, good for one month, and no dealer is permitted to sell gasoline to a motorist who can not show the official permit for the current month. A priority scheme also has been established by means of a census, dividing motor owners into three classes. Class B can get gasoline only after Class A is provided for, and Class C only if both A and B have sufficient fuel in sight. Class A comprises war transports, fire brigades, ambulances, government officials, police and veterinary surgeons. Class B includes commercial users, stationary engines, aeroplane schools. Class C comprises pleasure cars, taxicabs hired from garages, motor boats used for pleasure and hotels.

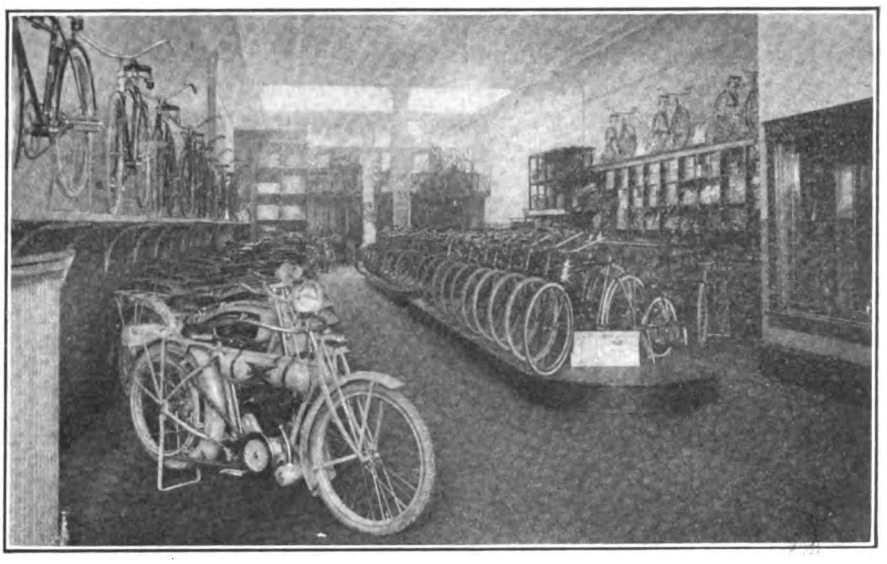
IN THE NEAT RIDER CLASS

Mrs. Fred V. Thompson, of Trenton, N. J., with Costume Combining Serviceability with Smartness

ELOPED BY MOTORCYCLE

MILFORD, N. H.—The motorcycle once again has proved itself a staunch ally of Cupid in this section. Opposition to the union of Miss Gloria Fraser of this city and Fred Paro of Wilton only strengthened their determination to wed, so they mounted Paro's machine and shot off to Bellows Falls, Vt., one afternoon, where the marriage was performed. The journey was kept secret for several weeks, townspeople here thinking that she and Paro were off on one of their regular Saturday afternoon trips. Mr. and Mrs. Paro received the parental blessing on their announcing the marriage and will live in Wilton.

ATTRACTIVE CLEVELAND, O., HOME OF EXCELSIOR



Salesroom of Haverford Cycle Company, at 405 Superior Avenue, North West, Handling "Big X," Smith Motor Wheel and Many Lines of Bicycles

THE HIGH COST OF SPEEDING

MILWAUKEE, Wis., Aug. 2.—As a result of arrests made by the motorcycle squad of the county sheriff's office during the first half of this year the county coffers have been enriched to the extent of $4,335, the state $2,425, and the city $80. This vast unwilling expenditure of money on the part of motorists was the result of 294 arrests for speeding. This has been a great speed year, the arrests being an increase over last year of 60 per cent. The record was made also in the face of rainy weather during the early part of June that made riding anything but a pleasure for a stretch of three weeks.

COUNTING ON MORE RIDERS

FRANKFORT, Ky.—That there will be an increased number of motorcycles in use in Kentucky in 1917 is the opinion of Secretary of State Lewis, who has placed an order with the National Color Type Co., of Newport, Ky., for 2,000 motorcycle plates to cost ten cents each. From January 1 to June 30 of this year only 1,330 plates were issued, and very few plates are issued after July 1 as a rule. Secretary Lewis has observed an increased use of two-wheelers out in the State and has laid his 1917 planus accordingly.

TOURISTS REPORT ON ROADS

FLINT, Mich., Aug. 2.—That both the Lincoln Highway and the Santa Fe Trail are in fairly good shape is the report of Elmer W. Parke and Mr. and Mrs. Arthur Thompson, who have just returned from a 3,160-mile trip to Dodge City and return. Including stops and an extended layover at Dodge to see the big speedfest, the journey took about four weeks and was one of the most enjoyable vacations the motorcyclists ever had.

F. A. M. IS HEADED TOWARD SUCCESS

Delegates Harmoniously Discuss Present F. A. M. Status at Chief Business Session of Convention—Johnson Reports No Less Than $80,000 Have Been Saved to Riders by Legal Action Committee—Donovan Declares That F. A. M. Now Has Firm Control of Racing Affairs—More Intimate Relationship with Riders Necessary, Says Sauer, to Increase Membership

PROVIDENCE, R. I., July 29.—Repeated flashes of old-time F. A. M. spirit featured the chief business session of the convention, held on Thursday, and the delegates were found to be in harmony on practically all the matters taken up. President A. B. Coffman opened the meeting and in a characteristically pithy address pointed out how lack of interest and co-operation had hampered the national body in the past, and offered suggestions for strengthening the Federation in the future. Chairmen William M. Johnson, of the Legal Action Committee, and John L. Donovan, of the Competition Committee, submitted their annual reports, both indicating consistent activity in behalf of F. A. M. members.

Work of Legal Department

Chairman Johnson called attention to numerous instances in which the F. A. M. legal department had been able to safeguard the members against unreasonable State legislation, and summed up by stating that the Federation's legal activities had saved riders throughout the country no less than $80,000.

Donovan on Racing Affairs

Chairman Donovan spoke of many trips he was called upon to make in connection with F. A. M. racing affairs, at his own expense, and with his salary a year in arrears, and stated that while some knotty problems had developed he had managed to convince promoters and racing men that their best interests would be served in the long run by strict adherence to the rules and policies of the Federation. Mr. Donovan was called back to Chicago by a telegram stating that his mother was ill, but before going he had the satisfaction of hearing the convention delegates give him three hearty cheers and a vote of thanks. Excerpts from the Legal Action and Competition reports were published in the July 27 number of this journal.

Chairman J. Leo Sauer, of the Membership Committee, reported that systematic

Changing Gasoline for Steam: the Trip to Newport When Meetings Were Over

Official Staff of F. A. M. for the Coming Year

President
Shelby A. Falor, of Akron, O.
First Vice-President
(Eastern District)
Jes Campbell, of Boston, Mass.
Second Vice-President
(Western District)
C. S. Pixley, of Sacramento, Cal.

Board of Directors
Edwin F. Merry, of San Francisco, for South Pacific District
Jes Campbell, of Boston, for New England District
W. M. Johnson, Chicago, for Lake District
Gus Castle, Atlanta, for South Atlantic District
O. P. Daemitz, Portland, for North Pacific District
E. B. Holton, Newark, for North Atlantic District
P. E. Zimmerman, Lindsborg, Kas., for South Central District
E. W. Pierson, Minneapolis, for North Central District

plans had been taken up for adding to the F. A. M. roster many of the manufacturers offering attractive prizes for clubs and individuals bringing in the most recruits, but that the returns had not come up to expectations. He attributed the apparent lack of interest to the fact that the national body is not able under present conditions to maintain the intimate relationship with the riders that is essential to an active organization of national scope. Mr. Sauer was convinced, however, that plans now under consideration will permit of better membership returns.

E. F. Hallock, chairman of the Publicity Committee, stated in his report that much valuable newspaper publicity has been obtained in the past year, and that even better results will be evident if dealers and riders will assist him by sending all items and photographs that can be used to promote motorcycle interests through the general press.

Swenson's Report Interests

B. A. Swenson, F. A. M. Commissioner for Rhode Island, made an unusually interesting report in which he pointed out the incongruities of the present State motor regulations and explained how he had been able to overcome them in some instances. He called attention to the five-dollar registration fee for sidecars which is now in effect, and stated that he has plans laid to bring about a revision in this statute when the Legislature gets down to work again. Mr. Swenson showed a thorough grasp

Taking Precautions for Riders' Safety

Legal Action Chairman Johnson (Without Hat) and Past President A. B. Coffman, Just Before Latter Made Circuit of Narragansett Speedway in Sidecar to Note its Condition.

of State motor legislation, and a keen interest in the welfare of F. A. M. riders, and was advised by Legal Action Chairman Johnson that he will be authorized to keep in touch with Rhode Island motor legislation in behalf of the Federation hereafter.

Ivan F. Jacobs, State Commissioner for Ohio, spoke along membership lines and requested that he be supplied with a complete list of F. A. M. members in his State and also with a list of delinquents.

E. B. Holton, New Jersey State Commissioner, reported that he had made special efforts to keep the riders of his district in line, and that he had been fairly successful although the lack of funds and of a definite national policy for the F. A. M. had hampered him considerably.

Guardsmen Honorary Members

Acting upon a suggestion of Director William M. Johnson, the delegates elected to honorary membership in the F. A. M. all motorcyclists who are now serving with the army units at the Mexican border.

The financial and membership reports of Secretary-Treasurer G. B. Gibson were accepted as submitted, without reading, all the delegates having been given an opportunity to peruse them in the trade journals.

Frank Rodger paid a tribute to retiring President Coffman for his indefatigable work in behalf of the F. A. M. and offered a motion calling for a rising vote of thanks. This was given and topped off with three rousing cheers and a tiger.

A vote of thanks was also given to B. A. Swenson and the Providence M. C. for the work done on the convention program, and for the generous efforts made to entertain the F. A. M. visitors.

A feature of the morning session on Thursday was a brief address by Mayor Gaynor, of Providence.

The full list of official delegates was as follows: A. B. Coffman, Toledo, O.; F. S. Smith, Waterbury, Conn.; A. Anderson, Waterbury, Conn.; G. B. G. Pompeji, Philadelphia; E. B. Holton, Yonkers, N. Y.; Alexis Waldro, Blackstone Valley, R. I.; N. H. Smith, Blackstone Valley, R. I.; Ernest Broadbent, Attleboro, Mass.; W. M. Johnson, Chicago; Gene Coughlin, Bronx County, N. Y.; George Fassberger, Bronx, M. C., N. Y.; William Miller, Bronx M. C., N. Y.; F. P. Doyle, Newark, N. J.; W. H. Bergfels, New Jersey M. C.; P. N. Stevens, New Jersey M. C.; J. A. Foizie, Pittsfield, Mass.; C. W. Waughop, New Jersey; Charles Latterman, New Jersey; George Hamilton, New Jersey; Bob Brazenor, Brooklyn; W. F. Walker, Bridgeport, Conn.; F. W. Stierhoff, Boston; Ralph Watson, Boston; Ben Strube, Boston; E. R. Durkee, Milwaukee, Wis.; T. J. Sullivan, Chicago, Ill.; F. F. Hallock, New York; J. L. Sauer, New York; J. H. Donehue, New York; A. W. Parry, New York; Harvey L. Bernard, Pennsylvania; Jes Campbell, Boston; Arthur Rochow, New York; A. H. Bartsch, New York; J. J. Hanse, New York; Steward Slosson, New York; E. B. Holton, New Jersey State Commissioner; Ivan F. Jacobs, Ohio State Commissioner; Fred B. Mathis, Chicago; Bob Perry, Chicago; J. C. Loftes, Providence, R. I.; H. V. Mauritho, Jr., Jamaica, N. Y.; Arthur Davidson, Milwaukee; Frank B. Rodger, Milwaukee.

Directors Holton, Campbell and Coffman Talk Over the General Situation

FINAL ARRANGEMENTS FOR SEATTLE RUN

SEATTLE, Wash.—W. A. Steinhart, of the Seattle M. C., has made final arrangements for a checking station in North Yakima for the endurance run to be held the first week in August. The course of this run will be over 630 miles, leading from Seattle to North Yakima, Goldendale, Portland and back to Seattle. There will be 25 machines in the run. The start will be made from this city at 3:20 a. m.

MEMORIZES TRAFFIC LAWS IN LIEU OF FINE

SAN JOSE, Cal.—Hugh Carney is now busy committing to memory the traffic laws of California and will have an opportunity to pass an examination in court on them within three weeks. Carney was speeding on his motorcycle recently, and on being brought before Police Judge Dougherty, was sentenced to learn the laws by heart and recite on them at the end of the time mentioned, instead of being fined. The sentence is something new and is considered a very effective one.

CANADA FIRM INCREASES SALES

LONDON, Ont., July 25.—An elaborate publicity campaign has been launched by the Bicycle & Motor Sales Co., 425 Wellington street, who are boosting Brantford bicycles. According to a recent full page newspaper advertisement, they disposed of 320 Brantford bicycles in the first six months of 1916. During 1915 they sold 315 machines of that make.

MEYER BACK IN FRISCO

SAN FRANCISCO, Cal.—Charles Meyer, in charge of the stockroom of the Pacific Motor Supply Company, and president of the San Francisco M. C., has just returned from a run to Reno, Nev., combining both business and pleasure.

PREST-O-LITE AGENT

TORONTO, Ont.—S. L. Pearson & Company, 559 Yonge street, Toronto, have been appointed the local representatives for the Prest-O-Lite Company and all facilities have been installed to take care of the needs of motorcyclists for gas tanks.

Secretary-Treasurer Gibson with Load of Reports and Prizes

SNAPSHOTS OF CONVENTION GROUPS

IN the upper picture are some of the earliest arrivals at the Convention City, all of whom came in on their machines. In the central view is the Cyclemotor, which created an immense sensation, the steady hum of its little two-stroke motor acting as a magnet to draw crowds at all points. Below, riders and others are examining the tires of an Indian racing machine which were badly worn after several circuits of the Narragansett Speedway were made at a preliminary speed trial.

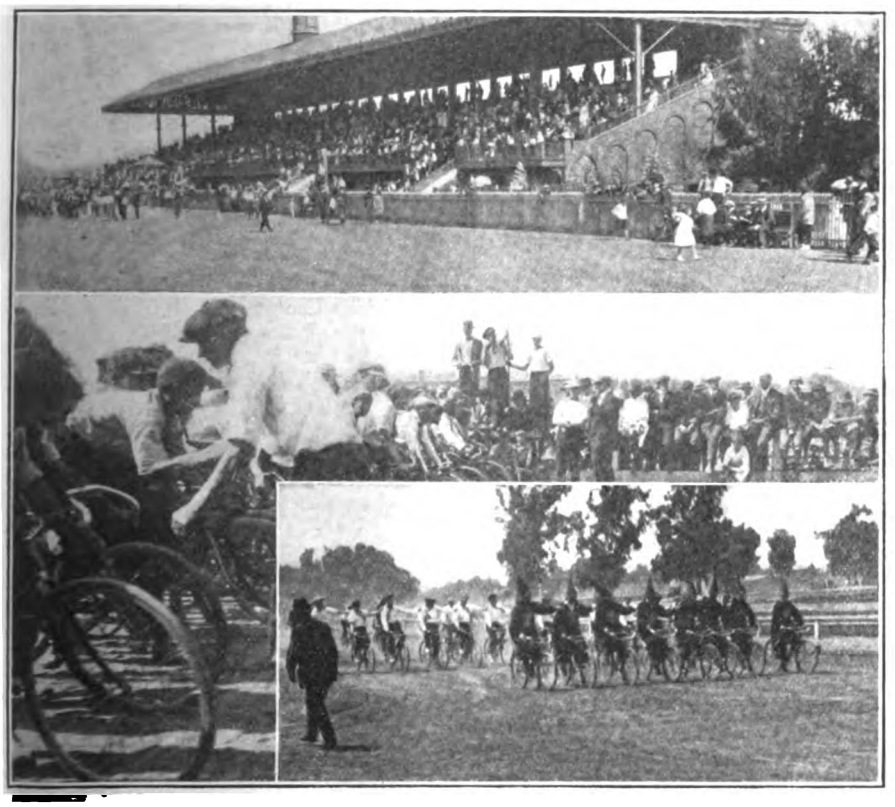
LOS ANGELES HOLDS BICYCLE FETE



Top, the Grandstand with Its 5,000 Spectators; Center, Start of Race for Boys from 8 to 10 Years of Age; Below, Firestone Tire Men Parading in Fancy Costume

LOS ANGELES, Cal., July 23.—Natives of this city were treated to a real surprise here yesterday, something that they had not seen in years. It was Bicycle Day in Los Angeles and the local dealers did themselves proud in staging a monster parade, in which nearly 1,200 men and boys participated, and a race meet at Exposition Park, where a dozen events were run off before a crowd estimated at 5,000.

Many ancient models were seen in the parade and from the looks of some of them the cycle museums and the attics and cellars were cleaned out of some of their choicest treasures ranging from the "ordinary" with "direct drive," and the first "safeties" to the more up-to-date models. The parade covered a four-mile course, the route being out Broadway to First street to Spring and then out Jefferson street to the park.

There was plenty of excitement on tap at the race meet and there was great interest centered in the quarter-mile for high wheels. Julius Smith, a star performer a score of years ago, won the race from Eugene Matthews, while Leslie Allen ran third. The time was 44 seconds. Another event that had "pep" to it was the "Tire Men's Derby," in which Ed Lingenfelder met defeat at the hands of his old time rival, John Dye.

It was said that fifteen years ago Dye and Lingenfelder competed in a race at Kansas City, Lingenfelder winning, but in so doing he "squeezed" Dye in sprinting by him. Yesterday's race was called a revenge race and both were out to win. Lingenfelder almost had the race sewed up in the stretch, but due to lack of condition "blew up" and John Dye beat him with something to spare.

GARDEN CITY WHEELMEN IS NOW REORGANIZED

SAN JOSE, Cal.—Seventy-six cycle enthusiasts, including many former bicycle racers and others interested in the sport, have joined the Garden City Wheelmen, since a committee of young men started to reorganize the club. The committee started to work on July 10 and the enrolment represents three days' work.

The committee includes F. M. Snedaker, G. Semondi, Ernest Hilett and Charles Flint. The plan calls for monthly dues of 50 cents. Tentative arrangements have been made to take Belloli Hall as club headquarters, where a dancing floor, card tables, kitchen, etc., will be available, with the idea of making the club rooms attractive to a large membership. Home trainers will be put in the hall, it is also planned. The organizers hope to get formally under way by August 1, when a meeting for the election of permanent officers will be held.

Among the well-known cyclists who have joined are: Joseph Desimone, Wm. Moon, B. F. Walker, W. H. Walker, J. D. Byrd, C. L. Showalter, Mr. Battlase, D. L. Maxwell, Chas. Baxter, the Powell brothers, M. L. Shoop, G. W. Fowler, L. Maggini, Jack Dermody, G. Goddard, L. Thompson, B. Montgomery and M. Bader.

BELLO AND NUNZIATA WINNERS AT SHEEPSHEAD BAY

SHEEPSHEAD BAY, July 30.—Tom Bello and Jerry Nunziata, two members of the Unione Sportiva Italiana, the Italian club of New York, accounted for the two bicycle races on the program of the benefit meet staged by the National Guardsmen at the two-mile automobile speedway yesterday afternoon.

Thirty-three riders lined up for the two-mile open, which was won by Nunziata in a good sprint down the stretch. Nelson Johnson, a fellow club member, followed him across the tape, and Bello ran third. The time was 4:48⅕. In the six-mile handicap 40 riders started and Bello won the race from scratch. Paul Reineke, 100 yards, finished second and Anthony Attardi, 40 yards, accounted for third prize. The race was ridden in 14:17⅕.

GOOD PRIZES FOR C. R. C. A. STATEN ISLAND RUN

NEW YORK, August 3.—Over forty prizes have already been donated by the cycle trades members for the carnival of sports and pleasure run of the New York division, Century Road Club Association, to be held on Staten Island, Sunday, August 6. The events to be staged are as follows: Novelty race, three-mile handicap, slow race, one-mile scratch, and a quarter-mile scratch race for the cyclists; a 100-yard dash and a half-mile run for the cinder path followers. First prize in the three-mile will be a gold watch with chain and knife, while cycle sundries make up the balance of the awards.

TWO FOR RAILWAY WORK

CALGARY, Alta.—The Alberta Motor Wheel Company has sold two Smith Motor Wheels to the Canadian Pacific Railway for use with railway velocipedes. The Motor Wheel is taking a strong hold in this section for railway inspection work in connection with velocipedes.

THIEF IN THE TOILS

WAUKESHA, Wis.—Joe Dillon, an alleged bicycle thief, who broke jail but was later recaptured, has been bound over for the September term of Court for $500 bonds. The charge against him is grand larceny. A determined effort has been made here to stamp out bicycle thievery.

THIRTY-TWO NEW SMITH MOTOR WHEEL DEALERS

MILWAUKEE, Mis., Aug. 3.—The following new Smith motor wheel dealers were appointed within the last three weeks:

Joseph Butcher, Parkersburg, W. Va.; C. E. Goodwin & Sons, Cumberland Gap, Tenn.; E. W. Peterson, Florence, Wis.; Wm. G. Zimmerman, Leachburg, Pa.; S. W. Frizell, Athens, Tex.; A. P. Mainon, Duvall, Wash.; E. P. Phillip, Duncan, B. C., Canada; J. K. Stewart, Ladysmith, B. C., Canada; C. G. Firth, Nanaimo, B. C., Canada; W. J. Ellis & Co., Kamloops, B. C., Canada; John Leavitt, Kelowna, B. C., Megaw Motor Co., Vernon, B. C., Canada; John Mahoney, Penticton, B. C., Canada; A. H. Coulter, Salmon Arms, B. C., Canada; Premier Cycle Works 430 South Third street, Norfolk, Neb.; Charles W. Morgan, 152 Howell avenue, Milwaukee, Wis.; L. E. Aurand, Mifflintown, Pa.; Fleck Hardware Co., De Pere, Wis.; E. A. Mayer, Kaukauna, Wis.; Anselo Tortora, 620 Lexington avenue, New York City; Reinhart Bros., Brewster, O.; Oliver Gulickson, Barron, Wis.; W. D. Finzell, Milledgeville, Ill.; Alfred Buttafoco, Chicago Heights, Ill.; J. A. Wisenand, Rock Springs, Wyo.; J. Neilson, Roslyn, L. I., New York; W. Hinderman, Brooklyn, N. Y.; Waterbury-Wallace Co., New York City; W. C. Stokes, Cooperstown, N. Y.; F. F. Robinson, Highland Falls, N. Y.; Wesley T. House, Wheeling, W. Va.; Tony Guarino, Abbesville, La.

CHICAGO UNION PLAN RACE

CHICAGO, Ill., Aug. 3.—The Irish Counties Social Union have arranged a five-mile amateur bicycle race for their annual picnic at Gardner's Park, Sunday, August 27

JOHN BULL'S WHEELS HARD TO GET

Vancouver Jobber Looks to Uncle Sam for His Supply of Bicycles—Week-end Runs Are Now Popular—Forming Clubs for Adults

VANCOUVER, B. C., July 14.—Fred Deeley has just received a shipment of English wheels, to the amount of about fifty. These machines have been for many months on the way, so long overdue that Fred has been almost distracted trying to keep on good terms with dealers on the island and different parts of the mainland in his capacity as a jobber.

Shipments from the old country have since the war been of a very erratic nature—so much so that many of the best English lines have had of necessity to be replaced by Canadian and American goods. Deeley reports business as "the best ever," with all the staff on the eternal hustle, and things humming all the time.

Outings Pay the Dealers

Fred says it's a real wonder that he finds time to go out with the boys on their cycle jaunts Sundays, but he recognizes that it's good policy to nurse these outings and help other dealers in their laudable efforts to organize a real live adult cycling club in Vancouver.

Last Sunday the "bunch" had a most enjoyable time riding to Cypress Park, on the shores of West Vancouver. The run along the newly paved Marine Drive was a revelation in natural beauty; glimpses of the smiling waters of the Gulf of Georgia, dotted with the white canvas of pleasure yachts, alternated with the verdant green of the plentitude of scented firs which line the driveway in parts. Everybody was happy, and the twenty-five riders who composed the party had a great time.

Fred St. Onge, the famed trick cyclist, who is now boosting the Smith motor wheel from coast to coast, was with the bunch, and proved himself a fine "mixer." Coasting down the fine bitulithic pavement, with his legs dangling carelessly over the handlebars of his machine, he was rather a novelty; and his conversation, liberally interspersed with personal reminiscences, held the crowd's attention.

GARDEN CITY CLUB ADDS TO MEMBERS ROLL

SAN JOSE, Cal., July 24.—Renewed interest in cycling in this section of the state has boosted the membership of the Garden City Wheelmen, and the officers of the club have hopes that it will bring back many of the old-time members to the fold. A recent effort on the part of the wheelmen increased the membership by over a hundred names. Races and other features that were run in the old days have partially been the cause of the boom and a number of other like events are planned by the entertainment committee. Roller races and other athletic features will be held at the club rooms weekly.

SATTLER WINS C. R. C. A. HANDICAP FROM SMALL MARK

NEW YORK, Aug. 3.—Louis P. Sattler won the weekly point race of the New York Division, Century Road Club Association, over the Pelham Parkway course. The field with their handicaps finished as follows: Louis P. Sattler, 30 seconds; second, J. Tomosulo, 1 minute; third, Vito Cestone, 30 seconds; fourth, W. M. Winquist, 1 minute; fifth, J. Marquart, scratch; sixth, Eddie Jensen, scratch; seventh, W. Knecht, 1 minute, 30 seconds; eighth, G. Steppello, 1 minute.

MENUS BEDELL WINS RACE BEHIND MOTORS

PHILADELPHIA, Pa., August 3.—Menus Bedell, the Long Islander, won the forty-mile motor-paced race at the Point Breeze track, Saturday, July 29. Bedell was opposed by George Colombatto, the Italian, and Martin Ryan, the Newarker. Considerable trouble was encountered by both Ryan and Colombatto, a chain breaking on the eighth mile, putting the latter out of the lead, while a puncture eliminated Ryan from the big end of the money at the fifteen-mile mark. Bedell, however, rode a fine race and won in 55:14⅗.

FOSTER CARRIER CYCLE

AN improved package-carrying bicycle is the subject of Patent No. 1,189,929, issued to William M. C. Foster, of Chicago, Ill. The carrier is supported from the handlebars, from braces attached to the axle of the front wheel and from the lower portion of the head of the frame. The package portion is disposed in such a position as to bring the center of gravity of the load as low as possible over the front wheel.

FIXED

Cholly Weeils—"What's the matter, old man—broken down?"

Bill Biker—"No; I have one of those combination locks and I have forgotten the combination numbers."

MILWAUKEE MERGER AMONG CYCLE CLUBS

MILWAUKEE, Wis., August 3.—A merger between the North Side Motor and Bicycle Club and the North Side Cycling Club, the new organization taking the latter name, is one of the late moves in cycling circles in this city. North side bicycle fans are taking a great deal of interest in the cycle race to be run Sunday, August 20, over the old course on the Port Washington Road. George Schmidt, holder of the 100-mile record for this section of the State, and winner of the Waukesha road race in 1895, is entered along with many other veterans. On Saturday, August 12, the club will boost the race by staging a lantern parade, which promises to be highly successful.

TAKE BICYCLE TOUR TO COLORADO, SEEKING HEALTH

FREEPORT, Ill., July 29.—Averaging between thirty and thirty-five miles a day, James H. Garrison, a retired business man of Rochester, N. Y., accompanied by his daughter Ethel, recently passed through this city en route to Denver, Colo., on bicycles. The trip is being made on account of the illness of Miss Garrison, who is suffering from tuberculosis and was taken on the advice of the attending physician in Rochester. The start was made from the eastern city on June 17, and they expect to reach Denver about August 15.

WEEKLY POINT RACE TO SLUYTER

NEW YORK, Aug. 2.—W. Sluyter defeated A. Levine, W. Maas and W. Weber in the order named in the weekly point race of the New England Wheelmen, held Sunday, July 30, over the Pelham Parkway course. C. Eiler won the six-mile unpaced race in 16:27. In the one-mile Tonges trophy race E. Aickelin won from J. Palmier, R. Kissman and W. Sluyter in the order named in 3:04

WILEY AND CARMAN WIN TEAM RACE

Americans Defeat Leon Didier and George Seres, Frenchmen, in Revere Beach Track Feature; Veteran Pat Logan Improves

BOSTON, Mass., August 3.—George Wiley, the Syracusan, who holds the American paced crown, and Clarence Carman, from Jamaica, L. I., comprising the American team, easily defeated Leon Didier and George Seres, the French pair, in a 40-mile motor-paced team race at the Revere Beach track, Saturday night, July 29. The Americans had an advantage of over a mile when the tape was crossed.

Wiley Gets Ovation

The race of Saturday night marked the first appearance of Wiley since his bad accident three weeks previous, when he fractured his collarbone in a race at the same track. When the little cyclist appeared on the track he was given a great ovation by the massive crowd, and was also presented with a floral boquet. Instead of the floral piece being a jinx, as most of them prove to be, it turned out to be an omen of good luck, and both Wiley, who did not appear to lose any of his splendid form by his enforced layoff, and Carman rode in superb form.

Carman and Seres started hostilities for their respective teams, and at the ten-mile mark Didier and Wiley came on the track to relieve them. The Wiley-Carman team led at the 15-mile mark, and a mile later, Seres, who had relieved Didier, lost his pace and rode unpaced for a lap or two before Didier could pick him up. From that time on to the finish it was all Carman and Wiley.

Pat Logan, the South Boston rider, who is the father of a big family, accounted for the five-mile open, and finished second in the three-quarter-mile handicap from the 90-yard mark, L. C. Rollins, the Everett rider, accounting for the latter event. William Cupit, Roxbury, starting from the 65-yard mark, won the half-mile handicap for the amateurs, while the two-mile open for the same class went to the credit of Fred McKenzie, of Revere. Summaries:

Half-mile handicap, amateur—Won by William Cupit, Roxbury (65 yards); second, Michael Barber, Brighton (105 yards); third, John Fardig, Orient Heights (35 yards). Time, 1:01⅕.

Two-mile open amateur—Won by Fred McKenzie, Revere; second, Elmer Duncan, Everett; third, Frank Jeehan, New Haven, Conn. Time, 4:26⅗.

Three-fourths-mile handicap, professional—Won by L. C. Rollins, Everett (70 yards); second, Pat Logan, S. Boston (90 yards); third, Percy Cutter, Wakefield (140 yards); fourth, Dennis Connolly, Everett (120 yards). Time, 1:25⅕.

Five-mile open, professional—Won by Pat Logan, S. Boston; second, Fred Herbert, Fall River; third, Ned Chandler, Boston; fourth, Tom Connolly, Everett. Time, 11:36⅘.

Forty-mile motor-paced team race—George Wiley and Clarence Carman, America, vs. Leon Didier and George Seres, France. Won by Wiley and Carman. Time, 57:19.

BICYCLISTS ON OUTING

DAYTON, O.—The recent annual outing of the Dayton Bicycle Club, held at Halcyon Hall, near Englewood, was a huge success. A large number of members and guests attended, enjoying a noon lunch and a chicken dinner later. J. E. Redelle was chairman of the committee which handled the event.

Though the members of the Dayton Club are not active wheelmen, they hold a high position in the esteem of their city for activities in connection with municipal and social affairs.

THROUGH SAND AND OVER HILLS TO QUEBEC

Being an Account of a Trip of Four Canadian Riders Over the New Government Highway From Montreal—There Was Plenty of Enjoyment En Route

By ERIC CHOYCE

SO much has been written about the many wonderful trips to be taken in the United States that I feel that Canada has been overlooked. Canada, and in particular the Province of Quebec, has many possibilities, and so I intend to tell of a trip from Montreal to Quebec, which four of us took along the new Government Highway a short time ago.

This trip wasn't plain sailing by any means, but the true motorcyclist does not want fair winds and sunshine all the time. Difficulties to be overcome in the way of road conditions all help to make a trip seem worth while, and there is always satisfaction in looking back and saying to yourself: "We got there."

As I said, there were four of us. The redoubtable Jimmy Drury, ex-champion runner, skater and cyclist; Tom Bentley and his brother á la tandem, and the writer. We left the local agency at 6:30 a. m., and by 7 were well outside the city limits. After negotiating the sandy approaches at grade to the C. N. R. bridge of the island of Montreal we were able to open up over a beautiful road up till Berthier.

Through Picturesque Berthier

Berthier is at the western end of Lake St. Peter, a widening of the St. Lawrence, and is one of the most picturesque French-Canadian towns in the entire province. Memories even now constantly recur of its pretty tree-lined streets and the wonderful views of the river. Gas cost us 38 cents, and a very genial French-Canadian hotelkeeper furnished us with liquid refreshments which seemed to agree with Jimmy particularly well. Incidentally Berthier is famous for a brand of cheap gin manufactured there. Once more on our way we quickly passed some of the oldest towns in Canada, St. Barthelemy, Maskinonge, Louiseville and Yamachiche.

French-Canadian towns, although picturesque, are somewhat monotonously alike. The church, which is always the most imposing building occupies the center of the town. A couple of general stores and the more pretentious residences of retired farmers usually constitute the balance, and are spread along the one street.

Into the Sand

After leaving Yamachiche we had our first trouble. Three miles of deep, soft sand. Personally I like a little sand, because there is all kinds of fun in feeling your iron horse buck like a broncho. But if you are not used to sand-riding your bus has a habit of sliding away from you. Jimmy soon learnt that sand is a pleasant thing when the surf is rolling over it, and you are in your bathing suit, but as we were a long way from the surf he was satisfied to long only for the latter article. In and out of ditches and land slides wasn't Jimmy's forte, so he tried pushing, which made the bathing suit seem all the more desirable as it was mighty hot. Now if you have ever tried to push a 370-pound machines through soft sand you can sympathize with Jimmy. I did, but not in the sense of simile as I had tried to push mine

(Continued on page 68)

Snapshots taken on interesting Canadian trip participated in by Eric Choyce and three friends. Photo number one shows Jimmy Drury, the ex-champion cyclist, and the writer of this story; in the second picture Jimmy is seen "filling-up" from a generous supply of well water. A glimpse of the party in a pretty section called Berthier appears in the third photo, while Tom Bentley, one of the quartette, is ready for action in picture number four. Sandy roads brought the party to a temporary halt at Point-du-Lac, where photo five was kodaked. An impressive view of Quebec from Citadel Hill is presented in the large panorama, this old town marking the end of the outward trip. That the journey was not smooth going all of the way can be gathered from picture six, showing Drury lifting his machine up in the sand.

GOODRICH

Note the famous Goodrich Safety Tread same as used on Goodrich Automobile Tires

ADVERTISED "FAIR-LIST" PRICES

23 x 3 in. (C. C. Rim)	$9.90 each
23 x 2¼ in. (C. C. Rim)	$8.85 each
29 x 2¾ in. (Clincher Type Rim)	$8.85 each

The Jim-Dandiest tire of 'em all—

—You "scoop" the field when you push the sale of Goodrich Motorcycle Tires.

—That tough black BAREFOOT RUBBER used in their treads *alone* puts them in the blue-ribbon class.

—Because *never* has there been such sturdy, long-wearing, puncture-preventing rubber stock.

—It was first used on the famous Silvertown Cord Tires.

—Then on Goodrich Fabric Tires.

—And now on Goodrich Motorcycle Tires (and GIANT Bicycle Tires.)

—No other manufacturer can use BAREFOOT RUBBER.

It's a secret compound—and carefully guarded. Only its black *color* can be imitated—its exclusive advantages, never.

—It has been and continues to be advertised to over 60,000,000 people.

—Everyone has heard about it.

—Behind it is the strongest, most resilient fabric carcass that any motorcycle tire has.

—The "balance" is perfect. The fabric lasts as long as the BAREFOOT RUBBER tread.

—And, believe us, that is *some* length of time.

—Every Goodrich Motorcycle Tire wins you a "booster." Start pushing them and you'll land on top of the heap with business keeping your bank balance fat and rosy.

—Other dealers find it so. Why shouldn't *you?*

—Take a minute now and drop us a line.

In the Dealer's Realm

BIG THOR SALES CAMPAIGN ON COAST

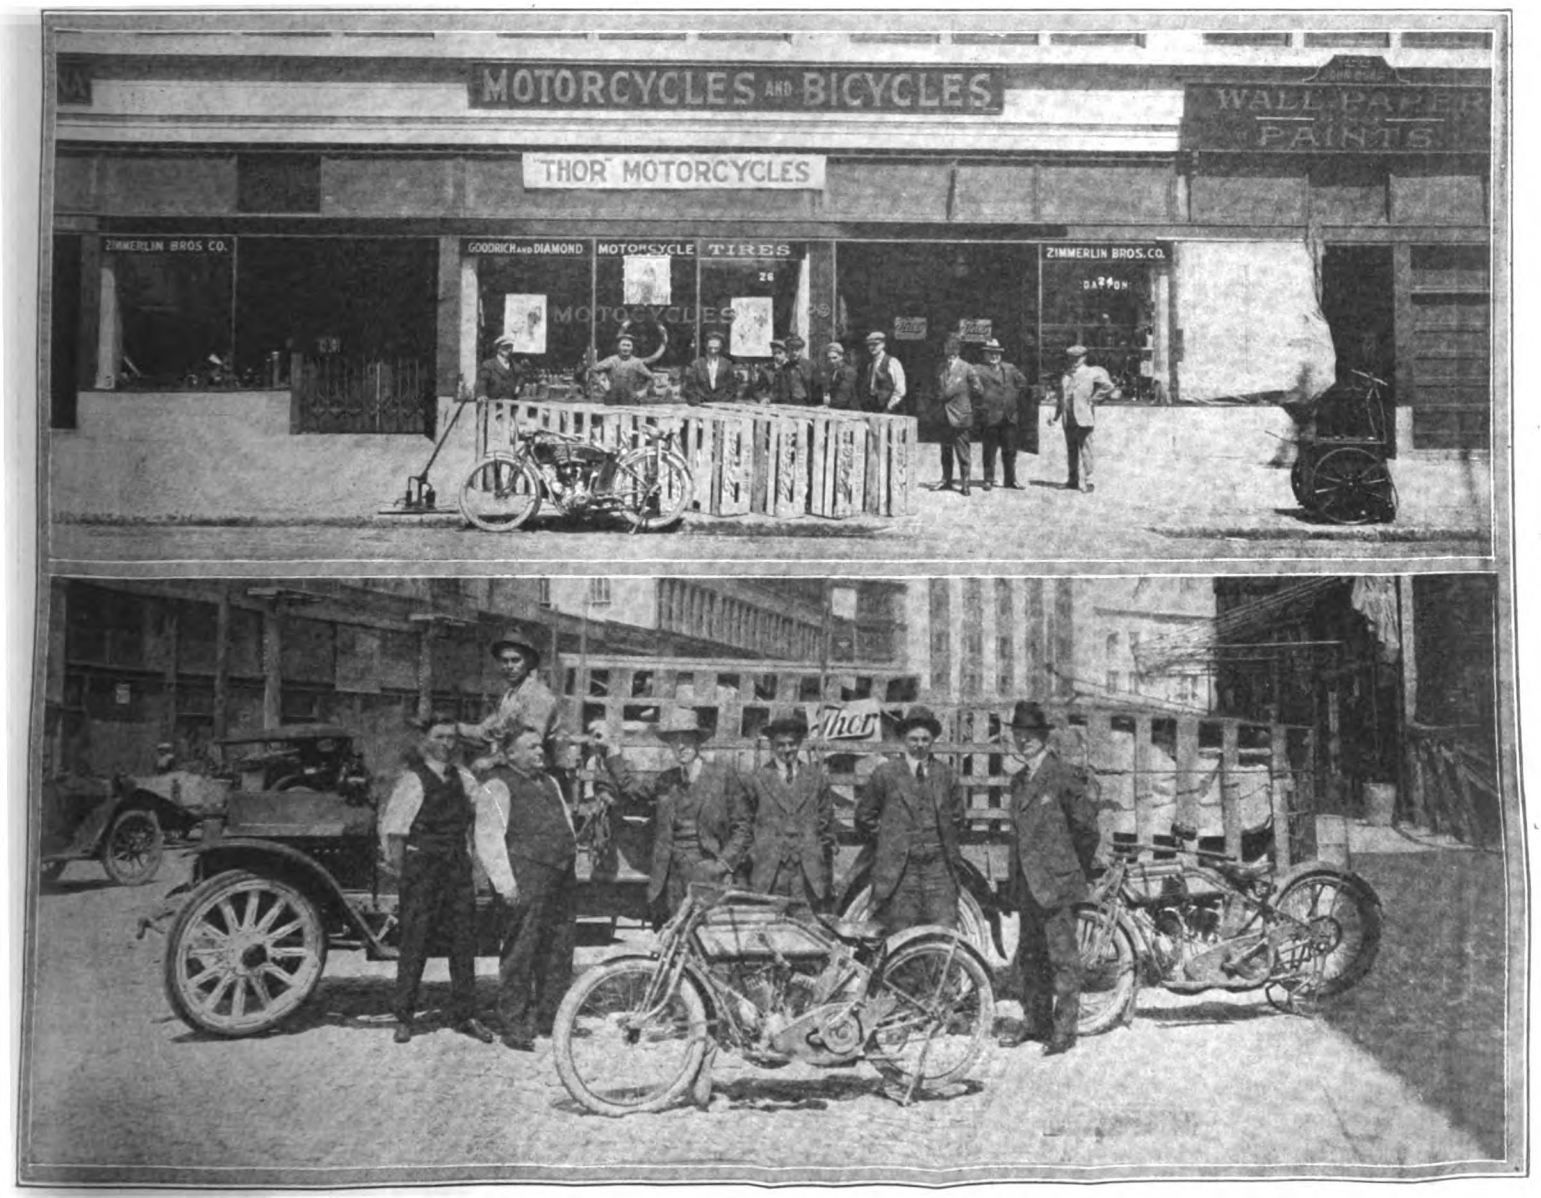
General Manager O'Hare Starts Ball Rolling in Pacific Territory by Signing Up Important Frisco House—Barton on Road

SAN FRANCISCO, Cal., July 27.—The Thor organization on the Pacific Coast is starting a new selling campaign, and will make a stronger drive than ever for the business of this territory. The preliminary work has been carried through, the San Francisco branch having proved its usefulness in taking care of the distribution, and Manager Z. Barton has completed all preparations, following a close survey of the field, which occupied some months.

The signal to "commence firing" was given by General Sales Manager Charles B. O'Hare, of the Aurora Automatic Machinery Company, who reached this city a few days ago. Mr. O'Hare is certainly a hustler, and lost no time getting busy.

His most important move in this city was the closing of a retail agency arrangement with Zimmerlin Brothers, one of the largest motorcycle supply houses in this part of California. The brothers are entering the Thor campaign in a large way, placing an initial order for 60 machines, including ten for immediate delivery. Zimmerlin Brothers have two large stores in San Francisco, one at 24-30 Van Ness avenue, in the heart of the motorcycle district, and the other at 1030 Golden Gate avenue, another part of "Gasoline Row." They have also a branch at San Rafael. The two brothers, Armand and Jules, have been many years in the business, and have built up a large organization which will be utilized to the full in promoting the new line.

After a few days in San Francisco, Mr. O'Hare left for southern California, where he will close several important deals on which Mr. Barton, who accompanies him,



Above, Portion of First Carload of Thors Unloaded at Zimmerlin Brothers' Agency at 24-30 Van Ness Avenue; Below, Loading Zimmerlin Shipment at Warehouse; General Sales Manager C. B. O'Hare Is Third Figure from Left

Digitized by Google

has been working earnestly for some time.

In the new campaign Mr. Barton will spend about 90 per cent. of his time on the road, working directly with the dealers for the promotion of sales. The dealers on the Coast are taking advantage of the stock carried at San Francisco, as is shown by the receipt within the last six days of over 400 orders for shipments of parts. The new Model 17-Y Thor, since its announcement, has attracted wide attention all over the Coast territory, and many new applications for agencies have been received. A big majority of these come from dealers who have never handled the Thor before. New connections are being made where it can be done to advantage, and the result will be the opening of much new territory and the covering of the entire Coast in a much more thorough manner than ever before.

Accompanying General Manager O'Hare is Mrs. O'Hare, who is on her first trip West. She was greatly pleased with San Francisco.

INCREASING DEMAND FOR SIDECARS, SAYS FRASER

SAN FRANCISCO, Cal. — Manager Fraser, of the local branch of the Appeal Mfg. & Jobbing Co., Harley-Davidson distributors, is responsible for the statement that the unprecedented growth in the demand for pleasure sidecars is one of the most promising features of the motorcycle business in this section. "It indicates," says Fraser, "that this form of vehicle is at last coming into its own. It is making good headway in competition with the cheap automobile, and overcoming all prejudices against it."

Fraser says that quite a number of people are coming to feel ashamed to be seen in some of the cheapest makes of automobile, and regard a sidecar outfit as the classier rig, as well as being more satisfactory in results. The demand for Harley-Davidson sidecars has been so great that Fraser had to wire the factory for a 50 per cent. increase in the shipment sent July 22. He finds that all makes of sidecar are in strong demand, and even used sidecars are asked for. The fact that used sidecars are scarce he also regards as significant.

ADELAIDE AGENT VISITS INDIAN FACTORY

SPRINGFIELD, Mass.—Among recent trade visitors to the Hendee plant was W. A. Crowle, Adelaide, Australia. Mr. Crowle is a partner in the firm of Easy & Crowle, Indian representative in that city.

He has the best sales record for an individual Indian man in Australia. He says that the Powerplus motor has made as great a hit in the Commonwealth as in this country, and that the cradle spring frame is ideal for use on Australian roads.

SECOND SHIPMENT OF R-S FOR REINOEHL

MANSFIELD, O.—H. C. Reinoehl, proprietor of Reinoehl's Garage, holding the agency of the Reading Standard motorcycles, has just received another shipment of machines from the factory. His sales so far this season exceeded those of 1915 by 60 per cent., and he figures that before 1916 is over he will have increased this to 100 per cent.

AGENT COMPLETES LONG TRIP

HARRISBURG, Pa.—Nat Feldstern, of the Excelsior Cycle Co., has just returned from a sidecar trip which took in Boston, New York, Philadelphia and Atlantic City. He was accompanied by Mrs. Feldstern, Miss Sarah Brightbill and the youngest member of the Feldstern family. A three-speed Excelsior and Rogers sidecar were used to carry the four.

BIRKENBACH TO MOVE

COLUMBUS, Ohio.—The L. P. Birkenbach Co., well known bicycle firm, which has been operating two stores, one at 17 North Fourth street and the other at 584 North High street, will move about Aug. 1 into its new home 39 East Long street. The two stores will be combined and a complete line of bicycles and accessories carried.

Over 11,000 Miles

On Vitalic Tires!

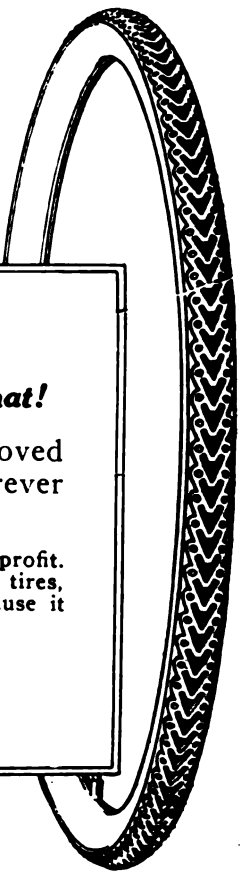
What ordinary bicycle tire could come anywhere near that record? None! It took VITALICS to do it.

Out of over 60 tires used during a period of 25 years by Dr. F. S. Cate of Florence, Cal., the Vitalic was the only one to reach anywhere near this mileage. Among the 60 tires used were the *very best* of other makes, a number of them much higher priced than the Vitalic. But Vitalics ran *more than three times* the average mileage of the seven next best makes of tires used (based on an accurately kept mileage record sworn to before a notary).

It is this unmatched *mileage* which Vitalics are giving wherever used that proves beyond question their unequalled standard of construction; highest quality of rubber instead of the cheaper grade put in ordinary tires; two plies of heavy *motorcycle* fabric, frictioned with pure rubber, instead of common bicycle fabric; an extra heavy inner tube of pure white rubber.

Write for the testing section and examine these features of construction thoroughly.

VITALIC TIRES
TRADE MARK
For Bicycles



Dealers—

Think what you could do with a tire like that!

There isn't any room for doubt—Vitalics have proved their supremacy over all other bicycle tires wherever comparison has been made.

Thousands of dealers rely on the Vitalic to make their tire profit. Once introduced, it easily brings a better price than ordinary tires, and always sells over and over again to the same trade, because it never disappoints.

MANY IMPROVEMENTS FOR ROOS' PLANT

OMAHA, Neb.—Extensive improvements in the salesroom and repair shop of Victor Roos, local Harley-Davidson agent, are now under way. Roos has secured the large store building on the corner directly east of and adjoining his present place. The dividing walls between the two places will be torn down and exterior and interior alterations made.

Additional repair department space will be afforded by the erection of a substantial addition to the main building. The basement will be concreted and will be used as a storage place for machines. Display windows will be installed on the east and north sides of the block. All work is expected to be completed about the middle of September. The address is 2702-2704 Leavenworth street.

RYDMANS PLACE ANOTHER ORDER FOR R-S

PORTLAND, Ore.—Rydman Brothers, local R-S representatives, have recently placed an order for several Reading Standards with the factory in Reading, Pa. The shipment is to be made immediately.

WILL BUILD NEXT SEASON

QUINCY, Ill.—John Ridder, representing the Indian and Excelsior in this city, has purchased a lot at Broadway and Ninth street, on which he will build a modern motorcycle and bicycle salesroom and shop next season. Ridder reports business way ahead of last year, and that his bike sales have been very large.

ANOTHER R-S SHIPMENT GOES TO TORONTO

TORONTO, Ont.—W. J. Porter, distributing the Reading Standard in this section, has recently received another shipment of the Big Brown twins. He reports numerous orders on file for future deliveries, and figures that 1917 will eclipse the present season in business done with this machine.

SIGNS UP FOR CLEVELAND AND GETS BUSY

QUINCY, Ill.—Henry Masching, handling the Henderson in this city, has taken the agency for the Cleveland lightweight in this territory. He sold his first allotment as soon as delivered and then parted with his demonstrator to a customer who could not wait for the next lot. Masching has also taken over the management of the Gem City Tire Co., agent for several well-known makes of tires, and has a large vulcanizing plant which is kept pretty busy these days.

TAKES ON BICYCLES

SPRINGFIELD, Ill.—Rudolph Blucke, Harley-Davidson agent in this city, has taken on bicycles in addition to his big stock of power two-wheelers. He has made a number of sales since taking on the new line.

ORDERS DOUBLE THOSE OF 1915, SAYS KLUCZEK

NEWARK, N. J.—Watson Kluczek, Reading Standard agent for this city, says that orders so far are more than 200 per cent. in excess of those of 1915. "This is the second year we have had the Reading Standard," says Watson, "and business is brisk even as late in the season as August. We have not had such a condition of affairs in many years."

GOTTSCHLICH SELLS TWO $400 SIDECAR OUTFITS

OSKALOOSA, Ia.—August Gottschlich, Wigwam representative, has just sold two sidecar combinations which are in the de luxe class. Each outfit is completely equipped and cost over $400. The purchasers bought them in preference to cheap automobiles.

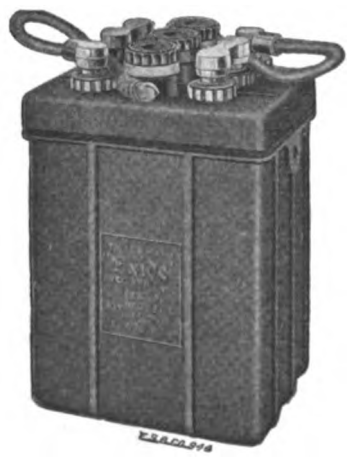
This is Gottschlich's second season as an Indian dealer, and so far this season his sales have been 25 per cent. better than those of 1915. This is his first year handling the bicycle, and to date he has sold 18 wheels.

PARDON OUT ON "BOOSTER DAY"

OWENSBORO, Ky.—Henry Pardon, local representative for the Indian, has joined with other local merchants in a general observance of "Booster Day" on July 25. The downtown stores all closed on that date and the dealers went out to the ball park to see a doubleheader between Owensboro and Dawson Springs. The boosters were headed by a military band.

THIS MUCH IS CERTAIN

Electric Lamps and an "Exide" Battery furnish the most efficient and reliable light for motor cycle use



"Exide" Battery, Type 3-ZA-5 with cable type terminals

You no doubt realize the numerous advantages of electric light for motor cycle use.

The reliability of an electric lighting system is of course dependent upon the storage battery which furnishes the current.

The "Exide" Battery, type Z, especially designed for this service, is a quality-product, manufactured and backed by the oldest and largest battery maker in the country.

The battery is contained in a one piece, three compartment vulcanite case, having heavy walls and substantially re-enforced.

It is fitted with a one piece cover, having a flange which fits around all sides of each compartment.

The "Exide" Battery is equipped with a flood proof filling plug which overcomes slopping and spilling, and also limits the amount of water that can be poured into a cell to the exact amount needed to replace that lost by evaporation. The result is a clean, dry, and attractive battery.

Motor cycle dealers and users should write us at once and secure the name of the "Exide" Distributor nearest them.

A Batting Average of 975%

Two Speed **Cleveland** Two Stroke

$140

Cleveland Stock Lightweight Takes Third Place Honors in Detroit Hundred Mile Endurance Grill, First and Second Going to Heavy Weight Models.

Detroit, Mich., July 25—For the second time this season the Harley Scouts of Detroit promoted with great success a 100-mile test of endurance that exceeds any previous event of the kind in this section.

Perfect scores were few and well earned as riders of Michigan sand, gravel and clay can well testify.

In the perfect scores, Roy Millen, of Indian racing fame, and W. R. Kemp, the well-known Henderson star, stood tie for honors with 1.000 points each. Second was R. Steven, riding a Harley-Davidson, with a percentage of 999. William Treaky, on a Cleveland Lightweight finished third, with a percentage of 975.

Starting from the headquarters of the club, the Wandersee Co. store, 129 Gratiot avenue, at 9:24, the riders left 2 men at a time, one minute apart, the first stop being Novi. A double test of endurance was unexpectedly placed upon the riders on nearing this control, by the cave in of a large section of the road, to a depth of 20 feet. Undaunted, the boys ploughed and chugged through, making Novi on schedule time.

Checking out, the run was then made to Millford, time being lost by many at this point owing to fresh gravel and shifting sand which was plentiful and hot enough to burn the tires.

On the run to the next stop, Clarkston, many of the boys were compelled to fight their way through obstacles that would tear the heart out of many endurance run veterans.

Lake Orion being the next stop, the road was varied so that a little water and grass might add to the endurance test and prove the adaptability of the motorcycle to all roads and conditions.

At this point No. 51, riding a Harley-Davidson, rode his machine through water deep enough to cover his magneto, successfully.

At Lake Orion, the stop for dinner was made and after filling up on chicken the boys enjoyed a swim and rest, two hours being allowed for this.

Again on the line the run was made to Romeo, the whole town taking notice to the turn out, asking many questions. The answers will tend to "boost" the game. This, by the way, is the "Scout's" object.

At Utica, the checking showed excellent riding, the boys deserving great credit for the way they tore through ten miles of two-foot deep sand.

Sand again, and then a hard, gravel road back to Detroit, the finish of a run that will be long remembered by those finishing. — Motorcycling and Bicycling.

The Sensible Motorcycle for Dealer and Rider

Sensible for **Dealer** because of easy sales and elimination of costly repair service. Sensible for **Rider** because of small initial cost, great operating economy, stability, cleanliness and dependability of manufacturer.

Dealers: Write for our "Opportunity" proposition. We still have desirable unallotted territory.

The Cleveland Motorcyle Mfg. Co., Cleveland, Ohio, U.S.A.

TREMENDOUS IMPORTS OF RUBBER BY U. S.

Figures Just Published Show That $1,000,000,000 Worth of Rubber Has Been Brought in Since 1900; Imports Growing Yearly

NEW YORK.—According to a compilation made public a few days ago by the Foreign Trade Department of the National City Bank, more than $1,000,000,000 worth of rubber has been brought to the United States since 1900, and over $500,000,000 in the last six years. Foreign contracts placed here for automobile tires and other rubber products have made the demand for rubber so urgent that the bank's report cites the arrival across the Pacific of twenty carloads of Oriental rubber sent across the continent by fast train.

The imports of the fiscal year ended June 30 exceeded $150,000,000 in value, and amounted to 260,000,000 pounds, against a former high record of 172,000,000 pounds in 1915, and 132,000,000 pounds in 1914. Rubber imports into the United States, it was stated, never reached as much as 100,000,000 pounds in any single year prior to 1910, when they were 101,000,000 pounds.

Approximately three-quarters of the last fiscal year's imports were the product of the Orient, about 120,000,000 pounds coming direct from the East Indies, and approximately 70,000,000 from Great Britain, which presumably drew most, if not all, of it from her Oriental colonies. A decade ago, only about 1 per cent. of the American imports was of the plantation product, the remainder from natural forests, chiefly Brazil.

"The development of rubber production by the plantations of the Orient," said the statement, "chiefly the Dutch East Indies, the Malayan Peninsula and Ceylon, has been extremely rapid in recent years. The total of plantation rubber produced in 1905 was but 145 tons, in 1910 8,200 tons, in 1913, 42,000 tons; in 1914, 64,000 tons, and in 1915, 107,000 tons. The amount of capital now invested in the rubber plantations of the world is estimated at $350,000,000."

DUTCH FIRM WANTS AGENCY

From M. van Genderingen & Co., Amsterdam, Holland, comes the announcement that the company is desirous of taking on the agency for a first-class motorcycle. The firm has been interested in the motorcycle field for many years, and has an excellent standing. Manufacturers who are interested in the matter are requested to state in full the price, terms, and arrangements concerning deliveries, in their first letter. Excellent references are given, and may be obtained by application to **Motor Cycle Illustrated.**

THREE IMPORTED IN MADRID

FROM Madrid, Spain, comes the report of three machines imported during 1916 from January 1 to March 1. These machines were of American manufacture and were valued at $1,125.

EXPORT DIVISION TO REMOVE TO NEW YORK

NEW YORK, July 28.—The Division of Commercial Agents, recently established by the Bureau of Foreign and Domestic Commerce of Washington, will be stationed in this city, with headquarters at the Custom House. Plans for the removal of the division from Washington are now under way.

The work of the division will be to superintend and control the work of the various commercial agents which the United States Government is to scatter throughout the world, to increase export trade. Eleven such agents are now in South America and three in the Far East. An additional twenty are to be stationed in other places within the next three months.

BACK FROM 2,400 MILE TRIP

MALDEN, Mass.—Frank E. Bradish, with Mrs. Bradish, has just returned from a 2,400 mile tandem motorcycle trip from St. Louis, Mo., the start having been made from that city five weeks ago. They made the trip in 12 days actual running time. Only one puncture was experienced.

D-E-L-I-G-H-T-E-D! SAYS ARCHIE

PLATTSBURGH, N. Y.—Among the young volunteer soldiers at the Plattsburgh instruction camp is Archie Roosevelt, son of Col. Roosevelt, who operates an Indian motorcycle quite frequently in connection with his camp duties.

FINE SEASON, SAYS WESTERN SUPPLIES CO.

DENVER, Colo. — Western Supplies Company, handling the Reading Standard in this section, reports having had a most prosperous season for 1916. Even though the season is far advanced, the firm is still placing orders for additional machines, and present indications indicate that there will be no let-up during the entire season.

RICARDS PROMOTING AMATEUR ROAD RACE

LANCASTER, Ohio, June 26.—G. M. Ricards, well known in these parts as a motorcycle and bicycle dealer, is promoting a road race between Lancaster and Carrol out and back, to be staged on July 1. The race is open to all amateurs and there is no entry fee. Mr. Ricards is putting up three prizes, the first of which is an $8 pair of tires, the second a $5 pair of tires and the third a $3 Solar gas lamp. Indications are that the race will fill well.

FIRST TRIP ON POWERPLUS COVERED 988 MILES

HOLYOKE, Mass.—Few riders are quite as ambitious as was Alexis Ouimet, of this city, when he bought his first Indian a few days ago and started off the morning after, taking delivery to ride to Montreal, Canada, and back. He made the trip without mechanical trouble, but developed a slow leak in one inner tube as his sole inconvenience on the trip.

Joe Fox, of this city, went with Ouimet, also on an Indian. The northward run was through Brattleboro, White River Junction and Sherbrooke. Several days were spent at St. Pie, where both men had spent their boyhood. Return was made via Rouses Point, N. Y., Plattsburg, Troy and Albany.

This was Ouimet's first ride on an Indian, so his performance was very much out of the ordinary. Ouimet speaks highly about the comfort which he derived from the cradle spring frame during the trip, especially as roads were far from good in many sections.

SIX MORE FOR BAYONNE

Joseph Sofferman, Indian agent at Bayonne, N. J., has received orders from the Bayonne Police Department for six Indian Powerplus models. To date he has delivered 10 machines to the Bayonne Police Department. The Commissioner of Safety has been convinced that motorcycles soon pay for themselves.

FADELY IN CHARGE OF SHOP

COLUMBUS, O.—George Fadely, formerly with P. I. Haynes Company, is now in charge of the motorcycle shop of the Franklin Rubber Company. Fadely is a veteran repairman on all makes of machines.

McCARTNEY OPENS SHOP

ROCKFORD, Ill.—James McCartney has opened an up-to-date motorcycle and bicycle shop at 110 North Madison street. He has taken the agency for the Dayton Motor Bicycle for this city.

THROUGH SAND AND OVER HILLS TO QUEBEC

(Continued from Page 56)

out of a hole on one occasion after being stalled. But, like the Chinaman's wonderment on first seeing a street car, I found on starting the engine it was a case of "No pushee, no pullee, alee samee goee like helee." Half way through what seemed to Jimmy like the Sahara we met "Mac." Big MacLean is a familiar figure to Montreal motorcyclists, the personality of his proportions being impelling. Mac had apparently been mixing sand and bridges, and had broken a couple of clutch bolts in the operation.

At Three Rivers

Arriving at Three Rivers we hiked for a restaurant, and the muffled laughs I heard between steak and onions indicated that sand is not without its merriment. Three Rivers is getting to be quite a city, a publicity campaign and an efficient municipal organization having attracted quite a number of manufactories. Lumber, however, still rules. Leaving the town we had a treat in three short miles of concrete until we came to more sand. The road is being built in many places between here and Batiscan, and as we came to each gang of workmen we stopped for water and to talk about the road further on.

None of us talk much French, Tom being the linguist, but we usually managed to say what we wanted and get lots of fun out of it. At Batiscan we ferried across the Batiscan river, and the 65 miles from there to Quebec was practically boulevard riding all the way. The road from Champlain is built along the high banks of the mighty St. Lawrence, and startling turns in the road disclosed some wonderful panoramas of the river. A glimpse of the Quebec boat going up made it look like a mere toy. At Donnacona is a pulp mill, which derives its power from a small stream which flows from the hills between a deep fissure in the banks of the river. The chasm is apparently too wide to bridge, so the crossing is made at the stream below.

The hill to get down to the stream surely deserves more than passing mention, as it is the steepest thing I ever saw, and our

(Continued from page 68)

province is no slouch when it comes to hills. Scenic railways were not in it. It was simply a case of Alpine climbing on a motorcycle. Going up the other side it was not so bad, as a spiral construction eliminated some of the worst. The balance of the trip was uneventful except that at Lorette I took the wrong turn, and being ahead I sat on a fence awaiting the coming of the others for no less than half an hour. I then rode back five miles only to find after parle-vousing that the boys were probably in Quebec.

Arriving in Quebec I immediately made for the Chateau Frontenac, Jimmy having voiced his intention of going there. No Jimmy there I put my machine in a garage and made a round of the hotels and garages until I found him in a bath at the Victoria. So ended one of the most picturesque and interesting trips I have ever made. The fame of the St. Lawrence trip by boat is well known, and to have seen all the country in detail is something more.

We Reach Quebec

Quebec is so well known that little need be said about it. Its position overlooking the St. Lawrence seems to add charm to the historic lore to be found within its walls. The Chateau Frontenac, which is a good place to stay, occupies the site of the residence of the early French governors, and above it again is the grim citadel overlooking all. The side trips are numerous, and one could spend a week and not notice it pass, the pleasures being so many.

As it started to rain on Sunday we decided to return by boat. After a scream of a time spent on board, Jimmy furnishing most of the amusement, we parted the following morning vowing that the first opportunity would find us on the same road Quebec-ward again.

CAME TO FACTORY ON TANDEM; RETURN BY SIDECAR

SLOATESBURG, N. Y.—Michael Ferraro, local representative for the Reading Standard, accompanied by J. Jones and their respective wives, visited the R-S factory in Reading recently, using tandem-rigged machines. During the stay at the factory, Ferraro was much impressed with the R-S sidecar outfit and purchased one for the return trip.

JOHNSON BACK FROM TRIP

ROCKFORD, Ill.—Arthur Johnson, handling the Harley-Davidson in this city, has returned from a vacation trip through Indiana and Kentucky. He was gone eleven days. There were no troubles during the journey. Johnson took his wife and children with him in the sidecar.

EISENBERG OPENS SHOP

READING, Pa.—Alfred Eisenberg, the 1915 motorcycle champion of this section, has gone into the motorcycle and bicycle business for himself at 143 Schuylkill avenue. For some years he was employed by the Penn Cycle & Motor Company of this city as a machinist.

TO PREVENT FUEL ADULTERATION IN COLUMBUS

COLUMBUS, Ohio.—The Columbus Automobile Club is back of an ordinance, which is pending in the city council to prevent the adulteration of gasoline with kerosene or other foreign body. The ordinance which will likely be enacted soon provides for a stiff fine for adulteration. This is to prevent dealers from mixing gasoline and kerosene, which has been done in Columbus to a large degree. The proposed provisions to fix the specific gravity and the boiling point was found to be impracticable.

CLOSES AT 6:30 NOW

SAN FRANCISCO, Cal.—John H. Baumgardner, local retail Indian agent, has adopted the policy of closing each night at 6:30, beginning July 24. He has been keeping open till 8:00 in common with other agencies, but is now acting independently.

GASOLINE BY SHORT MEASURE

LOUISVILLE, Ky.—Several vendors of gasoline in this city have been called to appear before the ordinance court and explain why their pumps or other measuring devices were giving short measure. John Headly, inspector of weights and measures, has started a brisk campaign following numerous complaints to the effect that short gallons were being sold. It is claimed that the trouble has been due to faulty pumps, and the local dispensors are all busy lining up their pumps.

"NORMA"
(PATENTED)
BALL BEARINGS

Remember this: — Motorcycle performance is a combination of a number of separate unit performances in the equipment. For instance, the engine performance is determined largely by the magneto performance. Whether you get satisfaction, or dissatisfaction, from your ignition system depends upon the behavior of your magneto. And not one of these accessories is better than the poorest part in it—which may be a bearing.

The makers of practically all the motor cars, motor boats and motorcycles of the better class have safeguarded their customers against trouble due to bearing failures in the electrical accessories by adopting magnetos, lighting generators and starting motors in which "NORMA" Bearings are standard.

Are Your Magnetos "NORMA"-Equipped?

HOPKINS AND ALZINA TO CONDUCT R-S BRANCH

San Francisco Pair Sign Up with Reading Standard Company to Care for Firm's Interest in the States of California and Washington—Both Trade Veterans

SAN FRANCISCO, Cal.—The Reading Standard Company, of Reading, Pa., has established a branch in this city to take care of Pacific Coast trade. The branch is to be conducted by two experienced motorcycle men: C. C. Hopkins and L. R. Alzina, and will for the present be located at 32 Van Ness avenue. About January 1, 1917, a new building, now under consideration, will probably be occupied.

The Reading Standard branch will carry at all times a large number of R-S motorcycles and repair parts, to ensure prompt delivery and service to agents in California and Washington. The deal concerning the branch was closed a short time ago by an official of the R-S company.

Hopkins a Veteran

C. C. Hopkins, the senior man at the new branch, is a native of Iowa, He received his early education in Ohio and California and later decided to learn the printing trade, going to Philadelphia for that purpose. After becoming a journeyman, Hopkins traveled to Boston, Mass., thence to Paris, France, and to Denver, Colo.

Upon his second return to California he entered the motorcycle business, and met with much success. At one time he handled the Rambler bicycle for Thomas H. B. Varney, and for several seasons traveled California, Nevada, Arizona and the Hawaiian Islands for the firm. In the fall of 1905 he embarked for himself, taking the San Francisco agency for Rambler and Columbia bicycles and also the distribution of the Indian motorcycle for Nevada and Northern California.

During the earthquake and fire of 1906, Hopkins' store and residence were completely destroyed, with an almost total loss to him, owing to the inability of the insurance companies to meet their liabilities. Nothing disheartened, he opened a store on Gough street on June 14, 1906, and occupied these premises until December, 1910, when a branch house was opened. This branch was managed by Hopkins for four years.

Since February, 1916, he has been in partnership with L. R. Alzina at 32 Van Ness avenue. Hopkins has always taken a great interest in F. A. M. affairs and was one of the first members of the Federation. He represented the Federation on the competition committee for nearly two years. He is a hard and enthusiastic worker and does all in his power to make the sport of motorcycling popular with the public, as well as profitable to the dealer. His greatest interest is in reliability and endurance runs, in many of which he has been a contestant.

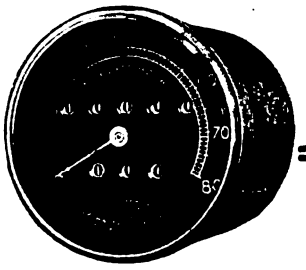
L. A. Alzina is a Californian. He came into the motorcycle business in 1906, allyinging himself with Hopkins. His cheerful disposition has given him among riders and the trade the nickname "Hap." He has always been prominent in race meets and endurance runs, and is recognized as one of the best "tuners" in California.

NEWS FROM TACOMA'S LIVE TRADE CIRCLE

TACOMA, Wash.—H. C. Fuller, of the Fuller Cycle & Supply Company, is again completely sold out of Dayton bicycles. He has so far doubled his cycle sales over the same period of 1915.

THE PAULSEN SHOP, distributing Thor motorcycles, is also distributing Excelsior bicycles with considerable success. He has ordered a second husky shipment.

TOM PAULSEN, Thor distributor, on his twin Thor, accompanied by seven other riders of similar machines, made the trip to Mount Tacoma last Sunday. All hands enjoyed the run, in spite of the snow near the end of the road. Oscar Lemon, who joined the party on a Pope, made quite a hit with the natives when he had to dodge a mule met by the party on the way up.



As a Matter of Record

If for no other reason than that of being able to keep a record of the life of the tires used on your motorcycle, the amount of oil and gas consumed per mile and the rate of speed at which you ride it would be advisable to equip your motorcycle with a

CORBIN-BROWN SPEEDOMETER

"The Speedometer of Absolute Accuracy"

This is a practical money saving consideration, but there is another one equally important—a speedometer, an accurate speedometer, such as the Corbin-Brown greatly enhances the pleasure of motorcycling. It is the sort of companion every motorcyclist needs for it is constantly telling him interesting things along the road, the speed he made on a certain smooth stretch, the exact mileage of the previous day, the distance between these two towns and numerous other worth knowing bits of information. Why forego this pleasure when your dealer is ready now to equip your motorcycle with the famous Corbin-Brown? See him today. Catalog upon request.

ONTARIO LEADS IN MOTORCYCLE REGISTRATIONS

Eastern Province Has More Than Half Total Number of Machines in Entire Dominion—Manitoba Ranks Second—Big Advances in Sales Reported

TORONTO, Ont.—Official returns as to the number of motorcycles in use in Canada show that more than half of the Dominion-owned two-wheelers are operated within the bounds of the Province of Ontario. On December 31, 1915, there were 4,174 motorcycles registered in this province, out of a total of 8,200 in the entire dominion. The number of motorcycles in use in Ontario was 3,633 in 1914, so that 541 new machines were sold in this province in 1915.

Manitoba has the next greatest number of machines registered, 942. British Columbia comes next with 923. The figures for 1915 show practically little advance over those of 1914. The western provinces of Saskatchewan and Alberta have 398 and 390 motorcycles respectively, while the Province of Quebec in the East has only 296 motorcycles. Until last January 103 motorcycle licenses had been issued in Nova Scotia, while exactly 100 motorcyclists live in New Brunswick. Prince Edward Island, where motor vehicle regulations are very stringent, there were three motorcycles in 1914, and the same number in 1915.

Yukon's Increase

Strange to relate, the greatest increase in the number of motorcycles, proportionately, was in the district of Yukon. The increase during 1915 was more than 100 per cent. In 1914 the number of motorcycles in operation in the far-North territory was seven. Last year this number was increased to fifteen. The statistics also show that the number of motorcycle riders in Newfoundland, an independent possession of the British empire, was sixty-four. There were no motorcycle registrations at all in Newfoundland in 1914.

Trade Is Normal

The number of motorcycle sales in Canada in 1915, as is 1914, was admittedly small. Not more than 800 new motorcycles were sold for use in the Dominion last year, but a considerable number of single-trackers were sold to the government for military uses abroad. This year, however, the motorcycle trade has resumed its normal trend. As an indication of business conditions this year it is only necessary to inquire of Toronto distributors regarding sales this summer compared with those of 1915.

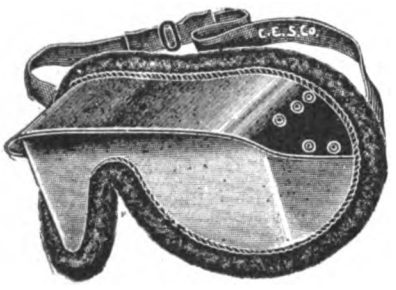
The four principal dealers here report that 1916 sales are from two to three times greater than those of 1915. The renewed activity is widespread also, judging by trade reports from distant points of Canada. Almost without exception all dealers who have been interviewed by the Canadian representative of **Motor Cycle Illustrated** declare that they have oversold their contracts, and that they are more than satisfied with the trade come-back this year.

One reason given for the business revival is that the civilians were afraid of conscriptive measures one year ago, and many, therefore, were not anxious to invest in a motorcycle. The authorities have assured the people, however, that conscription would never be used in Canada, and those who have reasons for staying at home are now purchasing motorcycles freely. On account of the greatly increased munition operations there is also more money and munition workers are buying motorcycles. Returned soldiers are among the purchasers as well. It is estimateed that 2,000 or more motorcycles will be sold in Canada this year. Almost 1,000 machines have already been sold in Ontario alone since 1915.

WANTS SALE OF BICYCLE SIRENS PROHIBITED

LONDON, Ont. — Because the siren which the small boy delights to fit to his bicycle produces a warning signal similar to that used on motor vehicles of the local fire department, Fire Chief Aiken has recommended to the city fathers that a by-law be passed prohibiting the sale of these alarms. The city council, however, has taken no action in the matter.

"Jack and I wear those Chicago Goggles on our motorcycle trips, they're real protection."



"Macy" No. 141

A more perfect fitting or comfortable eye-shield was never made. Blinding glare of sunlight; dust, dirt or rain never interfere with the comfort of the rider who wears Chicago Dimmer Goggles. Light, airy, and cool. Get a pair today—you'll be delighted with them.

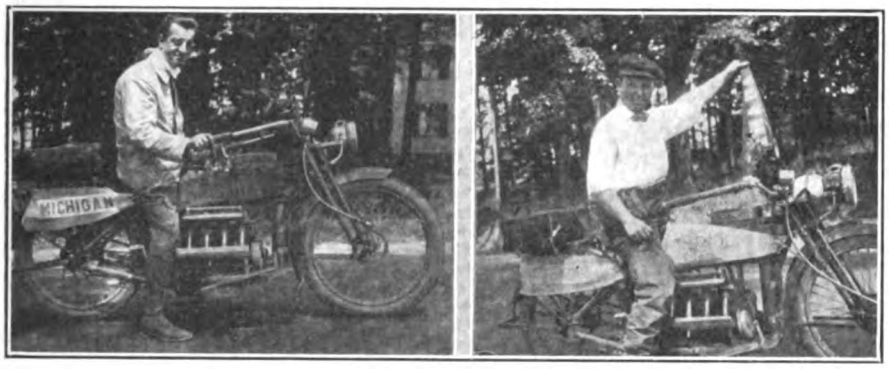
HENDERSONITES MAKE TRIP TO DETROIT AND BACK



Left, Otto Rosenberg; Right, Irving Lewin. Pictures Taken Near Detroit

NEW YORK, July 27.—Irving Lewin and Otto Rosenberg, two of the city's best-known amateurs, have just completed a trip from New York to Detroit and return on their Hendersons. They covered 1,800 miles in all, and did not open the toolboxes during the entire trip. They did not even have to use a tire pump.

While in Detroit Lewin and Rosenberg were the guests of the Henderson Motorcycle Company, maker of the four-cylinder Henderson. The pair made an inspection of the factory and "did the town" before starting on the return trip. Lewin is the brother of Felix Lewin, manager of the New York Henderson branch.

DEALERS ARE PLEASED WITH DAYTON TRAVELLER

SAN FRANCISCO, Cal.—R. K. Larsh, special traveler for the Davis Sewing Machine Company, of Dayton, O., is spending several weeks on his tour of the San Francisco territory, and already has visited a great many of the Dayton dealers in nearby towns. Larsh is full of new ideas on the promotion of business, and his helpful suggestions on dealers' problems are very highly appreciated by those agents he has visited. His knowledge of repairing is invaluable to all dealers.

Larsh will spend about ten days more in this district, making his headquarters with W. E. & W. H. Jackson, Coast representatives for the Dayton, before proceeding to Oregon and Washington.

McBRIDE INVITES 1,000 TO ANNUAL PICNIC

TORONTO, Ont.—Percy A. McBride, the well-known motorcycle distributor of eastern Canada, whose headquarters are in Toronto, has issued invitations to approximately 1,000 Excelsior and Henderson motorcyclists of Toronto and vicinity to participate in his annual road run and picnic, which will be held this year on Monday, August 7, a local holiday. The tour will be held to Uxbridge, where meals will be served to riders of either Excelsior or Henderson machines, and other amusement features will also be provided. A race meet will be staged on the half-mile track at Uxbridge during the afternoon.

The riders will mobilize at Yonge and Gold streets, Toronto, at 7 o'clock on the morning of the scheduled ride. It is expected that the run to Uxbridge will be the biggest event of the present season.

MILITAIRE AGENT

READING, Pa.—H. M. Sternbergh & Son, of 421 Washington street, this city, have signed up to handle the Militaire motorcycle for Reading and vicinity. The demonstrator has arrived, and is creating quite a furore when seen on the streets.

ON TOUR OF THE EAST

CINCINNATI.—A. C. Miller, with a new three-speed "15" Excelsior, left a few days ago on a vacation tour of the East, expecting to be gone about two weeks. He will visit New York on the trip.

A Correction

In the August 3rd issue of this paper, in our story of the 160-Mile Non-Stop Run at Indianapolis, won by Lorenzo Boido, we reported that Boido was riding an Indian. This was a mistake, Boido's mount being a Model 17 s. c. Excelsior.

It is only fair that the prominence herewith be given to this correct statement of the facts, and that the Excelsior manufacturers be properly credited for Boido's splendid performance—a record-breaker.

STREAKS

Don't Overstock Tires

IT IS good business for you to carry a smaller tire stock if you can do so without losing tire sales.

The single tube Goodyear Blue Streak is the one tire that will prevent overstocking.

It is the tire in greatest demand because it is the only bike tire made whose price, quality and guarantee are known and advertised.

It does not pay to carry a fancy stock of tires at fancy figures. You may sell part of them at a big profit, but you can't possibly get the volume of sales that Goodyear Blue Streaks will bring.

It takes longer to sell a fancy, unknown tire. There is always a question of price. There is the chance of dissatisfaction and the loss of a permanent customer.

Over ten thousand dealers have already accepted the Goodyear Square Deal Tire Policy as one way to increase profits by cutting down selling costs.

Write for this Policy, or better still, let the Goodyear salesman explain when he calls.

YOU, our 2,000 dealers, would have swelled with pride at the Atlantic City Convention, because of the repeated worthy expressions of highest praise heaped upon the Smith Motor Wheel and its wonderful success. More than that—credit was given the Smith Motor Wheel at this gathering of big cycle men, for the leading part it holds in reviving cycling, in creating (by its nature as a bicycle motor attachment) new and more bicycle customers and buyers of bicycle accessories.

We extend to you, our present dealers, this greeting of great good will, for you have been the greater part of the Smith Motor Wheel's success. And to you dealers who are not as yet handling the Smith Motor Wheel we say—come join us, this big family of Motor Wheel dealers; partake of the Smith Motor Wheel profits and those profits of extra and increased bicycle and bicycle accessory sales which Smith Motor Wheel sales create.

Join now—write for your agency at once, while the Smith Motor Wheel season is at its highest.

AT THE FRONT

With Prest-O-Lite for Motorcycles

To facilitate rapid movement from one point to another, the U. S. Army uses numerous machine guns mounted on side cars attached to Harley-Davidson motorcycles. These motorcycles are equipped with Prest-O-Lite because unexpected night movements demand safe, reliable lighting—a system that is simple, practical and, above all, able to "stand the jolts."

Prest-O-Lite makes such night riding safe. Its rich flood of penetrating rays fully illuminates the road ahead and is not in the least affected by road shocks and vibration. It will never fail in emergencies—costs little to buy and little to use.

These are the very reasons why **you** need Prest-O-Lite on **your** motorcycle.

Get an Equipment Combination Including Prest-O-Lite

Your dealer can fit you out with a complete equipment combination, including Prest-O-Lite, no matter what make of machine you buy. A typical equipment combination offered by many dealers is Prest-O-Lite, a lamp and a good mechanical horn. Ask your dealer about it. He can supply it at a very attractive price.

Get all the facts about Prest-O-Lite. Write today.

Dealers!

Tell about Prest-O-Lite in your sales talks. It will attract new business and make more customer friends. Prest-O-Lite in service will prove all your claims.

"Splash! A shower of mud spattered her frock just as she jumped to the curb—safely."

A Sneer or a Smile?

She was on the crossing.

The rider shot recklessly over to the left of the street.

He shut his power off quickly and coasted with his gas exploding in the muffler.

He took the corner on a slant, about 40 miles per hour, just as though he were crossing the wire in the world's greatest endurance run.

Splash! A shower of mud spattered her frock just as she jumped to the curb—safely.

Through a cloud of burnt oil I heard her say, "Oh, those horrid motorcycle riders!"

"They aren't all that way, Miss; it's only a few of them." I had to say something, I am a rider myself. In fact, I think motorcycling the king of outdoor sports.

"Well," she said, haughty-like, "the riders who do the damage are the ones you most often notice and you naturally judge all of them by that class."

The girl was absolutely right.

It isn't the grimy faces, the banging back-fires, the taking of corners on high, that will make the motorcycle popular.

It's the smiles, the easy-going, chic-looking outfits, that glide along carefully and silently—if there were enough of such riders, motorcycling would be a sport second to none in popularity.

Don't you agree with us?

'CHAIN' TREADS FOR HARD USAGE

Down on the Mexican border where it's sizzling hot—where the going is rough and tires *must* make good, the Machine Gun Company of the 71st N. Y. is using 'Chain' Treads. Here's the reason—

READING STANDARD COMPANY, INC.
MANUFACTURERS OF
RS MOTOR CYCLES

NOTICE: [redacted] AND NOT TO INDIVIDUALS.
Dictated by GEA/JRU. READING, PA., U.S.A. 7/17/16.

United States Tire Company,
Broadway at 58th St.,
New York City.

Attention M.C. Stokes, Manager,
Bicycle and Motorcycle Tire Dept.

Gentlemen:-

You possibly already know that we recently received an order from the Machine Gun Company, 71st Regiment of the New York National Guard, for 65 twin cylinder three-speed models and 8 Light Delivery Vans. This is, undoubtedly, the largest single order ever handed to any motorcycle concern for military use in this country. The order has already been completed, and we understand that the machines are on their way to the border.

We naturally were desirous of furnishing the very best, and we believe it will be interesting for you to know that we equipped these motorcycles and Delivery Vans with U.S. CHAIN TREAD TIRES. We have tested out these tires to our entire satisfaction and, knowing that these motorcycles and Delivery Vans will be subjected to hard usage where the tire equipment is a most important factor, we advised the officials to specify the CHAIN TREAD, which we knew would give them the service they expect.

Yours very truly,

READING STANDARD COMPANY.

G E Atkins

Sales Manager.

If you want tires that will stand up, that will give real ungrudging service, Mr. Atkins' advice is very much worth following.

UNCLE SAM WANTS 63 MORE MOTORCYCLES WITH SIDECARS AND TANDEMS

Bids Will Be Received Saturday, August 12, at Office of Depot Quartermaster in New York; New Order Comes as Official Clincher to Recognition of Motorcycle by Army Officials Following Excellent Showing on Mexican Border

NEW YORK, Aug. 9.—Topping off in an unmistakable manner all that has been said and all that has been done, and what has happened along the Mexican border, in connection with the use of the motorcycle by the army, comes new official recognition of the power-driven two-wheeler's worth by the United States military authorities in the shape of a request for bids for 63 military motorcycles fitted with sidecars by the office of the Depot Quartermaster, Army building, Whitehall street, New York. The proposals, which must be entered in triplicate and sealed, will be received at the Quartermaster's office until noon of Saturday next, August 12, when they will be opened in the presence of the attending bidders.

Three-Speed Twins

Twin cylinder, three-speed machines, fitted with tandem attachments for carrying two passengers and with a sidecar, and equipped with a kick-starter, are specifically called for; the military olive drab color is also a requirement. As for equipment, the government pays a marked compliment to the Prest-O-Lite company by specifying Presto tanks as essential equipment and to the Seiss Mfg. Co., by calling for a warning signal either of that make or equal to it in quality; while the Rose Mfg. Co., and the Corbin Screw Corp. are likewise complimented respectively on their Neverout lamps and Corbin-Brown speedometers.

The full specifications as outlined in schedule 903 are as follows:

WAR DEPARTMENT, OFFICE OF THE DEPOT QUARTERMASTER, ARMY BLDG., WHITEHALL STREET,
NEW YORK, N. Y., Aug. 7, 1916.

Sealed proposals, in TRIPLICATE, subject to the usual conditions, will be received here until 12 o'clock a. m. Aug. 12, 1916, and then opened in the presence of attending bidders, for furnishing and delivering to the Quartermaster Corps, U. S. Army.

Sixty-three (63) Motorcycles, for 2 passengers, twin-cylinder, 2, 3 or 4 speeds, with direct starter, complete, with saddles, mudguards, tools and tool-box; color, olive drab. EACH TO BE EQUIPPED WITH A SIDECAR.

Sixty-three (63) Prest-O-Lite lighting outfits, consisting of head-lamp, tail-lamp, cylinder and necessary copper tubing, attached to motorcycles.

Sixty-three (63) Warning signals, Seiss mechanical horn, or equal.

Sixty-three (63) Lamps, kerosene oil, "Neverout," or equal.

Sixty-three (63) Speedometer and odometer combination, Corbin-Brown, or equal.

Wanted in a Hurry

TIME OF DELIVERY IMPORTANT. MUST BE STATED.

All bids must be for motorcycles, complete, as stated. Prices should be written out in words, as well as expressed in figures.

PRICE TO BE STATED, for each, F. O. B. FACTORY, location of which must be given.

Proposals involving an amount of five hundred dollars ($500) must be guaranteed. This guaranty may be in the form of a certified check in an amount equal to fifteen per cent. (15%) of the amount involved in the bid, or a guaranty executed by two responsible persons or a recognized surety company to the effect that if the bid be accepted within sixty (60) days from the date of opening, the bidder will, within five (5) days after notification of acceptance, enter into formal contract and give bond with good and sufficient security for the faithful performance of his contract, or if guaranty (to contract) be not required, that he will furnish the supplies so awarded in the same manner as if contract had been required.

The contractor shall indemnify the United States and all persons acting under the Government against all liability on account of any patent rights granted by the United States that may affect the use of the motorcycles he proposes to furnish or any part or parts thereof, or any equipment he proposes to deliver.

The Government reserves the right to reject or accept any or all proposals or any part or parts thereof.

Proposals will be submitted on the printed blanks obtainable at this office (Q. M. C. Form No. 118).

It is the intention of the War Department to exact a fulfillment of all contracts as to time periods. Bidders should not enter into contract with the expectation that they can be relieved of the conditions stated in their contracts where same are based on their proposals.

Open Bids August 12

Proposals must be signed by the bidders in TRIPLICATE, inclosed in sealed envelopes addressed to the Depot Quartermaster, U. S. Army, New York, N. Y., indorsed on outside, "Proposals for Furnishing Motorcycles, etc.;" to be opened Aug. 12, 1916, at 11 o'clock a. m."

SKETCHES, DRAWINGS or CUTS, with complete description of the motorcycles offered, must accompany bids.

A. L. SMITH,
Colonel, Q. M. Corps, U. S. Army,
Depot Quartermaster.

CHAMPIONSHIPS FOR SHEEPSHEAD BAY

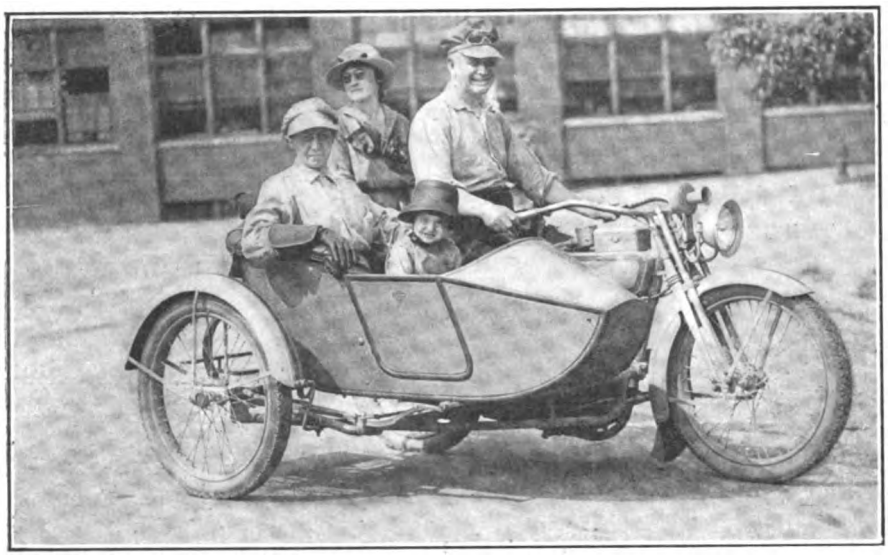
Postponed Providence Events Will Be Run Off on Seaside Saucer on Labor Day, September 4th—Pulling Card Planned

SHEEPSHEAD BAY, N. Y., August 7.—Those motorcycle fans who were disappointed when the Providence racemeet was called off a couple of weeks ago can consider that disappointment in the nature of a postponement for the plan which was hatching at Providence to carry the meet in its entirety to the Sheepshead Bay speedway, has matured to a point where the speedway management announces that sanction has been asked for the staging of a mammoth meet on the seaside track on Labor Day, September 4.

If things go according to the plans outlined by the speedway management and the Speedway M. C., which nominally stands sponsor for the event, all of the National F. A. M. championship events, which were to have been run on the Narragansett speedway, will embellish the all-star program which has been drawn up for the Labor Day occasion. These include six

Digitized by Google

HE MIXES POLITICS AND MOTORCYCLING



Winfield R. Gaylord, Milwaukee, Is "Stumping" the Middlewest for the Social Democratic Party, and Making His Jumps on This Harley-Davidson Outfit

amateur championships as follows: 1-2-5-10-25-50 miles for which the Bosch trophy will be hung up, to be decided for on the point system. The single-mile and the 25-mile national professional championship contests and a 100-mile open event are the bait that will draw the best of the factory talent to meet, and without such competition as the Dodge City race provided on July 4, the pro riders should turn out in even greater numbers than on the previous occasion meet.

It is stated that entries for the event will close on August 24, and that no post entries will be accepted. Tickets are on sale, and entry blanks can be had from any motorcycle dealer in the metropolitan district, as well as from I. W. Barnard, care New York Sporting Goods Co., 15 Warren street, New York. It is estimated that the contest should draw an even larger attendance than the Independence Day meet, which pulled some 18,000 people Sheepshead Bayward.

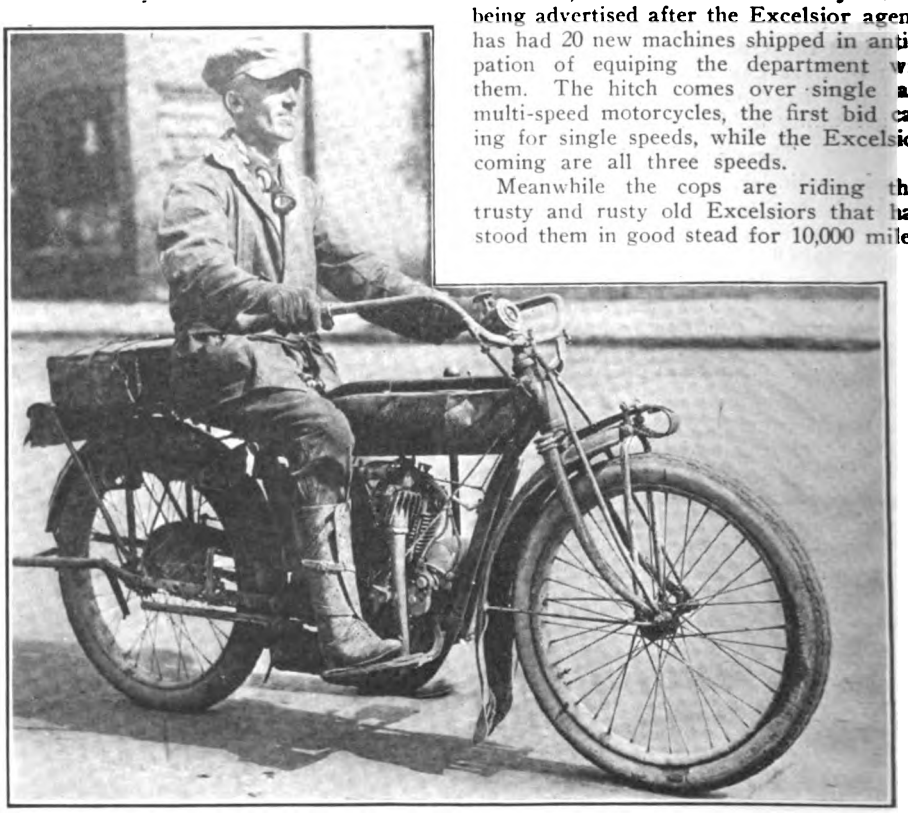
O'HARE IMPRESSED BY THE COAST FIELD

LOS ANGELES, Cal., Aug. 1.—Fully impressed with the possibilities of the Coast field as a motorcycle selling market, Sales Manager C. B. O'Hare of the Thor left here on Saturday last for El Paso and points south. That he was favorably impressed with this his first visit to the far west can be gathered from the fact that O'Hare says he is starting east a full-fledged booster for the west and that he intends to spend quite some of his time in the future in visiting the Pacific Coast trade, which no doubt augments at least one and probably two coast trips a year for the Thor man.

STUDYING HISTORY FROM THE SADDLE

BOSTON, Mass., August 7.—A. P. Hodapp, an instructor in history in the High School in St. Paul, Minn., arrived here yesterday on a motorcycle trip through New England for his summer vacation. Mr. Hodapp is linking up his vacation with his historical work and, in going over the ground where history was made during the Revolutionary War, he feels that he is accomplishing something that he will find worth while in time to come.

Mr. Hodapp's mount is a 1913 Indian on which he has covered better than 10,000 miles and has not even had the motor down to remove the carbon. Perhaps even more extraordinary is the fact that the original spark plugs and piston rings are giving perfect satisfaction. Mr. Hodapp is making the trip in easy stages, covering from 100 to 150 miles a day and laying off once in a while at the most interesting points to study the local conditions.



A. P. Hodapp of St. Paul, Who Is Studying History from the Saddle of His Indian

JOTTINGS ABOUT TRADESMEN IN NEWARK, N. J.

NEWARK, N. J.—Most everyone who motorcycles round this town is away, was away, or is going away for a bit of vacationing. Over in the Carl W. Bush Company, Harley-Davidson and Cleveland headquarters, Carl Bush has just returned from the F. A. M. convention at Providence, R. I. Link Holland, the sales manager, is off with his missus in a sidecar touring the New England States, and P. W. Stevens, the rest of the firm, is somewhere in New York State, having gone out of Providence after the big doings were over.

C. W. WAUGHOP, on a Cleveland, is hoboing it through the State of Maine with a complete camping outfit on the tail of his li'l ole two-stroke, and writes back that it's fine dope.

CHAS. KREBS, the local Pope agent, is in a fair way of becoming a regular John D. in the motorcycle and bicycle line, he having bought the store and goods of the Frank C. Cornish Estate, Henderson agent. He intends to operate both stores, which are located on two of the busiest thoroughfares in town.

"JIM" WILSON, well-known to local motorcyclists, has opened a shop at 351 Halsey street, where he will doctor all the sick magnetos and generators that are brought to him. He is well qualified to do this line of work, having had charge of the experimental work for the Splitdorf Electrical Co. for seven years.

WHAT the local police will ride is still in the air, as bids for new motorcycles are being advertised after the Excelsior agency has had 20 new machines shipped in anticipation of equiping the department with them. The hitch comes over single and multi-speed motorcycles, the first bid calling for single speeds, while the Excelsiors coming are all three speeds.

Meanwhile the cops are riding their trusty and rusty old Excelsiors that have stood them in good stead for 10,000 miles.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

ST. CHARLES, Ill.—The firm of Marsden & Marshall has been formed to deal in bicycles, lubricating oils, small tools and bicycle sundries. Catalogs in these lines are requested.

CHARLOTTESVILLE, Va.—The Reynolds-Zink Hardware Co., Inc., has opened a store at 421 East Main street. Catalogs on bicycles are desired.

WAYNESBORO, Pa.—Beck & Benedict Hardware Co. will soon open at 86 West Main street. They desire catalogs on automobile accessories.

ALBIA, Iowa.—The Seaman-Clark Hardware Co. requests catalogs on automobile accessories, bicycles, small tools and lubricating oils.

THOMAS, Okla.—J. W. Mulcahy has bought out his partner's interest in the firm of Mulcahy & Coffman, hardware dealers. He requests catalogs on automobile accessories, lubricating oils and small tools.

GLASGOW, Mont.—Maris & Lee, Inc., has succeeded to the Glen Maris Hardware Co. The firm will deal in bicycles, small tools and lubricating oils.

CLAY CENTER, Neb.—J. L. Mooman has succeeded to the business of F. C. H. Adams. Catalogs are requested on autobile accessories, bicycles, oils and small tools.

NEW YORK, N. Y.—Joseph Sugerman, of 521 East 138th street, has opened a branch at 1038 Westchester avenue. Catalogs are requested on automobile accessories, oils and greases.

START SPECIAL CAMPAIGN

LOUISVILLE, Ky.—A. W. Ellis, Louisville manager for the Goodyear Tire & Rubber Co., and H. E. Waldsmith, a special representative from the factory at Akron, have started a special campaign in Kentucky on motorcycle tires, tubes, etc. Ellis reports a healthy season in these lines.

MUD PLUGGING AND SPLASHING TO OMAHA

Miss Adeline Van Buren Visualizes the Hardships Which Beset Herself and Sister on the Section of Their Transcontinental Trip from Ashtabula to the Nebraska City

By ADELINE VAN BUREN.

OMAHA, Neb.—We left Ashtabula, O., on July 9 and passed through Cleveland, continuing on to Akron, where we stayed two days. It was quite a novel experience, being taken through the factory of the Firestone Tire & Rubber Company, from the pits of crude rubber to the sales department, in Akron. We feel now that we are quite competent to mend a puncture if the necessity arises.

Instead of returning to Cleveland over the 34 miles of boulevards, we passed on through Medina to Norwalk, O., and found some very bad roads en route. We only made 100 miles that day, July 13.

A Heavy Thunderstorm

July 13 is a memorable one, for one reason on that day I was in a bad accident. My luck was good this July 13, however, the worst that occurred was a terrific thunderstorm, just about five miles from Toledo. The rain came down in sheets and we could hardly see the road ahead of us, but we rode on, finally coming to a farmhouse visible in the lightning flashes. The owner let us stop for the night. The next morning we saw the ravages of the storm; over 100 telegraph poles were down, many being broken completely in half. About 50 workmen who were repairing the damages obligingly posed while I snapped a picture.

We left Ligonier the next morning, after meeting with a garageman who would only take half rates for his gasoline, to show his interest in our trip. We entered Indiana, being glad to leave Ohio behind us.

More Mud Riding

Indiana seemed to us to be a state of small farmlands peopled by human beings who have lost the enthusiasm of life. At Elkhart we were sinking in the mud of the Lincoln Highway, when the Indian boys caught us, having seen us ride past. One led us by a fairly good road to South Bend, and at that place, several others rode with us to La Porte. This was the first day we had company, and it seemed mighty good, as we were getting lonesome. We continued along to Hammond, just outside of Chicago, where we stopped for the night.

We wandered into Chicago on the morning of July 16 and lost ourselves in its wonderful park and boulevard system. A passing motorcyclist offered his services to guide us to Michigan avenue, the home of the Hendee Mfg. Co. in the Windy City.

Happy Time in Chicago

Chicago is surrounded by six parks—Grant, Lincoln, Humboldt, Garfield, Douglas and Washington—all connected by fine boulevards. A trip of 60 miles will not lead you off it once. This is very nice for residents, but rather hard on strangers, who can ride in circles and not know it. We visited the parks and also saw the new municipal pier of which the city is justly proud. We spent two and a half days in Chicago, one evening of which Mr. Speaks, of the Firestone factory, made very pleasant for us by giving us a sight-seeing trip per motor car.

On July 19 at Dixon, Ill., we were forced to indulge in some real endurance work. For 40 miles we skidded and slipped through deep sand. It was almost our Waterloo. Tourists all claim that it contains the worst ten-mile stretch of the Lincoln Highway from coast to coast. On July 20 we crossed the Mississippi over Lyons Bridge, the first time this was ever done by two girls on solo Indians.

Iowa's Red Clay

For a short distance the going was good; then we hit some Iowa red clay. This was wet from cloudbursts which occurred the night before; the ruts were so deep that the machines stood up by themselves. My sister was sure peeved. She did not even know I had taken her picture as she was getting up after a spill. Then we had some good road, and I started to dream, being very happy at the contrast.

Pretty soon I felt a bump on my head and came to right away. I made a little round dent in the road with it as I came off, for I had forgotten all about riding, it appears. Besides hurting, the spill annoyed me because I had not fallen on the bad roads at all.

In Cedar Rapids

We reached Cedar Rapids at 10 a. m. on July 21. In every city it is the same story. People are decidedly interested in our trip; reporters interview us and we are surrounded by a young, but respectful mob. All hands are anxious to do something for us. Our leather costumes are accepted naturally and instantaneously by everyone, causing real commendation, even from old ladies.

On July 22 we left the Lincoln Highway and followed the Jefferson Highway into Des Moines. It was a splendid road, kept in excellent condition by dragging. Des Moines impressed me as being most like New York, with the automobile stores, theatres and shops in separate sections of the city. Next day we rode over more good dirt roads to Omaha, leaving Des Moines at 11:30 a. m. and reaching Omaha over the River to River road at 8 p. m.; a distance of 168 miles. The country between is just like a gigantic roller coaster, one steep hill after another. As you coast down one and near the crest of the second, a panorama of big golden wheat stacks, grazing cows, and prancing colts is spread before you. Soon we encountered the first rider from Omaha of a group who had ridden out to meet us.

Arrive at Omaha

As we rode on the rest of the group joined us and we rode into Council Bluffs in quite a procession. At this city a motorcycle policeman joined the party and all hands crossed the Missouri river into Omaha. There we met Mr. Sam Boord, of the Omaha Bicycle Co., Indian agent.

The following day was Mr. Boord's birthday and his wife, hearing that mine came in two days, had a double celebration with dinner at her home in the evening. This home life cheered us both greatly. When I entered the Indian shop a package was handed me. On opening it I found a revolver the boys had bought to safeguard us for the rest of our trip. The card with it read: "Birthday Greetings From the Boys and Girls of Omaha."

The reporters all hope to hear of wild hold-ups and other adventures we have had, but they are disappointed. Our theory is rapidly becoming reality, that two real American girls can safely enjoy the health-giving and novel vacation of a transcontinental trip on motorcycles.

We are naturally delighted with our Powerplus machines with their Firestone tires. We have not had one bit of motor trouble. Each motor sings all day long, without a falter. New York air is still in our tires, for we have not had a puncture yet. We carry extra valves, springs, controls, chains, inner tubes and blowout patches, for the same reason that one carries an umbrella at home—when you carry the umbrella it never rains.

ON BUSINESS TRIP TO COAST

C. B. O'Hare, Thor Sales Manager, Who Is Now on a Rapid-Fire Tour of California and Other Far-Western Agencies

READING CLUB ON OUTING

READING, Pa.—Seventy-five members of the Reading Motorcycle Club visited Earlville, on a recent Sunday run, making the trip by way of Douglassville. Many of the tourists used sidecars and were accompanied by their women folk. A chicken dinner was served at Earlville.

ALEXANDER AND WARNER WIN KANSAS RUN

Ellsworth 210-Mile Dust Lark Brings Home 15 of 20 Starters with Perfect Scores—Featherweight Wins Solo Prize

ELLSWORTH, Kans., August 7.—Despite sand of the sort that seven weeks' lack of rain can conjure up on Kansas trails, and that's sand of the bottomless kind, fifteen of the twenty starters in the Short Grass endurance run, promoted over a 210-mile course here today, managed to check in tonight with perfect scores. And of the fifteen perfect ones, a little lightweight machine made the best showing, Red Alexander, on an Indian Featherweight coming home with the highest consistency score of 998.

In the side car division, Spec Warner, also on an Indian made the best consistency record, with a score of 994; the next best score in this division was made by Steiner, who lost only 16 points for being off time at the controls and secret controls. Following Armstrong in the solo division came Hepborn, Indian, 997½; Curry Indian, 997; Tholen, Indian, 997; Rash, Indian, 995; Fillmore, Indian, 992½; Crocke, Indian, 991; Stephens, Indian, 990½; Mealey, Harley-Davidson, 990; Fisher, Harley-Davidson, 988.

The run, which was staged under the auspices of the Ellsworth M. C., carried the riders 20 miles on the far side of Wichita and back and proved that the Kansas sodbusters can ride to beat the band. Not an accident marred the day's sport which was followed by a feed-fest provided by Spec Warner.

PLAN $7,000,000 WORTH OF NEW ROADS FOR JERSEY

NEWARK, N. J., August 7.—Motorcyclists should be very much interested in the Egan Road Bill at the election this fall. This bill, if it wins, will provide for the building of $7,000,000 worth of new roads throughout the state, all of which would be trunk routes and not roads that start and end nowhere. The automobilists are for the new bill and are trying to enlist aid from other road users.

The $7,000,000 will be raised by a bond issue to be paid off in yearly installments from the Motor Vehicle Fund, a fund that will hit the $1,500,000 mark for the current year.

GIVING LORENZO BOIDO HIS JUST DUES

FATE and a thoughtless correspondent robbed Lorenzo Boido of some of the fruits of his victory in the non-stop contest at Indianapolis last week in the report of that wonderful performance of his which appeared in the last issue of **Motor Cycle Illustrated.** Boido, who for some time past has been connected with the Excelsior factory, was credited with making his kiling on another make of machine, whereas, he cleaned up the field in such fine style on his good old "X."

Just how the correspondent went astray on Boido's mount is a matter for conjecture, but it is safe to say that the "jumps" of this little speedster—Indian to Harley-Davidson to Excelsior—have been so frequent, as the various factories came to appreciate the Phoenix lad's real worth, as to confuse even the most diligent of correspondents. This much we can vouch for, however: the correspondent in question intended no slight for either rider or factory; t'was a simple slip of the pen, or the typewriter perhaps.

MERRY TO CLOSE LOS ANGELES STORE

LOS ANGELES, Cal.—Edwin F. Merry sent out under date of August 1 an announcement to his customers in Southern California that the Los Angeles branch stock and salesroom would be closed about Sept. 1. In the future Merry will carry his entire stock at his big headquarters building in San Francisco. By concentration of stock in this manner he feels that he will be better able to serve the trade in his territory as a whole.

Julius Smith, manager of the Los Angeles branch, will go to San Francisco to be associated with Merry in the management of the home establishment, but will keep in personal touch with the Southern California trade. Merry's circular says, "In our San Francisco house we have the largest and best arranged jobbing institution in this line, west of Chicago, and with the added development which we intend to install, will give us better opportunities to expand that will work to the benefit of both our customers and ourselves, and we extend a cordial invitation to visit us and to consider our house your home and headquarters when in San Francisco."

SHIPPING BUREAU FOR NETHERLANDS EXPORTERS

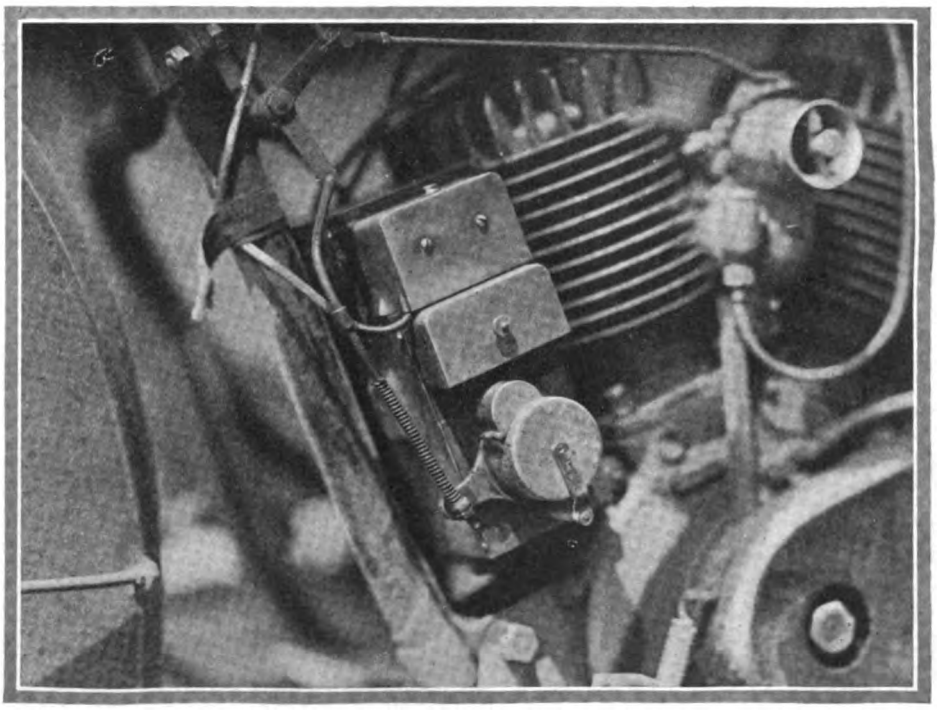
NEW YORK—As an aid to those manufacturers whose endeavors in the export field are mainly directed toward the Netherlands and Scandinavian markets, the Ph. Van Ommeren Corp., 42 Broadway, New York, announces the establishment of a shipping bureau dealing especially with business transacted in these countries. The bureau will be in chare of Mr. Wm. H. Scholtz, formerly connected with the American Legation at the Hague and an authoritl on Dutch commercial affairs, and it will attend to all matters incidental to the exportation of goods to and the exploitation of goods in the Netherlands and contiguous countries.

14,000 TAGS FOR MOTORCYCLISTS

TRENTON, N. J., August 5.—Commissioner of Motor Vehicles William L. Dill has ordered 120,000 license tags for 1917 of which 14,000 are for the motorcyclists. The colors are to be national blue and white. There is talk of the 1918 markers being made at the State's prison, by the convicts.

HERE'S THE NEW DIXIELITE—SPLITDORF'S LATEST

Separate Ignition and Lighting Units in One Casing



IN the photograph above is shown the newest apparatus from the Splitdorf Electrical Company, of Newark, N. J., mounted on an Indian Powerplus machine. The ignition unit is located in the lower portion of the casing, the contact maker being the same as on the Dixie magnetos. Above is the armature for the lighting section, the interrupter being located in the rectangular housing near the top. The lead for the lighting current enters at the lowest point of the upper casing. The drive for the lighting section armature is by gear from the main shaft of the Dixielite. The apparatus was exclusively described in last week's issue.

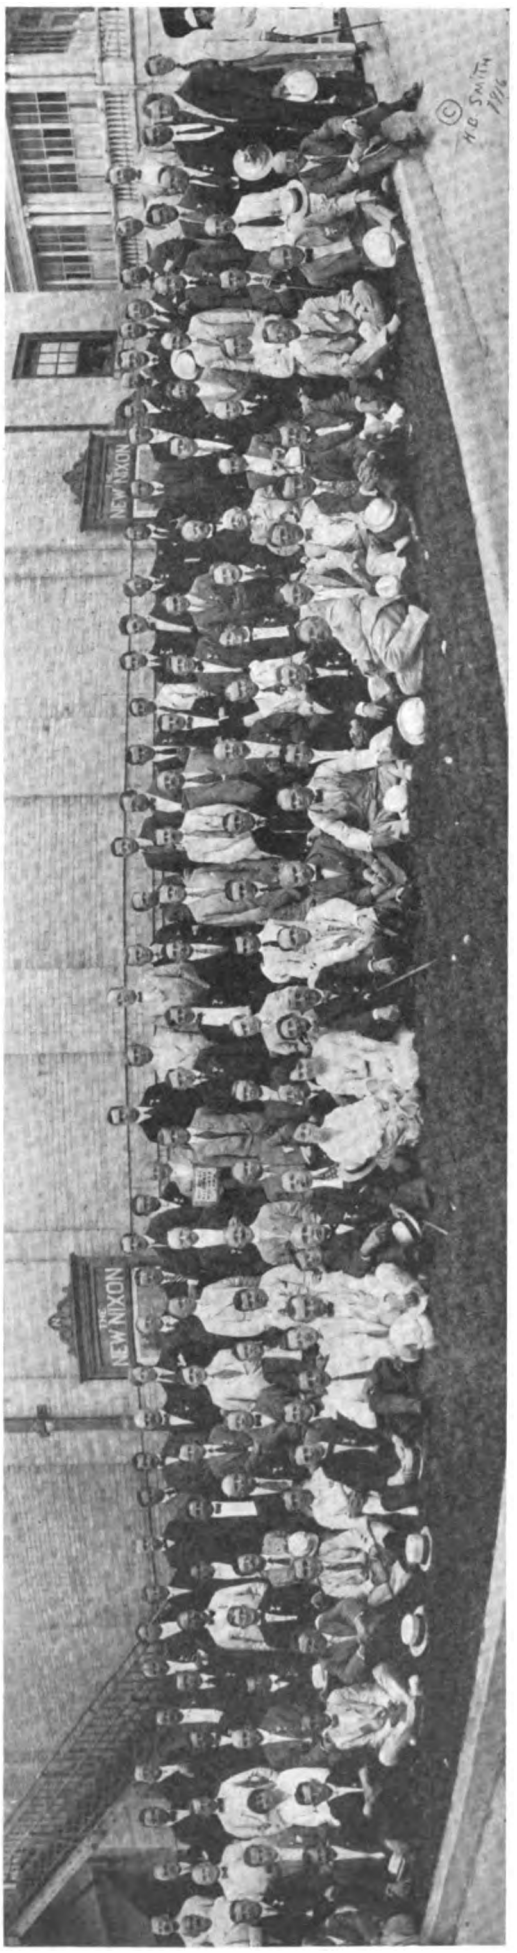
CYCLE TRADES CONVENTION CROWD CAUGHT IN A RARE MOMENT OF REPOSE



WHEN a big and thoroughly energetic gathering is striving earnestly to keep in touch with three or four meetings a day and at the same time make the most of the myriad attractions held out by Atlantic City, it is a difficult matter to obtain a group photograph, and that accounts for the fact that only about two-thirds of the Cycle Trades folks appear in the above picture. Some of the visitors were bathing when the photo was taken, others were taking the morning air in roller chairs on the boardwalk, some were out on the links, and, all in all, the camera man did well to get as large an assemblage on the lawn as he did.

By the way, R. A. Sundvahl and Walter W. Shoemaker banged out the lowest gross and net scores, respectively, in the golf finals at the Country Club on Friday and carried off the prizes. Shoemaker made it in 100 gross and with a handicap of ten strokes, scored 89 net. Sundvahl's score going out was 42 and on the return 48, giving him a gross score of 90, the best of the day by quite a margin. Shoemaker went out in 53, and thus had a gross total of 99.

Final returns from the bowling tournament show that Mrs. Henry Mesinger won the ladies' first prize cup with a score of 103, and Miss Herrinstadt, of the Progressive Cycle Co., of New York, captured the cup for the second best score.

The members of the Motorcycle and Bicycle Manufacturers' team, which defeated the Jobbers', Travelers' and Salesmen's teams, and carried off cups, were W. G. Schack, E. J. Mueller, Fred L. Brown, W. V. C. Jackson and Joe Merkel.

Jackson was high man on the winning team, his top score being 208, but four or five lucky breaks put J. Leo Sauer into the running for the roll-off, and he bested Jackson with a score of 188. J. Leo admits that he was the most surprised man in the house when the returns came in and they handed him the cup.

The report on the Motorcycle and Allied Trades Association meeting and the final joint session of the cycle trades will be found on pages 16 and 17. These reports, with the golf and bowling finals, clear up the schedule. All the other convention doings were fully covered in **Motor Cycle Illustrated** for August 3.

CYGNET STARTS SALES IN SOUTHERN CALIFORNIA

LOS ANGELES, Cal.—G. H. Morton of Glendale, Cal., has been appointed factory representative of the Cygnet Rear Cars and has started Southern California business on this attachment in good shape. Risden's has already sold two of the rear cars and the Girton-Hoffer Co., Excelsior distributor, has a Cygnet demonstrator prominently displayed and is pushing it actively.

NORWEGIAN FIRM WANTS AMERICAN MOTORCYCLES

FROM Norway comes an inquiry for American motorcycles, the inquirer desiring to get into touch with manufacturers in this country. Correspondence may be in English, with quotations f. o. b. New York. Cash against documents will be paid. Those interested should address the Bureau of Foreign and Domestic Commerce, Washington, D. C., mentioning Opportunity No. 22045.

BUTLER SELLING HIGH-CLASS SIDECAR OUTFITS

LOS ANGELES, Cal.—Thomas C. Butler, Jr., managing the Indian retail store in this city, has a very convincing way of presenting the attractiveness of a fully-equipped motorcycle with sidecar. In the past few days Butler has obtained two orders for outfits of this kind, one for $403.17, and the other for $354 in cold cash.

MOTORCYCLISTS PROFIT BY UPLIFT CAMPAIGN

LOS ANGELES, Cal.—Lester Miles and some of his associates in the Los Angeles M. C. have been conducting a campaign of education among city officials and summer resort keepers, which is producing good results on behalf of the motorcyclists. The purpose of this campaign has been to show keepers of restaurants, cafes, hotels and camps that motorcycle riders are the best class of people who patronize their attractions.

The proprietors of these places and officials of cities visited by bodies of riders have had their attention called to the fact that motorcyclists are liberal buyers, and that there are several thousand of them in southern California. As a result of this publicity, motorcyclists are now the most welcome guests.

SPRAGUE SWEEPS BOARD AT COSHOCTON MEET

COSHOCTON, Ohio.—J. Sprague, riding his Harley-Davidson, captured all three motorcycle races at the Farmers & Merchants picnic, in this city, on August 3. In the 15-mile event, Sprague covered the distance in 20:30, with Cupps, Excelsior, second, and Kunion, Indian, third. In the 10-mile race the order of finish was Sprague, Cupps, Kunion. Time, 14:30.

Sprague won the 7-mile in 8:45, with Kunion in second place and Cupps, third. Nearly 15,000 saw the events, crowding the rails and stands of the half-mile track in the fair grounds.

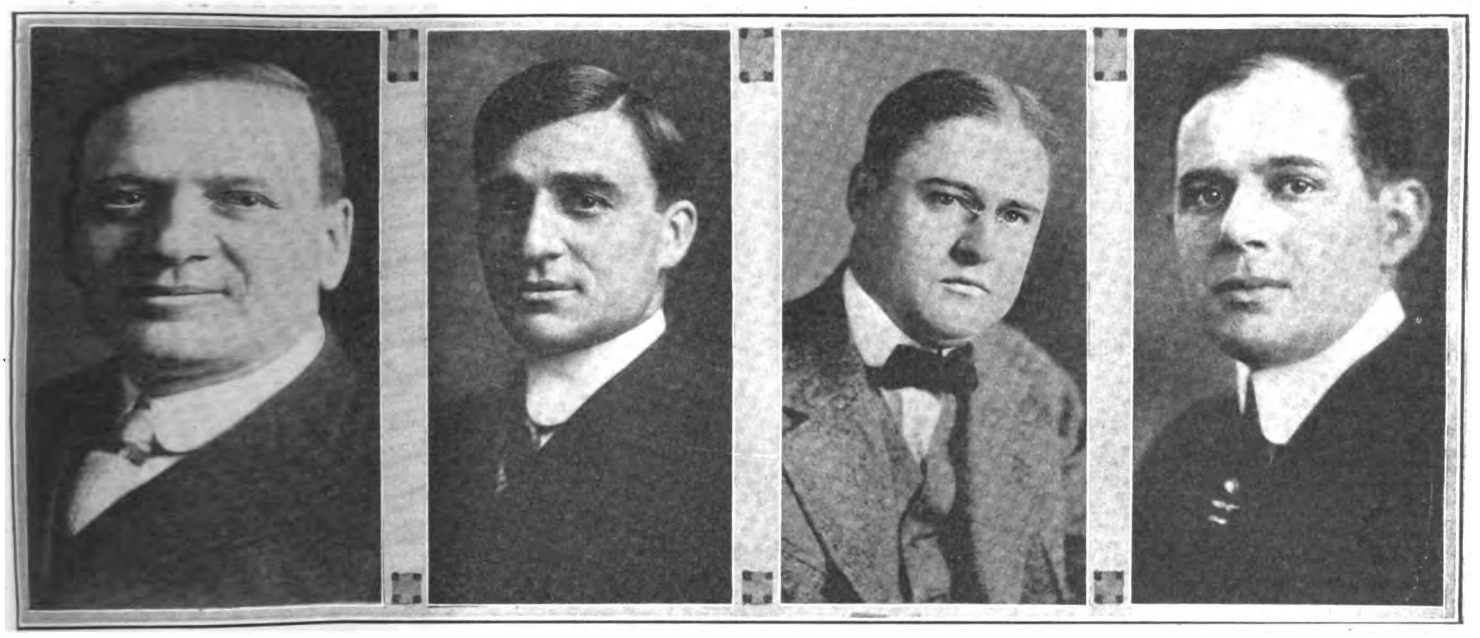
THEY MADE FIRESTONE SPARKS FLY AT ATLANTIC CITY



R. J. Firestone, General Sales Manager; F. C. Blanchard, Assistant Sales Manager; Edward S. Babcox, Advertising Manager, and Charles E. Speaks, in Charge of the Bicycle and Motorcycle Tire Department, Who Lent Firestone Prestige to the Business Councils, and Entered in Regular Firestone Fashion Into the Sports at the Annual Midsummer Seaside Trade Convention

INDIAN GUN OUTFIT COMMENDED BY WOOD

In Test Over Rough Country Near Plattsburg, N. Y., Apparatus Proves Serviceability and Is Praised by U. S. Commander

PLATTSBURG, N. Y.—In a test over rough country near the Business Men's Training Camp, an Indian machine gun outfit performed all that was required of it so successfully as to receive the compliments of Major-General Leonard Wood, commanding the United States army. The try-out took two hours, and was made with the gun, a Benet-Mercier, mounted and 600 rounds of ammunition carried. The crew consisted of Lieutenant Philip Gordon, Second Cavalry, and two men, one on the tandem seat and the other on the gunner's seat on the sidecar.

The machine left camp covering 3¼ miles in 4½ minutes, then was driven over the ground among the stumps and brush. A stream was forded and then the gun was sent into action, the sidecar being detached and wheeled by hand to position. When the test was over it was found that the outfit had performed what ordinarily required three horses, a pack mule and four men.

General Wood complimented Hal H. Noyes, Indian representative at the camp and commander of the motorcycle squad just established, on the performance of the machine gun outfit. Noyes is breaking in the men, principally regulars, in the riding, handling and care of the machine. He has about a dozen under his supervision now, some of whom show great promise of becoming experts.

VALUABLE DATA IN JULY "TIRE NEWS"

TWO of the six pages of the July issue of the *Goodyear Tire News* are given over to motorcycles and bicycles, and like the remainder of the publication are well illustrated. The leading article in this section is devoted to the repair of bicycle tires and is particularly of value at the present time. A pointed story on the clean rider is also an interesting feature of the section. In the main section there is an excellent demonstration of what service should mean to the dealer.

BERRY'S STORE IS BADLY DAMAGED BY FIRE

LOS ANGELES, Cal., Aug. 2.—While T. E. Berry, Miami and Merkel distributor, was up at Big Bear Lake on a fishing trip with C. L. Smith and Eddie Lingenfelder, manager of the Goodyear tire branch, a fire started in his Los Angeles store and practically cleaned up the place. The loss was covered by insurance, but it is expected that the store will not be open for business before September 1, when a new stock of Miamis will be on hand.

BILL HAS SIX EMBLEMS LEFT OUT OF SHIPMENT

LOS ANGELES, Cal.—John T. Bill & Co., handling the Emblem line, has only six of the original lot of 35 Emblem lightweights left. The lot was received two months ago, and more than half of it went in three weeks. Pierce and Emblem bicycles and the Hudson line are also leaders.

POMONA'S ACTIVE QUARTET OF DEALERS

ALLIED TRADES BODY APPROVES CONSOLIDATION

Names Committee to Confer with M. M. A. Representatives on Plans for Combining Forces at Time of Chicago Show; Another Committee to Co-operate with the F. A. M.

"WE have had comparatively little time to obtain concrete results, but all things considered I feel that our recently-launched organization has done excellent work," said Chairman Harry S. Quine in opening the meeting of the Motorcycle and Allied Trades Association at the Atlantic City convention on Thursday afternoon, August 3. "We have considered many plans for the general advancement of the motorcycle and allied industries, and while only two of the committees appointed at Milwaukee are submitting detailed reports, I have been informed that all the other committeemen have been giving serious thought to the problems confronting them. At any rate, we have been active. We have shown a lively disposition to work. We have exhibited genuine enthusiasm, and when our efforts receive the backing of the proposed joint body, to be composed of the M. M. A. and the Motorcycle and Allied Trades Association, we can certainly look forward to big things."

Chairman Charles E. Speaks, of the Dealers' Betterment Committee, then submitted his report, which was summarized in the August 3d number of **Motor Cycle Illustrated.** Special emphasis was placed by Chairman Speaks upon the series of six educational letters to be sent out by the committee to dealers. As was explained in the issue of last week, the first of these letters will deal with the aims of the Motorcycle and Allied Trades Association; the second will treat of the advantages of a clean and orderly motorcycle store; the third offers sales hints and general business-building suggestions; the fourth discusses advertising and publicity work from the dealer's viewpoint, and the fifth and sixth take up time payments and the matter of accounting.

It is the intention of the Dealers' Betterment Committee to send out one letter a week, beginning September 18. At the same time that the second letter is released a folder, embodying pictures of satisfactory and unsatisfactory motorcycle agencies, will also be distributed. This folder will give some additional sales-boosting suggestions, and will be made up strikingly in colors. The chief object of the folder is to stimulate the interest of dealers in neat stores and brighter window displays.

Following the reading of Mr. Speaks' report, the association voted to continue the Dealers' Betterment Committee and authorized the carrying out of the campaign outlined. The other members of the committee are C. B. O'Hare, E. J. Mueller and Frank Effinger.

In the absence of Chairman Lacy Crolius, the report of the Publicity Committee was read by Chairman Quine. This report was dealt with at length in **Motor Cycle Illustrated** for August 3. It discussed open mufflers, tank-riding, speeding, the costume problem and other phases of the proposed campaign to create a better impression upon the general public, and also treated of the plans that have been laid to obtain broader publicity for the motorcycle along favorable lines in national periodicals.

The report was accepted and the committee was was continued. In addition to Chairman Crolius, the Publicity Committee has the following members: Louis S. Fairbanks, R. F. Rogers, Frank Effinger and E. R. Thomas.

In discussing the proposed consolidation of the M. M. A. and the Motorcycle and Allied Trades Association, W. V. C. Jackson argued that the former could be continued practically on its present basis as the Motorcycle and Allied Trades Association; in other words, that no radical changes in policy would be necessary to permit the manufacturers' body to operate as one with the Allied Trades organization, in view of the fact that the two associations have in mind the same objects.

Dan Walls suggested the appointment of a committee of three to confer with a committee of the M. M. A. regarding the consolidation, and this was later put in the form of a motion and carried, Messrs. Speaks, Walls and Briggs being named as the committee.

Mention was made of a proposal to consolidate all the motorcycle and allied associations in one big body, with executive committees to specialize upon the various lines of work, and in this connection there was some talk of imposing a tax, on the basis of the value of the product marketed, upon all manufacturers to defray the expense of the campaigns now in hand. In opposition to this idea, however, it was contended that the general consolidation scheme would have its drawbacks, and that the consolidation should be worked out to cover only such associations as were definitely working for the same objects. This brought the proposition back to the combining of the M. M. A. and the Motorcycle and Allied Trades Association, whose objects are already practically identical.

Charles E. Speaks brought the matter to a head by stating that in his opinion the Motorcycle and Allied Trades Association had been honored by the offer of the M. M. A. to consolidate, and offering a motion to approve of the consolidation plan. The motion was carried.

L. M. Wainwright, of the Diamond Chain Mfg. Co., added the name of his company to the list of the Allied Trades body and promised his personal cooperation. Incidentally, Mr. Wainwright made a plea for a definite announcement of the aims of the Motorcycle and Allied Trades Association and stated that as a sales-boosting organization it has great opportunities.

A. H. Bartsch added the name of the Bosch Magneto Co. to the membership of the Allied Trades Association, and Leadley Ogden requested that the Cygnet Rear Car Co. also be included.

It was finally decided that the committees representing the manufacturers' association and the Allied Trades body should take up the consolidation plans with a view of submitting a full report at the Chicago Show, at which time the project will doubtless be put through.

President Henderson, of the M. M. A., stated that his organization would foot any minor bills that may be incurred, for stationery, etc., by the Motorcycle and Allied Trades Association pending the consolidation.

The officers were then elected, Mr. Speaks placing Chairman Quine in nomination for president. Mr. Quine was elected promptly, and T. W. Henderson, nominated by George Briggs, was placed in the office of vice-president with equal promptness. Marty Stokes, nominated by A. B. Coffman, was elected to the office of treasurer in record time, and President Quine was authorized to appoint a secretary and have suitable letterheads prepared.

That wound up the business of the Motorcycle and Allied Trades Association,

What Was Done

Motorcycle and Allied Trades Association approved plan to combine with Motorcycle Manufacturers' Association, on a basis to be determined by committees representing the two bodies. Consolidation plan is to be ready for action during Chicago Show week.

Reports of Dealers' Betterment and Publicity Committees were accepted and the committees were continued.

H. S. Quine was elected president of Allied Association; T. W. Henderson, vice-president; M. S. Stokes, treasurer. Officers will serve until Chicago meeting.

President Quine was authorized to select a secretary, and to have temporary letterheads prepared.

President Henderson, of M. M. A., stated that his organization would meet any minor bills of Allied Association pending the consolidation and definite arrangements for financing the work in hand.

Bosch Magneto Co., Cygnet Rear Car Co. and Diamond Chain Mfg. Co. joined the Allied Trades Association.

Digitized by Google

except for a brief discussion of F. A. M. affairs, which was opened by E. M. Jackson. Mr. Jackson argued that it came within the province of the trade bodies to assist in working out the problems of the Federation, and at his suggestion a motion was introduced providing for a committee of five to consider the upbuilding of the national riders' body. It is the intention to have this committee submit a full report at the time of the Chicago Show, and in the meantime to co-operate in any way possible with the F. A. M. officials for the ultimate benefit of the organization.

In closing the meeting, Chairman Quine expressed confidence in the future of the motorcycle and allied industries and predicted that truly remarkable results will follow the concentration of activities by the trade bodies. "Some time ago we felt that we had seen a great vision," said the chairman, "but it remained for the events of the past year to convince us that the vision is no more wonderful than the realities can be made if we pull together and keep your eyes firmly upon the high ultimate goal."

TRADE O. K.'S BICYCLE COMMITTEE'S PLANS

Joint Session Approves Appointment of Board of Directors to Devise Ways and Means of Raising $100,000 Exploitation Fund—Cycle in War Extolled

THAT $80,000 or $90,000 fund for the exploitation of the bicycle through publicity, dealer culture and various and sundry other channels which was recommended to the assembled cycle trade at the first joint session at the Atlantic City convention by the Million Bicycles committee, seems in a fair way of becoming a reality, judged by the action taken on the matter at the second and final joint session on Thursday. The matter having been fully threshed out at the separate meetings of the trades bodies on Wednesday and left in the hands of a Conference committee for further discussion, with the result that by the adoption of the report and findings of this conference committee, the joint assembly paved the way for the appointment of a Board of Directors consisting of three members from each, the Cycle Parts and Accessories Association, the Bicycle Manufacturers' Association and the Cycle Jobbers' Association of America, which with Messrs. H. S. Quine and C. F. Olin of the Million Bicycles Committee acting in an advisory capacity will devise the ways and means of first raising a fund of $100,000 to carry out the recommendations of the Million Bicycles Committee, and secondly its administration.

The Conference committee, which met early on Thursday morning and reached the decision that the good work should be carried on to its logical conclusion and decided that the appointment of a Board of Directors would be a step in advance toward that goal, comprised the following: C. P. and A. A.—Messrs. Wainwright, Schwab, Wetzel and Quine. C. J. A. of A.—Messrs. Grady, Owens and Fry. B. M. A.—Messrs. Fogarty, Wise and Schack. M. M. A.—Messrs. Henderson and Arthur Davidson. The M. M. A. committee withdrew from the conference on the representation of Mr. Henderson that the motorcycle folk were organizing a motorcycle exploitation campaign along similar lines. The conference committee organized by electing Mr. Wainwright chairman and Mr. Quine secretary.

Following the reading of the Conference committee's report, it was unanimously adopted, indicating the true feeling of the trade, and the committee was discharged with a vote of thanks.

Col. Albert A. Pope, president of the National Association of Manufacturers of America, made the opening address at the final joint session, and called the attention of the members to the real value of cooperation in any trade and to the great amount of good to come of full-fledged cooperation in the cycle industry.

Following Colonel Pope's speech, Chairman Printz called the attention of the assembly to the fact that several trade members doing exporting and importing business exclusively desired to form a separate organization as a branch of the Cycle Parts and Accessories Association with the result that a committee of three had been appointed to find out if such an organization were possible or expedient.

Keyser Fry of the Reading Cycle Co. read a number of letters and a report dealing with the organization of one big two-wheeler association bearing on motorcycles and bicycles as well and which he has been endeavoring to organize since the last midwinter convention of the trades bodies in New York. Despite the fact that most of the letters expressed full sympathy with the aims and plans for such a body, no action was taken on the matter by the assembly.

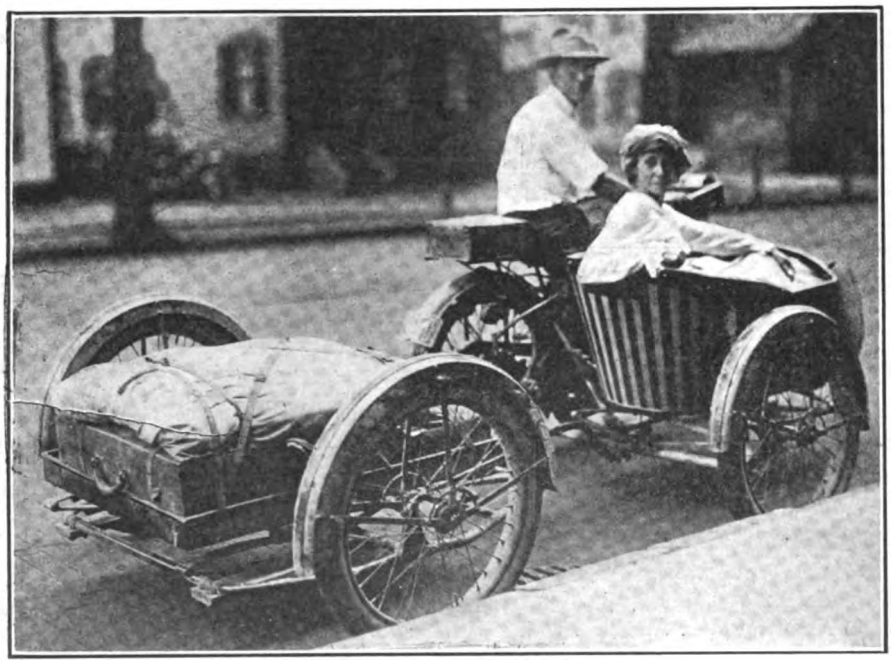
FOLLOWING THE FOWLERS ON THEIR TOUR



L. E. and Mrs. Fowler Leaving Boston with Trailer Attached. The Trailer Has Been Abandoned and Tentage Is Carried on Special Sidecar Rack. Note Striped Sidecar

NEW YORK CITY, August 7.—The Fowlers are at it again! Mr. and Mrs. L. E. Fowler, long distance motorcycle tourists, are making another summer tour, which will carry them over a distance of 5,000 miles before they again return to the Smoky City and resume teaching. The Fowlers, on their Indian fitted with Flxible side car, rode into New York this morning and spent an hour or so at **Motor Cycle Illustrated's** office and then turned their wheel towards Baltimore and points south.

Their present summer tour, which is their third, has carried them so far through Albany, Springfield, Boston, Portland, Me., St. Johnsbury, Vt., down the White Mountain trail to New York and from here they are heading through Baltimore, Washington, etc., back to Pittsburgh. They expect to bring the tour to a happy conclusion about the beginning of next month.

GILLETTE TIRE BUILDS

EAU CLAIRE, Wis., July 30.—The Gillette Safety Tire Company expects to get into its new plant, now under construction, before August 15. The main buildings, which are the first of a proposed group, are 60 by 250 feet and will be equipped with $30,000 worth of tire and rubber-working machinery.

STEWART-WARNER BUYS V-RAY INTERESTS

CHICAGO, Ill., Aug. 2.—The Stewart-Warner Speedometer Corporation has bought the stock and business of the V-Ray Company, maker of V-Ray spark plugs, at Marshalltown, Iowa. The product will hereafter be marketed under the name of the "Stewart V-Ray."

It is probable that the plant equipment will be moved to Chicago in order to make it an integral part of the corporation's widely-varied activities. The manufacture of the plugs will be widely extended now that the purchase has been completed.

V. N. Hansen, president of the V-Ray Co., will have charge of the spark plug end of the Stewart-Warner business. The present output is about 3,200 daily, but this will shortly be increased.

CLEVELAND NEVER MISSED, SAYS SCHOOLFIELD

CLEVELAND, Ohio.—Among the many recent bulletins received by the Cleveland Motorcycle Company, is one from Raymond Schoolfield, dated from Covington, Va., in which he says that he made the trip to Covington on his Cleveland in two days. The distance was 263 miles and Schoolfield had to ride over 100 in red clay soaked by four days of rain. The latter half of the two-day trip was also made in the rain.

"The Cleveland never faltered," said Schoolfield. "I went through two rivers with water up to the tank, but in each case the motor started right off on the first push. There were twelve miles of low gear work in one section, but the motor did not overheat."

THROUGH MUD AND WATER IN SOUTH AUSTRALIA

Scenes Taken on a Business Trip Through New South Wales

MELBOURNE, Australia.—Jack Gunn, representing the Rhodes Motor Cycle Co., Pty., Ltd., Indian agent in this city, makes a trip each Winter to sign up agents, etc., in New South Wales. On the last occasion he took Mrs. Gunn in the sidecar, and the photographs below show the conditions of road encountered on this tour.

At the left is Mrs. Gunn feeding sheep dogs near a back-country grazing ground. Next to right is the Gunn combination on a main road, which is practically a trail across the prairie. In the right hand upper picture is a sample of the kind of highway the Gunns had for mile after mile—black mud. Automobiles cannot get through during the Winter, so the trip was a fine boost for the motorcycle and sidecar. Below is a flock of sheep which blocked the road on the way to the river to drink.

PLANS PERFECTED FOR PIKES PEAK CLIMB

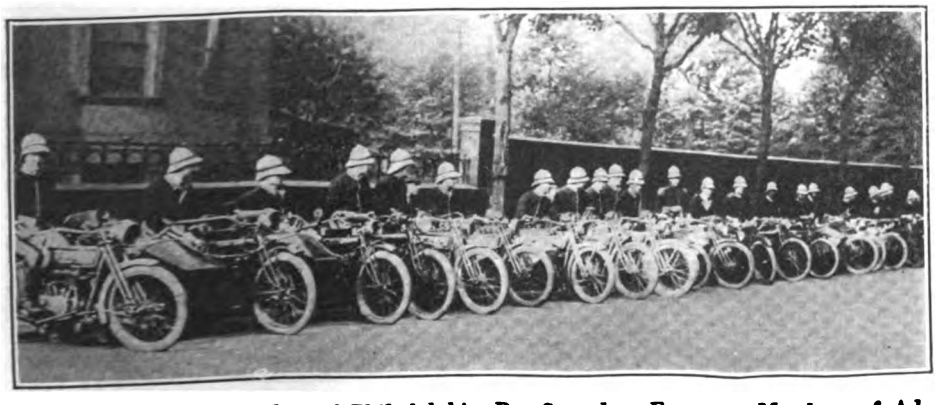
Factory Celebrities and Local Talent Will Make Today's Event One of Moment—Denver Race Meet Will Follow

COLORADO SPRINGS, Colo., Aug. 10.—"Der Tag" has come for the motorcycle enthusiasts hereabouts! It's the day of the big hill climb up Pikes Peak; 15 miles from Manitou to the snow-capped pinnacle extending 14,000 feet and better above the sea level. The contest is being promoted by the Pikes Peak Auto Highway Co. of Colorado Springs, which has recently brought the old carriage trail up Colorado's most famous peak in ship shape condition for automobile traffic.

That the event is the most important hill climb in this or any other country can be gathered from the fact that several of the motorcycle factories have entered their most famous riders for the contest. From the Harley-Davidson factory in Milwaukee are entered a Floyd Clymer, who broke the 100-mile record at Dodge City and who has cleaned up a few things since, and Otto Walker, who sprung into prominence at Venice last year and proved that he has not slipped by taking the La Grande Speedway contest a week or so ago. Harley-Davidson riders of lesser fame who have been entered are Emmet Knight, Colorado Springs; Frank Kunze, James Johnson and Hop Lytle all local riders. Representing the Indian Wigwam on the entry list are Don Johns, whose name is a by-word in motorcycle circles the country over; Paul J. "Spec" Warner, of Ellsworth, Kans., who took fourth place in the Dodge City contest, and Glen Boyd of Denver. The Excelsior factory, it is understood, has entered Bob Perry and Glen Stokes and the chances are that Lorenzo Boido also will face the starter's gun.

Topping off the hill climb which occurs on Thursday is a big race meet on the Overland Park Track, Denver, which is to be promoted by the *Denver News*. The race meet comprises six events of which the feature is a 50-mile open with a first prize of $150.00, second $100.00, and third $75.00. The profits from this meet will be donated to charity by the *News*, and it is expected the contest will draw at least 10,000 spectators.

ACTIVE AUXILIARY AT AD. MEN'S GATHERING



These Uniformed Riders of Philadelphia, Pa., Served as Escort to Members of Advertising Body in Recent Convention Parade in That City

TEN EVENTS FOR LABOR DAY MEET AT SHREVEPORT

SHREVEPORT, La., August 4.—Entry blanks have been issued for the Labor Day race meet to be held here under the auspices of the Central Trades and Labor Council, September 4. There will be ten events, five for Class A and five for Class B riders. The entry fee is 50 cents for the Class B events and $1 for each event in Class A.

The Class B events are: Five mile, flying start, stock, $15; 10-mile, flying start, $25; one mile time trial, flying start, $10; 10-mile stripped stock, flying start, $35; one mile, single cylinder, $10.

Class A events are: Ten mile free-for-all, stripped stock, $75; 5-mile, free-for-all, stripped stock, flying start, $50; one mile time trial, flying start, $25; 15-mile, free-for-all, flying start, $100; 25-mile free-for-all, flying start, $150. No entry fees for time trials.

Entries close September 3, at 12 p. m. Post entries double fee. Application should be made to F. L. Zimmerman, Jr., 1340 Oakland street, Shreveport.

"DELEGATE BADGES" AS BUSINESS PROMOTERS

Harley-Davidson Folk Present Them Free to R. F. D. Men Attending Conventions in the Various States

MILWAUKEE, Wis., July 28.—By way of keeping in touch with the R. F. D. field, which, by the way, it believes is the most important one, the Harley-Davidson Motor Co. has gotten out a neat little "Delegate Badge" which it is presenting free of charge to various rural letter carriers associations in the different states of the Union at the time of their annual conventions. In this connection, the Harley-Davidson folk feel that the carriers attending these conventions are the live wires and incidentally are the ones they want to interest in motorcycles as the proper conveyance for them to use in their work. The badge is intended primarily to make the carriers think not simply of the motorcycle, but when that vehicle is mentioned, but to think "Harley-Davidson," and undoubtedly it will go far toward bringing about this happy result.

In connection with R. F. D. matters it will be remembered that just about a year ago, Postmaster General Burleson ruled all motorcycles out of the R. F. D. service, but later modified the order to include motorcycles with side vans of suitable construction. This happy result was brought about through the intermediary of the Motorcycle Manufacturers' Association, and while it practically gave the men a free hand to make use of the side van combinations, it left many in doubt as to how long the use of even this type of machine would be permitted. However, the atmosphere has been somewhat cleared by the following proviso inserted in the new appropriation bill from the post office department, which passed Congress recently:

"Provided further that carriers in rural mail delivery service shall furnish and maintain at their own expense all necessary vehicle equipment for prompt handling of the mail, and provided further that nothing herein shall be construed, and no order shall be issued to prevent the use of motor vehicles on horse-drawn vehicle routes."

REPUBLIC RUBBER TO HAVE CUBAN AGENCY

YOUNGSTOWN, O.—Manager F. V. Springer, of the export department of the Republic Rubber Co., announces that arrangements have now been completed by which Republic tires are to be sold in Havana, Cuba, where general business conditions are reported to be excellent. The company is now employing 1,600 men, as compared with a maximum of 1,300 before the April shutdown, and all departments are working 24 hours a day, with new records in output. The company has made shipments during the current year to date to twenty-two different countries, while domestic business is very heavy.

DAYTON MEN TO HOLD ANNUAL PICNIC ON AUG. 12

DAYTON, O.—The annual outing of the employes of the Davis Sewing Machine Company, maker of Dayton motorcycles and motor bicycles, will be held on August 12 at Kilkare Park. It is expected that the outing will be the largest of the season. Over 3,000 are expected to attend.

The company has put up $500 in prizes and awards for the various contests on the program, besides furnishing refreshments free of charge. The feature of the picnic will be a baseball game between the Davis and Delco teams. A bicycle race is also on the list.

SWINEHART AT FACTORY

B. C. SWINEHART, for the past three years manager of the Philadelphia, Pa., branch of the Republic Rubber Co., has been recalled to the main offices at Youngstown, O., to take charge of solid tire sales. H. D. Worthington, assistant manager at Philadelphia, succeeds as manager.

OVER-INFLATION SHORTENS TIRE LIFE

More Injury Is Done to Pneumatics by Pumping Too Hard Than by Riding Them Too Soft—Experience Shows That Because Hard Tires Do Not Absorb Road Shocks They Undergo Special Strain.

By GEORGE M. JOHNSON

WHAT is the commonest cause of unsatisfactory tire service, according to all experts? The answer is easy. "Pump your tires up to the pressure we recommend," say they, "and keep the good work up. That will reduce to a minimum the possibility of rim cutting, stone bruises, etc., and add greatly to the life of the tires."

The usual pressure recommended for three inch tires, such as all our big twins of today carry, is about fifty-five pounds.

Over-Inflation Injures

Now I do not profess to be a tire expert, but I have my own ideas as to what constitutes proper inflation. And here I want to make what may be a startling statement, which I can furthermore back up by good and sufficient proof—Motorcycle tires are very often injured by *over* inflation—perhaps more often than by under inflation; and any motorcycle tire with a pressure of fifty to sixty pounds is decidedly over inflated.

This has no reference to tires used for races, nor do I question that a very hard tire may be more nearly puncture proof and cut proof than a soft one. But I do maintain, and very strongly, that a relatively soft tire will stand the grind of far more miles of road than will the rock hard one.

Proving the Statement

Now for the proof. Not long ago I became acquainted with a man who had just bought a sidecar outfit. It was equipped with three inch tires of a standard make—to my mind one of the best, if not actually the best on the market. I had a similar tire on the rear wheel of my motorcycle, of the same make as his, but an older model. I also use a sidecar.

Two months after his purchase of this machine he was driving past my place and stopped for a chat. I took occassion to notice his tires and was greatly surprised to see that the rear one was worn down to the fabric in a number of places. The sidecar tire was also unduly worn, though the front was still in excellent condition. His mileage was well under the thousand mark.

Couldn't Account for It

The owner of the outfit had noted the rapid wear of his tires with some alarm, being utterly unable to account for it.

"I have a gauge," he said, "and I've been very careful to keep those tires fully inflated."

"What do you call fully inflated?" I asked.

"Fifty-five pounds. That is what the company recommends. I don't think I've ever let them get below forty-five pounds."

"I've a tire I'd like you to take a look at," was my answer, and I led the way to my small garage. I had just taken the tire from the rear wheel, because of a cut in the side, where I had tried conclusions with an ex-beer bottle.

"Now, aside from that one cut, which tire is in better condition—this one or yours?" I asked.

"This one, of course," he answered.

A Clear Case

It was a clear case. My tire had not worn to the fabric or anywhere near it, in a single place. Then I got impressive.

"That tire," I said, "has covered over 3,700 miles, or practically four times as far as yours. It has been in use nearly five times as long, and had a lot of hard service over roads full of jagged chunks of ice during the winter. All through its life it has been driven over worse roads than yours, and has been driven much harder."

This chap I was talking with is really a very careful and conservative driver; he never slips the wheel in starting up or applying the brake.

"Now," I went on, "comes the matter of pressure. Your tires have never been under forty-five, usually over. Mine have never been over thirty-five, usually under; probably twenty-five pounds or even less most of the time.

For a minute that staggered him; apparently I had shattered his faith in the belief that full inflation was a cure-all for every form of tire trouble.

"How do you account for the difference in wear?" he asked.

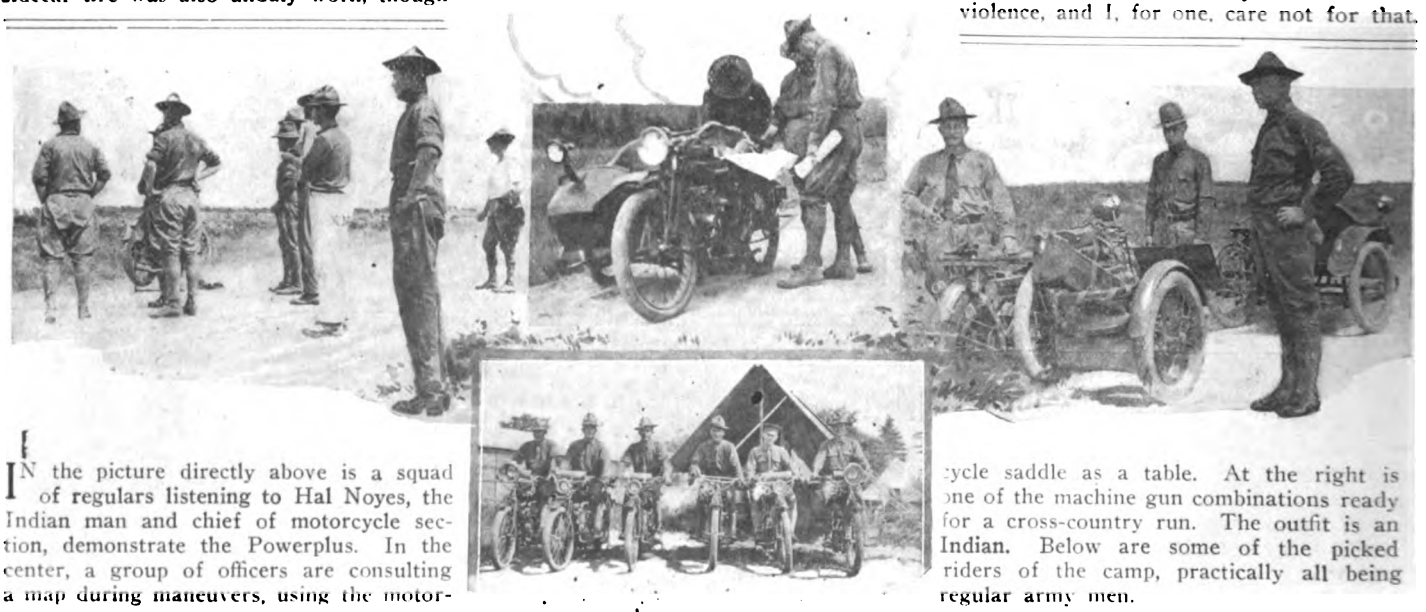
"My theory is this: if the tire is very hard, it won't flatten a particle under load, and the result is that a relatively small surface is exposed to wear. That means more rapid wear, of course, for it is self evident that a given amount of grinding will produce a more rapid effect on a narrow surface than on one twice as wide. If the tire is pumped soft enough to flatten *moderately*—not excessively, for in that case one will certainly suffer from under inflation—the wear is distributed over more surface and the time when the fabric is exposed to view is postponed to the future. After the fabric appears, the life of a tire is short, for though the fabric makes up the *strength* of a tire, it has but a fraction of the *wearing power* of the rubber."

Converted to Theory

The upshot of our discussion was that I won a convert to my theory of tire inflation, to the extent, at least, that he cut down his pressure to thirty-five pounds. I don't know what the tire people would say to this idea and I don't care. Eight seasons of motorcycle riding have convinced me.

But there is still another argument against converting a pneumatic tire into the equivalent of the solid rubber article. A motorcycle tire inflated to fifty-five pounds has a mighty little shock absorbing power as far as the human body is concerned. The bumps of the road are transmitted to the spine with practically undiminished violence, and I, for one, care not for that.

MOTORCYCLE RECRUITS AT PLATTSBURG



IN the picture directly above is a squad of regulars listening to Hal Noyes, the Indian man and chief of motorcycle section, demonstrate the Powerplus. In the center, a group of officers are consulting a map during maneuvers, using the motorcycle saddle as a table. At the right is one of the machine gun combinations ready for a cross-country run. The outfit is an Indian. Below are some of the picked riders of the camp, practically all being regular army men.

The trailer has two wheels and couples to the rear of the motorcycle. It has a capacity for two stretchers. Photo was taken in front of Rhodes Motor Cycle Co., Indian agent in Melbourne.

The picture at the right shows the establishment of Milledge Brothers, Ltd., Indian representatives at Sidney, N. S. W. This company is one of the most progressive and successful in the Commonwealth, and also one of the pioneer firms. This is the brothers' first year as Indian agent, and has already turned out to be a fine one.

The group in the doorway consists of Fred Paape, principal salesman; President Milledge and George Lloyd, from left to right.

HOW A CLEVELAND CONVERT WAS WON

Two Trials on the Lightweight Over Some Rough Going Make A. L. Marple a Cleveland Adherent for Life

CLEVELAND, Ohio, August 7.—It took just two trials to convince A. L. Marple of Cumberland, Md., that the lightweight, when it comes to rough country work has an even break with the heavy machine if, in fact, it has not a shade the best of it. Marple caught an eye-full of the Cleveland two-stroke at the last Chicago show and decided that he would give it a tryout. It was in April that he gave it his first test. He went to the Cleveland factory to get his machine with the idea of riding it back to Cumberland but inquiry led him to believe that the roads, if not actually impassible, were so well clotted up with mud and water-holes, incidental to two weeks' rain fall, as to make the trip a precarious one.

Off for the Run

Against the best advice of automobilists and motorcycle dealers who came in contact with Marple, he started out on April 28 on this mad mud lark on a strange machine. Before he had gone 15 miles, however, he became well acquainted with the mount and as his acquaintance ripened so did his respect for the little machine. He came through miles and miles of mud, through flooded ditches and over running creeks, carrying the machine at times but riding it most of the time, and reached Cumberland in good condition. His total consumption of gas for the 300 miles was 4¼ gallons and the only damage to the machine from the hard going was a slightly damaged muffler, which cost only 35 cents for repairs.

His second trip was even a longer and more trying one, extending 1,300 miles through various states in the east. His troubles during this latest trip were practically nil and his running almost negligible and so pleased was Marple with the lightweight that he has become a real Cleveland convert and has forsaken the heavyweight for good and all.

TELEPHONE MAN BUYS TWO-STROKE INDIAN

COVINA, Cal.—F. C. Clutterbuck, local Indian agent, has just sold H. Bixby, "trouble shooter" for the Home Telephone Co., a three-speed Indian Featherweight. The little two-stroker replaces a 1912 two-speed single which Bixby has been using for four years, covering on it 90,000 miles.

Clutterbuck and the telephone folks think that the record of the 1912 "one lunger" is most creditable, as the mount had but one overhauling since it was purchased.

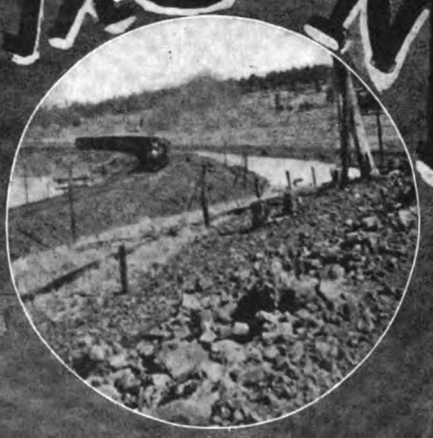
The Motorcycle



More Data Concerning the Two-Wheelers in Coconi

WHEN Glenn and I started on the Motorcycle Fire Patrol in the Coconino National Forest, I think the supervisor looked upon it as a rather doubtful experiment, but I do not think he views it in that light now. Almost without exception, every objection that could possibly be raised against the use of the motorcycle in this work has been refuted. Where there is anything resembling a good road, the motorcycle is, beyond dispute, the best means for locating and reaching a forest fire.

The professional grouches said, "Now, just tell me how they can see a durn thing on them machines! It's all y' ken do to stay on 'em; and now they're puttin 'em on to spot forest fires! Shows how much sense these government fellers have got." The ranchers said: "Government's wastin' its money again! Got fellers on these motosikle contraptions ter git forest fires. They'll be broke down all the time when they ain't joy ridin'!"

But they were both wrong. Day after day we covered our routes, thirty miles and back, reporting by telephone at the different stations placed for the purpose. Each call was made on schedule time—never a slip. The supervisor knew where we were each minute of the day, and just when we would reach the next telephone. If a fire was reported by a lookout, being too far off for us to see, it was never more than half an hour before we were receiving news of its location from the next telephone station.

The photos on this page s Forest Rangers at a Lookout St the Santa Fe express with whic motorcyclists sometimes enjoy race; special cabinet in which fighting tools are kept; pa "chuck" and water to the looko Eldon Mt.; a steer's skull as a h bar decoration; one of the moto scouts—saddlebag contains take- shovel and a canteen.

a Fire-Fighter

ılts Obtained With Power National Forest Service

But the great majority of fires in our end of the forest occurred either along the main traveled road, or so near that they were easily discovered by us.

I have often heard the question: "What starts the fires, anyhow?" The answer depends somewhat upon the nature of the country. On the Coconino, most of the fires are started by (1) lightning; (2) campers and tourists and sheep herders; (3) logging engines. There are many fires, of course, where it is almost impossible to tell just how they did start.

Another point on which the general public seems to be in darkness is our method of fighting the fires. Here, again, the character of the country, and the nature of the fire itself, to a large extent determine the course followed. Water is never used to extinguish a forest fire. In yellow pine timber, which composes the forests of the Coconino, the fire does not leap from tree to tree, but spreads along the ground. Where there is loose soil available, shovelfuls of dirt are dashed on the fire, smothering it around the adge. In rocky country, where soil is scarce, the usual procedure is to beat out the fire with either a shovel or a branch.

But the usefulness of the motorcycle does not stop with finding fires. It is an all 'round messenger as well. To cite one instance: Last Fourth of July (which, by the way, is always a bad day for fires), at

(Continued on page 50)

eginning at the top: Sighting fire lookout station—the bearing and nce of the fire are telephoned to central office which sends out the ighters; two of the rangers at camp; a bad fire in deep pine les; the Harley-Davidson machine ographed along the beat covered e riders; hitting top speed in nse to an alarm of fire; there are eed laws for fire-fighters.

PUTTING A PUNCH IN CLUB INTEREST

Some Motorcycle Organizations Do It, While Others Stand Pat or Lose Ground; What's the Answer? The Motorcycle Is Gaining Daily—Why Not the Clubs?

By PATHFINDER

IS there something wrong with the motorcycle club as we know it today, and if so, what's the trouble? That's a question that is occupying the minds of not a few motorcycle boosters, and if some of the present unsatisfactory conditions could be overcome the whole motorcycle game would profit. Many riders and club members may have more interesting views on the subject than the writer, but in the hope of starting a discussion that will "help some" I am going to take up one or two points.

There seems to be a feeling that too much of the club spirit in this country centers in a group of enthusiastic motorcyclists who comprise the officer body of the motorcycle organization generally. Is that opinion justified? In a great many cities, yes. We can't dodge the fact that there are too many motorcycle clubs where the spirit is represented by the officers alone.

A few days ago, the president of a prominent Middle Western club was asked what seemed to be the trouble with his organization. It is not doing things this year with the same vim that was manifested last year.

"There must be something wrong with the motorcycle game," was the surprising reply of the club president, "for we can't seem to keep up the interest of our members."

A Poor Explanation

Now, wasn't that a shameful excuse for inactivity in view of the conditions in the industry that surely belie the statement? With most factories working at top speed to take care of the demand for motorcycles and sidecars, there is plenty of solid, practical evidence that the motorcycle in America is in reality only striking its best pace now. With one factory three weeks to a month behind on deliveries of motorcycles, and a month and a half back on sidecar deliveries, it is the height of nonsense to talk about a slump in general motorcycle interest.

What if a few veterans do give up the motorcycle? That's likely to happen in any industry. What is that slight loss, compared with the thousands of new devotees that every week are being added to the ranks of motorcyclists. There is no need to state that the sport is now drawing a new and better class of riders. The records of the factories and the dealers show it. Some of the veterans who are giving up the power two-wheeler have long since ceased to be real boosters anyway. We should not worry about them when we have the thousands of fresh recruits to think of.

But to get back to the hard facts concerning lack of club interest, we must admit that the concentration of all responsibility in the officers is causing some of the trouble. There is very little "doing" in many clubs, simply because the officers have to do all the planning, and all the actual work, while the members sit around and take things easy.

Members Need Encouragement

On the other hand, there are clubs in which the general membership would be glad to jump in and help if the officers did not make a point of grabbing off all the limelight. You've seen officers who worked on that basis. Of course. Well, that's all wrong, too. The officers are naturally the directors of anything that may be started by the club, but they should call upon the other members for a discussion of all matters pertaining to the club's welfare, and the whole working plan should be carried through on a broad basis of co-operation, equality and good fellowship.

Most times it will be found that the other fellows in the club are only too willing to be commissioned to accomplish certain things, but the constant "do nothing" life at the club where a small faction always can be relied upon to do all the work gradually turns the man who is willing to do something into a mere passive member. After a while he will overlook the meeting dates and finally he will not be seen at the rooms at all.

President Coffman always makes it a point to say in his talks on F. A. M. clubs that "you get out of the F. A. M. what you put into it," and that is where he hits the nail right on its head. But it requires co-operation on the part of the officers of the clubs to put Mr. Coffman's theory into working order. It's a cinch that the fellows who are enjoying the average club membership most are those who have some definite part of the club's work to do, and are made to feel responsible for its successful accomplishment to the credit of themselves as well as the club.

It is well therefore, Mr. Club President, to give each of your members something to do—some definite task to perform. It will keep him interested, and convince him that he really has a hand in the making of the organization. Don't do all the talking at meetings yourself. Give every member a chance to air his opinions; in fact, it is your duty to insist that he air them. No rider can be a good club member unless he jumps in and helps to thresh out the club problems. Show him that you need his opinions, his suggestions, his co-operation.

Work for the Secretary

In addition, see that your secretary keeps the trade press posted concerning club doings. Whenever anything of interest happens, have the secretary send a letter to the Editor of **Motor Cycle Illustrated** and when the item appears in print it will help to make the club members feel that they belong to a body that amounts to something.

If you are facing a club problem of some kind, write us about it. Perhaps we can give you some ideas from our actual experience in organizing and maintaining motorcycle clubs. At any rate, we'll be glad to hear from you, and mighty glad to assist you if we can. This journal wants your support and your friendship—and it will meet you more than halfway at all times.

How'je Do It?

SOME clubs are having difficulty in keeping up the interest of their members, and if you have succeeded in making yours a live, up-to-date organization you can doubtless offer some very valuable suggestions.

If you will send them in, Motor Cycle Illustrated will be glad to print them.

What are the common drawbacks to club interest and enthusiasm, and how did you overcome them? You will be helping a lot of good fellows to get more out of life, and out of their motorcycles, if you will tell something of your methods.

What has contributed most to the success of your club? What part should the dealer play in pushing club organization in his town? How much money should he spend in propagating club spirit? What part does the location of the clubhouse play in the ultimate success of the organization? How about delinquent dues?

In the Commercial Field

FACTS NEEDED TO LAND COMMERCIAL SALES

E. J. Mueller, of Harley-Davidson Staff, Says Enthusiasm Alone Will Not Help Much With Utility Vehicles

"SELLING motorcycles to commercial prospects is so much the antithesis of selling the pleasure two-wheeler," says E. J. Mueller, assistant sales-manager of the Harley-Davidson Motor Co., "that the average dealer who has made a success along pleasure lines must needs begin all over again when it comes to handling the business vehicle in the way it should be handled.

"The pleasure motorcycle is primarily sold on enthusiasm. The purchaser is either enthusiastic for the vehicle because some friend of his has been strong for it, and finds it not wanting in those qualities which go to make up a good machine, or else because the dealer has painted so complete a word picture of the machine's good points and of the pleasures of motorcycling in general, that the prospect's enthusiasm reaches no bounds and the deal is closed, provided the prospect really intends to purchase. The cold, hard facts of the case—the running costs, the garage costs, depreciation, amortization and insurance never enter into the case.

"Not so, however, with the commercial vehicle. In nine cases out of every ten the man who is looking for a delivery vehicle has had experience with other forms of vehicles, and knows just what these fixed charges amount to. And the dealer not only has to show him that these fixed charges are less in the case of the motorcycle than they are with any other type of vehicle which the prospect may have used, but he also must make the customer believe that the motorcycle is fully capable of doing the prospect's work in a most satisfactory manner.

"In this connection it might be well to digress just a moment to warn the dealer against selling a commercial vehicle, which is to be used to do work of a class that can best be handled by either a horse and wagon or motor truck. There are limits, and they are quite definite and well defined, beyond which the motorcycle with side van is a good proposition, and to sell beyond this limit is to give the vehicle a black eye from which it is hard to recover. At the same time I should like to make it most emphatic that within these limits there is a fast and ever-growing territory which has not even been scratched so that for the present at least there is not the slightest necessity for the dealer to overshoot this boundry.

"The commercial motorcycle must be sold on facts and facts alone. Enthusiasm, save in very rare instances, does not enter the case. The purchaser must be shown first a saving in money; second, the ability of the vehicle to do his work; third, absolute dependability and reliability. The motorcycle dealer who keeps right in touch with his factory is in a position to show all three of these points, to know legitimate prospects, and if he keeps himself with the literature and facts and figures as presented by the factory advertising department, coupled with a bit of real experience with his own machines and machines which he has probably sold for utility purposes, the average motorcycle dealer should be able to meet a commercial prospect with the assurance of landing the sale if there is any possibility of making the sale at all.

SIGN PAINTER FINDS MOTORCYCLE INVALUABLE

F. B. Power, of Augusta, Ky., Who Is Covering Ohio Valley Painting Tire Signs. On His Indian He Has Ridden Many Miles of Roads and Finished Numerous Displays for the Firestone Tire & Rubber Company

MADE 1,000-MILE TOUR

NEW BRUNSWICK, N. J.—Four New Brunswick motorcyclists, Wesley DeHard, Russell Pharr, Elmer J. Mills and Fred Leach, all members of the Indian Motorcycle Club, have just completed a tour of one thousand miles. In six days they touched the most interesting places of five states, Massachusetts, Connecticut, New York, New Jersey and Pennsylvania.

LABOR DAY MEET FOR BALTIMORE

BALTIMORE, Md.—At a recent special meeting of the Maryland Motorcycle Club, at which all the local dealers were present, it was voted to hold a big race meet at the Gentlemen's Driving Park on Labor Day. An attractive prize list is being made up, and the dealers have opened negotiations with the various factories for speed talent.

8 Indians, with Perf ALL Consistency Pr Kansas Short Gras

Indian Powerplus is the *best stock motor* ever built—no greater proof is needed for this claim than the consistent performance of Indian Powerpluses in the first Kansas Short Grass Endurance Run, August 5th, and 6th, when Indian made a clean sweep of all prizes offered for Perfect Scores and Highest Consistency Records.

Eight prizes, in solo and side car classes, were offered to machines with Perfect Scores showing Highest Consistency Records. To Indian fell the honor of making a clean sweep of every prize.

The field included all makes. The course was 300 miles, from Ellsworth, Kansas, to Wichita, Kansas, over roads hub-deep in sand and dust, resulting from forty-two days of rainless weather!

The riders were confronted by one of the most obstinate and difficult endurance courses ever laid out—but through it all Powerplus pulled the Indian entries to a well earned victory!

Not only did Powerplus positively prove its claim of being the best stock motor ever built, but the Indian Featherweight gave the most wonderful exhibition of endurance and stability ever credited to a lightweight model of any make!

Ralph Hepburn finished with Perfect Score and Highest Consistency Record in the heavy solo class!

An Indian Featherweight, with Alexander up, made Highest Consistency Record for lightweight class!

"Spec" Warner, with Indian Powerplus and Side Car, was awarded First Prize for Highest Consistency Record in Side Car class!

SAN FRANCISCOANS ENJOY MUIR WOODS RUN

SAN FRANCISCO, Cal.—The San Francisco Motorcycle Club enjoyed a pleasant run to Muir Woods last Sunday, twelve couples taking part in the trip. They took the boat to Sausalito early in the morning, proceeding to Mill Valley and over a picturesque mountain ridge to the destination, a large tract of thick redwood growth, in its natural condition. A basket lunch was eaten in the bottom of the canyon, among the redwoods. The party spent several hours riding or strolling about the wooded mountain paths, returning early in the evening. The total distance is estimated at 55 miles.

A committee was appointed at the last meeting to meet the Misses Van Buren on their arrival, and it is expected that a number of members will greet them on the road between Oakland and Stockton and escort them in to the city, where a special social will be held in their honor.

There was also some discussion of the idea of holding a club race meet at Tanforan track, near this city, some time in August or September, and members are making investigations to see if the track can be secured, and if enough entries can be found to make a meet worth while.

KAUFMAN RESIGNS AS HEAD OF PATERSON M. C.

PATERSON, N. J., Aug. 4.—Wolf Kaufman, president of the Paterson M. C. for the past six months, has sent in his resignation. Louis Weibel was elected president after Kaufman's resignation was voted upon. Weibel started in at once to organize committees for the smoker and dance, which events are to be held in a short time. He will fill Kaufman's unexpired term.

ARRANGING FOR TEN-DAY RUN TO FALLS

PROVIDENCE, R. I., August 7.—John G. Edwards, secretary of the Providence Motorcycle Club, is arranging for a ten days' run to Niagara Falls in September. There has been some enthusiasm shown here over the proposed run and to make it complete about 15 to 20 entries are desired. The trip will be one of ten days, the return being made to this city in time for the automobile and motorcycle races at the Narragansett Speedway on Sept. 16.

INDEPENDENTS HOLD RUN TO GREENWOOD LAKE

NEW YORK.—The Independent M. C., of this city, held a successful run to Greenwood Lake, N. J., on a recent Sunday. The run was all the more pleasing as the participants enjoyed a fine dinner on the way up through the mountains.

At an early date, the club will hold a run to Poughkeepsie and return. All riders in the metropolitan district are invited. As arrangements are made beforehand for dinners, those desiring to participate should notify Fred Wrose, road captain, care the club at 306 West 133rd street.

PREPARING FOR BIG RUN TO VENICE, AUGUST 27

LOS ANGELES, Cal.—Members of the Los Angeles M. C. are making active preparation for the annual run to Venice, slated for August 27. It is expected that this run will be the biggest ever held by the club. Special rates will be given to all amusements, except dancing, which will be free.

Fred Ludlo, who won the recent endurance run given by the club, by bringing home the only perfect score, was elected to membership.

M. Beard, vice-president of the club who recently resigned, has been succeeded by Bill Kuhn.

JULY MEMBERSHIPS SHOW 242 RENEWALS

WESTBORO, Mass.—Secretary G. B. Gibson, in his July report on the memberships in the F. A. M., shows that 242 renewed membership, 92 unaffiliated became members, while 183 affiliated with the Federation. Pennsylvania led with 54 affiliated, 6 unaffiliated and 21 renewals. Massachusetts came second with 27 affiliated, 18 unaffiliated and 38 renewals. Rhode Island and Ohio tie for third place with totals of 35 in the three designations.

New York has 3 affiliated, 13 unaffiliated and 33 renewals. Illinois had 5 renewals and one each in the other designations. One renewal was the total from Washington, Oregon, North Carolina, South Dakota and Nebraska.

"HELPING HAND" BOOK IN ITALIAN ARMY

SECRETARY-TREASURER G. B. Gibson, of the F. A. M., has just received a letter from a former Nebraska member, Edward Paltan, now serving with the Italian despatch riders in the Trentino. Paltan writes that he took his "Helping Hand" book with him and on showing it to a commanding officer, was instructed to translate it into Italian. When the book was translated and printed, copies were distributed to every member of the various Italian motorcycle bodies.

CLUB SECRETARY WINNER OF MEMBERSHIP PRIZE

WESTBORO, Mass.—Secretary Gibson announces that Clifford Gibbs, of 1239 Warnock street, Philadelphia, Pa., has been awarded the prize for the greatest number of members recommended during the week of July 23-29. Gibbs is secretary of the Eagle M. C., which organization has just affiliated as Club No. 606 with the Federation.

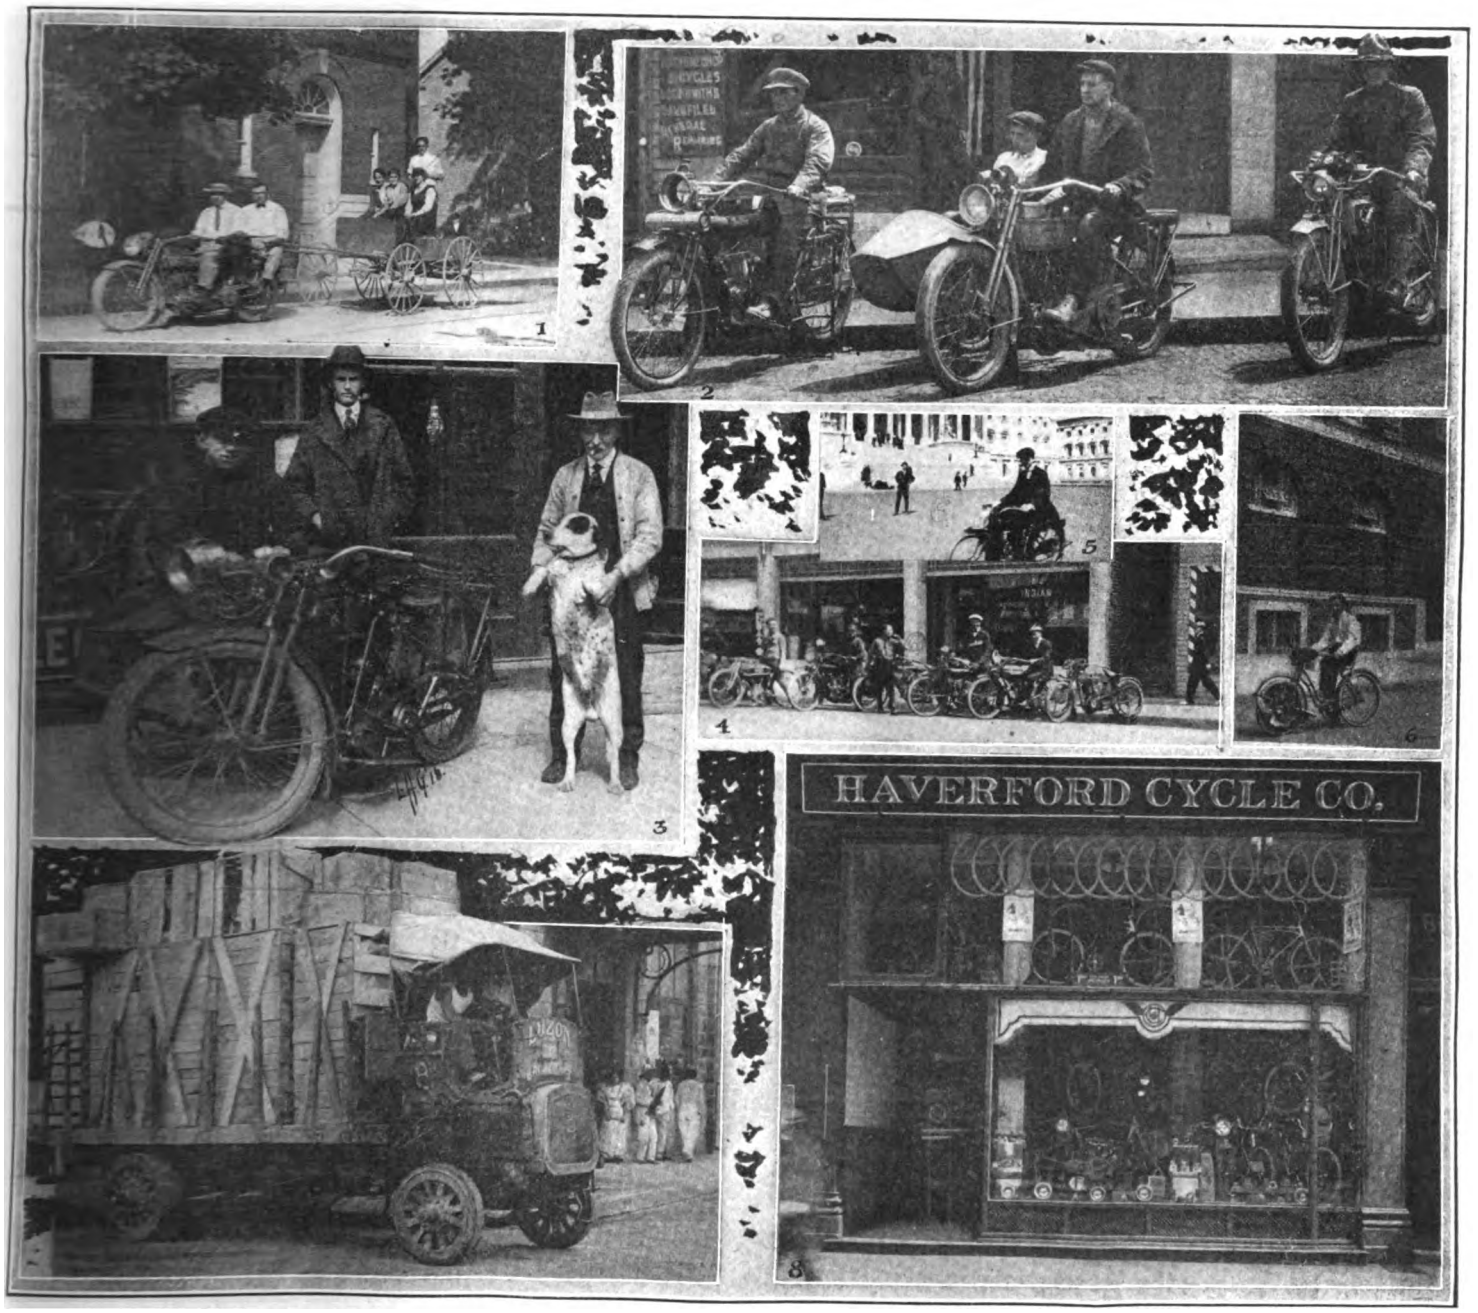
DEPICTING DEALERS' ACTIVITIES IN MANY QUARTERS



1. How H. O. Young, Harley-Davidson man in York, Pa., shows pulling power of twin models; 2, E. W. Gaylord, Harley-Davidson agent in Geneva, N. Y. (driving sidecar), with Al. Smith on Indian and Frank Pike on Excelsior. Picture was taken just before Pike left for Mexico with his regiment; 3. Pop Anderson, who handles Reading Standard in Albany, N. Y., with two patrons; 4, Indian agency of Charles Moist at Long Beach, Cal.; 5, Dick O'Brien, demonstrator for Weishaar on Indian Featherweight in Washington, D. C.; 6, Young Dayton motor bicycle rider in Cleveland, O.; 7, truckload of Harley-Davidsons at Squires-Bingham Co., agents in Manila, P. I.; 8, Cleveland Haverford branch.

MACHINE GUN CO. READY TO ENTRAIN FOR TEXAS

NEW YORK, August 9.—Packs have been packed, equipment overhauled and inspected in the final section of the Machine Gun Company, 71st New York Infantry, at the armory, Park avenue and 33rd street, and it only remains for tomorrow to bring the order to entrain. Sergeant Lou Guterman, of the Machine Gun Co., reports that all the members of this organization are only too eager to get to the border. This week, Guterman has been putting the finishing touches to his batch of riders in the company, and all hands are ready both as riders and as infantrymen.

Sergeant Guterman took a trip to Atlantic City over Sunday and returned Monday afternoon. He went to meet some of the Reading Standard folks at the St. Charles hotel.

DERKUM TO MANAGE VANDERBILT CUP RACE

LOS ANGELES, Cal.—Paul J. C. Derkum, Indian veteran rider and manager of numerous race meets in both the motorcycle and automobile industries, is slated to manage the Vanderbilt Cup Race at Santa Monica, November 16-18. This race is the leading American automobile classic of the year, and Paul attributes his appointment to the managership entirely to his motorcycle experience.

In addition to the big automobile race, Derkum will manage the Kern County Fair Association annual fair at Bakersfield, on October 24-28. At this fair, there will be a series of motorcycle events. Derkum covers Southern California for the Indian.

CANDIDATE USES MOTORCYCLE

CHICAGO, Ill.—Albert J. Flynn, a candidate for the office of State auditor, is now on a three weeks' tour of the down-State counties on his motorcycle. He is carrying a complete camping outfit. Mr. Flynn is using his machine for stumping the State in his behalf.

Catching the Public Eye

HERE'S A HANDY CYCLE SHOW WINDOW BACKGROUND

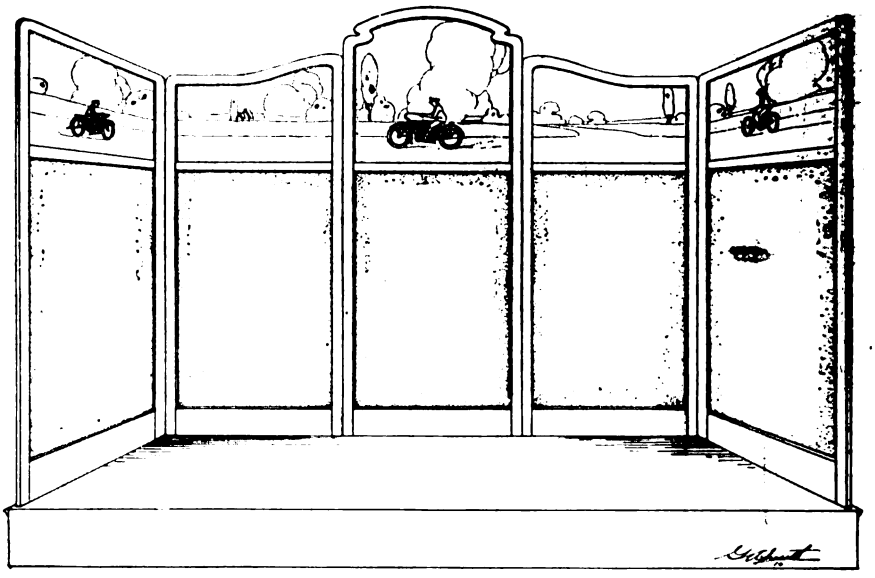
Interchangeable Design Fits Well Into a Variety of Different Displays

By G. A. SMITH, in Charge of U. S. Tire Window Service

A MISTAKE most noticeable in a great many motorcycle and bicycle shops is the lack of permanent window backgrounds. The tendency in this case is to show the machines on the floor of the store several feet back of the glass. However, in some cases a low platform is provided. The main reason for adopting this method of display is, I believe, brought about through the dealer forming an opinion that if a background was provided the daylight on the interior of the store would be cut off. Then again on the other hand a good many dealers seem to think that the whole inteior of the store and their stock must be visible to the passerby. The first opinion is a good one, providing a background was placed therein that would cut off the light. However, this is not true in this case as there are numerous ways of providing backgrounds of a permanent or temporary nature that will serve the purpose of showing the merchandise off to the best advantage, yet they do not cut off the light on the inside of the store.

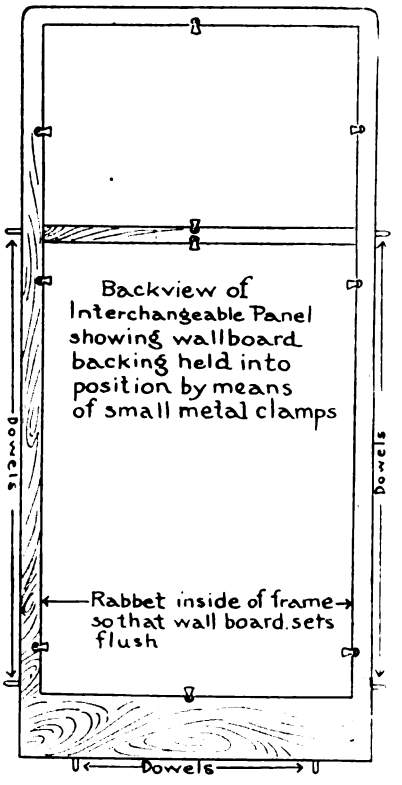
On the other hand the second objection is a very weak one as I would sooner display several machines and the necessary accessories in connection with the proper surroundings in the shape of a background than fifty machines placed in a row down the entire length of the store. Yet this is just what a good many dealers are doing today. The reason for this vital mistake is more or less due to the dealers not being familiar with display problems. He probably would like to do something to create better displays of his goods, but does not know just exactly how to go about it. I have just completed a canvass of a route about the city visiting dealers in this line and find that this is true in many respects.

As I proceed with these articles I will try to solve these obstacles for you in the simplest and most inexpensive way. We will now take up the construction of the semi-permanent interchangeable background herewith illustrated. The first thing to receive consideration is the height of the glass above floor of store. Next construct a platform about six or seven feet in depth and the proper width of window. This is to be made from ordinary lumber attached to cross sections and side pieces all the way around, the upper edge to be finished off with a heavy moulding. See that it is substantially constructed as it will have to bear a good deal of weight. After this has been taken care of construct the frame work of the panels from ⅞-inch lumber which may be placed in position and held together by means of dowels. Two and a half inches is sufficient



Background Which Lends an Air of Completion to Any Display

width for all portions of the frame work with the exception of the base board which may be about six inches in height. The backs of all panels consisting of top and



Details of Panel Construction

bottom sections should be rabbeted one quarter of an inch in depth and one inch in width. Panels sawed out from wall board the proper size are then placed therein. They are held in position by means of small metal clamps as shown in our second sketch. This also shows position of dowels for connecting panels to each other, also dowels at bottom of hold same into position on top of platform.

This scheme in general most forcibly illustrates a background that contains many good qualities. Some of them which already have been mentioned. However, I have several more that I will herewith explain.

You probably have noticed where backgrounds of a permanent nature are used that it is a very difficult problem to make any change in them whatsoever to relieve the noticeable monotony of same, unless a temporary setting of some sort is resorted to.

When the semi-permanent interchangeable background is used, this is a most simple problem to solve. It can be accomplished in a very few minutes simply by removing the panels and recovering them with some sort of material such as imitation wood grain, marble onyx bark papers of which there is an unlimited number of styles now on the market for this purpose. Then there are such materials as felt, velour, plush, cotton flannel, etc., that may be used to cover these panels. In fact there is no limit to what can be done in this di-

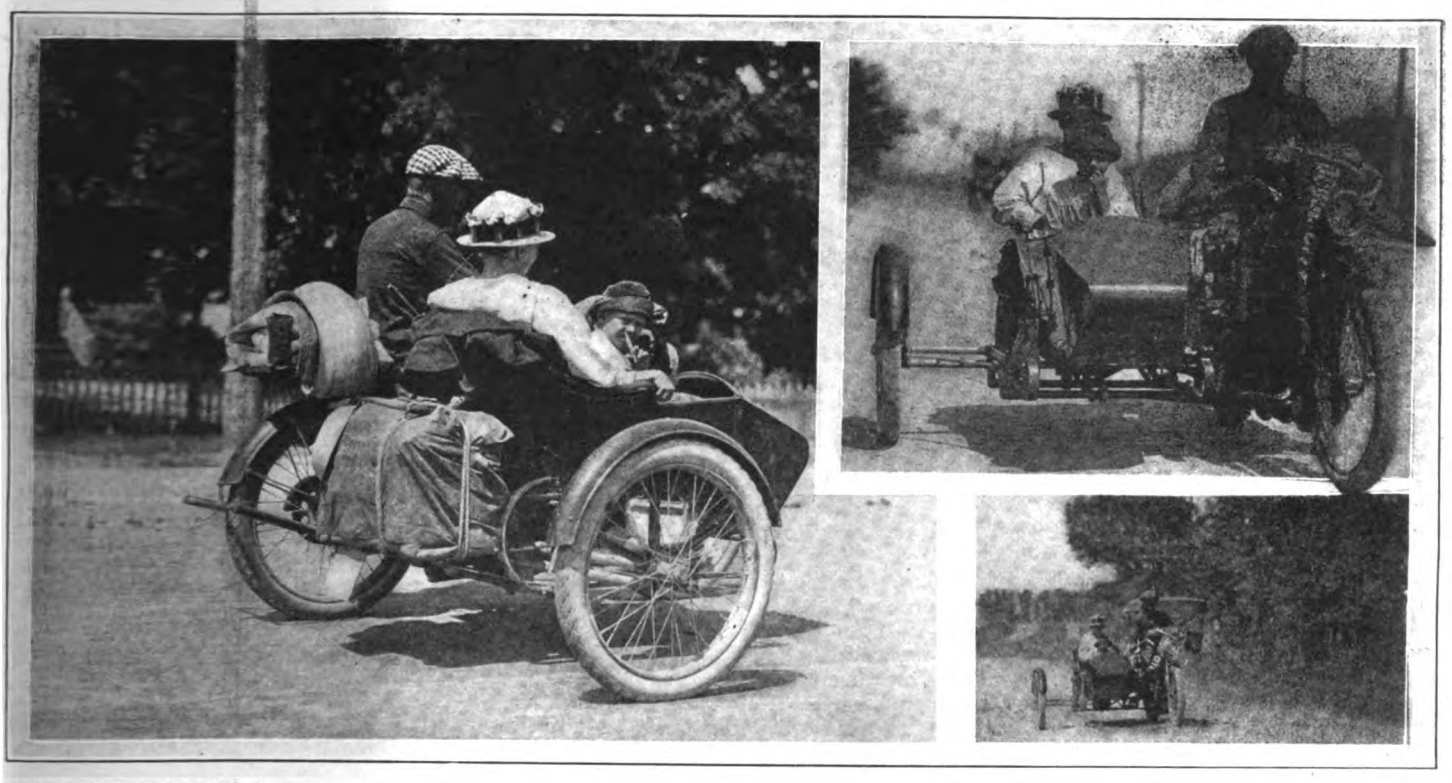
TEXANS COMPLETE 2,000 MILE TRIP WITH POWERPLUS



WICHITA FALLS, Tex.—C. E. Davis, with his wife and son, has just returned from a 2,000-mile motorcycle camping trip over the Colorado to Gulf Highway. An Indian Powerplus sidecar combination, with complete outfit for camping was used, the equipment including a tent, two folding cots, bedding, provisions, waterbag, two guns, an axe and tackle, the total weight being 1,000 pounds with passengers up.

At a point 16½ miles up Pikes Peak and five miles above the timber line, young Davis became ill from the rarefied air and the climb was abandoned at the 13,500 foot mark. For the trip, Davis says that he averaged 50 miles to the gallon. He traveled about 150 miles per day, at a cost per head of $2.

EXEMPLIFYING THE SNAPPY SALES LETTER

INJECTING ginger into a motorcycle sales letter may, perhaps, be the work of an advertising specialist rather than a motorcycle dealer. But that there are at least some dealers who can turn out a drawing letter is shown by the following example, which comes from the Indian Wigwam, at Richmond, Va., of which G. H. Tompkins is head and shoulders:

Dear Sir:

Are you dependent on street-car service, often having to hang to a strap, in going to and coming from your work? Or, probably you live in the down-town congested district in order to be near your work. And, aren't you getting round-shouldered and pale-faced from close confinement to your work and lack of outdoor fresh air?

We have originated a movement in this city to cure these and many other evils. The method we employ is to demonstrate how much zest is added to life by the use of a good, clean, silent and serviceable motorcycle.

How often have you envied the man who rides home in his automobile while you hang to a strap in the chilly or excessively hot and dusty street car, or walk?

A good motorcycle will do wonders for your health; it will straighten you out—brush the "cob-webs" of worry from your brain, put color in your face, make you as hungry as a bear for your supper, put strength in every muscle of your body, open your lungs with the pure fresh air, and make your whole body tingle with renewed life.. It will take you close to nature, furnish delightful Saturday afternoon and Sunday rides and excursions to distant cities. And at such a trifling cost, which we are ready to prove to you.

We are in position to sell motorcycles on the easy-payment plan, if it suits you better to buy that way.. Let us show you how easy to acquire and how pleasant and healthful to use and how inexpensive to maintain. Cheaper than carfare.

You owe it to yourself to come and inquire. We cordially invite you to call at our place of business, at which time we will very gladly show you the many good points of motorcycling and our motorcycle, "The Indian," which holds the world's record for Endurance, Reliability, Economy and Speed. (See facts and figures at our store.)

When may we be favored with the opportunity of laying the whole, simple plan before you? Which will be to our mutual interest.

Yours for health, business and pleasure,
G. H. TOMPKINS,
Motorcycle Sales Dept.

HOW CANADIAN CUSTOMS AFFECT RIDERS

New Arrangement Requires Certificate Freeing Machine From Duty for 30 Days—No Certificates for Commercial Mounts

OTTAWA, Ont.—The legislative path of the motorcyclist has been very smooth for the past two or three months, for the simple reasons that the Federal and Provincial Governments of Canada have almost vied with each other in extending concessions and privileges to the riders of the motor steed. The latest favor granted by the Department of Customs, Ottawa, was contained in a recent order providing for the free entry of motorcyclists into any part of Canada for a period of one month.

Not long ago Hon. J. D. Reid, Minister of Customs, decided to grant a free ten-day privilege to non-resident owners of motorcycles at the request of the Canada Motorcyclists' Association, but with the arrangement of reciprocal recognition of motorcycle licenses between Ontario and some twelve States of the American Union for twenty-one day periods, the Federal Minister apparently decided to make it one better.

The new customs regulations provide that when a non-resident owner of a motorcycle, manufactured abroad, desires to enter Canada he will be required only to secure a certificate from the Collector of Customs at the point of entry. This certificate will be valid for a period of one month and is to be surrendered at the point of departure from the Dominion within the time-limit, otherwise the machine is liable for duty.

The proviso has been made that no motorcycle can be brought into Canada under the free-entry privilege to be used for commercial or business purposes.

British Sport and Trade

By OLD RAMBLER

I HAVE pointed out more than once that American tire manufacturers, whilst mighty enterprising in the erection of big distributing centers over here and in supplying the needs for motor cars, have not been as attentive to the requirements of the motorcycle world. It was therefore particularly interesting to be shown the other day an advance supply of Goodrich motorcycle tires; and I was told that the people at Akron intend to make as big a bid for the motorcycle trade over here as for the bigger auto users. The proposition came near getting a very nasty smack in the eye recently, when an embargo on American tires almost materialized in Britain; but Britishers and Americans are as good friends as ever, so our ports are still open. The Goodrich people have launched out on a profitable sea by tackling the motorcycle market. There's big money in it.

Cheaper Machines Coming

A mammoth surprise has come into the British motorcycle world. One of the leading lightweight motorcycle factories announces a drop of £2 per machine. During the two years of war we have become so habituated to notices from the factories like this, "Please note that on and after such-a-date our goods will be advanced in price 10 per cent," that it came as a shock to learn of a reduction! Well, we live in an age of wonders, of surprise-packets, of eye-openers; and this sort of news is a gem. We are all wondering what will follow.

Some factories that specialize on the production of motorcycle engines are now able to turn out big quantities—evidently more than are urgently required. The result is as usual in the world of economics: plentiful supply means easier prices. Be sure that the public are glad to learn of the reduction.

As a matter of fact several firms can now supply motorcycles fairly freely, but not so with their bicycles. That may strike you as a paradox. But I am simply stating facts. Let me prove it from a conversation I had with a traveler the day before I write. Quoth he: "We can pour a lot of motorcycles on the market; but bicycles are harder than ever to get." Three-speed hubs for bicycles are positively scarce; and in this country, you must remember, the majority of bicycles are supplied with variable-gear fitments.

Gasolene vs. Paraffin

With reference to previous notes from me about the extended use of gasolene-cum-paraffin, I could fill pages on the subject. Gasolene is now about 75 cents a gallon in Britain; so is it any wonder that motorcycle owners want to get every ounce of value out of the precious fluid? Drawing a line through my own observations and what I gather from various experimentors, the best mixture seems to be one-third paraffin to two-thirds gasolene. Nearly everybody reports that he finds results equal to those of gasolene alone, with perhaps the exception that the engine does not start up quite so easily when the engine is cold. Anyway, even that does not bother us at present, with summer at hand. (It's supposed to have come weeks ago; but June has been a marvelously cold month.)

For Sharpening Bayonets

The engine from a 3½ h.p. Rudge motorcycle has been hitched up by means of a belt, which in its turn pulls a big fly wheel, to a bayonet-cleaning machine somewhere in Egypt. The power unit is taken from a machine that had been in the wars in Gallipoli.

I was immensely interested in the article published a short time ago about "When Cycling Tours Were the Rage," and I guess every American and European reader of **Motor Cycle Illustrated** was, also. The deeds of the "Boys of the Old Brigade," who had early types of machines to drag about and wandered into places where bicycles were unknown, make modern tours look awfully matter-of-fact and simple. I have met many of the Round-the-World fellows from America and various parts of Europe. One or two were nothing but glorified tramps—closely related to the American hobo for cheek in "cadging" or begging for assistance.

The late Robert Louis Jefferson (known to lots of cycle and motorcycle dealers in the States, Canada and British possessions in Asia, Africa and Australia) was one of the most daring of long-distance tourists. With his Rover bicycle he had some perilous adventures. He rode from London to Moscow, except for the boat-trip of 21 miles from Dover to Calais, then repeated the journey and went on over the Ural mountains to Irkutsk in Siberia. Another trip he took was from London to Constantinople and once from London through Russia and across Tartary to Persia. This latter run was over a different route than that taken by Foster, Lunn and Fraser, the Britisher.

I have a tremendous admiration for the pioneer pedallers, and therefore repeat my appreciation of your reproduction of some of the first stories in the world of wheels.

Various Uses of Auto-Wheel

There is an amusing yet sad interest about the way in which Auto-Wheels are being used. I saw a pathetic case at one of our seaside resorts, where a cripple had his tricycle fitted with an Auto, the motor wheel taking the place of the little wheel of the trike. Be sure of this—the owner was finding an added joy in life through his Auto.

Tradesman's carriers—tricycles with small parcel vans attached—are also being rigged with Autos.

I should like to see a comparison of speed possibilities between the Auto and the Smith. On the big Brooklands track here, an Auto did 25 miles in 55 minutes, and a journey of 101 miles in hilly country on a windy day has been done at an average speed of over 14 miles per hour. And in the latter case, the driver had a passenger and some luggage in a trailer! Really, it is remarkable what a good little motor will do, and it is no wonder at all that some of the lightweight motorcycles do things that seem extraordinary.

SPEARS AND SPENCER SHINE AT NEWARK

Australian Wins Match Race from Champion Kramer; Canadian Scores Double Win; John Bedell Victim of Circumstances in Five-Mile Open

NEWARK, N. J., Aug. 7.—Bob Spears, the elongated Australian, again defeated Frank Kramer, the American champion, in a match at the Velodrome yesterday afternoon. Spears won the first and third heats at two-thirds-mile and showed a clean pair of heels to the East Orange man, while in the heat which was won by Kramer the Australian lost out by a narrow margin, Spears coming two lengths back in the home stretch to Kramer's side. Spears showed wonderful speed and excellent judgment in his two successful sessions.

Two More for Spencer

The phenomenal winning streak of Arthur Spencer, the Toronto professional, received two additions at yesterday's meet. Spencer met and defeated Alfred Goullet, the Australian, in rather handy style in the weekly Brassard race, and then went out and defeated Francesco Verri, the Italian, in two straight heats of a two-third-mile match. Verri, who only recently returned to good standing in the ranks of organized cycling, rode well, but plainly showed that he lacked racing to put him on edge.

Bedell in Hard Luck

John Bedell, the Long Islander, was the victim of circumstances in the five-mile open for the professionals. John won, but was disqualified for finishing on the inside of the black line. The big field of 33 riders had thinned down to about a dozen when the last mile was reached. Two laps from home Alfred Grenda, the Australian, went to the front closely followed by his countryman, Reggie McNamara, and Bedell. At the bell both Bedell and McNamara were fighting hard for Grenda's rear wheel, Bedell having the inside position. Going around the last turn McNamara attempted to go by Grenda and the latter rode high. Bedell, seeing the opening left by Grenda, started to go through, but the latter came down on him and forced him off the track, where he finished. The referee disqualified Bedell and gave the race to Grenda, who finished second.

Goullet Gets Consolation

Although beaten in the race for the Brassard by young Spencer, Alfred Goullet received $100 worth of consolation in the two-mile handicap, which he won from scratch in a brilliant ride. McNamara, Grenda and Spears started from scratch with Goullet and they had a hard ride to get up, but at the bell Goullet was near the front with Oscar Egg, the Swiss, McNamara and Eddie Madden, the Newarker. Egg jumped away and looked like a winner on the back stretch, but Goullet came strong and nosed him out. Madden finished third and McNamara fourth.

Handicap Won by Eaton

Ray Eaton, a son of Jay, the former indoor king, won the one-third-mile handicap for the professionals from the 40-yard mark. The amateur races furnished plenty of excitement and were won by Gus Lang, Robert Modershon, the New-

"Long Bob" Spears, the Australian, Who Defeated Kramer

arkers, and H. F. Abbott, of South Orange, N. J. Summaries:

Quarter-Mile Handicap (Amateur)—Won by H. F. Abbott, South Orange, N. J., 35 yards; second, George Lucking, Newark, 35 yards; third, A. C. Cammarata, Newark, 40 yards; fourth, E. J. Carroll, San Francisco, 10 yards. Time, 28⅗ seconds.

Two-Mile Invitation (Amateur)—Won by R. Modershon, Newark; second, Anthony Attardi, Brooklyn; third, William Beck, Newark; fourth, Ben Zager, Newark. Time, 4:18.

Two-Mile Open (Amateur)—Won by Gus Lang, Newark; second, Tom Bello, Brooklyn; third, Harry Hoffman, San Francisco; fourth, Ed Byron, Australia. Time, 4:12⅕.

One-Mile Brassard Race (Professional)—Won by Arthur Spencer, Toronto; second, Alfred Goullet, Australia. Time for last eighth of a mile, 12 seconds.

Two-Third-Mile Match (Professional)—Arthur Spencer, Toronto, vs. Francesco Verri, Italy. Spencer won first and second heats. Times, 1:54 and 2:10. Last eighth of a mile, 12⅗ and 12⅕ seconds.

Two-Third-Mile Match (Professional)—Frank Kramer, East Orange, and Robert Spears, Australia. Spears won first and third heats. Times, 1:54, 1:51⅗ and 1:53⅘. Last eighth of a mile, 12⅕ for first heat, 12⅖ for others.

Third-Mile Handicap (Professional)—Won by Ray Eaton, Newark, 40 yards; second, Floyd Krebs, Newark, 40 yards; third, Gordon Walker, Australia, 35 yards; fourth, Frank Corry, Australia, 20 yards. Time, 36⅕ seconds.

Two-Mile Handicap (Professional)—Won by Alfred Goullet, Australia, scratch; second, Oscar Egg, Switzerland, 80 yards; third, Eddie Madden, Newark, 100 yards; fourth, Reggie McNamara, Australia, scratch. Time, 3:54⅘.

Five-Mile Open (Professional)—Won by Alfred Grenda, Australia; second, Reggie McNamara, Australia; third, Frank Corry, Australia; fourth, Frank Kramer, East Orange. Time, 10:04⅕.

POOR CROWD TURNS OUT AT ASBURY PARK

ASBURY PARK, N. J., Aug. 8.—Five cycle race meets were scheduled to be staged at the Athletic Field, bordering on Deal Lake, during August and September, but after the first meet, which was held last Saturday afternoon, August 5, the others were abandoned.

Both in the amateur and professional races the starters were among the best in the country from Champion Frank Kramer down, but the populace failed to turn out in a manner that was satisfactory to the cyclists, who were competing on a percentage basis, the professionals receiving the net receipts. Less than 500 people turned out for the meet and after the finish of the races it was announced that further racing would be called off.

Track in Poor Shape

Due to numerous soft spots on the once famous track the cyclists were unable to show their ability; the surface was rough where it was not soft and a few spills occurred, but the riders escaped with bruises and a shaking up. A hard strip near the pole line was about the only safe spot to ride on and the fortunate cyclist who got in front and on the strip generally managed to win.

Alfred Grenda, the strong Australian, picked out the easy path in both the one-mile and the two-mile open and accounted for both races. Harry Kaiser, the New Yorker, finished second to Grenda in the mile race and won the two-mile invitation. Frank Kramer failed to qualify in his heat of the mile race and refused to start in the others. Summaries:

Two-Mile Open (Amateur)—Won by Tom Bello, Brooklyn; second, William Spencer, Toronto; third, Marcel Berger, San Francisco. Time, 5:15⅕.

One-Mile Handicap (Amateur)—Won by Nelson Johnson, New York, 110 yards; second, Marcel Berger, San Francisco, 75 yards; third, Ernest Berghoff, Asbury Park, 100 yards. Time, 2:14⅖.

One-Mile Open (Professional)—Won by Alfred Grenda, Australia; second, Harry Kaiser, New York; third, Reggie McNamara, Australia; fourth, George Cameron, New York. Time, 2:21⅕.

Two-Third-Mile Handicap (Professional)—Won by Thomas Grimm, Newark, 70 yards; second, Joe Kopsky, New York, 110 yards; third, Floyd Krebs, Newark, 100 yards; fourth, Charles Piercey, 80 yards. Time, 1:24⅗.

Two-Mile Invitation (Professional)—Won by Harry Kaiser, New York; second, Frank Corry, Australia; third, Charles Piercey, Australia; fourth, George Cameron, New York. Time, 4:59⅘.

Two-Mile Open (Professional)—Won by Alfred Grenda, Australia; second, Jake Magin, Newark; third, Percy Lawrence, San Francisco; fourth, George Cameron, New York. Time, 4:59⅕.

ENGLISH LADS MAKE FIVE-DAY BIKE TRIP

Sixteen-Year-Old Cyclists Complete 514 Mile Run to Syracuse, N. Y., and Return to Toronto—Spent $10 Each

TORONTO, Ont.—Two English boys of Toronto have just completed a five-day bicycle tour of 514 miles which took them to Syracuse, N. Y., and return, at an expenditure of only $20 for the entire outing. The two lads are Bert Allen, 111 O'Hara avenue, and James Pelvin, 204 Lansdowne avenue, both sixteen years of age.

They followed the usual practice of taking the Lake Ontario boat to Queenston, on the Niagara River, and they crossed the International border at Niagara Falls. In wheeling through Buffalo, Rochester and Auburn to Syracuse they travelled over highways which they declare, they found to be as pleasant as the roads of England over which they had frequently toured before coming to Canada. They frequently slept in railway stations and at Rochester they slept on the lawn of a suburban house. On one occasion they occupied a bed in a "Rescue Home' which set them back thirty cents.

Automobilists Help Out

On one of the days of their trips, one of the bicycle tires developed a slow leak but two ladies in an automobile not only came to their rescue by repairing the tire but gave them a supper of sandwiches and soft drinks. At noon on the second day they refreshed themselves with a swim in the Genesee River, about five miles from Rochester.

Start with $12 Apiece

Each of the lads started out with $12 in his pocket and both had about $2 when Toronto was reached at the end of the journey. Each carried a kit containing the following articles: two shirts, ten soft collars, three handkerchiefs, two pairs of socks, soap, towel, bathing suit, hair and clothes brushes. Their only misfortune on the trip occurred when Allen lost his entire kit.

The cyclometers on their wheels registered exactly 514 miles for the trip which means that they rode slightly more than one hundred miles each day. Both Allen and Pelvin frequently take week-end trips through the country districts of Ontario.

C. R. C. A. PLEASURE RUN HAS BIG TURNOUT

NEW YORK CITY, August 8.—About 200 cyclists participated in the annual pleasure run and carnival of sports staged by the Century Road Club Association, Sunday, August 6. One of the features of the annual tour was the ladies and veterans' division, in which over a dozen cyclists who have seen fifteen years of service participated. The start was from the Columbus Circle to the Grand Concourse, Pelham Parkway, where a number of races were held.

R. M. Henderson, the Bay View Wheelmen star, accounted for the three-mile handicap, beating Henry Garbade, Brooklyn Wheelmen, and George Harvey, Unione Sportive Italiana. The mile scratch race was accounted for by J. J. Marquart, C. R. C. A., who beat Nelson Johnson, U. S. I., and Paul Reinecke, Acme Wheelmen. Marquart also accounted for the quarter-mile dash. A half-mile novelty race fell to John De Bruyn, Acme Wheelmen, and the 100-yard slow race was won by Eugene O'Mara, Bay View Wheelmen. Two running races were also staged, William J. Lock, C. R. C. of A., winning the 100-yard dash, and Thomas Lockhart, C. R. C. A., accounted for the half-mile run.

The Century Road Club Assn. has prepared an elaborate card of fixtures to cover Sundays and holidays until Christmas.

PACIFIC COAST CLUBS NAME PURSUIT TEAMS

SAN FRANCISCO, Cal., August 5.—Two of the five clubs that are to be represented in the California Associated Cycling Club's semi-annual Australian pursuit race at the Golden Gate Park Stadium, Sunday, August 20, have held their elimination trials to choose the teams. The three who will represent the New Century Wheelmen will be chosen from the following: M. Castillo, H. De Brie, R. Welch, W. Rhodes, J. Coughlan, W. Hammitt, Vic. Spence and W. McGrath. The Olympic Club's trial was featured by a big spill, only two riders, R. Girard and Frank Hoffman, finishing. The third man may be picked by a committee.

THE EMBLEM BICYCLE STORE IN ANGOLA, N. Y.

Spie and Span Establishment of C. W. Cook, Who Sells Emblem Machines Exclusively and Does a Large Tire Business

BREESE IN NEW JOB

LOS ANGELES, Cal.—C. F. Breese, an old pioneer in the bicycle game, is now employed by the Pacific Motor Supply Co. He has had a great many years' experience in the bicycle business, having served ten years with the Wm. H. Hoegee Co. in their bicycle department; since which he was his own manager of an up-to-date bicycle store at Hollywood, Cal. He is a good man and well liked by the trade.

FILE CHATTEL MORTGAGES NOW

LOUISVILLE, Ky.—Louisville bicycle dealers after many experiences have found that it is better to be safe than sorry, and the leading houses selling bicycles are now rather careful to file chattel mortgages on bicycles which are sold on time payments. Max Loeb and the National Cycle Co., have been selling a good many two-wheelers on time payments this season. A good part of the sales are made for cash, however.

BENTON OUT FOR NEW RECORD

EARL BENTON, riding a Reading Standard Short Coupled Bicycle, will try to establish a new record between Los Angeles and San Bernardino and return, a distance of 150 miles. Benton's riding reputation stands high among the bicycle riders of California. With a few more years of experience, it is believed by many that he will be the champion long distance rider of the west. He placed in six events on Bicycle Day, when all of the best riders in California rode against him. He will enter most of the events during the remainder of the season.

ST. LOUIS BOYS ON LONG TRIP

SHEBOYGAN, Wis., Aug. 6.—Louis and William Zabel, athletic instructors at St. Louis, Mo., arrived in this city by bicycle to visit their parents on North Tenth street. The Zabel boys made the entire distance from St. Louis, 504 miles, in eight days. They will remain here until the September term starts.

VISITING RIDERS WIN VENTNOR RACES

L. P. Sattler, New York, Wins Ten-Mile Race at Atlantic City Convention—William Spencer, Toronto, Takes Five-Mile

ATLANTIC CITY, N. J., August 9.—Visiting cyclists from New York and Newark cleaned up most of the prizes offered in the two road races run over the Ventnor Boulevard under the auspices of the Cycle Trades Industries, Thursday afternoon last. William Spencer, the fast Torontonian, accounted for the five-mile handicap, and L. P. Sattler, a member of the Century Road Club Association, of New York, annexed the ten-mile handicap.

The races were staged over a course that was a mile and a quarter around, and there was considerable crowding at the start and finish, due to poor police protection. Several spills occurred as the riders passed the starting line, but fortunately none of the competitors was badly injured. George Leishear, a Baltimore rider, was the most seriously injured, the Maryland cyclist receiving a bad shaking up and injuries about the knees and body.

Thirty Qualify

Thirty riders qualified for the five-mile handicap final, the race being divided into two heats, the distance being once around the course, fifteen qualifying for the final. The limit was placed 400 yards, and the rest of the field started at intervals of 30 and 40 yards apart, five men being on the honor mark. The scratch men were in a commanding position at the start of the last lap, and Spencer won, with Nelson Johnson, another scratch man, third. George Harris, the Philadelphia negro, finished second. The time was 13:38.

Forty-seven riders started in the ten-mile race with 3 minutes and 30 seconds as the limit handicap. L. P. Sattler won from the three-minute mark, and the majority of the first ten finished from that mark. The scratch men fared badly in this race, none of them being placed.

Layton Is Winner

The Atlantic City championship, run over a single tour of the course, was won by Lewis Layton, who finished second to Ed Shoemaker, but as the latter was disqualified for foul riding, the race was awarded to Layton. The races for cycles fitted with motor wheels failed to come up to expectations. W. H. Varga did a five-mile tour of the course in 16:28, but the five-mile race was not finished.

The first fifteen in the five-mile finished as follows: William Spencer, Toronto, scratch, won; second, George Harris, Philadelphia, 20 yards; third, Nelson Johnson, New York, scratch; fourth, Tom Bello, Brooklyn, scratch; fifth, John De Bruyn, New York, 310 yards; sixth, Edwin Jensen, New York, scratch; seventh, Lewis Layton, Atlantic City, 330 yards; eighth, Fred Eccles, Atlantic City, 320 yards; ninth, Lou Seltzer, Atlantic City, 400 yards; tenth, James H. Keefe, Atlantic City, 300 yards; eleventh, Phil Kelly, Philadelphia, 160 yards; twelfth, H. M. Sarrangelli, Trenton, 300 yards; thirteenth, Maurice Price, Philadelphia, 340 yards; fourteenth, Ed Shoemaker, Atlantic City, 150 yards; fifteenth, Geo. Leishear, Baltimore, 330 yards.

The order of finish in the ten-mile follows:

Pos.	Name.	Hdcp. Min.	Time.
1	L. P. Sattler, New York	3:00	26:30
2	George Harvey, New York	3:00	26:30⅕
3	H. M. Serrangelli, Trenton	3:00	26:30⅖
4	Louis Hyman, Atlantic City	3:00	26:30⅗
5	C. Gachenback, Orefield, Pa	3:00	26:30⅘
6	Frank Gerbassio, Trenton	3:00	26:31
7	William Marino, Brooklyn	3:30	27:01⅕
8	L. Maleson, Chelsea, N. J	3:00	26:31⅖
9	Frank Agabati, Trenton	2:30	26:01⅗
10	Fred Hensch, Union Hill, N. J.	2:00	25:32
11	Sylvan Segal, New York	2:00	25:33
12	R. O. Olsen, Bayonne, N. J.	2:00	25:33⅕
13	Elmer Miller, New York	2:00	25:33⅖
14	W. Winquist, New York	2:00	25:34
15	W. J. Browne, Philadelphia	2:30	26:05⅕
16	L. A. Martin, Berwick, Pa	2:00	25:36
17	John De Bruyn, New York	2:30	26:07
18	Maurice Price, Philadelphia	2:30	26:11
19	Ray Caldwell, Brooklyn	1:00	24:42
20	Phil Kelly, Philadelphia	1:30	25:14

Tom Bello, Brooklyn, Who Is Riding Consistently

BALTIMORE DEALERS ARE TO PROMOTE RACES

BALTIMORE, Md., August 8.—Local motorcyclists and bicyclists will have an opportunity to show some speed on Labor Day, September 4, when the Baltimore bicycle dealers will stage a series of races for both classes at the Gentlemen's Driving Park.

SUGGESTIONS HELP GOODYEAR

A feature which The Goodyear Tire & Rubber Co., Akron, Ohio, has proven practical and popular, is the Suggestion System, which enables employes to offer their ideas for improving machinery, methods, conditions and product. Hundreds of dollars are paid to employes annually for suggestions accepted by the company.

TWO RACE MEETS FOR POINT BREEZE TRACK

PHILADELPHIA, Pa., Aug. 6.—Two race meets were staged at the Point Breeze track yesterday afternoon and last night. The meet in the afternoon was promoted by the Improved Order of Red Men, while the evening races were made up of the regular Saturday night motor-paced and motorcycle races.

In the afternoon a five-mile handicap event for amateurs was run and was accounted for by William Brown, who had a handicap of 400 yards. George H. Harris, the colored rider, starting from scratch, finished second and Phil Kelly, 50 yards, ran third. The time was 11:05.

Menus Bedell, the Long Island cyclist, accounted for the forty-mile motor-paced race on the night's program. Bedell defeated Bobby Walthour, the Atlanta veteran, by five laps, while his advantage over Martin "Grassy" Ryan, the Newark Irishman, was double the distance. The latter got away in front and led for five miles when he punctured. Bedell then went to the front and led until the finish. The time was 51:50 3/5.

SANBORN LEADS CRESCENTS FOR CLUB TITLE

BALTIMORE, Md., August 9.—Fred M. Sanborn, the veteran road rider of the Crescent Bicycle Club, won the 25-mile road championship of the club, Sunday, August 6. W. V. Inglehart followed Sanborn across the tape, and William H. McAvoy finished third. The field was bunched until the four-mile mark was reached when the above trio got away. At 15 miles Inglehart punctured, necessitating a short stop, Sanborn and McAvoy continuing. Sanborn drew away from McAvoy on a long hill, and won by a good lead. Inglehart, however, managed by hard riding to overtake and pass McAvoy for second place. Sanborn is now leading McAvoy by one point, and Inglehart by two points in the championship series.

BICK GIVES OUTING FOR ROCKFORD BIKERS

ROCKFORD, Ill.—Joe Bick, the well-known bike man in this city, acted as host to a bunch of cycle tourists who rode from Rockford to Rochelle for an outing on July 24. At Rochelle, the eats were tucked away in quick time and the party spent the rest of the day at one of the parks in the city.

Bick has organized a live bicycle club in this city and has planned several runs to nearby cities for the remainder of the season.

NEWMAN SELLS OUT

NEWMAN, Cal.—J. H. Charles, who has been conducting the Newman Cyclery for some time, has sold out to Ralph Wigginton, the former owner.

VERMONT CLUB'S CAMPAIGN

BENNINGTON, Vt.—Members of the local bicycle club have started a membership campaign. There are now 23 names on the roll.

HANDY CYCLE SHOW WINDOW BACKGROUND

(Continued from page 32)

rection. The last to be mentioned and most important of all is the use of scenic paintings in the panels.

An excellent example as to how they may be utilized is shown in the illustration No. 1. The openings at tops of panels are backed up with a timely scenic painting which may be made on canvas and stretched over the interchangeable panels or they may be painted over the face of the wall board panels. A stencil design can also be used to good advantage. These paintings can be made by concerns who make a specialty of this work or by your local sign painter or probably you may have some one in your employ who is artistically inclined. The chance to make a few extra dollars would also be an incentive for him to take complete charge of your displays.

Some wonderfully effective decorative scenic panels can be worked out in this connection if you will only give them the proper thought and attention.

Window Pointers

AN EXCELLENT PROFIT-BRINGER

The importance of properly dressed windows has never been more pronounced than at the present time. The new stores opening constantly display marked attention in this direction. Every inch of space available for the purpose is placed in service. Old-established firms are looking about their premises and planning some manner of increasing the display of merchandise. They realize that in this inexpensive feature of their business lies an excellent salesman and profit-bringer.

COLORS OF BACKGROUNDS

The *American Architect* (New York) has printed the following as to the amount of light given back by different colored surfaces:

Dark blue reflects 6½% of the light falling upon it; dark green, about 10%; pale red, a little more than 16%; dark yellow, 20%; pale blue, 30%; pale yellow, 40%; pale green, 46½%; pale orange, nearly 55%; pale white, 70%.

A window finished in light oak, can be lighted with much less wattage than a window finished in dark mahogany; likewise, a window in which light-colored goods are displayed can be lighted much more economically than a window for a display of dark-colored merchandise.

AN IMPORTANT CONSIDERATION

There is something particularly attractive about a handsome display, brilliantly lighted up and looking cheerful, up-to-date and prosperous. The most important thing to be considered in lighting the window is to have the light all thrown downward onto the merchandise and not out into the eyes of window gazers or on the sidewalk. Wherever a light shines directly into the eyes of the spectators it should have a frosted globe, which lessens the glare of the light and gives a soft, pleasing radiance without sharpness. There are several excellent forms of show window reflectors of the "bonnet" type which throw all light from incandescent lamps downward onto the merchandise and effectively screen the lights themselves from the eyes of passers-by.

Frosted globes may be very effectively used on auxiliary lights in the background and, if colored, may be used in an appropriate color scheme. Frosted globes are also sometimes used throughout the windows, when they throw a soft, mellow light over the whole display.

THOR-CYGNET COMBINATION SCORES SUCCESS

THIS commercial outfit, made up of a Thor motorcycle and Cygnet Rear Car, is one of several similar combinations sold recently by the Pioneer Motorcycle House, of Philadelphia, Pa., to the same firm. The Pioneer company reports that the purchasers have expressed satisfaction with the outfits, and that although they have had them only a short time, "they could not be without them."

TRADE O. K.'S BICYCLE COMMITTEE'S PLANS

(Continued from page 17)

Houdini, the vaudeville headliner, told the assembled cycle trades men something about advertising the cycle from the light of his own experiences and his talk contained many a real gem in the shape of a good suggestion; Horace M. Huffman of the Davis Sewing Machine Co., made a clever little speech on the bicycle, while Frank Chase of the Frank Mossberg Co. and L. H. Hood of Walthour and Hood gave the interested cycle men some real insights into the problems confronting respectively the parts maker and the jobber. T. W. Henderson of the Henderson Motorcycle Co., in characteristic style, dodged his subject "The Motorcycle," and put his subject in a happy frame of mind with a mirth provoking ten-minute talk.

Not the least important work accomplishment of the assembled body was the adoption of a resolution suggested by C. F. Olin, calling the attention of the War Department to the part the bicycle is playing in the European War and urging that some attention be paid the pedal propelled two-wheeler.

Before adjourning, the meeting gave a rising vote of thanks to Messrs. Surr and Morehouse for their entertainment.

GERRANS HEADS LONDON BRANCH

F. L. GERRANS is now manager of the London, England, branch of A. Schrader Son, Inc., of Brooklyn, N. Y., making the Schrader tire gauge. W. H. Cole, former manager, has left the branch.

TOGS FOR THE CYCLE VACATIONIST

Being a Boost for Neatness and Suitability in Clothing for All Who Take Their Holidays by Motor; Recommended Costumes Are Not Expensive and Are Pleasing in Appearance

By ROBERT E. MACKAY

AMONG the various details of the cyclist's vacation preparations, the question of clothing or togs is important. Practically all riders have clothes which are comfortable, but that is as far as the matter goes. The garments in too many cases lack a most important feature, that of neatness, and, in a lesser measure, of suitability to riding and the sports which can be indulged in with the aid of the machine.

The effects of being neat, not only when on vacation, but at all other times, are far-reaching. The neat rider elicits favorable comment from non-riders, not only for himself but also for the sport. He does much to eradicate the impression that motorcycling is a dirty form of recreation and that the rider must either be unable to stay clean or revels in dirt to show how hardy he is.

Clean Old Togs

With neatness as a prime object, the old riding togs with their stains and tears are naturally not to be considered for the vacation, at least on the journey there and back. It is up to the man himself what he wears while he is enjoying the rest of the holiday. So clean up the old ones or get something that is presentable, and you and the rest of the riders will benefit.

Coupled with neatness comes the question of suitability. A bathing jersey may be—and often is—most comfortable for riding in warm weather, but it gives a bad impression on all sides. I just mention this, as I have seen lots of riders in summer wearing bathing jerseys, and the comments on their appearance were far from flattering. They could be just as comfortable with a negligee or army type shirt—and much more presentable.

Khaki Outfit

As good an appearing and serviceable outfit as can be desired consists of a drab or khaki shirt, riding breeches and leggings. This for the warmest days. When more clothing is needed, a Norfolk type jacket or a jersey, or both, come in handy. A poncho will come in nicely as a ground sheet for camping and as a protection to the rider from the rain.

Right here, I might say that there are dozens of riding suits on the market which look neat, will stand hard wear without getting frazzly and are comfortable. Live dealers carry a stock, so that there should be no difficulty in getting a suit, particularly as the cost is usually low.

Corduroys and Mixtures

If the rider cares to go a little further, he can find some good suits of clothes, like corduroys for outdoor wear, at very reasonable figures. These, especially in the mixture goods, are first class for all but the hardest riding and are decidedly neat. The pictures you see of neat riders in the magazines show clothing of this sort, as a rule.

Outside of a racing helmet, there are not many styles of cap which are suitable for riding at any speed, unless the peak of the cap is reversed. Almost any cap, provided that the crown isn't too large, will do for riding. Personally, I prefer to ride bareheaded, using a cap only when it rains, and I think that the practice is a good one. It doesn't detract from the rider's looks in the slightest.

TRY THE SIDE-ROAD, MR. MOTORCYCLIST

It Has Lots of Attractions You Don't Get on Main Routes Even Though It Is Not Macadamized—Folks Are Friendly

By WALLACE STUART

DO you want to enjoy the real sport of motorcycling? Then take my word for it: get off the beaten track and try the side-roads for a change. Get away from that annoying auto traffic and go where the road is all your own. Go where you will be free from restrictions; where you will enjoy yourself. You will then realize what the real sport of riding is.

The next time you go off on a trip with one or two others, turn off at the first side-road that presents itself, and follow it. You will be surprised at what you find. The roads may not be macadam, but what of it? You can take your time and pick your way, if necessary. The new things you will see will more than make it worth while. When you strike the State road again, don't follow it, but cut right across and keep to the back country road.

You will imagine yourself hundreds of miles from home, everything will seem so new and strange. New lakes will be discovered. Streams where fishing is good will be found. The country folks will be glad to tell you where the fishing holes are. You will find valleys you never thought about and mountains of which you have never even heard of, much less seen. These things alone will make you feel like a discoverer, and why not? Didn't you first make them known to the boys at the club?

You will pass many quaint farm houses where all the folks will run out to see what is coming when they hear you, for they don't see motorcycles back there every day. As you pass they will greet you with waving hands and cheery calls. It makes you feel that the whole world is your friend. When you get off to drink at a well or brook, how they all come around and examine the machine and how proud you feel when you tell them about it and where you have been and where you are from!

Yes, fellows, it's worth while. Try it and you will believe in the saying: Leave the main roads to the crowd.

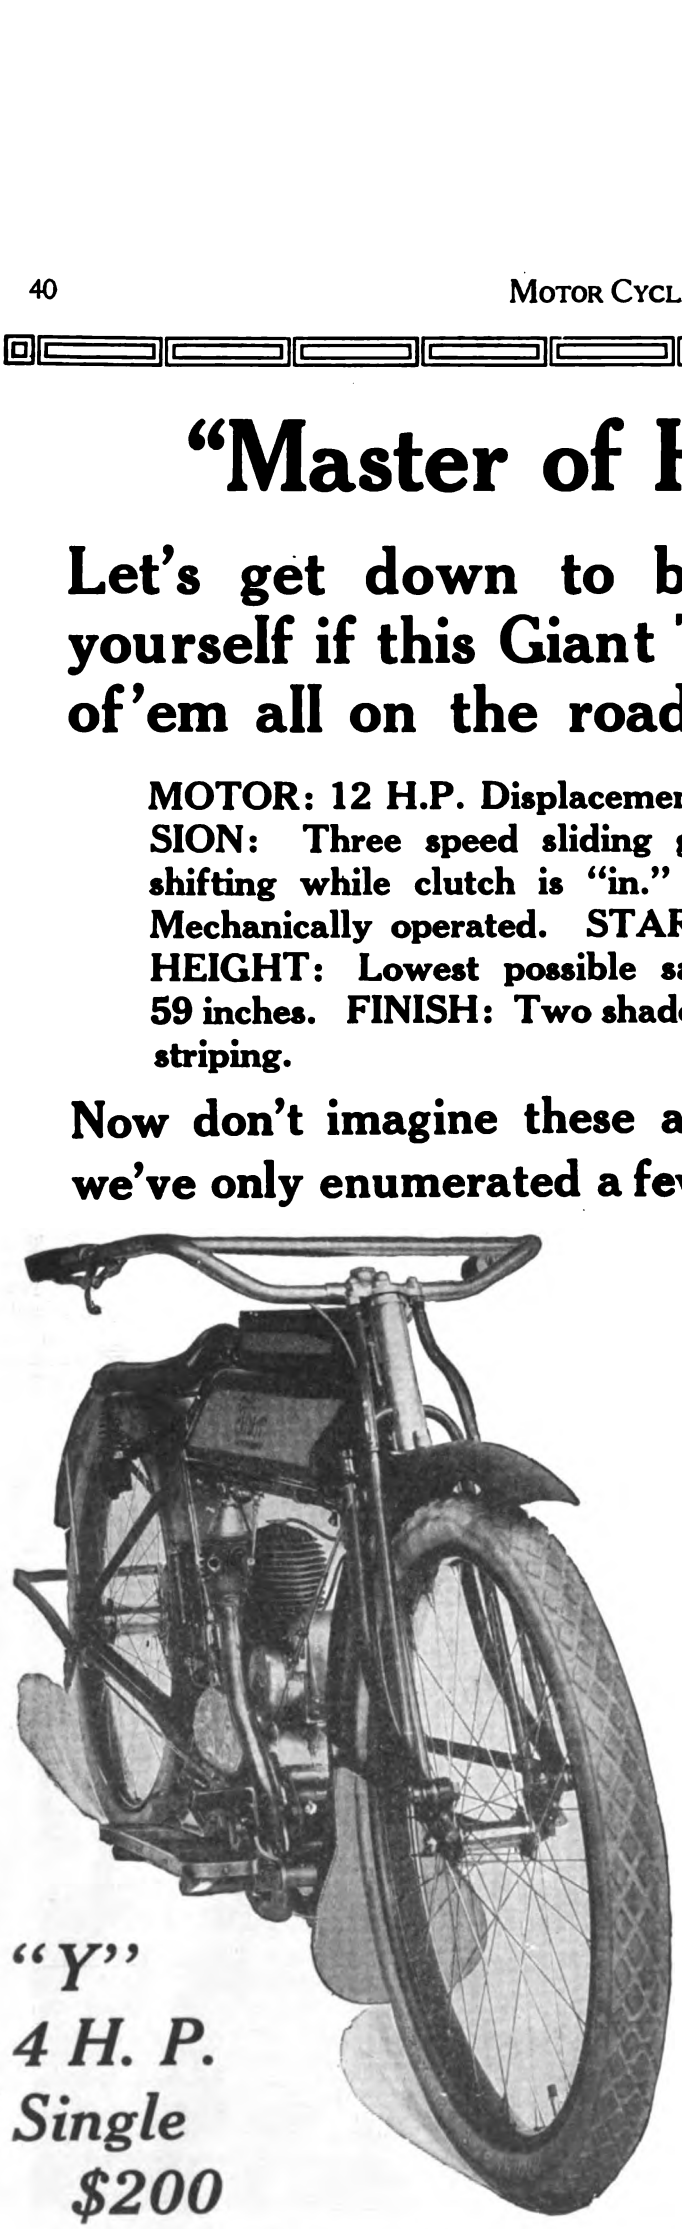
"Master of Heavy Duty"

Let's get down to bed rock. Decide for yourself if this Giant Thor isn't a lap ahead of'em all on the road of motorcycle design.

MOTOR: 12 H.P. Displacement, 61 cubic inches. TRANSMISSION: Three speed sliding gear. Locking device prevents shifting while clutch is "in." VALVES: Overhead, enclosed. Mechanically operated. STARTER: Segmental foot-starter. HEIGHT: Lowest possible saddle position. WHEELBASE: 59 inches. FINISH: Two shades of blue with gold and black striping.

Now don't imagine these are the only features. In fact we've only enumerated a few. We have the remainder of them in a booklet, together with the description of our other two models, "V" 6 H. P. Twin, $235; "Y" 4 H. P. Single, $200.



"Y" 4 H. P. Single $200

STEELE'S EXHIBIT DRAWS BIG CROWD

PATERSON, N. J.—John Steele, Indian man at 95 Broadway, this city, has a sectioned Powerplus motor in his window these days. The working parts are shown in this motor, and on turning a crank attached to the main shaft, the operation of the motor is to be seen. A gearbox is also located in the window. Big crowds examine the two every day.

SWENSON INVITES BRAVES TO ANNUAL POW-WOW

PROVIDENCE, R. I., August 7.—The annual Pow-wow of all good Indians will be held in this city Sunday, August 27, at Palace Gardens. All Indian riders from everywhere are invited to attend the grand festivities.

On previous occasions over a thousand riders have been guests of Mr. Swenson at this function which is given free. Refreshments of all varieties are laid out in great array on that day and everybody is asked to come with appetites.

A card of athletic events will be run off. Fat men, lean men, tandem girls, side-car girls and the tomboys are all given an opportunity of getting in on the games to show their skill. Prizes will be given. This year there are many additional trophies to be presented because of the fact that many of the prizes given for events in the Federation of American Motorcyclists convention were not given during the convention and the donors have presented them to Mr. Swenson to be used at the picnic.

Indian riders from out of town will be met in Exchange place by guides every half hour from 9 a. m. to 1 p. m. to make the ride of 15 minutes to the gardens.

HALLIDAY NOW WITH HENDERSON IN PROVIDENCE

PROVIDENCE, R. I., August 7.—W. F. Halliday, formerly with the Harley-Davidson company, has taken a position with the General Motorcycle Sales Company, 314 Broad street, and is now manager of this store, which handles Hendersons. Mr. Halliday states that business is on the boom in all lines, he having extended the accessory department. He also handles second-hand machines.

HAVENSTRITE OFF TO HARLEY-DAVIDSON FACTORY

PATERSON, N. J., Aug. 4.—Elmer G. Havenstrite, sales manager of the W. Edward MacDougall Co., 131 Broadway, Harley-Davidson representative, is paying a visit to the home of the Silent Gray Fellow in Milwaukee, Wis., Havenstrite expects to be present at the motorcycle dealers' convention in that city and will make a thorough investigation of the 1917 product.

1916 MOST PROSPEROUS, SAYS SCHAEFFER

READING, Pa.—William Schaeffer, proprietor of the Penn Cycle & Motor Company, handling the Reading Standard, says that 1916 is one of the most prosperous he ever experienced. "They are ordering the R-S for 1917 deliveries," he says, "and still asking for 1916 models."

GARAGE INCORPORATES

HAMBURG, N. Y.—The Service Garage, Inc., has been formed to do a general motorcycle and auto garage business. The capital stock is $15,000.

Digitized by Google

SWENSON SELLS LAST INDIAN IN HIS STOCK

PROVIDENCE, R. I., August 7.—B. A. Swenson today is completely cleaned out of motorcycles. The last Indian in stock was sold last Saturday. For the first time in the history of his store have bicycles taken the leading place. They are used to decorate the windows from which the motorcycles have been sold.

Asked how many he had sold this year, Swenson said today that he had disposed of 540 new and second hand machines since Jan. 1.

He has sold an Indian to Fred C. Shogren, captain of the Providence Motorcycle club and it will be delivered in two weeks. Captain Shogren will then leave for a long trip to Florida. Swenson states that as soon as the big picnic is over he will leave the city with a sleeping bag and blankets for the wilds of Canada for a vacation.

He is now busy cleaning up the accounts of the convention and hopes to have his report in the hands of the national president in about a week. The total expenses of the meet will approximate $2,200.

FRASER BACK IN FRISCO; FINDS TRADE GOOD

SAN FRANCISCO, Cal.—Manager Fraser, of the Appeal Manufacturing & Jobbing Co. has returned from a short run down the Coast, taking in Hollister, Santa Cruz, and neighboring towns. He finds dealers generally optimistic and looking forward to an increase of business now that the vacation and fruit-picking season is coming to an end. "There will be surely a good demand for later deliveries this season," says Fraser.

Charles H. Johnson, who for some time has been covering a part of the Coast territory in the interests of the Hendee Mfg. Co., has resigned his position to go into a new auto supply business in this city.

HUBBARD & CURRY BUY OUT JONES DRUG CO.

LEXINGTON, Ky.—Announcement has been made of a change in this city whereby the Jones Drug Co., A. B. Jones, proprietor, handlers of the Harley-Davidson in Lexington, has been bought by the firm of Hubbard & Curry, composed of Henry M. Hubbard and J. E. Curry. Mr. Jones retires from all active business connections. It is understood that the new concern will continue all of the present lines and add some additional ones.

BERRY TO HANDLE THOR IN SOUTHERN CALIFORNIA

LOS ANGELES, Cal.—T. E. Berry is to put his magnetic personality behind the Thor motorcycle in Southern California during the coming year. Following a visit of C. B. O'Hare, factory sales manager, and Z. Barton, coast salesmanager, Berry has signed up for the Thor and expects to put in a stock about Sept. 1.

SEARS WITH FOREMAN

PADUCAH, Ky.—Edward J. Sears, formerly a well known motorcycle dealer of this city, is now giving his attention to the vulcanizing department of the Foreman Automobile Co.

DEMAND EXCEEDED EXPECTATIONS, SAYS CHIARA

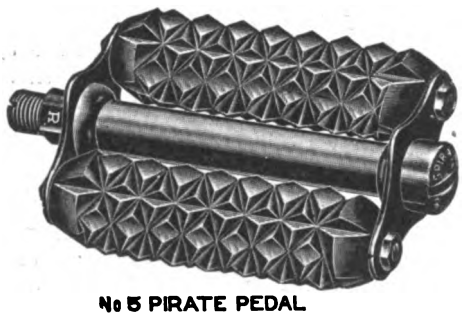
HARRISBURG, Pa.—Joseph Chiara, proprietor of the Harrisburg Motorcycle Exchange, reports an excellent showing made with the Reading Standard for 1916, the first season as R-S representatives. "The demand for the R-S has far exceeded expectations," says Chiara, "and while 1916 has been fine, I expect 1917 to be a tremendous season."

BELT CO. SELLS OVER 100 INDIANS TO DATE

COLUMBUS, O.—The Belt Motor Company, located at Fourth and Gay streets, Central Ohio distributor for the Indian, reports the sale of more than 100 motorcycles during the present season. C. O. Belt, head of the company, predicts a good demand for the remainder of the season, especially if the Ohio militia is kept at Camp Willis for some time. The mobilization of the militia stimulated the demand for motorcycles to a certain extent.

TOBACCO EMBARGO AFFECTS CYCLE TRADE

PADUCAH, Ky.—What promised to be a big fall season with the Western Kentucky motorcycle dealers has suffered a check due to England's recently declaring an embargo on tobacco shipments. Western Kentucky is one of the biggest producing sections in the world of dark tobacco, which is largely used abroad, Owensboro, Henderson, Paducah, and Clarksville, Tenn., being all large shippers.



No 5 PIRATE PEDAL

Two Pedals That Are Immensely Popular

Their design and construction assure strength and comfort. Especially is this true of the No. 5 PIRATE, whose deep corrugated rubber cushions are not only soft to the feet, but absorb shocks and keep the feet from slipping.

The No. 4 STANDARD is a new addition to our large and comprehensive line of Rat Trap Pedals. It is strongly made, well designed and gives a splendid foot hold.

TRADE HAPPENINGS IN LOS ANGELES

LOS ANGELES, Cal.—Ed Ordey, formerly with Passmore & Sayre, Harley-Davidson agents, is at present with the Matrin Miles Co. He is considered to be the best salesman for second hand machines in this city.

GEORGE CLAPP, salesman for the Pacific Motor Supply Co., has been seriously ill for the past two weeks, but will soon be round again. Clapp was taken ill some time ago, but stuck it out until the doctors told him to get to bed. He is anxious to be back in harness once more.

ANDY WILSON, a veteran in the motorcyle game, is now with Passmore & Sayre, handling the Harley-Davidson. Wilson is in the sales end of the company.

BAKER, MANAGER OF LITTLE FALLS COMPANY

LITTLE FALLS, N. Y.—J. Albert Baker is now manager of the Little Falls Motorcycle Company, on Second street. Charles Clark will have charge of the firm's garage on Ann street. George H. O'Neill, former manager of the company, will devote his energies to the sales end of the business. The Harley-Davidson is handled.

TO BRING TRADE TO LOUISVILLE

LOUISVILLE, Ky.—Several of the local motorcycle, bicycle and supply houses have subscribed for one or more shares of stock in the new Louisville Industrial Foundation, a corporation capitalized at $1,000,000 and backed by the Board of Trade of this city. The foundation has for its object the raising of a fund to bring new factories and industries to Louisville.

HAMILTONIANS GIVE $2,500 TOWARD DIXIE HIGHWAY

CINCINNATI, O.—The Hamilton County Dixie Highway Council has completed a gift of $2,500 as its contribution toward the expenses of promotion of the Dixie Highway plan by the Dixie Highway Association. This is by far the largest contribution made by any city along the line of the highway, which has now reached a very satisfactory state, with the considerable amount of construction done during the current year. There is now little doubt but that the proposed triumphal entry of President M. M. Allison of Chattanooga, and the directors of the association, into Knoxville from Cincinnati, on October 23, will be entirely feasible. The Dixie Highway convention, to be held in Cincinnati, at Music Hall, October 20, will be attended by the officers and directors of the association.

HESTER TIRE TO BUILD

LIMA, O.—The Hester Tire & Rubber Co., a new manufacturing concern, has secured a site for its proposed plant, through the Chamber of Commerce, and a building 60 by 150 feet, besides a power house, will be constructed. Work is to be started in a short time, and rushed to completion as soon as possible. The company is incorporated with a capital stock of $100,000.

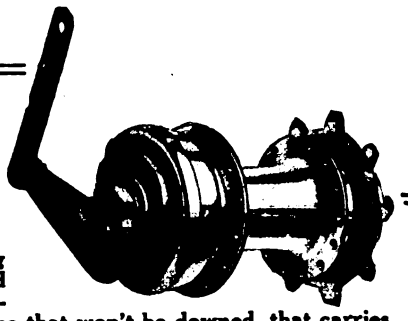
FREED HAS $50, BUT DOES NOT KNOW WHO OWNS IT

SAN FRANCISCO, Cal.—A. Freed, proprietor of the Pacific Motor Supply Co., Indian distributor in this section, has $50 which he doesn't know what to do with. A few days ago, two small boys entered his place, showed $75 and asked for a motorcycle. When Freed began to ask questions, the boys got scared and ran away, leaving $50 on the counter. Freed is wondering who owns the fifty.

RAILWAY MEN ORDER MORE HENDERSON MOTORS

DETROIT, Mich.—Orders have been received from B. R. Herman & Co., government railway contractors in India, with headquarters at Karachi, for six Henderson four-cylinder motors for the Henderson Motorcycle Co., on Cass avenue. These motors will be used to drive small inspection cars for travelling up and down the line. The cars are used by inspectors, engineers and construction men.

When the motors are delivered, nine of them will be in use on the railway. Three Henderson motors were purchased last year for this work, and they gave every satisfaction, hence the new order.



Telling Testimony

Clear, convincing evidence, the kind that people pay attention to, evidence that won't be downed, that carries with it the final punch that wins the case—this is the sort of evidence that has been submitted in favor of the

CORBIN

DUPLEX COASTER BRAKE

Here it is: those men whose business it is to rent bicycles have found that the CORBIN DUPLEX equipment is best suited to their requirements.

What does this imply? Simply this: that these men who have had an unequalled opportunity to judge the relative merits of numerous brakes subjected to the hardest working conditions, have found the Corbin Duplex the most satisfactory.

It means that the Corbin Duplex has stood a thorough, strenuous and conclusive test, that it has proved itself to be practically indestructible, durable and completely trustworthy.

These men have judged in favor of the Corbin Duplex for one reason: it does what is required of it, it cuts down the repair account and saves time, trouble and money. You can make sure by asking them yourself.

"149"

One Dealer's Experience—

"I thought you would be interested in knowing the success I have been having with your No. 149 chain, sample of which I received from you on May 21st. Same was put on our Harley three speed demonstrator with side car, which has been running practically every day since then. Most of the time we carry three people. Our Mr. ——— drove this outfit through the New Jersey Endurance Run over one of the worst courses in this country and he did not find it necessary to take up on the chain once during the entire trip. You certainly have a good product, and we expect to do quite some business on it throughout the season." (*Name on request.*)

The No. 149 is giving this perfect satisfaction on thousands of the machines this year and will serve you well, too.

For sale by dealers and jobbers everywhere.

Built for Speed

HERE'S a battleship view of the Pope Three Speed Twin—the latest sensation in the motorcycle world. Clean cut and shipshape as a battle cruiser, the "Champion of the Hills" is always ready for action.

The picture shows how completely the motor and operating parts are protected and how little is the exposure to wind resistance.

Notice especially the distinctive type of fork construction. Twin stems to handlebars assure positive steering control. Sturdy forgings between fork sides and truss rods (fork sides internally reinforced with vanadium steel) give a strength that enables the forks to withstand the severest road shocks and strain of sidecar use.

It is workmanship of this high quality that you are offering to your critical customers when you handle the new Pope Three Speed Twin.

For your customer—this means the most possible mileage and the least possible repair expense.

For you—the sale of a Pope means the smallest amount of trouble and the greatest amount of profit.

If it's a Pope sale both parties are satisfied.

Write today for our interesting dealers' proposition. It will pay you to know Popes and their profits.

Questions and Answers

CALCULATING GEAR RATIO

PLEASE tell me how to find the gear ratio on a motorcycle.

A. DEMARCO.

Camden, N. J.

Find the number of teeth on the motor-shaft sprocket (*m*), on the outside sprocket of countershaft (*o*), on the inside sprocket of countershaft (*i*), and on the rear wheel sprocket (*r*). Multiply *m* by *i* and *o* by *r*. Divide the product of *m* and *i* by that of *o* by *r* and get the ratio.

PISTON DISPLACEMENT

PLEASE tell me how to find the piston displacement of a motor when the bore and stroke are known. Also, the best route from Brooklyn to Stroudsburg, Pa.

BENJAMIN WORTH.

Brooklyn, N. Y.

Multiply the bore by itself and then this product by the stroke, then by 0.7854. This is for one cylinder. For a twin, multiply the result by 2.

The route is: Brooklyn, New York (Edgewater Ferry—130th street), Fort Lee, Hackensack, Arcola, Hohokus, Ramapo, Tuxedo, Southfield, Monroe, Chester, Goshen, Denton, Tri-States, Port Jervis. Distance, New York to Port Jervis, 77 miles. Roads are well posted. From Port Jervis cross toll bridge to Pennsylvania side, then go to Milford, Dingman's Ferry, Bushkill, Shawnee-on-Delaware, and Delaware Water Gap, 40 miles.

FIT NEW RINGS

MY 1914 two-speed twin has not the power that it should have and I purpose fitting new rings, the Sta-tite model. As these cost more than the regular rings, would it be better to fit them or purchase a set of new cylinders? Are parts from a supply house reliable?

ROBERT JOHNSON.

New Albany, Miss.

We suggest that you fit the Sta-tite rings rather than get new cylinders. You should be sure that the old cylinders are not scored or too badly worn, however. If they are scored, have them re-bored, then get the diameter and fit the Sta-tite rings yourself. They will work satisfactorily.

We cannot advise your getting parts from anyone but the manufacturer or his accredited agent.

THIS FIRM HAS PARTS

I WOULD like to get parts for a New Era motorcycle and ask you for the address of some house which carries them. Also, if there is a 1916 edition of the *Motorcycle Manual*.

PERCY J. STUBBS.

Athol, Mass.

Communicate with the Motorcycle Parts Manufacturing Co., 2127 Michigan avenue, Chicago, Ill., for New Era parts. There is no 1916 edition of the *Manual* at present.

PEDAL-STARTER FOR YALE

I WOULD like to get a kick-starter for my 1914 Yale machine and wish to know if such a starter would give satisfaction.

J. B. CLARKE.

Washington, D. C.

We think that you could fit the pedal-gear starter which was used on the 1915 Yale model. It will give satisfaction. You may be able to get such a starter from H. D. Capron, of Toledo, O., who has taken over the motorcycle parts for the Yale.

Model H—$75.00

THE MOTORCYCLIST AS A FIRE FIGHTER

(Continued from page 25)

about four p. m. the lookout on Eldon Mountain reported a fire to the northeast and about twenty miles distant. Three automobiles were rushed off, packed with Mexicans, shovels and "chuck." About an hour later, the lookout reported smoke eight miles east of the other fire. He was not sure whether it was a new fire, or whether the wind was merely drifting the smoke from the first one. When I reported from the next telephone station, I was told the location of the fires, and directed to get as near as possible and find out just what the conditions were.

Saving the Town of Flagstaff

Inside forty minutes I was reporting from the ranger station that there were two fires, the second one spreading rapidly. I was instructed to rush to the first fire and inform the ranger there concerning the new blaze. If he could not spare men from the first fire, I was to get more, any way I could. This is one of the many instances where the motorcycle saves time, and nowhere is time so valuable as in battling with a forest fire.

There was one large fire which, for a while, seemed to threaten the town of Flagstaff. Try as we would, it would get away from us, time after time. More men were needed, as well as more shovels and water (water for the men, not for the fire). Glenn and I rode back and forth between the supervisor's office at Flagstaff, and the scene of the fire. Often we carried an extra fire-fighter on the luggage carrier. Sometimes we packed out a pair of huge, dripping water bags; or perhaps a bundle of shovels, tied on at all angles and looking like a heap of jackstraws.

But the motorcycle in the Forest Service does not even confine itself to fires in general. Many a time, when the long thin threads of copper broke that connected the central office with the many ranger stations and fire lookouts, patrolmen's camps and ranches, and which made possible the organization of the Forest Service, the motorcycles were pressed into service in a new role. Carrying a lineman on the luggage carrier, I would follow down the "roads" and trails, along which the telephone line was built. Often we rode out over the bare limestone hills, following the line until the trouble was run down. What would have been a two days' job for a man on horseback, was abare three hours' work for the motorcycle.

Other Forms of Service

Sometimes, when the fire danger was not too great, I would take one of the rangers to a timber sale he had to superintend, or to a homestead which was to be surveyed. Often I acted as despatch bearer, and many times I have carried a great stack of sheep allotment or driveway posters strapped on the luggage carrier.

The predicted trouble which we were expected to have with our machines did not develop. The fires we overlooked, if any, never materialized. The joy riding we were to have indulged in limited itself to getting to a fire—P. D. Q. And little by little our gas bikes worked their way into favor, not only in the Forest Service, but throughout the whole of the Coconino, for it was realized that as a dependable, economical, speedy, and all 'round satisfactory means of locomotion the motorcycle was there "with bells on."

MEYERS PURCHASES A NEW HENDERSON MODEL

SAN FRANCISCO, Cal.—Jack Meyers, head mechanic for the Union Ice Company's big fleet of motor trucks, has been using a motorcycle for making his rounds. He has the reputation for having owned and used more motorcycles than any man on the Coast, having purchased used machines in practically all cases, and disposed of them after having ridden them for a while. His last used machine was a 1913 Henderson, which he sold after covering 8,000 miles on it. He was so satisfied with its performance that he went to the Motorcycle Sales Co., last week and purchased a new Henderson, the first new machine he had bought in years.

ANOTHER RIDER WILLING TO SERVE UNCLE SAM

TO the list of riders who will volunteer their services in case of need in this country is to be added the name of James F. Tucker, of Pennville, Ind. Tucker writes that he is willing to serve his flag to the best of his ability. His machine at present is a single cylinder P. E. M., but he intends to buy a three speed twin in the near future.

A handsome spark plug case and a spark plug wrench . . **Free**

With four spark plugs that will outlast your engine . . **$4**

Mail us a $4 check or money order for four Splitdorf Spark Plugs (the plug with the Green Hex Jacket). We will forward you the plugs, carriage prepaid, and with them we will send you, free, a highly polished spark plug case and a spark plug wrench, complete with detachable handle. The case is handsomely finished, and fitted with recesses for four plugs. Keeps your "extras" handy and compact. The wrench is one of the most convenient tools you can have.

These plugs are practically indestructible. Dozens of times they have run 20,000 to 30,000 miles without ever having been cleaned.

Made in all sizes and in types to suit every car, motor cycle, motor truck, motor boat, aeroplane, tractor and stationary gasoline engine.

When ordering, be sure to state size desired or name of engine.

BICYCLE BEGAN CASTOR STEERING

Noted Automobile Authority Claims This Form is Proper One and Credits High Wheeler As Pioneer In Its Use

THAT the automobile people, even at this late date, have to turn to the bicycle to get the correct theory and practice in steering, is evidenced by an interesting controversy now going on in one of the automobile journals. One of the recognized authorities, Charles E. Duryea—also an old bike rider—points out that in the majority of cases, automobile steering arrangements have been badly neglected, and cites the castor effect as the proper one.

In this arrangement, a line through the center of the pivot should intersect a vertical line at the wheel's point of contact with the road, or the pivot line should strike the road ahead of that of the wheel's point of contact. The action of the wheel in either case would be like that of a castor on a piece of furniture: a push in any direction sets the castor wheel in the proper direction automatically. Mr. Duryea refers to the Star high-wheeler as an excellent example of this action, and states that these bicycles, made between 1878 to 1883, were the best steerers ever made.

In the Star and other machines with small wheel at the front, the line through the center of the pivot touched the ground well ahead of the vertical line of wheel contact. The principle developed by the designers of the Star and similar high-wheelers was incorporated in the old Duryea automobiles, in the Panhard-Levassor and other widely-known makes. The principle has apparently been forgotten in the American automobile industry, but the attention attracted to it by the controversy has done much to revive it. This is but one of many principles developed by the bicycle designers which the industry has contributed to motor vehicle engineering.

GOODYEAR MEN GETTING N. C. W. MEMBERSHIPS

SAN FRANCISCO, Cal.—As a result of a recent conference between Al. Grueninger, manager of the New Century Wheelmen, and Frank Carroll, local manager of the Goodyear Tire & Rubber Co., salesmen of the Goodyear branch have recently been very active rustling up new memberships for the Wheelmen among local supply and accessory dealers.

This is bringing in considerable money in the way of initiation fees, the money to be used in promoting racing events. It is also serving to stimulate greater interest in bicycles among dealers.

BUTLER COUNTY C. C. PICNIC

HAMILTON, O.—The annual picnic of the Butler County Cycle Club will be held on Sunday, August 13, it has been decided, and the committee in charge is hard at work on arrangements for the event. The several summer affairs already given by the club have been highly successful, a lawn fete a short time ago being one such affair. A dance will be given on the evening of August 13.

TO HOLD ROAD RACE ON LABOR DAY

LOS ANGELES, Cal.—The North Los Angeles C. C. will hold its first annual road race on Labor Day, September 4. The distance will be 24 miles. Gold and silver medals will be awarded as well as a Pierce racer for the winner.

ROAD RACE AT READING, PA.

READING, Pa., Aug. 8.—Arrangements are in progress for a bicycle road race for riders under 18 years of age. The race will be run Friday, August 18, over a 20-mile course and a handsome list of prizes will go to the place winners.

CYCLE RACES FOR IOWA FAIR

BURLINGTON, Ia., Aug. 8.—A one-mile bicycle race for boys under twelve years of age and a two-mile event for cyclist between the ages of twelve and eighteen are scheduled for the first day of the Tri-State fair, Monday, August 14.

THEY'RE GOING FAST

LOS ANGELES, Cal.—Pacific Motor Supply Co. received a carload of Reading Standard Bicycles on July 29, and report business so good that they expect to have it all sold out within a few days. Another carload is expected within a few days.

Brilliant Burners

— THE PERFECT HEADLIGHT —

Are Growing in Popularity with the Rider

BECAUSE—

You can get THREE TIMES the light you are now getting.

You can get the same light for much less cost.

You always have a dependable light — absolutely steady, no flicker, no jarring or blowing out — even without the front glass in the lamp.

You have electric brilliancy with Prest-O-Lite reliability.

DEALERS: Brilliant Burners sell—they repeat—they are advertised. The riders in your community will buy of you if you handle them. Send today for literature.

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

MAKE IT A BELT DRIVE FOR 1917

TWO things are going "Big" for 1917—the Lightweight and Belt Transmission—both will go "Big" because logically both go hand in hand. Belt drive, besides being understandable by the big gathering of new motorcycle recruits that are coming to the front in 1917, has all the positiveness of power transmission that is required of Lightweights, yet it maintains a flexibility, a smoothness that is very much desired, in fact is essential.

Its further points of merit are a very high degree of efficiency, constantly maintained during its long life, and a complete absence of any rigid limitations in design. Then also there is that quietness, that silky smoothness and, most important of all, a very low cost of upkeep.

All this you get in a well designed Lightweight, having belt transmission, providing, of course, that the belt you insist upon is a

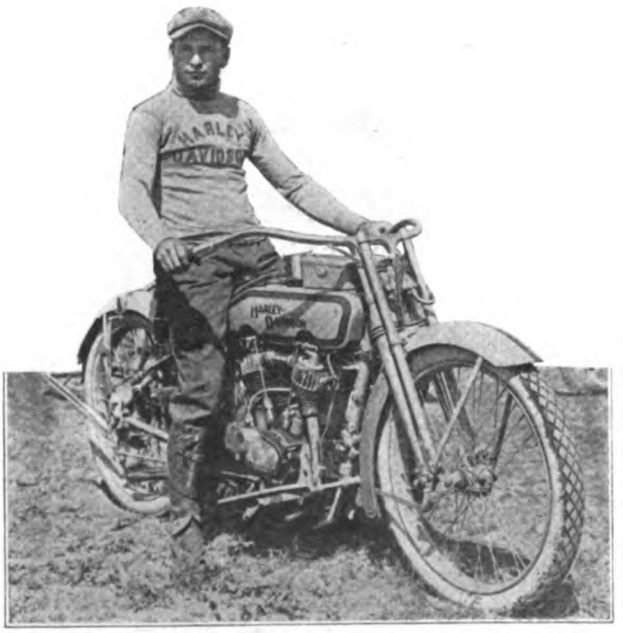
Harley-Davidson

For real sport—the race to the summit of Pikes Peak,—12,000 feet in the air—is in a class by itself—the climb of 5,100 feet in 12 1-2 miles being a real test of power.

V. M. C. Van Der Hoof of Denver and Frank Kunce of Loveland, Col.—both on Harley-Davidsons—were the stars.

"Van" captured the sidecar event, winning the Rocky Mountain Cup valued at $250, and Phebus and Lytle—also on Harley-Davidsons—brought in more points for the Silent Gray; so it was Harley-Davidson 1st, 3rd and 4th.



Frank Kunce, of Loveland, who divided the Pikes Peak honors with V. M. C. Van Der Hoof of Denver—both on Harley-Davidsons.

The Colorado Championship for stock machines was won by Kunce with Williams on a Harley-Davidson taking third honors; so it was Harley-Davidson 1st and 3rd. Kunce

Digitized by Google

Get Pikes Peak

also took second honors in both open events.

In the Colorado Championship the daring rider from Loveland won the $250 trophy known as the Pikes Peak Auto Highway Company Cup to be held for a year and to be held permanently when won three times.

The time made by Van Der Hoof and Kunce was startling. "Van" climbed the mountain with sidecar and passenger in 29:23. Kunce in the stock event shot up the mountain in 22:03, the time in the open event being but 5 seconds faster.

Gradients were as great as 10.50 per cent and the average grade was 7 per cent for the entire 12 1-2 miles.

The Uniontown Hill Climb a year ago won by Irving Janke on a Harley-Davidson showed that the Harley-Davidsons have the power as well as the speed. The Pikes Peak contest this year clinches Harley-Davidson superiority.

You get quick results from advertisers when you mention MOTOR CYCLE ILLUSTRATED.

Digitized by Google

Collecting Championships

Harley-Davidson annexed another at Detroit August 13th—the hundred mile F. A. M. Championship.

Ray Weishaar and Red Parkhurst made it Harley-Davidson first and second. They led the field a merry chase, with never a look-in for the other stars. Parkhurst carried off the sweepstakes for fifty and seventy-five miles, and was leading when he ran out of gas at ninety-five miles.

The Harley-Davidson habit of having at least two men up in front made it all right. It was merely a question of which of the Harley-Davidson riders would win.

Weishaar finished in eighty-nine minutes, and Parkhurst had plenty of time to fill with gas, get out on the track again (laps ahead of his nearest competitor) and bring in the added honors.

Ray Weishaar, winner of the hundred mile F. A. M. Championship, the sixth century race he has won with the Harley-Davidson.

The four long-distance races of the year—Dodge City, Sheepshead Bay, La Grande and Detroit—have been won by the Harley-Davidson.

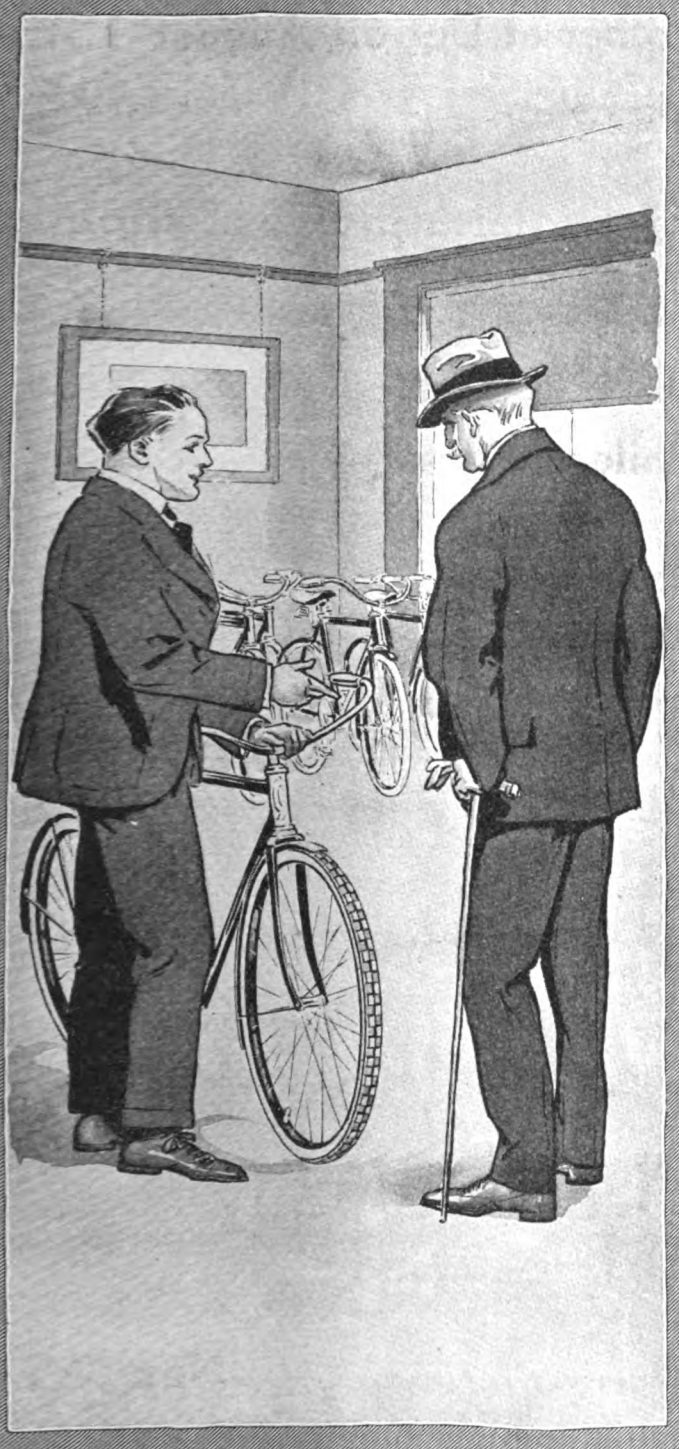
BLUE STREAKS



Stop Bargaining

The Goodyear one-price bicycle tire policy is very much in accord with the common sentiment of the American people—*equality of opportunity in buying to all.*

The selling of Goodyear Blue Streak Bicycle Tires under the one-price policy, has been raised from talking about price, to demonstrating *what is being offered for the price.*

The one standard Blue Streak price, plus the one standard Blue Streak guarantee has ended all the haggling and "bargaining" that must accompany the selling of an unknown tire of unknown price and guarantee.

Do you see how the Goodyear Blue Streak standardization eliminates confusion on the part of the tire buyer?

Do you see how it enables you to carry a smaller stock of tires because you need carry only one style and one size?

And do you see why Blue Streaks mean quicker sales for you and therefore less selling expense?

These are the very positive advantages that over 10,000 Goodyear dealers have demonstrated to their own satisfaction—*and profit*—this season.

Dixie Run United States Tire Victory

Out of twenty contestants, only six finished, five of them on machines equipped with United States tires, as follows:

Herbert Webb on Indian
Hines on Harley-Davidson
Hollands on Indian
Hudson on Indian
Webber on Indian

Three weeks rain preceded the event. Three days steady rain made the roads mud holes, so heavy no rider checked at any control on time.

"Hardest run ever staged," said one rider.

But despite all this—

PERRY SHOWS HIS HEELS IN BIG DENVER MEET

Excelsior Veteran Takes Three Events From Classy Field, Including 50-Mile Feature Race; Don Johns and His Indian Win Mile Time Trials; Clymer, Excelsior, Gets Colorado Championship; Protests Stop Sidecar Event

By H. A. STEWART

DENVER, Col., August 14.—"Watch your step, boys; watch your step!" was the warning slogan passed along by the riders as they went to the tape Saturday afternoon for the greatest speed carnival ever held at Overland Park, one of the most treacherous tracks in the country to ride owing to its long straightaways and narrow turns.

Bob Perry showed his heels in fine shape to a classy field made up of Johns, Clymer, Stokes, Walker, Wolter, Warner and half a dozen others, and ambled away with over $320 in good old mazuma. Perry put the P. D. Q. on the 15-mile open event, which he won in 12:56, leading all the way from the second mile. He also walked off with the gelt in the 5-mile open race, in 4:18, and with the stellar event of the day, the 50-mile free-for-all, which he finished in 43:44⅕. Bob was one proud little feller when the returns were all in, because the last time he rode on this track, in 1913, the best he got was dust and second money. Today they are hailing him as the "real goods," and not without cause.

Johns Takes Time Trials

Don Johns and his Indian deserve recognition for winning the time trials, and this rider may be considered as ranking next to Perry in the interest of the fans. Johns made the mile in 49⅕ seconds, improving Perry's time for the circuit by one and one-fifth seconds, and cutting one-fifth of a second off the track record.

Johns' hoodoo was with him, however, for he was retired in the 15-mile open event after leading for the first mile, and was prevented from starting in the 5-mile race by the fact that someone filled his motor up with oil. The climax of his hard luck came in the 50-mile race when, after leading for two miles, and finally dropping back to third place for Stokes and Perry, he took a beautiful broad slide in the sixth mile and went out.

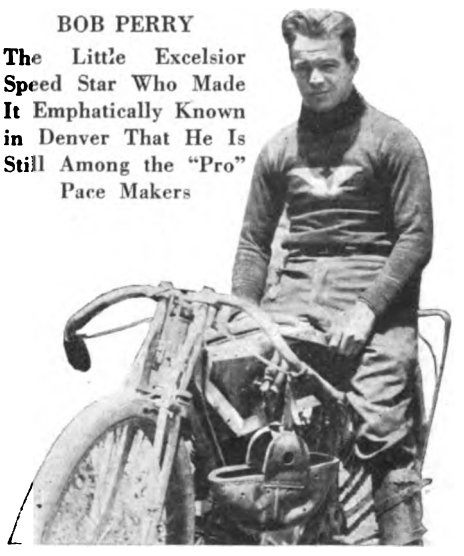
Jinx Overtakes Walker

Otto Walker also had tough luck, for his Harley-Davidson didn't behave just right, and he had to content himself with third place in both the five and 15-mile open events.

There was no question about Bob Perry's victory in the 50-mile race, but the second place had not been decided as the sun went down. Joe Wolter and Floyd Clymer, Excelsiorites, both think they finished second, and owing to a somewhat uncertain checking system there is going to be a nice problem for Competition Chairman Donovan to straighten out.

Sidecars Bring a Protest

The laugh of the day came in the 5-mile race for sidecars. "Spec" Warner, with his Indian combination, finished first, but "Happy" Lyttle, of Denver, driving a Harley-Davidson, asserted that "Spec" put something across on him—or words to that



BOB PERRY

The Little Excelsior Speed Star Who Made It Emphatically Known in Denver That He Is Still Among the "Pro" Pace Makers

effect—and both first and second places were protested, and the other contestants were flagged.

Floyd Clymer, the youngster who copped two of the Pikes Peak solo events last Thursday, brought home the bacon in the Colorado flat track championship (exclusively for Colorado riders) in 4:29⅘, nosing out Kunce, the Loveland whirlwind, by a hair.

Frank Stoll, of the Stoll Tandem Co., of Denver, acted as referee, and Howard Toncray was the starter. The summaries:

Mile time trials.—Don Johns, Indian, first, time 49⅘; Bob Perry, Excelsior, second, time 51; Glen Stokes, Excelsior, third, time 53⅗; Joe Wolter, Excelsior, fourth, time 1:01⅕.

Fifteen mile open.—Bob Perry, Excelsior, first, time 12:56; Glen Stokes, Exelsior, second, time 13:12⅕; Otto Walker, Harley-Davidson, third, time 13:29⅘; Joe Wolter, Excelsior, fourth; Floyd Clymer, Excelsior, fifth.

Five mile sidecar event.—Paul Warner, Indian combination, finished first; "Happy" Lyttle, Harley-Davidson combination, second. Both positions protested.

Clymer Gets "Champ" Title

Five mile open.—Bob Perry, Excelsior, first, time 4:18; Glen Stokes, Exelsior, second, time 4:22; Otto Walker, Harley-Davidson, third, time 4.23⅗; Joe Wolter, Excelsior, fourth, time 4:46.

Five mile Colorado State Championship.—Floyd Clymer, Excelsior, first, time 4:29⅘; Frank Kunce, Harley-Davidson, second, time 4:37⅕; Bernard Chasteen, Pueblo, Col., Excelsior, third, time 4:59.

Fifty mile free-for-all.—Bob Perry, Excelsior, first, time 43:44⅕. Second place winner not decided, Clymer and Wolter, both Excelsior, claiming the position. Kunce, Harley-Davidson, finished fourth, and Warner, Indian, fifth.

SIX FIRMS ENTER BIDS FOR ARMY MOTORCYCLES

NEW YORK, August 12.—An even half dozen bidders entered proposals for supplying the sixty-three motorcycles with sidecars to the United States army in answer to the first substantial recognition of the power-driven two-wheeler's military usefulness given in a request for bids sent out by the Quartermaster's Department here, as told exclusively in last week's issue of **Motor Cycle Illustrated.** The bids, which were entered in triplicate, accompanied with a bond or other security to ensure the carrying out of the contract, showed the Thor as the lowest bidder.

DIXIE M. C. MUDFEST MADE SCORES LOOK WOOZY

No Rider Saved More Than 800 Points in the 24-Hour Trial and Some Contestants Had Not Been Heard From at Latest Reports; Herb Webb, Indian, Gets Consistency Award With 790 Points; W. B. Hines, Harley-Davidson, Is Highest Amateur With Score of 785

By G. A. MARTIN

ROANOKE, Va., Aug. 14.—Those who predicted that the annual endurance run of the Dixie M. C., to Richmond and return, would set a new mark for severity in such contests were not far wrong, for the figures available at this time indicate that not a single rider scored above 800 points. It was tough going, almost from the start, and those who managed to keep their points up in the neighborhood of the 800 mark were pretty well satisfied.

Webb Is High Man

The most reliable figures now at hand place Herbert Webb as high man in the professional division. He rode a three-speed Indian, and is credited with about 790 points, which give him the consistency medal in his class. W. B. Hines, Harley-Davidson, is the top-notcher in the amateur class, his score being about 785 points. Milton Menefee, Harley-Davidson, is second highest in the professional squad, with a score of about 725, while J. W. Hollins, Indian, is credited with third position among the professionals. He saved about 700 points.

It is stated that only these four scores will be considered by the contest officials. Webb was the first rider to reach Richmond and Hines was second. The order was reversed at the finishing point in Roanoke, and Hines was first to check in, two minutes late. Webb was eleven minutes late, but it is explained that he will take the highest consistency score because of the regularity of his checking at most of the controls along the route.

Throughout the 300 miles of the course the riders encountered mud varying from one inch to three feet deep, owing to the heavy rains of the last few weeks. At some points considerable stretches of the road were under eighteen inches to two feet of water, through which the contestants U-boated or pushed, according to their ability to remain in the saddle.

C. H. Hudson, Indian three-speed, managed to get through but was nine hours late. E. M. Young, Excelsior three-speed, went out at Gordonsville with a broken transmission case. E. J. Renner, two-speed Indian, retired at Lynchburg when the mud got too deep for him. B. E. Johnson, two-speed Dayton, retired at Lynchburg with a broken spring. W. Finney, Indian three-speed, was put out by deep mud at Crewe. J. P. Guerrant, three-speed Excelsior, was stranded not far from Richmond when his gasoline tank went dry. A. G. Howell, Indian, spilled at Lynchburg and went out with an injured knee.

More Retirements

C. Webb, Indian sidecar combination, went out, and O. Leahr, Harley-Davidson, after being first at Bedford and Lynchburg, was retired by tire trouble between Lynchburg and Richmond. He had not finished late Monday evening. C. R. Webber, of New York, Indian three-speed, came in 24 hours late, having used a plow handle and a piece of a tobacco crate in lieu of handlebars on the final stretch of the run.

Herbert Webb's Indian was fitted with Dixie magneto, Goodyear studded tire on front and United States Nobby Tread on rear wheel. J. W. Hollins' Indian was equipped with United States studded tire in front and Pennsylvania Vacuum Cup in rear, a Splitdorf magneto being used for ignition. Hines and Menefee, on their Harley-Davidsons, had Bosch ignition and Firestone Non-Skid tires.

WEBSTER LEAVES MIAMI TO JOIN HOUK MFG. CO.

NEW YORK, August 15.—Ralph D. Webster, for some time past connected with the Miami Cycle & Manufacturing Company, of Middletown, Ohio, has tendered his resignation to that company, and will become general sales manager for the Houk Manufacturing Company, of Buffalo, N. Y., manufacturer of automobile wire wheels. Mr. Webster has a host of friends in the cycle industries, who will be interested to learn of his new connection, and who will regret that he is no longer directly connected with cycledom.

CLEVELAND RIDERS COME FROM ALL TRADES

LOS ANGELES, Cal.—One of the novel advertising devices in the Cleveland lightweight agency on West Eighth street, is a big framed list of purchasers which occupies the center of the glass door of that establishment. It is the idea of C. Will Risden, proprietor of the agency, and it certainly draws the crowds.

Among the occupations represented on the list, according to Manager Barney Maurath, were chauffeurs, engineers, ranchers, tent manufacturers, marketmen, collectors, aviators, insurance agents, doctors, pugilists and riders of big machines. "We have everything but a submarine runner," said Maurath, "but we are pretty close to that." Several Clevelands are owned by sailors aboard the warships at San Pedro, and we may get one as a submarine tender yet."

BLOOD IS BACK FROM LONG FOREIGN TRIP

Hendee Export Manager Completes 60,000-Mile Tour of Foreign Markets—Enthuses Over American Trade Future

SPRINGFIELD, Mass.—W. D. Blood, export manager of the Hendee Manufacturing Company, of this city, has just returned from a business trip around the

Export Manager Blood

world. This trip, which began in September, 1915, totaled 60,000 miles, and covered New Zealand, Australia, Tasmania, South Africa, Ceylon, India, Federated Malay States, Singapore, Java, the Philippines, Siam, China and Japan.

Several new Indian agencies were established at points where they were thought advisable. Together with those already in existence, these new agencies will make it possible for a purchaser to obtain an Indian motorcycle of the latest model in any foreign center of population.

Indian service goes farther than that, however, for it is now possible to obtain right from the stocks of these Indian dealers any part of a model that may be required in its upkeep.

Mr. Blood was accompanied by his wife during the entire trip. He is most enthusiastic over the splendid future for American manufacturers in a commercial exploitation of foreign fields.

CONVENTION DOINGS IN "TIRE MERCHANT"

ATTRACTIVE pictures of the third annual salesmen's convention occupy a goodly space in the July issue of *The Tire Merchant*, the house organ of the Continental Rubber Works of Erie, Pa. The first page shows the active sales and executive forces facing the cameraman, while a full page of views of the picnic for all Vitalic people succeeds this.

WEISHAAR IS F. A. M. NATIONAL 100-MILE CHAMP

Tears Off the Century on Harley-Davidson in 89 Minutes Flat at Detroit After Thrilling Battle; Parkhurst Leading at 95th Mile When Tank Goes Dry; Graves, on Indian, Bests Parkhurst in Spectacular Speed Duels Preparatory to the Feature Race

By PAUL J. BAILEY

DETROIT, Mich., August 13.—Ray Weishaar, the Kansas speed purveyor, who specializes in century runs, touched the high-water mark this afternoon when he won the 100-mile F. A. M. National Championship race on his Harley-Davidson in the meet held on the mile track here by the Interstate Racing Association. He won only after a long hard fight, coming from behind in the last five miles of the battle and winning after it seemed that his team mate, Parkhurst, had victory assured.

Morty Graves, who won the 100-mile title last year, was the victim of particular ill luck this time, as his Indian machine took fire right after the start of the big race today and put him out of the running. Ray Creviston on his Indian then went to the fore and set a sizzling pace for the crowd.

At ten miles Crevvy was leading, with Parkhurst, Harley-Davidson, in hot pursuit and several others bunched not far behind. Creviston put the spurs to 'er and took the first sweepstake prize at 25 miles, covering the distance in 21:44.

Pity the Poor Pitmen!

Lorenzo Boido's rear tire flattened in the thirty-third mile and he halted at the pits with his Excelsior for a quick change. Stops for various little things began to be seen, most of the riders getting fixed up and back in the race again in a short time. Bertram sidetracked his Cyclone at the pits in the thirty-seventh mile for valve tappet adjustments, and a lap later Verrill rolled into the Indian pit for a short session.

Crevvy was going strong until the fortieth mile, when he went out for keeps. Then Parkhurst, who had been hanging on like a pursuing Nemesis, shot to the front and began hurling distance behind him in a most industrious manner. Bill Brier moved up to second place by this change, and Weishaar fell heir to third.

At this point Harley-Davidson stock soared visibly, as the three Milwaukee machines were running first, second and third and going strong. They boomed across the half-way line in this order, Parkhurst's time for the distance being 43:49.

Speed Corporation Liquidated

A few miles later the close corporation was mussed up a little, however, as Brier's drive chain broke and the delay let Weishaar up into second place while Verrill and his Indian stepped into third.

Thus at 75 miles the order was Parkhurst, Weishaar and Verrill, with the time 66:09.

Boido, in the meantime, had gotten rolling at a clip that was making the crowd sit up and pay close attention, and was rapidly cutting down the gap that kept him from the first row. He had lost a lot of time while in the pits earlier in the race, but the bundle of speed he unhooked in the latter half was rapidly changing the situation. As the race entered the final stages, Parkhurst was leading by a healthy margin, Weishaar second, and Boido had come up to about even terms with Verrill, these two fighting it out for third.

Then at 95 miles Parkhurst's gasoline tank ran dry.

He coasted to the pits with his motor dead, was treated to a lightning-fast refill by the highly efficient pit crew, and was away again just like that, but the half minute holdup had been just enough to let Weishaar tear by into the lead.

Ray Weishaar, Crowned 100-Mile F. A. M. National Champion at Detroit

And so they roared past the checkered flag at the finish with Weishaar a quarter lap to the good, Parkhurst second, and Boido third, having pulled away from Verrill by a safe margin for the position.

Weishaar's time for the grind was 89 minutes flat. The track was dry and hard from the long absence of rain, so that the machines slid on the turns, slowing the time as compared with other races that have been run here, though the machines in action here today were unquestionably the fastest collection of speed boats ever gotten together at any meet in the city.

In the preliminary events, Graves took down enough glory to help console him a little later in the afternoon for his hard luck in the hundred-mile. He won the first five-mile heat after the hardest kind of a battle with Parkhurst, the two riding right together all the way. They were not more than a dozen feet apart from start to finish, and the way they drove into the turns threw up a steady spray of dirt that looked like the bow wave of a torpedo boat destroyer at high speed. Graves won in 4:12 2/5.

Brier got the second heat after a breath-taking scrap with Boido, the two crossing the line in an elbow-to-elbow finish that stood the crowd on its toes.

Graves Takes Final Heat

Then Graves and Parkhurst came together again in the five-mile final, and it was the same fight all over again. Graves crowded into the lead, but Parkhurst stuck to him like a leech and couldn't be shaken off. He rode so close he was fairly in Graves' shadow all the way, trying hard to squeeze past every moment. Graves pushed on the reins and kept at it, and managed to stay in front to the tape, winning in 4:11, with Parkhurst second and Brier third. Summaries:

First heat, five miles—Graves, Indian; Parkhurst, Harley-Davidson; Luther, Excelsior. Time 4:12 2/5.

Second heat, five miles—Brier, Harley-Davidson; Boido, Excelsior; Janke, Harley-Davidson. Time 4:22.

Final heat, five miles—Graves, Indian; Parkhurst, Harley-Davidson; Brier, Harley-Davidson. Time 4:11.

100-mile F. A. M. National Championship—Weishaar, Harley-Davidson; Parkhurst, Harley-Davidson; Boido, Excelsior. Time, 89:00.

THOR ACTIVITY IN SOUTHERN CALIFORNIA

SAN FRANCISCO, Cal.—Z. Barton, Coast manager for the Thor organization, has just returned from a fortnight's trip in Southern California, where he went with Charles B. O'Hare, the general sales manager. He will return south in a few days, calling on the San Joaquin Valley dealers en route.

Barton has about completed arrangements for materially strengthening the Thor representation at Los Angeles, and reports business on the increase in much of the southern territory. Hansen & Nelligan, agents for the Riverside district, report much better business, with sales easier to close than a few months ago; and H. A. Gould, agent at Pasadena, sold three new machines during the week of Manager Barton's visit.

TWO DAY MEET FOR ROCKFORD

ROCKFORD, Ill.—A two-day race meet is being planned for August 19 and 20 by the Rockford M. C., the North End driving park having been obtained for the purpose. On Saturday, August 19, there will be a 10, 15 and 25 mile open races, while on the day following there will be either a 100 mile and two short events or a 15, 25 and 50 mile race.

ONLY FOUR SURVIVE SEATTLE HEART-BREAKER

Twenty-Two Contestants Are Eliminated by Continued Hardships of 604-Mile Grind, One of the Most Severe Ever Held in This Country; Taintor, Harley-Davidson; Armstrong, Excelsior; Mercer, Indian, and Meagher, Thor, Are the Finishers; Will Split $460 and Merchandise Prizes

By W. F. MARQUART

SEATTLE, Wash., Aug. 14.—Coated with dust and nearly exhausted from 44 hours of almost continuous travel, Harry Taintor, riding a Harley-Davidson, "Bud" Armstrong, on an Excelsior, Fred Mercer, on an Indian and Jack Meagher, Thor, finished the 604-mile endurance run of the Seattle Motorcycle Club this evening on schedule time. These were the only riders out of 26 entrants to complete the long grind, and it was only through sensational spurts during the last twelve hours that this hardy quartet managed to get through on time.

There Were No Perfect Scores

The four finishers will divide $460 and numerous merchandise prizes, in proportion to their relative scores, which cannot be officially determined until returns have been received from the eight checking stations along the route.

The run was the second longest, and certainly one of the hardest ever staged for motorcycles in this country. It was replete with hardships from start to finish, but there was only one serious accident. John Walker, of Seattle, ran into a barricade while riding at speed along a road near Bothel and sustained internal injuries which left him in a very critical condition.

The contestants struck deep sand between North Yakima and Goldendale, and it was along this stretch that most of the machines were retired. Only a few were able to check in at Goldendale within the time schedule, and the serious loss of time on this leg during the first day's run forced the four finishers to ride continuously without sleep till the end of the grind.

Off the Course

Near Goldendale, 262 miles from Seattle, Armstrong and Meagher lost their way and wandered throughout the night until 2 a. m. before getting back on the course. The excessive heat in eastern Washington caused Armstrong to faint, but the plucky roadster climbed back into the saddle and continued the run after being revived.

Only five machines passed Portland, Ore., the first checking point of the second day's run, and one of these was retired after leaving Portland, although this leg was the eastiest of the whole course.

From Seattle the contestants proceeded to Cleeulm, North Yakima, Goldendale, White Salmon, Wash., Hood River and Portland, Ore., returning through Castle Rock and Olympia, Wash.

J. H. McDermott, of the Goodyear Company, and Ted White, of the Piper & Taft sporting goods house, were the official starters, and these men, with "Dug" Shelor and William A. Simonds, newspapermen, were the checkers at the finish.

All the machines were numbered and the riders carried official watches and timecards. The contest started at 3:30 a. m. Sunday, Aug. 13, and Taintor, the first man to return, finished at 6:27 p. m. on Monday. Armstrong came in at 6:29; Mercer at 6:30 and Meagher at 6:45, all according to schedule.

Big Crowd at Finish

Nearly 500 Seattle motorcycle enthusiasts gathered at the finishing point and as Taintor, grimy and haggard, came roaring up to the checking station they gave him a rousing cheer. Similar ovations were given Armstrong, Mercer and Meagher as they appeared.

Ted White, who promoted the run, expects to have final returns from all the checking stations in a day or two.

The Seattle M. C. will show its usual good sportsmanship by giving a banquet for the four finishers in the course of a week or two.

PLANNING REBIRTH OF MILWAUKEE M. C.

Well Attended Meeting Appoints Committee to Draft Reorganization and Merging Plans

MILWAUKEE, Aug. 14.—At a meeting in the Republican House here, at which plans were discussed and evolved for reorganizing the Milwaukee M. C. and consolidating all of the motorcycle clubs hereabouts into one solid organization, a committee of three, comprising Vice-President Paul Bruess of the club, and E. J. Mueller and Frank B. Rodger of the Harley-Davidson factory, was appointed to meet with a similar committee to be appointed by a club which is aborning, so to speak, on the south side of the city and thrash out matter appertaining to reorganization and consolidation.

Mr. Rodger gave the club members an entertaining report on the happenings at the National F. A. M. convention at Providence, which he attended as delegate from Wisconsin, and urged upon his hearers a fuller measure of support for the national riders' body. He pointed out the accomplishments of the Legal Action department in the matter of remedial legislation in the east, and pointed out that Wisconsin riders were fortunate in the possession of a law which required merely a state license and not also a driver's permit which worked to the embarrassment of motorcycle enthusiasts in many of the eastern states. Rodger brought his talk to a close by urging full-hearted support of the F. A. M. racemeet which is to be staged on Labor Day at Detroit for the benefit of the F. A. M.

Other speakers were Fred Steirhoff of Boston, who spoke of the organization of a strong motorcycle club in his home city; E. R. Durkee, who told of the organization of a motorcycle-mounted rifle squad in Buffalo; Gus Castle of Savannah, who pointed out that Sunday sociability runs had been the real making of the Savannah M. C., and who told of the good work accomplished by the F. A. M. in having the Georgia license fee reduced; and A. W. Burges, who said a few words on the work the motorcycle has done and is doing on the Mexican border.

DONOVAN RETAINED AS F. A. M. COMPETITION HEAD

AKRON, Ohio, Aug. 14.—The first official act of the new elected president, Shelby A. Falor, of the F. A. M., was to reappoint John L. Donovan as chairman of the competition committee of the organization. In retaining the services of Donovan, President Falor points out that "John L." is perhaps the most popular man in the whole organization; that he is well liked by the trade, the speed riders and the members at large and that his good work in the position has been one of the chief means of holding the organization together.

In line with the plan of concentration of F. A. M. officers, President Falor announces that he has now under consideration the appointment of a secretary-treasurer to be located at Akron and that this plan will no doubt be consummated within the next thirty to sixty days. With the offices of the president and the secretary-treasurer consolidated, the overhead expense of running the organization will be cut considerably and more effective and far-reaching work in the way of obtaining a larger membership can be inaugurated.

HUNDRED AND HALF ATTEND INDIAN OUTING

PORTLAND, Ore.—Fully 150 riders astride all makes of machines took part in the picnic staged some 15 miles out of Portland by the Portland Indian dealers. What with an impromptu racemeet, a motorcycle tug-of-war and a pie-eating contest embracing novel features, coupled with a great big feed fest provided by the hosts, the affair was a success in the largest possible conception of the meaning of that word.

In the tug-of-war, H. Hadfield succeeded in dragging H. Kurtz's machine backward across the line and walked off with the prize, a Goodyear inner tube. Kurtz, however, came in for his share of glory by winning the racemeet over a 300-yard boulder-strewn course from E. Long, while George Pickering proved himself the champion pie eater of the occasion.

CHANDLER HAS ONLY CLEAN SCORE IN INDIANA RUN

Drove Indian Sidecar Combination and Checked to the Minute Throughout 24-Hour Contest Over Bad Roads; Cook, With Harley-Davidson Combination, and Sargent, Indian Solo Rider, Are the Other Finishers; Field Was Comparatively Small but Classy

By JACK CARR

INDIANAPOLIS, Ind., August 13.—Everitt Chandler, driving an Indian sidecar combination, was the top-score man in the Indiana Tri-State 24-hour endurance run, finishing with a clean slate over a field of the best roadsters in Indiana. The other finishers were Leonard Cook, Harley-Davidson combination, and Clarence Sargent, Indian solo machine. Some idea of the severity of the course will be gained from the fact that such veterans as E. G. Baker and George Von Staden, of the Indian team, were retired.

Chandler's Performance

Chandler covered the course, nearly 500 miles, in 21 hours of actual riding, and as far as is known checked to the minute at every one of the twelve controls and checking stations. He had as passenger Fred Dyer, secretary of the Indiana F. A. M.

Following close on Chandler's heels came Leonard Cook. He drove an improvised sidecar, which had formerly been used in delivery service, and his partner was Paul Catterson. Although these riders are both young, and without extended road experience, they made a remarkably good showing and lost, it is believed, only about 15 points. The tire jinx got after the boys, and forced them to make five switches of tires before the finish.

Clarence Sargent, being the only survivor in the solo division, had the honors in that class to himself. It is estimated that he lost about 100 points.

"Cannonball" Baker, who was captaining the Indian team, sustained a broken brake-rod while trying to avoid a collision soon after starting the run, and as a result was unable to slow up his machine near Bedford while rounding a turn. He struck a tree and was obliged to give up the contest. Von Staden took the wrong road in the dark near Madison, and finally wound up on the bank of the Ohio river instead of at the desired city of Madison. He gave a grunt of disgust and dropped out, and no one blamed him.

Speckman Is Out

Henry Speckman, Harley-Davidson combination, retired somewhere during the first 100 miles, but has not reported to the contest committee as this is written. "Doc" Levis, on a Henderson, failed to check at Bedford, and had not been located at latest reports. Charley Jentile, driving an Indian, had tire trouble near Madison, and was forced to give up. The other starters went out at various points, and have not been definitely heard from. Final scores are expected in a few days.

NEW JERSEY DEALERS VISIT HARLEY-DAVIDSON CO.

MILWAUKEE, Wis.—Among recent trade visitors to the factory of the Harley-Davidson Motor Company, in this city, were five from eastern New Jersey. Of this number, Joseph B. Werner and A. Kaune, of Passaic, rode through in four days; Passaic to Pittsburgh, 383 miles, first day; Pittsburgh to Lima, O., 291 miles, second day; Lima to Chicago, 261 miles, third day; and Chicago to Milwaukee, 104 miles, fourth day.

The other three visitors were Elmore Havenstrite, Paterson; J. Lee, Paterson, and J. W. Terhune, Hackensack.

PLANS ARE COMPLETED FOR CHICAGO ENDURANCE

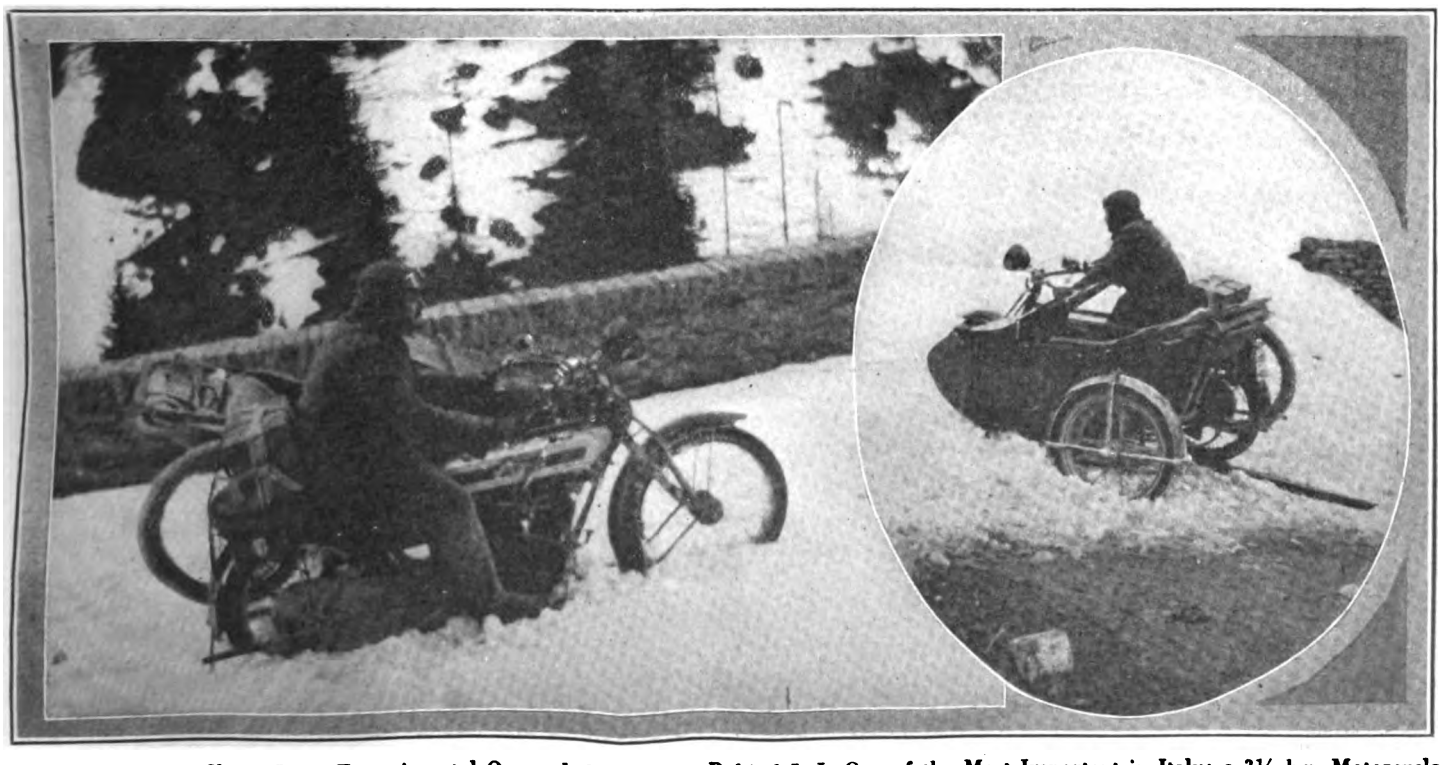
CHICAGO, Ill., August 14.—September 3 and 4 are given as the days of the two-day endurance run to be promoted by the Indian M. C. of this city for which the title "Illinois State Road Champion" is the prize.

The course reaches out from Chicago to Cedar Rapids, Ia., on the first day, and back again on the second; a schedule of 25 miles an hour is to be maintained over the 472-mile route.

The run has the active co-operation of the Chicago Motorcycle Dealers' Association and every effort will be bent to make the event a whole-hearted success.

NEW ITALIAN SIDECAR TESTED IN ST. BERNARD PASS

8-10 Horsepower Bianchi Combination Undergoes Severe Trial



The Combination Shown Is an Experimental One and the Factory Behind It Is One of the Most Important in Italy; a 3½ h.p. Motorcycle Also Is Produced, in Addition to the Sidecar Machine; It Is Stated that the Tests in the Mountains Gave Excellent Results

CLYMER AND VANDERHOFF ARE PIKES PEAK STARS

Former Wins Two Solo Events on Excelsior and Sets New Mark of 21:58 for 12-Mile Climb; Vanderhoff Wins Sidecar Event Over Same Course with Harley-Davidson in 29:23; Kunce Takes Colorado Championship and Two Seconds on Harley- Davidson

By H. A. STEWART

COLORADO SPRINGS, Colo., Aug. 14. —Floyd Clymer, the Greeley, Colo., lad who stayed out in front for 100 miles and hung up a new world's record at Dodge City on a Harley-Davidson on July 4, added substantially to his reputation here on Thursday, Aug. 10, by taking two firsts and two seconds on an Excelsior in the crowning motorcycle program of the year—the races up Pikes Peak. Not only did Clymer romp home with the bacon in both professional events but he established a new record for the trip by motor up the mountain. His best time was 21:58. Clymer is Excelsior and Harley-Davidson agent in Greeley.

Next in line for honors came Frank Kunce, Harley-Davidson dealer in Loveland, Colo., who won the Colorado championship on his Harley-Davidson with ease, and who finished second to Clymer in both professional events.

Sets Sidecar Record

Colorado certainly demonstrated that her native sons can deliver the goods, for she produced all the winners, third honors going to Vanderhoff, of Denver, who captured the opening event, for sidecars, with his Harley-Davidson combination. Vanderhoff, with Harold Boyd as his passenger, went up the perilous course in 29:23, and thus set a record for sidecars that is likely to stand for some time.

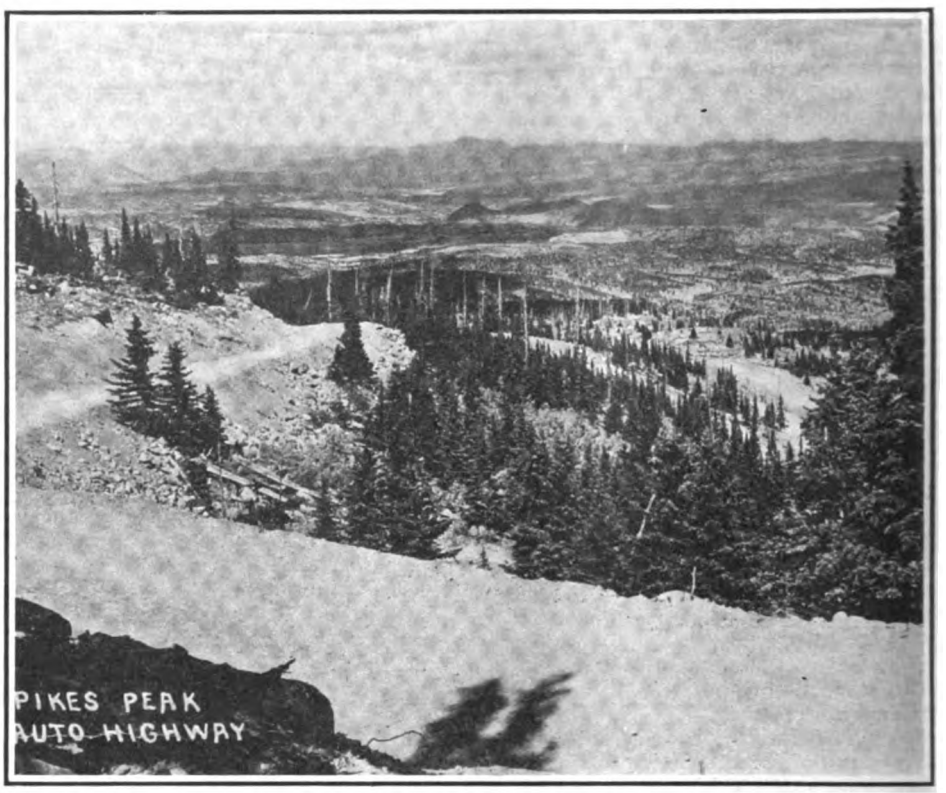
Probably no more thrilling or unique program has ever been staged than this contest of motors at the crest of the continent, among swirling clouds and intermittent sunshine. In covering the course of 12 miles and 2,200 feet the riders climbed skyward 5,147 feet and negotiated no less than 400 turns, the longest straightaway being only a quarter of a mile. The races were held on the new Pikes Peak highway, from Colorado Springs to the top of the famous peak.

Extremes of Climate

At the starting line the heat was intense, but when the riders arrived at the summit of the mountain they were clad in overcoats and sweaters and still were shivering from the cold air. Much interest was aroused in the contests, and not since Zebulon Montgomery Pike put the bee on the mountain many years ago has the old peak been brought so prominently into the limelight.

Only two accidents marred the program, in spite of the fact that there were opportunities for accidents—and very spectacular ones—at almost every turn. Paul ("Spec") Warner, chief of the Indian camp in Ellsworth, Kan., and a well-known speedster, got twisted in his bearings in the first professional event and only by clever headwork avoided a dive to the bottom of the canyon—a little matter of 5,000 feet. "Spec" was shaken up considerably, but was quite satisfied in having avoided the fatal plunge.

Art Davidson, of Los Angeles, furnished the other spill. While taking a hairpin turn at speed he became lost in the clouds and ploughed up quite a long stretch of Mother Mountain.



Pikes Peak Highway, Up Whose Precipitous Grades with Their Sharp Turns the Competing Motorcyclists Strove for Victory—Summit Is 14,108 Feet Above Sea Level

The fact that Clymer and Kunce outrode the eastern cracks is attributed in some degree to the fact that the eastern factory men were "buffaloed" by lack of training on the course, but there is no denying that clean-cut, nervy riding and excellent performances by the motors were as usual the chief factors in bringing home the bacon for the leaders. The work of the winning motors under conditions unprecedented in American motorcycle racing annals brought much favorable comment.

Joe Wolter, mounting his Excelsior, captured third money in the first open professional event, while Ed. Fillmore, the boy wonder, formerly of Bakersfield, Cal., finished third, just nosing out Bob Perry in the last event of the day. Fillmore rode an Indian and Perry an Excelsior.

Electric Timing

The riders were timed by an electrical device owned by the Indianapolis Motor Speedway Corporation, and Frank Stoll, of Denver, was the official referee. Mr. Stoll handled his big job cleverly and took excellent care of the riders. Summaries:

Sidecar event—Van Vanderhoff and Harold Boyd, of Denver, Harley-Davidson combination, first, time, 29.23; Floyd Clymer, of Greeley, Colo., and Perry Davis, of Colorado Springs, with Excelsior combination, second, time 30 mins.; Phebus and Howell, of Colorado Springs, with Harley-Davidson combination, third, time 31:13; Lyttle and Luby, of Denver, with Harley-Davidson combination, fourth, time 31.43.

First open professional event.—Floyd Clymer, Excelsior, first, time 23:15; Frank Kunce, Harley-Davidson, second, time 23:26; Joe Wolter, Excelsior, third, time 25:10; Ed. Fillmore, Indian, fourth, time 25:23.

Kunce Is State Champ

Colorado State championship.—Frank Kunce, Harley-Davidson, first, time 23:03; Floyd Clymer, Excelsior, second, time 22:10; Howard Williams, Harley-Davidson, third, time 22:54; H. Dumars, Thor, fourth, time 27:09.

Open professional event.—Floyd Clymer, Excelsior, first, time 21:58; Frank Kunce, Harley-Davidson, second, time 22:40; Ed. Fillmore, Indian, third, time 23:46; Bob Perry, Excelsior, fourth, time 24:02.

Clymer used a single-speed, big-valve Excelsior, equipped with Goodyear Blue Streak tires, Bosch magneto, Renold chains and Schebler carbureter. Vanderhoff piloted a 1915 three-speed Harley-Davidson hooked up to his sidecar, and used Goodrich Barefoot tires, Bosch magneto, Duckworth chains, Wright spark plugs and Schebler carbureter. Kunce's single-speed Harley-Davidson was equipped with Goodyear Blue Streak tires, Bosch magneto, Duckworth chains, Wright spark plugs.

MANY FEATURES IN AUGUST ISSUE OF "FIRESTONE"

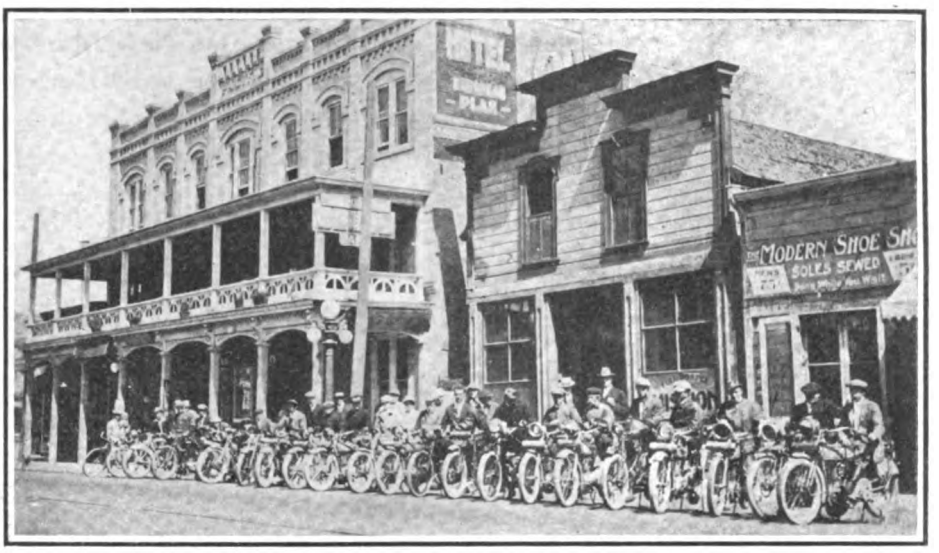
FIRESTONITES on their "Big Day"—the annual picnic at Silver Lake—are featured by an excellent series of photographs in the August issue of *The Firestone*, the house organ of the Firestone Tire & Rubber Co., of Akron, O. On the front cover is a description of the affair within a border of views taken on the spot, while a full page of action pictures immediately follows. Another page of interest depicts the use of Firestone tires on the Mexican border and there is an attractive reproduction of a two-page spread in two colors which will appear in one of the general publications. The outing of the Rubber Club of America at Boston is also portrayed and described.

GRIFFIS SHOWS MARKED PROGRESS

HOLLYWOOD, Cal.—In just eight months since leaving his position as salesman in a Los Angeles bicycle jobbing house, Chas. A. Griffis has built up a good business and made his store the leading cyclery in Hollywood. Griffis is agent for the Indian, and has sold three Dayton motor bikes in the last two months and eight motor wheels. He handles the Great Western line of bicycles from Distirbutor C. L. Smith. His repair shop is constantly busy.

Griffis is giving the Hollywood bicycle riders something to think about in the shape of a racemeet for local riders to be held Sept. 2. The event will be a 5-mile affair, with prizes up for three classes of riders; those under 12, ages 12 to 16, and 16 years and up, with merchandise prizes from Griffis's store. Griffis is developing a classy bunch of young speedsters out there, as was shown by the number entered in the Exposition Park races on Los Angeles Bicycle Day. His crowd was the only bunch that had a pit to work from, and they had a man entered in nearly every race.

HERE'S A LIVE BUNCH FROM POMONA VALLEY



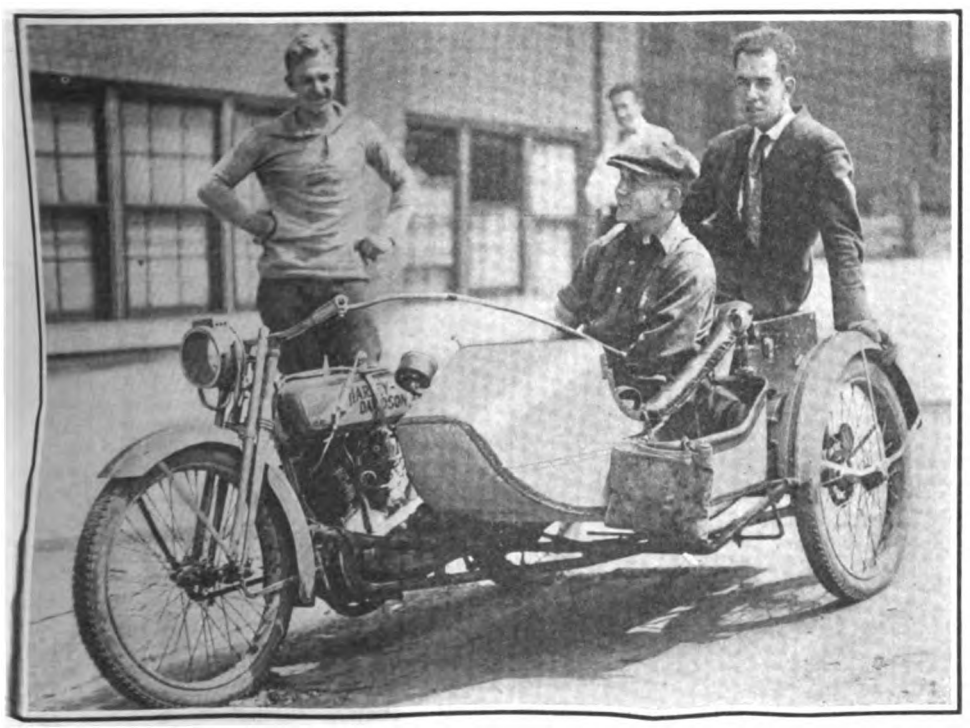
Members of the Pomona Valley M. C. Ready for a Run Through Picturesque Southern California. Practically All Machines Are Fitted with Tandems for the Girls' Enjoyment

CYCLONE MAY BE ON DECK FOR 1917 SEASON

ST. PAUL, Minn., Aug. 10.—Indications are that the Joerns Motor Mfg. Co., which has been under cover, so to speak, for the past few months, will be back in full force in the motorcycle business for the 1917 season. The air around the Joerns plant, which has been slightly clouded for some time past owing to the lack of capital, is beginning to clear and it is altogether possible that the Cyclone motorcycle, which the company formerly manufactured, will be a factor in the business for the coming season.

The Joerns Motor Mfg. Co. with factory at 2237 Hampton avenue, this city, never has shut down, although it has not been very active at producing motorcycles since early in 1915. It has, however, maintained constantly the production of parts for all of the models which it formerly produced and riders of Cyclone machines are directed to the concern as headquarters for replacement parts and fitments.

LEGLESS, ONE ARMED, BUT A TRANSCONTINENTALIST



Alfred LeRoy, Who Just Reached New York On His Harley-Davidson Sidecar Trip from Los Angeles Covering 5,500 Miles, Snapped with Messers. Havenstrite and Herrington at the Harley-Davidson Factory

NEW MILE RECORD FOR NORTHWEST

FARGO, N. D.—Bob Crawford, Indian, set a new mile record for the State Fair Grounds track recently, when he covered the half-mile circuit twice in 1:06 flat. This is also a new record for the Northwest on half-mile tracks. The former record, 1:08 1-5 was made by Crawford at Crookston, N. D., in the early part of the season.

MORE MONEY FOR ROADS

ITHACA, N. Y.—The second apportionment of automobile and motorcycle receipts between the State and Tompkins County was made a few days ago when Secretary of State Hugo sent the county treasurer a check for $354.75. This is one-half of the money paid, during the last month, to the State by resident owners of motor cars and motorcycles in this country, and all of it will be used to improve the highways of the county.

VAN CLEEF BACK FROM HAWAII

FELIX VAN CLEEF, of Van Cleef Brothers, of Chicago, Ill., makers of Dutch Brand cement and other goods, has returned to San Francisco, Cal., after visiting the Hawaiian Islands. He is planning an extensive trip.

FIRESTONE WINDOW FEATURING VAN BUREN GIRLS' TRIP

It Is Fitted Up in the New York Branch of the Firestone Company and the Course of the Transcontinental Riders On Their Indians Is Traced Daily on the Map

VAN BUREN GIRLS CLIMB PIKES PEAK

Fair Transcontinentalists on Their Indians Are First Ladies to Ascend Historic Mountain—Make Side Trip from Denver for the Purpose

COLORADO SPRINGS, Colo.—Pikes Peak has been climbed by a member of the fair sex for the first time since motor vehicles appeared in this country. In fact, it has been climbed by two girls, the Misses Adeline and Augusta Van Buren, of New York, who are on their way to the Pacific Coast on Indian motorcycles. The feat was performed by the girls on August 5, when they came over from Denver for the purpose; ascended the 14,108 feet to the crest of the Peak and descending, rode back to Denver to continue on their way to California.

Local riders are enthusiastic over the performance, as the highway to the summit is rough and has many sharp turns. The Van Buren girls state that they had little difficulty in making either the ascent or descent, although they had ridden better—and worse—roads since leaving New York. Their machines were fitted with Firestone tires.

While in Denver, the Van Burens made their headquarters at the Indian agency of Boyd & Williams, 1332 Broadway. They left for Cheyenne on August 7 and expect to arrive in San Francisco on the twentieth, from which place they will return to New York by train.

BARROWS PROMOTED TO HENDEE SUPERINTENDENT

HERBERT S. BARROWS, for the past two years supervisor of repairs for the Hendee Manufacturing Company, has been promoted to the position of superintendent of the State street plant.

Mr. Barrows is an experienced motorcycle man, having previously served as repair foreman for Neal, Clark & Neal, Indian dealers in Buffalo, N. Y., and for George S. Holden, Indian dealer in Springfield, Mass. Previous to those connections, Mr. Barrows was employed in the tool room of the State street plant.

He is a motorcycle endurance rider of some reputation, having ridden in earlier days on teams with Oscar Hedstrom and other noted Indian men.

Herbert S. Barrows

WORCESTER HONORS TO FEMALE RIDER

WORCESTER, Mass.—Of the fifteen contenders in the Worcester M. C.'s annual ten-hour endurance run, Mrs. W. E. Davis, on an Indian sidecar combination, with Mr. Davis as passenger, made the only perfect consistency score and quite naturally walked off easy with the consistency prize. L. E. Shumway made the next best showing on the 179-mile course with the score of 999½, and K. E. Saunders, with a score of 999, tied with Harry Brown for third consistency prize. The scores of the others are as follows:

E. E. Cross	998
R. S. Clayton	998
J. S. Hagenbush	997
A. Swenson	996
Wallace Smith	994½
A. Hanson	994½
G. L. Clift	992
F. O. Lifter	991½
J. Livingston	991
H. E. Rice	990½
Fred Norquist	984½

GROWING DEMAND FOR VANS IN ST. LOUIS

ST. LOUIS, Mo.—Motorcycle dealers of this city have found a rapidly increasing demand of late for commercial outfits, and at the present time nearly all the St. Louis druggists are using one or more motorcycles for quick deliveries. Sales of solo and van combinations have been made recently to plumbers, carpenters, collectors, canvassers and others who are called upon to cover considerable ground in performing their duties.

Appreciating the importance of co-operation to obtain the best possible results from their commercial opportunities, the St. Louis motorcycle dealers are preparing to work together to the end of further popularizing motorcycles for business service. They plan also to adopt a system by which they can protect one another from losses through unreliable buyers.

INDIAN SHIPMENTS REFLECT HEALTHY TRADE

SPRINGFIELD, Mass., August 14.—Indicating clearly the healthy state of the motorcycle business for the present season is the fact that the Hendee Mfg. Co. has shipped up to the present time 21,989 machines, an increase of 3,171 over the business done during the same period last year. Coupled with this statement, the fact that there are now on hand some 600 unfilled orders must be taken into consideration.

While, of course, not all of this business is domestic, it must be remembered that the British embargo on the importation of motorcycles into Great Britain has acted to reduce the export business, which therefore, was not so large by a wide margin, as would have been the case otherwise. Nevertheless, the embargo, regardless the exports of Indian machines, have been greater than in any other previous year.

GETS NEW POPE

LOS ANGELES, Cal.—C. L. Smith, Southern California distributor of the Pope motorcycle, has just received his first new three-speed Pope. He is going after sales briskly, and sees a big future in his territory for this model.

DETROIT GETS CHAMPIONSHIP MEET

Postponed Providence Card to Be Staged in Automobile City for Benefit of F. A. M. on Sunday, Sept. 3 and Labor Day

DETROIT, Mich., August 14.—Although it was leased to the Interstate Racing Association for Labor Day, Monday, September 4, present indications are that the racing association will waive its rights and permit the mile track here to be the scene of a mammoth two-day meet, to be promoted by the F. A. M. for the benefit of that body on Sunday, September 3, and Labor Day, the day following. The present plans include the running of the postponed Providence meet program, including the 1, 2, 5, 10, 25 and 50-mile amateur championship contests, and the single mile and 25-mile professional national championship contests. For the amateur events, the Bosch trophy and a formidable list of merchandise prizes will be the stake, while a purse of no mean proportions will be the bait to tempt the factory riders Detroitward. Aside from the championship contests several events for the local riders will serve to give the card a touch of local color.

Elaborate Card of Events

Apart from the racing program, which of course, will be the feature attraction, it is planned to put up a comprehensive program of entertainments to fill every moment of the two days and make the event a memorable one.

The award of the sanction to the Detroit meet in preference to the Sheepshead Bay affair for which the Speedway M. C. had put in a prior bid, came after due consideration on the part of Chairman Donovan, of the competition committee of the F. A. M. The bay folk had offered the F. A. M. 10 per cent. of the gate provided it were permitted to stage the postponed championship events, but Chairman Donovan figured that the Detroit meet held forth the biggest promise of large returns, especially as it is planned to enlist the cooperation of the entire trade in making the meet a full fledged success.

Booster Badges on Sale

Admissions will be priced at a dollar, and the receipts will be greatly augmented by selling "F. A. M. Booster Badges" at $10 each to various members of the trade, who have the interest of the F. A. M. at heart, and who are deeply concerned in the elimination of the debt which now hangs over the organization as a dark and threatening cloud. The Booster badges will entitle the wearers to full privileges of the track.

JOHNS AND BOIDO STAR AT GALESBURG

GALESBURG, Ill.—By copping both the 25-mile open professional and the 10-mile stock pro events, Don Johns established himself as the idol of the speed fans here today. Don, who of course was astride an Indian, took the 25-mile contest handily in 20:47⅘, beating home Morty Graves and Ray Creviston, also on Indians.

In the ten-mile professional, which headed the card, Johns flashed home across the tape in 8:02⅕. Second home was Lorenzo Boido, on an Excelsior, and third place went to Creviston on an Indian.

Boido's little hour of glory came when he took the 15-mile professional for stock machines, leading home Creviston and Bane, the former on an Indian and the latter on an "X." Boido's time was 12:40 flat.

The five-mile sidecar race went to Elmer Peck on a Harley-Davidson in 6:10, while Kenneth Albert, on an Indian, took the ten-mile amateur in 9:08.

FIRESTONE PLANT AND THE PREPAREDNESS MOVE

AKRON, O., Aug. 14.—In a recent talk on preparedness and the things that go to make for our thorough military preparation, Thomas A. Edison, the noted inventor called attention to the potential industrial development, and the possibilities for military purposes behind our many large and efficient industrial plants. Bearing distinctly on this subject and serving as a concrete example of the sort of efficiency and expansibility that the great inventor referred to is the enormous plant of the Firestone Tire & Rubber Co., which has done a business of over twenty-five million dollars during its last fiscal year and which announced an increase amounting to 38 per cent. in the business done this year over that figure, based on reports up to June 1. The capacity for expansion to meet instant requirements is one of the things the Firestone organization is proud of and is just the factor that will make the plant of great value in case of military necessity.

ANOTHER WHEELING RACEMEET

WHEELING, W. Va.—The Wheeling Motorcycle Club is planning to stage another set of races at the Fairgrounds before the cool weather sets in. It is stated that about $500 worth of prizes will be awarded.

ARTLEY CLIPS FRISCO-LOS ANGELES RECORD

Henderson Pilot Covers Distance in 10 Hours, 39 Minutes, Besting Former Time by Six Hours

LOS ANGELES, Cal.—Roy Artley has done it again! Astride his record-beating Henderson he covered 462 miles from San Francisco to this point in ten hours, thirty-nine minutes, clipping some six hours off the former motorcycle record.

Artley started away from 'Frisco this morning at 5:35:50, Western Union time, and disappeared in the cloud of dust with his front wheel turned toward the Angel City. Ed. Loudenclos, San Francisco Henderson agent, acted in the capacity of starter, while State F. A. M. Commissioner A. W. Green and E. D. Stevens acted as checkers. Artley reached Redwood at 5:57, covering the 19 miles in just 22 minutes.

Despite the fact that he found the roads cut up in spots, and despite also the fact that he suffered from the cold, Artley averaged better than 45 miles an hour for the entire distance. He rode a strictly stock Henderson machine with the exception of the tank, which was made about double the capacity of the ordinary tank to carry a sufficiency of fuel to last out the distance. His machine, which was a single-speed type, geared three to one, was equipped with Firestone tires, Schebler carbureter, Bosch magneto, and Splitdorf plugs; and speaking of the tires, Artley says that it is chiefly due to their "stand-up-ivness that he achieved his new record.

Herrold Breaks Record; Gold and Bowman Star at Moundsville Meet

MOUNDSVILLE, W. Va.—M. Gold, on a Harley-Davidson, won the five mile handicap and the ten mile pro. race at the third meet of the Wheeling M. C. on August 5. Gold's time for the five miles was 6:12, and for the ten miles was 10:31½. Keys, on a Harley-Davidson, took first place in the five mile opening event, his time being 6:03. Bowman, Excelsior, won the first three mile sidecar race in 5:50, while Altman, Harley-Davidson, was victor in the second event of this class in 4:55. In the mile time trials, Herrold, Indian four-valve, covered the two laps of the track in 1:08, setting a new figure for the mile here.

Keyes Wins the Opener

In the opening event, a five mile pro. stock, Keys was winner. Gold finished second on his Harley-Davidson with Mikels, on a mount of the same make, third. Kels took second place to Gold in the five mile handicap which followed, with Herrold, whose machine was going badly, third, and Mikels fourth. Mikels was second man in the ten mile to Gold's first, with Keys following.

Two Sidecar Numbers

The first sidecar event, for three miles, saw Bowman, Excelsior; Chadwick, Harley-Davidson, and Nobel, Indian, cross the line in that order. In the second sidecar race, Altman beat out Bier, Harley-Davidson, by two minutes. The other starters had retired before the second mile. Herrold, put up the best time for the mile on his ported four-valve single Indian (1:08), but the second man, Keys, Harley-Davidson, set a new figure for stock machines—1:10. Mikels was third in 1:14.

Emmory Herrold Astride His Indian Setting a New Low Mark for the Mile on the Moundsville One-Mile Track

COAL PILE FOR DEMONSTRATING CLEVELAND

BUTTE, Mont.—J. Barney Maurath demonstrates the Cleveland on a big coal pile and astonishes the crowd with its ability to get up the steep slope of the loose, shifting footing. Butte has one of the livest motorcycle clubs in the West, with a fine dance floor, poolroom, and dining-room and a membership that supports the club and get out and do things on the motorcycle. L. A. Miner, Cleveland agent at Butte, is president of the club, and Maurath, his star salesman, is one of its boosters.

DAVIS FORCES ENJOY PICNIC AT KIL KARE PARK

Employes of Big Dayton Cycle Plant with Their Families Spend Happy Day at Annual Outing on August 5—Company Provides Refreshments and Many Amusements

DAYTON, O.—Busy from 10 in the morning—either as spectators or as contestants—till 6 in the evening, aptly describes what the employes of the Davis Sewing Machine Co., their families and friends, were at Kil Kare Park on Saturday, Aug. 5. There were tennis, quoits, a bicycle road race, a four-man team relay race, an egg race for girls, standing and running jumps and novelty events in the morning, while in the afternoon were more sports on the grass and track, a baseball game, a fishing and swimming contest and some more novelty events. At noon, the company "set up" to ice cream, cake, lemonade and popcorn for the kiddies.

The afternoon program, in addition to what has already been mentioned, included a trap shooting contest and a one-ring circus, in which the participants were the heaviest man, the shortest man, the tallest lady, the largest family, a scramble for the youngsters and a bean-guessing contest. Dancing was indulged in till 5 p. m. and after supper, there was more dancing until closing time—10 p. m. There was a band concert all day long, a baby show early in the afternoon and a progressive euchre for those who liked cards. All those present enjoyed themselves to the full and looked forward to the next big picnic of this kind. The affair broke up shortly before midnight.

1, Refreshment Tent Where the Company Furnished Lemonade and Other Good Things Free; 2, Finish of 50 Yard Race for Girls; 3, Listening to the Band Concert and Eating Ice Cream Provided by the Firm; 4, Crossing the Line in the Egg and Spoon Race; 5, The Fellows Ahead Are Smiling Because They Have Won Dayton Jerseys in the Three-Legged Race; 6, Advertising Manager Ankeney Snapping a Picture; 7, H. Studying the Oil Bugaboo in England

Suggestion Is Made for Test on Brooklands, Contestants to Be Started with Clean Overalls, and Rider with Fewest Oil Spots to Win

TREATING of the subject of cleanliness, which it believes should be furthered through motor and other refinements, now that British manufacturers are turning out comparatively few machines, *The Motorcycle,* of Coventry, England, makes a strong plea for a motor that will be nearer oil-tight. Mudguarding is also discussed, but it is argued that the general use of English motorcycles in war service will bring about thoroughly satisfactory mudguards based upon hard experience at the battlefronts, and that the problem of oil-guarding is of more moment to the average rider.

The journal does not go very far into methods of improving the protection against oil, but takes the stand (which we are getting around to on this side, by the way) that a motorcyclist ought to be able to make a short run under ordinary conditions in street attire and arrive at his destination practically as clean as when he left home.

It is suggested that when the war is over the Auto Cycle Union should conduct a test for cleanliness on Brooklands track, supply each contestant with clean overalls at the start, make a minimum speed of 30 miles per hour and award a prize to the cleanest rider and machine at the end of the test.

MARYLAND RIDERS ARRIVE AT FORT ETHAN ALLEN

ALBANY, N. Y.—The detachment of ten motorcyclists who left Baltimore, Md., for a run to Ft. Ethan Allen barracks, Vermont, passed through this city in fine condition and later bulletins stated that the squad reached its destination without difficulty. These riders are members of the Motor Army Defense Association, which is independent of the Federal government. They will undergo special training at Ft. Ethan Allen and will be joined later by another squad of military cyclists from Maryland.

The Motor Army Defense Association is maintained by Maryland patriots, and aims to prepare men in all walks of life for military service. It is the intention to enroll at least 100 trained motorcyclists.

SHE TOOK FAMILY CAMPING IN SIDECAR

WATERBURY, Conn.—Mrs. John Lang, of this city, has just returned from a family camping trip to Mount Tom, which she took on her Harley-Davidson sidecar combination. The trip was made with her three children, two of whom occupied the sidecar and the third the tandem seat. A tent and camp equipment were carried on the machine also.

On reaching Mount Tom, the Lang family lived gypsy fashion for a week, cooking the meals over a campfire and gathering fruit to vary their meals. This is Mrs. Lang's second camping trip, the first being made in 1915 when she drove her family to Boston in two days, stopping at Springfield, Mass., the first night. "I had absolutely no trouble with the machine," said Mrs. Lang, "and I never have had any on any trip I have taken. I have helped a great many people on the road and have aided in getting a number of big touring cars on their way again."

Mrs. Lang is Waterbury's best-known lady driver, and uses her sidecar outfit on every opportunity, taking the kiddies along whenever circumstances permit.

MUST HAVE LICENSE PLATES ON ALL MACHINES

LOUISVILLE, Ky.—Dealers must transfer license plates from demonstrating or used machines while making deliveries is the decision of Justice Boldrick, of this city, and it cost Frank Romano, of the firm of Butler & Romano, motorcycle and bicycle dealers, $5 to find this out recently. Romano was arrested for riding a machine without a license on Louisville streets.

On the stand, Romano stated that he had just sold the machine to a customer, and was making the delivery at the time the officer took him up. He said that it was up to the customer to procure his own license, and that he was merely delivering sold merchandise. However, the merchandise sold was being delivered under its own power and in violation of the city ordinances which are clear and concise.

TWO-STRETCHER AMBULANCE LATEST FROM HENDEE

New Indian Hospital Corps Outfit Has Carriers Arranged Double Decker Fashion and Permits of Loading and Unloading From Both Ends—Takes Regulation Stretchers

New Indian Ambulance with Both Stretchers Occupied Showing Method of Transporting Wounded—Note Arrangement of Main Frame and How Stretcher Feet Are Held in Place by Clips on Depressed Ends of Bearers

SPRINGFIELD, Mass.—The Hendee Manufacturing Company has just brought out a novel and very practical double decker ambulance outfit, with a capacity for two patients on regulation stretchers. The outfit consists of a special sidecar chassis with carrier frames and a Powerplus twin machine for the power-plant.

The main frame of the ambulance consists of two upright steel members to which are attached channel section bearers with ends depressed. One of these sets of bearers is fitted to the bottom of the uprights and the other at the top. The uprights are diagonally braced and attached to each other by cross-bracing to give rigidity in all directions. The cubical framework thus formed is carried on special springs fore and aft. There are reinforcements at a number of points.

How Stretchers Are Attached

To each bearer is fitted a pair of L-clips near the ends of the horizontal upper sections, and C-shaped clips on pivots at the depressed ends. The L-clips hold the stretcher side members when put on the bearers, while the clips on the depressed ends swing round and fasten the feet of the stretcher snugly to that portion of the bearers. The clips are so formed that the extremities fit into holes in the upturned flange of the bearers for the purpose of keeping the stretcher in place.

The arrangement of springs includes closed spiral shock absorbing auxiliary springs in addition to the regular set provided. Below the lower stretcher is a cabinet for first aid materials. The lower stretcher can be removed or replaced from either end, while the upper stretcher can be loaded from any direction. The chassis has special attachments to the motorcycle frame, one of these leading from the left upright to the top tube.

The motorcycle is fitted with braces from the depressed handlebars to the fork ends. An Indian cradle spring frame model is used, with three-speed gearset and heavy duty clutch. The outfit has great mobility and speed, even when fully loaded.

STARS TO COMPETE AT BELMONT TRACK

Cream of Factory Speedsters Will Ride at Meet of Philadelphia Club Next Saturday—Program of Seven Events Laid Out

NARBERTH, Pa., August 15.—The first annual race meet of the Motorcycle Club of Philadelphia will be held at the Belmont track in this city on August 19. No stone has been left unturned to get first class riders for the meet, and so far three factories have entered the cream of their speedsters. Ray Creviston and Don Johns will appear from the Indian factory, while Bob Perry and Glen Stokes will ride for Excelsior. Bill Brier and Red Parkhurst are the Harley-Davidson factory entrants. The meet will be a sanctioned one, and both spectators and riders will be assured of clean racing and a square deal.

There will be seven events in all, four for amateurs and three for the cash chasers. The feature will be a 100 mile pro. race. Good purses are being put up for the pro. events. Entry blanks can be had of Howard C. Kolp, of 2436 Columbia avenue, Philadelphia, before August 18.

TWO-WHEELER PRICES TO BE RAISED

Unsettled State of Materials Market and Labor Conditions Point to Slight Increase on Both Motor and Bicycles for 1917

NEW YORK, August 16.—Indications of the plainest and most easily read sort are that the increase in price which has affected every sort of raw material entering into the construction of both bicycles and motorcycles, coupled with the difficulties entailed in obtaining materials at all, will bear fruit in the shape of a rise in prices of two-wheelers for the coming year.

What with the abnormal state of the materials market growing out of the war, actual or threatened labor troubles which have negatively affected many cycle plants during the present season, and the embargo on certain kinds of freight, which for a long time embarrassed many manufacturers in the two-wheeler trade, the lot of the cycle producer during the past twelvemonth has not been a particularly enviable one.

Materials Situation Acute

The situation, however, was alleviated somewhat by the fact that materials enough for the entire output had been contracted for prior to the unlooked for advance in the prices of raw materials, and even though in some few instances, contract or no contract, it was a case of pay a premium to ensure delivery of the materials on time, the manufacturers were able to cope with the situation and pull through the season without the necessity of raising prices.

But with materials for the 1917 season uncontracted for, both bicycle and motorcycle manufacturers will be forced to pay the higher price now asked for all sorts of raw products, and at the present moment from information gathered from talks with folks in the trade, there seems scarcely a doubt but what the wholesale price of bicycles will be advanced from $2.50 to $3, while the list prices of motorcycles will take an upward trend amounting to from $10 to $15. Quite naturally, the retail prices of bicycles must needs be advanced by the retailer by a corresponding amount if the dealer is not to come out at the small end of the horn.

In view of the fact that the cost of materials in a great many cases has increased by 100 and even 200 per cent., the rise in prices of the finished machines is really quite slight, it is pointed out; just sufficient, in fact, to let the manufacturer get by in good order.

KERRS HAVE NO-TROUBLE TRIP TO MEXICO

SEATTLE, Wash.,—James Kerr and Mrs. Kerr, of Seattle, have just returned from a delightful long tour to Mexico and return on their Powerplus Indian with tandem attachment. Leaving this city by the Three Flag Route, they followed the coast all the way to the international boundary. The return trip was made via the Valley Route.

Kerr's remarks on the trip were brief but pointed. "Not one cent for repairs and absolutely no trouble with either machine or tires."

STARKEL VISITS ANGEL CITY

FRESNO, Cal.—J. A. Starkel, distributing the Pope in Fresno County, recently spent a two-weeks' vacation in southern California, making his headquarters at Los Angeles. While in the latter city he and his family were entertained by C. L. Smith, Pope distributor.

GOOD DEMAND FOR EX.'S

COLUMBUS, Ohio.—William Sherwood, manager of the motorcycle department of the Franklin Rubber Company, Central Ohio agents for the Excelsior, reports a good demand for motorcycles, despite the lateness of the season. He says the prospects for the coming season are unusually bright. The concern is placing sub-agents in many of the cities and towns surrounding Columbus.

OUTCLIMBING THE MOTOR CAR

ELKINS, W. Va.—The prestige of the motorcycle has gone up considerably in this vicinity of late owing to the fact that the two-wheeler is capable of climbing hills on which automobiles are balking in a good many cases. The most severe hill-climbing tests to which the motorcycle has been subjected here have found it capable of meeting all their requirements.

NOVEL CATALOG FOR N. Y. SPORTING SALESMEN

NEW YORK, Aug. 14.—An unusual and very handsome catalog for the exclusive use of its salesmen has just been prepared by the New York Sporting Goods Company, of this city. Large photographs of leading articles in the company's lines make up the pages, and as to typographical appearance the catalog is one of the most attractive of its kind. In order to withstand continued usage the pages are of heavy linen, durable but flexible, and the description of each article is so placed as to facilitate the work of the salesmen in discussing the various items.

The novelty and beauty of the catalog have been found to assist the salesmen materially in obtaining the attention of prospects, and the book is proving one of the most fruitful business-getters ever produced by the company.

ARMY OFFICER COMPLETES INSPECTION TRIP

LIEUTENANT Julian S. Hatcher, U. S. A., who was recently detailed to make a tour of eastern militia mobilization camps, has completed his trip. Several eastern camps from Boston to Maryland were inspected.

Lieutenant Hatcher rode an Indian Powerplus throughout the distance, and he is frank in his praise of the motor's work. Writing of his experiences he says: "My trip covered about 1,500 miles, some of it over the worst roads and in the rain. I experienced absolutely no trouble with the machine, and did not have even so much as a puncture.

"In fording a swollen Virginia stream one rainy day, I slipped and allowed my machine to fall and become submerged in the stream. As it was electrically equipped I was naturally apprehensive of trouble, but after emptying the carbureter and draining the water out of the crankcase I proceeded without difficulty."

CYGNET MACHINE GUN AT PEEKSKILL, N. Y.

Outfit Attached to First Armored Motor Battery, N. G. N. Y., at State Training Camp. The Cygnet Gun Carriage Was Specially Designed for the Purpose

LEROY AGAIN CROSSES THE CONTINENT

Los Angeles Cripple, on Harley-Davidson Sidecar Combination, Reaches New York Covering 5,500 Miles—His Novel Machine

NEW YORK, August 14.—Smiling, happy and with an eagle eye for business along chewing gum and postal card lines, Alfred Le Roy, the one-armed and legless motorcycle enthusiast of Los Angeles, completed his second transcontinental motorcycle trip here today when he rode up to the door of his brother's house at 1056 Third avenue. Le Roy made the journey this time on a Harley-Davidson motorcycle fitted with a special sidecar, and completed some 5,500 miles on his journey from coast to coast.

The arrangement of Le Roy's machine is novel. He has his gasoline and magneto controls mounted where the saddle should be. He starts his motor by a rod on the left side of the countershaft, the rod pushing forward to start the engine, and backward to act as a brake. Steering is done with a long rod fitted with a ring into which Le Roy inserts the stump of his left arm. He is a lightning fast thinker, and can speed through the thickest traffic with absolute abandon, a remarkable feat when it is considered that his gas and magneto control, the gear shaft, brake and horn all have to be operated with the same hand. The little basket arrangement at the near side was made for his dog.

RUNNING TRUE TO FORM, THESE YOUNGSTERS LOVE THE OUTDOOR LIFE

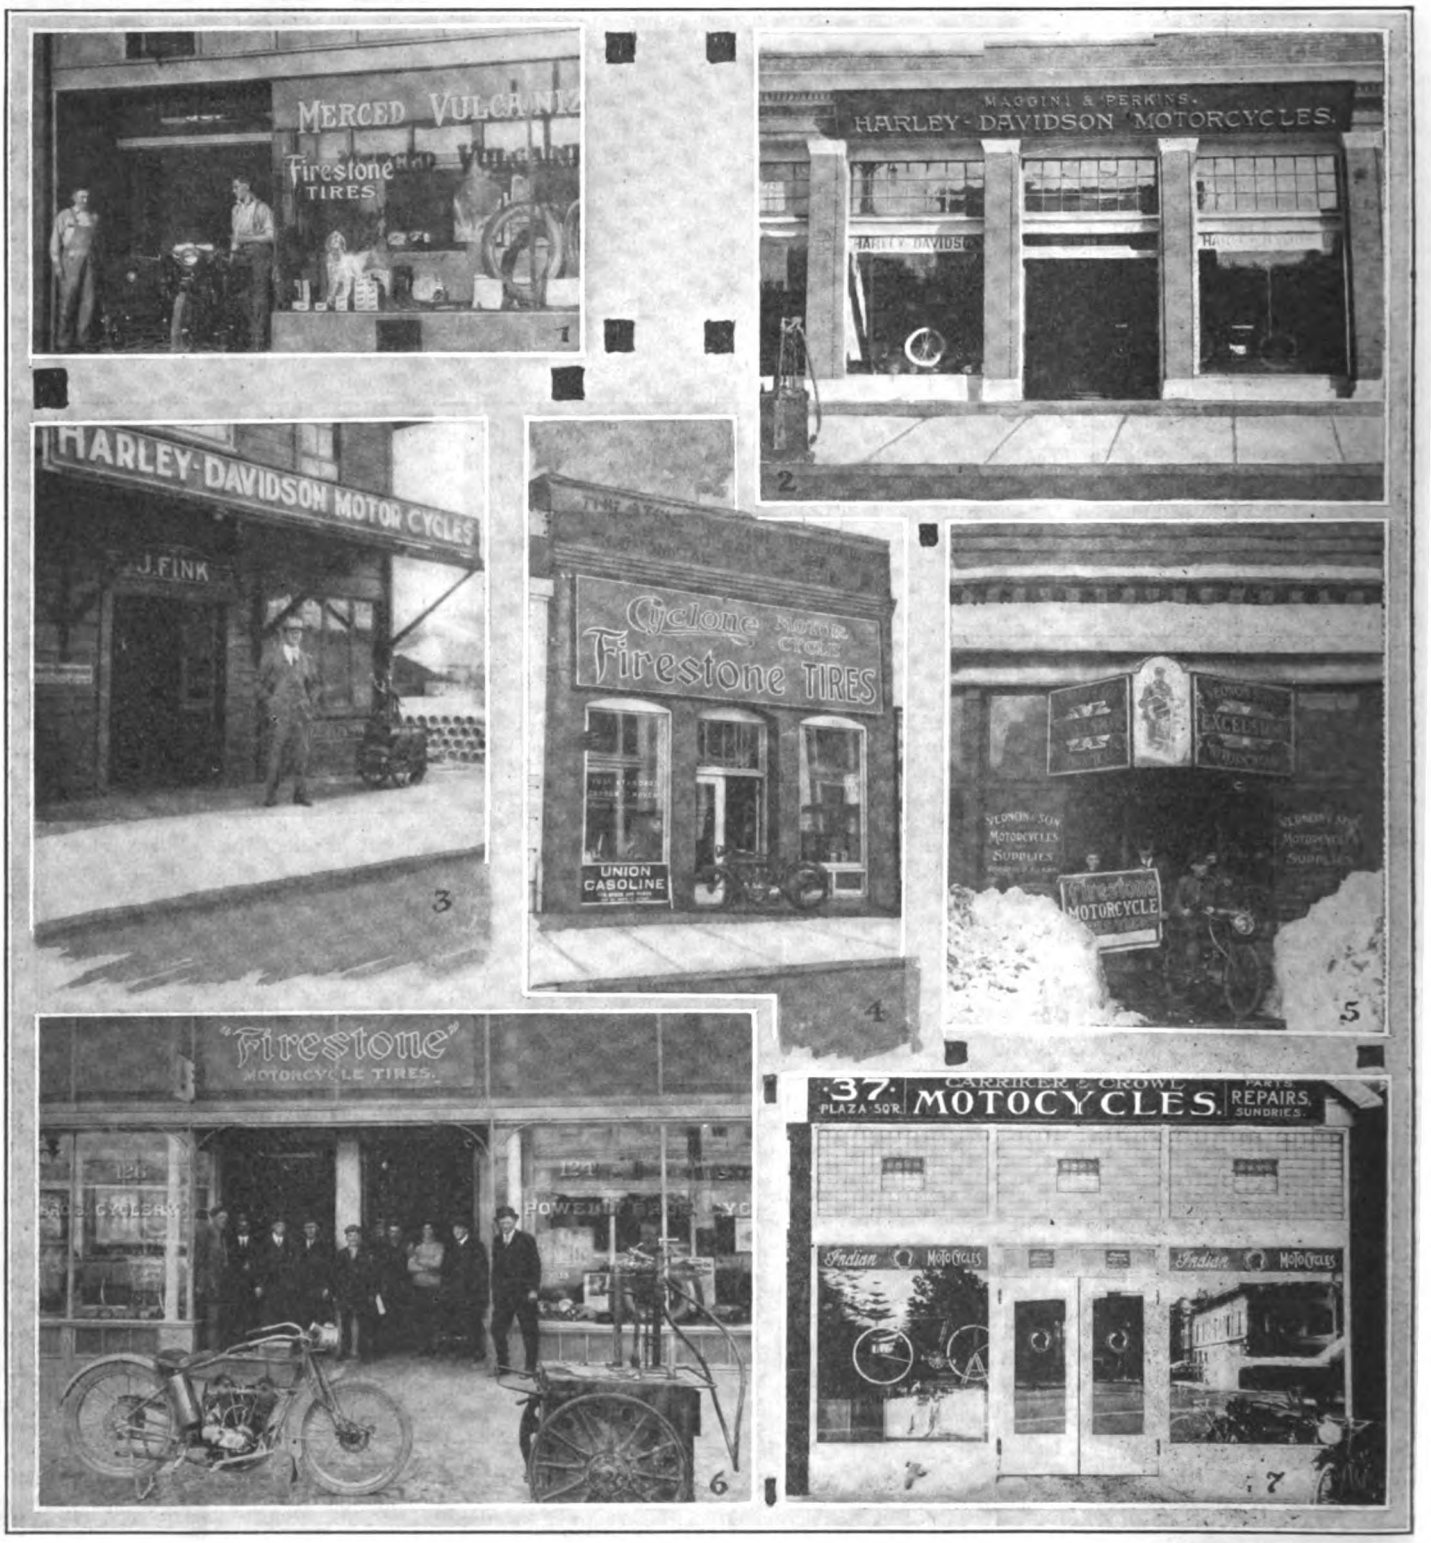
A Strong Line-up of Motorcycle



THE photographs on this and the opposite page were taken by Steward Slosson, of the Firestone Tire & Rubber Company's staff, during a series of business trips through Pacific Coast territory, and show the establishments of fourteen motorcycle and Firestone tire agents in Coast cities and towns. While the stores vary in size according to the location, it will be noted that they are all neat and business-like in appearance, and in every case the proprietor has made the most of the window space at his disposal.

The lineup is an impressive one and one that is bound to carry home to the dealer in the East the thought that the coast dealer, judged by the exterior view of his establishment, is alive to every possibility for bringing in prospects. The pictures will have accomplished a great purpose if they induce the Eastern dealer to follow suit

Two-Stroke Motors vs. Four-Stroke Motors

A Consideration of the Claims to Superiority of Each Type; Valveless Motor Has Been Handicapped Up to the Present Time by Riders' Lack of Familiarity With It

By D. R. HOBART

DURING past seasons and the present one there has been a growing tendency toward the employment of smaller powers of motors for solo motorcycle service, and with the advent of these motors have arisen two camps: that of the two-stroke and that of the received or four-stroke type. The first claims simplicity and low cost of manufacture, with reliability in operation, and while the second camp takes the stand of superior economy, coupled with reliability and greater familiarity with the type on the part of the rider.

As regards simplicity, there is not the shadow of a doubt that the two-stroke is superior to its four-stroke rival. A single-cylinder two-stroke has but three moving parts essential to its operation—piston, connectingrod and crankshaft—while for the four-stroke there are the piston, connectingrod, crankshaft, valves and valve gearing. I omit the means of driving the ignition apparatus, as these are approximately the same on both types.

Lower Manufacturing Costs

Coupled with this simplicity is a lower cost in manufacture. The cylinder of the two-stroke is cast with inlet and exhaust ports cored and afterward machined to size; the piston has to be machined and the bore ground, etc. The same operations have to be conducted on the cylinder and piston of the four-stroke, except that of machining the ports. In place of this, the valve seats and guides have to be machined, and there are other working parts that need to be operated upon to finish the motor complete.

While the two-stroke motor is relatively a newcomer in the American field, its reliability has been proven at various times, both before competent men and others whose reports would not carry great weight in scientific argument. In fact, an observed reliability test for this type was run off by the New Jersey M. C. last Spring, the observers being technical men and the results being carefully checked over. Riders' reports also show that this type of motorcycle motor is thoroughly reliable.

Reliability Is Proven

On the other hand, the four-stroke type has proven its reliability season after season, so that the two-stroke has no grounds of superiority in this connection. In the smaller powers, unfortunately, we have had no competition between the two types as yet, so that past performances of each type alone have to be relied on.

The American motorcyclist has been a four-stroke man exclusively, until very recently. Consequently, he is familiar with this type and is capable of teaching others to become likewise familiar with it. But he has never had any other type—so here is a point for discussion: With a knowledge of both types of motor—or experience with both—which type will the rider prefer? This question opens an interesting field for argument, and letters on the subject will be welcomed for publication.

The Carburetion Question

Carburetion is a broad subject on all internal combustion motors. The last word in devices for furnishing mixtures to four-stroke motors, in all lines where such motors are used, has not been attained by any means. In automobile service, where carburetion problems are simpler than with motorcycle motors, there is constant change in design, in construction and in theory. There is a tendency to use a semi-automatic carbureter, one which has hand control in addition to the automatic regulation of gas and air. The same tendency is seen on the carbureters for motorcycles, as will be obvious when the types used are examined. There are the spring-loaded air-valve, the variable jet, and the lever for giving more air. The latter is operated by hand.

But the carburetion for the two-stroke motor resembles that of the four-stroke only to a certain degree. Two-stroke makers have not been able to get a perfectly satisfactory automatic carbureter in this country or abroad. It is not that good automatic carbureters do not exist, but rather that they are not suited to this type of motor. Hence, hand-controlled mixing devices are employed, with the throttle and air controlled by the rider directly. With these, quite satisfactory service has been obtained both here and abroad.

Under present conditions and with the automatic carbureter training which the American motorcyclist has had, there is a tendency toward the four-stroke rather than the two-stroke. In spite of the fact that the hand-controlled carbureter gives better results in the hands of one familiar with its operation, it is an open question whether the riders will not favor the type of motor in which most of the workof mixing is done for them by the suction of the motor. By this I mean the four-stroke type of powerplant.

The development of a suitable automatic or semi-automatic carbureter for the two-stroke will answer this question, but next to nothing in this direction has been done as yet.

WHAT IS YOUR OPINION?

¶ Do you belong to the camp of four-stroke motor enthusiasts, or do you lean towards the two-stroke? There is much to be said for either type, and in view of the fact that the two-stroke is a comparative newcomer in American motorcycledom the situation invites discussion.

¶ If you have studied the two-stroke motor, or ridden one, you doubtless have some interesting data, and this journal will gladly devote space to a letter or an article expressing your views. Needless to say, we will be equally pleased to print statements from adherents to the four-stroke design.

¶ Make your letter as practical as possible. The value of a motor type must be determined by its dependability, simplicity, economy—in short, by its performances on the road. By basing a letter on those points you are sure to make it highly readable, and at the same time it may have a truly constructive value.

¶ We are all deeply interested in motor designing, and all anxious to be fair to the existing types. Let's talk it over.

SUGGESTS NEW WRINKLE IN TUBE REPAIRING

FROM a Californian tire repairer comes the following suggestion regarding patching close to the valves on inner tubes: "In repairing tubes we often have some with the puncture near the valve base or in the joint where the tube unites, and difficulty is experienced in making the patch cook evenly all around. To overcome the trouble we use a small bag, such as a tobacco bag, with a little fine sand in it. By placing the bag on the tube over the patch and then the block on the bag, an even pressure on the tube is insured, the sand adjusting itself to the thickness all around."

This is really an excellent idea, says the Goodyear Tire & Rubber Co., but we think we know a method that represents an improvement over it. That is to use a rubber block instead of the wood block and sand bag.

MADE EIGHT-DAY CAMPING TRIP

NEWBURGH, Pa.—John A. Pizzaro, a letter-carrier, and Willard Jackson, of West Newburgh, have just returned from a motorcycle trip of eight days in the Adirondack Mountains.

The Safety First Policy With Brakes

Common Sense Calls for Precautions to See That Your Brake or Brakes Will Meet Any Strain in an Emergency; Tips on Keeping Them at Efficiency the Year Round

By GEORGE M. JOHNSON

HAVE you ever been troubled with a brake that refused to hold? Most motorcyclists probably have at times, and a brake in poor condition is about the worst possible attachment that a motor vehicle of any sort could have. A motorcycle brake of the modern type should hold, and hold well, without requiring any tremendous pressure on its arm or lever. If you have to push or pull desperately to get a result, something is wrong, and it should be attended to before the accident that is almost sure to occur sooner or later. Better be safe than sorry.

A Thrilling Experience

A friend of mine, who rides a machine supplied with but one brake, was descending a steep slope in the mountains of the Pacific Coast last season. He knew his brake had not been holding any too well, but he had managed to get along with it in the past and had neglected to have it attended to. At it happened, he had been neglectful a little too long, for that long steep grade was fatal for the brake. As the machine kept coasting down faster and faster, the brake seemed to become more and more useless.

The big crash came when the rider reached a sharp turn; he and the motorcycle continued on ahead over a pile of jagged rocks, much to the detriment of both parties involved. Fortunately the road didn't suffer at all. At the earliest opportunity the victim had a second brake added to his mount and the original one put in good shape. That is exactly like locking the door of the garage after the automobile has been stolen. A little forethought would have saved him a vast amount of trouble, and rather heavy repair bills for both himself and machine.

The Obvious Moral

The moral of this little episode is easy to see. Have two brakes on your machine—this is required by law in England, and should be here—if possible. If you have but one brake, be sure that it is always in perfect working condition. And if you own a machine equipped with both hand and foot brakes, see that both are working. A two brake machine with one brake out of order is no better than a motorcycle with a solitary brake.

There are several things that may cause a brake not to hold. In this discussion I have no reference to the old style coaster brakes. They are all right for bicycles, but not at all suitable for a powerful motorcycle, and on modern machines have been replaced by the more positive band brakes, both internal and external; in fact, an automobile brake in everything but size.

One of the causes of failure—perhaps the most common—is the result of use. The lining becomes worn so much that the adjustment does not permit it to come in close contact with the drum. All brakes have the means for taking up this wear, and as soon as evidence of weakness appears, the adjusting screw should be set up a few turns. In most cases this will effect a cure.

Another Cause of Trouble

A very much less common cause, but one which has come under my observation at least once, is the following: It was a foot brake, and the lever, when pushed down to engage the brake, pressed against the rear stay of the footboard, preventing the brake lining and drum from engaging closely. Of course the rider could push on the brake pedal until he was black in the face, and get little increased hold from the brake. The cure consisted in shortening the rod from pedal lever to brake arm by means of the double adjustment provided for that purpose.

Another variety of brake trouble occasionally results when the brake lining wears down leaving the rivets projecting, so that they, not the lining, press against the drum. If a brake squeaks furiously, but does not hold well, this is probably the trouble. The very slight surface of the rivets cannot have any braking effect to speak of, and it is their friction against the drum that usually causes the noise. The remedy consists in removing the band and pounding the rivets down flush with the lining surface.

In time, of course, any lining will wear out and have to be replaced. Do not be too hasty, however, in thinking that the trouble with an obstinate brake is necessarily due to this, or that a new lining will surely cure the trouble. A brake lining should stand several seasons of ordinary—even extraordinary use—and undoubtedly the majority of motorcycles go through their allotted span with never a new lining to their faithful brakes.

The Brake Out of Adjustment

A brake is often put out of adjustment when the rear wheel is moved back to allow for wear in the driving chain. Whenever the chain is adjusted, a brief test should be made to determine whether the brakes have been affected or not. This is especially likely to occur in case of the hand brake on Indians. Any considerable movement of the rear wheel in either direction must be compensated for by a similar movement of the brake lock on the fork just in front of the hub. If the rear wheel is set back even a quarter of an inch, it will tighten up the hand brake band until the wheel is probably locked: moving it forward will have the opposite effect, and when the hand lever is pressed the drum and lining will not engage. The proper adjustment requires only a minute or two to make, and should never be neglected.

What can be done to a brake that is, theoretically, in perfect adjustment, and yet absolutely useless? The cure for that unfortunate condition, which on its face would appear to be hopeless, is the most simple thing in the world.

How to Apply Glycerine

A teaspoonful of glycerine will do the trick, and make that brake hold to its job more lovingly than a graft-seeking alderman. Pour the liquid in between the lining and drum, turning the wheel so that the goo will be well distributed. Then don't be disappointed if nothing happens—for a time. The immediate effect of the glycerine treatment is to destroy utterly the last vestige of holding power the brake possessed, making its surface more slippery than the far-famed newly peeled hemlock log. But give it time. Ride the machine a few miles, occasionally testing the brake. Soon you will note a slight improvement, and before long you will have to be exceedingly careful how you apply said brake, for the least pressure will be likely to lock the rear wheel.

An involuntary jamming on of the brake—by the way, why is it in stories that the hero invariably "jams on his brake?"—may cause an equally involuntary trip over the handlebars. When the beneficial effect of the glycerine wears off, as it will in time, another dose will do the work again.

RACE AT JASPER FAIR

JOPLIN, Mo.—A five-mile motorcycle race will be a feature of the racing day at the Jasper County fair on September 1. There will be automobile and trotting horse events on the same day.

SNAPPY CARD AT UXBRIDGE MEET

Excelsior Entrants Take Four Firsts While Hendersonites Take Two On Dusty Half-Mile Track on Civic Holiday

UXBRIDGE, Ont.—Excelsior and Henderson riders divided the honors at the race meet held here on Civic Holiday, Monday, August 7, under the auspices of the Toronto Motorcycle Club. Excelsior speedsters captured the chief award in four of the six contests, while the Henderson brought home the winner in the other two flights. There was a goodly number of competitors in each start of the series, which was held on the local half-mile dirt track. The track surface, incidentally, was very heavy with dust. One incident of the day was that Percy A. McBride, the Toronto distributor, rounded up every motorcyclist, visitor or resident just before the noon-hour, and stood treat for a dinner in the Uxbridge hostelry. Several score made the journey to Uxbridge from Toronto by way of Markham. The trips were strenuous on account of rough road surfaces, but the distances, fortunately, were

The results:

Three-mile novice—Won by Orange, Henderson; second, Edwards, Excelsior; third, Swathendge, Excelsior. Time, 5:20.

Three-mile sidecar—Won by Howard, Henderson. Time, 5:35.

Five-mile amateur handicap—Won by Edwards, Excelsior (half-mile handicap); second, MacDonell, Excelsior (scratch); third, McFadden, Excelsior (half-mile handicap). Time, 6:47.

Three-mile professional sidecar—Won by T. Smith, Excelsior; second, Jack Harding, Excelsior. Time, 5:20.

Two-mile amateur match race—Won by Edwards, Excelsior; second, Orange, Henderson. Time, 2:37.

Two-mile amateur sidecar—Won by MacDonell, Excelsior; second, Joben, Excelsior; third, Howard, Henderson. Time, 2.39.

PRESIDENT JOHNSTON ON TEN-DAY VACATION

TORONTO, Ont.—F. A. O. Johnston, president of the Canada Motorcyclists' Association, has set a shining example for the proper manner in which a motorcyclist should spend his annual summer vacation. Accompanied by Mrs. Johnston, the C. M. A. president recently took a ten-day trip over the good roads of western Ontario, covering about 700 miles in the course of the journey. The tourists made stops at Goderich, Sarnia, Stratford, Port Elgin, Berlin and Guelph, spending from several hours to a whole day in each of these towns. It was a pleasure jaunt from the ground up, and not as much as a puncture disturbed the progress of the Henderson and sidecar. The Johnstons did their only fast traveling on the home stretch when they covered 167 miles on the tenth day. They intend to take another trip in the fall.

A few days after returning to Toronto, President Johnston took a one-day trip with a friend in an automobile when the trouble jinx overtook the car on four different occasions.

NEW YORK MOVIE PARTY TOURS NOVA SCOTIA

HALIFAX, Nova Scotia.—Distinguished motorcycle visitors from afar in Halifax have been T. Richardson, one of the editors of *Moving Picture World*, of New York, and his daughter, Miss Nellie Richardson. During the three weeks before the tourists reached this destination they had covered more than 3,000 miles, a great portion of this mileage having been made in eastern Canada. They were delighteed with the condition of the new St. Lawrence River highway between Montreal and Quebec, and they made their return to New York over the same route because of the acceptable roads. Mr. and Miss Richardson remained in Halifax for a few days, during which time they took in all the sights, including several surprising military features. Both are seasoned motorcycle tourists, and they are ready to tackle any roads.

On their ride to Halifax by motorcycle and sidecar the Richardsons made stops at Albany, Fort Ticonderoga, Plattsburg, Montreal and Quebec. The machine which they use is well equipped for long distance runs, one fitting being a special trunk, which is attached to the front of the motorcycle.

NOVEL EXCHANGE OFFER IS NOT ACCEPTED

TORONTO, Ont.—A rather startling advertisement appeared recently in one of the Toronto papers when a local citizen offered to sell a Ford automobile or trade the car for a bicycle. The advertisement in question read as follows: "Mr. Frank Kelly begs to advise all interested that he will either sell or exchange his newly-acquired Ford for an Antelope bicycle in fair condition."

The address of the advertiser is the Canadian Universal Film Company, Limited, Toronto. The proposed exchange was not carried out, it is understood.

BOOSTING FOR CLUBHOUSE

TORONTO, Ont.—President J. G. Jones, of the Toronto Motorcycle Club, is sounding the feelings of motorcyclists still here regarding a clubhouse proposition. It is his present hope to arrange for the establishment of downtown club quarters to be ready for the return of the many local motorcyclists and bicyclists from the firing line. Jones expects that it would be a year or so before all financial arrangements could be made for the club home.

DUNLOP ROAD RACE TO WAIT BRIGGS' RETURN

TORONTO, Ont.—The racing cyclists still remaining in Canada have been waiting with considerable impatience the announcement regarding the holding of the annual Dunlop bicycle team handicap road race this year. The reason for the delay in the announcement is simple. A. A. Briggs, advertising manager of the Dunlop Tire & Rubber Goods Company, Limited, Toronto, under whose guidance the classic event is held each year, is on his way to Alaska. He will not return to Toronto until October, and the 1916 edition of the famous cycling feature will not be staged until his return.

Briggs went to the Yukon by way of San Francisco, and will return, according to arranged plans, through Vancouver. The return journey from Vancouver to Toronto will constitute a business tour, but previous to the home leg the trip is being made entirely for pleasure.

SELLS DELIVERY VAN TO OTTAWA PAPER

OTTAWA, Ont.—Byshe & Co., Ottawa representatives for the Excelsior motorcycle, have sold an Excelsior and Rogers delivery van to the *Ottawa Free Press* for use in an express delivery service to the outlying districts.

Local motorcycle dealers report a brisk business, the demand being greater than the supply. It is also being noted, locally, that the day of demonstrations is waning. Motorcycles are now being sold freely without extensive demonstrating trips. Some machines are being sold straight from the floor of salesrooms.

HUBBARD IS ENTHUSIASTIC ABOUT BUSINESS

LOS ANGELES, Cal.—Charles A. Hubbard, of the Henderson Motorcycle Sales Corporation, handling the Henderson, has just returned from a trip to Boston. On his way back he came through Yellowstone Park and stopped at all important points along the line. The result of his trip is that he is enthusiastic over business conditions throughout the country.

Hubbard predicts that 1917 will be a banner year in the motorcycle trade, as everyone has the touring spirit and there is plenty of prosperity. The motorcycle has a strong hold on the man who wants to cover the country by the best method, he says.

AMARILLO HAS MOUNTED COP

AMARILLO, Tex.—O. B. Chesher is now Amarillo's motorcycle cop. Chesher was on duty as night patrolman until a few days ago, but the increase of speeding has made it necessary for City Manager Hardin to have a mounted man to care for the "road burners."

Two More Big Indian Powerplus Victories!

Indian Takes Diamond Medal for Highest Score in Dixie Classic!

Herbert Webb, on Indian Powerplus, was awarded Diamond Medal for Highest Score in the Dixie M. C. Endurance Contest, 500 miles, from Roanoke to Richmond, Va.

Through a three-day downpour, following three weeks of rainy weather, six contestants ploughed their way to the finish—four of them riding Indian Powerpluses!

Perfect Scores were impossible! The highest score, 896, was attained by Webb, on his sturdy Indian Powerplus. The score of his nearest competitor was only 760.

Indian Powerplus Wins Indiana F. A. M. Endurance Grind!

Everett Chandler, riding Indian Powerplus with Sidecar, received *only* award for Perfect Score in Indiana F. A. M. Endurance Run!

Clarence Sargent and his Indian Powerplus was awarded medal for highest Individual Score.

Two of the three machines to finish this gruelling test of endurance were Indians!

Of course you've noted the regularity with which Indian Powerplus has been cleaning up all the important 1916 Endurance Contests!

No *stock* motor in all motorcycle history has to its credit such a complete and spectacular string of Endurance Victories as has Indian Powerplus!

The reason is simple—Indian Powerplus is without question the *greatest stock motor* of all times. Performance proves it!

An Advertising Chat with Dealers

A Thorough Knowledge of Your Product, Some Attention to Type Styles and a Reasonable Outlay of Money Will Enable You to Write Your Own Ads. and Get Results from Them

By PATHFINDER

"The great art of writing advertisements is in the finding out a proper method to catch the reader's eye, without which a good thing may pass over unobserved or be lost in commissions of bankruptcy."—Addison.

EVEN back as far as Addison's time merchants were struggling for the best means to reach possible customers through advertising. Catching the reader's eye 200 years ago was just as essential as it is today. Look through the pages of any popular magazine—take the motorcycle trade paper—and note the methods used by various advertising men in co-operation with clever artists to bring out their points by eye-catching sketches or thought-compelling phrases. It is surprising the amount of thought and energy that is being put into advertising by the manufacturers.

In order to derive the fullest local benefit from all this national advertising it is up to the retail dealer to do a certain amount of advertising himself. The dealer who does not do this and does not hook up his business with extensive national campaigns is overlooking a golden opportunity and is not co-operating with his factory to obtain the best results in sales in his territory. This does not imply that a dealer should spend more money than his business warrants, but it is a profitable investment for a dealer to spend enough of his capital to get his share of the big national expenditure being used by his factory.

To the average motorcycle dealer, advertising always has meant something containing a great deal of mystery. The thought of writing an ad will cause many dealers to throw up their hands in despair. They seem to think it requires a special kind of magic to plan a simple advertisement. But they are not wise to the fact that the advertisements with the alleged magic in them sometimes fail to get across. Simplicity always counts.

The mystery about advertising probably has its inception in the fact that the average newspaper office is a conundrum to the dealer. Therefore he prefers to have as little to do with the newspaperman as possible. This feeling between the press and the dealer is resulting in the motorcycle business falling far short of its proper amount of publicity.

The dealer who makes it a point to get chummy with the newspaperman will find him just as human as the man in business next door. There are so many people at large with axes to grind that sometimes it does not behoove the newspaperman to cultivate too many acquaintances.

The dealer who contemplates the inauguration of an advertising campaign, be it two ads or a dozen, should start out with the determination that he is going to make the money invested teach him something in the advertising game, in addition to selling motorcycles. He should not hesitate to ask the advertising solicitor questions—why this is done or that, also why this or that thing cannot be done.

The matter of finding the proper type to use can be solved easily by asking the newspaperman to give you a sheet of specimen type. He will be glad to co-operate with you if he sees possibilities of future business in such co-operation. The small town dealer will find it to his advantage to utilize the electrotypes furnished by his factory. All of the motorcycle factories are giving their dealers fullest assistance in the matter of preparing ads and cuts.

One reason why the complete ad embodied in the factory electrotype can be used to good effect is that the factory, having excellent printing facilities at its disposal, can use the latest style type faces and can work in type displays that would be the despair of the small town print shop. As a result, when the motorcycle dealer inserts a factory electrotyped ad in his local sheet he finds that his ad stands out prominently from the rest of the advertising matter in the paper, because of the changed type faces. People get used to reading the same kind of type in a paper, and an ad with snappy type composition, therefore, is bound to attract attention and secure a careful reading.

(Continued on page 35)

When Nature Comes to Life

Gee, but it's great! That scent of the woods in the summertime—clear skies—rustling leaves—nodding wild flowers—the swish and swirl of the water on the shore.

And that whiff from the brewing coffee—get it?

Long days full of keen joy and nights of deep, refreshing sleep come to the owner of a

(Name of Machine You Handle)

that master motorcycle that takes you in a twinkle "from where you are to where you want to be."

With a 3-speed (name of machine) you will be all set for a glorious summer, Saturdays—Sundays—holidays—vacation days—it will be your willing servant, always ready for a trip—ten miles or two hundred—up hills, through sand—it's all the same to the (name of machine).

You give the orders with a twist of the wrist. You can loiter along the road or travel with the speed of the wind. All this with a (name of machine).

And the cost? Don't bother about that. We will make terms to suit your convenience.

"IRON MAN" McNAMARA STARS AT NEWARK

Defeats Classy Field in One-Mile Open and Takes Two-Mile Handicap from Scratch—Kramer, Spencer, Clark and Grenda Win in Match Events

NEWARK, N. J., Aug. 14.—Reggie McNamara, the "Iron Man" from the Land of the Kangaroo, was the big star at the Velodrome yesterday. The strong Antipodean accounted for the one-mile open against a field of five other classy riders, and then went out and won the two-mile handicap from scratch in a strenuous finish, beating out the other scratch men for the long end of the purse.

Seldom has there been a classier field line up for the final of a race than that of the one-mile open yesterday. Six riders, the winners of as many heats, faced the starter. Five of them, Alfred Grenda, Jackie Clark, Bob Spears, Reggie McNamara and Alfred Goullet, were natives of Australia, while the lone American representative and the one that the people looked for to hold up the country's end was the champion, Frank Kramer. The riders circled the track for the first four laps in a "watchful waiting" manner to see who would take the lead and start the sprint. At two laps to go McNamara went to the front closely followed by Grenda, Goullet and Kramer, while Spears was in fifth place with Clark on his wheel.

McNamara Puts on Steam

McNamara put on a little more steam coming into the bell lap to stall off any attempts of the other riders to jump him. Rounding into the back stretch of the final lap Spears attempted to go by with Clark clinging to him. Spears had a high ride and managed to nose out Goullet for second, but could not get by McNamara, who won by a half-length. Clark, who has shown a return to form, managed to finish fourth. Grenda landed fifth money.

Second Win Popular

As popular as McNamara's win was in the one-mile his victory in the two-mile handicap aroused more than the usual amount of enthusiasm among the spectators. Grenda, Spears and Goullet were on the honor mark with McNamara and they had their work cut out for them to catch the limit men. Alfred Halstead, the Sacramento rider, and Ernest Ohrt, the San Franciscan, got a break on the rest of the field and for a time it looked as though they would run first and second. Joe Kopsky, however, blasted their hopes when he pulled the big field up within striking distance, and when the bell sounded for the last lap McNamara and the others passed Halstead and Ohrt like the Broadway Limited passes a freight. Oscar Egg, 60 yards, finished second and Grenda third.

Three Match Races Decided

Three match races were on the program at yesterday's meet. In the first, the one-mile-one-heat race for the Brassard Arthur Spencer, the Canadian, defeated Eddie Madden, the Newarker. This marked Spencer's sixth win of the weekly race, he having scored wins over Madden on two occasions and a win apiece over Marcel Dupuy, Willie Hanley, Harry Kaiser and Alfred Goullet. Spencer later in the day met Champion Kramer in a two-third-mile match race and the East Orange speed king defeated the Toronto lad in two straight heats.

Grenda and Clark Speedy

Alfred Grenda and Jackie Clark had a chance to show what they could do in a team match race against Marcel Dupuy and Oscar Egg, the French-Swiss pair. Clark showed good judgment in landing Grenda in an advantageous position in each heat

Reggie McNamara, Australian, Who Scored Two Wins at Newark

and big Grenda romped home in straight heats, the tall Australian riding the last eighth-mile in the second heat in 11 4/5 seconds in the face of a hard wind on the back stretch. The professionals had a half-mile handicap as well and Willie Hanley, 40 yards, carried off first place.

Amateur Races Were Good

The amateur races were exceptionally good and the Australian pursuit race, in which the six winners of the preliminary heats met, turned out to be a strenuous event. Ed. Byron, the Australian, and John L. Staehle, this year's amateur champion, lasted the longest, and after the four-mile mark the two riders were on opposite sides of the track. Byron finally wore down the champion and passed him after seven and a half miles. William Spencer, the Toronto amateur, accounted for the one-third-mile handicap for that class and Jerry Nunziata, the Brooklyn Italian, won the two-mile invitation race for the simon pures. The last-named race was featured by several spills and was aptly named the "Repair Man's Derby" by one of the trainers. Summaries:

One-third-mile handicap (amateur)—Won by William Spencer, Toronto (10 yards); second, Ben O'Sicky, Cleveland (35 yards); third, Charles Remmele, Newark (50 yards). Time, 37 seconds.

Two-mile invitation (amateur)—Won by Jerry Nunziata, Brooklyn; second, Andrew Ciaciuch, Buffalo; third, Herman Flamm, Germany; fourth, Frank Small, New York. Time, 4:11⅘.

Australian pursuit race (amateur)—Won by Ed Byron, Australia; second, John L. Staehle, Newark; third, Eric Paetz, Germany; fourth, William Spencer, Toronto. Time, 17:14. Distance, 7½ miles.

One-mile Brassard (professional)—Arthur Spencer, Toronto, vs. Eddie Madden, Newark. Won by Spencer. Time for last eighth-mile, 12⅗ seconds.

Two-third-mile match race (professional)—Frank Kramer, East Orange, vs. Arthur Spencer, Toronto. Won by Kramer in straight heats. Times for last eighth-miles, 11⅘ and 12 seconds.

One-mile team race (professional)—Alfred Grenda, Australia, and Jackie Clark, Newark, vs. Marcel Dupuy, France, and Oscar Egg, Switzerland. Won by Grenda and Clark in straight heats. Times for last eighth-miles, 12⅗ and 11⅘ seconds.

Half-mile handicap (professional)—Won by Willie Hanley, San Francisco (40 yards); second, Eddie Madden, Newark (45 yards); third, Hans Ohrt, San Francisco (40 yards); fourth, Harry Kaiser, New York (35 yards). Time, 55⅘ seconds.

One-mile open (professional)—Won by Reggie McNamara, Australia; second, Bob Spears, Australia; third, Alfred Goullet, Australia; fourth, Jackie Clark, Newark; fifth, Alfred Grenda, Australia. Time, 2:42⅗.

Two-mile handicap (professional)—Won by Reggie McNamara (scratch); second, Oscar Egg, Switzerland (60 yards); third, Alfred Grenda, Australia (scratch); fourth, Willie Hanley, San Francisco (120 yards). Time, 3:48⅘.

SANBORN READY FOR TRIP

BALTIMORE, Md., Aug. 15.—Promptly at 6 o'clock Sunday morning, August 20, Fred M. Sanborn, the Crescent Bicycle Club's well-known distance rider, will leave New York City in an attempt to make the trip to Chicago, a distance of 1,050 miles, in six days, including all stops for meals, sleep and repairs. Sanborn will go via Albany, Utica, Syracuse, Buffalo, Erie, Pa.; Cleveland and Toledo in Ohio, and South Bend., Ind. Sanborn's mount on the trip will be an Emblem Special, fitted with Advanced Palmer tires and Sturmey-Archer three-speed coaster brake.

UP PIKE'S PEAK ON A BICYCLE

COUNCIL BLUFFS, Ia., Aug. 15.—Word has just been received here of the feat of George Flagler, an 18-year-old local cyclist, who accomplished the ride over Pikes Peak on a bicycle. His stunt was performed in connection with the fortieth anniversary of the admission of Colorado to the union.

20-MILE RACE FOR TOLEDO

TOLEDO, O., Aug. 15.—A 20-mile handicap road race will be held on Labor Day, Sept. 4, the Toledo Bicycle Dealers' Association being the sponsors of the event. A large list of prizes will be furnished by the "Million Bicycles" committee.

Digitized by Google

THRILLS FEATURE NEWARK TEAM RACE

McNamara and Spears, Australians, Annex 100-Kilometer Team Event—Intermediate Money Keeps Riders Busy—Referee Punishes Two for Teaming

NEWARK, N. J., Aug. 16.—All the thrills and excitement that go with a six-day race were furnished to the patrons of the Velodrome, Wednesday, Aug. 9, when a 100-kilometer (62½-mile) team race was staged with 19 pairs starting. The riders took 2 hours 20 minutes and 44 1/5 seconds to cover the distance, and in that time there were plenty of spills, "jams" and modified six-day racing to satisfy the 7,000 people on hand.

Intermediate Prize Money

Lap prizes of 50 cents and intermediate money, $5 at the odd five-mile stations and $10 at even ten-mile stations, kept the large field active, and the sprints for the five- and ten-mile prizes as a general rule caused a big "jam", which would be carried on after the money had been won. One of the best sprints of the night was started after Eddie Root had won the $10 for the leader at ten miles. Reggie McNamara, the Australian, being the one to commence, firing, and shortly after the Verri-Spencer team was lapped along with the Bowker brothers. Again at the 25-mile mark, just as Bob Spears had won the sprint for a five-dollar note, Oscar Egg, the Swiss, tried to get away, and in the ensuing "jam," which lasted for about two miles, the E. Ohrt and Frank Cavanagh pair lost a lap and the Bowker brothers lost three more.

Getaway Attemps Futile

Attempts of the riders to get away were futile, the field going after the runaways as soon as they got away. Most of the big field at least made an attempt to get away, but they were soon brought back to the fold. The pursuit of the 50-cent laps seemingly was the best thing that the Joe Kopsky-Tommie Smith combination planned, as they led at 72 circuits, which netted them $36. That was only $4 shy of fifth money, and they had no chance at the finish.

Last Change Is Made

No changes were allowed after the termination of the 61st mile, and when that mark was reached the men chosen to finish for their teams came onto the track. The riders rode high on the bank carefully watching the moves of the others. At about two laps from home Alfred Grenda, of the Goullet-Grenda team, went to the front, closely followed by Reggie McNamara, finishing for the Spears-McNamara pair; Jake Magin, of the Magin-Lawrence team, and John Bedell, of the Bedell brothers.

Coming into the stretch at the bell lap McNamara started by Grenda with Magin in his wake. McNamara got by Grenda at the start of the last lap, pulling Magin with him. John Bedell was trailing Magin and looked as though he was going to pass Grenda as well, but the latter bumped Bedell off and went in third place. The big Australian tried to better his position, but was unequal to the task and McNamara won in a great drive with Magin in second place. Grenda finished third and Bedell fourth.

Lloyd Thomas, of the Thomas-Madden pair, pulled Frank Corry around to the front a half-mile to go, but the teaming was so apparent that the referee suspended the pair indefinitely. A spill, in which Goullet, John Bedell, Egg, Phillips and Cavanagh figured, was spectacular, but not disastrous.

The order of the finish, with the first-named rider sprinting for the team, is as follows: First, Reggie McNamara and Bob Spears, Australia; second, Jake Magin, Newark, and Percy Lawrence, San Francisco; third, Alfred Grenda and Alfred Goullet, Australia; fourth, John and Menus Bedell, Long Island; fifth, Harry Kaiser and George Cameron, New York; sixth, Jackie Clark, Newark, and Eddie Root, Boston. Time, 2:20:44 1/5.

The intermediate moneys for the sprints were won as follows: Five miles, Madden and Thomas; 10, Root and Clark; 15, Walker and Grimm; 20, McNamara and Spears; 25, Spears and McNamara; 30, McNamara and Spears (Corry won, but was disqualified for foul riding); 35, Thomas and Madden; 40, Egg and Dupuy; 45, Goullet and Grenda; 50, Piercey and Corry; 55, Goullet and Grenda; 60, Goullet and Grenda. Lap prizes were divided as follows: Kopsky and Smith, 72; Walker and Grimm, 30; Halstead and Ray Eaton, 59; Magin and Lawrence, 11; Spears and McNamara, 8; Goullet and Grenda, 18; Egg and Dupuy, 27; Clark and Root, 8; Bowker brothers, 9; Bedell brothers, 22; Hanley and Madden, 7; H. Ohrt and Thomas, 13; Kaiser and Cameron, 9; Cavanagh and E. Ohrt, 34; Ryan and Anderson, 8; Rupprecht and Krebs, 11; Piercey and Corry, 16.

ONE OF THE BRIGHTEST SHOPS IN THE SOUTH

Store of H. L. Tisdale, Sumter, S. C., Agent for Cleveland, Columbia and Crescent Bicycles

OH! LOOK WHO'S HERE! SIX-DAY RACE DUE

NEWARK, N. J., Aug. 16.—Local Velodrome fans have taken to long distance team racing so kindly that the local management have decided to stage a six-day two-hours-a-night race during the week of August 21, and it is figured that at least eighteen teams will face the starter.

The race will be run on the points system, the points for the first five nights will be 20, 12, 8, 6, 5, 3, 2, and 1, while on the final night the points will be 100, 60, 40, 30, 25, 15, 10 and 5. Ten places will be decided and the race will be run for a percentage of the gate. Twenty per cent. of the riders' share will go to the team scoring the most number of points in the six nights of racing, the others being graded down as follows: 15, 13, 11, 10, 8, 7, 6, 5 and 5. Fifty cents will go to the team leading at each lap and $5 to the leading pair at each five-mile station. To make it an incentive for the cyclists at the finishes the management will offer $100 each night.

BUFFALO FANS SEE FIRST RACES OF SEASON

BUFFALO, N. Y., Aug. 15.—Two bicycle races were on the program of the Shepherd's games at Erie Beach, Fort Erie, Ont., Saturday afternoon last. This was the first opportunity that local cycling fans have had a chance to see their favorite riders in action and a good crowd turned out.

A spill on one of the turns in the two-mile event eliminated L. A. Peterson and Joe Schieder from all chances of winning, as they had too much ground to make up after being assisted onto their bicycles again, Schieder being forced to secure another bicycle as he had punctured his tire.

Isadore J. Gronkowski an unattached rider, accounted for the race from A. F. ("Tony") Burke, Royal Flyer B. C., and L. F. Schreck, unattached, and L. A. Peterson, Black Rock C. C., in the order named. The time was 5:52 1/5. Peterson had better luck in the half-mile open and he accounted for that event by beating Elmer Bundt, and Gronkowski in the sprint.

CONTINENTAL ANNOUNCES TWO NEW TIRES

Brigadier and Enduro Are Latest Additions to Firm's Line of Cycle Pneumatics—Both Are Popular Priced—New Grip Is Marketed

ERIE, Pa., Aug. 14.—The Continental Rubber Works announces two new popular-priced tires: the Brigadier and the Enduro. Together with the well-known Vitalic tire, which has established an enviable reputation as a thoroughly high quality bicycle tire, the newcomers constitute a complete line, calculated to meet every bicycle tire demand from the highest grade down to a good popular-priced article.

The Brigadier has a large white studded tread, while the Enduro has a diamond. The Vitalic, as is well known, has a high V-formed tread. The Brigadier is a four-ply tire built with two plies of high grade Egyptian fabric all around the tire and two extra plies on the tread. The inner tube is heavier than ordinary and the friction is of high grade. The Brigadier has gray sidewalls and white tread.

Enduro Construction

The Enduro is constructed with two plies of high grade Egyptian fabric with a high quality friction. It has a full weight inner tube of very good quality and a substantial white tread.

As has been the policy of the Continental firm in the past, the complete line will be distributed through jobbers in every section of the country. Already, the line has met with a most enthusiastic reception on the part of the jobbers and there is every indication that it will prove a most popular line with dealers.

New Rubber Grip

Another novelty from the same firm is the Enduro grip, a rubber article especially designed to take the place of the leather and wood grips used on many bicycles. The rubber used in the Enduro is of very high grade and the grip is built along the lines of the firm's motorcycle grip, the difference being in the smaller dimensions.

THE WHEEL ABOUT THE HUB DUE IN SEPTEMBER

BOSTON, Mass., Aug. 15.—This year's Wheel About the Hub will be run Friday, Sept. 15, over the same route as in former years. Capt. W. G. Kendall will celebrate his twenty-fifth tour on this occasion and will repeat his stunt of riding up all the hills as in former trips. The annual meeting of the League of American Wheelmen's National Assembly will be held the night previous at the Dreyfuss restaurant, 8 Beach street, and Abbot Bassett, the secretary and treasurer, desires all old timers to be on hand.

MADONNA WINS HOUR RACE AT REVERE TRACK

BOSTON, Mass., Aug. 15.—Vincent Madonna, the Providence Italian, accounted for the one-hour race at the Revere Beach track, Saturday night last. Opposed to Madonna were Victor Linart, the Belgian; Leon Didier, the Frenchman, and Clarence Carman, Long Island's premier pace follower.

Carman led for 53 minutes of the race, but lost his pace when he was attacked by Didier and the Long Islander finished last. Didier finished second and Linart third. In the hour Madonna, who rode a steady race, covered 42 miles, 1,100 yards.

Tim Sullivan, the New Haven sprinter who was recently reinstated to good favor in the ranks of organized cycling after his mix with Ned Chandler, the negro, met Chandler in a match race and defeated the latter in straight heats. Chandler fell in the first heat, but was uninjured. John Fardig won the mile amateur handicap and Hugh McPartland the pro. handicap.

KOCKLER CLINCHES CHICAGO AMATEUR TITLE

CHICAGO, Ill., Aug. 15.—Ernest Kockler, amateur champion of Chicago, was the bright star at the Riverview Velodrome Saturday night, Aug. 5 and Sunday, Aug. 6. Kockler annexed both the half-mile and the one-mile races in the city titular series, the winner and second man to take a trip to Newark to meet the best two at the eastern track, if the scheme goes through. Egisto Davini, the Italian, finished second in each race. Kockler also won the five-mile open on the first night. Summaries:

Saturday, August 5

Half-mile novice—Won by E. Vansteenkisci; second, G. Decchinni. Time, 2:39.

One-mile handicap (amateur)—Won by Leonard Matson; second, Oscar Sachse; third, Earl Stasch. Time, 2:04⅕.

Australian team pursuit race (amateur)—Won by Oscar Sachse and Henry Hoffman; second, R. Disselberg and S. Meers. Time, 5:23. Distance, 2½ miles.

Half-mile Chicago championship (amateur)—Won by Ernest Kockler; second, Egisto Davini; third, Willie Kell; fourth, A. Van der Palt. Time, 1.07⅕.

Five-mile open (amateur)—Won by Ernest Kockler; second, Henry Chiostri; third, Oscar Sachse. Time, 11:22⅗.

Sunday, August 6

One-mile novice—Won by Ed Arens; second, R. Giffelberg; third, J. Meers. Time, 2:37⅗.

Third-mile handicap (amateur)—R. Giffelberg; second, J. Larson; third, Ed Arens. Time, 40 seconds.

Miss and out (amateur)—Won by C. Danlos; second, P. Klaem; third, Oscar Sachse. Time, 2:34⅘. Distance, 1⅛ miles.

One-mile Chicago championship (amateur)—Won by Ernest Kockler; second, Egisto Davini; third, A. Van der Palt; fourth, Roy M. Whirter. Time, 2:43⅕.

Ten-mile open (amateur)—Won by Olaf Lodal; second, Carl Stockholm; third, A. Van der Palt. Time, 23:46⅕.

VERMONT CLUB'S CAMPAIGN

BENNINGTON, Vt., Aug. 8.—A membership campaign has been started by the members of the local bicycle club to increase their membership. At the present time there are 23 names on the membership roll and the officers have hopes of making it 60 before September 1.

MAYOR TO ACT AS STARTER

HARRISON, N. J., Aug. 15.—Mayor John Daly will start the 20-mile road race of the Harrison Pleasure Club, Sunday, August 20, at 2 o'clock in the afternoon. At least a dozen prizes will be put up for the event, including silver cups donated by Mayor Daly and Platt Adams, the Olympic star, and gold medals.

WETZEL'S TRIP STARTS TOURING PLANS

PHILADELPHIA, Pa.—Arthur Wetzel has just returned from a two-weeks' vacation on his bicycle, during which period he rode through the Delaware valley, Pocono Mountains and visited the United States Artillery Camp at Tobyhanna, Pa. His return has started the touring bug in the crowd at Schunemann's store, and tours are now being laid out for the week-end over Labor Day.

The bicycle bunch, including York of the C. R. C. A., Kirk, Hart and Worthington, will take the road, while the motorcyclists purpose to ride as far south as Lynchburg, Va.

MANY BICYCLES ARE USED IN HOLLAND

IN a recent report of Consul Frank W. Mahin, at Amsterdam, Holland, it is stated that 7,500 motorcycles are in use in the Netherlands at the present time, as well as 850,000 bicycles. There are, in fact, one bicycle to every seven persons in the kingdom. The flatness of the country and the general use of bicycles for delivery purposes account for the great number.

The consul states that due to the sale of some very poor machines of American make some years back, a prejudice against the American bicycle still exists. Only very skillful and persistent effort, coupled with visible demonstrations of the superior quality and durability of American machines, can overcome this prejudice, he says.

RYAN TAKES POINT BREEZE PACED FEATURE

PHILADELPHIA, Pa., Aug. 15.—Martin "Grassy" Ryan, the Newarker, won the 40-mile paced race at the Point Breeze track, Saturday night last. George Colombatto, the Italian, and Menus Bedell, the Long Island paced star, opposed Ryan in the long race. Many mishaps featured the race, Colombatto and Bedell being the unfortunate ones. Bedell lost the roller on his pacing machine and lost 19 laps through the accident, but managed to gain considerable of the lost distance back. Ryan took the lead about the fifteenth mile and was never headed, Colombatto finishing in second place. The time was 52:56⅗.

JACKSONVILLE ROLLFAST AGENTS

WORD has been received from the D. P. Harris Hardware Co., of New York, that an error was made by the firm in giving the name of the Southern Hardware & Supply Co., as that from which the firm of McGraw Brothers, of Jacksonville, Fla., was changed. The correct name is the Southern Hardware & Bicycle Company. This firm distributes Rollfast tires, made by the Harris concern, in Jacksonville.

BIKE SALES GROWING

COLUMBUS, Ohio.—With the passing of the extreme hot weather, bicycle dealers in Columbus and central Ohio report a much better demand for bicycles. Workingmen are buying them more actively and on every side there is quite a demand.

Digitized by Google

BELLEVILLE RACE HONORS TO HOME TALENT

BELLEVILLE, Ill., Aug. 14.—Herbert Schmitt, a member of the West Side Cycle Club, carried away first honors in the 20-mile race run at the Fair Grounds by the Moose lodge, Sunday, August 6. Members of the West Side club carried off the major share of the prizes despite the fact that there was some of the St. Louis stars in the race. Schmitt started from scratch and covered the distance in 1:06:02.

Frank Hilpert, scratch, and Arthur Schmitt, one minute, club mates of the winner, finished second and third, respectively. Larry Schmitt, Arrow Cycle Club, scratch, finished fourth; G. Reichert, Arrow C. C., scratch, finished fifth, and D. Flynn, West Side C. C., scratch, was the sixth man to cross the tape. The West Side club plan to send its racing team to the 20-mile race to be held in St. Louis, in October.

POINT BREEZE RACES GO TO GEORGE HARRIS

PHILADELPHIA, Pa., Aug. 15.—George Harris, the local negro cyclist, accounted for both bicycle races at the Foresters of America games at the Point Breeze track Saturday afternoon last. Harris won the five-mile handicap from scratch, leading Phil Kelly, 50 yards, and Morris Price, 300 yards, over the tape in the order named. The time was 11:03 4/5.

A five-mile miss-and-out was down on the program, but owing to a mixup between riders and officials the race was declared no contest and a one-mile event was substituted. Harris defeated Kelly and S. Brown in the order named in 2:53. A big crowd saw the events.

GALA DAY SCHEDULED BY BUFFALO DEALERS

BUFFALO, N. Y., Aug. 15.—Buffalo cycling enthusiasts will come into their own on Wednesday, Aug. 23, when the Buffalo Cycle Dealers' Association will hold a parade and celebration. Several races are scheduled for the afternoon at Columbia Park. Among the events are contests for boys under 12 years of age, one for boys three years older and one for youngsters two years older; also two handicap races at three and five miles. No admission will be charged for the races and three prizes are up in each event.

TOURS TO COLLEGE BY BICYCLE

PENN YAN, N. Y., Aug. 15.—W. Robert Whitfield, a young cyclist of this city, has undertaken a 1,400-mile bicycle trip. Young Whitfield left last week for Gainesville, Fla., where he will take a four-year course in the University of Florida. His only baggage consists of two blankets, bathing suit and necessary toilet articles.

ATHOL, MASS., DEALERS CHANGE

ATHOL, Mass., Aug 15.—Samuel S. Derby has taken over the bicycle and motorcycle store of A. S. Frizzell on Travers street, the latter to devote his entire time to his gasoline, oil and naphtha business. Mr. Derby is well known in this city and will boost the bicycle and motorcycle business in this section.

WATKINS WINS ST. LOUIS TITLE

ST. LOUIS, Mo., Aug. 15.—L. Watkins, a member of the Missouri Cycling Club, gave J. B. Freeman, of the St. Louis Cycling Club, the surprise of his life in the one-mile local championship, held at Fairgrounds Park, Aug. 5. Curtis Long, Freeman and Watkins came up the stretch together, Watkins getting the verdict by a small margin over Freeman, with Long in third place. The time was 3:03. A juvenile titular event, at a mile and a quarter, was won handily by Ralph Moberly.

CLUB RACES FOR B. V. W. RIDERS

NEWARK, N. J., Aug. 15.—A series of handicap races for members of the Bay View Wheelmen will be staged on Sunday mornings as long as weather permits. The first of the races will be staged next Sunday, the initial contest being over a one-mile course. Amateur Champion John Staehle, Alfred Andres, Chris Boehme, J. P. Cobert, William Keller and "Pop" Miller comprise the judges and timers.

LABOR DAY RACE FOR K. C.

KANSAS CITY, Aug. 14.—Frederick P. Ames, E. B. Saufley and Morris E. Sellers have been appointed a committee to map out the route and take care of other details in connection with the 25-mile road race to be staged by the Bicycle Dealers' Association of Kansas City on Labor Day. The race will start at 10:30 a. m. and there will be twenty or more prizes up for the riders. Entries will close September 2.

AN ADVERTISING CHAT WITH DEALERS

(Continued from page 30)

Factory electrotypes are easily handled and in using them the dealer is always sure of getting just the kind of setup he wants. Some printers have the most fantastic notions in regard to the style of type face that should be used. A dealer could get in and stick type with some of them himself as far as judgment in using type styles is concerned.

On the matter of borders around ads there is bound to be a clash between the advertiser and the printer. The latter has usually some very set ideas, some that were handed down from Benjamin Franklin's time, too. The dealer should not hesitate to ask for what he wants.

Use Factory Electros

Referring again to the factory electrotype, there are a great many dealers who do not use them extensively for the reason that they feel they are better able to inject local atmosphere into their advertisements by preparing them themselves. There is a great deal to this philosophy. Advertisements that carry the dealer's individuality in most cases get across better than those prepared by the factory man who is not acquainted with local conditions.

The localizing phase of advertising applies particularly to space devoted to emphasis of the commercial possibilities of the motorcycle. Strong facts telling of the experience of other merchants in the same towns, men who are known to the possible prospect, are the best ones to set forth.

Because he has contracted for a certain number of inches in his local paper is no indication that the dealer should fill that space up solidly with type matter. In modern advertising it has been found that some of the most valuable space in an ad is white space. The dealer may think it is wasting space that costs money. It is not. It is creating an effect that in the general layout of the type matter and cuts probably is bringing greater returns than the space covered with type. Judicious use of white space is what makes an advertisement attractive to the eye.

The dealer who has an idea in mind can always transmit it to cold type with the proper amount of determination. Write the copy out on one sheet and then draw a rough sketch of the way the ad should be set up, indicating with the first two or three words in a paragraph where it should go in the ad. With the specimen type sheet at hand it is easy to lay out an advertisement. If the layout does not create the desired affect it can be changed in the second ad. If the proof does not carry out the first idea do not hesitate to make the necessary changes. Make the printer give you what you want.

"DAYTONAGRAMS" MAKES BOW TO TRADE

FROM the Davis Sewing Machine Company, of Dayton, O., has come the first issue of "Daytonagrams," a publication which is devoted to the interests of those who buy, sell or use Dayton motorcycles, Motor Bicycles or Dayton bicycles. The leading article is one on small investments and quick sales, while a second has to do with going after prospects. The issue is attractively gotten up and will be welcomed by all interested in Dayton affairs.

EDDIE TO TAKE FIRST LONG RIDE ALONE

PROVIDENCE, R. I., Aug. 15.—Eddie Swenson, the young son of B. A. Swenson, Indian distributor, will take his first long ride alone next week. He is at present spending his vacation at a camp in the Maine woods. B. A. sent his son an Indian for his own use last week, and Eddie will make the 222 mile trip to this city on it, making the run entirely alone.

Eddie has been with his father on several long pleasure runs and also in endurance runs and is by no means a stranger to the motorcycle. He has driven many miles with an Indian sidecar outfit, also.

DARING WOMAN RIDER ON 75-FOOT "BOWL"

ROCKY POINT, L. I.—Miss Margaret Gast, who for several years has been giving motordrome exhibitions on a Flying Merkel motorcycle, is now riding at this place and drawing crowds. Miss Gast performs on what is known as a "bowl," a portable inclined track only about 75 feet in diameter at the top, and her cleverness in negotiating the steeply banked inclosure invariably wins the commendation of spectators. When the engagement at Rocky Point is finished, Miss Gast will give similar exhibitions at other points in the east.

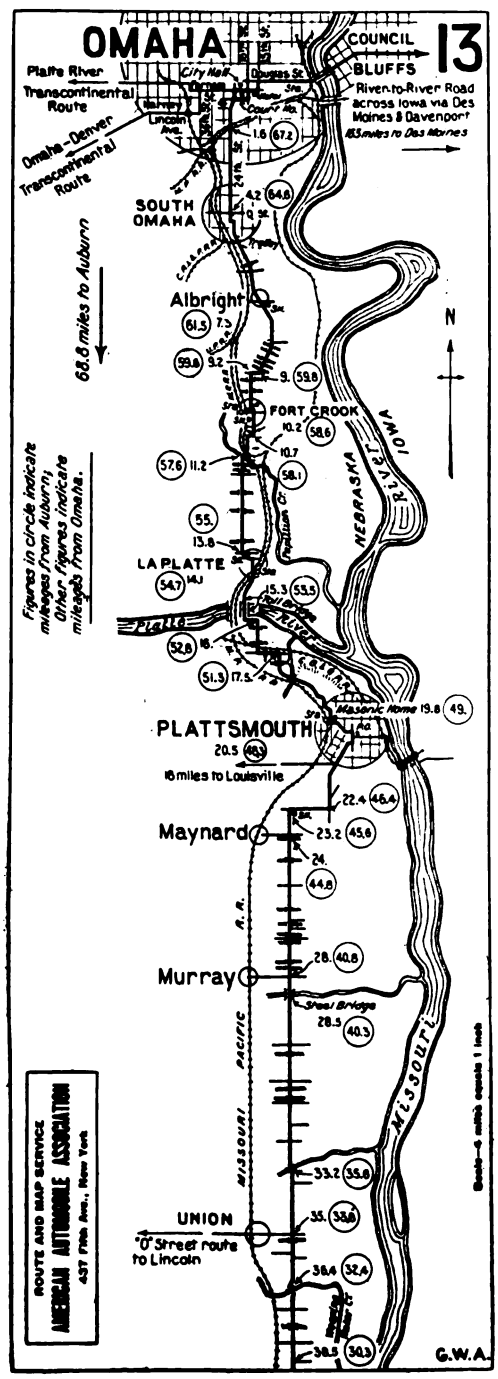
The Story of a Strategic Bridge

by ROBERT BRUCE

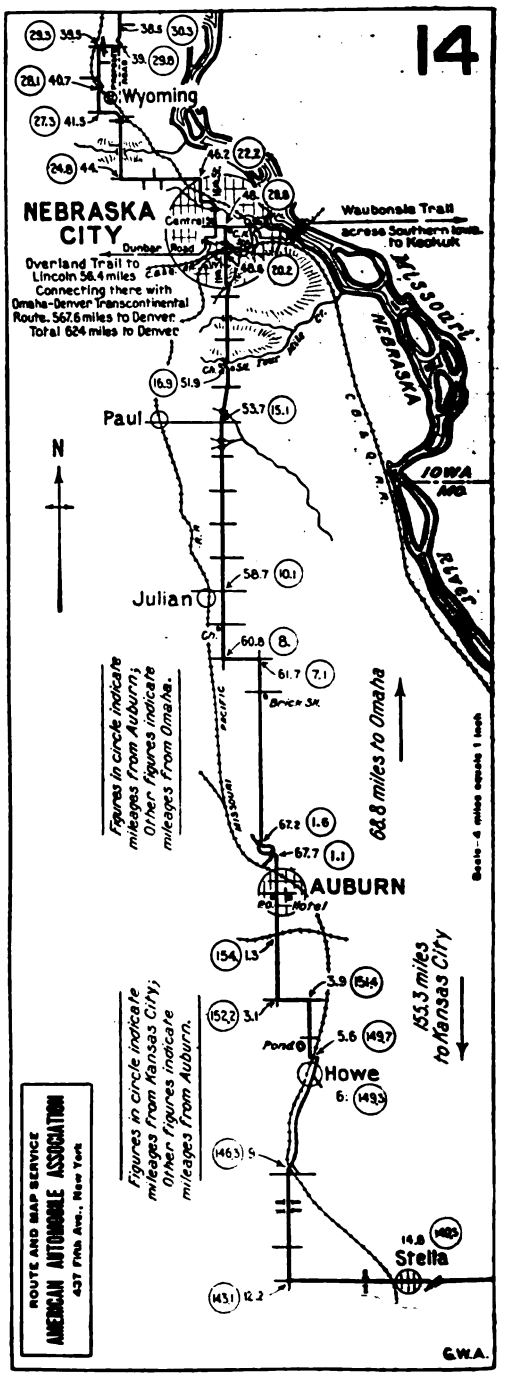


The Bridge That Shortened a "Transcontinental Route" Is the One Across the Platte River at the Mileage Figures "15.3" from Omaha.

WHILE new long-distance routes are being laid out all the while, great progress is being made in improving and standardizing the older ones, especially that pioneer transcontinental line, the "Trail to Sunset," from Chicago through Omaha, Kansas City, Trinidad, Santa Fe, Phoenix, San Diego and Los Angeles to San Francisco. This, by the way, is the only route that the eastern tourist can ordinarily start as late as September, and plan to cross all the way by road to the Pacific coast without risking cold weather, or even snow, in the mountains on the northern and central routes.

The present distance from Chicago to Los Angeles via the "Trail to Sunset" is 2,797.7 miles; formerly it was 2,817.2, the saving of 19½ miles having been effected by the building of a strategic highway bridge across the Platte River in Nebraska, 15.3 miles south of Omaha and 4½ miles north of the town of Plattsmouth. A glance at the route map (No. 13 in the upper right-hand corner), will show the location of this comparatively new but important bridge, near the junction of the Platte and the mighty Missouri. The larger half-tone illustration gives a good idea of the bridge itself, the toll-house and an automobile that has just crossed. Many motorcycle tourists use it also, and all who have passed over it will instantly recall the locality.

When the original survey of the route was made, it was necessary to start nearly west from Omaha, through South Omaha, Fort cross the Platte at the town of Louisville, thence through Weeping Water, zigzaging back toward the river through several small towns to Auburn, Neb., 88.3 miles from Omaha. This not only cut Plattsmouth and Nebraska City off the route, but made necessary a number of turns in the prairie country, some of them none too easy for the stranger to identify. But upon the completion of this bridge, the route changed to go nearly south from Omaha, through South Omaha, Fort Crook and La Platte, crossing



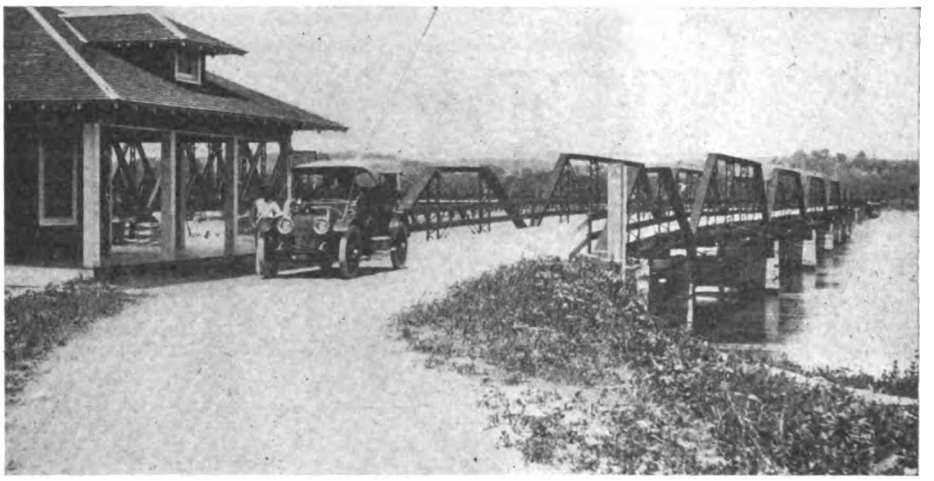
The Important Town of Nebraska City, Neb., Was Put on the "Trail to Sunset" by the Building of the Plattsmouth Bridge Over the Missouri.

Digitized by Google

the bridge shown in the illustration to Plattsmouth, Nebraska City and Auburn, a distance of only 68.8 miles. This not only saved 19½ miles, but provided an easy, practically direct route within a short distance of the Missouri River all the way.

In point of time the saving is greater than might appear from the figures, as the 224 miles between Omaha and Kansas City are now frequently covered in a day, whereas the additional 19½ miles, over a circuitous route with many turns, usually made it necessary to stop overnight on the way. Recently an association has been formed, principally among the business men of the river towns, to develop and promote what has since been formally called the "Omaha-Kansas City scenic route." A great deal of improvement work is in progress, especially the building of concrete culverts and bridges; the road is already well graded and "dragged" as needed. It is the purpose of this association to keep this route in good condition at all times; and as a result an increasing amount of through travel is going over it.

While the saving of time and mileage by the building of the Plattsmouth bridge is in itself an exceptional case, it is only typical of the rapid improvements constantly being made on the trunk-line route in the central and far west. Within the past five years several complete transcontinental routes have been linked up out of what were formerly almost isolated roads, mostly without signboards and very difficult for the stranger to travel over. The time required for a long cross-country trip has easily been cut in half, and will be further reduced as present and prospective improvements are realized.



The Bridge That Shortened the "Trail to Sunset" 19½ Miles, and Put Plattsmouth and Nebraska City, Neb., on the Omaha-Kansas City Through Line

NEW CLUB IS FORMED IN WASHINGTON

WASHINGTON, D. C., Aug. 14.—Growing out of a feud or near feud which has been taking place between the two motorcycle clubs which Washington has been blessed with for the past few years has come one grand organization, the Washington Motorcycle Club, which came into existence a short time ago. The new organization came as a direct result of the disbanding of one of the older clubs which resulted in the prime movers for the new body calling a meeting on Tuesday night, June 13, when it was decided to interest all the riders hereabouts and cement the new organization on Sunday last. For the purpose a run was announced to Boonsboro, Md., 65 miles out of Washington, where arrangements were made with a hotel where the meeting was held. Some 25 riders took part in the run and became charter members of the new Washington M. C.

August Zimmerman, well known in Washington motorcycle dealers' circles, was chosen to head the new organization temporarily, and G. D. Cochrane assumed the post of vice-president. J. McL. Seabrook was elected secretary-treasurer.

Trade and Sport in Great Britain

By OLD RAMBLER

LONDON, England.—The latest news from the field of manufacture is that the old firm which produces the Bradbury motorcycle is about to enter the realm of the lightweight makers. This reminds me of several things. The Bradbury is to be a 2¾ horsepower model, single cylinder, four-stroke. The cooling flanges are arranged around the valve pocket vertically instead of in the orthodox horizontal style; there will be a two-speed gearset and final drive by belt.

This news is probably far more important than may appear at first glance. I have seen motorcycles of many varieties of horsepower from 3½ upwards in course of production in the huge Bradbury factory, but this 2¾ horsepower model is the first *below* the standard just referred to, and it pretty well suggests that we are going to have on this side (as in America) more and yet more firms who see a big market for the lightweight.

Crankcase Part of Frame

There is one particular point with this model, which is rather original in motorcycle construction: The crankcase is designed to form part of the frame. There is no doubt that this strengthens the frame. The bore of the new little Bradbury is 2.92 inches, and the stroke is 3.11 inches.

W. Cooper was at one time a magnificent exponent of racing tricks and tactics on a Bradbury, and American readers may feel a bit of pride in the fact that he is now a Harley-Davidson rider. Rumors that he is joining the firm are groundless, however; Cooper will retain his amateur status, a point that will deepen interest in his doings.

The question of hand versus foot control of the clutch is still with us. Most riders prefer handlebar control, and not the foot pedal, it appears. For traffic-dodging in a busy city, the former has a marked advantage, as it leaves the rider with both feet available to slip on the road at a critical moment, whereas the foot control does not leave him with both feet ready in case of a pinch. In the case of a machine with sidecar, one mode of control is pretty much as good as the other, for a man can get accustomed in a remarkable way to delicate touch and control. For mounting, hand control is the superior, because there is more freedom of action—none of that balancing on one foot, as with foot control.

Serbian Roads

Motorcycles are in every battle-zone in Europe, Asia and Africa, and one receives weird tales about them sometimes. One rider who went up from Salonika with the Allies that entered Serbia discovered that the latter country was hundreds of years behind the times as regards roads and a lot of other things. Listen to his words:

"While we were at Salonika, we (the despatch riders) got an issue of new machines, and shortly after that we moved up into Serbia. This is where the real test began, for Serbian roads are hopeless. It was more like trick-riding than motorcycling, as it was impossible to find a road that was level for more than a few hundred yards. The road, so-called, would suddenly dip for several feet, and the hollows would be full of rough cobble stones. Everything that could shake itself off the machine would come when it crashed into one of those hollows. The stock of spares was soon interfered with, of course, as a result; in fact, we had to dismantle good machines to get parts for the others. Still, we used our motorcycles throughout the whole of the operations in that part of the world and under all sorts of conditions.

"During the retreat from Serbia, the motorcycles came in for an especially trying time, for all wires (telephone, telegraph, etc.) were cut, and despatch riding was the only means of communication."

What Racing Has Done

On this subject I might add a few words very aptly. The hazardous and thrilling duties entailed by the war have called for those very qualities which characterize competitors in motorcycle races. Those tomfools who have contemned motorcycle races in years gone by little knew how great was their folly; the grand fellows who learned to take life risks in keen sporting events are the very men who are doing one of the most dangerous jobs in the whole war, with success.

The Italians cater for the British market, not on so big a scale so far as the Americans, but you must allow me to say plainly that the Italians *do* offer a machine, which is more on recognized British lines than some which are made in the States. Take the case of the Bianchi, a combination drive model. It has a 3½-4 horsepower motor with a bore of 3 inches and a stroke of 3½ inches. There is a three-speed gearset incorporated in the same base casting as the motor; handlebar control for valve lifter, throttle, air, spark and front brake is fitted; the muffler is in front and a semi-automatic oiling system is fitted. It appears that many British components are incorporated, and indeed such is the case, but a good deal of Italian workmanship marks the mount.

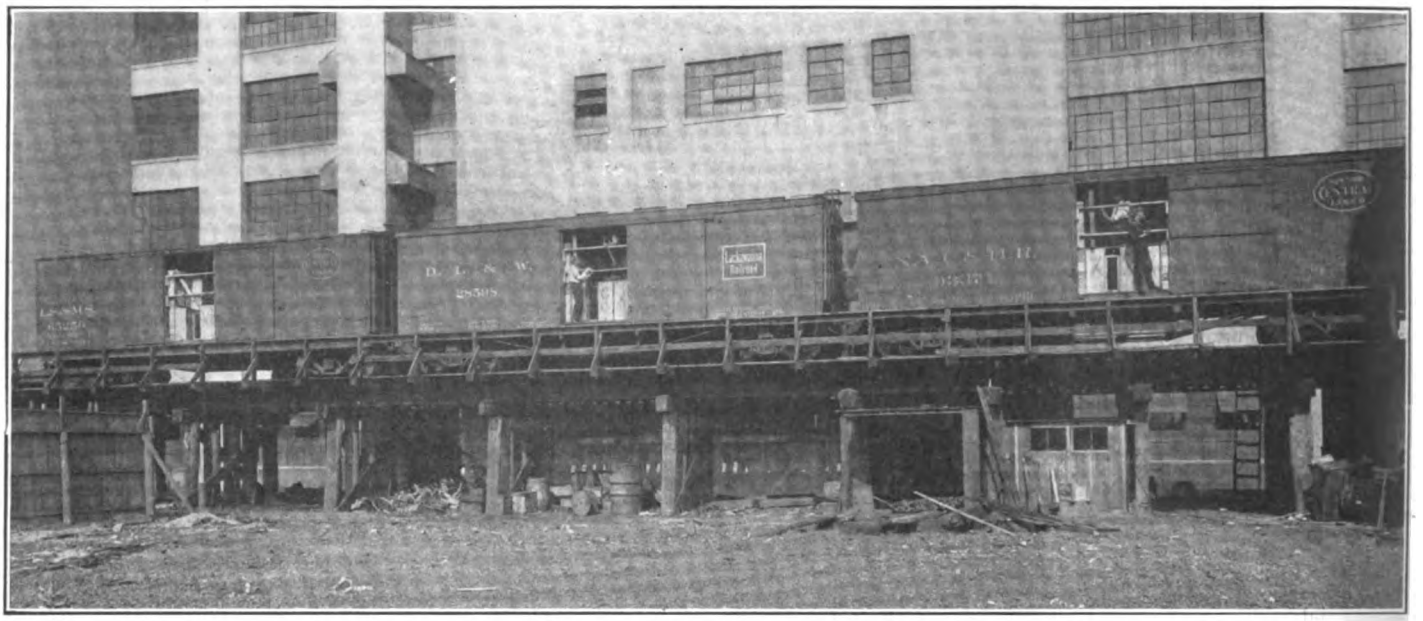
EN ROUTE FOR ITALIAN DESPATCH RIDERS ON ISONZO FRONT



Three Carloads of Model 17-3 Excelsiors Destined for Service with Italian Army, Loaded for First Leg of Voyage to Eastern Port. Photo Taken at Factory of Excelsior Motor Mfg. & Supply Co., Chicago, Ill.

A Few Spare Links

By GOSLIN

You lads, who ride the electric models, had better keep a wary eye on the water level in your battery. Water sure does evaporate at a rapid rate when it's warm.

Met up with a lad the other day who uses powdered mica in preference to graphite. Says it's better than the latter because its a non-conductor. Well, there's them as fusses about their boat all of the time and there's them that takes things as they come. So do I.

Advance tip on all 1917 models—Motorcycle engines will be improved, but will still need gas and oil to run them.

Rumor has it that there is a radically different type of motor due soon, one that has proved very popular over across the pond.

It will either be a heavy lightweight or a light heavyweight, take it as you like.

Generally a good harvest moon in August. That had ought to be a good time to pull off a moonlight run.

Say, why don't one of you energetic riders go out under a F. A. M. sanction and hang up a 24 hour road record for the lightweight or sidecars.

If you did it under sanction, you'd hold a record no matter if you rode less than a hundred miles, there being nothing on the books at present.

About 600 miles in the lightweight and between that and 700 is my estimate for the sidecar.

Fact, and more are enlisting every day, over on the other side.

Take a tip from Uncle Dud, don't drink water at every spring or well you pass on the road, while on a tour, better save your thirst till you reach a town.

There's a twin two-stroke on the English market, now what d'ye think o' that? Under way they say it does 50 with a sidecar and sounds for all the world like an aeroplane in action.

Had several starlit nights last week, and as a result the hum of motorcycles was in the air. Have you tried one of those nice little evening jogs yet this season? If not, you'd better get busy.

Great stuff, believe muh, to get home from the job all sweated and fretted, eat a light meal and then roll out for a 40-mile ride in the dusk. Sure does make you shake off the grouches. And you come back refreshed and ready to make the most of a night's sleep.

Uncle Sam is getting wise to the wonderful mobility of the motorcycle at last, and will soon be in the market for about 900 of them.

How many of you know that over 8,500 English motorcyclists responded to their country's call and were used in the line of their special training exclusively?

Good idea that Chicago sidecar club, I'll bet that bunch have some fun on their runs.

And a lady secretary too, get that boys?

What's the matter with the good old-fashioned hill-climb as a club competition?

Those California motorcyclists had a lot of fun out of this type of contest earlier in the season, but the idea has not come East at all.

You don't need a public road for this, fellows; some good steep hill in a field would do very well.

In fact, if you found a hill that was impossible to surmount at all, a la Capistrano, then you'd do the best ever in picking it.

Then shoot the riders at the slant, and class him winner who overcomes Old Man Gravity the farthest in three tries.

No need of formulae, no need of timers. All you need is a good squad of huskies to ease the machines down hill again, that's all.

Harry Green never retards on hills, says he has the motor used to advanced spark, and away he goes—clinking like a boiler shop. Take Harry's name out and maybe yours would fit in. When you're green you certainly will do queer things.

F'rinstance, there was the lad who shut off his oil when his motor smoked a bit, and then rode five miles before she "froze" up!

A club in New Jersey has started collecting license plates from riders in other States, and has quite a unique lot of decorations for the club wall. The varicolored license tags give a sort of futurist effect—or whatever you call it. At any rate the stunt is quite popular with that club.

Hey! Are you hep that gasoline went down half a cent a gallon, wholesale, a few days ago? Positively. 'Taint much, but sufferin' cats, it's the first drop in many moons.

In the Dealer's Realm

CONSISTENCY BUILDS UP BUSINESS

If You Go After Commercial Sales Your Best Asset Is a Delivery System of Your Own and This Dealer's Experience Proves It—A Demonstration of Real Service

By R. FRANKLIN MUNDORFF

IT being my business and custom to loiter about motorcycle establishments over rather a wide territory, I often find myself to be one of those present when a dealer is administering one of his best sales talks to a prospective customer. The psychology of the motorcycle dealer and the motorcycle prospect are two of the most interesting of human nature studies.

Often, I have listened to motorcycle dealers, who become so eager to make a sale and so wrapped in the exploitation of their goods, that they make various assertions for their articles of sale that would at once clinch the point and consummate the negotiations, if they would but prove their statements.

Sidecar and Van

One of the best features of the motorcycle business, when properly worked, is that of the delivery van for commercial purposes and the sidecar for pleasure purposes. Yet, according to a majority of the dealers, it is one of the most difficult phases of the business to establish and bring to the desired point. But, once established and under way it is not only one of the most pleasing, but returns, perhaps, the best revenues.

Recently, I happened into an establishment one morning, just as the agent was exploiting the motorcycle delivery van to the prospect, who seemed in doubt as to what kind of a vehicle to employ in his business for delivery purposes. The prospect listened attentively to the dealer and after carefully absorbing the sales talk of the dealer, the prospect began to look over every machine in the establishment. There were none on the sales floor of the type the dealer was trying to sell. The prospect left the shop still undecided.

Taking Prospect Along

That afternoon, as I sauntered into the agency of another dealer, I noticed the same prospect of my morning visit, looking over the machines on the floor. Several motorcycles with delivery vans were on the floor as well as several with and without tandems, sidecars and so forth. The telephone happened to ring almost as I entered and the young man in the parts department happened to answer it. On the south side of the city a rider had broken a chain and as there was no shop in the neighborhood he called the agency for assistance as he happened to be without the necessities to remedy the accident. The clerk placed several links and tools in a sidecar and invited the prospect to take a ride with him.

The trip was one that would have occupied at least thirty minutes via the street car and one that the clerk made in twelve minutes. While the sale of the links was a minor one to the establishment and the profit very small, the idea that the motorcycle establishment was taking care of its customers by making deliveries within a reasonable radius to its customers was vividly impressed on the prospect. The motorcycle agency was doing in its business just what it had told him would benefit his business and was caring for its customers as he wanted to care for his.

Making the Sales

After returning to the shop with the prospect the clerk made plain just what the expense of operating such a delivery system really was and that compared with the street car and other methods of transportation it was very small. The prospect instantly grasped the idea and purchased a machine with a sidecar equipment, as the packages in his business to be delivered were small, he saw the advantage of being able to use his machine both for commercial purposes and pleasure.

The agent's point of view is one that should prove a potent factor to the business of any motorcycle agent any place in the country. A man who pretends and intends to sell motorcycles for commercial purposes should have a delivery system for his own establishment. If a motorcycle delivery system is a good thing for any line of business it is likewise an asset to the motorcycle agent. It not only demonstrates the point to the customer, but brings home to him the fact that the establishment with which he is dealing will give him the service which he wants and he will give his customers.

Consistency Wins Out

The fact that a motorcycle dealer can institute a delivery service which will prove profitable to him, by delivering parts and accessories within a reasonable radius, is one that should not be overlooked or underestimated, and the dealer who endeavors to make sales of motorcycles for commercial purposes should practice what he preaches in his business.

ZIMMERLINS BUSY

SAN FRANCISCO, Cal.—Zimmerlin Brothers, handling the Thor at retail in this city, have placed three out of the original ten machines in stock at their Golden Gate avenue store and one at San Rafael. They have now a special demonstrator to show all comers what the Thor can do. J. Zimmerlin, the senior partner, has selected a model 16-V for his own use.

Questions and Answers

BROKEN CONTROL WIRE

I FIND that at intervals I am unable to retard the spark on my 1915 twin, while at other times both spark and valve lifter respond right away to the movement of the grip.

Chicago, Ill. WILLIAM BROWN.

Your left hand control wire is probably broken in the sheath. Look for this by taking off the sheath at the rear end and endeavoring to draw the wire out. Use a bit of solder where the pinch-collar grips the end of the wire.

ACETYLENE CAN BE USED

I WOULD like to know if it is possible to run a motor on acetylene in an emergency, taking it from a Prest-O-Lite tank.

New York. PHILIP KAUFMAN.

Acetylene is a gas which when ignited gives a very powerful explosion. You can use it in an emergency by inserting a rubber tube through the auxiliary air shutter of the Schebler (on the side of the carbureter close to the leather air valve), giving the valve on the tank just a little bit of opening. How much will depend on the pressure in the tank. You may have to change the setting on the leather air valve spring to get the correct air amount for the acetylene which enters the cylinder. We do not advise using this gas except in case of necessity.

MIXTURE IS WEAK

MY 1911 single runs pretty fair on low speed but when the throttle is opened the motor chokes up and nearly stops. Compression is good. Motor was overhauled not long ago. When the motor chokes up there is a popping in the carbureter. Please give me the remedy.

Hope Valley, R. I. L. N. G.

If you cannot change the mixture to keep the motor from popping in the carbureter, you had better get a new carbureter. Popping comes from too weak a mixture, an inlet valve incorrectly timed, a choked jet or choked air ports. Look for these things, also for leak between the carbureter and the motor.

LIGHTWEIGHT QUESTIONS

PLEASE answer the following: 1. Is a two-stroke of 2¼ h.p. powerful enough to handle a medium weight sidecar in hilly country? 2. Could a tandem seat be used on such a machine without straining the frame? 3. What mileage should one obtain with such a machine on tires, gas and chain? 4. Would 20,000 miles be too much to expect of such a mount before it could be said to be in poor condition?

WILLIAM BAUCHELLE, Jr.
Newark, N. J.

1. Such a motorcycle would obviously be overloaded with a sidecar in hilly country. Do not try to use it to haul a sidecar in even level country. 2. We advise against the fitting of a tandem seat on a 2¼ h. p. lightweight. It will not do the frame any good in the long run. 3. At least 5,000 miles on tires, 65-70 miles per gallon of gasoline, 5,000 miles on chain. 4. The total mileage in such a case would be dependent upon the use the machine was put to. We think 20,000 is pretty liberal without an overhaul.

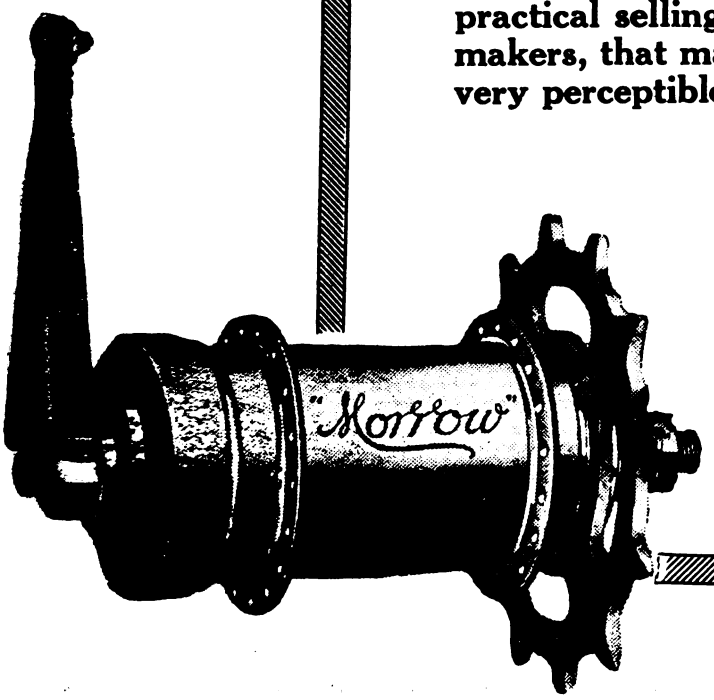
Swim *with* the Tide —Don't Buck It!

Why fight against the enormous, yet normal, demand for the MORROW—the pioneer coaster brake? Why substitute, when the original is so easy to obtain? The demand for the MORROW is the result of years of reliable braking service, it has built up for itself an army of "true-believers" who are satisfied with no other brake. Therefore, when a bicycle prospect asks for the wheel that is equipped with the

Morrow

give it to him. Don't try to sell him something else—he has already sold himself when he asked for the Morrow-equipped bike. Selling along lines of least resistance is the true secret of business success, and the man who appreciates the selling force embodied in the unexampled MORROW reputation, when he takes advantage of the really practical selling helps offered by the MORROW makers, that man will see his bicycle sales take a very perceptible jump.



IT'S EASIER TO SELL THE MORROW THAN TO COMPETE WITH IT.

Selling Motorcycles Under Difficulties

Ten Months Were Required for an Australian Agent to Sell a Motorcycle to a Prospect 3,000 Miles Away, but He Closed the Deal

By AUSTRALIAN

MANY American motorcycle dealers seem to think that their particular town or district is the slowest possible as regards selling conditions. The cause is easily located. Instead of going out and *making* sales come to them, they prefer to sit around their back office and tell about the rotten roads, the lack of enthusiasm, and at the same time wondering why customers do not come in and beg to be allowed to buy motorcycles.

For Mr. Perpetual Grouch, a little investigation of the conditions that prevail in Australia would undoubtedly prove a tonic. Roads such as are found in every part of the United States are not known over there, the Australian motorcyclist being satisfied if he finds several miles of sheep-paths during an afternoon's riding. To further show what difficulties the Australian dealers are up against, there is the account of a sale which was recently made by Mr. James Johnston, director of the Canada Cycle and Motor Agency, Indian agents for the State of Queensland, Australia. By mail he solicited an order from a certain person who lived 3,000 miles away from his store. It took a month for the letter to reach the prospect and another month for the return letter to reach the dealer. Several letters were required, but by the end of the tenth month, the order was received, with instructions to ship the machine to the buyer some 2,000 miles in another direction.

Ten months to complete the sale! 5,000 miles between sub-agent and prospect! Unusual conditions, you say. Maybe they would be for an American dealer, but not for an Australian dealer. The point of the story, however, is this: Whether Australian or American, the successful dealer must buck against the conditions as he finds them, and by continually overcoming the obstacles he begins to make sales in spite of everything. Up and at 'em is the motto over here!

BEACON TIRE INCORPORATION

NEW YORK, N. Y.—The Beacon Tire Company, capitalized at $100,000, has been incorporated to handle automobile and motorcycle tires, parts and accessories. The incorporators are K. G. Johnson, H. A. Demarest and E. A. Griffith. The company's headquarters are at 1625 Broadway.

INSTALLS VULCANIZERS

HENDERSON, Ky.—The Henderson Mfg. Co., has installed a complete vulcanizing plant and will handle all classes of tire work.

SPENCERS ARE ACTIVE IN SENECA FALLS

SENECA FALLS, N. Y.—Spencer Brothers, handling the Excelsior lines in this city, have opened a motorcycle and bicycle shop on Fall street, and are making sales of the Ultra-Power twins as fast as they can get delivery. The Excelsior bicycles are reported as going great.

There are a number of live riders hereabouts and the Spencers have been trying to start an F. A. M. club among them.

IN NEW HEADQUARTERS

PHILADELPHIA, Pa.—The Motorcycle Sales Co., formerly located at 617 Spruce street, moved to 122 Adams avenue, on August 1. Just prior to leaving the old location the company conducted a three days' sale of cycles and accessories.

PYRENE SALES MANAGER

T. F. FLANAGAN has been appointed sales manager for the Pyrene Mfg. Co., of New York. He was formerly assistant sales manager.

INDIANS IN PHILIPPINES

MANILA, P. I.—Indians in the Philippines maintain the same popularity as they do in the States. There are hundreds of privately owned machines in the islands, and the Government has quite a number in use. There are three Indians registered as belonging to the Bureau of Supply in Manila, one to the Bureau of Agriculture, and 40 to the Philippine Constabulary.

No. 3 MOTORCYCLE PEDAL

No. 3 STANDARD MOTORCYCLE PEDALS

Our products comprise:

Diamond "E" trade mark brand Spokes and Nipples for Bicycles, Motorcycles, Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals. Screw Machine Products.

When you buy a motorcycle, make sure that it is equipped with STANDARD PEDALS.

Most manufacturers have reasoned out that "STANDARD" EQUIPMENT means increased value on the machine.

STANDARD PEDALS are big, roomy, soft and minimize the shocks. Deeply corrugated to insure positive foot grip. Insist upon STANDARD EQUIPMENT.

Helpful Hints for the Exporter

BANKING OPPORTUNITIES IN SOUTH AMERICA

THE Bureau of Foreign and Domestic Commerce, Department of Commerce, publishes an account of "Banking Opportunities in South America," written by Dr. William H. Lough, the well known financial writer of New York, which ought to be in the hands of every manufacturer doing a foreign business and every exporter in the United States. It is another step toward the establishment of American banking facilities in South America, and is the result of Mr. Lough's six months' trip through South America.

British Banks Lead

British banks in South America, according to Mr. Lough's report, have taken the lead in financing the development of the principal countries. Of these there are five, with an aggregate capital and surplus of some $60,000,000, and total deposits and credits in account current of over a quarter of a billion dollars. They have in the main been quite successful, the largest and most important British institution having paid dividends of 20 per cent. annually for many years previous to the outbreak of the European War. This institution is the London and River Plate Bank, which was established in 1862, and has now a paid-up capital of $9,000,000, with some thirty branches, including subsidiary banks in Brazil, Chile, and Peru.

German banks are next in order of importance and are represented by four institutions. These have developed largely as a part of the German plan of assisting commercial expansion, although Mr. Lough says so far as South America is concerned there is no evidence to show that the German government has lent its active assistance to the upbuilding of these institutions. They have rather been the product of the German business organization by which each of several groups of industries centers around its own particular bank.

The only American institution on the ground, the National City Bank of New to permit any extended review of its activities or its success.

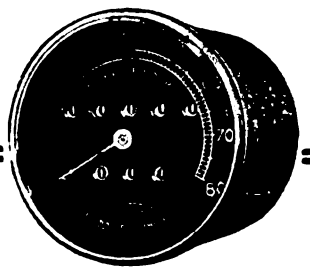
This report, Special Agents Series No: 106, "Banking Opportunities in South America," may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 20 cents.

VALUE OF TRADE-MARKS IN CHINESE BUSINESS

THE Chinese buyer lays great stress on the trade-mark or "chop" and once a certain "chop" has found favor with him he will give it special consideration. For this reason there is a great temptation on the part of others to imitate an established trade-mark for use in connection with the introduction of inferior goods, the result of which is the eventual disappearance from the market of the original articles.

Register the Marks

It is therefore extremely important that the American manufacturer seeking a market in China registers the trade-mark covering his product in Shanghai through the American Consulate General and also in Tokyo, through the American Embassy, the latter action being necessary to guard against imitations by Japanese manufacturers for sale by Japanese dealers in China. As a further precaution against imitation, the American manufacturer or dealer who contemplates entering the Chinese market should so embody the name of his firm or establishment in the Chinese trade-mark that the firm name and the product become inseparable. He should also always, without fail, embody the Chinese characters for "Made in America" in his trade-mark or "chop." One can not urge too strongly upon American manufacturers the universal use of the phrase "Made in America" translated into Chinese characters in connection with all products which they wish to place upon the Chinese market. A previous report from Commercial Attaché Arnold giving more details in regard to this subject is on file in Washington.



Within the Law

The roads are full of perils waiting to call the unsuspecting motorcyclist to court, which is a most inconvenient occurrence, because it breaks in so much on one's plans.

The man who speeds with premeditation knows the chance he is taking and is willing to run it gamely, but the man who speeds and doesn't know it not only loses that thrill which comes with the knowledge of breaking the law, but is also fined as much as if he did.

Keep within the law by equipping your motorcycle with a

CORBIN-BROWN SPEEDOMETER

"The Speedometer of Absolute Accuracy"

We say Corbin-Brown advisedly, because if you carry a speedometer equipment it is well to carry the best. In this matter accuracy is the first consideration, not approximate accuracy, but absolute unerring accuracy. And because of its special construction and numerous exclusive features the Corbin-Brown is qualified to give you this sort of a record as no other speedometer on the market is. In all seasons, under any condition, what the Corbin-Brown says can be believed. And remember, it is a durable, practical instrument, built for the roads. Investigate today. Catalog on request.

CYGNET REAR CAR

"On or Off in 30 Seconds"

Appeals to the Family Man

because with its roomy, comfortable design, the CYGNET supplies his want—gives him motoring for wife and kiddies at low motorcycle upkeep cost. He can ride it all day singly and at evening convert it into a 2- or 3-passenger auto.

THE CYGNET means **two profits** rather than one—and with only one sales effort. It opens the way to a new field of 2,000,000 prospects—**the family man.** Experience shows that 8 out of every 10 CYGNET sales means a motorcycle sale.

Be Prepared to cash in on our big magazine advertising. You can bank on increasing your motorcycle sales from 15% to 50%.

PARDON GOING AFTER THE TRADE OF FARMER'S BOY

OWENSBORO, Ky.—Henry F. Pardon, proprietor of the Indian motorcycle stores in this city and in Henderson, is making a strong play for business from the farmer boy. Pardon has used a unique method of appealing to the ruralites in calling attention to the farmers of the fact that their sons will be far better satisfied with farm life where they have a motorcycle and are able to come to town whenever they feel like it.

For several years the farmers have had a hard time to secure hands, and have been practically unable to keep their own sons on the farms.

Last year Pardon appealed to the grain and tobacco growers with advertisements offering to sell them machines at once, and to let them pay for them after the crops were harvested. A number took advantage of the offer.

DOINGS OF TRADESMEN IN SAN FRANCISCO

SAN FRANCISCO, Cal.—Manager Sayre, of the Appeal Manufacturing & Jobbing Co., at Los Angeles, is expected to visit this city shortly on business.

Dudley Perkins, of Maggini & Perkins, handling the Harley-Davidson, was injured trying out one of Art Smith's baby automobiles at the Tanforan track last Sunday. The car skidded on one of the turns, went through the fence and down the bank, leaving Perkins with a broken nose and torn face. Earl Roylance, one of the boys in the shop, was also injured when he went through the fence after being hit by an aeroplane on the track. Both Perkins and Roylance will be all right in a few days.

Edwin F. Merry, distributing the Excelsior, is making a protracted stay at Los Angeles. It is reported that he expects to close out his branch in that city before returning.

Tennant Lee, Henderson distributor, made a run from Los Angeles to this city, recently, bringing Roy Artley, the cross-country speedster, with him in a sidecar. Lee is now visiting dealers in the valley towns.

A 1250-MILE SIDECAR TOUR

WILMINGTON, Del.—C. B. Schnepfe, proprietor of the Delaware Cycle Co.'s shop, and Mrs. Schnepfe, have just returned from a two-weeks' tour in New England with their Harley-Davidson combination. The tourists covered 1,250 miles in all, their route leading through the White Mountains, Green Mountains, and other picturesque districts. Schnepfe reports that it was a no-trouble trip, not even a puncture being sustained.

BELT IS BACK HOME

COLUMBUS, Ohio.—O. C. Belt, head of the Belt Motor Company, central Ohio distributor for the Indian, has returned from a trip to the factory at Springfield. He reports a busy season at the factory with shipping going on actively.

TAKES FIRST ORDER FOR 1917 HENDERSON

PROVIDENCE, R. I., Aug. 15.—W. F. Halliday, handling the Henderson in this city, took his first order for a 1917 Henderson last week. Halliday says that there is nothing remarkable about selling a Henderson, but the fact that he can sell them before the model gets in is something out of the ordinary.

Halliday has also sold two new Hendersons to the Post Office department here, for special delivery work.

PIKES PEAK MACHINES DRAW CROWDS IN DENVER

DENVER, Colo., Aug. 14.—Crowds of interested spectators have been in the show rooms of the Excelsior motorcycle store at 1330 Broadway during the last two weeks. The attraction was the Excelsior machines ridden by Floyd Clymer, Greeley agent, Bob Perry and Glen Stokes.

The machines were put on the floor about a week before the event, and following Clymer's successes in the two pro. events, his machine was displayed alone in the agency. The result has been an excellent increase in the sales of Excelsiors in this city, with prospect of more to come.

HOSKINS TAKES THOR

RAY, Ariz.—Lloyd W. Hoskins has signed up for the Thor for this section. He placed an initial order for three machines and has already sold one of them. Hoskins was formerly Thor representative at Salt Lake City, Utah.

A handsome spark plug case and a spark plug wrench . . **Free**

With four spark plugs that will outlast your engine . . **$4**

Mail us a $4 check or money order for four Splitdorf Spark Plugs (the plug with the Green Hex Jacket). We will forward you the plugs, carriage prepaid, and with them we will send you, free, a highly polished spark plug case and a spark plug wrench, complete with detachable handle. The case is handsomely finished, and fitted with recesses for four plugs. Keeps your "extras" handy and compact. The wrench is one of the most convenient tools you can have.

These plugs are practically indestructible. Dozens of times they have run 20,000 to 30,000 miles without ever having been cleaned.

Made in all sizes and in types to suit every car, motor cycle, motor truck, motor boat, aeroplane, tractor and stationary gasoline engine.

When ordering, be sure to state size desired or name of engine.

GIVES SCHEDULE OF FINES FOR SPEEDERS

Toronto Magistrate Arranges $1 Per Mile Rate for Better Than Legal Limit—York County Abolishes Fee System

TORONTO, Ont.—Magistrate Brunton of the York County Police Court has given notice that he has arranged a schedule of fines to be imposed upon motorcyclists who break the speed limit. The legal pace in the open country is twenty miles per hour but the magistrate has announced that the county constables will not take action against riders who travel twenty-five miles per hour on clear stretches of road and with no vehicles in sight. Beyond twenty-five miles per hour, a rider, if caught, will pay at the rate of $1 per mile for every mile faster than the fixed limit.

"If you want to spend $10 in this court, you should travel thirty-five miles per hour, declared the judge in making the announcement. "If your limit is $5, then you can go thirty miles an hour. Our rate is one dollar a mile over twenty-five miles per hour."

The York County Council has also decided to abolish the fee system for road constables in connection with automobile and motorcycle speeding cases. In previous seasons the speed cops on country roads were becoming rich because they were permitted to take a percentage of court costs in motor cases. The result was that the county police were devoting all their time to the catching of road users in speed traps and the slightest offence meant a summons to court. Hundreds of cases were heard every week. The council, however, has appointed five road constables on a straight salary basis and the county police will devote their attention along other avenues.

There has been considerable "feeling" between local riders and the speed cops around Toronto, but the change in administration has brought great delight to the hearts of the motorcyclists. In former years the York County cops overstepped their rights in every possible manner and many complaints were made to Hon. I. B. Lucas, attorney-general for Ontario, who was responsible for the ordering of an official investigation in the matter.

Legislative conditions affecting the operation of motorcycles have become greatly ameliorated during the past six months and the riders are better able to enjoy their pastime.

TRIO PLAN DEER HUNT ON THEIR MOTORCYCLES

SAN FRANCISCO, Cal. — Homer Laudenclos, Henderson and Excelsior dealer in Pasadena, and Frank Orr, of Los Angeles, arrived here on Sunday. They are planning to leave for Mendocino County with Ed. Laudenclos of this city in a few days, to hunt deer. Homer and his brother ride Excelsiors, while Orr is mounted on a Thor.

MOTOR-COP ARRESTS SPEEDERS IN FUNERAL CORTEGE

BELLWOOD, Ill., Aug. 15.—What constitutes a record in the largest haul of speed demons ever made in one arrest goes to constable Henry Ernest, of this city. Ernest and his Harley-Davidson are stern guardians of the speed laws, and it takes a mighty excuse that will allow a transgressor to get away. So when a funeral procession of twenty automobiles came tearing through Bellwood on its way to the cemetery on the other side of town, Constable Ernest did not allow sentiment to play any part in his interpretation of the proper gait of a self-respecting hearse, even though it had six cylinders under its hood instead of being drawn by plume-bedecked horses, and he promptly mounted his motorcycle and swung into the procession. He waited until the last rites were concluded and then button-holed six of the men, one after the other.

GASOLINE A CENT CHEAPER

NEW YORK, N. Y.—Following the announcement made about ten days ago, that the price of gasoline in New Jersey had dropped one cent a gallon, comes the statement from the Standard Oil Company of New York that it has followed suit with a one cent drop, bringing the new price to twenty-three cents. This is the first drop made by the New York company this year. The company's retail price is now twenty-seven cents in wooden and twenty-five cents in steel barrels. Further declines in price are looked for.

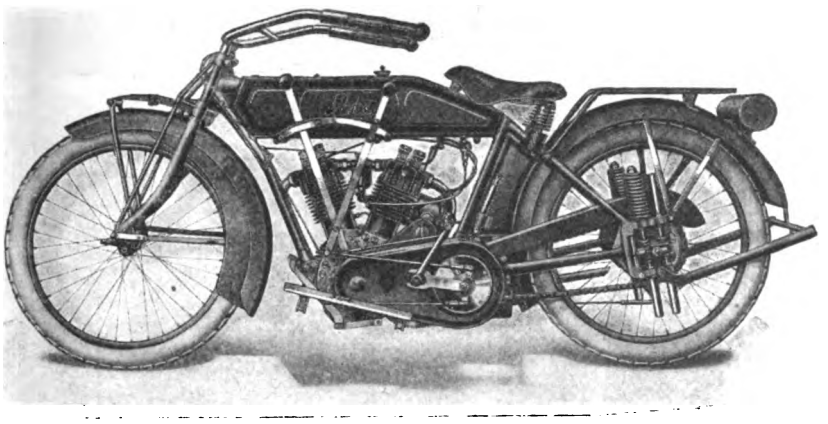
Pope Three Speed Twin



Model T-16

Price $275.00

"Not only gets you there, but gets you back"

THIS is a favorite expression among Pope riders.

It shows their appreciation of the sterling quality, the sturdiness and the scientific construction of the Pope Motorcycle.

And its truth is borne out by facts. Notice for yourself next time you are out with the bunch.

Which machine is it that balks at the big hill? Never a Pope.

Which machine is it that goes down before the pounding of rough trails? Not a Pope, that's sure.

Then watch the roadside for stranded machines. You'll seldom see a Pope among them.

The name Pope means dependability.

Of all the dependable Pope models there is one that gives the utmost in comfort, convenience and luxury. It is the "Paramount Pope,"—Model T-16.

"T-16 Is There With the Jump"

Hartford, Conn.

"My Model T-16 has the quietest and smoothest running motor I have yet seen, and the three-speed transmission works fine."

C. T. Lavelle.

"Runs Like a Top"

Mansfield, Ohio.

"Received my T-16 the other morning and could hardly keep the fellows away long enough to knock off the crate. It is all that we have expected of it. Runs like a top and has power to burn."

Armstrong & Scheska.

"'Well Worth Waiting for' Hit the Mark."

Farmington, Ill.

"When in your ad, in the trade journals announcing the early shipment of T-16, you stated 'Well Worth Waiting For,' you certainly hit the mark, as the T-16 is without a doubt the finest piece of machinery ever put on two wheels. The Motor, three speeds, kick-starter and muffler work like a charm—and talk about power—it certainly has the kick. The boys are very enthusiastic. and all second me in saying 'Well Worth Waiting For.'"

John Balagna.

STREAKS

One Tire Suits All

THE Goodyear Blue Streak bike tire knows no class distinctions, in spite of its lower price.

Whether on the highest priced bicycle or on the lowest priced, Goodyear Blue Streaks make the bicycle better.

You are selling the best tire value on the market, when you sell Blue Streaks, because Goodyear concentrates all of its long tire-building experience and its exceptional tire-building facilities on this one single tube bicycle tire.

That is why Goodyear is able to advertise Blue Streaks, Non-Skid, at $2.50 each retail.

And that is why Goodyear Blue Streaks carry the same guarantee as the highest priced tires.

So when a customer buys a high priced bicycle, you can assure him that the Goodyear Blue Streak tires are the best that can be had at any price.

You do not have to carry a large stock of assorted tires of different brands, quality and prices.

Goodyear Blue Streaks satisfy everyone—in price, in quality, in guarantee.

BLUE STREAKS

For Border Duty

Over 50 per cent of the motorcycles patroling the Mexican border are equipped with Goodyear Blue Streaks.

Such a preference shown Goodyears by the United States Government is based entirely upon the remarkable performance record of these tires.

Tires less sturdy, less dependable than Goodyear Blue Streaks, would be far too risky for such dangerous service.

With the National Government's endorsement of Goodyear Blue Streaks, you are amply justified in recommending Blue Streaks to your customers for any service—commercial or pleasure.

And no tire with a reputation less positive than this can bring you as many sales or as many permanent satisfied customers as will Goodyear Blue Streaks.

NOTICE: ADDRESS ALL CORRESPONDENCE TO THE READING STANDARD COMPANY AND NOT TO INDIVIDUALS.
Dictated by GRA/JHU. READING, PA., U.S.A. 7/17/16.

United States Tire Company,
Broadway at 58th St.,
New York City.

Attention M.C. Stokes, Manager,
Bicycle and Motorcycle Tire Dept.

Gentlemen:-

You possibly already know that we recently received an order from the Machine Gun Company, 71st Regiment of the New York National Guard, for 65 twin cylinder three-speed models and 8 Light Delivery Vans. This is, undoubtedly, the largest single order ever handed to any motorcycle concern for military use in this country. The order has already been completed, and we understand that the machines are on their way to the border.

We naturally were desirous of furnishing the very best, and we believe it will be interesting for you to know that we equipped these motorcycles and Delivery Vans with U.S. CHAIN TREAD TIRES. We have tested out these tires to our entire satisfaction and, knowing that these motorcycles and Delivery Vans will be subjected to hard usage where the tire equipment is a most important factor, we advised the officials to specify the CHAIN TREAD, which we knew would give them the service they expect.

Yours very truly,

READING STANDARD COMPANY.

G E Atkins

Sales Manager.

If you want tires that will stand up, that will give real ungrudging service, Mr. Atkins' advice is very much worth following.

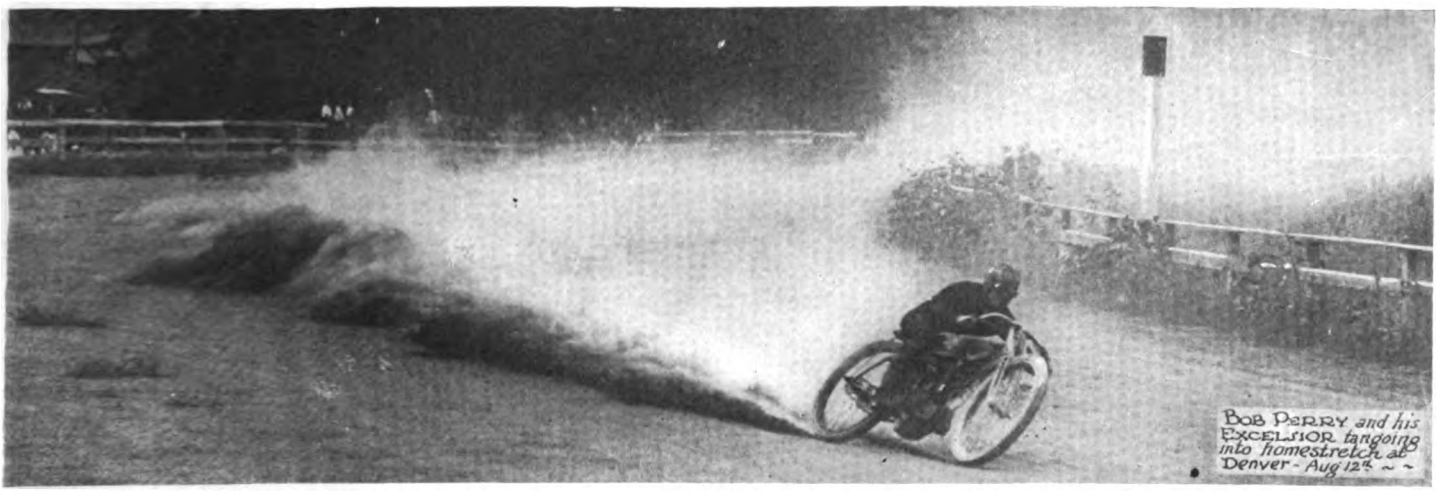
VOL. 12 NUMBER 8

MOTOR CYCLE ILLUSTRATED

New York - August 24, 1916



PRESIDENT FALOR FIRES OPENING GUN IN F. A. M. REJUVENATION MOVEMENT

New Head of National Organization Calls Subordinates to Akron to Thresh Out Situation—Salaried Officials to Be Eliminated as Far as Possible—Factory Travelers to Be Boosters—New Literature Is Planned—Big Meet for Columbus, August 2 and 3

AKRON, O., Aug. 22.—Shelby A. Falor, the newly-elected F. A. M. president, and his progressive administration got at least a toe hold on the stupendous task of lifting the national motorcycle riders' organization back on its feet at the two-day meeting of the F. A. M. directors and other interested boosters, called by President Falor here yesterday and today. For the most part the real work incidental to the meeting was done at the Portage Country Club, where the F. A. M. situation in its entirety was threshed out over the luncheon table by the following folk:

President Shelby A. Falor, Director Jos. Campbell, Director O. P. T. Daenitz, Director B. A. Swenson, Assistant Sales Manager McNaughton, of the Indian factory; T. J. Sullivan, *Motorcycling*; W. Jack Cameron, T. R. Thomas and E. R. Stillwell, of the Goodyear forces, and E. F. Hallock, of **Motor Cycle Illustrated.**

Mr. Falor displayed a keen desire to start anew, right at the beginning of things, and work up from that point. Those present came through with a flood of constructive suggestions and after frank discussion here is what remained as an indication of where the start toward the rejuvenation of the F. A. M. will be made:

Salaried officials will be eliminated insofar as is possible, it being thought practicable to get along, at least for the time being, with only one paid official. A monthly placard bringing home to prospective members the achievements of the national body, in the way of legal action work, will be gotten out and sent to all motorcycle dealers for display on bulletin boards, as a means of recruiting new members.

Motorcycle factories will be urged to coach travelers to talk up the F. A. M. to dealers, who in turn will be urged to sell F. A. M. memberships along with new machines.

Shelby A. Falor, F. A. M. Chief, Who Called His Lieutenants to Akron

A new set of literature, outlining concretely just what riders obtain through F. A. M. membership will be distributed immediately by placing it in the tool boxes of new machines, as well as in other ways.

Some sort of F. A. M. emblem, of neat design, to be attached to machines, will be gotten out and distributed among members. It is thought that not only will this be appreciated by riders, but that it will arouse a certain degree of curiosity among non-members and result in many hearing of the organization who otherwise might remain in the dark.

So much for things to be done toward starting the ball rolling.

Now for ways and means of obtaining the start: It all hinges on a mammoth two-day racemeet which the F. A. M. is promoting on the Columus Driving Park track, in that Ohio city, on Saturday and Sunday, August 2

Digitized by Google

and 3. The program for that meet is being developed along lines that will bring thousands to the track who have never before turned out to see a motorcycle racemeet, and it is confidently expected that the gate receipts will net more than enough to wipe out the present F. A. M. indebtedness and clear the way for an auspicious opening of the boosting campaign.

Columbus the Scene

Columbus then, which in 1912 was the scene of the best convention the F. A. M. ever had, will be the setting for the real start of the "come-back" movement. The single mile driving park track has been obtained on very favorable terms, and is in first class shape to do full justice to the F. A. M. national championship events, of which there are eight carded—six amateur and two professional.

A Military Flavor

The meet will be given a military flavor by enlisting the aid of some 15,000 national guardsmen now quartered at Camp Willis near Columbus; and it is planned to make Colonel Zimmerman, in command of this detachment, one of the race officials and to distribute other track berths among officers in command. As a side issue—undoubtedly one which will prove a big drawing card among those not heretofore interested in motorcycles—a military motorcycle demonstration will be indulged in by the soldier boys, giving the crowd an idea of the work being done by the motorcycle on the modern battlefield.

These features, coupled with a well-organized and well-planned advertising campaign, will, it is expected, result in the turning out of the Columbus "Elite," and to this end a dozen of Falor's most able assistants will be in Columbus before the end of the present week, bending every effort to bring the races to the attention of and enlist the cooperation of the kind of people most desired.

Many Events Slated

The racing card is one that should prove interesting to fans from far and wide, and incidentally one that should result in an unprecedented list of entries. On the first day, Saturday, one-, ten- and fifty-mile national amateur championship contests will be run off, the results bearing on the award of the Bosch trophy. Aside from the Bosch trophy, however, merchandise prizes to the value of seventy-five dollars will be hung up for each of the three events.

For professional talent, the first day's card includes a one-mile F. A. M. championship, carrying a medal award and $25 to the winner, fifteen dollars for second and ten dollars for third. There are also a five- and ten-mile open "pro" events, carrying cash awards of seventy-five dollars for first, thirty-five dollars for second and fifteen dollars for third.

Card for Sunday

Sunday's card includes two-, five- and twenty-five-mile amateur championship events which will decide the awarding of Bosch trophy. For each of these events seventy-five dollars' worth of merchandise prizes is offered.

The Big Races

The twenty-five-mile professional national championship contest undoubtedly will be piece de resistance of the card, carrying, as it does, cash prizes as follows: Seventy-five dollars for first, fifty dollars for second, twenty-five dollars for third, fifteen dollars for fourth and ten dollars for fifth. The five-mile open, with four cash prizes, from seventy-five dollars down to ten dollars, and the two-mile open, with four from fifty dollars down to five dollars, will ring the curtain down on the affair.

That every factory team in the country will be there goes without

saying, and it is also certain that practically every free lance professional, within several hundred miles of Columbus, will be on the entry list, while there is no end of amateur talent to compete in the national championship events. The racing promises to be in every way the best of the season. R. S. McConnell, who perhaps knows more about motorcycle competition than any man in the country, excepting only worthy John Donovan and Dr. Thornley, will act as referee.

Admission Charges

General admission will be priced at fifty cents, with grandstand seats at one dollar and boxes at ten dollars. Several of the boxes, by the way, have already been taken by the tire concerns, who will decorate them up in style; and it is expected that other trade folks will follow suit. The trade is expected to lend its fullest support to this grand effort to again place the F. A. M. on a sure footing, and to this end two hundred "F. A. M. booster" badges will be sold to as many trade men at ten dollars each, the badges entitling the wearers to the free run of the track and general recognition as an all-around good sport and motorcycle booster. These badges will be sold out early, so it behooves the trade folk to make application for them at the earliest possible moment. This and other details of the affair are being ably handled by E. R. Thomas, of the Goodyear factory. Applications for badges, entry blanks or reservation should be made either to E. R. Thomas or to President Falor.

To facilitate the running of the meet, President Falor intends to appoint a committee of three well-known trademen to look out for the funds and take care of disbursements.

RIDER HELPS TO RECOVER STOLEN AUTO

NEWARK, N. J., Aug. 23.—William F. Bradbury, a member of the New Jersey M. C., has just returned from his vacation, which he spent at Asbury Park, with a thrilling tale of how he foiled the attempted theft of an auto.

It seems that while Bradbury was standing at the curb with his Indian sidecar outfit, one morning, an excited individual rushed up with the information his auto was stolen and that it was still in sight a couple of blocks down the street.

Bradbury hopped on his saddle and was under way, while E. M. Frost, the "petrol wagon" owner, sat in the sidecar. Rapidly overhauling the speeding machine. Frost confirmed his belief by the license tag and as soon as the sidecar drew alongside commanded the occupants to stop. The two thieves did so, but escaped into the crowd of excursionists who were at the time leaving the station.

HELP IN FIGHT AGAINST INFANTILE PARALYSIS

NEWARK, N. J., Aug. 23.—The New Jersey Motorcycle Club has offered its members' services to the Citizens' Committee that has been organized to combat the growth of the epidemic of infantile paralysis that has swept over the city.

The local clubsters feel that they can be of service Saturday afternoons and Sundays in placarding the infected homes, also in posting notices issued by the Board of Health advising parents of simple ways to safeguard their children from the scourge.

The motorcyclists' offer was promptly accepted.

MADE SANDALS FROM GOODYEARS

The latest field for Goodyear tires has just been opened in Mexico by a peon who cut a casing from a war-damaged automobile and converted sections of the tire into sandals. He says they are a vast improvement over his former footgear, and long marches over some of the roughest trails have failed to wear them out. Ordinary sandals can be bought in Mexico for twelve pesos, but the owner of the Goodyear foot-coverings has refused to sell them for twenty pesos. He sleeps in them at night to avoid having them stolen. One of the rubber sandals bears the internationally-known Goodyear trademark, the Wingfoot, and this helps to make the owner still prouder of his sandals, although he does not appreciate the significance of the mark.

ACCIDENT CALLS OFF FEATURE AT BELMONT

William Brier Meets with Fatal Injury at Start of 100-Mile Grind and Event Is Abandoned—Don Johns, Astride Indian, Wins 15 Mile Race and Sets New Record

NARBERTH, Pa., Aug. 21.—What would otherwise have been a most successful meet at the Belmont track on Saturday was marred by an accident to William Brier, Harley-Davidson rider, of Milwaukee, Wis., at the start of the 100-mile feature event. Brier, going at high speed, ran into the fence on the first lap and sustained a fractured skull and severe lacerations. Brier was removed to the Bryn Mawr hospital and died later as a result of his injuries.

Three Five-Mile Matches

The feature event was then called off and the three five-mile pro. matches were substituted. The first match, between "Red Parkhurst," Harley-Davidson, and Bob Perry, Indian, resulted in a victory for Parkhurst in 4:36. The second match, between Joe Walker, Indian, and Don Johns, Indian, saw Walker the winner, his time being 4:40. The third match, between Joe Wolters, Excelsior and Herbert Banks, Indian, went to Wolter. Time, 4:28.

Preceding the disastrous start of the 100-mile feature, the big crowd was treated to a thriller in the form of a 15-mile pro. event, in which Don Johns was victor, his time being 13:33⅕. Parkhurst was a close second in this event, but was never able to head off the Indian man. Johns shone again when he shattered the former mile record for the track, covering the distance in 47⅗ seconds. This is two-fifths of a second better than the figures set by Harry Klebes, made two years ago and up to the present unsurpassed.

The 15-mile amateur had the speed fans shouting with excitement. Richard Jockers, Harley-Davidson, went into the lead and held it lap after lap, but Harlan Rose, Indian, was not to be denied and finally spurted ahead of Jockers, finishing in the lead. Time, 15:16.

Bill Brier

The summaries:

Five-mile novice—Won by D. H. Farrell, Philadelphia (Harley-Davidson); second, William A. Guhl, Philadelphia (Indian); third, Victor E. Sjasturn, Philadelphia. Time, 5:17.

Five-mile amateur—Won by Richard Jockers, Jenkintown (Harley-Davidson); second, D. H. Farrell, Philadelphia (Harley-Davidson); third, Harlan Rose, Wilmington (Indian). Time, 4:52.

Fifteen-mile professional—Won by Don Johns, Los Angeles (Indian); second, "Red" Parkhurst, Milwaukee (Harley-Davidson); third, Jack W. Mullin, Wilmington (Indian). Time, 13:33⅕.

Fifteen-mile amateur—Won by Harlan Rose, Wilmington (Indian); second, D. H. Farrell, Philadelphia (Harley-Davidson); third, Richard Jockers, Jenkintown (Harley-Davidson). Time, 15:16.

Five-mile amateur sidecar—Won by William Appleton, Wilmington (Harley-Davidson); second, John Seefert, Philadelphia (Harley-Davidson); third, Albert Linker, Philadelphia (Indian). Time, 6:10⅖.

First five-mile professional match race—Won by "Red" Parkhurst, Milwaukee (Harley-Davidson); second, Robert Perry, Chicago (Indian). Time, 4:36.

Second five-mile professional match race—Won by Joe Walker (Indian); second, Don Johns (Indian). Time, 4:40.

Third five-mile professional match race—Won by Joe Wolters, Chicago (Excelsior); second, "Herb" Banks, Paulsboro (Indian). Time, 4:40

BRIER'S BODY IS TAKEN TO MILWAUKEE

IN answer to a request for a confirmation of William Brier's accident at the Belmont track, Narberth, Pa., on August 19, and his subsequent death, Alexander Klein, Harley-Davidson representative in Philadelphia, telegraphed:

"Brier ran into the fence on the first lap because of inability to see in the extreme dust. He died at 12:00 p. m. on Sunday. Leslie Parkhurst accompanied the body home on Monday."

GOVE TAKES MAJOR EVENTS AT FALL RIVER

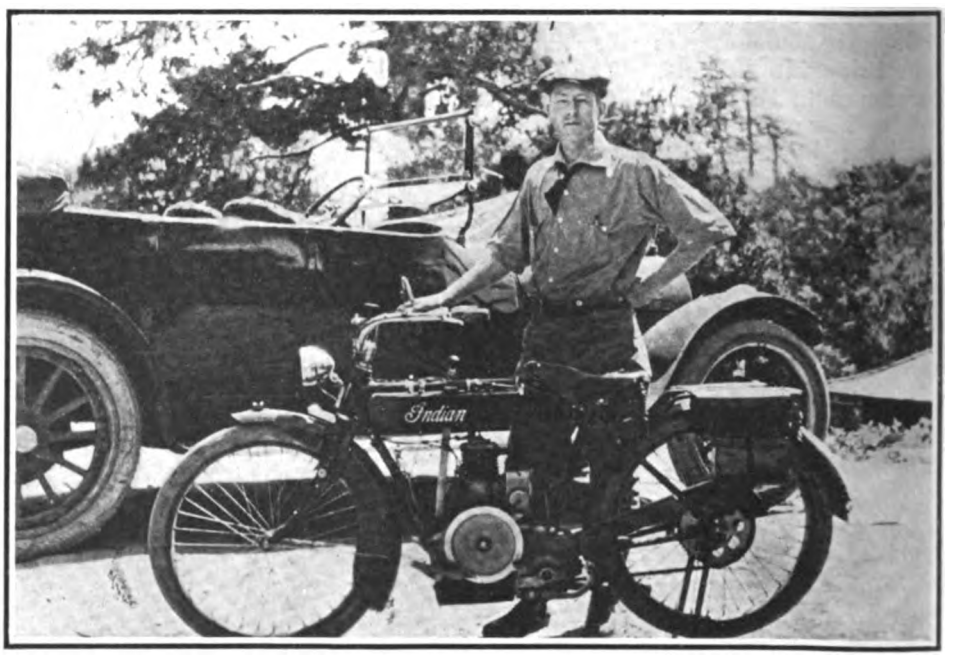
FALL RIVER, Mass., Aug. 21.—Earl Gove, the Brockton Indian rider, captured the five-mile open and the 10-mile pro. in the meet held here yesterday. His time for the five miles was 7:12¼, while for the 10-mile it was 15:04. H. E. Henrickson, Providence, with an Indian outfit, won the five-mile sidecar race in 8:15¾. The track was very rough and the turns narrow.

There were close finishes in the solo events. Gove won the five-mile only a length ahead of Frank Duckworth, New Bedford, on an Excelsior. A. Houle, of Fall River, on an Indian, was third. Duckworth took second place in the ten-mile also. Gove proved inferior with a sidecar rig in the three-wheeler event, coming second to Henrickson. Houle was third. The sidecar race was very fast considering track conditions.

DAMAGED TRACK MAY STOP MACON RACES

MACON, Ga.—Motorcycle races at Central City Park, which were slated for September 4, will probably be called off, owing to the condition of the track. The recent overflow of the Ocmulgee river resulted in two bad washout holes in the track, and it is extremely doubtful if these can be filled in time. The races were to have been part of a general entertainment program for Labor Day.

INDIAN IS FIRST LIGHTWEIGHT UP MT. WILSON



IN the photograph above is shown S. S. Bayley, of Pasadena, Cal., with the Indian Featherweight on which he made the ascent of Mount Wilson a short time ago. This ascent was the first ever made by a lightweight machine, and Bayley and his mount have been the center of admiring crowds as a result.

The roadway up the mountain winds for a total of nine miles and there are several difficult stretches with heavy grades to negotiate. The Featherweight made light of these conditions and the round trip was made without trouble of any kind.

On page 18 will be found another account of a climb up Mt. Wilson.

CREVISTON STARS AT ROCKFORD TWO-DAY

Indian Speedster Takes Three in First Day and Long Race on Second—Stokes, Excelsior, Wins Three Events in Saturday's Meet—Over a Thousand Attend

ROCKFORD, Ill., August 21.—Ray Creviston, on his Indian, captured the 200-mile race of the Rockford M. C. yesterday in 91:44. Ray Weishaar, Harley-Davidson, was second, and Glen Stokes, Excelsior, third. Irving Janke, Harley-Davidson, came fourth.

Eight starters lined up for the gun in this race. Morty Graves took a spill in the second lap, but after getting a pedal from the pits, mounted and went off again hotfoot. Creviston led at the 25-mile mark, with Weishaar second and Janke third. The fastest lap during the first quarter was 51 1/5 seconds, made by Creviston.

"Crevvy" held his lead up to 70 miles and then made a stop at the pits, for refilling. Weishaar and Stokes went into the lead on this, but Creviston passed them in a few laps after coming on again and won by 200 yards. The other events slated for this day—the second of the meet—were called off on account of lateness.

On Saturday, August 19, the opening day of the meet, Creviston won the ten-mile pro. in 8:57⅘, with Morty Graves, Indian, second, and M. Korn, Indian, third. Curly Fredericks, Harley-Davidson, was fourth. Janke, Weishaar, Stokes and Luther retired before the finish of this event. Creviston set a new record of 49⅘ during this race. The 15-mile event which followed brought out all the pros., but one lap saw Creviston and Walker out. Graves took the lead and held it to the finish, his time being 13:20 1/5. Stokes was second and Korn third, with Janke in fourth position.

In the one-mile time trials, Creviston made the circuit in 50 1/5. Otto Walker and Weishaar on Harley-Davidsons tied for second place with 52 seconds. In the 25-mile pro. event, Stokes, Excelsior, won in 22:37 1/5. Creviston retired on the fifteenth lap, and Weishaar, who looked a possible winner, had trouble at 24 miles. Second place was obtained by Korn, with Weishaar third and Walker fourth.

A one-mile bicycle race was held as part of the program. This was won by Bick in 2:47, with Cave second and Sears third. Over 1,000 saw the races on both days.

PLAN DRAWN UP FOR SAN ANGELO MEET

SAN ANGELO, Tex., Aug. 21.—Preparations are being made here for the motorcycle races that are to be run during the San Angelo Fair, Carnival and Race Meet, from Oct. 31 to Nov. 4, inclusive. H. C. Ragsdale, general chairman of the motorcycle racing committee, reports that many entries are being received from all parts of Texas and that a number of race riders from other states are planning to attend the meet here. Ten races and a time trial have been arranged, for which cash prizes amounting to $1,000 have been offered in purses, divided 60-30-10.

Two classes of races are to be run, Class A, free for all, and Class B, for Texas boys only. Factory riders are barred and ported machines are barred except in the time trial. The program as announced is as follows:

Tuesday, Oct. 31.—Class B, five miles, $50; Class B, ten miles, $75.

Wednesday, Nov. 1.—Class B, five miles, $50; Class B, ten miles, $100.

Thursday, Nov. 2.—Class B, five miles, $50; Class A, fifteen miles, $150.

Friday, Nov. 3.—Class B, five miles, $50; Class A, twenty-five miles, $250.

Saturday, Nov. 4.—Class A, five miles, $50; time trial for mile track record, $25; Class A, fifteen miles, $150.

10-MILE RACE FEATURES WOODMEN PICNIC

GREELEY, Colo., Aug. 19.—One of the main attractions at the W. O. W. picnic held at Island Grove Park last Monday afternoon, and at which were present 4,000 Woodmen from northern Colorado, was a 10-mile motorcycle race.

After the fifth lap, Chris Johnson, a Greeley Harley-Davidsonite, kept an easy lead, but he misunderstood the judges' signal and stopped after riding 9½ miles. Since he had been out in front and could have won the race easily had he gone another lap it was thought only right by the judges that Johnson should have a share.

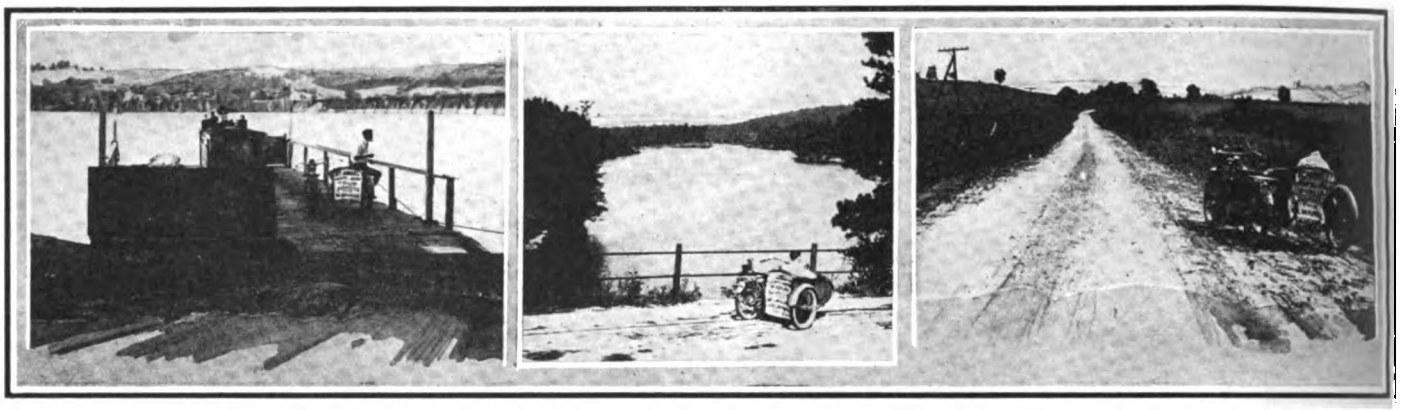
BLAZE TRAIL FOR ANNUAL GOODFELLOWSHIP TOUR

More Miles Have Been Added to Milwaukee's Classic This Year; Pathfinders Choose Scenic Route Over Good Stretches of Road; Medals Offered by Local Newspapers



Left, Ferry Over Rock River; Center, Baraboo Falls; Right, a Sample Stretch of Road on the Course

MILWAUKEE, Wis., Aug. 22.—Pathfinders for the fourth annual Goodfellowship Tour of the Milwaukee motorcyclists, held under the auspices of the Milwaukee *Journal*, have completed their work of laying out a route to the Dells, which is the objective point this year. The tour for 1916 will take three days and will be held Saturday, Sunday and Monday, Labor day, September 2, 3, and 4.

Route Well Chosen

Hugh Sharp, secretary of the Milwaukee club, and his brother Jim, with a Harley-Davidson and a sidecar, blazed the trail of what they think will be the best tour the Milwaukeeans have ever taken, from the scenic and good roads standpoint. More mileage will be covered each day on this tour, but the additional distance is more than compensated by the many long stretches of macadam and concrete that will be traveled over.

For the first day, Madison has been selected as the noon control, a run of 82 miles through Delafield, Concord, Johnson's Creek and Lake Mills. Plenty of time will be allowed at Madison to view the new State capitol building just completed. The afternoon's run of 40 miles to Baraboo, the town famed for the Ringling Brothers' winter quarters, will be made through Cross Plains, Black Earth, Sauk City and Prairie du Sac.

Ferry Over Rock River

Baraboo will be the night control twice and the run up to Kilbourn, the home of the Dells, will be made Sunday morning. Kilbourn is 14 miles of very excellent macadam from Baraboo and the jaunt can be made in 45 minutes of easy riding, stopping at Mirror Lake enroute. The return to Baraboo will be made in the late afternoon. The third day's homeward voyage will be through Merrimac, where the tourists will be ferried across the wide Rock River on a power ferry, and then go through Lodi to Madison for dinner. Milwaukee will be reached over practically the same route as going.

The Milwaukee tour will have a feature this year in making of special arrangements for motor wheels and lightweights. Lacy Crolius has donated a cup to be awarded to the neatest rider on the tour from start to finish, and the Mueller Cycle & Supply Company, through its manager, Louis Peterik, has donated a silver trophy for the awarding of which the tour committee is now working out plans.

The annual Goodfellowship tours have been promoted by the *Journal* since 1913 and they have had a wonderful influence in stimulating the sale of motorcycles and accessories. Especially in the last two tours, an effort has been made to uplift the standard of motorcycling throughout the state by making the Milwaukee tour the most orderly motorcycle assemblage ever pulled off.

Against Open Muffler

The rules of the tour are strict with regard to open mufflers in towns and last year there was considerable argument as to whether mufflers should be allowed open at any stage of the run. However, as Wisconsin is not blessed with long stretches of first-class highway, the use of the open muffler is permitted within carefully considered limits.

Each year the *Journal* gives every rider who finishes a sterling silver medal for his first tour and a silver bar to hang under the medal in successive tours. This year the *Journal* will give all those riders who have participated in four tours with the completion of this one, a special medal to be designated as a veteran's trophy.

The run is purely a sociability affair. Speed is tabooed absolutely and the limit is set at 25 miles an hour. In 1913 there were more than 200 entries and over half were sidecars containing lady passengers. The whole family goes on the *Journal* tour in Milwaukee, even the year-old youngsters.

HARLEY-DAVIDSONS FOR COPS

ELIZABETH, N. J., Aug. 23.—In accordance with the suggestion of Mayor Mravlag, the Police Commissioners yesterday purchased two Harley-Davidson motorcycles for use on the main highways in and out of town.

HARLEY-DAVIDSON OFFICE FORCE AT OUTING

Good Things to Eat and Barrels of Fun Feature Annual Joyfest; Bag Races Cause No Little Excitement; Traveling Men Present

MILWAUKEE, Wis., Aug. 22.—Employes of the office force of the Harley-Davidson Motor Company, together with the officers of the company, enjoyed their second annual outing at Army Lake last Saturday. The committee in charge of arrangements for the affair comprised Misses Crystal Haydel, Martha Wehr, Evelyn Gleason, Kathryn Ryan and Messrs. Hiram and Allen Hascall, George and Adam Dorsch, Hugh Sharp, Otto Grigg, E. J. Mueller and E. B. Elsner, chairman.

After the swimming contests and baseball game in the morning a program of novelty games was staged to allow competition for the fat men, the stout ladies, the aged and infirm and the kiddies. Harry Osborne led the orchestra that furnished music for dancing.

Bag Race Exciting

Probably the most exciting contest of the whole day was the bag race for women. It wasn't on the program, but they demanded it. Mabel Waskow, the veteran telephone operator, did so well that the gallery demanded a race between the best lady and man in the bag race finishes.

Mabel had a lead of about nineteen meters when something went wrong inside the bag and she ruined a perfectly good silk waist trying to hang onto the bag and at the same time keep intact her dignity.

The men claimed the ladies had an advantage in the bag race, because they could kick off their pumps and run in their stocking feet, the stocking feet giving them chance to get a good toe hold on the corners of the bag. Arthur Davidson opined that "they wear skirts as big as golf bags these days, anyway, so why shouldn't they be perfectly at home in the bag race."

Eats Were Plenty

Soda, ice cream and crackerjack, provided in enormous quantities by the committee, disappeared in a hurry.

William Davidson created a sensation when he hauled a monster live lobster out of the depths of the bathing beach. It was his good fortune to see the lobster before it saw him.

The picnic, really coming at the end of the two weeks' sales' convention, gave the traveling men an opportunity to meet the Harley-Davidson office family.

SWENSON GOES TO AKRON ON F. A. M. AFFAIRS

PROVIDENCE, R. I., Aug. 21.—B. A. Swenson left yesterday for Akron to attend a meeting there held for the purpose of discussing ways and means to increase the membership in the Federation of American Motorcyclists. He went at the invitation of President Shelby A. Falor, from whom he received a letter last week. He will be gone several days.

NEW EXPORT HOUSE

NEW YORK, Aug. 14.—A new export commission firm, Kemsley, Milbourne & Co., has been established in this city, with temporary headquarters at 90 Wall street. The firm will take over the entire Australian business of Thomsen & Co. under the management of Adam Sulina. Motorcycles and parts of American manufacture are desired by the firm.

LE ROY IN PATERSON

PATERSON, N. J.—Alfred Le Roy, the legless and one-armed transcontinentalist, is the guest of Elmer Havenstrite, Harley-Davidson man in this city. Le Roy rode his special Harley-Davidson rig across the continent from Los Angeles, arriving here a few days ago. He attended the meeting of the Paterson M. C. last night, and gave an account of his experiences on the trip.

MOTORCYCLES FOR PROVOST GUARD IN EL PASO

EL PASO, Tex.—Brigadier General J. Franklin Bell, commanding the El Paso border district, has ordered that several of the provost guard on duty in El Paso be mounted on motorcycles. These men will be kept on duty at the police station and will be available for hurry-up calls to any part of the city. The general declares he finds motorcycles indispensable in directing the border affairs. Despatch riding and escort service heretofore have been the "main" duties of motorcycle men.

CHICAGO INDIAN ENDURANCE TO BE BIG EVENT

Two-Day Run to Cedar Rapids Has Substantial Trade Backing and Will Draw Cream of Factory and Expert Riders—To Make It an Annual Affair

CHICAGO, Ill., Aug. 21.—What promises to be one of the leading endurance runs of the season, and certainly one of major importance in this territory for 1916, is the F. A. M. endurance contest of the Chicago Indian M. C., which is slated for September 3 and 4. The course will be via the Lincoln Highway from this city through Sterling to Cedar Rapids, Iowa, a distance of 236 miles. The scheduled speed will be 25 miles per hour.

All the motorcycle factories have been asked to enter teams for the run and a number have consented to do so. During the course of the run the Illinois National Road Championship will be contested for. It is needless to say that the run is sanctioned by the F. A. M.

The run will be a two-day affair. There will be a noonday control at Sterling, Ill., and a control at Clinton, Iowa. Those who are familiar with the roads feel sure that a huge majority of the entrants will be in at the finish.

In addition to the Chicago Indian M. C. the contest has the backing of the Chicago Co-operative Dealers' Association. Manager Jesse Edwards, of the Chicago branch of the Hendee Manufacturing Company, is a strong booster for the affair also. The organization holding the run feels that an affair of this sort, conducted along genuine endurance lines, is far more beneficial to the sport and trade than professional track racing. In fact, the opinion in many quarters is that the public has been more or less sated with racing and will take a greater interest in road contests.

The Chicago Indian M. C., while bearing the name Indian, is open to riders of all makes of machines. The club is one of the best of Chicago's motorcycle bodies, being composed of the chief boosters and the most enthusiastic riders of the city. The members have made the club a financial success and have kept up a greater interest in club work than has any other motorcycle organization in this part of the country, it is claimed.

Those who desire to enter the run should address the club at 1150 Jackson boulevard, Chicago. It is proposed to make this run an annual event.

FINAL SCORES ON SEATTLE RUN ARE BADLY BATTERED

SEATTLE, Wash.—Final official returns on the endurance run of the Seattle M. C. show that the scores of those who finished the 604-Mile grind were as follows: Fred Mercer, Indian, 962; Harry Taintor, Harley-Davidson, 911; Eustace, Indian, 247; Jack Meagher, Thor, 100. It is admitted by all concerned that the run was one of the most severe ever held in this country.

Armstrong, the Excelsior rider, got off the course and traveled a total of 784 miles before finally reaching Seattle again. His score naturally was shot to pieces, but he was given credit for having made one of the most remarkable rides on record for the Northwest, and it is likely that he will share in the awards.

THREE-DAY AMATEUR MEET FOR HELENA, MONT.

HELENA, Mont.—A three-day amateur motorcycle race program has been put on the cards for September 25, 27 and 29, during the State Fair in this city. The first day's events will be a ten and a five mile race, with a similar program for the second day. The purses for the two days will total $290. On September 29, the five fastest riders in the previous days' racing will compete, the winner to receive $100 in prizes, the second $75 and the third $50.

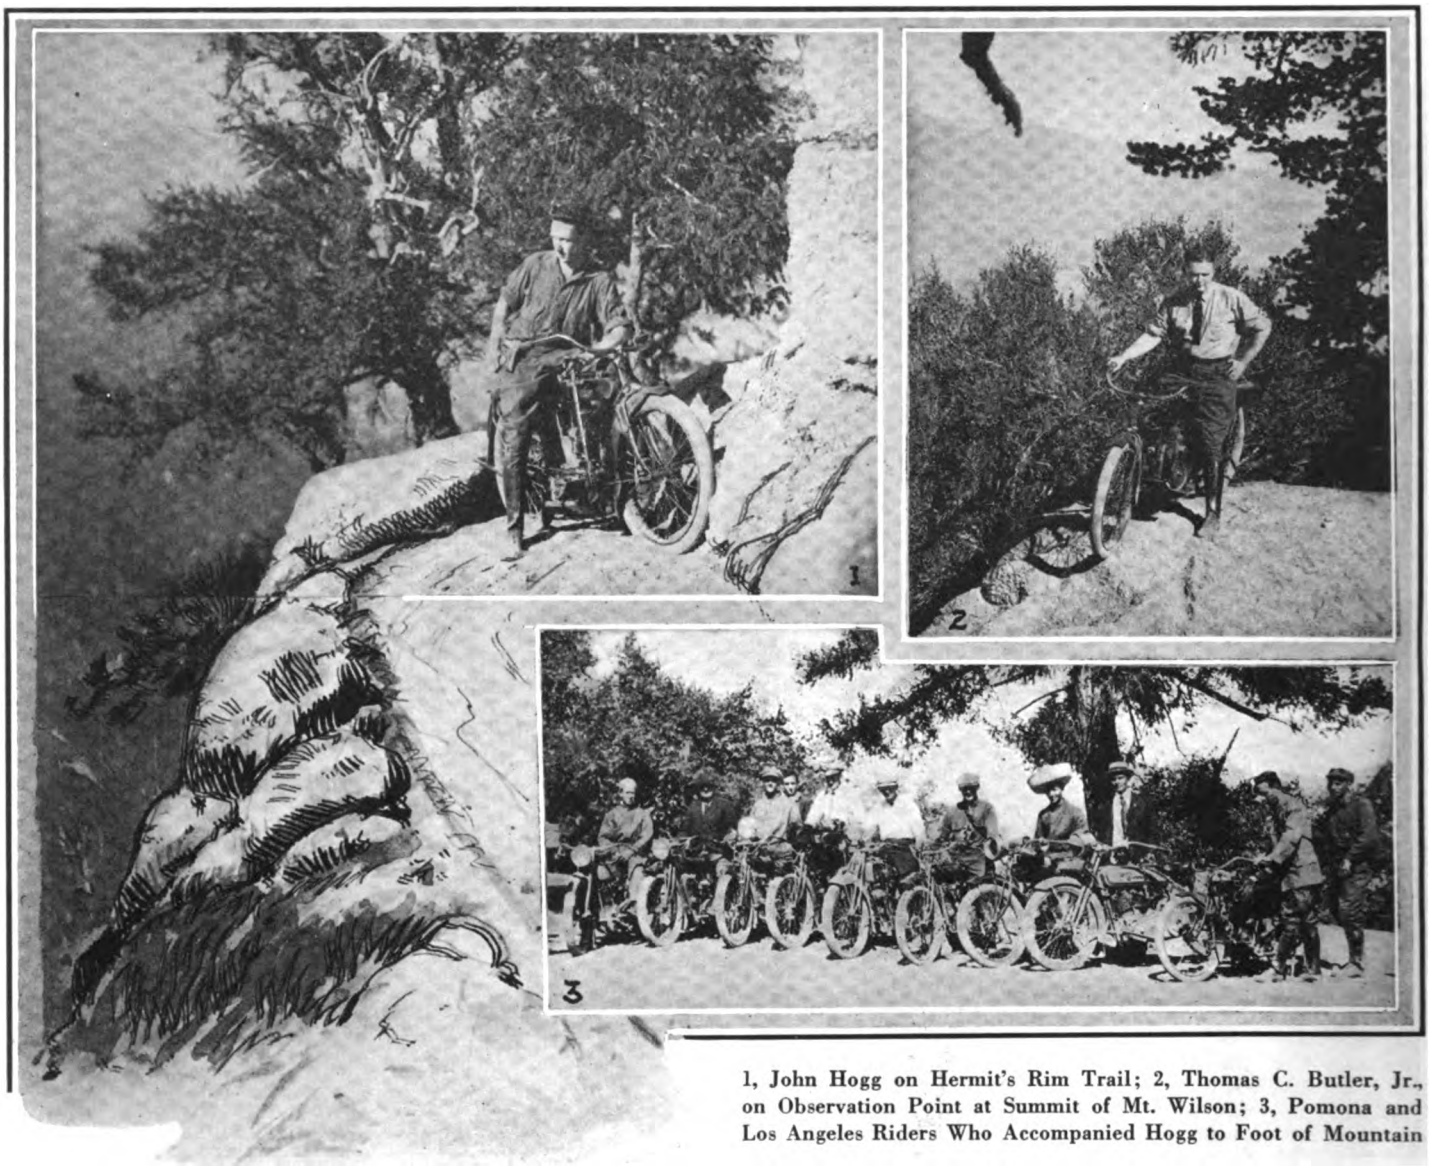
BRING FIRST MACHINE OVER HERMIT'S RIM TRAIL

Angel City Riders Relay Indian Featherweight Over Hazardous Path Never Before Traversed by Wheeled Vehicles—Mt. Wilson is Also Climbed



1, John Hogg on Hermit's Rim Trail; 2, Thomas C. Butler, Jr., on Observation Point at Summit of Mt. Wilson; 3, Pomona and Los Angeles Riders Who Accompanied Hogg to Foot of Mountain

LOS ANGELES, Cal.—Thomas C. Butler, Jr., and John E. Hogg, both of this city, rode an Indian Featherweight from the base of Mount Wilson to Observation Point at the summit and also over the hair-raising Hermit's Rim Trail between the summits of Mt. Wilson and Mt. Lowe on August 13. While a similar machine has ascended to the summit of Mt. Wilson a short time ago, no one has driven any kind of wheeled vehicle along the Hermit's Rim Trail until Butler and Hogg turned the trick.

The two riders took turns in relaying the machine over the hazardous course, where a slip meant a drop of several hundred feet to the valley below. Grades as steep as 45 per cent. were negotiated with but little difficulty. The narrow squeaks that Butler and Hogg had at several points were almost too much for parties tramping the Trail and the members refused to look at the machine and its riders for fear of seeing them shoot over the precipices.

POPE DEALER ISSUES HILL CLIMB CHALLENGE

QUAKERTOWN, Pa., Aug. 22.—A challenge to riders of any make of machine in this section to a hill climbing contest has been issued by H. C. Fronsheiser, the local Pope motorcycle dealer. This invitation to a general competition grew out of a demonstration held here recently, which convinced Fronsheiser that his model L-16 Pope Special was capable of putting up a stiff fight against any other mount.

The hill climb staged on August 6 was held on Ingram's Hill, one of the steepest inclines in this vicinity. The public were invited to witness the varied program which called for a climb on high speed, slow or fast; one starting from the bottom of the hill; a third beginning from any part of the hill; the executing of a circle on the incline, and finally the negotiating of any hill in these parts. Each of these tests was successfully met by the Pope machine.

The event of the day that attracted the keenest attention was the climb up Ingram Hill made by DeLloys Fronsheiser, son of the local dealer, with a heavy passenger.

WELCOMED INDIANA F. A. M. RUN CONTESTANTS

NEW ALBANY, Ind.—Many riders of the Falls cities, including Louisville, Jeffersonville and New Albany, were on hand at the "Wright Place," operated by Glen Wright, bicycle dealer, Henderson agent, and sporting goods dealer, to welcome the members of the Indianapolis Endurance Run, who checked in at the New Albany control at Wright's store, on Sunday, August 13. The roads from Indianapolis to New Albany were in bad shape, and several riders were late.

Considering the Matter of Tools

When You Contemplate Some Tinkering on Your Motor, Put Yourself in the Dealer's Place and Be Fair; Keep Out of the Way, Use the Tools Carefully and Put Them Back Where You Found Them

By GEORGE M. JOHNSON

JIMMY RYDER rolled his motorcycle into the alleyway between the repair shop and the next building and proceeded to get busy on some needed adjustments. First of all he went into the shop and helped himself to two boxes, one of which was to serve him as a seat, the other for parts from the machine as he removed them.

Gus Blake, the proprietor of the agency, noted Jimmy's position with a trace of a scowl, for the entrance from the street to the repair shop was pretty well blocked, but he said nothing.

To begin with, Jimmy set about removing a link from his chain. Right there he got into difficulties, for the chain tool from his kit had seen such strenuous—perhaps inexpert, as well—use that it was pretty nearly gone. So Jimmy betook himself into the shop a second time, located a chain tool in good condition, and soon had the extra link out of the way.

Goodbye, Screwdriver!

The next job required a screwdriver. Now Jimmy had a screwdriver in his kit and aside from the fact that the blade turned in the handle it was all right. However, he managed to borrow one from Gus Blake's abundant supply. Unfortunately what he needed was a heavy screwdriver, while the one Jimmy had secured was far too light for the service required of it. One vigorous twist from Jimmy's husky right arm and the poor screwdriver gave a despairing groan and rolled over—dead. With a half guilty look around, Jimmy replaced it in a drawer and took the one he should have taken in the first place.

At the end of an hour or so Jimmy Ryder had completed his work. But when he put away his tools, *somehow* the good chain implement found its way into his kit, while the worthless one went back into the shop. A similar exchange took place with regard to a certain handy sprocket wrench.

Now Mr. J. Ryder is a pretty good fellow. He would be fighting mad in a minute if you should venture to suggest any cutting remarks about his personal honesty. The tools in question looked very much alike—exactly alike, in fact, when decorated with a liberal smudge of grease as these were. Let it go that Jimmy's carelessness caused him to *mistake* the identity, and that some good shop tools got into his kit without his knowing it. However, it may be significant that no shop tools in poor condition were exchanged for similar ones, only good, from Jimmy's collection. But perhaps we are doing Mr. Ryder an injustice.

No Profit for Friend Gus

The above, as you probably have guessed, is, well, suppose we call it a fable. Yet fables can happen in real life, you know. You, who read this, are one of two persons; you are in a position to do as J. Ryder did, or you are in a position to be victimized as Gus Blake was victimized.

Now if you belong to the brotherhood of Ryders, just how many such customers as Jimmy do you suppose a dealer could afford to have? How much profit did Gus make on that transaction? His alley was blocked for some time, causing considerable inconvenience to all who had occasion to use it. His loss in good tools amounted to at least a dollar, possibly more. Now where did he get off?

Tough Problem for Dealer

It is just such things as the above, endlessly repeated, that have compelled dealers to put up signs above the repair room door—NO ADMITTANCE! THIS MEANS YOU! And yet in so many cases those vigorous signs mean less than nothing.

As a matter of fact the dealer is up against a stiff proposition in this regard, particularly the dealer in a small place where most of his customers are acquaintances, perhaps many of them personal friends. He is afraid to come down firmly and keep them all out of the repair room, for fear they may get "sore"; and doubtless there is plenty of basis for that fear. The big city dealer is usually located differently, and as a rule his customers don't even expect to see the inside of the shop.

Is there any way out of the difficulty? Is there anything a dealer can do to protect himself and at the same time keep the good will of all his customers? Some agencies have gone to the expense of fitting up a room where riders could tinker to their hearts' content, a room supplied with a fair assortment of tools. Such a luxury is, of course, impossible for the average run of dealer.

Not long ago I ran across a pretty clever little scheme, adopted in a certain agency where the serviceable tools were slowly but surely leaking away, generally via the Ryder route. Every single tool of every kind was decorated with a generous blotch of red enamel, the sort used in touching up Indian frames, tanks, etc. The Ryders who forgetfully ride away with shop tools are rarely deliberate thieves; they would never think of scraping off the tell-tale enamel to conceal the fact that their collection contained some that started in the shop. And when Jimmy works over his boat at the agency the difference between his tools and the shop tools is fairly screamed out to all in glaring red. In the agency referred to loss has practically stopped.

The permanent cure of the abuse must lie in the waking up of riders in general to the fact that the purchase of a motorcycle does not give them the right to the use of all the shop facilities forever. It is simply necessary for the riders to apply a touch of the G. R. in their relations with the dealer—a sort of put yourself in his place stunt. Probably when that happy time does come the dealer will be firmly convinced that he is dead and at last in Heaven.

A Batch of Simple Riding Kinks

Something About Cornering; the Correct Handlebar Position for Safety and Comfort; Giving the Motor and Carbureter a Chance; Neatness for Rider and Mount

By DON JOHNSTON

WHILE it takes but a short time to learn the operation of the motorcycle sufficiently well to be a good rider, there are many little niceties of control, which invariably distinguish the expert from the novice.

Mostly they will be learned eventually through experience extending over several seasons, but if called to the attention and briefly explained, they will serve to increase the all-round pleasure of motorcycling.

Swinging a Corner

Most riders will sit bolt upright when rounding a bend, and thus lean at the same angle as their machine. With such a procedure either the speed must be greatly reduced or a side-slip invited. To any who have attended a track meet it is noticeable how the machines will "slide" when coming around a bend. This is accomplished by allowing the cycle to tip sharply while the rider lies over on the outside of the tank and slides with his machine. He is enabled by this method to counterbalance and hold his mount more nearly vertical, keep his footing and still maintain terrific speed.

While it is not necessary for the road-rider to lie on the gasoline tank, it is a positive advantage to lean away from the curve while the motorcycle leans inward in negotiating turns in everyday touring.

Much maneuvering can be accomplished without declutching by simply sliding one toe on the ground. The machine can be turned about almost in its own length and at considerable speed by thus allowing the toe with slight pressure to act as a pivot and swinging the machine around it.

I know many fairly skillful riders, who will immediately upon sighting some sand, mud or other treacherous going swing out both feet from the footboards as far as possible. "Straddling" has indeed saved many spills, but usually only the slightest foot-pressure is needed to straighten up motorcycle and pilot.

By keeping both feet upon, or as near to the foot-boards as feasible, equilibrium is more easily maintained. Extending them widely causes a pendulum-like action and seriously disturbs balance.

Handlebar Position

Probably no one element contributes more to the convenience, safety and manageability of a motorcycle than correct handlebar fitting and adjustment. In England manufacturers regularly equip their products with bars, which over here might be classed as a semi-racing type. The easiest riding position is attained when the bars are so adjusted that their ends will just strike the tank or top tube as the case may be. Several of our makers have already shortened their bars to make this arrangement practicable, but with those machines, which are still fitted with the long bar, another expedient can be adopted. Either the bars may be shortened about six or seven inches by the local repair man, or they may be bent further apart and then tipped downward. The fallacy of long bar fitment became apparent last year with the popularity of motor-bike bicycle models. This season they are much shorter. I had a model at one time where it was necessary to saw off four inches before the jigger was rideable.

Low Position Corrects Wobbling

Even the drop racing bar if bent upward somewhat makes a very desirable type for everyday use. The operator has much better control of the machine, and the position of the body assists balance.

All riders of big twins have had experience with the "speed-man's wobble," and remember the peculiar sensations of wondering "what is going to happen next." With bars high above the tank wobbling correction is extremely difficult, but with a lower position it is made easier.

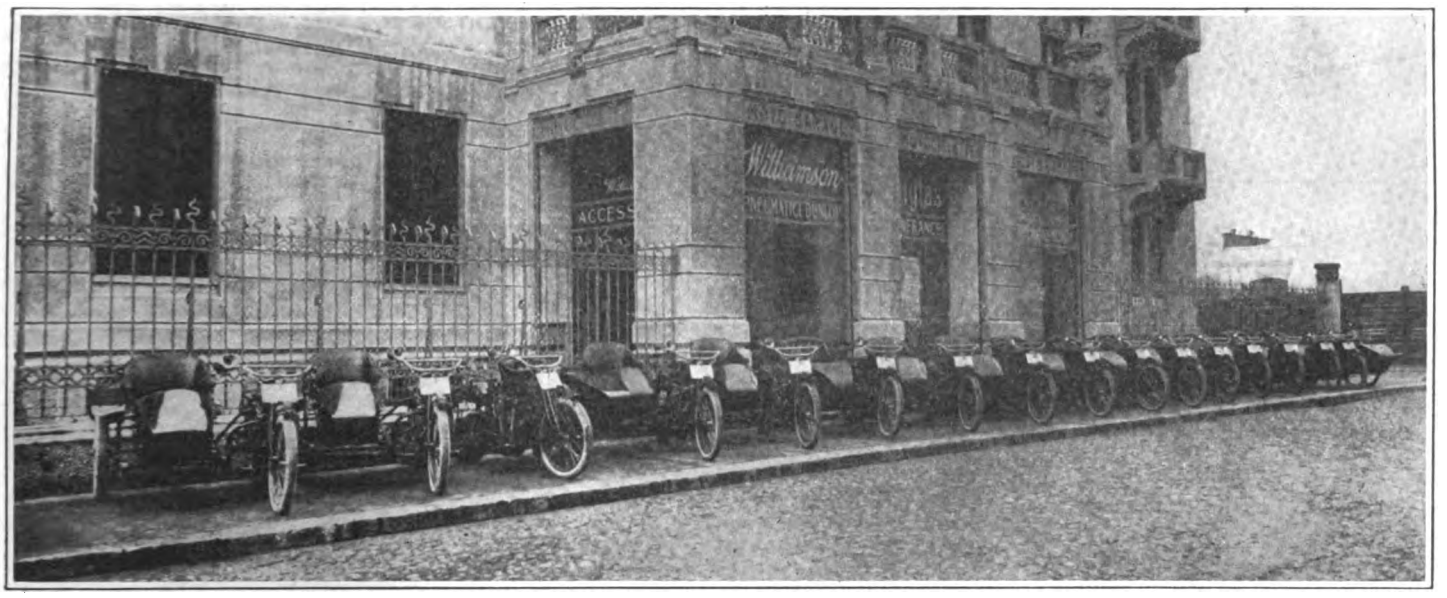
Riding with hands off is by no means a trick confined to a few makes of machines.

THE SPIRIT OF CYCLING IS STRONG IN THIS OHIO FAMILY

G. H. Neidengard, Excelsior Dealer at Steubenville, O., With His Wife and Six Children

Digitized by Google

BIG SHIPMENT OF INDIAN COMBINATIONS FOR ITALIAN ARMY



They Were Sold by Lanfranchi, Who Handles the Indian in Milan, Italy

It is as much a matter of correct handlebar adjustment as fork design. I have found it easy with all leading makes if the bar-ends were reasonably low.

It is really painful sometimes to watch a motorcyclist jump on his kick-starter and force the motor over against compression in an endeavor to start it. A much easier way is to turn the motor over with exhaust valve raised until one cylinder is about to begin its compression stroke. Then give the pedal a sharp kick, at the same time lowering the valve. The valve should be released just as the piston passes top center (or slightly before), and usually the motor will take up its cycle of operation. It is a knack well worth learning as it requires less effort, and obviates the awkwardness which often accompanies the other method.

The carbureter to give maximum efficiency at road speeds is set to give a leaner mixture than is desirable for easy starting. If, after the first few explosions the auxiliary air port is quickly covered with the hand, continued operation is assisted by excluding some of the excess air. When the motor shows signs of choking more air can be admitted by raising the hand, and soon the cylinders will have become warm and normal conditions attained.

The rider and his mount are so closely linked together that both should always present a trim and neat appearance. For the machine a small cup to hold gasoline, a brush to apply it, and some rags with which to wipe will suffice; while for the rider a small shoe polisher, clothes brush, etc., are always handy.

Neat—and Still a "Regular Fellow"

You Can Keep Your Mount Clean and Your Costume Tidy and Suffer No Loss of Riding Prestige; An Old-Timer Didn't Think So at First but He Holds a Different Opinion Now

By RODMAN BARRY

CAN a motorcyclist keep his mount clean and his attire tidy and attractive and still be accepted as a "regular fellow"? was one of the most unexpected questions asked a few days ago by a veteran who was discussing with the writer the present widespread campaign for improvement in the appearance of riders. We argued that he could—beyond shadow of doubt—but it required considerable impromptu oratory to make the veteran get the same point of view. The discussion would be unworthy of mention here, but for the fact that the veteran claimed he was voicing the opinion of more than one seasoned roadster.

The Veteran's Opinion

"Why, the only riders who go in consistently for the neatness business are those who never get off the boulevards," was the claim of the oldtimer, "and all the boys are dead wise to that fact. They know that riders who are actually putting miles behind them over country roads would find it pretty hard to be Beau Brummels, and when they sight a rider who is a little neater than the ordinary they catalog him as one of those 50-mile tourists we hear about."

Up to that point we had taken it for granted that the veteran was merely making conversation, but when it became evident that he was speaking from conviction we took him gently by the coat lapel, led him aside and aimed language at his nigh ear.

"Do you actually believe that a motorcyclist discredits himself with the rank and file of riders by keeping his mount clean and wearing a neat costume?" we inquired.

"Maybe that's putting it a little too strong," came the admission, "especially as regards keeping the motor clean; but when it comes to the appearance of the rider himself I think it's true that one who is too neat on the road won't be classed as a 'regular fellow.' Don't you agree with me on that point?"

"When did a grimy suit and an oil and mud-covered machine become the recognized characteristics of a 'regular fellow?'"

"They may not please the eye," was the retort, "but they at least indicate that the machine owner has been doing something besides going down to the garage and spending his Saturday afternoons and Sundays at polishing his nickelwork. If he's dusty and oily you know he's been riding."

"And you also know that he is not making the most of his motor," we broke in; "that he is carrying a thick film of oil over the whole outfit to pick up dust and make future trouble for him; that he is a poor mechanic if he finds it necessary to cover himself with oil and goo every time he makes a little roadside adjustment or repair; that he has been riding in dust clouds when by using his noodle he could have avoided a good deal of the dust and gotten more healthful enjoyment out of his roadwork."

Creating a Good Impression

"You can't ride country roads and avoid dust," answered the veteran.

"Certainly not," we admitted, "but dust is always unpleasant and the less we get of it the better. Then why not prove ourselves thinking riders by showing as little dust and road dirt as possible. The more dirt we bring back with us from a trip, the

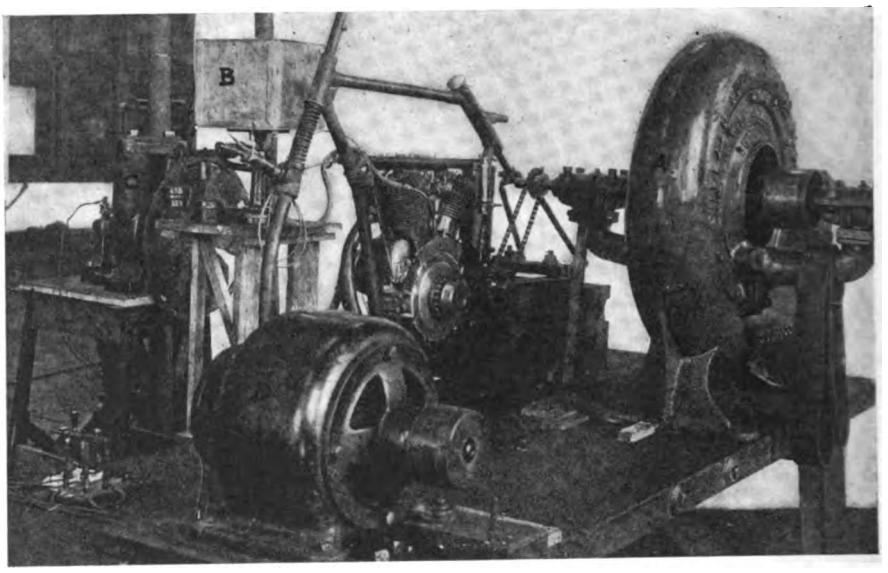
First-Hand Data On Fuel Values

Interesting Results Obtained in a Series of Experiments With a Twin-Cylinder Flying Merkel Motorcycle Powerplant; Benzol Shown to Be Most Efficient.

By W. E. SHARKEY, M. E.

EVERY manufacturer, tester and individual motorcyclist is interested in the fuel problem, the matter of power and miles per gallon, and the article below is therefore a highly interesting record. Because of its technical treatment it should prove of special value to builders of motorcycles. Mr. Sharkey contemplates the preparation of other articles along similar lines for these columns.

In the illustration (A) is the blower fan used as the load; (B) the gasoline tank, supported on a scale; (C) the cooling fan; (D) electric motor used for starting.



THE various fuels upon which an internal combusion engine may be operated, form a basis for many useful and interesting experiments. A series of such experiments was performed with a twin-cylinder Merkel motorcycle engine. These tests were made for the purpose of ascertaining what horsepower the engine would develop and how efficiently it would operate with each fuel. Several fuels and combinations of fuels were used but only the following gave results worthy of notice.

No. 1—Gasoline.
No. 2—Benzol.
No. 3—Gasoline, 60%, Kerosene, 40%.
No. 4.—Benzol, 50%, Gasoline, 50%.
No. 5—Benzol, 75%, Alcohol, 25%.

Since only a standard make of carburetor was used, satisfactory results could not be obtained with a fuel containing more than 25 per cent. of alcohol nor could more than 40 per cent. of kerosene be used. No attempt was made to obtain or develop a carburetor which would properly vaporize the fuels that would not work with the ordinary carburetor.

Testing Apparatus.

The apparatus for performing these tests is shown in the photograph. A 40-inch Buffalo Forge Co., blower fan (A) was used as a load. This fan had previously been calibrated over a wide range of speeds and horsepowers, so all that was necessary to ascertain the horsepower which the engine was developing, was to note the speed of the fan and refer to the calibration curves. The gasoline tank (B) was supported on a scale platform. In this way the exact amount of fuel used in a given time could be noted. The cooling fan is shown at (C). The electric motor (D) was used for starting by connecting to a pulley on the fan shaft by a belt. After the engine had started the belt was thrown off and the motor was stopped.

Horsepower.

The horsepower developed with the different fuels was plotted as a series of curves, one of which was for fuel No. 3, while the other was for gasoline alone. With the mixed fuel it was found that the greatest power developed was 12.4 horsepower, while with gasoline only the maximum horsepower was 10.4. The curves with the other fuels used coincide exactly with that for gasoline. With the mixture of kerosene and gasoline the engine developed about 20 per cent. more power than with any of the other fuels.

Efficiency.

The efficiency was found by running the engine at a constant horsepower output for a given length of time and noting the exact amount of fuel used. From this information the pounds of fuel per horsepower per hour could be found. Then, by knowing the heat content of the fuel, which will be shown later, the efficiency of the engine was calculated by the following formula.

$$\text{Efficiency } \% = \frac{H}{W \times F} \times 100\%$$

in which:

H = B. t. u. per H. P. = 2545.
W = pounds of fuel per H. P. per hour.
F = B. t. u. per pound of fuel.

The data which follows show the relative efficiency of the engine with the different fuels. This efficiency is the combined thermal and mechanical efficiency.

Gasoline.

H. P.	Fuel Used.	Efficiency.
4.8	.78	16.6
6.4	.76	17.85
6.8	.67	19.3
7.0	.64	20.1

Gasoline-Kerosene.

H. P.	Fuel Used.	Efficiency.
4.8	.75	17.4
6.2	.695	18.7
6.5	.68	19.1
6.5	.66	19.7
7.5	.51	25.6

Benzol.

H. P.	Fuel Used.	Efficiency.
5.7	.815	19.2
6.5	.705	22.2
7.1	.65	24.1
7.8	.575	27.2

Benzol and Gasoline.

H. P.	Fuel Used.	Efficiency.
4.1	1.12	12.7
5.4	.92	15.4
6.1	.875	16.2
7.2	.84	16.9
8.4	.81	17.4

Benzol and Alcohol.

H. P.	Fuel Used.	Efficiency.
5.5	1.17	14.7
6.4	.935	18.5
7.2	.865	20.0
7.9	.83	20.9

These curves show that benzol was the most efficient but that the mixture of gasoline and kerosene was a close second. It can be noticed that the efficiency with the mixture of benzol and gasoline is much lower than when each fuel was used separately.

Heat Content.

All of the fuels used were made up from the four fuels: Gasoline, kerosene, benzol and alcohol. The heat content of these fuels was found by the use of a Parr Calorimeter, in which a known weight of fuel is burned and the rise in temperature it will cause to a definite amount of water is noted.

Digitized by Google

The difficulty of getting the accurate weight of the fuel used was overcome by making some small very thin walled glass bulbs. These bulbs were weighed, then filled with the fuel, sealed and weighed again, thus giving the correct weight of the fuel used. One of these bulbs was then placed in the bomb with one grain of potassium chlorate and a small quantity of sodium peroxide. These chemicals were used to accelerate and insure a uniform explosion. After the bomb was sealed it was given a severe jolt to break the glass bulb and allow the fuel to mix with the chemicals.

The bomb was then placed in the water and rotated until the temperature of the water was uniform. This temperature was noted and the charge in the bomb was exploded by an electric spark and the rise in the temperature of the water was noted. The following corrections were made to rise in temperature.

Added:

0.02 degrees for radiation.

Subtracted:

0.014 degrees for the fuse.
0.234 degrees for acceleration.
0.03 degrees for each 0.1 gram of glass in the bulb.

Then the B. t. u. per pound of fuel equals:

$$\frac{r \times 0.73 \times 2135}{\text{wt. of fuel in grams.}}$$

in which "r" is the corrected rise in temperature.

The following heat values for the different fuels were obtained:

B. t. u. per pound.			
Gasoline.	Benzol.	Kerosene.	Alcohol.
20890	17550	20600	11600
22200	16950	20000	11150
20500	16920	20400	
	16500		
Average 21196	16980	20333	11375

The heat content obtained in this manner is the higher heating value, the extra heat is due to the steam, formed by the hydrogen in the fuel uniting with the oxygen in the accelerator, condensing to water and giving up its heat. The amount of steam or water formed was found from the chemical equation as follows:

Gasoline $= C_7 H_{16}$

$C_7 H_{16} + 11 O_2 = 7CO_2 + 8 H_2O$

By supplying the atomic weights the ratio of the weight of the fuel to the weight of water is $\frac{144}{100} = 1.44$ pounds of water formed per pound of fuel burned.

The equations for kerosene, benzol and alcohol are as follows:

Kerosene:

$C_{10} H_{22} + 15.5 O_2 = 10 CO_2 + 11 H_2O.$

Benzol:

$C_3 H_6 + 7.5 O_2 = 6 CO_2 + 3 H_2O.$

Alcohol:

$C_2 H_5 O H + 6 O = 2 CO_2 + 3 H_2O.$

from which the water formed per pound of fuel is:

Kerosene—1.395 lbs. of water.
Benzol—.693 lbs. of water.
Alcohol—1.17 lbs. of water.

The heat of vaporization of water is 970 B. t. u. so when one pound of steam condenses into water 970 B. t. u. are given out. Then the heat due to the water formed in each fuel is the product of the pounds of water and 970 B. t. u.

Then the lower heating values of the fuels is as follows:

Fuel	Higher Heat Value	Correction	Lower Heat Value
Gasoline	21195	1400	19795
Kerosene	20333	1350	18982
Benzol	16980	672	16308
Alcohol	11375	1140	10235

These values were the values used in calculating efficiencies.

THROUGH FOUR STATES WITH A SIDECAR

Being the Account of a Ten-Day Vacation Trip Taken by a Montreal Family Through New England's Best Scenic Sections—Camping Outfit Was Carried Without Difficulty

By W. J. ROBERTS

AS many of our Canadian riders at this season of the year are no doubt contemplating a tour in the United States, the following brief account of a pleasant ten days' trip taken from Montreal by the writer, accompanied by his wife and little son, may prove of some interest, the machine being a three speed-Indian and sidecar.

Proceeding from our home in Montreal along the King Edward Highway to Rouses Point, and thence to West Chazy where we took the ferry to Isle La Mott, the road through this island and succeeding ones being almost continually within sight of the waters of Lake Champlain. There are few bridges of the usual construction, but generally the dirt track somewhat resembling a dyke connecting up the different islands, until we reached the mainland where we had an excellent run to Burlington, Vt.

Through Green Mountains

After spending the night here our route lay through the Green Mountains, continually winding alongside the river between towering peaks (notably the Camel's Hump) and passing many delightful spots, every bend in the road opening up some new alluring prospect. Thus we reached Montpelier, the capital of the State of Vermont, and possessing a finely situated State House, the gilded dome of which is very imposing. At this point we took the road to White River Junction and soon after leaving the latter place we entered New Hampshire, and I would here like to pay a tribute to the quality of the numerous roads being constructed by this State which is expending enormous sums on road construction, and will no doubt be the means of attracting a still greater volume of tourists to this beautiful part of the United States.

Filling up with gasoline at Newport we decided to ride a little further, although it was now getting dark and very shortly enterest a forest in a valley which was very sparsely populated. It proved quite an unusual experience passing through the forest in the dark, our exhaust booming in the stillness like a cannon and without meeting a solitary person or vehicle. Arriving at Marlow we halted for the day, making a start next morning for Keene through very pretty scenery. On leaving this latter town we were led a little astray through a badly placed sign post, and for some time had an excellent opportunity of testing the hill-climbing qualities of the machine as the road was straight up the side of the mountain for some two miles, the gradient being somewhere in the neighborhood of 20 per cent. with a loose surface, but the engine took it without a falter.

Over Good Roads

Descending to Peterboro we took the excellent road over the Temple Mountain to Wilton. Hitherto we had traversed macadamized roads but the ones from now on were practically all oiled and dustless. The straight and almost level road from here through Nashua (where we left New Hampshire) to Lowell, Mass., invites speed, but understanding a motorcycle cop haunted this vicinity we were guided accordingly. The following day we spent in Boston and saw many of Uncle Sam's battleships and smaller craft at the Charleston Navy Yard, and interesting sight being the British submarines interned there. We also saw the German ships interned, international law permitting them to keep fire in one boiler.

After viewing this old city with its winding streets and many interesting reminders of the Independence and Civil Wars—notably the obelisk on the sight of Bunker Hill, and the Massachusetts State House—we returned to Lowell, where we spent the next day, Sunday. We now proceeded via Concord and Lexington, where stirring fighting took place with the British in the days of George Washington, there being a monument of an American minuteman at Lexington and the burial place of many of the fallen. Passing through Worcester, Mass., which is an important manufacturing centre we struck the trail for the mecca of the Indian tribe, the Indian factory.

At the Wigwam

Here we received a hearty welcome and were taken through the factory, the magnitude of this motorcycle plant being astonishing, it being a seven-mile walk through the different departments. There you will find machines performing the most intricate operations almost automatically, and ranging from the machining of tiny parts to giant shears which cut five-inch steel like cheese, and a press with a pressure of 1,200 tons. Springfield itself is also very interesting, notably its park and municipal

English View of 2-Strokes vs. 4-Strokes

Trade Journal Finds Two-Stroke Sentiment Increasingly Strong but Recognizes Four-Stroke as Still a Popular Contender

IN discussing the battle abroad for supremacy between the two- and four-stroke types of motorcycle motors, *The Motorcycle,* of Coventry, England, sums up the present situation in Britain interestingly, as follows:

"A short time ago the relative positions of two-strokes and four-strokes were discussed. As is generally recognized, there is a good deal of healthy rivalry existing between makers of these two types of engines, and we expressed the view that, instead of the rivalry decreasing as was generally supposed, due to the rapid advance of the two-stroke, the future trend of design might reasonably show that the miniature four-stroke engine was by no means eclipsed for all time. The development of the simple two-stroke, however, seemed after a while to reach a stage after which little or no progress could be discerned. Even now there are certain faults common to a two-stroke engine which are not present in the four-stroke. Our opinions of the past were based mainly on the extravagance of a two-stroke engine in the matter of petrol consumption when compared with a four-stroke. At the time the opinions were expressed, petrol was just half the price that it is now. How much stronger, therefore, is this all-important point of economy in favor of the four-stroke engine? We need not go over old ground in detail, but it is worth, perhaps, mentioning once again that in the early days tiny four-stroke engines failed by reason of their rapid deterioration. Latter-day developments, however, have produced a most efficient engine, almost everlasting valves, and an engine that will remain cool even after prolonged non-stop runs. These improvements, which were originally effected in the 500 c.c. four-stroke engine after extended racing experience, have gradually been reflected in the lightweight engine, and the present four-stroke lightweight cannot be compared with the machines on which many motor cyclists served their novitiate The race for supremacy between the two- and the four-stroke will be interesting and instructive."

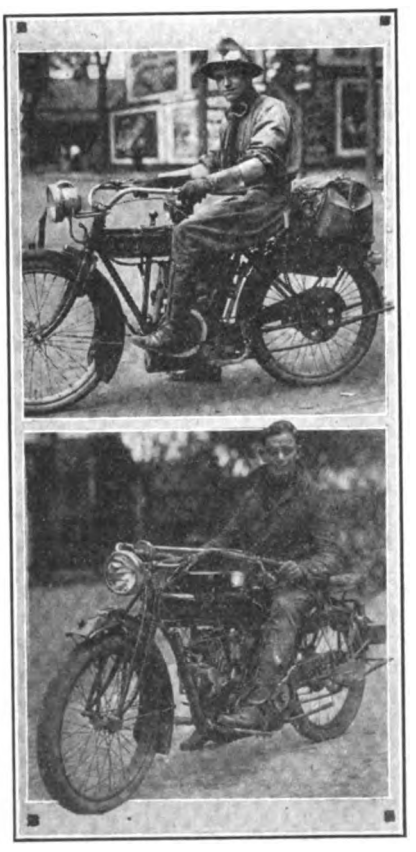
HARLEY-DAVIDSON MAKES IMPORTANT TRACK RACING DECISION

OWING to Warner's accident in which he, with Fillmore and Hepburn, ran into a fence in the McPherson, Kansas, races, and broke his leg, the Harley-Davidson Company issued their ultimatum that henceforth the factory discontinues twins on less than two-mile tracks and singles only, on mile tracks. This decision came at the close of the racing program in which Ray Weishaar won the three-mile, with Johnston, second, both riding four-valve Harley-Davidsons. Time 3:36. Johnston took first and Weishaar second in the five-mile, time, 6:05. The Harley-Davidson Company have not favored the use of high-powered twins on tracks less than two-miles and this accident, they state, substantiates their stand.

LONG DISTANCE VISITORS TO INDIAN PLANT

SPRINGFIELD, Mass.—James A. Lounsbury, a student in the University of Wisconsin, recently visited the factory of the Hendee Mfg. Co. in this city, having ridden from Superior, Wis., to this city in five days. Lounsbury used his Indian Featherweight for the entire 1,720 miles of the distance, and averaged 20 miles per hour for the trip.

Another visitor was Berry Cohen, of Atlanta, Ga., who came through on his Indian twin, the same machine which he used



Above, James A. Lounsbury on Featherweight; Below, Berry Cohen

on a similar trip in 1915. Cohen made the journey in six days, carrying a tandem passenger as far as New York. To date he has covered 20,600 miles with his machine. Both Cohen and Lounsbury made a trip through the big Hendee plants and started for their homes a few days later.

LIMA M. C. RACEMEET SEPT. 4

Lima, Ohio.—Secretary Charles C. Cleveland, of the Lima M. C., announces that the club will stage a racemeet on the local half-mile track on September 4, and that entry blanks can now be obtained from the club officials.

WEST MAKES LONG RUN WITH SIX ABOARD

HOPKINSVILLE, Ky.—Charles West, of Rockport, Ill., is coming fairly close to the record when it comes to carrying numbers and pounds on long runs. West, his wife and four children, recently toured to Hopkinsville with his motorcycle and sidecar, a distance of 512 miles, without mishap and inside of three days. In making the trip they came through Chicago, Indianapolis, Vincennes, Evansville and Henderson, finally arriving at Hopkinsville, where they are visiting the family of C. E. West on Seventh street.

The first day out they made 180 miles, and a little over 200 miles on the second. In addition the party reached Hopkinsville in good spirits, feeling very little the worse for the long journey. The arrangement of the family was as follows: Mrs. West sat in the sidecar and held the youngest child on her lap. A seat had been fitted in the nose of the sidecar upon which the second youngest sat. West occupied the saddle, while his two sons occupied a double tandem attachment over the rear wheel. A large grip was featured behind the sidecar, and carried such changes of clothing and toilet necessities as would be needed on the road.

BUYS FOR U. S. RUBBER CO.

RAYMOND S. WILLIS has been appointed purchasing agent for the United States Rubber Company, of 1790 Broadway, New York. His long experience in the rubber and in export business, both in this country and abroad, makes him unusually fitted for taking charge of buying for the many plants of the company, throughout his large territory.

READY FOR SWENSON'S INDIAN POW-WOW

Final Arrangements Made to Accommodate 1,500 Riders at Providence Picnic—Athletic Events Will Be Feature

PROVIDENCE, R. I., Aug. 21.—All is in readiness for the big Indian Pow-wow to be held at Palace Gardens next Sunday under the auspices of B. A. Swenson, the Indian distributor. Provisions will be made for at least 1,500 riders and friends from all over New England and Eastern New York.

For the benefit of out-of-town riders guides will be provided. The general meeting place will be in Enchange Place, where guides will leave with parties every half hour for the Gardens, beginning at 9 o'clock. The parties will be taken by Mr. Swenson's Broad street store, through Roger Williams Park, thence to Palace Gardens.

Lunch to Be Served

Swenson will provide a lunch, in generous quantities, to consist of sandwiches, drinks, ice cream and the like. Every rider will be given a coupon admitting him to the feast.

Only riders of Indians will be allowed to participate in the pow-wow. It is immaterial whether a person is an owner or not, provided he comes on an Indian, he will be royally welcomed.

A number of athletic events will be pulled off for the fat and lean men, the tandem girls, the sidecar girls and the tomboys. Suitable prizes will be awarded. The prizes will be above the ordinary, as those unused articles presented by business men of the city for the F. A. M. meet contest have been given to Mr. Swenson to be distributed at the pow-wow. Mr. Swenson gently hinted yesterday that he was going to spring a surprise this year in the form of a sport if certain things materialize.

HARLEY-DAVIDSON CONVENTION ENDS WITH BANQUET

MILWAUKEE, Wis., Aug. 22.—The annual convention of Harley-Davidson's salesmen wound up with a banquet at the Maryland Hotel. It was an informal affair, for it was realized that the knights of the grip had been listening to enough talk to last them for a whole year. A feature of the evening's entertainment was a movie film, showing convalescent English sailors and soldiers at outings in London, and another depicting some hill climbing stunts by "Billy" Cooper. President Walter Davidson was shown in the sailors' outing driving a sidecar outfit, carrying one of the Jutland heroes.

FARMERS SEE MOTORCYCLE RACES

PHILADELPHIA, Pa.—The twenty-third annual picnic of the Gloucester County Grange was featured by motorcycle races, the following results being reported:

Five miles—Lawrence, of Richwood, Thor, first; Banks, of Paulsboro, Indian, second; Elfert, of Aurora, Thor, third. Time, 6:14.

Five miles—Banks, Indian, first; Lawrence, Thor, second; Elfert, Thor, third. Time, 6:02.

Ten miles—Lawrence, Thor, first; T. Craddock, of Philadelphia, Indian, second; Kaiser, of Paulsboro, Excelsior, third. Time, 12:36.

RACES BOOM SALES

DENVER, Colo., Aug. 19.—According to the motorcycle dealers of this city the motorcycle races recently held on the Pikes Peak highway and at Overland Park, Denver, have given a great impetus to the sport in Colorado. The races also have quickened the sale of motorcycles for pleasure riding, the dealers claim.

WANT TWO MORE MACHINES

CANTON, O.—An appropriation of $530 for the purchase of two additional motorcycles for police use has been submitted to the council the other day and in all probability the council will assent to the appropriation. The Director of Safety told the council that three motorcycle policemen were necessary to regulate traffic and patrol the city, there being only one mounted man in Canton at present.

HELPFUL GOODYEAR PUBLICITY

The Goodyear Tire & Rubber Co. is sending out a series of neat folders in colors calling the attention of its dealers to the advantages of boosting commercial motorcycle sales. Bulletin No. 2, which is just at hand, tells of the M. O'Neil Co., of Akron, O., which uses four motorcycles in its painting and decorating department. The riders of the motorcycles cover Akron and all the outlying towns and report new houses in course of construction and thus enable their company to solicit the field thoroughly.

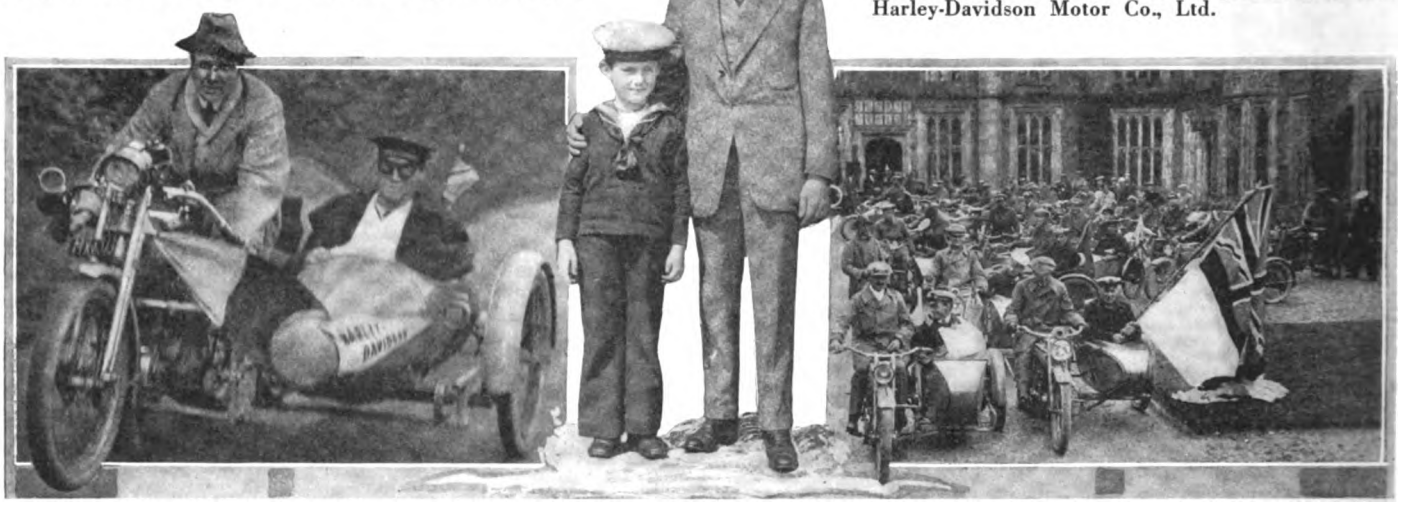
WITH WALTER DAVIDSON AT WOUNDED SAILORS' OUTING

BELOW are views taken at the outing given by the Harley-Davidson Motor Co., Ltd., of London, England, to wounded men of the Royal Navy, a short time ago. At the left is Harry Notbeck, a well-known competition man, with his 1914 Silent Gray outfit, while in the center is Walter Davidson and the son of Fleet Surgeon Stewart. Mr. Davidson took a prominent part **in the affair, driving a sidecar combination with** a petty officer as passenger during the outing. The picture at the right was taken at Sutton Place, where the party was entertained; William Cooper, the crack British amateur at the left, while to his right is Mr. Davidson. In this party was also Duncan Watson, managing director of the Harley-Davidson Motor Co., Ltd.



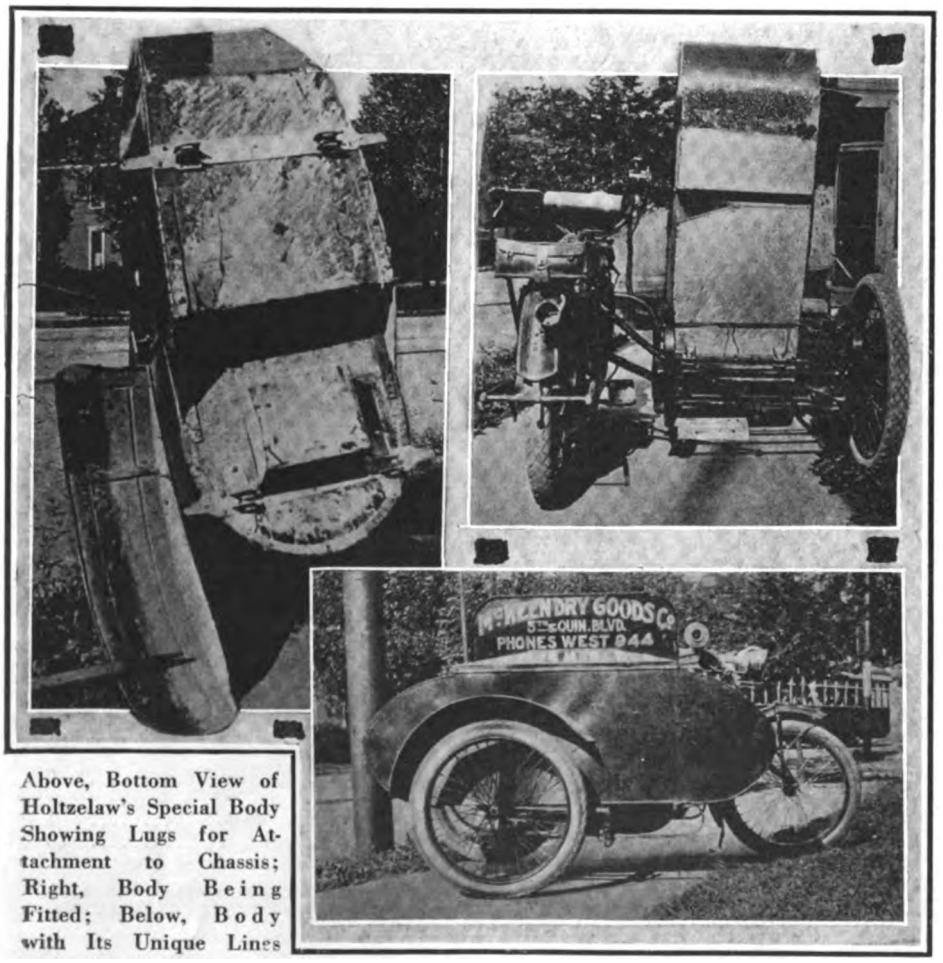
QUICK CHANGE OF BODIES WITH THIS OUTFIT

Novel Attaching Devices Allow of Rapid Substitution of Carriers

KANSAS CITY, Mo.—An ingenious and very practical method of changing a sidecar outfit to one for delivery work has been evolved by R. Holtzelaw, of the McKeen Dry Goods Co., of this city. The chassis used is a regulation Indian sidecar chassis with pleasure body, while for commercial purposes, Holtzelaw has had built a special body of torpedo form with a neat sign bearing the name of his firm on top of the body.

On the sidecar chassis have been fitted substantial cross-braces in which there are slots. Properly located lugs on the bottom of each of the two bodies fit readily into the slots on the chassis and four readily inserted keys hold the body in place. It is but the work of a few seconds to effect a change from one body to the other.

The appearance of the outfit is unique and attracts attention wherever seen. Credit for the idea in its entirety goes to Mr. Holtzelaw.



Above, Bottom View of Holtzelaw's Special Body Showing Lugs for Attachment to Chassis; Right, Body Being Fitted; Below, Body with Its Unique Lines

SAN FRANCISCO M. C. HOLDS FINE SOCIAL RUN

SAN FRANCISCO, Cal.—Fifteen members of the San Francisco M. C. held an impromptu social run to La Honda via Redwood City and Woodside on August 13. The run was easily made during the morning, all hands taking it easy. Lunch was had at La Honda, from the baskets which the crowd carried, the four sidecars of the party being requisitioned to aid the soloists in transporting the eats.

After a short rest following luncheon, the party returned via the Ocean Shore boulevard, striking the coast at Pescadero and going north through San Gregorio to Colma. The club house was reached after a ride of 120 miles and the participants then went for a swim, before dispersing for the night.

WOODS SETS A NEW RECORD IN SALES

TRENTON, N. J., Aug. 23.—R. S. Woods, Harley-Davidson distributor for Mercer County, has just finished one of the best seasons since he took the agency, having disposed of 75 new machines and 54 second-hand motorcycles. He placed 22 sidecars, about evenly between the Rogers and Harley-Davidson make.

Only one of his sales of 1916 models was a single cylinder motor, the demand being heavy for the three-speed twin. Ten per cent. of his sales were the Remi electric equipped model. He is planning a trip to Milwaukee to look over the Harley-Davidson factory some time late in the fall.

TORONTO DEALERS REPORT BANNER SEASON

Sales Exceed Mark Made in 1913, the Best Previous Year; Reciprocal Relations Bring Many American Tourists Across Border

TORONTO, Ont.—After eight years in the motorcycle business in Toronto, Percy A. McBride, the Excelsior and Henderson motorcycle distributor, declares that his trade is still growing. According to his own words, this season's business will exceed greatly the sales of any previous year. The best previous season was 1913, the year before the outbreak of hostilities, but the volume of business for 1916 will be considerably in excess of transactions in that year. His best month during the past eight years was last May while trade in July was seventy-five per cent greater than in the corresponding month last year. August also promises to be another banner month and there is no indication of a drop in motorcycles, commercially.

Walter Andrews, distributor of Harley-Davidsons, reports that he is more than satisfied to renew his connection with the Milwaukee factory for 1917, but that he will contract for just double the machines for which he signed for delivery this year. He had exceeded this year's contract several months ago, he says. On account of the reciprocal relations between the Province of Ontario and a great number of the States, Andrews reports that a fairly large number of Harley-Davidson tourists from distant American centers have called at his store during the course of their trips. In each case they have bought gasoline, oil and other necessities. The American tourists have come from Baltimore, New York, Buffalo, Erie, Cleveland, Detroit, Chicago and other places.

The H. M. Kipp Company, Limited, Toronto agents for the Indian, have received the appointment as Canadian distributors for "Brilliant Burners," the new gas light attachment which is made by the Monosmith Brothers Company, Spencer, Ohio.

Toronto dealers are discussing the possibility of holding a general motorcycle picnic to a nearby summer resort early in the fall.

As usual there will be several motorcycle, bicycle and accessory exhibits at the motor show held in connection with the Canadian National Exhibition, Toronto, during the two weeks starting August 28.

A. E. Humphrey, J. W. Gibson, Ed. Buffum, P. A. McBride, Walter Andrews and W. Porter are among the Toronto manufacturers, jobbers and dealers who have already promised to "take in" the cycle show at Chicago, while others are anxious to make the Windy City trip.

TORONTO DEALERS TO ASSEMBLE OWN WHEELS

TORONTO, Ont.—A number of the larger bicycle dealers of Toronto are entertaining the plan of assembling their own wheels for the season of 1917, according to present indications. One reason for this move is, it is declared, that factory shipments were so irregular this year that business has been affected to a certain degree. The dealers believe that they can do something to relieve the situation by arranging for the building of their own bicycles to be sold next season. One or two are already laying in large stocks of parts and their mechanics will be kept employed during the slack winter months on the new work. The factories have been claiming that the labor feature, as well as the metal market, has been causing trouble. The leading local dealers have decided, therefore, to keep their mechanics employed steadily on the assembly of new mounts.

An idea of delivery difficulties can be obtained from a single citation. Percy A. McBride, a local distributor, had a bicycle shipment from an American factory on order for delivery last December. He received the shipment this month, exactly eight months after the promised date.

"I am very glad to get the shipment at this late date, however," said McBride. "I can still sell the wheels this summer."

DAN ALLAN RETIRES FROM ACTIVE BUSINESS

TORONTO, Ont.—Dan Allan, for many years one of the leading bicycle dealers of Hamilton, Ontario, has resigned his position as manager of the bicycle department of the Humphrey Motor & Bicycle Company, Limited, Toronto, wholesale jobbers, on account of ill health. Allan has made no plans for the future.

The Humphrey company will, in all probability, continue to represent the Great Western Mfg. Co. in all Canada again next year.

MILITARY RIDERS WIN AT CENTRE ISLAND

TORONTO, Ont.—The cyclists' section of the 109th Regiment covered itself with glory in athletic endeavors at the regimental picnic held at Centre Island, Toronto, on Saturday, August 19. The military wheelmen, a number of whom are expert racing men, made a name for themselves by capturing most of the individual contests while the riders also won the tug-of-war competition and the feature baseball match from teams representing other portions of the unit. The cyclists were in the charge of Sergeant G. L. MacKay, former chairman of the racing board of the Canadian Wheelmen's Association. MacKay himself won several prizes in special competitions. The riders practically cleaned up in all the races at the meet.

On the previous Sunday the cyclists of this regiment took part in a number of swimming races, with the result that Norman Webster, the best sprint racer remaining in Canada, was acclaimed the champion swimmer in the regiment.

TORONTO CYCLIST CORPS ACTS FOR MOVIES

TORONTO, Ont.—The members of the Divisional Cyclist Corps now training in Toronto for service overseas, recently enacted a sham fight for the benefit of a camera man representing a pictorial weekly. The riders, about forty in number, engaged in reconnaissance work through a stretch of rough country and, after a sprint, came into contact with an imaginary enemy when the wheelmen got down to the business of fighting. The picture arouses intense interest in spite of the comparatively small number of participants.

OPENS MESSENGER SERVICE

TORONTO, Ont.—Sam McCulla, formerly an employe of local dealers, has hung out his own shingle. Investing in a Harley-Davidson and sidecar of the delivery van type, McCulla has opened a motorcycle messenger and delivery service with headquarters at 3½ Edward street. He has also installed facilities for repair work on both motorcycles and bicycles.

START BRISK READING-STANDARD CAMPAIGN

SAN FRANCISCO, Cal.—Hopkins & Alzina, managers of the new Reading-Standard branch in San Francisco, have just sent out a formal announcement to the trade, and are anxiously awaiting their first shipment of R-S demonstrators, which is due here in a few days. As soon as it arrives they will begin an active selling campaign among the dealers.

APPEAL COMPANY'S FAST SALES

LOS ANGELES, Cal.—"Sales have been so rapid with us of late," said Sales Manager E. E. Welborn, of the Appeal Mfg. & Jobbing Co., "that we seldom see the motorcycles in our warehouse. When a carload of Harley-Davidsons comes in we simply classify the machines outside and hustle them right off to our sub-agents throughout the State. Our dealers have orders in hand for every motorcycle we can supply."

BANNER YEAR FOR CLEM AT UPLAND

UPLAND, Cal.—G. H. Clem, Harley-Davidson agent at Upland, sold more machines in the first half of 1916 than in the whole of last year. He had placed 16 new motorcycles up to July 1. Clem is now giving much attention to sidecar prospects, and expects that 1917 will bring unusual sales opportunities for the third-wheelers.

HOW CRIPPLED TOURIST MADE CROSS-COUNTRY TRIP

Alfred LeRoy, Minus Both Legs and One Arm, Gives Interesting Data on His Journey From Los Angeles to New York; Had No Trouble At All and Best Day's Mileage Was 296; Has Driven 8,000 Miles Since April

NEW YORK, Aug. 21.—Alfred LeRoy, three-time transcontinentalist, who has just completed a no-trouble journey with this motorcycle combination from Los Angeles to the Metropolis, although minus both legs and his left arm, called at the office of **Motor Cycle Illustrated** today and gave some interesting sidelights on his latest cross-country trip. LeRoy is now using a 1916 Harley-Davidson with special control equipment for operating from the sidecar, and his passenger attachment is of Superior make, mounted on a 1916 Harley-Davidson chassis, with 1917 Harley-Davidson springs.

With this hybrid outfit LeRoy has covered 8,200 miles since April, and has never been held up for a repair or a replacement. His mileage in crossing the country was in the neighborhood of 4,700. He is using Pennsylvania Vacuum Cup tires, Duckworth chains, Bethlehem 5-point spark plugs and Bosch magneto. He also carries three Weed tire chains, and was very glad to use them on many of the roads of the Southwest. His Pennsylvania tires show comparatively slight wear and still contained Los Angeles air when he arrived in New York. LeRoy has two additional Vacuum Cup tires strapped on the back of his sidecar, but was not called upon to change the tires with which he started.

An Extensive Trip

LeRoy's trip started at Los Angeles, and from that point he proceeded to Needles and then to Ashfork, Ariz., and to Prescott, Phoenix, Tucson, Douglas and Bisbee. Then he struck out for El Paso, Tex., and went on to Albuquerque, N. M. He then passed through Las Vegas, Trinidad, Colo.; Denver, Dodge City, Kansas City, St. Louis, Chicago, Milwaukee, South Bend, Toledo, Cleveland, Pittsburgh, Jeanette, Pa.; Gettysburg, Philadelphia, Trenton and to New York City. He has not decided in which direction he will move now, but contemplates returning to California for the winter. He plans to start westward about October 1 and make the trip in 20 to 25 days.

LeRoy asserts that he could make the coast-to-coast run in 15 to 18 days without discomfort, if a sufficient inducement were offered, but he prefers to loiter along the way and make money by selling postcards of himself and his unusual outfit. When he settles down to business he is able in the larger cities to make as much as $10 a day by his postcard sales. He has no other means of defraying his expenses.

While in Milwaukee LeRoy visited the Harley-Davidson factory and states that he was given "the finest treatment you could imagine." He remained in Milwaukee three weeks. While there he got into conversation with a policeman and called the bluecoat who remarked upon the cripple's ability to get around on his little roller platform.

"You bet I can get around on it," replied LeRoy, "and I'll wager that I'm the only man in Milwaukee who can come up abrace you on a skate without being arrested." To appreciate the traveler's little joke it must be understood that LeRoy's stand is not much larger than an ordinary roller skate.

LeRoy managed to get across the Mexican line on his southwestern swing, and climbed out of his sidecar just to be able to say that he had been on Mexican soil. He had numerous brushes with constables, and speed sharps, on the way over and asserts that he never experienced difficulty in giving them his dust. In the Pennsylvania mountains he made the "flivvers" look foolish and even some of the six-cylinder cars had to take his pace when he hit the worst grades on second speed.

Special Fittings

The tourist has his Harley-Davidson equipped with the company's standard racing tank, which enables him to carry an extra large supply of gasoline, and in addition he has a tank built into the nose of his sidecar which can hold two gallons of gasoline and a gallon of oil for emergency use. He carries a large, specially-constructed trunk at the rear of his sidecar, and the outfit, complete with driver, scales about 750 pounds.

LoRoy picked up an apparently homeless dog in Albuquerque, with the idea of having company on the road, and a crew of Mexicans took after him with such energy that the sidecar outfit covered the next ten miles in eleven seconds,—or, at least, that's the way it seemed to LeRoy. He managed to keep the dog until he struck Milwaukee, using a chain leash sent him by the Weed chain folks, but at that point the canine tourist fell a victim to the white lights or the stuff that "made Milwaukee famous" and was not on deck when the eastward trip was started.

FEATHERWEIGHT CONQUERS THE "CHINA SLOUGH"

H. CAMERON of the Indian agency at Sacramento, Cal., performed what had locally been regarded as an impossible feat for a motorcycle by crossing what is known as the "China Slough" on a Featherweight Indian.

A number of heavy machines have tried to get across this piece of desert, but have invariably failed, and Mr. Cameron is the first to succeed with a light machine. The pictures show the character of the country which he had to contend with. His stunt serves to demonstrate the capability of the light machine for touring under very hard conditions.

SUBSTANTIAL REPAIR FOR A BROKEN GRIP

AFTER several months' use, or even sooner, the projecting ends of the grips on a machine begin to break close to the ends of the handlebars and become a nuisance in several ways. It is not always possible to obtain a new pair, so some temporary repair is desirable. If the grip is wound spirally with tire tape, beginning close to the knob at the end and finishing well toward the forward extremity, it will stay up under very hard service.

63 More Indians for U.S. Army

The importance of motorcycles for military service is now fully recognized by Army Officials, following an extraordinarily severe and exhaustive test on the Mexican Border.

All through this drastic ordeal motorcycles have proven highly efficient for scouting, patrolling, despatch riding, and many other indispensable services. Their endurance and stamina have been firmly and conclusively demonstrated beyond all question.

To confirm their official approval of the motorcycle, Army Officials have purchased 63 more Indian Motocycles, with tandem and sidecar equipment—a splendid tribute to the meritorious service rendered by Indians on the Border. This is one of the largest Army Orders ever placed.

Sturdiness of construction, the unfaltering dependability of the Powerplus Motor, along with genuine service, brought to the Indian Motocycle this well-earned reward.

OKAY MOTOR DRIVES FRONT WHEEL

New Two-Stroke Powerplant Is Mounted on Front Forks of Bicycle With Grooved Pulley Acting Direct on Tire

First Picture Published of Okay Motor Fitted to Bicycle—Note Compactness of Outfit Which Scales 18 Pounds—A. L. Woodruff Is Riding This Machine Through the West

BROOKLYN, N. Y.—The latest comer in the field of motor attachments is "Okay," produced by the Okay Motor Mfg. Co., of 713 Flatbush avenue, this city. It is of the air-cooled two-stroke type, clamped to the front forks and driving the front wheel by friction on the tire. It is priced at $35 complete. It was shown at the Atlantic City convention of the Cycle Trades Association for the first time.

The motor has a bore of two inches. The piston is fitted with a single ring, which has been found ample to hold compression in a motor of this size. The cylinder is of the one-piece type, bolted by the flange to a two-piece crankcase. The crankshaft is counterbalanced and has one long main bearing, thus reducing the possibility of leakage of the mixture through the bearing from the crankcase interior. No muffler is fitted, the exhaust pipe being flattened at the end to break up any sound waves due to the action of the motor. A muffler has not been found necessary on this motor.

Gasoline is carried in a tank on the side of the motor, the capacity being one-third of a gallon. The weight of the tank balances that of the crankcase, while the outside flywheel is balanced by the weight of the cylinder casting. The filler cap of the tank is fitted with a tube which acts as an oil measure when inverted. One filling of the cap gives the proper proportion of oil for a tankful of gasoline. It will be seen by this that the lubrication is by the induction system.

The fuel is vaporized by a special mixing valve. There is a shut-off valve between the mixer and the fuel tank. Ignition is by battery and coil, the source of ignition—three dry cells of standard size—being carried with a high tension coil in a metal box attached to the seat mast tube. By carrying the batteries and coil in this position the weight is more evenly distributed and the parts of the bicycle are not subjected to undue strains.

Speed of the motor is controlled by a small finger lever on the left bar of the cycle. When this lever is moved to its extreme position, a compression release device is operated, allowing the motor to be started easily when the rider pedals the bicycle. Free engine position is obtained by lifting the motor pulley out of contact with the tire, a wire control being fitted for the purpose. The motor can be speeded to 2,000 revolutions per minute and will travel on the road at from 22 to 25 miles per hour.

Agents Being Signed

The Okay firm expects to turn out these motor attachments at the rate of 30 per day after December 1. A. L. Woodruff, of the Okay forces, is now starting on a Western trip with a bicycle fitted with this attachment for demonstration purposes. He has already made arrangements with A. Freed, San Francisco, Cal., to distribute the attachment on the Pacific Coast, Nevada, Arizona and the Pacific Islands. Territory is now being assigned to dealers.

FULLY DESCRIBES DAYTON MOTOR BICYCLE

DETAILED descriptions and attractive illustrations in black and colors, are to be found in the latest catalog of the Dayton Motor Bicycle, the product of the Davis Sewing Machine Company, of Dayton, O. All the parts are shown clearly and their operation described. In fact, the catalog also partakes of an instruction book, making it doubly valuable to the holder.

The front cover, reproduced herewith, shows that the handy little machine is favored by both sexes and depicts the pleasures of motor bicycling.

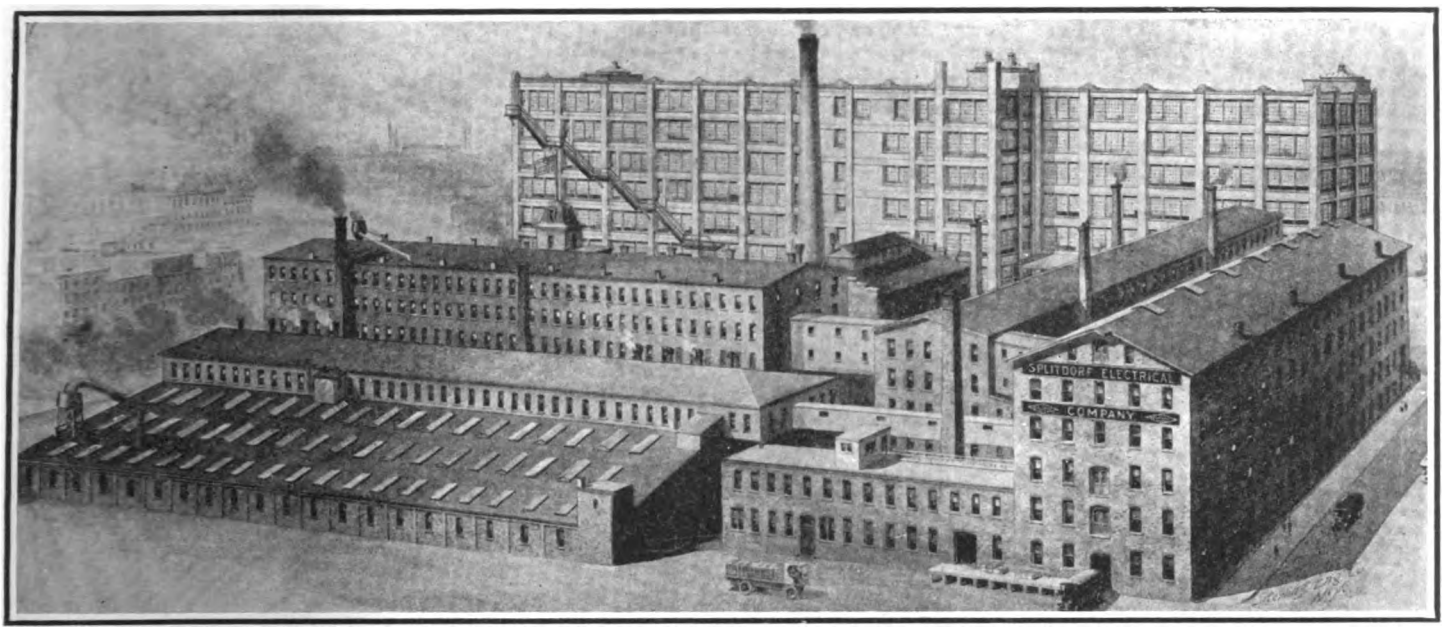
SPLITDORF EXTENSION NEARING COMPLETION

New Structure Will Have 115,000 Square Feet of Floor Area and Have Maximum Lighting and Ventilation Facilities—To Give Big Increase in Output



Mammoth Splitdorf Plant in Newark, N. J. The Addition Is Seen at the Rear

CONCENTRATED efficiency is the keynote of all manufacturing processes at the big home plant of the Splitdorf Electrical Company at Newark, N. J. This efficiency is not of recent growth, but has been insisted upon ever since the original company started in business many years ago. Following the amalgamation of the original and other concerns into the present Splitdorf company, the efficiency policy was continued to an even greater degree, and it is by reason of concentration in this direction that the firm has attained its present commanding position.

To keep pace with the efficiency idea, a large extension to the plant is now nearing completion. This building, which will be one of the best lighted factory buildings in this section of the country, is of reinforced concrete, fireproof throughout, and costing $200,000. More than 30,000 square feet of window glass will be used on all four sides to get the maximum of light and ventilation.

The buildings in the present plant will not be disturbed in any way by the new addition and will continue to be utilized for manufacturing purposes. The frontage of the new building will be 300 feet with a depth of 60 feet, giving a total effective floor area of 115,000 square feet. Welfare and convenience of the employees have been carefully considered, and an ell measuring 65 by 20 feet will carry completely equipped wash and locker rooms of the most modern type.

The present daily output of the factory is 1,500 magnetos and 8,000 sparkplugs, as well as numerous lighting and starting outfits. With the addition in operation this output will be hugely increased.

The executive officers of the Splitdorf Electrical Company are: J. V. Alvord, president; C. F. Splitdorf, vice-president; M. W. Bartlett, secretary; R. S. Preble, treasurer; C. W. Curtiss, general manager; W. J. Murray, assistant general manager, and Dan R. Walls, advertising manager. The sales department is under the direction of Mr. Bartlett.

The engineering staff consists of Dr. R. H. Cunningham, with C. T. Mason, A. D. T. Libby, George Lang and H. E. Broegger.

SWEDISH RACES CAPTURED BY INDIAN SPEEDSTERS

THE Indian motorcycle made a clean sweep of the Swedish championship motorcycle races held in a southern province the latter part of June.

The course was around the border of the Province of Seania, Sweden, over the rugged roads so frequently found in that country. The distance for the two classes was 200 miles. Class 1 included all machines of 7½ horsepower, and the first three places were captured by Indians. Wessberg, of Trelleborg, finished first, and was followed by Alfred Anderson, of Hoganas. The third place was captured by Wiggo Welin, of Halsingborg. The leading European makes, as well as several other American makes, were represented. All of the Indian riders rode 1916 stock Indians with Powerplus motors.

In Class 2, for machines of 4 horsepower, the Indian again scored. John Agren, of Eslof, finished first in this event.

Special recognition was extended the winners by the Indian representatives in Sweden, Messrs. Wiklund of Stockholm.

MESINGER AGAINST PRICE CUTTING EVIL

NEW YORK.—Another manufacturer who has adopted a strong attitude on the question of price-cutting is the H. & F. Mesinger Manufacturing Co., maker of the well-known air cushion and other brands of bicycle and motorcycle saddles, at Austin Place, this city. President Henry Mesinger, of the company, says that under no circumstances will his firm deal with any houses addicted to the price-cutting habit.

"Furthermore," says Mr. Mesinger, "we wish it understood that we will not do business with any house cataloging Mesinger saddles at less than list prices."

EMBLEM HELPS CURB SPEEDERS

SCHENECTADY, N. Y.—Nine violators of the motor vehicle law were arrested on the Schenectady-Albany road last Sunday when Constable John S. Crooks, riding in a Rogers sidecar which was hooked up to an Emblem motorcycle and piloted by A. P. Strogonoff, patrolled the district. The crew of the sidecar combination was forced to do better than 50 miles an hour in some cases to overhaul the nine troublesome speeders.

HAMILTON IN PROVIDENCE

G. H. Hamilton, connected with the Federal Rubber Company, while passing through New England, stopped in this city a day with B. A. Swenson, Providence, R. I. While here he met William S. Edwards, 79, who is the oldest motorcycle enthusiast in Rhode Island.

The Club Bulletin Board

'FRISCOITES ENJOY RUN TO GUERNEVILLE

SAN FRANCISCO, Cal.—About twenty members of the San Francisco M. C. took part in the recent run to Guerneville. Practically all the participants were seasoned riders, for the party was on the road most of the day and the surfaces traveled were not any too good. The start was made early in the morning, the main body reaching Guerneville at 11:30, after passing through Petaluma and Santa Rosa. Dinner was had at the hotel, after which the whole party went swimming. On the return trip, the riders strung out to avoid dust and reached Sausalito, catching the 9 p. m. boat for this city.

A large crowd is expected for the next run—to Martinez via Port Costa, and quite a lot of Vallejo M. C. members expect to take part in the run. A run to Folsom is to be held on September 3 and 4 for all the Bay District clubs.

OUTING CLUBSTERS FORM KANSAS CITY M. C.

KANSAS CITY, Mo., Aug. 16.—Misunderstanding over the name Indian Outing Club of Kansas City caused the members of the club to resign in a body and form the Kansas City M. C. a few days ago. The new club has 53 members, all F. A. M. The officers elected are as follows: C. E. Whitcomb, president; G. H. Putman, vice-president; U. U. Smith, second vice-president; George Cabines, secretary-treasurer.

The Kansas City M. C. will hold an official F. A. M. endurance run on September 3 and 4. More than $50 in prizes will be awarded to the contestants in the affair. There will be much competition, it is believed, as members are being drawn from all the surrounding suburbs.

PATERSON M. C. CHANGES RUN SCHEDULE

PATERSON, N. J.—The run of the Paterson M. C. slated for Glen Island, N. Y., this Sunday, has had its destination changed to Atlantic Highlands, N. J. The club officials will have as their guests the Stockholm M. C. of Stockholm, N. J.; the Hackensack M. C. and the New Jersey M. C. of Newark.

RHODE AGAIN HEADS READING M. C.

READING, Pa.—William L. Rhode, who was president of the Reading Motorcycle Club, 150 strong, in 1915, was elected for a half year to succeed Frank Neidig, resigned. Mr. Neidig retired when but little more than half of his term was ended. Mr. Rhode was selected as the most experienced man and the best organizer available in this emergency. He will serve until January. The club is growing and its membership will be doubled by the end of the 1917 season, it is expected.

Mr. Rhode is in business on Cherry street, near Seventh, under the firm name of L. A. Rhode Estate. He has been chairman of the competition committee of the club and has been one of its most active members.

ON NEW ENGLAND OUTING

PORTLAND, Me.—The Spindle City Motorcycle Club, of Lowell, arrived in this city a few days ago, after a tour through the White Mountains. The Lowell riders made a circle up through Concord, N. H., to the White Mountain region, side trips being made to many points of interest. In the party were Charles W. Phelps, Capt. R. Hoyle, J. Blackstock, J. P. McGorin, Augustus Sustafson, Frank McGorin, Joseph Avila, Charles Lorigan, E. Porter, Earl Actos, and A. Lundgres. Several sidecar combinations were included in the party.

BRASS CITY M. C. RUNS

WATERBURY, Conn.—The Brass City M. C. has completed plans for a run to Holyoke and Mount Tom on Sunday, August 20, and for an outing to New York and Coney Island on Saturday evening, August 26, and the following day.

F. H. Salisbury has resigned as president of the club, due to pressure of business, and Vice-president A. L. Stanton has been selected to fill the vacancy. E. L. Mix is the new vice-president. The club's roster now shows thirty-six active members.

A TRIPLE-JOINTED RUN

WHEELING, W. Va.—A recent run of the Wheeling M. C. was conducted on a somewhat unusual basis. Using the clubrooms as a starting point, the riders made a trip to a point 7½ miles up the River Road, and then returned. Following the ished the boys made another 7½-mile run out the National Pike, returning to the clubhouse to wash up and discuss their experiences.

Looking Down the Stretch

August 26, Providence. R. I.—Annual picnic given by B. A. Swenson to Indian riders, Palace Gardens.

August 26, Dayton, O.—Meet of Interstate Racing Association.

August 27, Toledo, O.—Interstate Racing Association meet.

August 27, Chicago, Ill.—Tour of Chicago Sidecar Club to Joliet.

September 6, Wheeling, W. Va.—Thirty-mile road race of Wheeling M. C.

September 10, Chicago, Ill.—Tour to Aurora and Elgin of Chicago Sidecar Club.

September 16, Dayton, O.—Race meet of Dayton M. C.

September 16, Dayton, O.—Meet of the Dayton M. C.

September 17, Detroit, Mich.—Fourth meet of the Detroit Motorcycle Dealers' Association.

October 1, Providence, R. I.—Annual Triangle Run, Providence-Boston-Providence, of M. C. of Rhode Island. B. A. Swenson in charge.

October 1, Toledo, O.—Race meet of the Interstate Racing Association.

October 8, Detroit, Mich.—Race meet under auspices of Detroit Dealers' Association.

October 8, Toledo, O.—Race meet of the Interstate Racing Association.

F. A. M. Doings

TWO MORE GET MEMBERSHIP PRIZES

WESTBORO, Mass.—Secretary G. B. Gibson, of the F. A. M., announces that membership prizes for the weeks of July 31-August 6 and August 7-13 have been awarded to John W. Kolb, of Philadelphia, Pa., and H. Carlisle Stewart, of Huntington, W. Va. Kolb sent in four applications, the greatest number sent in during the period mentioned, while Stewart sent in 25.

NEW SHOP REGISTERS

FORT WAYNE, Ind.—The Ideal Motorcycle & Supply Company, of 122 East Columbia St., has registered with Secretary G. B. Gibson as an F. A. M. repair shop. The proprietor is H. G. Schlink.

CLUB RE-AFFILIATES

WESTBORO, Mass.—Secretary-Treasurer G. B. Gibson reports the re-affiliation of the Huntington M. C., of Huntington, W. Va. There are 27 members, all 100 per cent F. A. M. The secretary is H. C. Stewart, of 617 Ninth street, that city.

ANOTHER RECORD GOES TO McNAMARA

Australian Takes 15-Mile Race and Breaks Former Record for the Distance—Spill Mars "Miss and Out"—Egg Badly Injured

NEWARK, N. J., Aug. 21.—Reggie McNamara, the Australian, and his fellow countryman, Bob Spears, were the bright shining lights at the Velodrome meet yesterday afternoon. McNamara won both the 15-mile open race, incidentally breaking the record for the distance, and the "miss and out" race, while Spears had his opportunity to shine in a match race with Frank Kramer, the champion, when he took the latter into camp in the second and third heats after Kramer had won the first.

The "miss and out" race was marred by a big spill about half-way in which Oscar Egg, John Bedell, Alfred Grenda, Harry Kaiser, Lester Bowker, Martin Ryan and Eddie Root went down. Egg was the one to suffer in the scramble, the Swiss receiving a bad cut in the right leg which necessitated three stitches to close. The others escaped with minor bruises and the usual shaking up. After the scrimmage McNamara had things his own way and won handily from Jake Magin and Gordon Walker.

Mac. Smashes Record

It was in the 15-mile open that McNamara put up a wonder ride and smashed a record that stood for two years. At over a half-mile to go, Charley Piercey, the Australian, and Marcel Dupuy, the Frenchman, got a break on the field, opening up a big gap. Piercey weakened, however, two laps from home and Dupuy went out alone. Jackie Clark was instrumental in bringing the field up almost to Dupuy, Jackie giving Alfred Goulet a pull. At the bell Dupuy still had 30 yards advantage, but McNamara and the rest of the field passed the Frenchman on the back stretch, the strong Australian finishing a winner in 31:28 2/5, taking the record and the last claim to fame held by William Morton, the Harrison, N. J., rider, who made the former mark of 32:03 2/5, Aug. 23, 1914.

Frank Kramer and Bob Spears met in a match at a mile and when Kramer won the first heat his friends figured his chances in the second heat just as bright, making a third heat unnecessary. Spears, however, torpedoed all the hopes of the Kramer adherents in the second heat when he went around Kramer on the last banking going into the back stretch Kramer being forced to trail home lengths back. In the third heat Spears elected to ride the last lap from the front. Kramer tried to get by the Australian on the back stretch, but the latter had too much speed and won by a length.

Spencer Retains Brassard

Arthur Spencer, the Brassard holder, scored his seventh win in the race for the weekly meal-ticket armlet, when he defeated Alfred Goullet, the Australian, scoring his second win over Goullet in this race.

William Spencer Turns Pro.

Tom Bello, the Brooklyn Italian, and William Spencer, the Toronto amateur, were the winners of the simon-pure events. Bello won the half-mile handicap from the 40-yard mark and then finished second to Spencer in the two-mile open. Spencer after winning the latter race made his professional debut in the 15-mile open, but

Fred M. Sanborn Starting from City Hall, New York, on Record Ride to Chicago

his efforts in his last amateur race were too much for him and he retired in the fifth mile in his first pro. race. Summaries:

Half-mile handicap, amateur—Won by Tom Bello, Brooklyn (40 yards); second, Chris Dotterweich, Newark (35 yards); third, Ben O'Sicky, Cleveland (60 yards); fourth, Charles Fitzsimmons, East Orange (80 yards). Time, 53 seconds.

Two-mile open, amateur—Won by William Spencer, Toronto; second, Tom Bello, Brooklyn; third, Jerry Nunziata, Brooklyn; fourth, Edward Byron, Australia. Time, 4:08⅗.

Australian team pursuit race—Edward Byron, Australia, and John L. Staehle, Newark, vs. Ed. J. Carroll, San Francisco, and William Spencer, Toronto. Won by Staehle and Byron. Time, 4.02⅕. Distance, 1 mile and 1,539 yards.

One-mile Brassard race, professional—Arthur Spencer, Toronto, vs. Alfred Goullet, Australia. Won by Spencer. Time, 3:04⅗. Last eighth-mile, 12¼ seconds.

One-mile match race, professional—Bob Spears, Australia, vs. Frank Kramer, East Orange. Kramer won first heat, Spears second and third. Times, 2:55¼, 2:50⅗ and 2:52⅘, respectively. Last eighth-miles, 12⅖, 12⅗ and 12 seconds, respectively.

One-mile handicap, professional—Won by Eddie Madden, Newark (70 yards); second, Willie Hanley, San Francisco (85 yards); third, Frank Corry, Australia (70 yards); fourth, Eddie Root, Boston (90 yards). Time, 1:58⅘.

Miss and out, professional—Won by Regie McNamara, Australia; second, Jake Magin, Newark; third, Gordon Walker, Australia; fourth, Frank Corry, Australia. Time, 8:05⅘. Distance, 3⅗ miles.

Fifteen-mile open, professional—Won by Reggie McNamara, Australia; second, Frank Corry, Australia; third, Jake Magin, Newark; fourth, John Bedell, Long Island; fifth, Alfred Grenda, Australia. Time, 31:28⅖.

TWO MORE WINS ADDED TO KOCKLER'S STRING

CHICAGO, Ill., Aug. 20.—Two more wins were credited to Ernest Kockler the two-time winner of the city championship, at the Riverview Velodrome last night. Kockler entered only two races at the track and accounted for both of them in handy style. In the two-third mile open the champion defeated Arthur Van der Palt, the Belgian, and Jules Arens, a member of the Logan Square Cycling Club, in that order, and in the five-mile open he again finished ahead of Van der Palt Egisto Davini, the Italian, being the third man across the tape.

Oscar Sachse, another Logan Square club rider, accounted for the two-mile handicap, beating Carl Stockholm, Swedish-American C. C., and Andrew Andresen Conquer C. C., in the order named. Henry Henriksen and Herman Hoffman won the one-mile open and the one-mile invitation, respectively. Summaries:

Two-mile handicap, amateur, class B and C—Won by Oscar Sachse; second, Carl Stockholm third, Andrew Andresen. Time, 4:07⅗.

Two-third-mile open, amateur—Won by Ernest Kockler; second, Arthur Van der Palt; third Jules Arens. Time, 1:51⅗.

One-mile open, amateur, class B and C—Won by Henry Henriksen; second, Carl Stockholm third, Oscar Sachse. Time, 2:23.

One-mile invitation, amateur—Won by Herman Hoffman; second, Nick Becker; third, Ed Arens Time, 2:23⅘.

Five-mile open, amateur—Won by Ernest Kockler; second, Arthur Van der Palt; third, Egisto Davini. Time, 11:40⅘.

SANBORN COVERS 146 MILES FIRST DAY OUT

KINDERHOOK, N. Y., Aug. 21.—Fred M. Sanborn, the Baltimore cyclist who is attempting to establish a mark between New York and Chicago on an Emblem bicycle, arrived here last night at 7:30 p. m. Sanborn left the City Hall in New York City at 5:46 yesterday morning and his first day's trip netted him 146 miles his route carrying him over roads which were being repaired, necessitating his walking part of the distance. Sanborn's schedule calls for the trip to be made in six or seven days. Sanborn's mount is fitted with Goodrich tires and Persons saddle.

WOISIN WINS AT CELTIC PARK

NEW YORK, N. Y., Aug. 21.—Fred Woisin, a member of the Acme Wheelmen accounted for the three-mile open bicycle race at the Eccentric Firemen's games at Celtic Park yesterday afternoon. George Laux, Empire City Wheelmen, finished second, and John De Bruyn, Acme Wheelmen third. The time was 9:02 2-5.

Digitized by Google

SIXTY-THREE RIDERS IN BAYONNE RACE

Carey, of Hudson County Wheelmen, Captures Fifteen-Mile Event, with U. S. I. Man Second—Course Well Policed

BAYONNE, N. J., Aug. 21.—John Carey, Jr., a member of the Hudson County Wheelmen of New Jersey, riding from the four-minute mark, won the 15-mile handicap road race staged by that club yesterday morning over the Hudson boulevard course. Carey covered the distance in 42:15. C. Fontana, riding under the colors of the Unione Sportiva Italiana, who started with Carey, finished a fifth of a second back of the winner. Sixty-three riders started out of an entry list of 88, while eight post entries were received at the starting point.

Event Well Staged

The race was an exceptionally good one and the course was well policed, the crowding, which hampers the officials and contestants alike, being lacking to a marked degree. The work of the officials was also an excellent feature of the contest, there being no tedious delay in figuring the places and the times. The referees were called upon to disqualify but one rider, C. E. Benton, a member of the promoting club, who crowded and switched other riders at the finish.

Displaying a fine winning sprint, Carey led a big part of the field in the last dash for the Pierce light racer and Persons saddle, which was up for first prize. Fontana and his team mate, A. Ferrer, followed Carey across the line almost together, the former getting the judges' verdict. Ed Schwaner, of the Brooklyn Wheelmen, finished fourth, and Louis Kali, an unattached rider, ran fifth.

Marquard Wins Time Prize

John J. Marquard, riding for the Century Road Club Association, led the scratch men home in the sprint at the finish and won the time prize. Fred Woisin, Acme Wheelmen, won second time prize, while Nelson Johnson and Jerry Nunziata, two U. S. I. riders, annexed third and fourth time prizes, respectively. Eugene Aickelin, New England Wheelmen, was the last scratch man to finish, Aickelin finishing back of Nunziata.

In the club competition for the Goodrich trophy, the Unione Sportiva Italiana carried off the low score for five-man teams with a total of 31 points. The Acme Wheelmen, with a score of 67 points, finished second, and the C. R. C. A. third with 88 points. The Hudson County Wheelmen were tied with the C. R. C. A. until Benton was disqualified, the penalty giving them an extra four points. An extra prize for the first two-minute man to finish was won by John Weir, of the Salem-Crescent Club. Summaries:

CHINESE GENERAL IS MOTOR WHEEL FAN

MILWAUKEE, Wis., Aug. 22.—A very interesting letter was received by A. O. Smith Company from Honolulu, Hawaii, written by William F. Mannix, who is on a tour around the world. He says that the present chief executive of China, General Li Yuan Hung, is an ardent Smith Motor Wheel "fan." He rides the motor wheel everywhere his duties call him, and at present has it with him in the "Forbidden City" at Peking. This is the first article of the kind that has been permitted within the walls of the "Forbidden City." General Li Yuan Hung is an engineer of exceptional ability. He has investigated the Smith Motor Wheel with the view of adopting it for army use.

Martin Flossinger, Expert Repairman on Victola Motors for Nebraska Cycle Co., Omaha, Ready for a Trip with His Smith Motor Wheel

CENTURY'S PLAN TO STAGE POSTPONED RACE

NEW YORK, N. Y., Aug. 23.—On Sunday, September 17, the Century Road Club of America will stage its handicap bicycle race, which had been originally scheduled for June 4 over the Floral Park, L. I., course. On account of the fatal accident to Joe Napthal late in May on the latter course, the club officials were forced to call the race off on account of the authorities refusing to grant a permit.

The race on September 17 will be held over the Pelham Parkway in the Bronx and will be at ten miles instead of 25 miles, as was first scheduled. Over 50 prizes have already been donated. Entry blanks and all other information can be secured from William Gold, 344 Third avenue; L. A. Fraysee, 439 West Seventeenth street, or William Muller, 1212 Leland avenue, Bronx.

SUTCLIFFE TEAM CHAMPS

LOUISVILLE, Ky.—The team of the Sutcliffe Co., bicycle and sporting goods dealers, has copped the pennant in the Saturday Afternoon League this season. The team won ten out of its first eleven starts, giving them a substantial lead.

LIVE CLUB IN FREEPORT, ILL.

FREEPORT, Ill., Aug. 22.—This city boasts of a real live cycling organization in the South Side Bicycle Club. The officials of the hustling combination are constantly planning new features in the shape of runs and entertainments.

RACE AT VOLUNTEERS' PICNIC

SAN FRANCISCO, Cal., Aug. 20.—A one-mile bicycle race will be staged at Shellmound Park, Sunday, Sept. 17, at Co. A, Irish Volunteers' picnic. Merchandise orders will be given first, second and third.

DALLAS DEALERS TO FORM ASSOCIATION

Bicycle and Motorcycle Dealers in Texas City Plan to Promote Races and Boost Cycling Generally—All Dealers Join Movement

DALLAS, Tex., Aug. 21.—Bicycle and motorcycle dealers and supply men of Dallas are planning the organization of an association to promote bicycle and motorcycle racing in this section, as well as to stimulate interest in cycling in general. A petition has been circulated among the dealers and twenty-two signatures have been affixed—not one man to whom it was presented having declined to sign it—calling for the organization of the Dallas Cycle Dealers' Association. A meeting is to be held at an early date when final details of the organization will be perfected and permanent officers will be chosen. J. O. Stannage has been proposed as president of the organization.

Plan Numerous Races

It is also planned to hold a series of bicycle and motor-wheel races at the Dallas Fair Park course under the auspices of the new association. Liberal cash purses would be raised among the dealers for the winners in these races and it is believed that great interest in cycling will be thus aroused.

Local bicycle, motor wheel and motorcycle dealers who have signed the petition for the organization of the Dallas Cycle Dealers' Association are as follows: Cortines Supply Company, Hans Johnson Company, George Hoehn, Smith Motor Wheel, Charles Ott, T. H. Savage, Cullum & Boren, Guarantee Cycle Company, D. E. Willingham, E. W. Hillpot, J. N. Byers, O. W. Allen, W. A. Williams, Larsen Cycle Company, H. H. Phillips, A. Amendson Cycle Company, A. R. Schleicher, F. H. Masters, W. W. Cunningham, C. T. Savage, Harry C. Schutt Company, Dallas Sporting Goods Company and D. E. Roberts.

BATTLE OF THE "RHINE" ON WATERMELON RUN

SAN FRANCISCO, Cal., Aug. 20.—Nineteen members of the New Century Wheelmen held their annual "watermelon run" to a nearby beach last Sunday. Enroute the cyclers stopped at the Golden Gate Park stadium, where two races were staged. "Chick" Spence, the youthful mascot of the club, won the juvenile race by nearly 200 yards. In the pursuit match the team of Welch, De Brie and Castillo caught the Hammit-Spence-Rhodes combination in a little over six miles, the first five miles being covered in 13:12. Arriving at the beach the annual battle of the "rhine" was fought with Captain Hammitt's "army" getting the best of the argument.

NORGAR AND LUHFER ON OHIO TITLE RACE

CLEVELAND, O., Aug. 21.—A preliminary race meet was staged at the old North Randall track yesterday to select two riders to represent this city in the State championships at Columbus, Wednesday, Aug. 30. The tryout was run over the five-mile route. Ed Norgar and Al J. Luhfer qualified by running first and second, Norgar getting the verdict by a half-length. The time was 17 minutes, the slow time being caused by a stiff wind on the backstretch.

LINART ANNEXES GOLDEN WHEEL

BOSTON, Mass., Aug. 23.—Victor Linart, the Belgian, repeated his performance of last year in the Golden Wheel race when he annexed that classic last Wednesday night. Linart was opposed by Vincent Madonna, the Providence Italian; Clarence Carman, Long Island, and Leon Didier, France, and they finished as named. The time of the race was 1:10:59⅕.

Fred Fesselmeyer, New York City, Mounted on His Dayton Motor Bicycle

POINT BREEZE FEATURE IS SENSATIONAL ONE

PHILADELPHIA, Pa., Aug. 20.—Handicap motor-paced racing featured the regular card of racing at the Point Breeze track last night. The event was a 50-mile race with Clarence Carman, paced by Jimmy Hunter, on the honor mark. Bobby Walthour, the Atlanta veteran, was given 1⅓ miles start, while Menus Bedell, Long Island, and Martin Ryan, the Newark Irishman, were allowed 3⅓ and 5 miles, respectively, over the Jamaica, L. I., rider.

Ryan Holds Lead

Ryan managed to stay in the lead until the 20-mile mark was reached, when he gave way to Bedell, who led until the 38th mile, when Walthour assumed the premier position. The Atlanta veteran led until within a few laps of the finish, when Carman, coming with a rush, passed him and won in a most sensational manner. Carman was timed for the distance in 59:58 4-5, which is the fastest ever negotiated at the local track for the distance by almost two minutes.

KLEVER IS FIRST IN GLENWOOD SPRINGS ANNUAL

GLENWOOD SPRINGS, Colo.—Despite a driving rain, fourteen riders started in the nineteenth annual bicycle road race over a twenty-mile course from Basalt to Glenwood Springs last Sunday. All riders who started finished. The road on which the race was run parallels the railroad track and a special train carrying spectators accompanied the racers.

Grand Junction riders won both time and place honors. The results were as follows: Floyd Klever, first; Paul Knight, second; Lloyd Wixon, third. Place winners were: Klever, first; Wixon, second; Clarence Rhodes, third. Time, 1 hour, 30 minutes.

FAST TIME MADE IN POINT BREEZE FEATURE

PHILADELPHIA, Pa., Aug. 22.—One of the most thrilling finishes seen at the Point Breeze track was that of last Saturday night between Clarence Carman, the Long Islander, and George Wiley, American paced champion, in the 40-mile paced race. George Colombatto, the Italian, and Leon Didier, the French paced star, also started, but they did not figure, the real issue being between Wiley and Carman. The Long Islander held the lead for almost the entire race, but Wiley came strong in the last two miles and barely lost out to Carman, the margin being about three yards at the finish. The time was 49:57. Colombatto finished third and Didier last.

RACE FOR BERGEN FAIR

HOHOKUS, N. J., Aug. 23.—A five-mile handicap bicycle race, which will be run in one-mile heats in case the entry list is large enough to run heats, has been added to the program of track sports at the Bergen County fair, Friday, September 1. Entries may be sent to R. W. Kennedy, 20 John street, New York City, or to Bergen County Fair Association, Hackensack, N. J.

ESTERBROOK BUYS STORE

HARRISBURG, Pa., Aug. 22.—Harry F. Esterbrook announces the purchase of the Dayton Cycle Company, 1 North Third street, from Ida S. Hoover. The Dayton line of bicycles will be featured by Esterbrook, who will make considerable improvements to the store and states that he will conduct his newly-purchased business along aggressive selling lines.

MOTOR WHEEL TO WASHINGTON

BROOKLYN, N. Y., Aug. 22.—O. L. Mabey and A. J. Attison, of this city, will ride Smith Motor Wheels to Washington, D. C., and back, leaving here September 6. The distance is 250 miles each way, and the cross country riders will seek a leisure sightseeing trip more than a steady run.

JOHNSON IN NEW QUARTERS

DENVER, Colo., Aug. 19.—The Johnson Cycle Company, of this city, has moved from 1736 Champa street to 1942 Welton street. A successful stock-reducing sale was held just prior to the moving into new quarters. The new store of the concern is larger and better in every way.

RECORDS SHATTERED IN SIX-DAY RACE

Seventeen Teams Start in Modified "Grind" at Newark Velodrome—Goullet and Grenda Win First Sprint—Clark Puts Up Good Ride

NEWARK, N. J., Aug. 22.—Two records went by the boards in the modified six-day race that started last night at the Velodrome. The records that were sent into oblivion were those for the one and two-hour marks in team racing. Seventeen teams started in the race including Champion Frank Kramer and Jackie Clark, Alfred Goullet and Alfred Grenda, Robert Spears and Reggie McNamara and Eddie Root and William Spencer.

Lap money and sprints for intermediate money kept the field going along at a great rate. The second-string men went after the lap money and Fred Hill, Francesco Verri, Alfred Grenda, Charley Piercey and Frank Corry each won one $5 bill at the five mile posts, Eddie Madden and Hans Ohrt gathering two of the currency slips. During a jam preceding the sprint for the 20-mile station the team of Georgi and Schlee lost a lap.

In the first hour the leaders had covered 27 miles and 660 yards, the former six-day record being 25.6 miles. In the two hours the leaders had covered 54 miles and 587 yards as against the former record of 50.2 miles. The 50 miles was covered in 1:51:-22 2/5.

Punctures kept the trainers, generally a peaceful lot, in a rather peeved state, but the riders managed to get finished for the night, but the trainers will be busy today fixing tires. Kramer and Clark were the most unfortunate pair in the race, both of them using up about a dozen tires.

Finish Is Hot One

The sprint at the finish of the two-hour modified "grind" was about as hotly contested as any long race at the local track. No changes were to be allowed after the last five minutes, but just as Clark was ready to relieve Kramer his tire gave way and he was forced to start later. Goullet, finishing for his team, took the lead at the bell and managed to stay in front until the tape was crossed. Clark, putting up a wonderful ride, came from a bad position and finished second. Hanley and Madden finished third, Cameron and Kaiser fourth and Magin and Hill fifth.

50-MILE TEAM RACE STAGED AT CHICAGO TRACK

CHICAGO, Ill., Aug. 21.—All the thrills and frills that go with a six-day race were furnished the patrons of the Riverview Velodrome last night. The management staged a 50-mile team race with a field of 18 teams. Ernest Kockler, the city champion, and Willie Kell, riding under the colors of the Mystic A. C., carried off first honors, while the team of Arthur Van der Palt and Peter Himschoot, accounted for second honors. The first and second team had lapped the field early in the race and did not have to compete in the Berlin finish, Kockler and Van der Palt riding a match race at a mile to decide the positions, Kockler getting the decision. The team of Peter Guidotti and Roy McWhirter finished third and Egisto Davini and Charles Minetti accounted for fourth place. Olaf Lodal and Andrew Andresen were the fifth team to finish and Henry Hoffman and E. Sachse finished in sixth place.

HERBERT BEATS WALTHOUR IN TITLE RACE HEAT

BOSTON, Mass., Aug. 22.—Fred Herbert, the Fall River paced rider, won the first heat of the paced championship at the Revere track last night. Herbert defeated Bobby Walthour, Atlanta; Charles Turville, Jr., Revere, and Menus Bedell, Long Island, in that order, over the 30-mile route in 43:20 4/5. Leon Didier, the Frenchman, met and defeated George Wiley, the champion, in a 15-mile paced match. The time was 21:41. Summaries:

Jackie Clark, Who Is Showing a Big Improvement in His Riding

Half-mile handicap, professional.—Won by Harold Rollins, Everett, 75 yards; second, Warren Holbrook, South Boston, 100 yards; third, Hugh McPartland, Boston. Time, 54 2/5 seconds.

One-mile handicap, amateur.—Won by John Fardig, Orient Heights, 20 yards; second, W. W. Cupit, Roxbury, 100 yards; third, R. M. Torey, Beachmont, 90 yards. Time, 2:02 4/5.

Five-mile open, professional.—Won by Tim Sullivan, New Haven; second, Paul Suter, Switzerland; third, Ned Chandler, Boston; fourth, Saxon Williams, Buffalo. Time, 11:22 3/5.

WILEY AND SERES VICTORS IN TEAM RACE

BOSTON, Mass., Aug. 20.—George Wiley and George Seres, riding as the American-French team, defeated Leon Didier and Victor Linart, the French-Belgian pair, in a 40-mile team race at the Revere Beach track last night. The time was 54:15 3/5. Wiley and Seres won in easy style, Didier and Linart being away back at the finish.

Saxon Williams, the Buffalonian, accounted for the five-mile open for the professionals from Fred Herbert, Fall River; Ned Chandler, Boston, and Pat Logan, South Boston, in 11:14 4/5. Charles Turville, Jr., accounted for the three-quarter-mile pro. handicap from the 130-yard mark. The two-mile open for the amateurs was captured by Fred McKenzie and O. W. Batchelder finished first in the half-mile amateur handicap from the 100-yard mark.

WILLIAMS WINS AT PLAINFIELD

PLAINFIELD, N. J., Aug. 21.—R. Williams, hailing from Rahway, won the 25-mile road race staged here Saturday afternoon by the Queen City Cycling Association. Williams had a handicap of six minutes and covered the course in 1 hour and 12 minutes. The time prize winner was F. Herbst, who covered the course from scratch in slightly under an hour and six minutes. One accident only occurred in the race, A. Grant hitting a wagon.

4,000 SEE CYCLE RACES

GREELEY, Colo., Aug. 19.—Last Monday afternoon at Island Park a number of sporting events were witnessed by 4,000 people. Two of the attractions were a one-mile and a two-mile bicycle race. The winners were: One-mile race, Clifford Blancy, first; Neil McKee, second, and L. E. Clark, third. Two-mile race, H. J. Brown, first; Joe Ruggles, second, and L. E. Clark, third.

TWO MORE RACES FOR 'FRISCO

SAN FRANCISCO, Cal., Aug. 20.—A three-mile handicap bicycle race has been added to the Labor Day exercises by the committee in charge. The race will start at 1:30, Tuesday, Sept. 5, and will be held at the Golden Gate Park stadium. A one-mile race will also be held at Shellmound Park, Sunday, Aug. 27, the sanction for the latter race having been granted by the California Associated Cycling Clubs.

MEXICAN FIELD PROMISING

WASHINGTON, D. C., Aug. 22.—American consular officials in Mexico have sent in some very optimistic reports regarding trade conditions upon the return of normal conditions in that country. Bicycles play an important part in the various reports and indications point to a lucrative field for American cycle manufacturers in that country.

12-HOUR RACE FOR CHICAGO

CHICAGO, Ill., Aug. 22.—Saturday night's racing at the Riverview Velodrome will be abandoned to make way for a 12-hour race on Sunday.

Varied Activities of the Dealers

BUSINESS IS BRISK IN KANSAS CITY CIRCLES

KANSAS CITY, Mo., Aug. 16.—The motorcycle business, which usually slows perceptively during the month of August here, has been more than keeping the dealers busy. Machines seem to be selling much more faster than they were in June, the dealers say, and the prospects are good for a bountiful fall business.

E. B. Saufley of the Saufley Supply Company says that the business has been very good indeed at his concern. A large number of Excelsior lightweights have been put out on the road, and it is nothing unusual to see them on the boulevards from one end of the city to the other.

Charles Hanson, the Indian dealer, says that it is his belief that there will be a number of motorcycles sold not only in the city but in the county during the fall of year. At the present time the weather has been very hot, but this has not had the usual effect of hampering the sale of machines.

Clarence Newby, of Newby Brothers, Flying Merkel, Thor and Henderson agents, is congratulating himself upon the success that has been met with the Henderson. Newby sold three machines of the big four type last week, which bids fair to be the largest sale made by any of the shops when the thermometer was around 105.

Fred P. Ames has been doing a nice summer business with the Emblem machines. "The lightweights have been selling nicely," Ames says, "and my only difficulty is in getting enough from the factory to supply the demand."

John Murray, head of the Silent Grey Fellows here, says that his business has been immense this season and that already the total sales for the summer are far in advance of those of last summer.

NOTES OF CYCLE TRADES IN LOUISVILLE, KY.

LOUISVILLE, Ky.—Local motorcycle dealers are greatly interested in the news from cities in the Mississippi valley that gasoline prices are dropping back to something like normal. The dealers figure that it will help sales this fall. The coming season is expected to be good, as factories are working full time and crop reports are encouraging.

ROY E. WARNER CO., Firestone representative, and dealer in a general line of motor accessories, has just announced securing the agency for Ford car, which will be sold for cash or on easy terms, and a new building is to be erected at once.

JOHN SCHNEIDER has opened the Schneider Auto Supply Co., at Twenty-sixth and Market streets, and will handle bicycles, bicycle, auto and motorcycle supplies.

COUGHLIN & CO. TAKE HENDERSON FOR BRONX

BRONX, N. Y., August 22.—Gene Coughlin & Co., of 922 Washington avenue, have signed up for the Bronx County distribution of the four-cylinder Henderson for the 1917 season. The agreement was signed with Factory Representative Felix Lewin yesterday afternoon. Coughlin & Co. will handle this make exclusively in Bronx County.

Gene Coughlin, head of the firm, is one of New York's pioneer riders and repairmen. He started in the trade in 1906 with T. J. Sixsmith, handling the Reading Standard, and was later connected with the metropolitan Reading Standard and Harley-Davidson agencies. As Bronx agent for the latter make in 1916 he disposed of 54 machines and 14 sidecars.

STEELE VISITS WIGWAM WITH PARTY

PATERSON, N. J.—John Steele, Indian man in this city, with his son Orrie, John Walton and R. W. McKensey, have just completed a trip from this city to the Indian factory in Springfield, Mass. Steele led the party through the Berkshires over night, making the trip in a little over nine hours.

BUYS DAVIS MOTOR CO.

HUTCHISON, Kan.—S. M. Johnson has purchased the business of the Davis Motor Company, at 24 Second avenue, West, and will continue to handle the Harley-Davidson machine. Johnson will call the shop the Harley-Davidson Motor Company.

PROVIDENCE DEALERS HAVE FINE SEASON

PROVIDENCE, R. I., Aug. 21.—Motorcycle dealers in this city are elated over this year's trading to this date, and all declare that sales to this time are ahead of a similar period last year.

B. A. Swenson, the Indian agent, asserts that never has he enjoyed so fruitful a business in this line as this year. He sold seven new motorcycles, several second-hand machines and two sidecars last week. He says his receipts to this time this year are bigger than they were for the whole 12 months of 1915.

Manager Burnett, of the Harley-Davidson Company, is also enthused over the output of his store. New and second-hand machines are being disposed of as fast as they can be procured, while the repair department is kept busy every minute. The firm is also having success in the accessory department.

Mr. Halliday, manager of the General Motorcycles Sales Company, which handles the Henderson and all makes of second-hand machines, is greatly pleased over the success he has had thus far, since entering the company as manager. He has recently placed two machines with the post office department and now has other prospects from large concerns and municipal corporations.

GOING AFTER HIGH-CLASS TRADE IS ART'S SPECIALTY

The Fact That Arthur Rochow, Excelsior Traveller, is After Quality Sales is Demonstrated By This Picture From Ravenna, O. Art. Has All His Forces Present

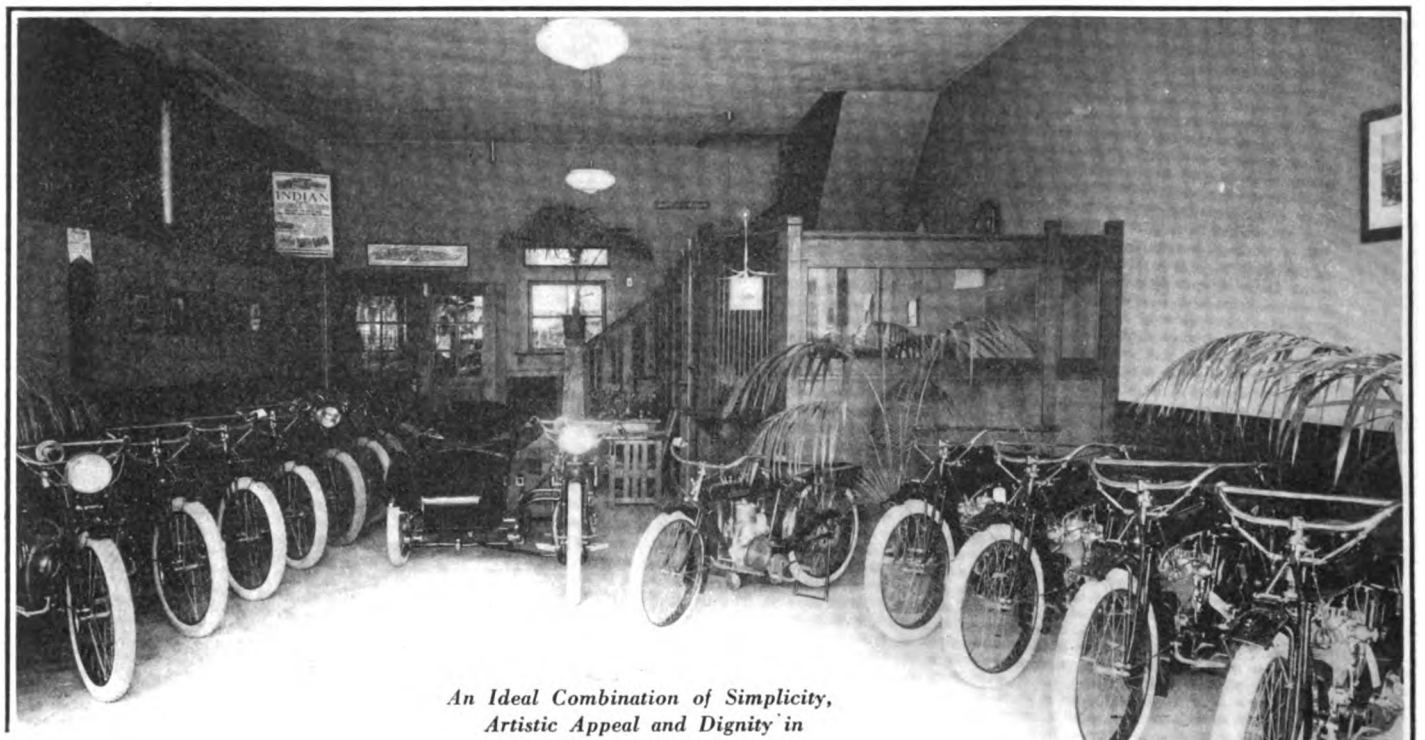
WHERE EFFICIENCY AND ATTRACTIVENESS COMBINE

Establishment of Boyd & Williams, in Denver, Is Operated on a Model Basis

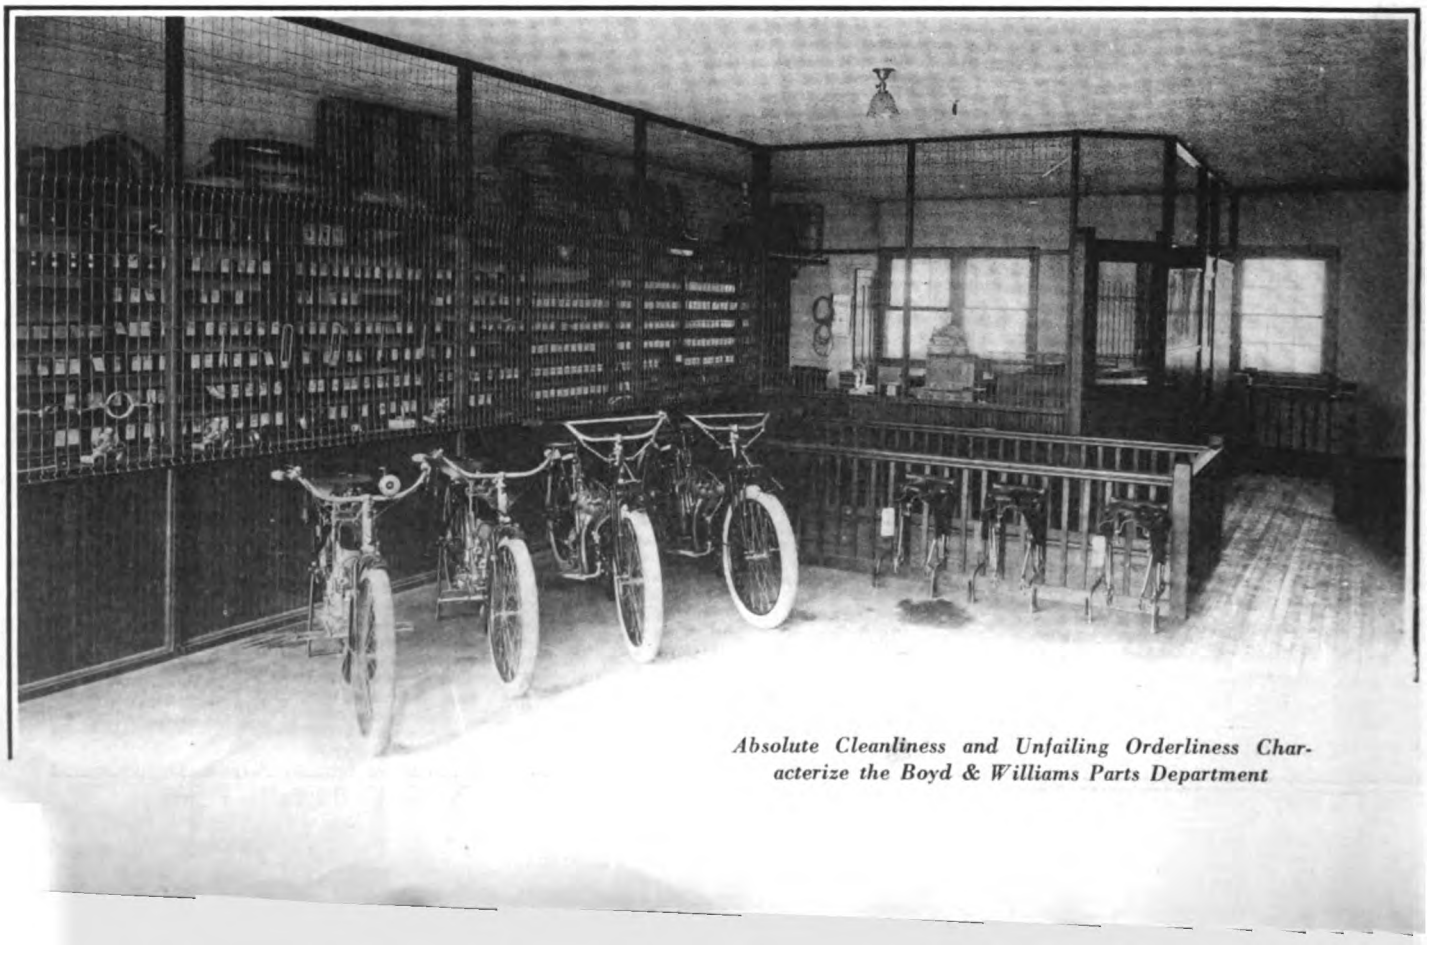


An Ideal Combination of Simplicity, Artistic Appeal and Dignity in a Motorcycle Salesroom

IT is doubtful if there is anywhere in the country a more attractive and business-like motorcycle agency than that operated in Denver, Col., by Boyd & Williams. These hustlers handle the Indian, and from top to bottom and end to end their establishment bespeaks efficiency and prosperity.

The striking photograph above shows the salesroom, viewed from the front door and it would be difficult to imagine a more pleasing arrangement of machines and fittings than is here shown. The furnishings are simple, but there is a marked air of dignity about the whole display.

The picture below shows the neat and systematic parts department of the Boyd & Williams firm. The company carries a large stock of Indian parts, in addition to a big line of accessories, and everything is so labeled and arranged that there is no confusion.



Absolute Cleanliness and Unfailing Orderliness Characterize the Boyd & Williams Parts Department

Yes—the DIXIE *is* Waterproof

Read This From H. Webb,
Winner of the DIXIE Run.

VIRGINIA MOTOR CAR COMPANY, INC.

Automobiles — Auto Supplies

ROANOKE, VIRGINIA August 16th, 1916.

Splitdorf Electrical Company,
Newark, N. J.

Gentlemen:-

I am enclosing a phote of my 1915 model Indian, equipped with Dixie Magneto.

In the Dixie Motorcycle Club Endurance Run of 500 miles August 11 - 13, I rode through over 300 miles of mud and water, winning the highest score in the run and the highest Professional score too. Four big storms completely drenched the machine and at one time the magneto was entirely submerged. It never failed me for a single instant.

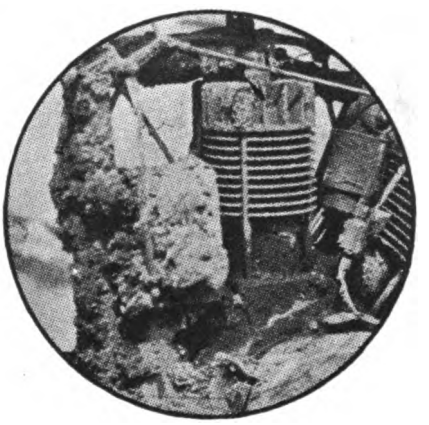
I rode to the F.A.M.National Convention a distance of 1600 miles and upon my return I entered the Dixie Run without any adjustment whatever. You will note from the picture that I had no protection whatever for the magneto.

I owe the best percentage of my score in the Dixie Run to the unfailing service of the Dixie Magneto.

Youre very truly,
H. Webb

Look at this mud-encrusted DIXIE which

"never failed for a single instant"



Another Great Triumph for DIXIE!

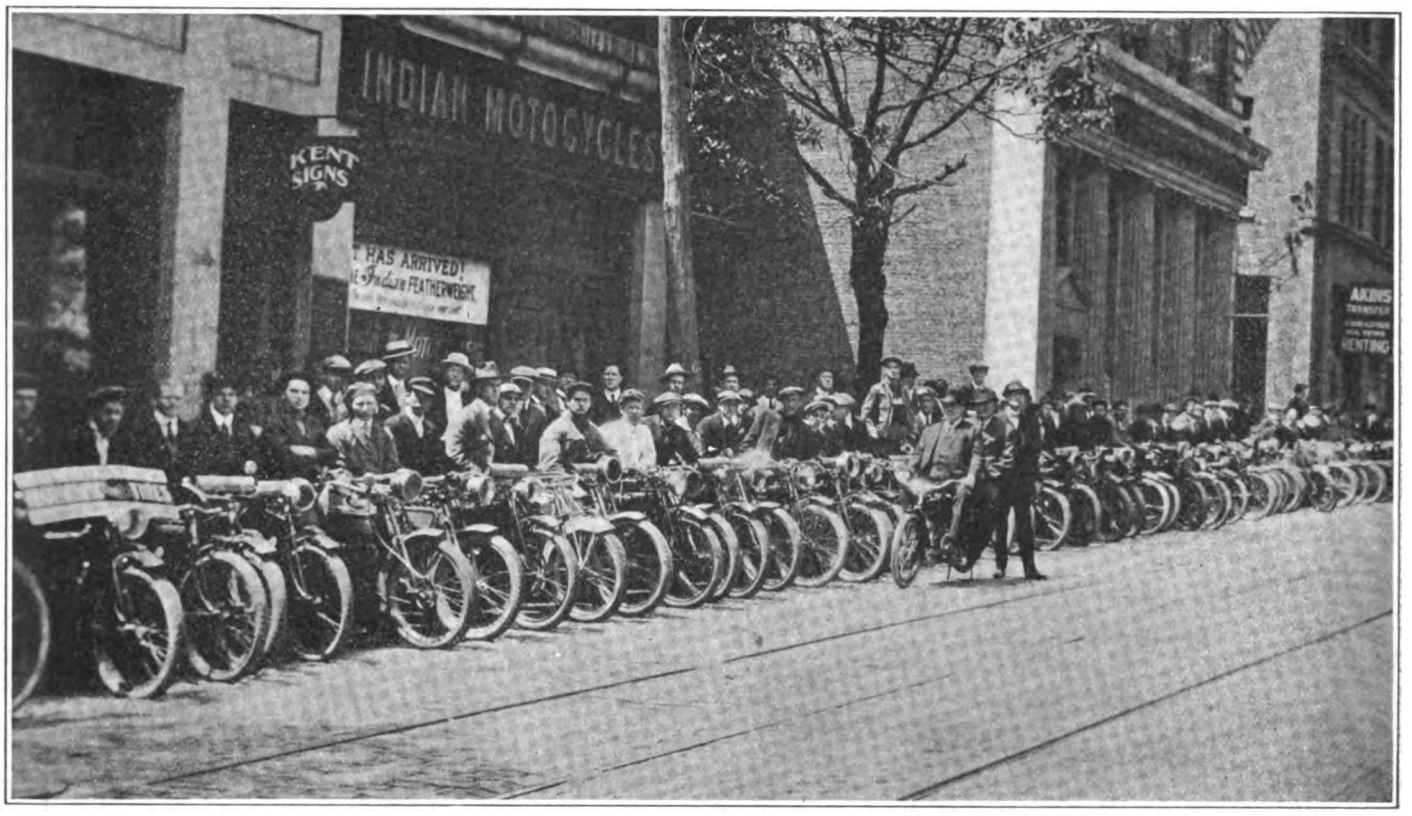
READY FOR DAY OF BIG SPORT AT RECENT ATLANTA (GA.) PICNIC



Members of Active Atlanta M. C. Gathered at Local Indian Agency for Celebration with Invited Guests

A SUBSTITUTE FOR THE CLUB RUN

The Old Timer Suggests One Where All Hands Ride as They Wish to the Rendezvous—Why More Members Will Be on Hand.

By ALBERT BLAKE

GEORGE JONES, road captain and touring enthusiast, was grouchy. The soreness was due to the thin attendance at the last club run, only eight of the members showing up out of some thirty-two. When the Old Timer came in later in the evening, George confided his woes to him.

"I plan the runs over nice roads, with good eats at the end. They don't have to get up before daylight to start with the bunch, either. Yet they don't come out. Think of it, only eight of them turn out, and three of 'em with sidecars."

"That may be one of the troubles," said the Old Timer. "You kind of act as if the sidecars were road-drags or something like that. How about your lightweight riders?"

"They all have the same schedule," replied George, "and they oughtn't to kick. The speed is slow enough for any of them."

Too Much Speed

"Yes, I know about that," the Old Timer returned. "Starts out at 20 miles per hour, everyone sailing along nicely. Presently the solo boys start to open up a bit, and the sidecarists have to hustle. The passengers get jounced around at 28 to 30 miles per hour. That speed leaves the lightweights a bit behind, for its hard riding. I guess that's one reason for the lack of attendance on the runs."

"Well, the solo bunch doesn't want to loaf along."

"Probably not, but if it is a question of runs or no runs, they ought to ride a bit slower," the Old Timer retorted. "Why not try this arrangement?

The New Scheme

"Put up a notice stating that all hands meet at the Greenwood Inn at noon on such and such a date. Tell the riders to start when they want to, go by whatever route they want to and take anyone at all along, but to get there on time. Make up your party of speeders to suit yourself, and see how things will turn out."

"But where's the club run idea in that?"

"What's the odds? You'll get your men there just the same. Take Jimmie Brown, with his lightweight. He doesn't like to eat dust from big twins. He may not admit it but he doesn't join the runs, you'll notice. He'll probably show up for the feed, just the same. Then there's Bill Short, with his big twin. He likes to loaf along, stopping here and there to take pictures, or have a quiet smoke. Sam Wheeler, sidecar bug, likes to cover long distances, but not at solo riders' speed. And then you have Arthur Squire and his girl who is timid and doesn't like fast going. That's just a few of your riders who will probably be in on the dinner when you schedule it.

"Just sound out some other members and you will find that there are not so many as you think who agree on the same ideas with regard to runs. They *all* like to ride and get out in the country or they wouldn't own machines. But most of them are not fond of speeding, at least in company. When you get them at the Inn, the way each of them got there will be interesting. There will probably be someone who has started long before daybreak to get in a little fishing, or hunting, and another chap who took a good swim before starting for the Inn. You know the crowd better than I do and can figure on what each one likes. Try the idea and don't forget to add about returning home the same way.

Better Feeling Results

"Folks get more chummy when they are eating together and you develop the club spirit nicely at a good feed. And you've added to this the fact that each man has had his own way of going to the dinner, which will please 'em all. It sure looks like a winning proposition. Try it out."

NEW AGENT SELLS TEN

CANTON, N. Y., Aug. 22.—Riverside Garage, which only recently took on the Smith Motor Wheel, has already sold ten. The Riverside people are arranging to conduct a strong campaign to advocate the motor wheel on bob sleds this winter.

POWER BICYCLE IN POMONA

POMONA, Cal.—Fred B. Weaver, 218 West Third street, has taken the agency for the Miami Power Bicycle and states that there are indications of a live market for the lightweights in his district. He has already sold most of his first allotment.

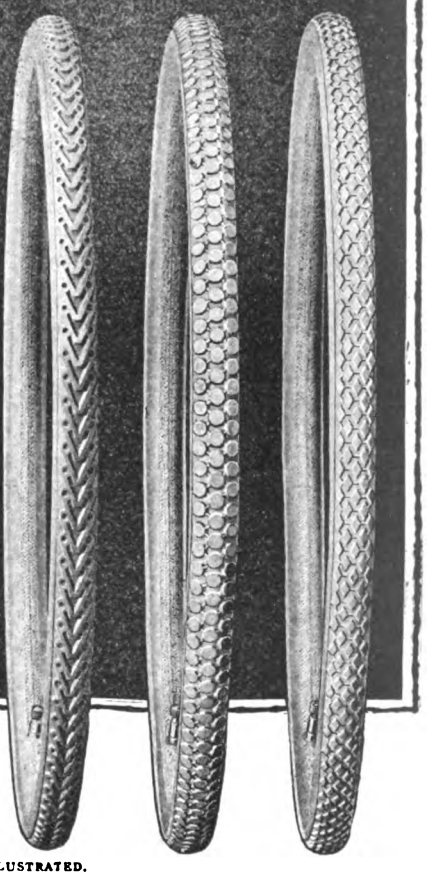
PACIFIC COAST BRANCH: 61 Fremont Street, San Francisco

3 Strong Leaders –

a complete quality line that meets every demand

VITALIC BRIGADIER ENDURO



ANY DEALER with a stock of these three tires is completely equipped to supply the demand of *every* customer that comes into his store—from the one who wants the *best regardless of price* to the one who wants a *good* tire at a *popular price.*

THE VITALIC

is built throughout of the best tire materials obtainable,—two plies of genuine *motorcycle* fabric frictioned with pure rubber, an inner tube of pure Para rubber so heavy as to eliminate any possibility of leak, an extra heavy non-skid tread of finest quality pure rubber. Will outwear any ordinary bicycle tire *more than two to one.* Once introduced it easily brings a higher price than other tires and always sells over and over again to the same trade because it *never* disappoints.

THE BRIGADIER

The best popular priced tire ever put on the market, far excelling others anywhere near its price. It is a four-ply tire, built with two plies of best Egyptian fabric all around the tire and two extra plies on the tread. A very high grade friction is used.

The extra heavy inner tube is made of a very high quality rubber. The Brigadier is made with gray side walls and a heavy large white studded tread as shown in the illustration.

THE ENDURO

Another excellent popular priced tire that fills a long felt need for a tire of lower price that has genuine quality. It is built with two plies of high grade Egyptian fabric with a very high grade friction, has a heavy inner tube of very good quality and a good substantial diamond studded white tread.

Write us today for sample sections of these three tires and attractive display material and dealer helps.

Your jobber will show you the tires.

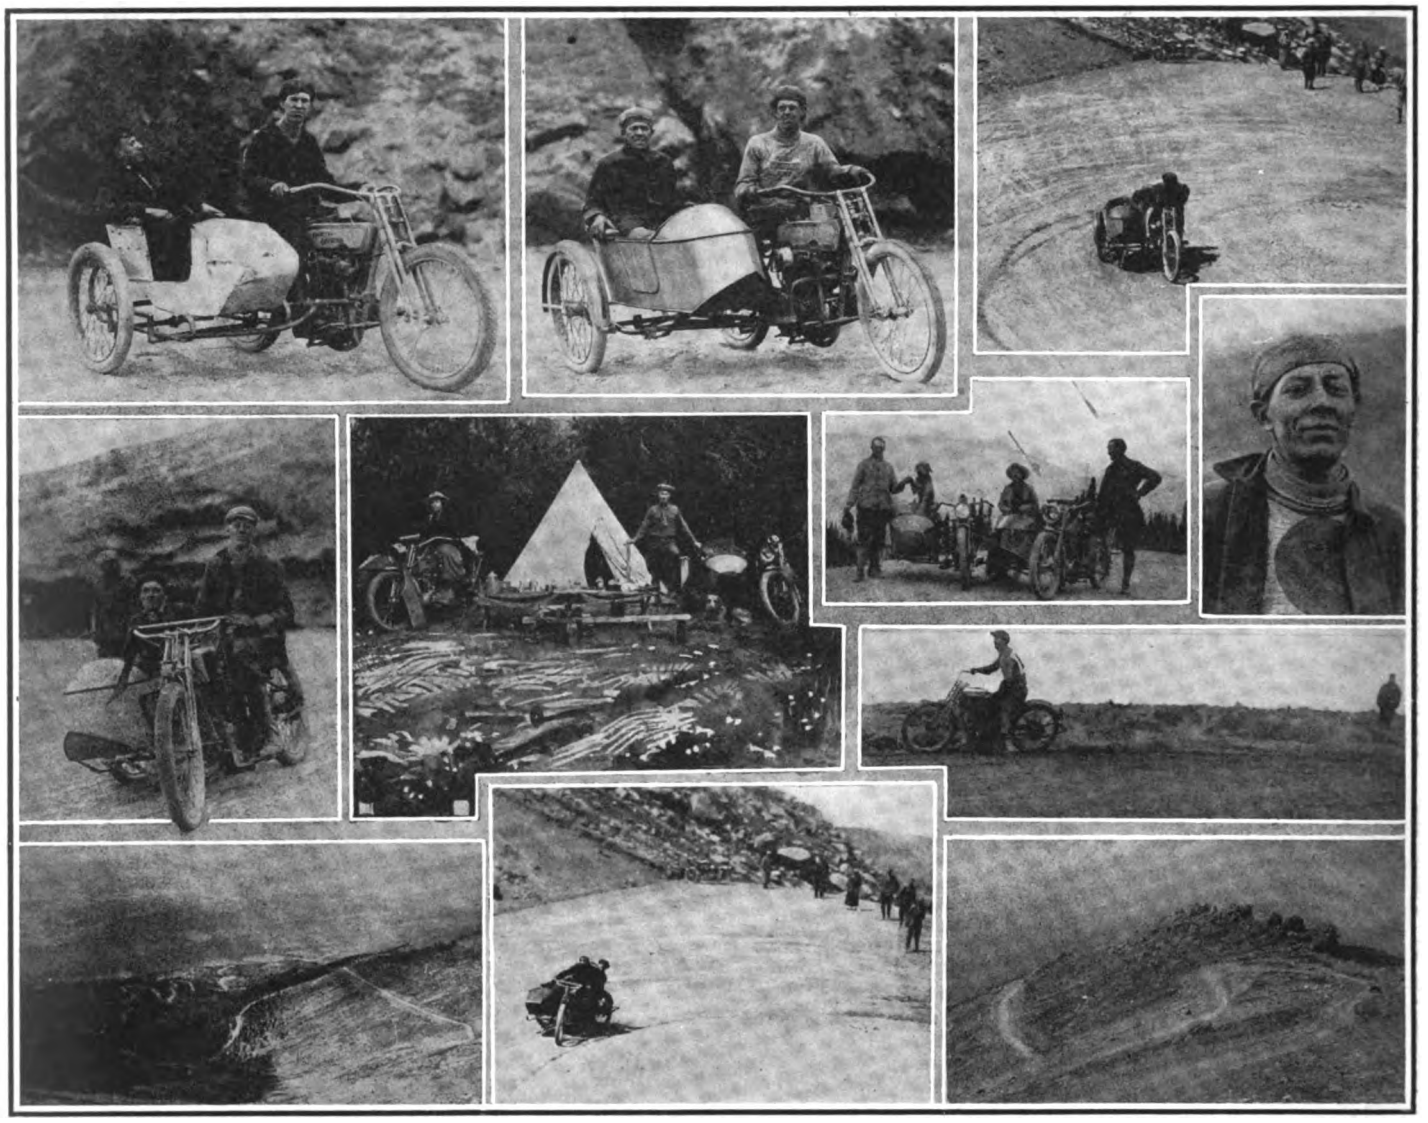
WHEN MOTORCYCLES SPED UP WINDING PIKES PEAK ROAD



IN the upper left hand picture is Happy Lytle with his Harley-Davidson combination who finished fourth in this class. Next to right is Van Vanderhoff with Harold Boyd as passenger. Vanderhoff won the side car race with his Silent Gray Fellow. At the upper right is Vanderhoff taking a turn in the steep climb.

In the next row at the left is Floyd Clymer, Excelsior, coming down the road after finishing in the sidecar event. Walter Whiting's camp is the subject of the next picture, with Walter and Mrs. Whiting at your service. The next picture shows Steve Drehr and his mascot, with the Whitings at the one mile mark from the foot of the Peak and at the right is a close-up of Clymer after he had made the best time in the solo class.

Right below is Frank Kunce, Harley-Davidson dealer at Lovelands, Colo., who won the Colorado State championship up the mountain. At the lower left is a view of part of the course from the summit, showing the switchbacks. There are 300 turns in the climb. In the center is "Spec" Warner, Indian sidecar, negotiating one of the lower turns at speed. The right picture is at the ragged edge of nothing, on the summit. Although the road looks flat, it has a 10 per cent grade at this point. An account of the climb was given in last week's issue.

MEMPHIS CHAMBER LAYS OUT TWO RUNS

MEMPHIS, Tenn.—That automobilists and motorcyclists may have two good runs over good roads, Henry R. Hayley, of the Good Roads Committee of the Business Men's Club, Chamber of Commerce, has mapped out two fine runs, one an all-day run of 100.8 miles, and the other an afternoon or evening run of 49.6 miles. The charting has been so carefully arranged, the distances verified, and landmarks charted, that it should be practically impossible for any one to lose his way.

The maps are being put up in printed form for the convenience of motorists. Dealers in other cities will undoubtedly find that such mapping of roads would prove of interest to their riders, as the average road map is very hard to follow.

NEW SOUTH WALES MINING MAN PRAISES MOTORCYCLE

F. K. McMASTER, a travelling man of Birriwa, New South Wales, Australia, is an experienced motorcyclist, and a great admirer of the qualities of the Indian Powerplus.

In a recent letter of appreciation he described the 1916 Powerplus as "a great big beautiful dream." He finds the Indian useful to him every day in connection with his work as traveller for a mining concern, where he is continually on the move from mine to mine. The comfort of the cradle spring frame is especially appreciated in the mountain district where Mr. McMaster works, as the Australian roads are poor.

KANSAS FAIR TO HAVE MEET

HUTCHISON, Kan.—The Kansas State Fair Association will hold a race meet on September 16, at the half-mile dirt track on the fair grounds in this city. Prizes to the value of $300 have been hung up. The management expects to have "Spec" Warner, Ray Weishaar and Ray Johnson, of Wichita, Don Cooper of Topeka and Paul Garst compete on that date.

Here's the Latest "Old Sol" Triumph

A real spotlight that can be directed to the right, to the left, up or down, as desired. It enables the rider to follow every twist and turn of the road, to spot road signs—in fact, actual use will demonstrate the

"Old Sol" No. 76

marvelous **adaptability** of this latest "OLD SOL" triumph, to a hundred uses. Here's a short descripiton:

6 inch door and body. All parts black enamelled. 6 v. 15 c.p. bulb. Silver-plated reflector. Hole with eyelet for insertion of 6 foot cable in lamp and other end of cable provided with copper terminal. On and off switch at rear of handle. This lamp is equipped with a 3-inch mirror for rear view. List price, complete, $4.50.

DEALERS—you know the selling value of a lamp such as this. Write at once for prices and our counter display proposition.

Hawthorne, Mfg. Co. **Bridgeport, Conn.**

OLD SOL LIGHTING SYSTEMS

Completely Equipped

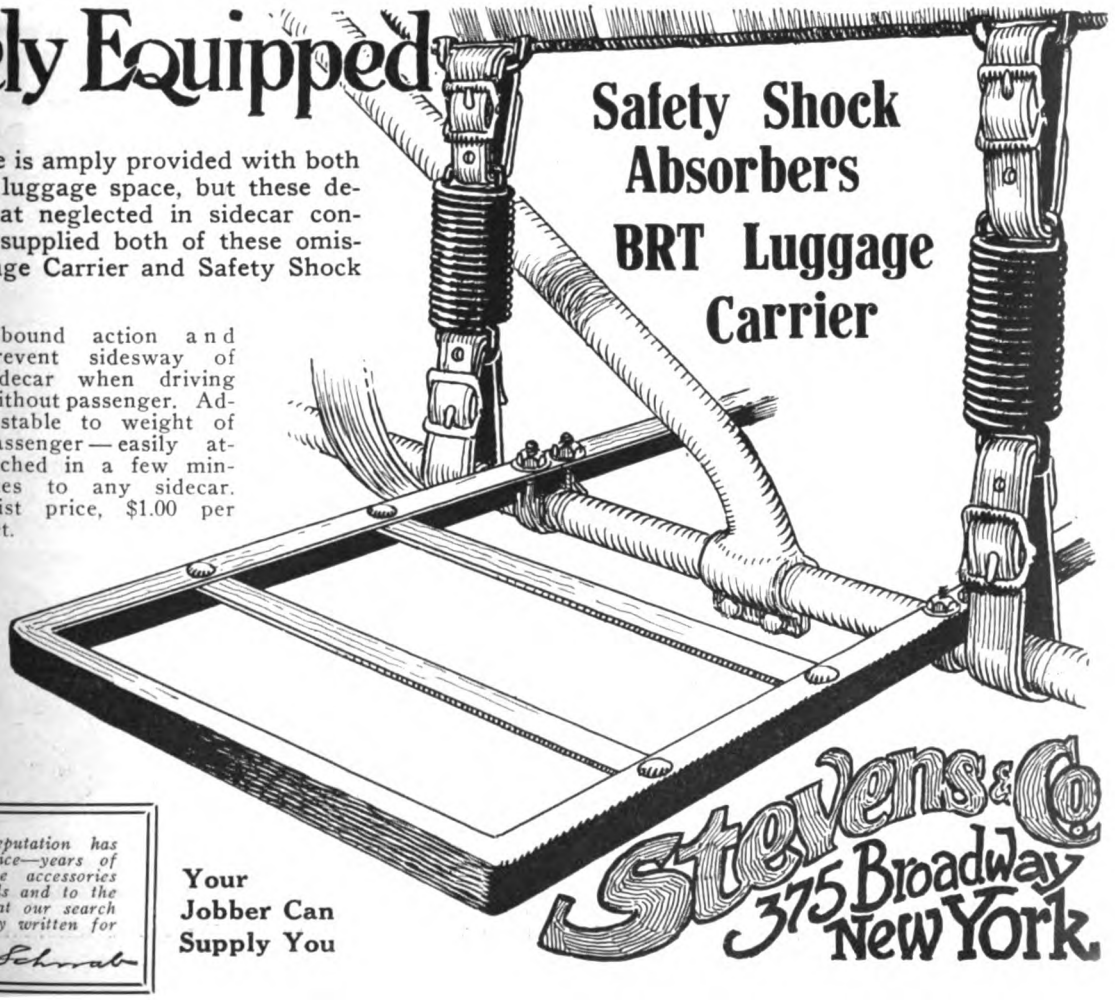
The modern motorcycle is amply provided with both comfortable springs and luggage space, but these details have been somewhat neglected in sidecar construction—and we have supplied both of these omissions in the BRT Luggage Carrier and Safety Shock Absorbers.

BRT Luggage Carrier

Large, well built, this carrier will hold 150 lbs. It is made throughout of angular steel, fastened to the sidecar frame with four strong clips. Furnished in Black Japan—made in three sizes for Indian, Harley-Davidson and Rogers Sidecars. List price, complete, $2.50.

Safety Shock Absorbers

Counteract rebounds on road shocks. They positively absorb all rebound action and prevent sidesway of sidecar when driving without passenger. Adjustable to weight of passenger—easily attached in a few minutes to any sidecar. List price, $1.00 per set.



To build the Stevens reputation has taken years of honest service—years of continuous search for those accessories that appeal both to the minds and to the pockets of cycle riders. That our search has been successful is plainly written for all to read.

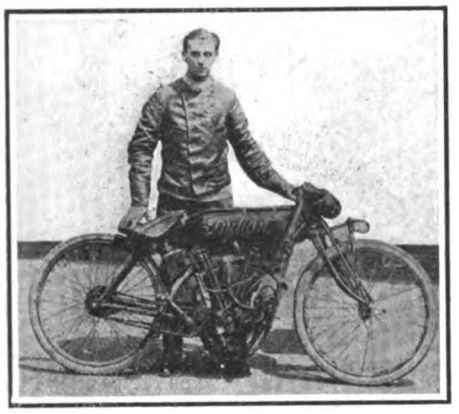
JACK BOOTH IS AUSTRALIA'S SPEED KING

Indian Racing Man in Melbourne Has Made 96½ M. P. H. on the Road and Holds Most of the Records in That Country

MELBOURNE, Australia.—Jack Booth, of this city, is the acknowledged motorcycle champion of the Commonwealth. Since his debut on the road and track in 1911 he has held most of the Australian records, and today is as much at home on the track as on the road. He has ridden machines from 2¼ to 7 horsepower during his career, his present mount being an Indian.



Jack Booth and His Indian

Booth commenced riding in 1909, but did not take to the track until two years later. When the Hendee Mfg. Co. opened a branch in Melbourne the management saw at once the possibilities of Booth, and secured him for the Indian racing team. In 1915 at Goulburn, N. S. W., Booth won the Australian Tourist trophy from a field of crack riders, including some who had ridden in the Tourist trophy in the Isle of Man.

His latest records on Australian roads are the one mile in 0:37⅗, the five miles in 3:25⅘, and the ten miles in 7:45⅘. These records were made under the auspices of the Victorian M. C. of Melbourne. They were made on roads that do not compare with the roads found in the United States.

Jack Booth is a clean-cut, unassuming young man, well liked by his associates. He is a clean rider and a game loser, yet always smiling. He is considered one of the best all-around sportsmen in this section.

MORE MOTORISTS IN TRAINING

FORT ETHAN ALLEN, Vt.—A squad of motorcyclists belonging to the first motor battery of Englewood, N. J., arrived a few days ago at the local barracks and will train with the other military riders who have been coming in for several weeks past. The Englewood squad has three machine gun outfits, two motor caissons and several dispatch motorcycles.

WANTS EXCLUSIVE AGENCY FOR AMERICAN MACHINE

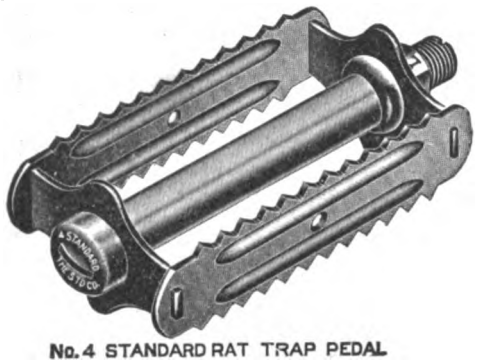
F. VINCENZO LANFRANCHI, of via Broggi, Milan, Italy, is anxious to receive catalogs and data from makers of motorcycles in this country. Signor Lanfranchi is desirous of obtaining the exclusive agency for Italy for an American motorcycle. He already is representative for a number of the best-known British machines and automobiles, as well as accessories. He has a big establishment in Milan and has agents throughout the Italian kingdom.

TO HAVE OWN AGENCY

DETROIT, Mich.—Theodore F. MacManus, the well-known advertising man, is to open his own agency under the title of Theodore F. MacManus, Inc., in this city. His resignation from the Erwin & Wasey firm is to take effect on September 1.

GOODYEAR FACTORY CLASSES

AKRON, O.—In the Goodyear Tire and Rubber Company's factory school more than a dozen subjects are taught, and 65 classes are in operation. The school is open from 6:45 a. m. to 10:15 at night, five days a week, and classes convene at proper periods during the day to accommodate the men, no matter what shift they may be working on. All the educational courses are free of charge, the established policy of the Goodyear company being to help all its men who wish to help themselves.



No. 4 STANDARD RAT TRAP PEDAL

THESE STRONG SUBSTANTIAL MOTORCYCLE TYPE PEDALS

have that sturdy look that comes only from correct design and first class construction.

THE NO. 4 STANDARD is a new type of rat trap pedal added to our line this year, making it the most comprehensive line of rat trap pedals offered to the trade.

THE NO. 5 PIRATE has such big, soft, easy rubber cushions! It minimizes the jars and bumps. Try a pair and find out for yourself.

Our cycle parts and accessories appeal to the mechanical expert. They have been standard from the beginning, and mark the utmost in the industry.

Our products comprise: Diamond "E" trade mark brand, Spokes and Nipples for Bicycles, Motorcycles, Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals.

Questions and Answers

NOT REPRESENTED HERE

I AM desirous of purchasing an F. N. or N. S. U. motorcycle, and would like to know where the agencies for these machines are. I am particularly interested in the F. N. four-cylinder machine.

RICHARD S. STEARNS, JR.

Nantucket, Mass.

Neither machine is represented in this country, and we know of none to be had for the last two years. In 1914 the F. N. factory in Liege, Belgium, was captured and turned into a munitions plant by the Germans and that kind of work has been going on there ever since, as far as we know. The N. S. U. factory was making only munitions at last reports—September, 1915—with not more than one-third of its men in the works. We suggest that you advertise for what you desire.

GEARED TOO HIGH

I HAVE a 1914 twin, single-geared, which runs perfectly when used for solo or tandem work, but gives trouble in starting when used with a sidecar. I would like to know if it would be well to have a larger sprocket than the one now fitted put on the rear hub. Also, would it be better to have a two-speed gear and what the cost of one such would be.

Brooklyn, N. Y. FRANK MOHN.

Your machine is geared too high for sidecar work. Use a sprocket sufficient to bring the ratio to 4¼ or 5 to 1, in order to get the best starting effect and good pull at slow speeds and on hills. Go to A. H. Patterson, the Excelsior man on Bedford avenue, and ask him about two-speed gears. An Eclipse two-speed hub can be fitted to your machine; for terms, see the agent mentioned.

TRY SUPPLY HOUSES

PLEASE let me know where I can get a three-way cock for use with my fuel tank. The idea of the cock is to keep a reserve in the tank for emergencies. Also where I can get an automatic device to stop the machine firing when it falls over or skids.

New York. S. J. KLEEBERG.

We think that you may be able to get a three-way cock from Stevens & Co., 375 Broadway, New York; the Motorcycle Equipment Co., Hammondsport, N. Y., or the Chicago Cycle Supply Co., Chicago, Ill. Write them. There is no automatic device for the purpose you mention. It might work at the wrong time if fitted and cause an accident. Get a handlebar switch and fit it to your machine, and you will be able to get the results you desire.

SHEARED KEY THE CAUSE

MY motor seems to run faster than it ought when climbing hills or when going through sand. I think that the trouble lies in the clutch, but since I have tightened the tension of the clutch, the trouble seems to be worse.

Chicago, Ill. J. T. ALLEN.

Take off the motor sprocket and see if the key holding it on to the shaft is not sheared through or lost. The fact that the clutch when tightened would not improve matters shows that it is not the clutch which is at fault.

FINLAY IS VICTOR IN WHEELERS' HILL CLIMB

Ex-Cycle Champ Makes Best Performance in Australian Classic on Excelsior—Victoria May Produce Benzol—Stearns Sets New Record on Indian

SIDNEY, N. S. W.—Bob Finlay, the holder of the Australian flying start motor-paced record for the mile (1:21⅕), has more recently taken to the "Big X," and now shows the same ability at guiding a racing motorcycle as he formerly did at chasing one on a bicycle. His latest performance in this direction is the winning of the Wheelers' Hill Climb, an annual competition which excites a lot of interest in Melbourne.

There were three classes in this climb: one for machines under 600 c. c. or 36½ cubic inches, a second for machines of over 600 c. c. and a sidecar class. In the class for over 600 c. c. Finlay (2 seconds) was the victor, with H. Pannach (3 seconds) in second place. Both men rode Excelsiors. Finlay's time was 51 seconds and Pannach's 56 seconds. In the class for under 600 c. c., G. Spivey, twin Precision (scratch) won in 55 seconds from Eric Tyler, Triumph (6 seconds). In the sidecar class, P. C. Priestly, Ideal-J. A. P., won in 53⅗ seconds.

Finlay will be remembered in Salt Lake City, where he rode for a season about three or four years ago.

Benzol in Prospect

The Victorian Government has started to instal a plant for the extraction of the by-products of low-grade coal, and it is expected that the works will be in full swing in a few weeks. As one of the principal by-products of coal is benzol, Australian motorists are anxiously awaiting for an announcement that this fuel will be made available for them at less ruinous rates than rule at present for imported benzines and motor spirits. How would you Americans who seem to be displeased at having to come across for anything over 25 cents a gallon, like to foot the bill for just three times the amount? That is the Australian motorcyclist's unavoidable expense today.

Temora, in New South Wales, was the scene of a 25-miles motorcycle road race not so long ago. Temora is an important county township in the midst of a wheat-growing section. A. Schubert won the race in 30:20, while Andy Byron was second in 27:30. Byron made the fastest time in the event. They both mounted 3½ h. p. Precision twins.

Syd Stearns has given the Hobart-Launceston record another knockdown blow, as he covered the distance in 2:32:15. Stearns already holds the five-mile road record, 4:40, and is after the 100-miles road record of 1:37:00. He rides an Indian 7 h. p. twin for his speed work.

CONCRETE SPEEDWAY PLANNED

DENVER, Colo., Aug. 21.—As a result of the Penrose cup races that were held over the Pikes Peak highway recently plans are now being considered, which, if carried out, will give Colorado Springs a motor speedway. It is planned to construct a concrete speedway one mile in circumference and it will be built a short distance southeast of the city limits.

GAYNOR IS DESPATCH RIDER

PATERSON, N. J.—Edward Gaynor, sub-agent for the Indian in Wayne, has written to John Steele, Indian distributor in this city, from camp at McAllen, Tex., for the first time since he left with the 71st New York Regiment. Gaynor says that he has been selected to ride a Powerplus for despatch work, and has been relieved from regular infantry duty, much to his gratification.

CHOSE CYGNET COMBINATION

WORCESTER, Mass.—K. E. Saunders, who won first prize in the recent 1,000-mile Worcester endurance run, has selected a Harley-Davidson and Cygnet Rear Car combination as his prize. There was a big list of attractive awards, but Saunders picked out the above mentioned outfit as his best bet.

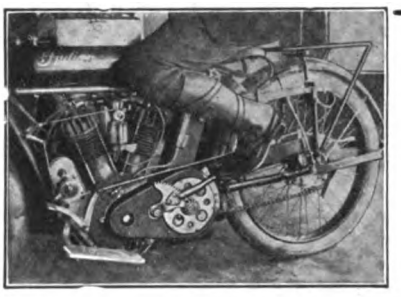
"The Coventry"

"The Motor's True Mate"

They're all demanding chains of more strength than necessary, because they don't know when that extra strength will be necessary. Hence the demand for our 26K—the strongest chain in the world. It costs $1.00 a foot because it's worth it. Write for details.

HERBERT F. L. FUNKE CO.

112 Broad Street, New York



NOTICE

Prest-O-Lite for Motorcycles

For Riders in Every Kind of Service

Whether you ride for business or pleasure, choose a lighting system as sturdy as your motorcycle. Good, dependable light is as vital as fuel.

Because Prest-O-Lite meets this exacting requirement, because it is simple and trouble-proof, never needs any attention that the rider himself cannot give at slight cost, and because its efficiency is not lessened by bumps and vibrations—

Prest-O-Lite represents the utmost in practical, convenient motorcycle lighting, and for this reason is used by more riders than all other systems combined.

Yet, with all of its advantages, Prest-O-Lite costs but little to buy and little to use.

Get Prest-O-Lite on Your Motorcycle

Any dealer can make you this popular equipment combination offer: "Prest-O-Lite, a lamp and a good mechanical horn," at a very satisfactory price. You can use this equipment on any make motorcycle.

Ask for full details on motorcycle lighting. Sent free.

THROUGH FOUR STATES WITH A SIDECAR

(Continued from page 23)

tower and white buildings. However, time was flying, and with reluctance we turned our front wheel toward Albany.

Good Going to Albany

The run to East Lee was fine, and Jacob's Ladder offered no difficulties to the outfit. The scenery through the Berkshires was enjoyed by all, as well as the run through to Rensselaer. Passing through Albany we went north through Saratoga Springs and Lake George, stopping for a while at Plattsburg to see the citizens getting military training.

From thence on the scenery grew more familiar, and we soon attained the International Boundary, proceeding by easy stages back to our home in Montreal.

NEAT—AND YET A REGULAR FELLOW

(Continued from page 21)

more they create the impression that riding a motorcycle is hard work; that a man must be oily and grimy to do it."

"But a spick and span rider doesn't look like the real thing," was the veteran's next argument. "He is taken for a newcomer, or a mere experimenter."

"The time is here when a motorcyclist is going to be judged by his appearance as related to his performances," we contended, "and not merely by the amount of road material he has been able to pick up on his clothing and on his machine. At the F. A. M. convention in Providence the riders who received the awards for neatness were those who had covered considerable distances and still kept themselves presentable. They were not mollycoddles. One of the winners had covered over 800 miles, and his outfit showed no more effects of roadwork than can be found on some motors after a 75-mile run. That rider knew how to take care of his motor and how to keep himself reasonably comfortable; and comfort is always directly related to cleanliness. He wasn't spotless by a long shot, but, considering his long trip, he and his motorcycle were in good condition."

"But riding togs that look well, and remain that way, cost considerable money," said the veteran, as he began to accept the new point of view.

Material Important

"Not necessarily," we explained, "because the whole matter depends upon the choice of material. Khaki can hardly be called a neat or attractive material even when it is fresh from the store, and a few oil spots and a dusty trip or two transform it into a poor apology for a costume. Forestry cloth looks infinitely better, can be washed satisfactorily, holds its shape and wears well. Besides, it is not expensive when you consider the amount of service that will be derived from it. A wise selection of the material for your suit will go a long way towards making it a permanent success and pleasing to the eye."

ACTIVITIES OF THE TRADE IN SAN FRANCISCO

SAN FRANCISCO, Cal.—W. E. & W. H. Jackson, distributors for the Dayton lines, have anticipated their requirements somewhat to provide against possible railroad troubles, and expect several shipments in the next few days. They have just received a car of Dayton motor bicycles, for which they had several orders in advance.

W. H. Jackson, of W. E. & W. H. Jackson, is making a trip to Eureka, in company with R. T. Ruddick, Coast manager for the Federal Rubber Company. Mr. Jackson has tried to make the Eureka trip several times before, even going so far as to have his steamer ticket, but something has always prevented him in the past. This time he is determined to make it.

F. E. Wright of Lodi, who is considered one of the livest bicycle dealers of central California, is in San Francisco with Mrs. Wright, buying furniture for their new home—which would seem to show that business is pretty fair in their district—or perhaps that it pays to be that kind of a dealer.

Ed Laudenclos, of the Motorcycle Sales Company, reports many inquiries for the Henderson, and has already received four deposits for the new '17 model machines, though so far he does not even know what they will be like. He has also been putting out a number of second hand machines.

"149"

An Indorsement—

"On the 8th of November I purchased some of your No. 149 Motorcycle chain from you, and wish to state that it is more than you claim for it. I have given it a good test, as I use a side car on my machine and have had no broken rollers or side plates up to date; it is the smoothest and quietest running chain I have ever had. I have had all of the leading makes, but I wish to pin my faith on the No. 149 chain and would recommend it to any one that wishes to eliminate chain troubles.

"Please find ———— for which please send me some connecting links. I have the ———— and ———— in stock, but they are the only thing that breaks about the chain and fit tight, as the side plates are thinner than your chain." (*Name on request.*)

A trial will convince you also.

WHY ASK US?

Of course we would say it's the brake for you to equip to your bicycle. We thoroughly believe it is, but then, you see, we make the brake and there is a wild chance that we might be slightly prejudiced in its favor. There is one man, however, you can ask and be sure of receiving an unbiased opinion. Ask the man who rents bicycles about the

CORBIN

DUPLEX COASTER BRAKE

This man knows. If there was ever a man who has had an opportunity to watch brakes work it is surely this man. Not one brake, mind you, but all brakes. He has experimented with them all and learned things about each and every one of them, and the sum total of his findings is this:

The Corbin Duplex Coaster Brake is the one brake on the market that will stand the wear and tear, knock down and carry out treatment to which a brake on a rented bicycle is subjected. For real facts, ask this man.

BLUE STREAKS

Tire Selling Expense

One of the surest ways to find your bicycle tire *profits* is to analyze your *selling expenses.*

Your selling expenses are *high* when you stock several brands of tires of different sizes, colors and prices, because:—

1. It takes longer to sell each tire.
2. You have more money tied up in a large stock of tires.
3. Neither you nor your customers are sure of the guarantee and the quality.

But, if you will sell Goodyear *Blue Streak* Bicycle Tires you can cut down your selling expense, because:—

1. The Goodyear Blue Streak, one quality, one price and one guarantee, are *standard* and *known.*
2. Blue Streak sales are quickly made—no delays, no haggling, no dissatisfaction.
3. The Blue Streak price competes with mail order prices and yet gives the quality and the *guarantee* of a $5.00 or $6.00 tire.

You can do a larger volume of business on a smaller investment, and make a larger net profit, if you sell Goodyear Blue Streak Bicycle Tires.

The Truth About Pikes Peak

In view of the conflicting claims of superiority in the Pikes Peak Hill Climb, THE REAL FACTS as to who "GOT PIKES PEAK" may be of interest.

There were four events, two open to the world, one limited to Colorado riders and one for sidecars.

FLOYD CLYMER

on an

EXCELSIOR

WON BOTH OPEN EVENTS

The first in 23 minutes, 15.7 seconds, the second in 21 minutes, 54.4 seconds.

The Fastest Time of the Meet and the Record for the Hill

Clymer's Time Was 42 Seconds Better Than That of His Nearest Competitor

Clymer also ran second in the sidecar event and second in the Colorado State Championship. His time in this event being only 7 seconds more than that of the winner and 44.7 seconds better than the third man.

These Are the Facts ***Enough Said***

GASOLINE AND OIL REPAIR WORK

MOTOR HARLEY DAVIDSON CYCLES

GREELEY, COLO.,
Aug. 21st 1916.

Mr. F. B. Mathis,
Chicago, Ill.

Dear Sir:

I have just received the Motorcycle Illustrated of Aug. 17th containing the ——— ad. of how they cleaned up at Pikes Peak.

Don't you think you ought to correct some of the statements they made in their ad?

They stated that Vanderhoof and Kunce both won THE PIKE'S PEAK AUTO HIGHWAY CUP. This is absolutely false, as there was NO cup of any kind for any of the motorcycle contests.

Also stated Kunce rode a STOCK ———. Kunce rode a factory ——— motor with a special low frame fitted with EXCELSIOR HANDLE BARS, EXCELSIOR FORKS, EXCELSIOR CONTROLS AND EXCELSIOR GRIP CLUTCH CONTROL with Eclipse clutch.

You can notice in the picture in Motorcycling on page 6, issue of Aug. 21st, that the front of this picture was cut off and did not show the front end of his machine, yet you can see the EX. bars and controls.

The ——— ad. shows him on a stock machine, as I presume they did not want to show the X parts on it.

We made the fastest time by 40 seconds instead of 5, as they state, and the X copped more money than any other rider.

They certainly have a funny way of advertising, and to read their ad. it looks as if they won everything.

In the state race I was leading until my rear axle broke, and rode the last 5 miles with no brake and lost by 7 seconds.

They have certainly done some false advertising, and have the people who were not there believing they made a cleanup.

I believe an ad. of this kind should be corrected.

Why not tell the truth about the Pike's Peak Hill Climb?

Very truly yours,

Floyd Clymer.

The 1917 Harley-Davidson Frames are Strong as Ever

The frame of a motorcycle is often referred to as the "backbone" of the machine. Literally, no word is more expressive of the importance of a motorcycle's frame construction. The frame supports the motor, the rider and the road. It must bear the shocks from each.

Hence, when the Harley-Davidson Motor Company again expresses its entire confidence in Standard Tubing by using it *exclusively on all 1917* Harley-Davidson motorcycles, as in previous years, it means only one thing—that Standard Tubing has proved, conclusively, its entire fitness to safely carry the Harley-Davidson reputation to the far corners of the country.

VOL. 12 NEW YORK, AUGUST 31, 1916 No. 9

MERKEL INCORPORATES A MOTOR WHEEL CO.

Inventor's Plans Partly Unfolded by Granting of New York Charter to Merkel Motor Wheel Co., Incorporated.

NEW YORK, Aug. 28.—It was more or less of an open secret at the Atlantic City Convention that Joe Merkel, who made his trade fame when he designed the famous yellow machine which still bears his name, had something under his hat; but for most folks, at least the hat was never lifted, and Merkel's new venture remained a deep and dark secret.

With the incorporation this week, however, of the Merkel Motor Wheel Company, Incorporated, under the laws of New York State, at least a glimmer of light is shed on Merkel's new plans which are said to be broad and far reaching. The new concern has an authorized capitalization of $10,000, and the incorporators are: Joseph Merkel, 284 Washington Place, Flatbush, N. Y.; Frederick R. Huntington and L. Schreiber, both of 20 Broad Street, New York.

Root of Large Concern

In a talk with a **Motor Cycle Illustrated** man, Merkel explained that the new concern is simply the nucleus of a large organization which will be formed when the inventor's plans are fully matured. It is whispered about throughout the trade that other trade men equally as well known as Merkel himself are deeply interested in the new venture.

While full details are not yet forthcoming—Merkel says they will not be for three weeks to a month yet—those in the know state that Merkel's latest invention is a bicycle motor attachment of radical design. Its chief claim to novelty arises from the fact that it displays a motor so built into a bicycle wheel that the wheel itself is interchangeable with the rear wheel of any make of bicycle so that the power plant is supported without the slightest strain on the bicycle itself, and without placing any weight upon the frame. Merkle has been working on the invention for many months past and has devoted his entire time to it since he left the services of the Autoped Co. of America, some months ago. Most of the experimental work has been done in a laboratory which was established in Corona, L. I., and which he is still maintaining until plans for the manufacture of the device are fully consummated.

Joseph F. Merkel

Concern with Nominal Capitalization of $10,000 Is Nucleus of Organization to Manufacture Bicycle Motor Attachment.

As to possible price and date when the machine will make its trade bow, not a word is forthcoming from Merkel or other sources.

HEINIE ROBERTS SEES TRADE IN LOS ANGELES

LOS ANGELES, Cal.—Heinie Roberts, booster extraordinary for Troxel saddles, is in Los Angeles. It will be a good thing for Coast jobbers and dealers to listen to his line of talk about the big work in building trade enthusiasm and turning enthusiasm into sales that he has seen in his travels. The Troxel people are experiencing an extraordinary demand for their goods from the bicycle trade. Roberts is right at home among the dealers and riders of Pacific Coast; he says he finds so many boosters for the Troxel.

WALD INCREASES TANDEM PRICE

SHEBOYGAN, Wis., Aug. 28.—The Wald Mfg. Co., makers of the famous Wald tandems, foot-rests, luggage-carriers and other motorcycle and bicycle specialties, announces an increase of prices on their famous number 422 tandem from $5.50 to $6.50. E. P. Pawsat, of the Wald concern, explains the increase as due to the higher cost of both materials and labor.

WAY PAVED FOR MOTORCYCLE BODIES' MERGER

M. M. A. and M. and A. T. A. Committees Meet at Detroit and Revise Constitution and By-Laws of Former—Racing Situation Discussed and Buffalo M. M. A. Meeting Called

DETROIT, Aug. 26.—That Constitution and By-laws, which has served the Motorcycle Manufacturers' Association so well for the past three years, was recast at a meeting of the reorganization committees of the M. M. A. and the Motorcycle and Allied Trades Association which convened at the Hotel Pontchartrain here today and then adjourned to the rooms of the Detroit Athletic Club, where the real business of the day was transacted. Those in attendance were: T. W. Henderson, president of the M. M. A.; E. J. Mueller, assistant sales manager of the Harley-Davidson Motor Co.; George T. Briggs, of the Wheeler-Schebler Carburetor Co.; Daniel R. Walls, advertising manager of the Splitdorf Electrical Co., and E. F Hallock, secretary of the M. M. A.

Merger Necessitates Change

The necessity for recasting the documents in view of the coming merger of the two trade bodies was seen at the Atlantic City convention and the committees were appointed to consummate the work. Provision was made for changing the name of the M. M. A., which will henceforth be known as the Motorcycle and Allied Trades Association, and for broadening the scope of the association to include other than simply manufacturers of motorcycles. At the same time the reorganizers seized upon the opportunity to eliminate many clauses in the old constitution giving rise to red-tape which hampered the association in the accomplishment of its purposes.

Aside from such changes, the only radical accomplishment was in the enlargement of the number of directors, from five to seven, to include representatives from the parts and accessories trade.

The tentative changes will be submitted to the M. M. A. attorney for legal advice, and whipped into final shape for adoption at the special meeting of the M. M. A. in Buffalo on September 14. At this special meeting the two associations will formally be merged.

While the committee was not appointed to consider that matter, the attitude taken by Harley-Davidson Motor Co. in calling off its twin racing machines from mile tracks and singles from half-mile tracks, was discussed freely, and it was the sense of the meeting that it would be a wonderful thing for the trade if the other manufacturers, now supporting racing teams, would follow suit. Those present expressed themselves as desirous of seeing the F. A. M. stage a series of ten race meets during the next racing season, each meet to take place either on a speedway as safe as the Chicago and Sheepshead Bay tracks, or else on a two or three mile dirt oval, with ample factory and trade supervision to eliminate, as far as possible, all element of danger. It was decided to bring this matter up at the next M. M. A. meeting for action by the trade at large.

The withdrawal of the Harley-Davidson twins from one mile competition came as a result of the death of Bill Brier on the Belmont track following a fence collision.

Aside from amending the Constitution and By-laws and going thoroughly over the racing situation, the M. M. A. at the special meeting next month will have many other things of deep trade significance to consider. The report of the Universal Service Committee of the M. and A. T. A. will be submitted for consideration by Chairman Lacy Crolius, as well as the report of the committee appointed to draw up, in concrete form, all of the motorcycle's selling points. Many other matters of deep significance to the trade will be thoroughly discussed and threshed out.

HAUK BECOMES QUINLAN'S ASSISTANT

CLEVELAND, Ohio, August 28.—C. E. Hauk, who heretofore has handled the distribution of the Cleveland lightweight motorcycle throughout the states of Indiana, Illinois and Wisconsin has been appointed to the post of Assistant Sales Manager of the Cleveland Motorcycle Mfg. Co. under Sales Manager W. S. Quinlan.

Mr. Hauk has established, through his success in placing the Cleveland on the market in the Central States, an enviable reputation as a high grade man. He has a broad knowledge of lightweights and is chuck full of enthusiasm for the Cleveland. While boosting the Cleveland he has made many friends both in and out of the trade.

The territory formerly covered by Hauk will be handled direct from the Cleveland office. Indicative of the bigness of the dent which the little Cleveland has made on the motorcycle industry in the single year that it has been offered, is a statement by Treasurer H. G. Alexander to the effect that they are daily receiving a large number of inquiries for Cleveland territory from interested dealers and that they anticipate a much larger volume of business for the coming season than they were able to handle during the past.

C. E. Hauk of the Cleveland

CORBIN-BROWNS STANDARD ON LATEST U. S. ORDER

NEW BRITAIN, Conn.—Corbin-Brown Speedometers have been specified as standard equipment on the 63 Indian motorcycles recently ordered by the United States War Department. This is but one of several orders by the Government on which this product of the Corbin Screw Corporation was specified, and the choice in the present instance was therefore not a matter of surprise to the corporation.

"The Corbin-Brown speedometer was tested some years ago in the Government laboratories," said an official of the firm, "and it was found to be accurate under all conditions. The findings have been substantiated by the actual performances of thousands of the instruments since. The excessive heat to which speedometers are subjected along the Mexican border necessitates the use of an instrument immune to temperature changes in any degree. It is with this requirement in mind that we feel the War Department chose the Corbin-Brown."

UNITED STATES TIRE HOST TO FIREMEN

PROVIDENCE, R. I., Aug. 29.—The United States Tire Company will entertain the delegates and other visitors to the International Firemen's Convention here in various ways. The convention being held here this week sees hundreds of firemen in the city.

The tire company set aside one day as visiting day to its plant and the firemen were shown all over the big Valley street establishment. In addition the company distributed hundreds of souvenirs, one of them a watch fob with an ornament representing the International Association of Fire Engineers.

That the chiefs might become somewhat familiar with the working of the plant and its product the company will have its solid tire representatives from all parts of the country in this city during the entire week.

Friday the chiefs will be the guests of the company on a trip to Newport and will be given shore dinners, rides, and the like.

GEORGIA DEALERS TO MOVE

AUGUSTA, Ga., Aug. 27.—Patrons of Foucher's Gun, Lock and Bicycle Works will be well taken care of at the firm's new store at 1148 Broad street, when they take up their residence in a more commodious and convenient location. A complete line of Great Western and Cleveland bicycles and bicycle accessories will be carried at all times by this hustling firm.

EMPIRE STATE ASS'N CAUSES ALARM

Newly Incorporated "New York State Motorcycle Association" Viewed as Graft Body by Dealers

NEW YORK, August 28.—The incorporation of a body under the style "New York State Motorcycle Ass'n" is causing a furor among the motorcycle dealers of the state. The alleged purposes of the association are to procure favorable motorcycle legislation, to promote race meets, to establish a chain of official motorcycle hotels and to maintain a motorcycle information bureau for the benefit of its members.

Promise of "Bargain Prices"

The high-sounding purposes of the organization are offset to no small degree by the fact that it holds forth the promise to its members of ability to purchase motorcycles, parts and accessories at reduced rates from certain dealers whose co-operation is to be enlisted. In other words for a small membership fee the association holds forth the glowing promise of being able to save its rider members considerable sums in the course of a year on the costs of parts and fitments. The scheme, it is pointed out by those motorcycle dealers who are live enough to look under the thin varnish which gives the scheme its glowing hue is simply a modification of the co-operative purchasing plan which so long infested the automobile industry revamped and dished out to the more susceptible of motorcycle riders.

Dealers May Organize

That very many dealers will be foolish enough to give away five or ten per cent. of their hard earned profits simply on the promise of a large volume of business from the State association cannot be believed, but at the same time the situation is one that is causing conservative dealers throughout the state to sit up and take notice and it is not unlikely that if in the development of events the association should assume any large proportions the dealers will organize to combat the movement.

BECK ELATED OVER F. N. GOVERNMENT ORDER

NEW YORK, Aug. 29.—Smiling Alfred Beck, who holds forth at 1691 Park avenue with Rogers side cars and F. N. attachments and a few other things, is highly elated over the fact that the order for 63 Indian motorcycles for the United States Army, which came through last week, included one for as many F. N. attachments. Beck says that it is not the first official recognition of the merits of the F. N. products; simply the culmination of many years of thoroughness and dealing with the government.

"Talk about preparedness," says Beck, "the tandems were shipped the very day the order was wired to the F. N. factory at Detroit."

FIRESTONE OFFICIALS HAVE ANNUAL AFFAIR

AKRON, O., Aug. 26.—Some 225 foremen, superintendents and other officials of the Firestone Tire & Rubber Co. held their annual outing at the home of Amos C. Miller, of Castilia today. Mr. Miller is vice-president of the company, and his large farm offered an ideal gathering place for the Firestone officials. The Firestone men journeyed to the farm in half a hundred automobiles and celebrated the day with foot races, a baseball match, boxing contest and other athletic games.

BECK IS MOVING TO 1691 PARK AVE., NEW YORK

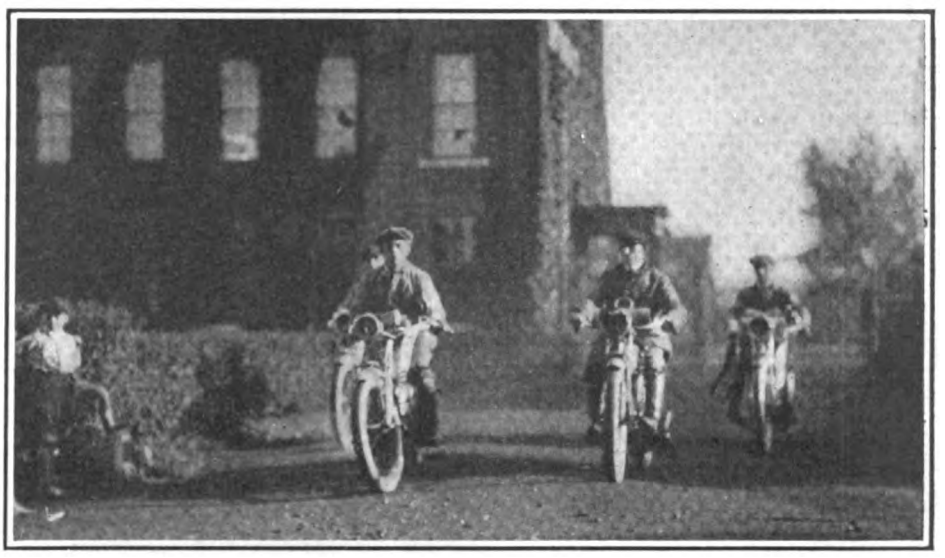
NEW YORK, Aug. 31.—Irving Beck, Eastern representative for the Rogers Manufacturing Co., maker of Rogers sidecars, is moving from his present location at 1493 Fifth avenue, to 1691 Park avenue, near 119th street. The new building will have greatly increased facilities for both shipment and storage purposes over that now occupied, and with Beck's warehouse on East 117th street, immediate care can be taken of any order whatsoever.

Mr. Beck states that he made the move to take better care of the great increase in business which the 1916 season in sidecars has foreshadowed and of which there are ample signs in the form of orders for Fall delivery now in hand.

EDISON AND FIRESTONE ON MOTOR TRIP

ORANGE, N. J., Aug. 28.—Thomas A. Edison, the electrical wizard, and Harvey S. Firestone, of the Firestone Tire & Rubber Co., Akron, O., started today from the Edison laboratory for a two-weeks' automobile trip to the Catskill, Adirondack and Green mountains. The two men were accompanied by a motor truck with camping equipment. They will be joined later by John Burroughs, the naturalist.

EAST JERSEY QUARTET VISITS HOME OF POPE



Brignoli-Fuchs and Cornes of Hoboken Drop in on the Pope Plant

WESTFIELD, Mass.—P. Brignoli, with William Fuchs, Al. Graziano and P. Cornes, all of Hoboken, N. J., recently rode to Pope headquarters—the Westfield Mfg. Co., in this city. They all mounted twin models of Pope motorcycles. The four were shown through the plant and all were impressed by the unusual facilities for motorcycle manufacture and the atmosphere of business which pervaded the whole of the factory.

Brignoli, who handles the Pope in Hoboken, rode the latest three-speed model on this trip. He was enthusiastic about this and other models which are produced by the Westfield concern.

Visitors of a Month

Others of the many visitors at the Pope plant within the last month were E. V. Schrader, Boston, Mass.; F. A. Baker, New York; T. P. Godfrey, Salem, Mass.; W. W. Britton, Beverly, Mass.; Walter Babb, Pope dealer, Paterson, N. J.; F. E. Freed, Allentown, Pa.; Joseph Dabaghian, Paterson, N. J.; Fred S. Jones, Beverly, Mass.; Charles Krebs, Pope dealer, Newark, N. J.; Charles Ferris, Pope dealer, Albany, N. Y.; H. P. Ovam, Beverly, Mass.; Joseph Decker, Albany, N. Y.; C. A. & W. H. Pettis, Worcester, Mass.; Merton Alden, Palmer, Mass.; J. J. Richel, Amsterdam, N. Y.; G. A. Koch, Amsterdam, N. Y.; D. L. Bottomly, Worcester, Mass.; A. Pariseau, Worcester, Mass.; P. Navas, a well known dealer of Havana, Cuba; A. Scaison, of the Progressive Cycle Company, New York City; George J. Roth, Altoona, Pa.; H. W. Johnson, Brattleboro, Vt.; Perley T. Martin, Brattleboro, Vt.; Frank Knauber from Syracuse, N. Y., who rode on a Pope three speed twin; Arthur St. Clair, Beverly, Mass.; Howard Ferguson, Pope dealer of Grand Rapids, Mich.; N. Crary and R. Crary, Hartford, Conn.; A. J. Mathien, Willimantic, Conn.; F. Huber, Newark, N. J., also Chas. Hambach, Andrew Carl, Altoona, Pa.; W. Duleina, Sheffield, who is still riding a two speed model; R. H. Cutter, Boston, Mass.; Edw. Daner, Yonkers, N. Y.; Oscar Kerman, Mt. Vernon, N. Y.; Theodore W. Hay, Union Hill, N. J.; M. Brothuson, Joplin, Mo.; H. G. Wolzendorf and W. C. Martin of St. Louis Mo.; Otto Bryjerm, Buffalo, N. Y.; R. J. Smith, Hartford, Conn.; W. S. Smith, Ossining, N. Y.

COLUMBUS MEET HOLDS FORTH BIG PROMISE

Promoters Have Been Bending Every Effort to Attract New Blood to the F. A. M. Rejuvenation Meet September 2 and 3—Harley-Davidson Action Will Not Hamper Meet

COLUMBUS, Ohio, Aug. 28.—If unbounded enthusiasm coupled with a whole lot of grit and no small measure of good hard work can make a motorcycle race meet a full fledged success, then that two day affair which is being staged under the direct auspices of the F. A. M. on the Columbus Driving Park track on Saturday and Sunday, next, Sept. 2 and 3 should be a world beater and nothing short of that.

Temporary Office Opened

Under the guidance of Shelby A. Falor, head of the motorcycle and bicycle department of the Goodyear Tire & Rubber Co., and newly elected to the presidency of the F. A. M., T. R. Thomas, also of the Goodyear concern, has opened up a temporary office in this city and has been for the past two weeks busily engaged in working up the details of the coming rejuvenation meet. Thomas is by no means alone in the work, for although he is one of the busiest men in the Goodyear organization, H. S. Quine, private secretary to President Seiberling, of the Goodyear Co., has with a degree of self-sacrifice which characterizes his many other doings for the good of the bicycle and motorcycle industry, made several trips to Columbus and gotten in touch with many of this city's most prominent people and been promised their full support in co-operation. It is Quine's plan, aim and hope to make the coming affair attractive to folks who have not been interested in motorcycles and motorcycle meets heretofore, and he holds forth the promise that the meet will be well attended by Columbus's elite.

Military Demonstration

While a fair proportion of the 40,000 National Guardsmen who were enmassed at Camp Willis preparatory to entraining for the Mexican border have been dispersed to that point or others, there still remains a detachment of 10,000 troops and their cooperation has been enlisted to give the affair a distinct military flavor. Each, the Harley-Davidson factory, the Excelsior factory, and the Indian plant have sent or are sending military machines to Columbus to be used by the "soldier boys" in a military demonstration of the motorcycle's value preceding the race meets, and it is figured that this feature event will appeal to many folks who would not attend the race meet for itself alone. Governor Willis, of Ohio, has tentatively given his consent to officiate at the race-meet and fire the starting gun, while Col. Zimmerman, in charge of the encamped troops, will hold down the post of honorary referee.

The Booster Badges

Some 500 neat little purple and gold F. A. M. "Booster Badges" have been sent out to trade folks who are chiefly concerned in the welfare of the national rider's organization. The badges, which are priced at $10 a piece, entitle the wearer to full track privileges and it is expected that by this means at least $2,000 will be raised; and there is hope that the gate receipts, after the expenses incidental to staging the meet have been deducted, will show a profit of another $3,000, all of which will go to the F. A. M. treasury.

The F. A. M. "Booster Badge" Which It Is Expected Will Go a Long Way Toward Paying Off the Federation's Debt

That the action of the Harley-Davidson factory in withdrawing its support of races of the 61 cubic inch class on single-mile tracks will seriously hamper the meet is denied by those chiefly instrumental in its promotion. As a matter of fact it is pointed out that the two-day meet embraces six amateur events for which the Bosch Trophy is hung up as a prize and that these amateur events are filling in in an unexpected manner and will no doubt overstep the "pro" events in point of interest. The amateur events, of course, are not affected at all by the action of the Harley-Davidson factory. In the matter of the professional events it is also pointed out that both the Indian and the Excelsior factories will have their teams on hand and furthermore the cream of the field of free lance "pro" riders who have been riding in the Interstate Racing Association's meets throughout the middle west during the season will be on hand to lend class to the affair.

In the matter of finances, President Falor has appointed F. J. Weschler of the Indian, Fred Mathis of the Excelsior, Walter Davidson of the Harley-Davidson, W. D. Callender of *Motorcycling and Bicycling*, and J. Leo Sauer of **Motor Cycle Illustrated** as a committee to handle all money in connection with the F. A. M. meet.

FREED IS GETTING BIG SHIPMENTS THESE DAYS

SAN FRANCISCO, Cal.—A. Freed, head of the Pacific Motorcycle Supply Company, Indian distributor, is expected home in about a week from an eastern trip, on which he has spent about a month in the effort to accelerate shipments. He seems to have succeeded, as the goods are now coming through in considerable quantities, and he will be in a strong position regardless of railroad troubles. A car of Indian bicycles has just come in, and two more cars of Indians and one of Reading-Standards are on the way.

There are also three cars of Indian motorcycles due before long, with one full carload of sidecars. H. L. Pfeiffer, the store manager, says the demand for sidecars has been something extraordinary; the local house has been cleaned out, and inquiries have lately been received from the distributors at Portland and Los Angeles, who had orders they could not fill.

CLUB IS BOOSTING FIRST F. A. M. RUN

KANSAS CITY, Mo., Aug. 24.—The Kansas City Motorcycle Club is making every effort in promoting its first annual F. A. M. endurance run from this city, to make its success certain. According to the president of the club C. E. Whitcomb, more than twenty-five members have already entered the contest. The aggregate value of the prizes totals more than fifty dollars.

COLORADO REGISTRATIONS SHOW GAINS

DENVER, Colo., Aug. 28.—One person out of every twenty-five in Colorado owns some sort of motor vehicle according to the Secretary of State in his report for the first six months of 1916. At the present time there are 36,012 motorcycles and automobiles in Colorado—a gain of 33 per cent. over the total number for the half year. Denver has 9,979 of this number.

MILITARY HUE FOR 1917 HARLEY-DAVIDSONS

Many Motor Detail Refinements Result in Greatly Increased Power for the New Milwaukee Offerings —Olive Drab Color, Front Wheel Stand, and Hand-Operated Brake Among the Novelties

MILWAUKEE, August 31.—Detail improvements and refinements, which have resulted in a motor of considerably increased power over the 1916 motor, and a change of color from the good old gray, in which it always, heretofore, has made its bow, to the olive drab military hue, the addition of the handle bar operated band-brake and a front wheel stand of new design, are the biggest of many things which distinguish the 1917 offerings of the Harley-Davidson Motor Co.

In obtaining the marked increase in power which characterizes the new motor, it is well to point out that the Harley-Davidson engineers have done nothing that is radical unless it be the fitting of the new non-condensing inlet manifold which, perhaps, is the chief contributing factor to the power increase. At the same time the fitting of this manifold has resulted in a much smoother operating motor, and one with a "pick-up" that closely approaches the phenomenal if, indeed, it is not phenomenal. Other and likewise important sources of increased power are a slight alteration in the carburetor design, the fitment of new cams and valve springs, and a new double row type of roller bearing in place of the ball type bearing formerly used on the drive side of the motor; and, taking their cue from the success which the enclosing of the exhaust valve springs and tappets on the 1916 model met with, the Harley-Davidson folk have gone one step further, and on the 1917 model have also fully enclosed the inlet valve springs and tappets. Just as these changes make for increased power they also make for a more nearly silent motor.

EQUIPMENT WHICH ADDS CLASS TO 1917 HARLEY-DAVIDSON MODELS

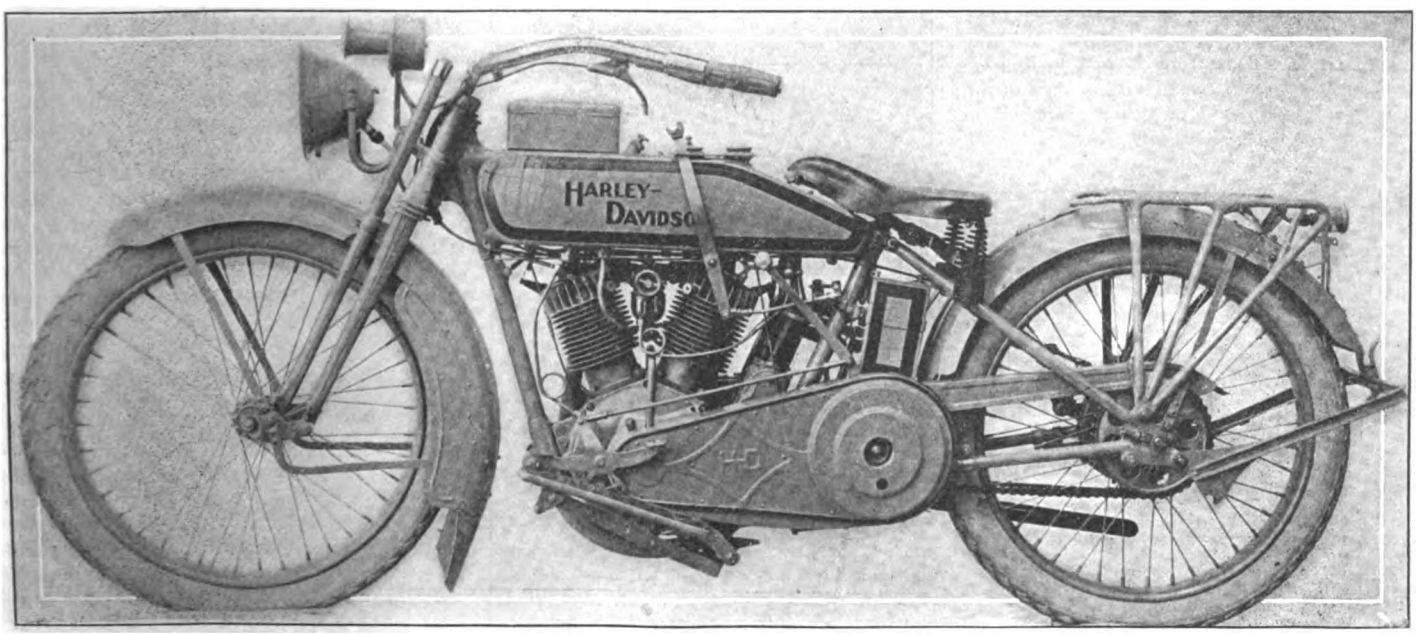
CARBURETER—Schebler; Wheeler-Schebler Carburetor Co., Indianapolis, Ind.
MAGNETO—Dixie; Splitdorf Electrical Company, Newark, N. J.
LIGHTING SYSTEM—Remy lighting and ignition system; Remy Electrical Company, Anderson, Ind.
SPARK PLUGS—Champion; Champion Spark Plug Co., Toledo, Ohio.
STORAGE BATTERY—Exide; Electric Storage Battery Co., Philadelphia, Pa.
SADDLE—Troxel; Troxel Mfg. Co., Elyria, O.
ELECTRIC HORN—Adams Bagnall; Adams Bagnall Electrical Co., Cleveland, O.
ELECTRIC LAMPS—Solar, head and tail; Badger Brass Mfg. Co., Kenosha, Wis.
CHAINS—Duckworth; Duckworth Chain & Mfg. Co., Springfield, Mass.
SPOKES AND NIPPLES—National; National Screw & Tack Co., Cleveland, O.
TIRES—Firestone; Firestone Tire & Rubber Co., Akron, O.; Goodyear; Goodyear Tire & Rubber Co., Akron, O.; United States; United States Tire Co., New York.
FRAME PARTS—Standard Welding; Standard Welding Co., Cleveland, O.
CYLINDERS—Wisconsin; Wisconsin Cylinder Foundry, Racine Junction, Wis.

In the case of the Harley-Davidson models, at least, the prophecy that was made in **Motor Cycle Illustrated** a couple of weeks ago, that prices would go up on all two-wheelers has come true, for each of the Harley-Davidson models is priced at just about $10 over and above what was charged for the respective 1916 machines. The increased prices, of course, are due to the present abnormally unsettled state of the materials market and the labor market.

Eight models of machines are offered by the Harley-Davidson folks for the 1917 season. These are: Model 17-J, twin cylinder, three-speed, electrically-equipped, $310; 17-F, twin cylinder, three-speed, magneto ignition, $275; 17-E, twin cylinder, single-geared, $255; 17-C, single cylinder, three-speed, $240; 17-B, single cylinder, single-geared, $215; 17-T, stripped stock twin, $280 and 17-S, stripped stock single, $225. Prices in all cases are f. o. b. factory at Milwaukee, Wis.

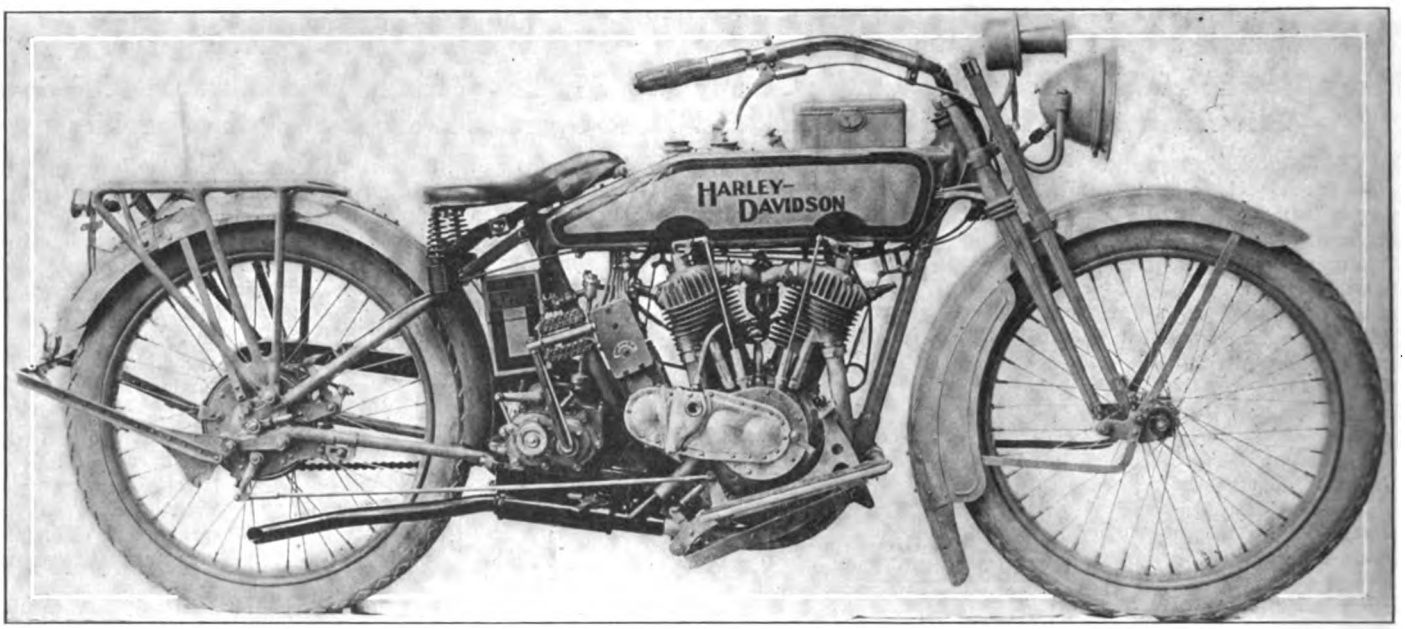
In addition to the machines, the Harley-Davidson Motor Company is offering Model 17-L, a sidecar, at $80; Model 17-LC, the chassis for the sidecar at $55; 17-M, a sidecar, $70; 17-N, an R. F. D. van, $72; 17-U, a commercial sidevan with low style box and open top, $100; 17-V, a sidevan with low style box having covers, $110; 17-P, a sidevan with high compartment body, $125 and Model 17-PC, chassis including wheel, $100.

The 1917 Harley-Davidson motor, while powerful and extremely flexible, is also superior in economy to that of 1916. It keeps comparatively cool under all working conditions, a valuable feature as regards efficiency in internal combustion motors. At all speeds it is quiet and smooth in action. When throttled down, it digs in and pulls



Left Side of Model 17-J, Three-Speed Electrically-Equipped Twin. Note New Rear Stand Construction and Classy Lines

Digitized by Google



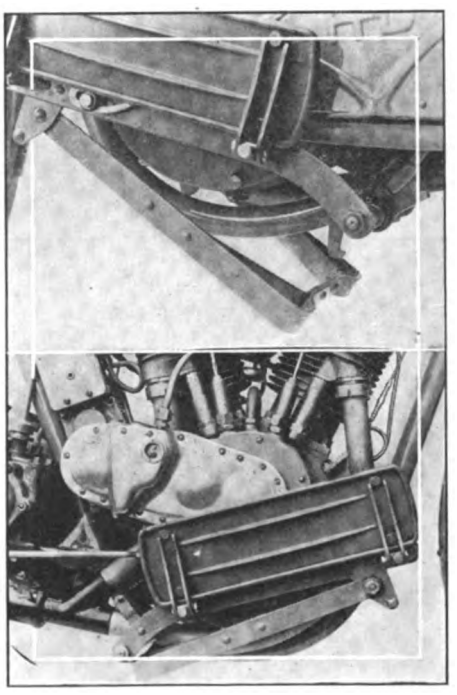
Model 17-J Viewed from the Right, Showing New Starter Pedal in Folded Position and Front Stand Under Footboard

steadily, a feature which is most desirable in rough-going and which does away with the necessity of rushing hills. As compared with the 1916 product, the new motor develops by actual test, better pulling power with a 4.39 ratio on high gear than the 1916 motor did with a 4.73 ratio on high.

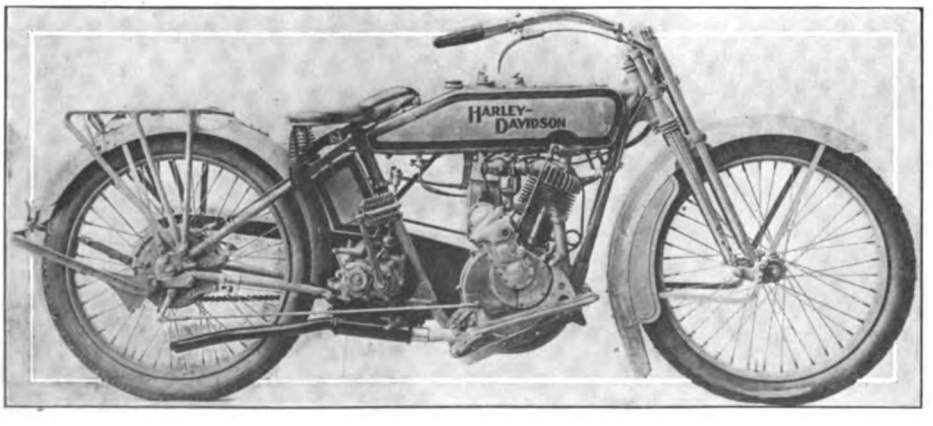
Correct carburetion is an important feature of this motor. The engineers at the Milwaukee factory have devoted much time to this subject during the past three seasons and in the 1917 powerplant, the high velocity, non-condensing intake manifold is a contributing factor to this result. In connection with a modification of the Schebler carbureter for use with this motor, the manifold ensures the deliverance of a uniform mixture, regardless of speed and temperature variations. The result is a remarkably quick pick-up, whether the motor is used solo or for hauling a sidecar.

New Roller Bearing

There are other factors which contribute to the increased speed and power of the motor and chief among these is the new bearing on the left or drive side of the crankshaft. This bearing is of the double-row roller type, each roller being 9/32 of an inch long, making a total bearing surface of 9/16 of an inch. The new bearing, which replaces the ball-bearing used on 1916 Harley-Davidson motors, is made throughout in the factory and is similar in design to the bearing which has been used with such marked success during the past four years



Top, Front Wheel Stand Unlatched; Below, in Latched Position



Single Cylinder Model 17-C, with Three-Speed Gearset, Double Brakes and Front Stand

in the big ends of the connecting rods.

The sprocket shaft itself forms the inner race of the bearing, thus greatly simplifying the construction at this point and reducing friction to a minimum. Ample provisions are made for oiling the bearing. An oil channel leads into it from the crankcase and after the oil has run through the bearing it is diverted by a deflecting ring through a second channel at the bottom of the bearing. It thus returns to the crankcase, assuring at all times a complete circulation of lubricant. The deflector acts as an additional oil guard to the felt washer which has been standard practice on Harley-Davidson sprocket shafts during the past two seasons and there is no possibility of leakage at this point.

Another improvement for the new season is a hardened steel facing ring on the outside of the flywheel to take side-thrust. This ring is used in connection with the new roller bearing on the drive side of the crankshaft.

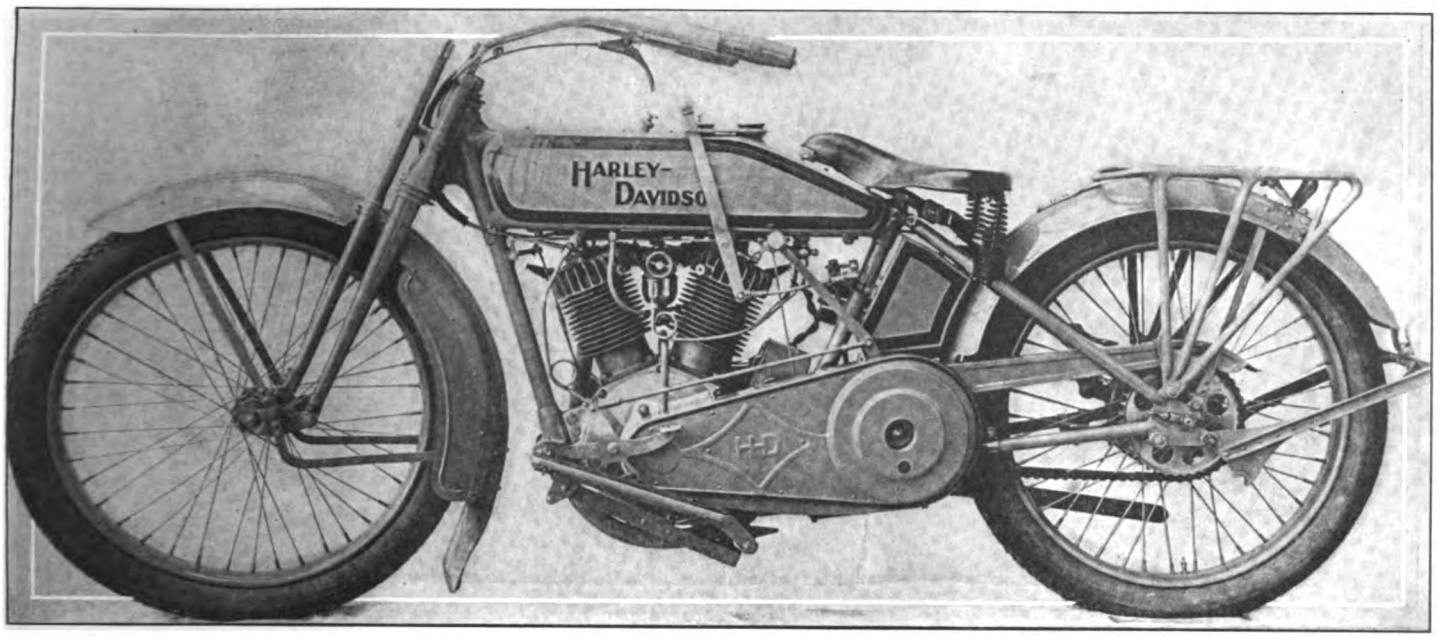
Enclosed Push Rod Springs

The intake push rod springs are enclosed on the 1917 motor. The enclosing of the exhaust valve springs last year was productive of such good results that it was naturally followed by the casing in of the intake springs. More coils are provided in the intake valve springs than in 1916, to ensure uniform tension, and with improved cams and push rod springs designed to make the rollers follow the cams at all speeds, the possibility of rocker arm chatter is reduced to a minimum. Neatness and silence in operation are the results of this construction.

A longer guide has been fitted to the intake valve stem to minimize wear and to assure further satisfactory service after the attainment of big mileage. The angle of the intake valve seats has been reduced to assure longer and better seating without regrinding. There are also more coils in the exhaust valve springs and the coils are wound by an improved method to prevent distortion and give longer life.

Ventilated intake valve housing caps are fitted to the 1917 Harley-Davidson motor. These provide adequate radiation and as-

Digitized by Google



Three-Speed Twin Model 17-F with Magneto Ignition Showing Typical Harley-Davidson Clutch and Gear Control

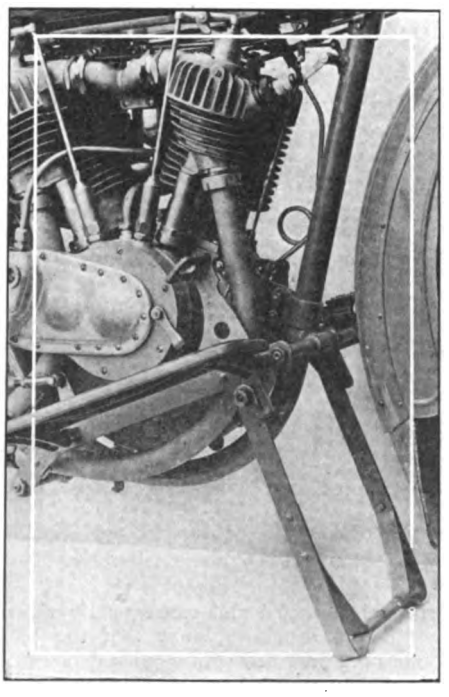
sure the springs retaining their temper by being kept reasonably cool. A special steel made to factory specifications is used in the roller arms and a larger bearing surface is provided. The intake lifter arms are also fitted with rollers. These improvements not only contribute toward quietness, but give a much longer life without wear and maintain valve action adjustments for a longer period of service.

For sidecar service, the 1917 motor is fitted with a three-ring piston and has a ⅛ of an inch shim under the base flange, this being to reduce the compression for sidecar work. The advantages of this method are chiefly in that a motor for solo service can be changed to a sidecar motor and back again very quickly. The difference in compression between the two motors is 5/6 of an ounce. No extra charge is made for the sidecar motor when specified by the purchaser at the time of getting a new machine.

Three-Point Air Adjustment

The new Schebler carbureter used on 1917 Harley-Davidson models has a noticeably larger air valve. There is a three-point adjustment on the starter knob of this carbureter. With this new device it is possible to cut off the air entirely, as in the 1916 models, or to use any of three different degrees of tension on the air valve by turning the knob and pin into one of the three holes provided for the purpose. This improvement, though simple, is of great value in starting in cold or damp weather.

Closely connected with the new air valve device and the high velocity, non-condensing intake manifold is the new needle valve actuating cam on the carbureter. When correct adjustments have been made on the carbureter for the best results, it is not necessary for the rider to subsequently disturb them to obtain maximum speed and power at different times. The needle valve actuating cam gives the correct mixture for all normal speeds and for ordinary service. Realizing, however, that some riders desire excessive speed, the new carbureter has also been fitted with a larger auxiliary air shutter on the side.



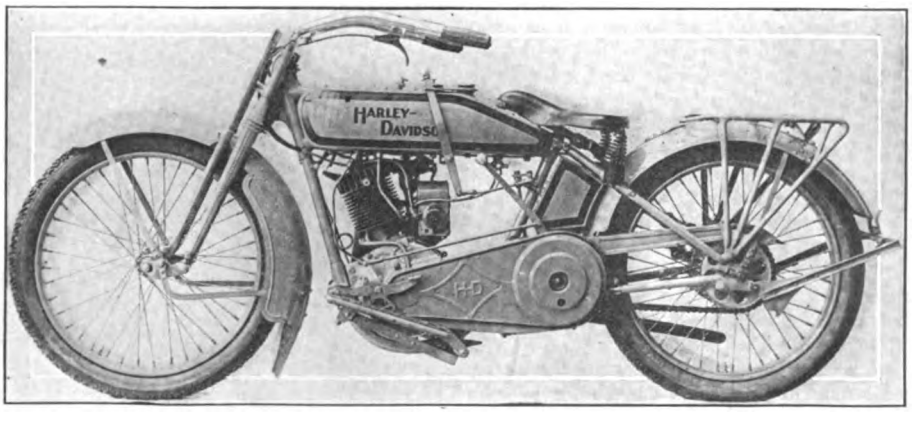
New Harley-Davidson Front Wheel Stand Down—Note Method of Attachment to Footboard Brackets

The new color of the Harley-Davidson machine is bound to attract attention because the standard color for years has been a gray. The 1917 color is military olive drab with dark striping. The chief reason for the change in color was the large demand by dealers for machines enamelled according to army specifications.

Front Wheel Stand

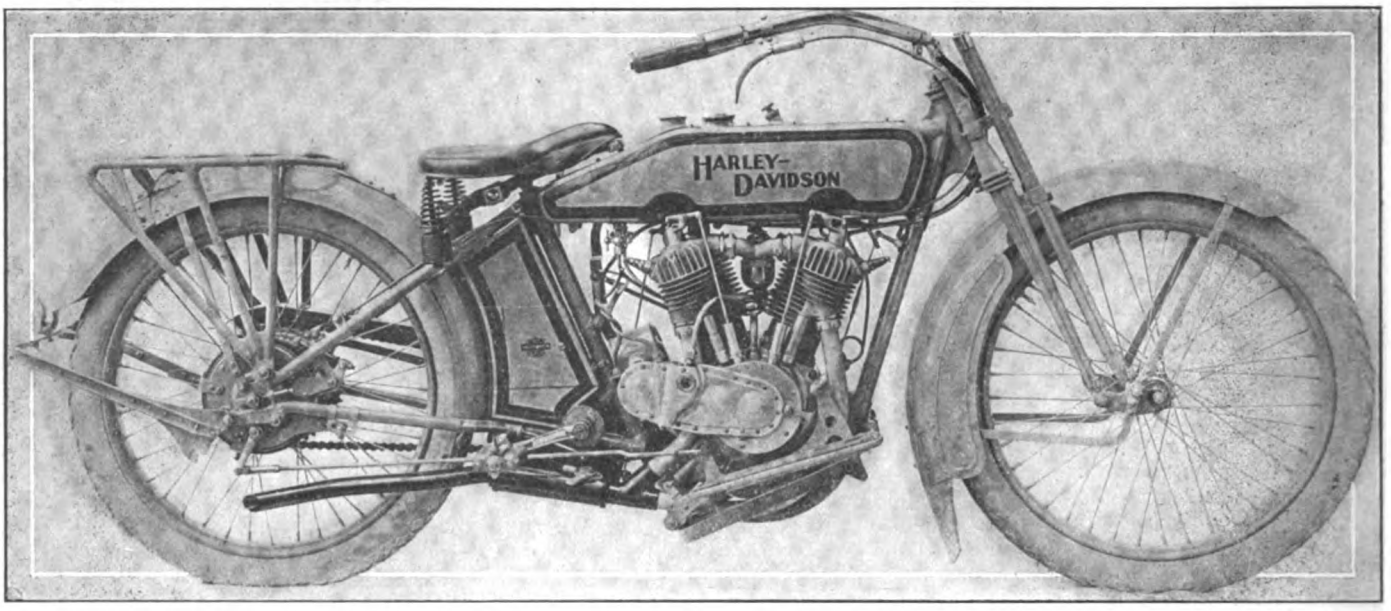
A front wheel stand, decidedly an innovation in American motorcycle practice, is another improvement. This stand is concealed under the footboards, swinging on the footboard sidebars and is held securely by a latch on the rear footboard stud. When the stand is latched it is completely out of the way, but it can instantly be released by stepping on the lever of the latch. The stand in combination with the knock-out front axle makes it a simple matter to take out the front wheel for tire repairs or any other purpose. It might be noted here that castellated nuts are used on the front axle.

The rear wheel stand has been remodeled to give greater ease in placing the machine on it. The increased leverage makes it possible to lift the machine on the stand with one hand, and this has been obtained by increasing the leverage on the rear axle clip forging. The forging has been design-



Model 17-C Viewed from the Left Showing Graceful Lines of Tank and Frame

Digitized by Google



Model 17-E Twin Cylinder Single-Geared Model Incorporating Double Brakes, Front and Rear Stands and Step Starter

ed with a lower extension to support the wheel and the axle when so desired, a great convenience when making tire repairs or chain adjustments. The right axle nut has been made more accessible when a sidecar is fitted.

A hub improvement is the grease channel to the left side of the rear hub, assuring thorough lubrication at all times. Heavy spokes are used on all wheels, including that for the sidecar.

Hand Brake Fitted

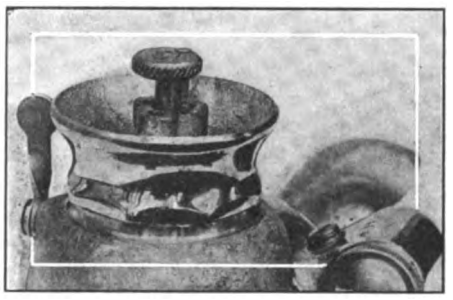
A hand brake operated from the right handlebar is another valuable improvement on the 1917 Harley-Davidson models. This will be appreciated by solo riders in rough going that makes it difficult to keep both feet on the boards. It gives an auxiliary brake which is also valuable in sidecar service. The regular service brake is operated by a pedal convenient to the right footboard, as in former models of the Harley-Davidson. Both brakes operate on the same drum, the hand brake being external contracting and the foot brake internal expanding. The two brakes give ample braking facilities under all conditions, even with a loaded sidecar, and they take off immediately the lever or pedal is released, thus eliminating drag.

The step starter for the new models has a pedal that is interchangeable with the pedal bar heretofore used. Although apparently a minor improvement, it is one that riders will appreciate. The pedal is of sufficient size to support the foot well in starting, and after using it folds neatly out of the way. The new brake and pedal are both of Harley-Davidson design and manufacture.

The chain guard has an extension protecting the under side of the front drive chain. This chain is practically enclosed and the life of the sprockets is thus materially increased, as is that of the chains, also. The bosses on the foot clutch lever, rear operating lever for the hand brake, foot brake lever and lever on the cover of the three speed gearset are spun on with a special riveting machine instead or being riveted. This new method increases the neatness of the machine considerably. Another refinement is the use of pressed steel for the bell crank bracket in place of a casting. The new bracket is heavier than formerly and the bell crank is fastened with a washer and cotter pin.

Quick-Detachable Battery Box

The electric lighted model has become the practical standard and consequently riders will be interested to know that the 1917 models are provided with a quick detachable battery box. This box can be removed by taking out one bolt and loosening two nuts. The advantages of this will be appreciated by users and dealers by reason of the need of weekly battery inspection and adding of distilled water to care for evaporation. In the Model 17-J, it is posible to slip out the battery box in one minute and put it back in the same time. The user can thus see exactly what he is doing with the box out and spilling of the electrolyte into the box is obviated.



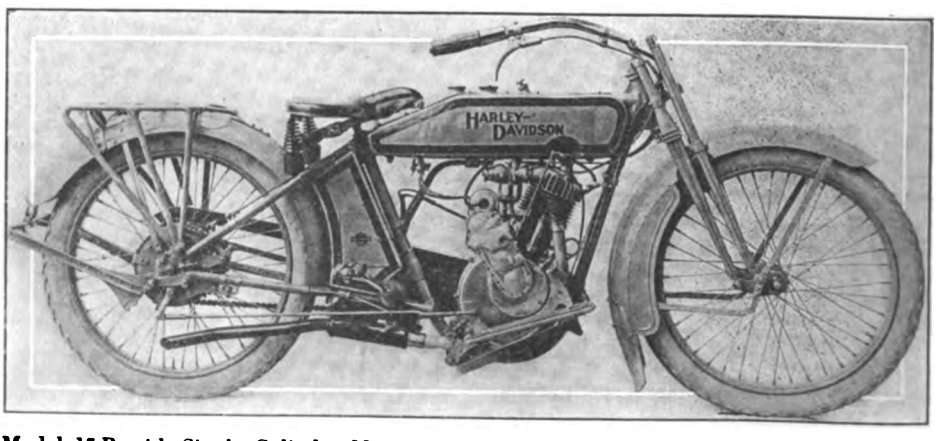
Three-Point Air Adjustment on Harley-Davidson Schebler Carbureter

Other Fitments

For the 1917 season, the Harley-Davidson models will continue the tried and true three-speed gearset, the Harley-Davidson disc clutch, Ful-Floteing seat, mechanical oiler, handlebars and other features which have contributed to its success in past seasons. The handlebar triple clamp is heavier between the bosses than in 1916 and is now fitted with lock nuts. Stream-line tanks with large filler caps are of course continued for the new season. As in 1916 they are die-moulded. The double compartment feature, introduced by the Harley-Davidson, has naturally been retained.

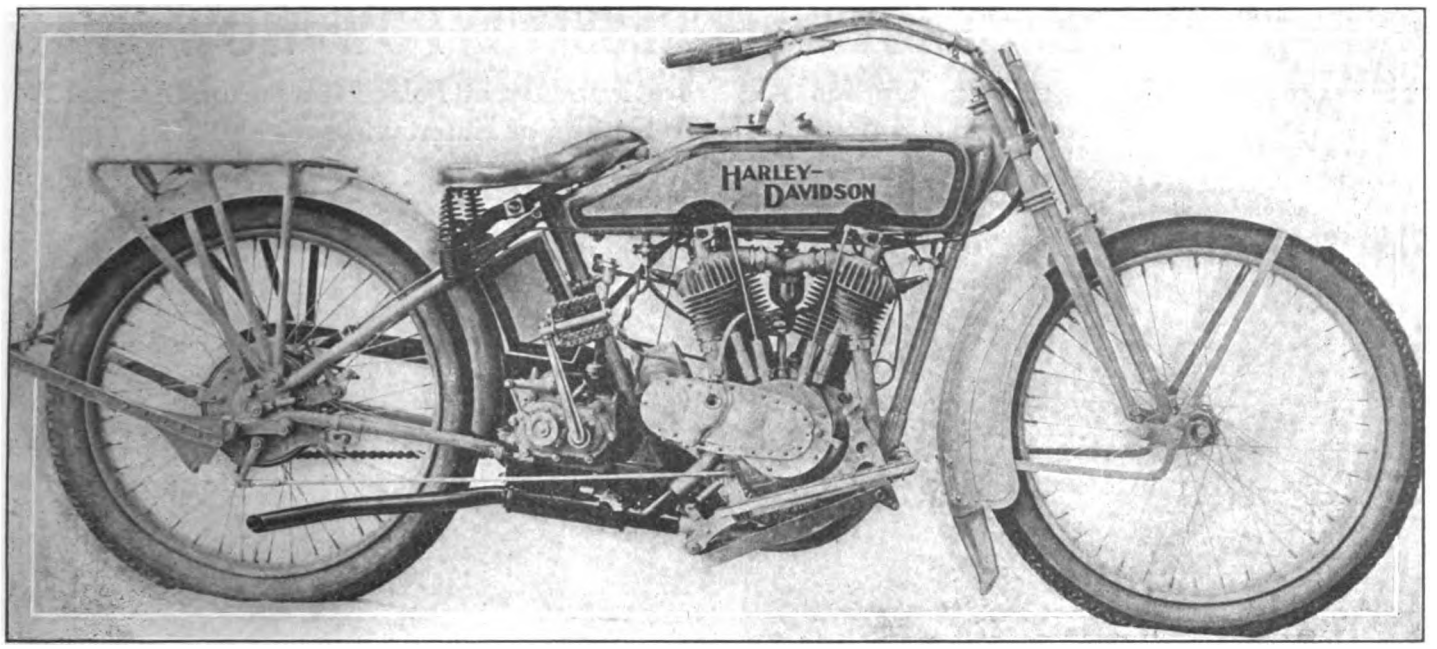
Sidecar Details

The 1917 Harley-Davidson sidecar has new model springs, the front ones having five leaves, and are of the reversed quarter elliptic type. A single leaf may be replaced in case of breakage, whereas, a whole new spring was needed in such a contingency on former Harley-Davidson constructions. The rear springs have three leaves each, and are seven-eighths scroll elliptic. They



Model 17-B with Single Cylinder Motor and Clutch, Double Stand and Brake Equipment

Digitized by Google



Right Hand View of Model 17-F, Three-Speed Twin with New Hand Brake Actuated from Lever on Right Bar

also have this interchangeability feature.

The standard tread on the Harley-Davidson sidecar has met with such a welcome reception and has been used so generally that the chassis has been materially strengthened for use with the axle extended. The sidecar axle has been given increased strength of 60 per cent. to take care of heavy loads that prevail in touring. The sidecar eyebolt is now designed with a hinge action, reducing the strain on the connection between the motorcycle and the sidecar. The ball-and-socket joints are constructed of steel manufactured according to Harley-Davidson specifications. A feature of the new model sidecar is a spring seat cushion which will meet with especial favor with the ladies.

Equipment Used

For 1917, on Model 17-J, the three-speed electrically-equipped twin, the Remy lighting and ignition system, made by the Remy Electric Co., Anderson, Ind., will be used exclusively. This applies also to the Adams-Bagnall electric horn, made by the Adams-Bagnall Electrical Co., Cleveland, O.; the Exide storage battery, made by the Electric Storage Battery Co., Philadelphia, Pa.; Solar electric headlights and tail lamp, made by the Badger Brass Mfg. Co., Kenosha, Wis., are standard equipment.

Champion sparkplugs, made by the Champion Spark Plug Co., of Toledo, O., will be used on part of the Harley-Davidson production for the new season. Duckworth chains, the product of the Duckworth Chain & Mfg. Co., Springfield, Mass., will be fitted to a portion of the 1917 product. On all but the electrically-equipped models, ignition will be by Dixie magneto, produced by the Splitdorf Electrical Co., Newark, N. J.

National spokes and nipples, made by the National Screw & Tack Co., Cleveland, O., will be exclusively used on 1917 Harley-Davidsons. Goodyear tires, made by the Goodyear Tire & Rubber Co., Akron, O., United States tires, produced by the United States Tire Co., of New York, and Firestone tires, the product of the Firestone Tire & Rubber Co., of Akron, Ohio, will be fitted. Certain parts of the frame will be made by the Standard Welding Co., Cleveland, O.

PRESTO TROUBLE LAMP IS USEFUL TO RIDERS

CHICAGO, Ill.—The Metal Specialties Mfg. Co., of 738 West Monroe street, this city, is bringing out the Presto trouble lamp for the use of motorcyclists whose machines are electrically equipped. This lamp is made with full reflector, three inches in diameter, nickel-plated and highly polished. The handle is finished in black enamel, and to each lamp is fitted ten feet of black cotton cord and an adjustable hook hanger.

The lamp is invaluable for general inspection and repair work around a motorcycle. It throws a very strong light with ample spread for all purposes. It is made in both single and double contact styles. The models are: No. 270, without bulb; No. 271, with 6-volt 4 c.p. tungsten bulb; No. 272, same as No. 271, but with either single or double contact anchor plug.

ISHAM ON CREDIT MEN'S COMMITTEE

MILWAUKEE, Aug. 24.—W. D. Isham, credit manager for the Harley-Davidson Motor Co., has been appointed a vice-chairman of the National Committee on Business Literature by the National Association of Credit Men.

COCHRAN COMING BACK

SAN FRANCISCO, Cal.—Neal Cochran, who was in charge of the Excelsior motorcycle exhibit at the Panama-Pacific Exposition and who has since been connected with the Excelsior Motor Mfg. & Supply Co., in Chicago, is on his way back to the Coast. He will arrive in San Francisco this week.

SWENSON STAGES SUCCESSFUL POW-WOW

Providence Indian Man Sets 'Em Up for All Tribal Members at Palace Garden on August 27 —Keen Wrestling Bout a Novel Feature of Entertainment

PROVIDENCE, R. I., Aug. 28.—Gray skies and other ominous signs of wet weather to come threatened to bring about a postponement of the 1906 Pow-wow of B. A. Swenson yesterday at the Palace Garden, near this city. The few Indian riders that came to the Garden in the morning anxiously watched the clouds, but toward noon, the sun burst forth, and with him coming, the guests began to arrive in bunches. At about 1 p. m. over 600 braves, squaws and pappooses had passed the gates and entered the grove. The largest aggregation, 42 strong, came in a few minutes before noon. When master of ceremonies Swenson announced that luncheon was ready, there were over 700 present.

A count of machines made during the lunch hour showed that 101 sidecar outfits, 137 solo and tandem-fitted machines, three Indian Featherweights, six Cygnet Rear Car fitted twins and one Indian bicycle had brought riders and passengers to the Garden. The total of 247 motorcycles made a fine showing parked in the lot opposite the grounds. The machines at the Pow-wow represented every Indian model since 1907. The predominating color was red, but the deep blues, olive drabs and home-finished grays were all the more conspicuous against such a background.

Interesting Wrestling Bout

As each guest of the Providence Indian man entered the gates he or she was given a ticket with coupons for clam chowder, ice cream, soda water and a sandwich. There was much amusement on the part of many in varying the order of taking the soda and ice cream, but the regular noon hour was chowder time. When all had eaten and drunk, the megaphone man announced the *piece de resistance* of the day—a professional wrestling bout between Bob Partington, of Attleboro, Mass., and Bobby Watson of California. The crowd packed itself around the wide mat in the center of the green and eagerly watched the professionals strive with each other. The first bout went to Partington in 11½ minutes. After a rest of five minutes, the wrestlers resumed and Partington again was successful in 7 minutes. The efforts of both men were cheered at intervals, and it can safely be said that Partington's winning was a popular one.

Left, Group of Late Arrivals at the Garden; Above, John Edwards, Swenson's Manager, With His Family; Right, A Thrilling Moment in the Wrestling Match; Below, William Crawford, Who Came from Cleveland, O.

The crowd then adjourned to the road outside the grounds where races were held. In the lean men's event, the opening race of the program, J. Davis of Providence came in first, with B. Dwyer of Taunton, Mass., and W. S. Johnston of Providence, second and third. In the tandem girls' race, Miss Pearl Domler, the winner of the same event at the 1915 Pow-wow, was again victorious, beating out Mrs. C. Helander, of Brockton, Mass., by two feet. Miss Margaret Daley, of Canton, Mass., was third. Miss Carlsen, of Providence, distinguished herself once more in this event by falling before the finish, duplicating her performance of 1915.

The fat men's race furnished much amusement to all but the participants. The winner proved to be H. B. Wyend, of Avon, Mass., with Claude Grout, of Mattapan, second, and A. E. Barber, of Taunton, third. The sidecar girls' 50-yard sprint went to Mrs. Cooney, a former winner, with Miss Rose Beauvais, second, and Miss Silver, third. The final event, a two-mile run, went to Charles Domler, of Providence, a former winner of this event, with Harold Edmond, second, and J. Kelly, of Coventry, R. I., third. H. Gardner, of Attleboro, Mass., was fourth, and F. McMaugh, of Providence, sixth.

CAME LONGEST DISTANCE TO THE POW-WOW

PROVIDENCE, R. I., Aug. 31.—A 1913 model Indian, which has been run over 25,000 miles is the mount used by William Crawford, of Lakewood, Cleveland, O., to convey him to the east on a vacation trip of one month. Crawford pulled in here Friday afternoon and remained until Sunday night, to allow him to attend the annual pow-wow of B. A. Swenson, at which he was the long distance visitor.

Crawford's arrival at the Swenson store, 522 Broad street, was one of considerable interest to a large group of motorcycle fans, who grouped about to greet him. His machine was covered with banners he has collected in various cities along the way, while he carried saddle bags and a dress suit case for his wearing apparel.

Crawford stated that he bought the machine new four years ago. He has ridden over 8,000 miles this Summer. The most recent trip he has made, or rather, ground he has covered amounts to about 900 miles. He said he had spent $2 for repairs since he had left Cleveland and that his gasoline consumption was less than 20 gallons.

The young man, who is employed in an automobile factory, left Cleveland, Aug. 14. He reached this city over the route leading through Erie, Buffalo, Syracuse, Utica, Albany, Pittsfield, Springfield, Worcester, Boston and Pawtucket.

At Springfield, Crawford was entertained by the officials of the Hendee Manufacturing Company, and was taken about the plant while repairs were being made on his machine. His picture appears on this page.

THRESHING OUT THE RACING SITUATION

THE announcement made last week by the Harley-Davidson Motor Co. of its intention to withdraw all factory support from competition between big twin machines on mile tracks, and singles on half-mile tracks, was the result not alone of the unfortunate accident to Bill Brier, but also the company's conviction that the best interests of the trade and sport would be served by its taking this step.

It now develops that the Harley-Davidson staff had been considering this move for some time, and would have reached its decision even though Bill Brier were still alive. Although the importance of safety, for the rider and the general public, in motor cycle competition cannot possibly be overestimated, the fact remains that there are other considerations which must not be overlooked.

The Freak Machine Valueless

The chief of these, in our opinion, lies in the fact that the practice heretofore of building freak machines for racing purposes has not proven of material value in developing the motor cycle as a commercial and pleasure vehicle. We do not claim that the various factories have not learned at least something of practical use from their racing experiences, but the cost has been too great.

The development of the special racing machines had progressed to a point where even the riders with the greatest amount of grit and nerve awaited the important race meets with a feeling akin to fear and trepidation. These nervy boys have known for some time that their machines were too fast for most of the mile tracks, even where they were comparatively well banked and in fairly good condition. The Providence fiasco is a case in point. True, the riders would have gone on the track had they been ordered to do so, but it was plain to everybody that they thoroughly appreciated the decision of the officials in charge not to permit any racing.

As explained by Sales Manager Arthur Davidson, the radical action taken by his company had its inception, not with the passing of Brier, but several months before that tragic occurrence. The company hesitated, however, to make such a drastic step without assurances of co-operation by the other motorcycle manufacturers and the competition committee of the F. A. M. Undoubtedly the loss of Brier was a deciding factor. And about the same time Warner was seriously injured at McPherson, Kansas, and August Lilya lost his life while riding in an unsanctioned race meet staged on the Charter Oak Park Racing Course near Hartford, Conn. At the reorganization conference held in Detroit last Saturday, the conferees representing the Motorcycle Manufacturers' Association and the Motorcycle and Allied Trades Association expressed themselves unanimously as being in full accord with the Harley-Davidson company. Although this proposition is entirely apart from the work which the committee was appointed to do, it will recommend as a body at the Buffalo meet the fourteenth of September that the racing situation be comprehensively discussed, thoroughly threshed out and settled for all time. It was the sense of this meeting that the promotion of perhaps ten or a dozen national meets annually, on two and three-mile tracks and speedways, with practically perfect arrangements for safeguarding both competitors and spectators, would be the best way out of the difficulty.

Too Much Speed for Mile Tracks

It is and always has been our belief that a good race meet as, for example, the one which was held at Sheepsheed Bay the Fourth of July, gives favorable publicity to the motorcycle. On the other hand, it is no doubt true that a serious accident in one meet more than overbalances the good effects of a half dozen in which no accidents occur. It is quite true that there are a number of mile tracks in this country which, under ideal conditions, may be said to be reasonably safe, but, with the racing machines as powerful and fast as are the special racers being made today, the chance of serious trouble is too great a one to be taken by a thoroughly rational individual.

If it develops, and we sincerely trust it will, that the big machines will ultimately be denied competition on anything less than two-mile tracks, then no doubt the factories will soon come to the conclusion that it would be worth while further to develop their single machines. Instead of progress along this line, it must be admitted that our factories have followed the lines of least resistance; that is to say, they have secured more speed by building larger motors, of special freak designs not adapted to regular use. But with the size of motors permitted to be used on mile tracks reduced materially below 61 cubic inches, though not necessarily to 30.50 cubic inches, important improvements in design would quickly follow and, also, the field of competition would be materially extended.

Will Other Makers Follow?

It is our belief, and our hope, that the other manufacturers will follow the commendable example set by the Harley-Davidson company and at their meet in Buffalo a fortnight hence place themselves definitely and finally on record. As stated above, perhaps it would not be wise to limit competition on mile tracks to machines of 30.50 cubic inches or less, but we trust that all will agree that the powerful twin, with additional valves, open ports and whatnot, has no place on mile circuits. The automobile manufacturers, while compelled by the racing authorities constantly to reduce the size of their motors, have nevertheless succeeded each year in showing greater speed and increased efficiency.

There is no reason in the world why the makers of motorcycles should not be able to do likewise.

JONES A FOUR-TIME VICTOR AT TOLEDO

Takes First and Final Heats in Five-Mile Open "Pro," His Three-Mile Match with Nixon and the Feature Pursuit—Nixon and "Crevvy" Take Leavings

TOLEDO, O., Aug. 27.—The white racing helmet of Maldwyn Jones was very much in evidence at the race meet of the Interstate Racing Association at the Toledo half-mile track this afternoon, for he had his Harley-Davidson speed boat in the pink of condition and set a pace that netted him the lion's share of the prize bacon. With four firsts out of four times across the starting line, Jones was willing to call it a day's work and go home.

He started the job in the first event, the five-mile qualifying heat. Walker jumped into the lead at the getaway, with Sudduth on his blue Thor and Jones on the Harley-Davidson coming after in full cry. Jones crowded past Sudduth in the second lap and was off in pursuit of Walker. The Indian rider had ideas of his own about that first place and the next few laps saw a stubborn argument between the two, but Jones slowly closed the gap and in the fourth mile skidded past into the lead. Verrill registered at third.

Nixon Takes Second Heat

Nixon got the jump on the field in the second five-mile heat and though Matthews tried hard to overcome the advantage of the Toronto rider, he wasn't able to cut down the margin enough to help matters. Nixon held the pacemaking job to the finish, with Shorty getting second and Luther on an Excelsior third.

Then before running the final heat, Jones and Nixon were hooked up for a three-mile match race, as these two were the winners of the two elimination heats. It was a close fight all the way through, with no time for either to ease down, but Jones whittled out a small lead in the first mile and put it in cold storage so that it kept nicely to the finish tape.

In the final heat, the field included Verrill, Jones, Ray Creviston, Walker, Shorty Matthews, Nixon, and Luther. After considerable snappy preliminary skirmishing in the early stages, Jones pushed into the lead on the second lap, and after that refused to consider any applications for the position. Walker hung on in second place, and Nixon seemed to have third tucked away. On the final spurt to the tape, however, Verrill dug up a handful of reserve pep and galloped alongside Nixon with a rush that took third money by a margin of fully six inches.

Scarletto to the Fore

A motor-paced bicycle race of three miles was run as the next number, with Scarletto and Nagel matched. It was see-saw all the way, with the lead changing half a dozen times, but Scarletto uncorked a spurt on the fifth lap that opened a lead that Nagel couldn't close before the tape was reached.

In the consolation race, a face was seen which seldom gets a chance in such events, namely, one Ray Creviston. Various little misfortunes had kept him out of the winning columns in the other events, so he stepped out to sew up this one without delay. He took a nice safe lead and played it safe, Sudduth getting second place and Morrison third. The time was 6:01.

The big event of the afternoon was the unlimited pursuit race, which was a distinct novelty to the spectators, as few such races have been held in this city before. The riders were distributed about the track at the start, the winner to be the man who coult pass all the others, each rider dropping out when passed by another. The pace was fast from the send-off, so that the track became a continuous circle of dust and smoke from the flying motors. Sudduth flashed past Walker in the third lap, then Jones eliminated Sudduth in the fourth. As the laps were reeled off the gaps slowly closed down, and in the 8th lap Jones passed Morrison, thus trimming one more off the list.

Some Speed Duel!

This left Jones, Nixon, Luther, Matthews and Verrill in the running, all going strong and well scattered around the oval. Nixon began slowly pulling down on Luther, while Jones in turn was drawing up into Nixon's smoke. In the 14th lap Nixon pried past Luther, and a lap later Jones was up on about even terms with Nixon. Nixon fought hard to hold off the flying rider with the white helmet, and the next two laps saw a beautiful duel of speed. They roared over the tape almost neck and neck in the 15th lap, fought it out on the next turn, and then Jones had him on the back stretch.

Remained Matthews and Verrill to be considered.

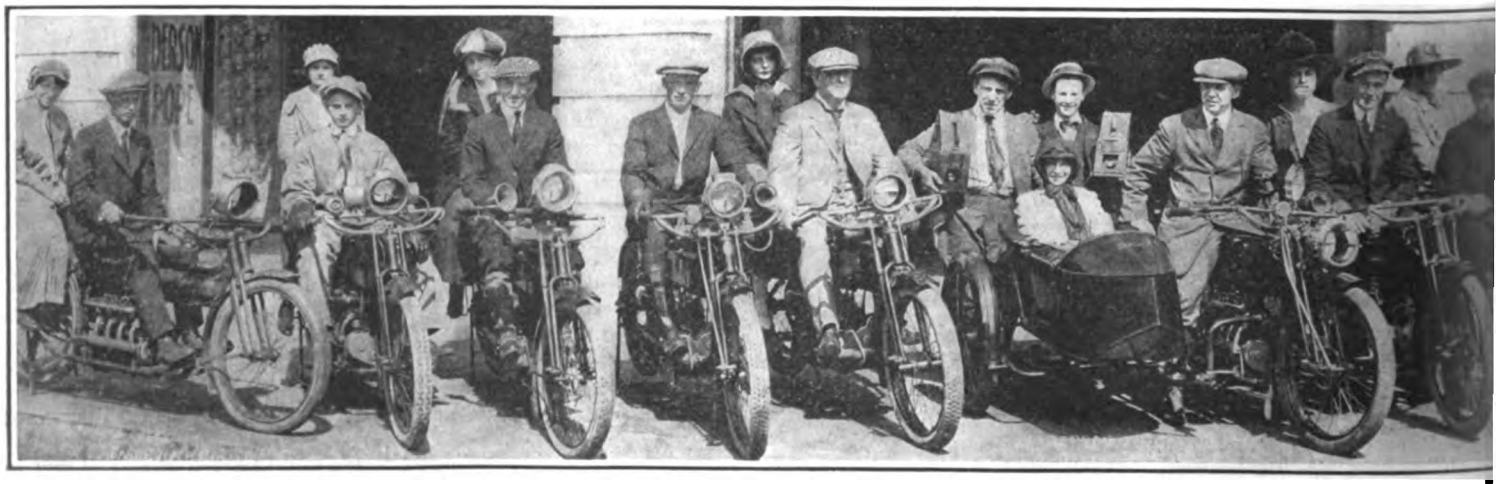
Verrill was about half a lap ahead of Jones, with Matthews about an eighth of a mile in front of him. But as Verrill drew up so that he could sight Shorty in the stretches, he took to the trail like a hound on a blood scent, and Matthews' finish could be seen right there. At 10 miles Verrill had the bit in his teeth and was crowding his four-valve through the turns with a reckless disregard for the laws of gravity and centrifugal force that would have made a life-insurance agent faint away with a deep sigh. He got him on the turn in the 23rd lap, and then it settled down to a finish fight between Jones and Krazy Horse.

Jones Beats Verrill

At this stage it could be seen that Jones was gaining, but very slowly, as there was the full length of the stretch separating them. And Jones settled down to the job and began to crowd 'er still harder. Each lap saw the gap cut a trifle, but not much, and the crowd began to wonder whether Jones could keep it up long enough to wear down that long lead. His machine was fitted with a little half-size special tank that was fine stuff for ordinary races and held plenty of juice for those events, but did it carry enough oil to carry him the distance that this grind apparently would call for?

But the same idea apparently was in Jones' mind, for he was pushing his machine to the limit to get his man as quickly as possible. The gains began to show bigger on each lap, and each time round found him appreciably farther down the stretch toward Verrill. Only 100 yards separated them in the 31st lap, and seeing his quarry

CAMERA LENS VIEW OF THE SCORE OR MORE HENDERSON ENTHUSIAST



The Run Was Staged by the Henderson Motorcycle Sales Co. of the An

Digitized by Google

so close seemed to put new steam into his work, for he stripped this down faster than before. Up into Verrill's smoke, then elbow to elbow for a lap, both men riding as if their last hope for happiness depended on the result. Then for one of the few times in the memory of man Verrill was matched at his own game, for Jones made a clear gain on the far turn in the 35th lap, and shot into the stretch ahead, winning the race.

And to show that there had been no time to linger, he had made the 17½ miles in 20 minutes. The ovation he received from the big crowd showed that his performance was thoroughly appreciated.

Summaries:

First heat, five miles—Jones, Harley-Davidson; Walker, Indian; Verrill, Indian. Time, 5:39.

Second heat, five miles—Nixon, Indian; Matthews, Indian; Luther, Excelsior. Time, 5:46.

Final heat, five miles—Jones, Harley-Davidson; Walker, Indian; Verrill, Indian. Time, 5:38.

Match race, three miles—Jones, Harley-Davidson; Nixon, Indian. Time, 3:24.

Consolation race, five miles—Creviston, Indian; Sudduth, Thor; Morrison, Indian. Time, 6:01.

Motor-paced bicycle race, three miles—Scarletto; Nagel. Time, 6:41.

Unlimited pursuit—Jones, Harley-Davidson; Verrill, Indian; Matthews, Indian. Distance, 17½ miles. Time, 20:00.

HOLMES GETS SAN DIEGO RECORD

Recaptures Laurels Won Away by Roy Artley on Henderson, Setting New Mark of 132 Miles in 133 Minutes

LOS ANGELES, Aug. 24.—Art Holmes, on his third try in three days, recaptured the Los Angeles-San Diego record, riding a stock Harley-Davidson 1916 three speed. Holmes came within one minute of making the whole 132 miles at an average of exactly 60 miles an hour. Much of the distance was covered at better than 70 miles an hour.

The rider showed his nerve and endurance by plugging through the last 16 miles, down the rough, winding grade of Rose Canyon, with one shoulder dislocated.

Times to intermediate points show the high speed up to the time of the spill at Torrey Pines. Starting at Los Angeles at 5 a. m. he made Anaheim, 28 miles, in 24 minutes; Irvine, 43 miles, 40 minutes; Oceanside, 92 miles, 82 minutes. At Torrey Pines grade, a bad stretch close to San Diego, the jinx that had spoiled his previous attempts on Monday and Tuesday again barred the road, and Holmes took the gravel while hitting 72 on the speedometer. It took a tree to stop him, and he picked himself up with one shoulder out of action. Fortunately some of the boys were on hand and in just seven minutes nervy old Art was in the saddle again, one arm hanging useless. Rose Canyon holds even riders like Holmes and Artley down to a thirty mile touring gait. It is no place for a cripple to ride after record. C. F. Bruschi figures that Holmes made the last 16 miles at a speed that lost him just about four minutes, due to having to steer with one hand. His finishing time was 2 hours 13 minutes, standing as a new record by 1½ minutes over Artley's time.

The roadster Holmes rode carried full three speed, with all gears in, mudguard and luggage carrier; was equipped with 3-in. Firestone nonskid tires, Bosch magneto, Schebler carburetor, used Valvoline oil and Ventura gasoline. Western Electric plugs were used.

TALE OF A BORDER DESPATCH BEARER

L. J. Knight, of Providence, Back From Service and Has a Yarn to Unfold—Takes Machine Guns to Border

PROVIDENCE, R. I., Aug. 21.—Lewis J. Knight, who has been in the United States army service on the Mexican border with Troop C, R. I. National Guard, as a motorcycle dispatch carrier and mail clerk, has returned to this city, having ended his term of enlistment.

He has entered the employ of the Harley-Davidson Co. on West Friendship street as a repair man, but it is probable he will soon be demonstrating the machine.

This week he will take two machines, one a rapid fire gun equipment, the other a caisson equipment to Newport to demonstrate it before a military organization which is being backed in the purchase of a motorcycle equipment by the summer colonists there.

Knight is the first of the Rhode Island boys to return from the border. He said he had drilled there but little. Most of his time was devoted to the carrying of dispatches for army officers, while during the latter part of his enlistment he was the mail clerk.

He rode during his service a Harley-Davidson machine, which is his own property, and which he shipped to the border from Quonset Point, R. I., where he was a dispatch bearer for Col. Richards.

GOOD CARD FOR CINCINNATI ON LABOR DAY

CINCINNATI.—Entries are being received by the Cincinnati Racing Association, 1525 Race street, for the annual Labor Day motorcycle race meet to be held at the Latonia track. There are four events this year, as follows: Five-miles professional stripped stock, 61 cubic inches, qualifying heat, first four to qualify for final ten-mile heat, rolling start; five-mile professional, stripped stock, 61 cubic inches, qualifying heat, first four to qualify for final ten-mile heat, rolling start; five-mile amateur, stripped stock, 61 cubic inches, rolling start, four prizes; ten-mile professional, final, rolling start, four prizes. There is certain to be a big crowd and some good racing, as the Labor Day picnic will draw its usual throng, and the entries already received guarantee an ample number of contestants in each event.

WASHINGTON TRIO VISITS FUNKE

NEW YORK, Aug. 28.—Jack Hines, Washington (D. C.) Cleveland dealer, accompanied by his brother Edward and Ray Wall, blew into the office of the Herbert F. L. Funke Co., Inc., at 116 Broad street, today, having covered the distance from the Capitol City to Gotham in 11 hours flat. The trio made the trip on Cleveland machines.

200 MILE RAMBLE FOR NEW JERSEY CLUBSTERS

"Jersey Jaunt" to Be Big Event on Schedule of Live Wire Newark Organization—Official Rate is 22 Miles Per Hour

Top, at Forge Hill, the Score-Shattering Incline in Recent 20-Hour Run; Below, Enjoying Lunch at a Pleasant Spot in Northern New Jersey

NEWARK, N. J., Aug. 28.—The New Jersey M. C. will promote its first annual "Jersey Jaunt" on Octoer 8. This will be a 200-mile ramble over the highways of the State of New Jersey and will be open to all F. A. M. motorcyclists. The course will be Newark to Asbury Park, thence across the State to Trenton (dinner stop), then up to Washington and back eastward to Newark.

The schedule calls for 22 miles per hour, and because of the character of the roads no difficulty should be experienced by the field to maintain this speed. For that reason there will be no allowance for the solo, sidecars or lightweights.

Each contestant who checks in within 15 minutes of his scheduled time at all check-stations will be awarded a medal, and no other prizes are offered.

All the ear-marks of the usual endurance run will be missing and the main object of the contest is to afford a day's sport and pleasure, also to give the local motorcyclists something to chin about when the long winter nights keep the bunch off the roads and they gather round the stove in the club or the local agencies. Entry-fee will be $1.50 till October 1, after which the fee will be $2.00.

Blanks are in preparation at the present time and any addition information can be had by writing the New Jersey M. C., 847 Broad street, Newark, N. J.

LABOR DAY MEET FOR RED BANK FAIR

RED BANK, N. J., Aug. 28.—Three events are scheduled for the motorcycle program to be run in conjunction with the annual Monmouth County Fair on the single mile fair track here on Monday next, September 4, Labor Day. The events, which are each sanctioned by the F. A. M., are as follows: Three-mile pro open, with prizes of $10.00, $5.00 and $2.00. Five-mile pro open, with prizes of $15.00, $8.00 and $3.00. Ten-mile open, with prizes of $20.00, $10.00 and $5.00.

DEMONSTRATING MOTOR WHEEL TO RAILROADS

MILWAUKEE, Wis., Aug. 28.—J. H. Smalley, traveling salesman for Mudge & Co., Chicago, Ill., and representing the railroad sales department of the A. O. Smith Co., left last week on a demonstration trip via a railroad velocipede, with the Smith Motor Wheel attached.

Mr. Smalley will cover the Chicago, Milwaukee & St. Paul, Chicago & Northwestern and Rock Island Routes, demonstrating the Smith Motor Wheel as a railroad velocipede attachment.

NEBRASKA CITY TO HOLD MEET ON SEPTEMBER 10

NEBRASKA CITY, Neb.—A race meet will be held on the half-mile track here on Sunday, September 10. Five events are on the card, from three to fifteen miles each, with purses totaling $100. Omaha and Lincoln riders will compete as well as an Indian team from Shenadoah, Iowa. F. C. Clark, of this city, is promoting the meet.

OHIO REGISTRATIONS

COLUMBUS, Ohio—The Ohio Automobile Department, which has charge of the issuing of motorcycle licenses reports that up to August 24, 20,636 motorcycle licenses had been issued. This is considerably in excess of the number issued last year and shows a good increase in the business. Motorcycle dealers are also increasing in every part of the state.

PLANS PERFECTED FOR KANSAS RUN

KANSAS CITY, Mo., Aug. 28.—Plans are fully perfected for the annual endurance run of the Kansas City M. C. to Joplin, Mo., and return on Sunday morning, Sept. 3 and Monday, Sept. 4. The affair holds promise of filling well.

ARTLEY REPEATS AND BETTERS HIS BEST

Henderson Rider Lowers Former San Francisco-Los Angeles Record, and on Actual Riding Time, Lowers Automobile's Time—His Flight in Detail

LOS ANGELES, Aug. 21.—Roy Artley, the Henderson speed wonder made a second try for the San Francisco-Los Angeles road record today, and his actual running time established a new record over the road, beating that of the continous-running Cadillac automobile. The only accident on the trip was a spill on a stretch of soft newly oiled road in Merced, where he broke his spark control. He lost 27 minutes arguing his freedom out of a speed cop in Merced, this was his unlucky point. At Bakersfield he spent 8 minutes out getting a bite to eat and making renewed repairs on his spark control. He arrived in Los Angeles in perfect condition and wanted to go on to San Diego, making a new Frisco to San Diego record. He would have done so but the traffic was so dense that the Henderson officials would not permit him to try.

Made a Fast Trip

Artley left San Francisco, Market and Geary street corner at 5.04 A. M. Monday. He arrived in Los Angeles 3.08 P. M., making elapsed time 10 hours and 4 minutes. The distance as Artley rode it was 471 miles, as there was a 6-mile detour around a bridge out at Kingsburg and a 2-mile detour around road repairs in Tulare County. His fastest recorded time was from Bakersfield which he left at 12.05 to Lebec, 42 miles, which he made in 41 minutes. Thirty miles of this is a straight away boulevard, the balance of 11 miles continuous grade through a pass up into the high mountains. Artley's second trip, like the first, was made on Firestone tires with Vavoline oil. The picture showing the crowd congratulating the winner, mostly shows the Firestone and Vavoline people of Los Angeles prominent in their jubilant gestures. Artley reported the road in general good shape, but the Ridge route is very bumpy.

This trip is Artley's fourth try for a road record on the same machine, and each time he has won the record. His first trip was the 132 miles to San Diego which he made in 2 hrs. and 22½ minutes. Next he lowered this same record to 2 hrs. 14½ minutes, then he made his first try for Frisco, Los Angeles, elapsed time 10 hrs. 39 minutes, which he lowered to 10 hrs. 4 minutes. Deducting the time out at Merced and Bakersfield brings him well below the Cadillac automobile time. Trains make it in a little over 13 hrs. The entire trip through hot desert, and high mountains to 5,000 ft. elevation, involving a great range of road and climatic conditions was made with this Henderson single-speed, high-geared motor, which is a remarkable test of the flexibility of the engine. The motor carries the original bearings and rings just as it came from the factory. It has not only served Artley in his 4 speed tests, but has been in two Southern California hill climbs, winning one of them under Sahagin. A noteworthy feature of the trip was the friendly assistance of the motorcycle cops, who unofficially permitted Artley to make time on all county roads, although holding him down strictly to 20 miles an hour through cities and towns. The only exception was in Merced where the officer stopped him going 40 miles and held him down to 30 through the entire county.

MAINE REGISTERS 1,180 MOTORCYCLES FOR 1916

BANGOR, Me., Aug. 28.—Returns from the bureau of automobile registration show a slight increase in the number of registers in this state for this year over last year. There are 1,180 machines registered for 1916, as against 950 for 1915. The number of dealers registered, on the other hand, show a slight falling off, there being 35 registered last year and only 31 up until August 19 of this year.

GIVING THE MOTOR A SQUARE DEAL

If the Simple Directions Given Here Are Followed, the Rider Will Be Doing His Full Duty by His Machine and Will Benefit Accordingly—Only Short Time Needed

By D. B. PANGBURN

MOTORCYCLE motors are so generally reliable nowadays that they seldom receive the care which is their just due. Many riders simply adjust the valve mechanism when occasion demands, grind the valves themselves when necessary, scrape the carbon from the cylinder heads when the engine begins to misfire from preignition, and think they have done their full duty by their motors. But they haven't, as I shall show.

A few go further and inject kerosene into the explosion chambers to keep down the carbon deposits, as everyone should do at regular intervals of two hundred or three hundred miles, as has been described in the columns of **Motor Cycle Illustrated.** Do not think that I am holding any brief for "tinkeritis," but most machines are neglected in a most important point, which if taken care of would much prolong their life and usefulness.

Advantages Gained

The method, described below, should be practiced by all riders who care anything about their motors. This is not merely on account of the saving it makes in dollars and cents from the standpoint of depreciation, but also because of the added satisfaction the rider gets from his machine; from its smoother running, quicker pick-up and flexibility, and its added quietness. It is particularly desirable in the warm weather because it enables the oil to act to the best advantage, and so assists in keeping the engine cool. It only requires a few minutes to put into practice and amply repays the exertion.

It is based on the scientific fact that all lubricating oils are mixtures of hydrogen and carbon, usually with some impurities added, and that all oils break down more or less under the action of these impurities and of the heat in the engine. As a result, a greater or less amount of carbonaceous sediment is deposited in the bottom of the crankcase, the amount depending on the quality of the oil and the temperature attained in the engine.

Since the inside of the piston-head of an air-cooled motor, against which the oil is continually splashed, reaches a pretty high temperature (the cylinder walls even, usually reach four hundred degrees F.). the oil is likely to be broken down rapidly, particularly with oils designed primarily for water-cooled engines. The sediment formed is being constantly thrown over the bearings, and working into them, where it acts like a grinding compound, wearing out the bearings and causing quick depreciation. It also helps to wear the cylinder walls and piston rings, and uses up power in overcoming useless friction. The protective process is as follows:

Open the drain cock, let all the oil run out of the crankcase and close the cock. (Save this oil and put it aside in a glass jar to stand. If it is a good quality of oil the sediment will all settle out in two or three days, and the clear upper portion can be poured off and used for ordinary lubricating purposes, such as oiling mowing machines, etc. If it does not clear up at all, either the quality of the oil is not high, or it has been very much overworked in the engine base.)

Kerosene in Crankcase

Now open the hand oil pump line and fill the bottom of the crankcase, through the oil opening, with kerosene to the height that the oil usually reaches. If you have no oil sight glass, one-half of an ordinary table tumbler full of kerosene will do very well. Next start the engine under its own power and run it for about ten seconds. *Don't run it longer than this,* as the kerosene is being thrown around inside and is cutting all the old oil off the cylinder walls, and yon don't want to take any chances of scoring the walls or seizing the pistons by letting them get too hot without oil on them. Ten seconds should be perfectly safe. Now let the kerosene mixture run out, carrying the sediment and old oil with it. When it is all out repeat the operation, but this time don't allow the motor to run more than *five* seconds. Empty the crankcase again. The third time simply turn the engine over a few times with the starter. Of course the kerosene will never come out clear if you have an automatic oil pump, for this will keep a little oil coming in which will color the mixture. Three applications should be enough unless the motor is horribly dirty. Then couple up the hand oil line and put in a supply of fresh oil, and the job is finished.

Do It Every 1,000 Miles

This process is recommended for water-cooled engines every five thousand miles or less, but because air-cooled engines get so much hotter than water-cooled ones, it is desirable to give them the treatment much oftener. I have found by experience that it pays to do it at least every thousand miles, and oftener would certainly do no harm. The greater smoothness and flexibility of the engine when given such care is surprising, and if the method is used regularly it will probably double the life of the engine base parts.

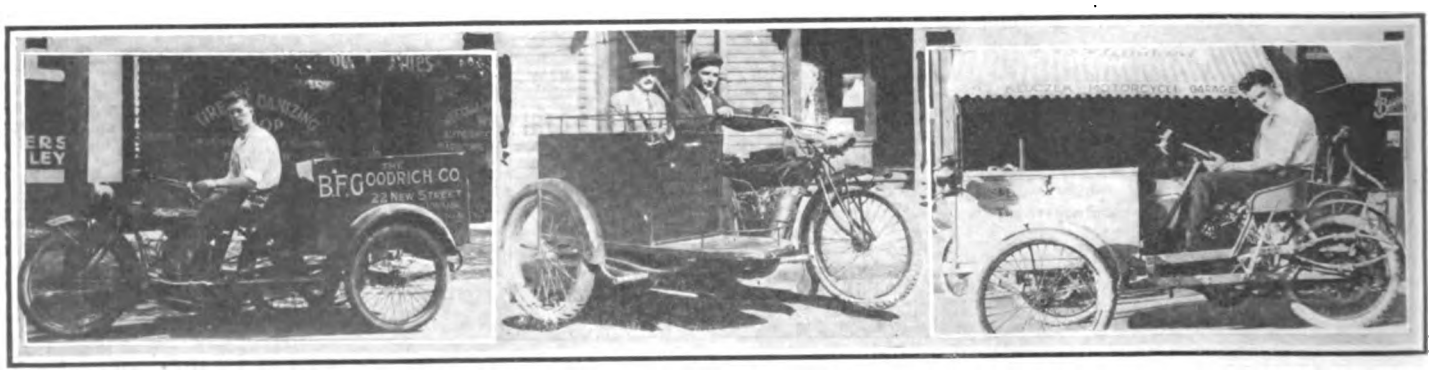
A CASE OF HARD LUCK

TALKING to a veteran rider the other day, while on one of my trips, I heard a comment on motorcycles which is very infrequent. This chap said that getting a good machine was like playing a lottery. On being asked why, he said that as regards others, he was not prepared to state that such was the case, but his own experience had proved it to be true. You will admit that he had some reason to say so when you hear the story, but you will say right off that he was hoodooed for fair.

When "Bill" (that's his name) got his twin, he started off with it, all right, but did not get very far. The motor stopped and it took him about 15 minutes to discover the cause: solder from the tank getting into the gasoline pipe. This got him peeved, and after clearing out the obstruction he started off again. His left footboard came off at the front, due to a flawed bolt, soon afterward, and he tumbled and broke his oil-pipe. Riding back to the garage, he was hit by an automobile and had his frame bent and some of the flanges knocked off the rear cylinder. Bill's frame of mind and his opinion of the machine can be imagined.

Well, the dealer gave him a new machine and sent the damaged one back to

TRIO OF SUCCESSFUL LONG-SERVICE DELIVERY RIGS



Left, Indian-Cygnet Outfit of B. F. Goodrich Co., Newark, N. J.; Center, Indian-Pullman Combination in Philadelphia, Pa.; Right, Reading Standard Truck of French Shop, Replacing Two Errand Boys and Porter in Newark, N. J.

Digitized by Google

the factory and it cost Bill nothing. The solder in the tank was one case in a thousand, and not even the best inspection department could have discovered the flaw in the foot-board bolt, unless it was whaled with a hammer. The fall and swat by the automobile were incidental. But Bill never forgot the things all happening at once. He still rides that same make of machine and has never had any trouble with it.

There's a moral to this. You may get into the same boat as Bill—I hope you won't ever—but if you do, remember that nobody's trying to sell you a quince or to do you in other ways. It's a case of luck and luck that no manufacturer will hesitate to make good. But don't go around cussing out the whole industry or that make of machine, because about 99 per cent. of the other riders of that same model are having the best of use and the least trouble with theirs.

BIG FUEL CAPACITY IS DESIRABLE FOR TOURING

WITH the big motors used nowadays, especially with sidecars and other passenger attachments, the ordinary tank is none too ample in capacity for touring. Right away, I can hear protests about this, but considerable experience in the last two seasons has taught me the value of having a reserve stock of gasoline in the sidecar, especially when riding in the East on Sunday.

I might add to this, riding in country where automobile touring is considerable but towns far apart, calls for a reserve stock of fuel. This was brought home to me on a recent tour in a mountainous district, where the average was close to 190 miles per day. In spite of having a huge tank with 3½ gallons capacity, I was forced to use the reserve gallon twice in three days, as the fuel stations we came across were frequently sold out to automobile parties who passed over the route ahead of us. In one case, a station had sold 180 gallons of fuel in 24 hours and there was a car being towed by another to the next station, three miles further on, because the station was "dry."

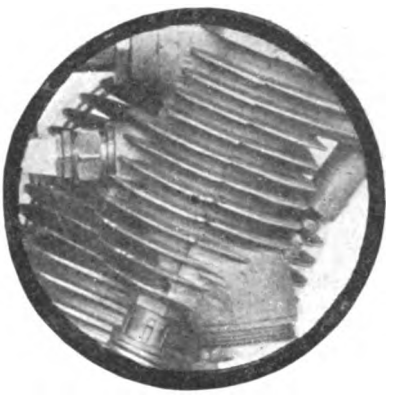
With regard to Sunday. Heavy traffic in the smaller towns may drain the storage tanks, or some communities in their dread of breaking the Sabbath have forbidden the sales of fuel and oil on that day. Hence, I am rooting for a 3½ gallon tank, with a spare gallon container in the sidecar, and about a gallon oil tank on the machine, for touring. And by touring I don't refer to 50 or 60 miles a day by any means. Nothing less than 150 will do me.

WATERPROOFING A LOOSE COVER WITH SHELLAC

ONE of many little stunts which will help a competitor in endurance runs and also the touring rider in his travels is one that I saw the other day. The rider who used the wrinkle had a machine with an old magneto whose contact-maker casing cover was not the best fit in the world. The tongue held it in place, but during a rain he was likely to get water in the casing, so he shellaced the place where the cover touched the casing. Result, no possibility of leakage into the works of the mag.

The stunt is a good one and worth adopting. The shellac will assist in holding the cover in place as well as keeping the innards waterproof. Alcohol will loosen it, but as most of us do not carry alcohol on the road, a pocket knife will have to be used. Rubber cement comes in handy as an emergency measure against leakage, but naturally is not as effective as the shellac. The rider can easily pick out other places at which water will affect the operation of his mount and give them a treatment with this same substance.

WHAT DO YOU KNOW ABOUT MOTORCYCLES ?



WHAT MOTOR IS THIS TAKEN FROM?

STOP right here now and answer this question: "What do you really know about motorcycles aside from the one particular machine you ride?" Every time you meet a "greenhorn" or a fellow lined up along the curbstone in trouble, you get off and begin to shoot about this and about that on this model and that model and why this particular device on your machine is far superior to some other arrangement on the other fellow's model. We riders are all the same. We all pull that same little stunt. But after all, do you really know all the ins and outs of the dozen or more different makes of machines under the 1916 name plate? You do? Well, then, from what particular make of machine is the little detail photograph shown in the circle above taken? Look it over carefully for it sure has got you guessing.

Just as a sort of sporting proposition we are going to run a dozen or perhaps more of these little detail views. We are not going to say which machines they come from; that is up to you. If you know, write in and we will keep account of the best guesses and will publish the account from time to time. And when it is all through we will be glad to give "honorable mention," and the more or less arbitrary title of "Motorcycle Expert" to the fellow who made the best guesses.

So get out your microscope and examine the picture minutely. Perhaps you had better sleep on it one night so as to be sure of yourself, but don't fail to send it in tomorrow.

Address answers to Contest Editor, **Motor Cycle Illustrated,** 21 Park Row, New York, N. Y.

DOPE ON MACHINE GUN SERVICE

THERE have been a number of inquiries to the writer relative to motorcycle machine gun service, and the majority of inquirers express themselves anxious to get experience in that line. Well, as regards the driving, it is sidecar work on a heavier scale, plus the evolutions of field artillery. The latter can be learned from an artillery text book or manual.

But the gunnery part of it is a special training, in which the use of a rifle will be a big help. The gunner will have to understand the mechanism of the gun and its operation and will have to know how to strip it and assemble it. To this will be added familiarity with firing it under all conditions of service, this including firing at air-craft. You can see from this that the gunnery end of the machine gun service is not simple and cannot be got in a week or two.

HOW ABOUT A PICTURE RUN, MR. MOTORCYCLE CLUBMAN?

JUST now when the grass is greenest, the sky bluest and the sunshine the brightest, every club in these here United States of ours has a committee busy doping out a schedule of sociability runs for the summer months. But how many of them are planning a picture run.

By that I mean, getting the whole membership out some bright Sunday morn soon and lining them up in the park or in front of a public building and then letting the town photographer say, "Look pleasant" as he clicks the shutter. Get a regular photographer to do the job so that you are assured of a photo that will be a credit to the bunch, and not the usual hit or miss of the average amateur kodak fiend.

Staging an event of this nature every other year is the one best bet, fellows, for we motorcyclists are here today and gone tomorrow. But that I mean we are as a rule motorcyclists but a season or two, then we either get married and can't afford a motorcycle or else we get too wealthy and get a car. But the worst of it is, the gang is never the same from year to year, and with a picture of the bunch in 1916 on the clubhouse walls you can take it down in 1919 and recall a bygone day or acquaintance that makes you feel the world is a darned good little place after all.

You know the stuff, "That's Joe Tinker next to me—the lad with his cap on backwards. Remember the time in the Crotona run in 1916 when he ran out of gas," etc. Why one of those pictures are worth their weight in gold in a few years, so hop to it and arrange for a picture run as soon as you can pull it off.

A Few Spare Links

By GOSLIN

'Twas some speed the li'l ole motorcycle showed out there in Colorado, on that pimple called Pike's Peak, hey wot?

Why only two racing autos beat Clymer's time on his Ex., and, come to think of it, why shouldn't a lad with a label like that cop in a hill-climb?

Twelve and a half miles of 7 per cent. grade, some stuff, bo; some stuff.

Summer's on the toboggan, fellows; days are getting shorter, and a couple o' nights last week it was cool enough for the mackinaw.

Guess we'll have to get that garment out of the closet and take the moth balls out of the pockets next Saturday, cause we gotta be prepared these days.

Saw an article in the English paper criticizing our slang as not being English, sorta slamming the use of "pep" as it were. Now that would be all right, but dash their bally lights, they "blind it" when they "beat it"; they call a dealer a stockist; they burn petrol instead of gas; they talk of top, middle and low instead of high, intermediate and low; they say a machine is in top-hole condition instead of first-class running order. Well, it's a case of the pot calling the kettle black, thassall.

You fellows who are looking for a neat and serviceable piece of goods for a riding suit should give a glance at the forestry green serge at the tailors. It has khaki beaten a mile in neatness. And while I think of it, why do the most of us, neat and clean in civilian's clothes, as soon as we get into riding togs wipe our hands on them?

Observations have shown that the average rider after a repair or adjustment will rub his hands on his trousers. Why? That is one of the reasons we imagine we can't ride and keep clean. It's imagination, pure and simple, but every year we get neater and cleaner, so don't despair of us, Lacy, we'll get there yet.

Ja ever ride along for about 4,000 miles with only one puncture, then run up against a week of punctures, blow-outs or leaky-valves? Well, we have just passed through the experience.

I tell you fellows, you are down on the books of Col. Fred W. Jinx for just so much trouble each season, spread out over the entire time or all lumped and thrown at you in a bunch. Either way he wants you to have it, and you can't escape it by knocking wood after bragging about your luck, so wait and hope, it's coming to you.

"Bake's" luck in endurance runs is bad this season; see where he went out of the Indiana F. A. M. run, and before that in the "Tour of the Jack Pines" he had to become a spectator.

He copped in the Worcester 24 Hour and the National F. A. M. contest though, so his batting average is .500 so far as that.

Say, that was a good article about "Brakes," by Geo. M. Johnson, wasn't it. Gosh, we do take chances with them out of kilter. Saw a lad come near getting his on a bad grade a couple of Sundays ago from brakes slipping. He sure was headed for destruction until his quick wit saved him.

What effect the war scare and these olive-drab colored motorcycles will have on the boys in 1917 is not known at present, but take it from me, fellows, that hue mentioned above has been tested out by the government, and found to be the real color for a motorcycle. The few we have in this man's town sure take the eye of the old rider, for he is the boy who knows what real outdoor finish should be, and is over being hypnotized by bright nickel finish and pretty but not practical colored enamel. Primarily, the motorcycle is a machine for service; consequently its color should be in keeping.

This is a good time to join the American Legion. If you want to help Uncle Sammy and still don't care for a foot-slogging job, you can get in line for service in Mexico with a motorcycle—if Old Boy Carranza happens to kick up again.

The Legion will enroll you and keep your name and occupation on file for army reference. Each man is listed according to his calling or natural tendencies, and if there is anything doing in the motorcycle line your name will be sent in and you will have a chance to see action.

It's worth looking into, anyway. Address your letter to the American Legion, 10 Bridge street, New York, They'll tell you the hows and wheres.

FEATHERWEIGHT FOUNDATION OF BUSINESS SUCCESS

THE motorcycle has transformed Frank C. Alvos, of Zelzah, from a renting rancher into a business man, a hustling contractor. Alvos was renting land which he had planted to sugar beets, doing his own tilling and living in a tent. He bought an Indian featherweight and worked up a newspaper route which brought him an income of $75 a month, while he was waiting for his beets to ripen.

The big returns from speedy transportation gave him an idea. He got a contract for hauling beets, hired wagons and men, and put them on the jot at harvesting time. To make maximum returns he supervises loading and unloading, including the weighing of the beets and the weighing of the dirt, which is taken out and deducted from gross figures. Riding back and forth on his Indian Featherweight enables him personally to supervise at both ends.

AUSTRALIAN FIRM WANTS BEARINGS

NEW YORK, Aug. 28.—An engineering firm in Australia informs the American Consulate office of its desire to be placed in direct touch with manufacturers of ball bearings. Firms interested in this export opportunity can obtain further information by addressing the Bureau of Foreign and Domestic Commerce, Custom House, New York, and referring to opportunity No. 22,248.

WALD COMPANY IS BUILDING

SHEBOYGAN, Wis., Aug. 29.—The Wald Manufacturing Co., which manufactures an extensive line of motorcycle and bicycle accessories, is breaking ground for a 80 x 100 addition to the present factory on Eighth street, which is expected to increase production facilities about 300 per cent.

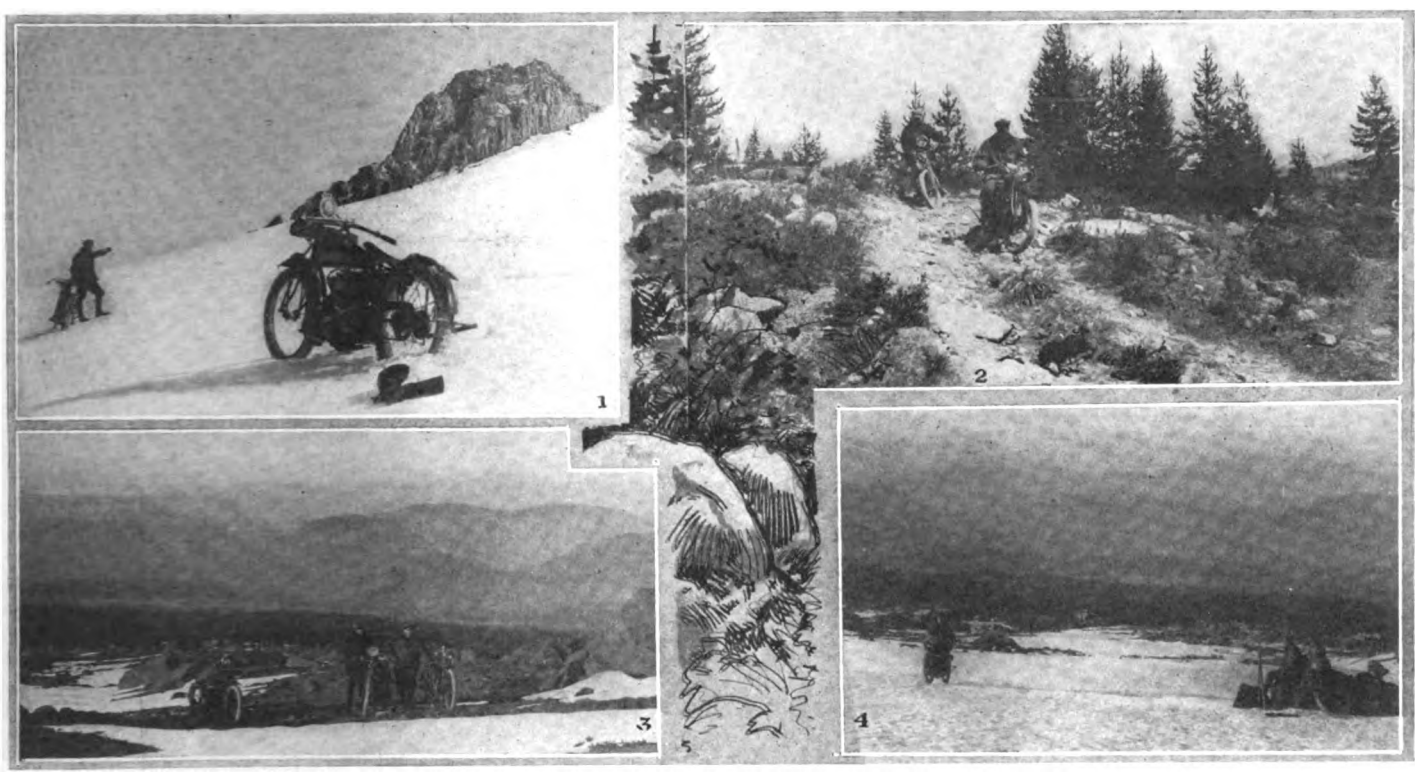
TRIO TAKES FALL OUT OF MT. HOOD RECORD

Messrs. Kurtz, Carlson and Rice Climb 9,000 Feet, Adding 200 Feet to Former Motorcycle Records—The Trip was No Pleasure Jaunt



1, Just Before the Last Spurt for the Summit—Henry Kurtz and Machine in Background; 2, Road Between Government Camp and Emergency Camp; 3, Snow Line on Mt. Hood, Showing Rocks Which Made Riding Dangerous; 4, Kurtz Riding the Frozen Crust

PORTLAND, Ore., Aug. 21.—Henry Kurtz, Edward Carlson and Burgess Rice have established a motorcycle altitude record; that is, insofar as Mt. Hood is concerned. The former record of 700 feet held by Axel Kildow, who realized that height in August, 1914, on a Dayton machine, was bettered yesterday by some 200 feet by this trio of Invincible Indian hill climbers on their Powerplus machines.

The new record holders left Portland at 5:15 p. m., Saturday, August 19, 1916, and arrived in Government Camp at 7 p. m., a distance of 60 miles. They rested for a few hours and started at 2 a. m. from Government Camp for Emergency Camp, a distance of about 4 miles; and, as explained by Mr. Carlson, it was the toughest 4 miles he had ever ridden, being one continual mass of big rocks and boulders. The riders left Emergency Camp at 5:15 a. m., and for 4 hours they fought with the steep grades and deep snow, reaching the final goal of 9,000 feet at 9 a. m.

Return Trip Difficult

The return trip to Government Camp was very difficult, as the sun had melted the hard crust on the snow, and in some places the machines and riders almost buried themselves. The boys arrived in Government Camp at 11:30 a. m., hungry and all in, but just in time to sit down to one grand chicken dinner, for which Mr. Pridemore would accept no pay, saying that it was an old-established custom to treat when a new record is established.

Mr. Pridemore, together with 50 other people, watched the cyclists make the ascent through telescopes and field glasses, and were loud in their praise of the power of the machines and the riding ability of the riders.

The party arrived in Portland at 4 p. m. Sunday, and all three of the Indian three-speed machines were in a perfect mechanical condition. No trouble of any kind hindered the riders.

MERCER WINS SEATTLE ENDURANCE

Makes Best Score of 970 Points on Indian in 604-Mile Grind Against Field of Twenty-three

SEATTLE, Wash., Aug. 21.—Beating out a field of 23 riders, several of whom fainted and were unable to continue the gruelling run, Fred W. Mercer of Seattle and his 1916 Powerplus Indian, won the 604-mile endurance run from Seattle to Oregon cities and return.

The start was made from Seattle, the run being under the auspices of the Seattle Motorcycle Club. From Seattle the riders proceeded over Snoqualmie pass into CleElum, Ellensburg, North Yakima and Goldendale over the Sadas mountains. The temperature most of the time was 100 degrees in the shade. Several riders fainted while going over the Sadas mountains.

To Hood River

From Goldendale the run was made to Hood river and the Dalles, where the riders remained over night. The return tour was made via Portland, Vancouver, Tenino, Olympia and Tacoma.

Only four riders completed the run, Mercer and his Indian being accredited with 970 points out of a possible 1,000. At no time on the trip were the riders permitted to adjust their mounts.

MANY MEETS FOR COLORADO AT COUNTY FAIRS.

DENVER, Colo., Aug. 28.—During next month motorcycle riders of this state expect to do a good deal of riding in different races held at county fairs that are to be held in Colorado. At the Arkansas Valley Fair, which will be held at Rocky Ford, Colo., Sept. 5, 6, 7 and 8, motorcycle races will be held and already some of the fastest riders in the state have signified their intentions of entering. Motorcycle racing has become a very popular sport in Colorado.

MOTOR WHEEL FOR FENN

BLOOMINGTON, Ill.—E. E. Fenn, of 618 North Main street, has taken the Smith Motor Wheel agency, and to date has delivered six of the little boosters. He also has the agency for the Pope, Iver Johnson and National lines of bicycles.

Advantages of All-Weather Finish

In Addition to Retaining the Appearance of a Motorcycle It Prevents Rust and Eliminates Accidents Due to Reflection from Polished Surfaces—Stove Polish for Cylinders

By L. E. FOWLER

UP to the present, the all-weather finish supplied as an option on several motorcycles has not achieved the popularity it deserves. If the new rider was to look into the class of motorcyclists using this black finish, he would find that the majority are veteran riders and those whose mounts are in use all of the time.

There are several reasons for using the all-weather finish. First, the number of metal parts exposed to the action of the elements is reduced. This in itself is important, for while a nickeled machine when new looks very attractive, unless a good deal of care is taken, the plating soon gets dull and rust spot begin to show up.

Where Rust Is Serious

In some places these rust spots mean more than simply a marring of the appearance of the machine. Take, for example, the hub end of the wire spokes. Moisture is bound to collect at these unprotected places, a spot of rust makes its appearance and it is only a question of time before the spoke gives way at that point.

I have heard but one objection to the all-weather finish, and that is, that it loses its brilliancy. This I admit, but a very slight care, much less than is required to keep nickel polished, will keep both the all-weather finish and the enamel on the machine looking fresh and brighht. Liquid Veneer, Johnson's Wax and like preparations will all accomplish the result desired.

When Machine Is Sold

There is another viewpoint in this comparison which will mean dollars and cents in the rider's pocket. This is when the machine is to be sold. The following experience will make this clear: Remembering that the reflection of the sun on my speedometer head had nearly blinded me on several occasions last summer, I decided to make it black. I had a can of stovepipe enamel in my workshop and used it, as it was practically the same as the enamel used on headlights. So I gave the speedometer head three coats, and the results were satisfactory. It was an air-dried job, of course.

Several days later I noticed two machines standing in front of an agency. One had a lamp which had the enamel baked on, while the lamp on the other machine had obviously been air-dried. The comparison was so marked that I spoke of it to the owner of the air-dried lamp, and his answer set me thinking. "Yes, I thought that lamp looked fine when I did it, but when you stack it up against a baked job it shows up the difference. I am going to get a baked job done right away."

Using Kitchen Range

I thought over several schemes, when it suddenly occurred to me that the oven in the kitchen gas-range was large enough to bake any of the accessories that I wanted to enamel. So I tried it out, and had the oven too hot the first time, and left the work in too long. The result was poor, indeed.

I was convinced, however, that it could be accomplished, and after some experimenting I found that if I maintained only a moderate heat and left the job in about 30 minutes the results were equal to those produced by the factory. It took three coats of enamel to attain the desired depth and each coat was baked separately.

Take Out Working Parts

But, here's a word of caution before starting in. Remove the interior of the speedometer heads, reflectors, lamp-glasses and other things of a fragile nature. I didn't, and it cost me close to $5 for the things I burned up during the first operation. Cool off gradually, either by reducing the heat in the oven or as follows:

With the objects hanging from the wire grill in the oven, when the 30 minutes are up, open the oven door for five minutes. Then slide grill partly out so that the objects hang in front of the oven. Leave them in this position for about five minutes and then remove them to some other part of the room to regain their normal temperature. If the objects cool too quickly the enamel cracks. Experiment on a tin can and see what good results you get.

Now, getting back to the all-weather finish; there are not many of us who can renickel a part satisfactorily at home. We can, by using the process described above, refinish any part of the machine within the capacity of the oven, for the enamel of the frame can be treated in the same manner.

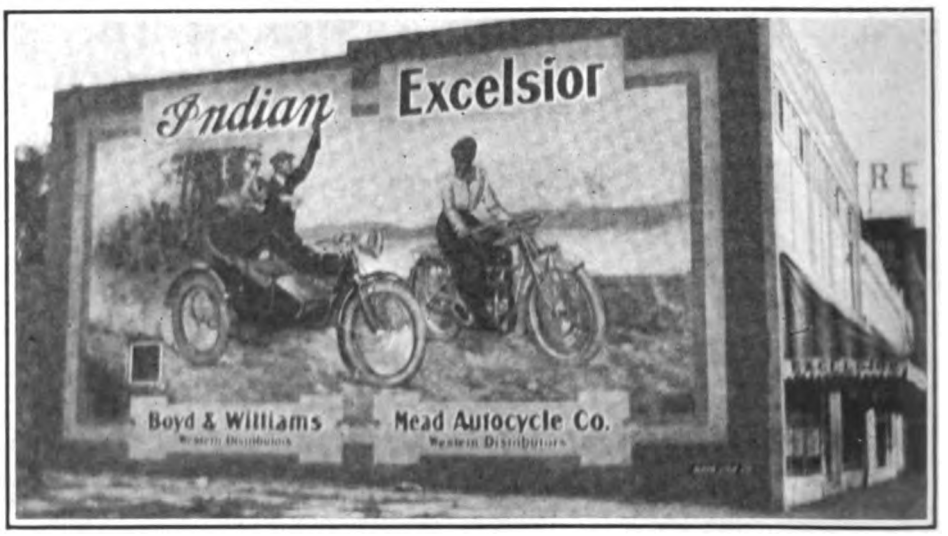
Getting Better Results

While I used the enamel named, it may well be that a regular baking enamel will produce even better results. It is not expensive and a pint will do all you can think of and leave enough extra to paint a certain well-known automobile. Don't confuse this enamel with stove polish, for the results will not be satisfactory at all.

Speaking of stove polish, this has a place of its own on the motorcycle. Stove polish is a substance which is mixed with either turpentine or water, and dries out a dull black. It should be used on the cylinders, exhaust pipes and muffler. There is a well-known law of physics that a dull black surface radiates heat better than a light colored polished one, and I have never understood why some motorcycles were produced with nickel-plated cylinders and exhaust pipes.

Should enamel be used on heat-radiating surfaces the results will be worse than ever. The enamel holds the heat in confinement. In other words, polished surfaces reflect and dull surfaces radiate heat.

IS DENVER THE CITY OF BROTHERLY LOVE ?



DENVER, Colo., Aug. 26.—Something unique in the way of co-operative advertising has made its appearance in this city. Boyd & Williams, western distributors for the Indian and the Mead Auto Cycle Co., who do that same little thing for the Excelsior, have built a new building at 1332-38 Broadway this city, each occupying half.

On the north side of this building has just been completed a pictorial advertisement shown in the photo. This sign is in plain view of all passing on Broadway, one of the most travelled thoroughfares in this city, and so the Indian and Excelsior machines will receive a great deal of advertising. The sign is done in colors and the figures and machines appear very true to life, and is attracting a good deal of attention from those passing the stores.

GRAND RAPIDS MEN MAKE FIVE-STATE TOUR

GRAND RAPIDS, Mich., August 28.—Two local riders, Arthur Clement and Arthur Mohnenke, mounting an Excelsior and a Harley-Davidson respectively, have just wound up an eight day endurance trip which took them into five different states after they left Michigan. Neither rider kept track of the number of miles traversed but they claim to have averaged 200 miles a day, which would mean about 1,600 miles in all. They carried a camping outfit and slept out all the time, never stopping at a hotel, and cooked the majority of their meals.

Leaving Grand Rapids they went through Ohio into West Virginia and Pennsylvania and back into Indiana and Illinois. They shipped via boat from Chicago to Grand Haven, Mich., and then finished the rest of the trip. Practically no tire or engine trouble was experienced by either rider and they enjoyed perfect weather from the start.

GOOD CROWD ENJOYS RUN TO MARTINEZ

SAN FRANCISCO, Cal., Aug. 21.—The run of the San Francisco M. C. to Martinez, yesterday, was well attended, the members going on 24 tandem outfits and seven sidecar combinations. The route lay along the Bay shore from Oakland, through West Berkley and Richmond and then through the hill country facing San Pablo Bay. Porta Costa, at the end of Carquinez Strait, was passed early in the forenoon. The party reached Martinez shortly before noon and had luncheon.

After eating, the party spent a couple of hours looking around the town and then started for home. The members divided, some taking the inland road by Concord, Moraga Valley and into Oakland by the tunnel, while the rest returned the way they came. Following the custom for the last few runs, most of the riders went for a short swim in the Lurline baths before going to their homes. Social runs of this nature are to be held every Sunday hereafter.

SOME SIDELIGHTS ON M. C. ACTIVITIES AT WHEELING

WHEELING, W. Va., Aug. 28.—The Wheeling M. C. staged a pleasure run with endurance-run features yesterday, Sunday, August 27. The affair was open to all riders, and 25 turned out for the day's sport. The winner showed up in the person of Carl Glasser, secretary of the club, who rode home with the tire donated by Earl Braunlich, the local Harley-Davidson dealer, under his arm. Braunlich made the best consistency score of the day.

On last Thursday night the club gave a corn roast at the White City camp on the Ohio River to club members and their lady friends. The real fun commenced with a corn-eating contest, and Arthur Drummond proved that he had the best appetite for Indian maize by devouring 14 ears, as against 11 made by his closest competitor.

DIXIE ENDURANCE SCORES UP TO DATE

ROANOKE, Va., Aug. 21.—A recast of the checking sheets of the annual endurance run of the Dixie M. C. brings out the winner in the person of Herbert Webb, on an Indian, who made a score of 731 points; Webb rode in the professional class. In the amateur class W. B. Hines was the high man, with a score of 654 points. The runner-up in the professional class was M. Monefee, with 372 points, while J. H. Hollins came in third. Menefee rode a Harley-Davidson, while Hollins was astride an Indian. Other finishes were I. A. Davis, Harley-Davidson; T. R. Webber, Indian; and C. H. Hudson, Indian. Fifteen started in the run, which proved a heart-breaker.

ASHLAND CLUB'S OUTING

ASHLAND, Wis., Aug. 29.—What proved to be the most delightful outing that the Ashland Motorcycle Club has ever had was the tour held down the state road to Mellen and then on to Lake Gallilee and return.

Looking Down the Stretch

September 1, Carthage, Mo.—Motorcycle race in connection with Jasper County fair.

September 2 and 3, Columbus, O.—F. A. M. National Championship meet at Driving Park, auspices of F. A. M. Racing Association.

September 3, Harrisburg, Pa.—Endurance run of the Keystone M. C.

September 4, Lima, O.—Race meet under the auspices of the Lima M. C.

WARNER WINS MEMBERSHIP APPLICATION PRIZE

WESTBORO, Mass.—Secretary-Treasurer G. B. Gibson, of the F. A. M., announces that Paul Warner, of Ellsworth, Kans., has been awarded the prize for the greatest number of applications sent in during the week of August 21. Warner sent in 12 applications for membership.

To C. E. Whitcomb, of 14th and Chestnut street, Kansas City, Mo., is given the prize for the week of July 18-22. Secretary Gibson states that as not more than four applications were received from any one man during the week ending August 20, he has decided not to award a prize for that period.

VAN ON WAY TO METROPOLIS

CINCINNATI.—Another doughty Excelsior rider has started East, this time under unusual conditions. Rowland Van is the rider, and he is bestriding a "17-X," the newest and biggest machine of the Big X list. What is more, he has a side-car attached, with a passenger. He intends to make New York at least, and probably Boston.

NOW HE'LL BUY A LOCK

LA GRANDE, Ore., Aug. 25.—Charles Roberts, ex-president of the La Grande Motor Club—father of the famous "Speed 'Em Up" races—sweat blood for two days when he left his Harley-Davidson sidecar machine at the O.-W. depot as is his wont while executing his duties as night chief dispatcher, and someone stole it. Police and sheriff wires burned up nearby towns, but with no avail. Two days later the machine was found in a private garage in the west end of town, jammed in behind an automobile.

NEW YORK REGISTRATION FIGURES

ALBANY, N. Y., Aug. 24.—Some 21,470 motorcycles had been registered in New York state up to and including today. Of the number, 7,095 were registered at the New York office, 6,547 at the Buffalo bureau and the remainder at the local office.

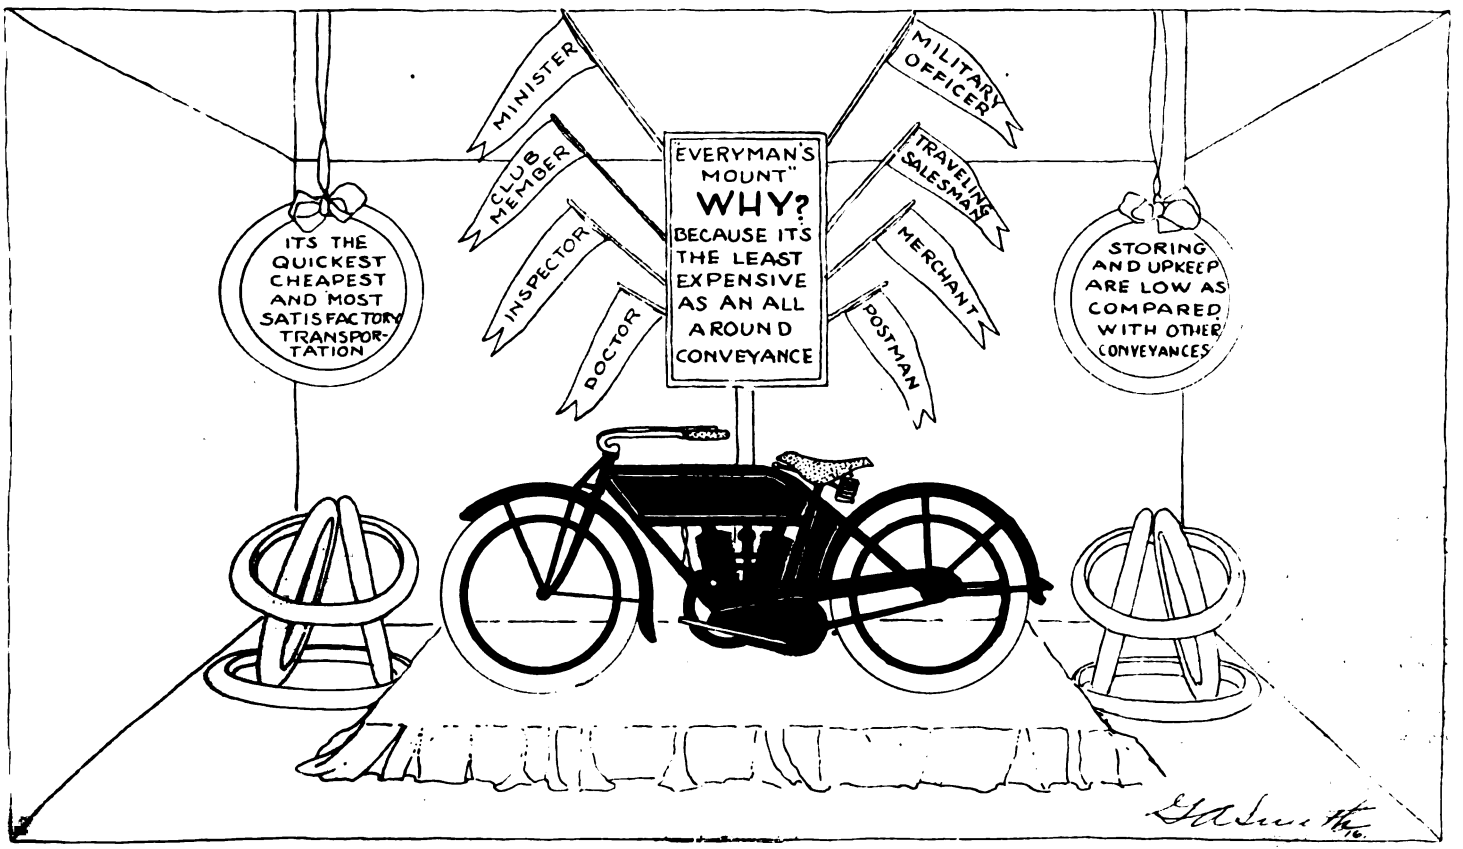
SIMPLE METHODS OF OBTAINING WINDOW DISPLAY IDEAS

Many Articles Appearing in Trade Press Suggest Attractive and Inexpensive Designs

By G. A. SMITH

In Charge of U. S. Rubber Company's Window Displays



Window Display Which Can Be Made From Materials at Hand; Description on Following Page

AFTER careful consideration of the window display problem, as applied to motorcycle dealers, I have arrived at the conclusion that most dealers fail to use their display opportunities because they lack the time, and perhaps the inclination, to work out suitable ideas. The obtaining of window display suggestions seems to be somewhat outside their range of interest, and as a result they overlook some of the most important sales points in their business.

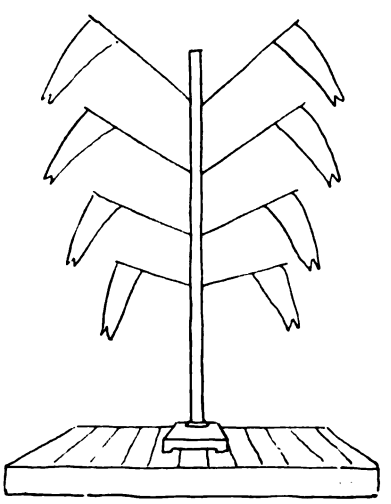
While conversing with a dealer in the Metropolitan District last week, I brought up the subject of window displays, and asked him why it was that he overlooked the best advertising medium within his grasp. He seemed somewhat surprised when I referred to the way he was throwing his business chances aside, and argued that he was making the best of the situation.

Results Not Satisfactory

"In the first place," said the dealer, "I have no time to use in fooling around with window display matters, and another good reason why I do not devote special attention to my windows is that I lack ideas for designs and don't know where to get them. In many cases I would be willing to decorate my window if I felt that I was able to put a real punch in it, but the results I have obtained in the past have not satisfied me very well."

That dealer believed he was giving a good excuse for failing to have attractive windows, but as a matter of fact his explanation was a very poor one. By applying himself to the proposition intelligently he could certainly have made a vast improvement in the appearance of the front of his store.

While the dealer may believe that his inability to work out window designs is really a serious obstacle, it is, in my opinion, a very trivial one. The dealer I have just referred to was not a subscriber to any motorcycle trade paper and I pointed out to him that his failure to keep closely in touch with the trade press explained, in a large degree, the difficulty he experienced in getting window display ideas. **Motor Cycle Illustrated**, for instance, has been conducting this department regularly for some time past, and any dealer who keeps up with it will certainly obtain many suggestions of value. I happened to have a copy of **Motor Cycle Illustrated** with me which contained one of my articles on window display helps for the dealer, and I succeeded in convincing friend dealer inside of five minutes that the sketches and suggestions offered in this department would have enabled him to arrange his show window to excellent advantage, and with a very small outlay of time and money.



Securing Pennant Sticks in Upright

On the Right Track

"Well, that department looks pretty good to me," said the dealer, "and it is really the only thing of the kind for motorcycle dealers that I have ever seen presented. We motorcycle salesmen are pretty busy fellows, and in order to interest us the layout for a window display must be simple, attractive and inexpensive. I believe you are on the right track, and that you appreciate these points. With your assistance I am going to install one of the window designs that you suggest, and if I can see that it gives me reasonable returns I will certainly keep it up in future."

The dealer kept his word, and when I passed his store a day or two later the

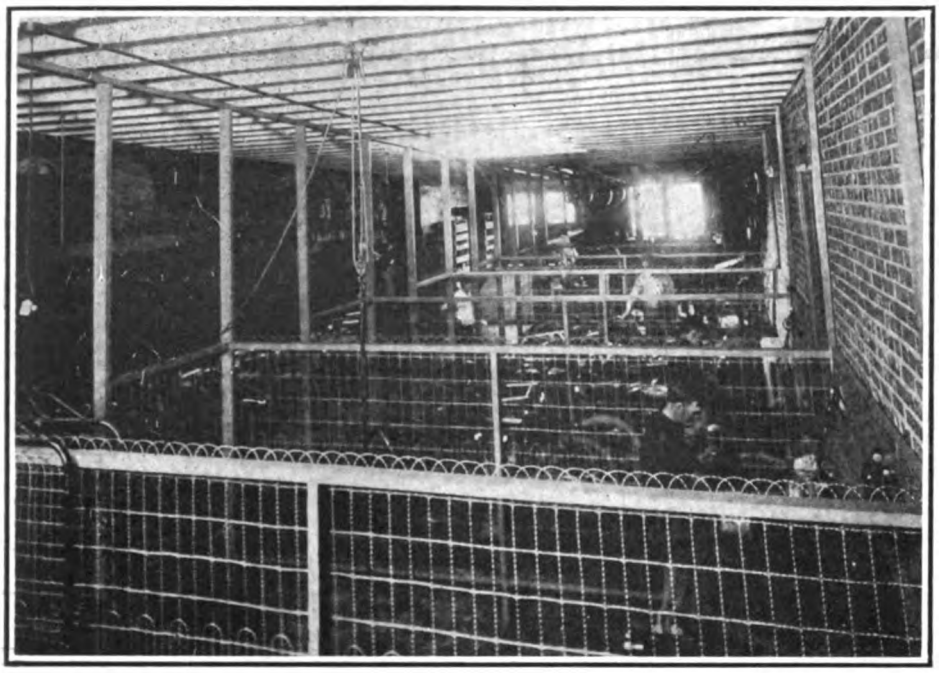
WELL MANAGED REPAIR SHOP IN DENVER, COLO.



Interior of Repair Department of Boyd & Williams Showing Compartments in Which Work Can Be Performed Without Interference. The Indian Is Handled

entire front of the establishment appeared to have undergone a change. It was 50 per cent brighter, and no man at all interested in cycles could have passed it without giving it an inspection. In the course of a week our friend the dealer heard so many comments concerning the increased brightness of his window that he was completely won over to the window improvement campaign, and I'll wager that from now on his show window will be a real asset.

In addition to taking a year's subscription for **Motor Cycle Illustrated,** this dealer shook my hand and thanked me heartily for the suggestions and co-operation I was able to give him. There is no reason why hundreds of other dealers throughout the country cannot be brought to view the situation from the same angle; it is only a matter of showing the dealer that he is wasting money, and nullifying one of the strongest pulling factors of his business when he overlooks his show windows.

A Simple Matter

Getting back to the subject of securing ideas for window displays, it is really a very simple matter for one who goes about it intelligently. The sketch which accompanies this article is direct proof of my claims. If you will refer back to the copy of **Motor Cycle Illustrated** of April 27, you will find on page 35 an article that is the basis of this sketch. I read that article and immediately saw that the idea it embodied could be employed excellently in the preparation of a window design. Dealers who read **Motor Cycle Illustrated** carefully, and I take it for granted that most of them do, should be able to find many similar suggestions which will enable them to work out attractive window designs.

The accompanying sketch is very simple in make-up. It requires little or no actual outlay of cash, and can be completely arranged in an hour or two. Just make up your mind to try out what I am telling you, and you will find that the work is easy and pleasant.

To install this display all that is required is a low platform, which may be made from the crate in which the motorcycle is shipped. Rough boards may be secured to the top of it, over which a covering of suitable material may be placed.

Upright the Basis

A narrow upright, suitably painted, may be placed at the back, and this serves as a basis upon which the large sign can be arranged. Narrow wooden sticks, painted to match the center upright, are shown in a fan-shaped arrangement at each side. Tacked to the end of each stick is a pennant, cut from cardboard, on which the names of the different possible motorcycle users are painted.

A motorcycle tire is suspended from each side, with wires attached to the ceiling of the window; this is then covered with a narrow strip of crepe paper or cheap ribbon, and a piece of cardboard is fitted into each tire to carry the wording as shown. Four tires are arranged on each side of the layout, and accessories can also be displayed in connection with the general design by placing them on the floor of the window or the platform.

The smaller illustration shows the method for securing the pennant sticks to the upright; holes are bored in the sides of the upright to receive the sticks. This general idea provides a window display that is cheap and highly attractive.

I shall be glad to take up any detail in question that you may wish to ask through **Motor Cycle Illustrated.**

SHOWY SET PIECES

WE CAN all recall the time when entire backgrounds—temporary affairs—were constructed at an expenditure of considerable time and money. Many times it would take weeks to plan and construct a setting that, when finished, was a conglomeration of a little of everything and not much of anything.

Nowadays the more progressive men choose the simplest sort of treatment which, in the end, is not only the most impressive, but practical as well. This is the new note in window trimming and judged from the standpoint of economy it is desirable, not alone because the cost is low, but because the same design may be utilized time and again in different arrangements in the window or in the store.

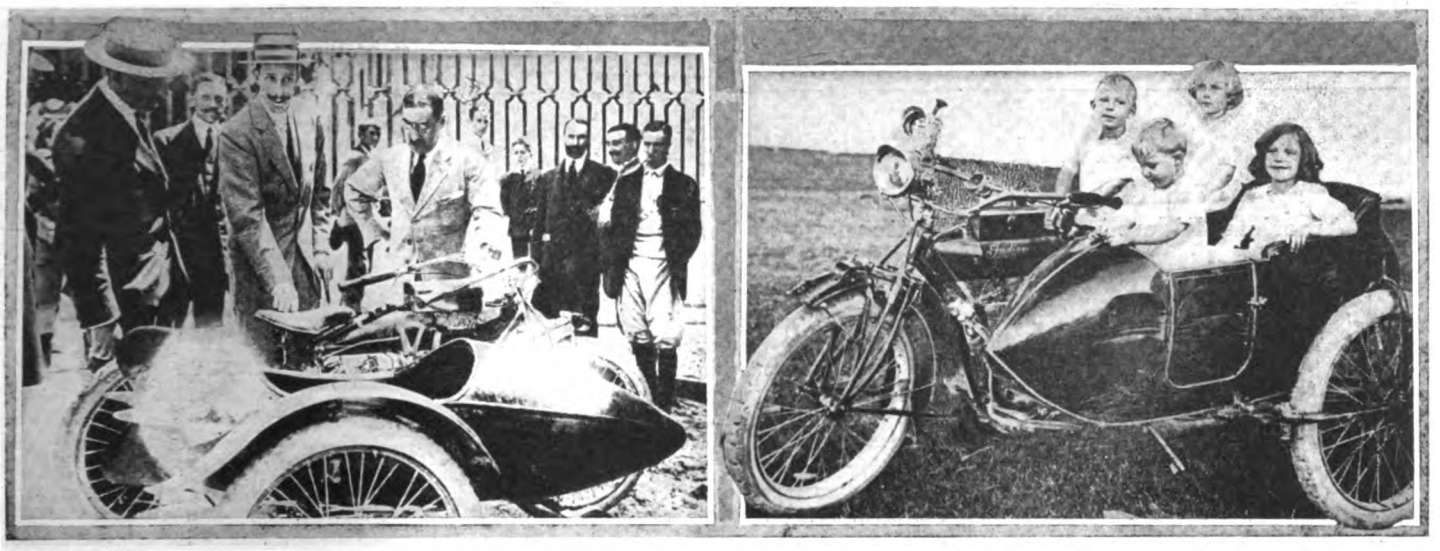
SPANISH RULER ADMIRES NEW INDIAN MACHINES



MADRID, Spain.—The important part that motorcycles have played in the present European war has led to unusual interest being taken in them by rulers in various countries, and particularly, in those States not engaged in the great struggle. His Majesty, Alfonso XIII., King of Spain, known for his interest and personal participation in all sports, recently made a thorough inspection of new Indian motorcycles at the royal palace, accompanied by his staff.

Sr. Julian Olave, the Spanish general distributor for the Indian, had an Indian sidecar combination brought to the palace for the royal party's inspection and was highly delighted when the King expressed his high appreciation of the machine's performance and its mechanical perfection. A rider put the outfit through its paces, and also took the four royal children for a drive.

MILWAUKEE CLUB PLANS MATURING

Merger of All Motorcycle Bodies in City Nearly Consummated—Journal Tour Under Way

MILWAUKEE, Wis., Aug. 29.—With the reorganization plans for a greater Milwaukee M. C. now under way this city will have a representative motorcyclists' organization that will be one of the best in the country. Vice-president Paul Bruess, E. J. Mueller, F. B. Rodger and Secretary Hugh Sharp of the Milwaukee club had a conference with a committee comprising Wallace Wrede, Henry Reimer, Lewis Peterik and F. J. Strachota, representing the contemplated south side organization, with the result that a conciliatory arrangement was affected whereby the prospective members of the club which was to have been formed will join the old Milwaukee club and form one big fraternity for the benefit of motorcycling in this vicinity.

Club in New Quarters

The local club has given up its pretentious quarters on the western outskirts of the city, due to the fact that most of the members wanted a down town location. Excellent quarters have been secured at 221 West Water street, opposite the Empress theater, and next to the *Daily News* office.

At the time this issue goes to press most of Milwaukee's motorcycledom is taking in the fourth annual Goodfellowship tour of the Milwaukee Motorcycle Club, being held Saturday, Sunday and Monday from here to the famous Wisconsin Dells at Kilbourn, about 140 miles from Milwaukee. Saturday and Monday will be spent in travel to and from the Dells, while Sunday is being devoted to a day of outing. The tour is one of the biggest that the club has ever sent out of Milwaukee.

Leo Lippow has been appointed Thor dealer for Milwaukee county. He will handle Thors and Hendersons for the 1917 season.

Neat Lady Riders from Schenectady, N. Y., and San Pedro, Cal.

Ernest Miller has purchased the fixtures, stock and will operate the store formerly occupied by M. Bernstein at Fourth and Chestnut streets as a branch of his main store at 514 Twelfth street. "Ernie" has built up a wonderful business in the sale of second hand machines, exclusively up to this season when he took on the Cleveland lightweight. The increasing number of these popular lightweights being seen around Milwaukee streets testifies the enthusiasm of Mr. and Mrs. Miller over the lightweight as a mount for the city and the feminine rider.

MORE ROADWORK FOR OHIO

COLUMBUS, Ohio.—The Ohio Highway Commission will open bids August 31 for the improvement of 32½ miles of highways in about a score of counties in the Buckeye State. The cost of the work covered in the 16 contracts is estimated at $381,016.06. The commission August 17 opened bids and awarded contracts for the improvement of about 75 miles of roadway in about thirty counties. In every instance the specifications provide that the contract is to be completed this year. With the award of the latest contracts the road improvement in Ohio in 1916 will total nearly $7,000,000.

MOTORCYCLE COPS GUARD HUGHES

SAN FRANCISCO, Cal.—Special precautions against anarchistic demonstrations were taken by the police in this city during the presence of Charles E. Hughes, Republican candidate for president, and one of these was the appointment of the motorcycle squad as Mr. Hughes' bodyguard. Corporal John Speck, of the traffic squad with two motorcycle patrolmen, acted as escort to the distinguished visitor during his travel through the city.

TOURING PRIVILEGES ARE RECIPROCAL

Canada Now Gives From Ten to Thirty Days' Free Period to American Riders and United States Allows Twenty-One

TORONTO, Ont.—At last there is complete reciprocity in license recognition between Canada and the United States. One step has followed another within the past year until now the boundary between the two North American nations is less than an imaginary line so far as internationally touring motorcyclists are concerned. The latest move in this game of privilege granting, in which the governments have, apparently, essayed to outdo each other, has been taken by the United States Department of Customs. This department, according to the announcement just made, has notified its custom officials along the Canadian border, to extend the non-bonding period for non-resident tourists from ten to thirty days.

This means that Canadian riders can tour in the United States for a period not extending beyond thirty days without duty consideration or restriction. In exchange for this courtesy, the Canadian Department of Customs has already granted American tourists the privilege of staying in the Dominion for twenty-one days without regard to duty on machines.

As previously announced, motorcyclists of practically all states are also at liberty to tour in Ontario as well as other Provinces for twenty-one days without being compelled to take out a local license, the exception being that the riders of Rhode Island can stay in Ontario for ten days because of the narrower reciprocity.

It was expected that the American government would grant a duty-free touring period of twenty-one days to coincide with the time limit established by the Canadian authorities. The Department at Washington made it nine days longer. The feeling is that the Canadian government will "raise its ante" to meet the privilege granted by Washington.

USE OF TWO-WHEELERS IS INCREASING AT FRONT

TORONTO, Ont.—The wider adoption of motorcycles and bicycles by the Canadian Expeditionary Force for service at the front is told in latest advices from overseas. The two-wheelers have been generally used by despatch-carriers since the outbreak of hostilities, but the Canadian Signalling Companies now have many motorcycles and bicycles in their equipment. The Fourth Divisional Signalling Company, for instance, has the following: 17 motorcycles, 40 bicycles, 104 horses and 8 cable wagons, as well as the usual supplies of telephone apparatus and other signalling devices. The motorcycles and bicycles are used for the establishment of lines of signalling stations and for the inspection and repair of communication wires under shell and rifle fire. The work sounds interesting.

LONDON M. C. TO REORGANIZE IN AUTUMN

LONDON, Ont.—After losing many of its members through enlistment with the Canadian Expeditionary Force, the London Motorcycle Club is now leaderless, its president, Al. Gatecliff, having gone overseas with a recent Canadian unit. A reorganization of the club will be made before the Fall season is reached.

The fighting members of the London club are now scattered to the four winds. Some are in England; others in France; one is at Salonika and another is in British East Africa where he is driving a mechanical transport for General Smuts. This fighting nomad is Bert Johnston, one of the club's best hustlers. William Tite, the vice-president of the club, is with the mechanical transport section, army service corps, in Europe.

William and Ernie Risler, of London, have just completed their annual tour around Lake Erie. This has been their touring specialty each Summer for several years. They were able to cross the International boundary line this time at Niagara Falls and Windsor without hesitation on account of the new license and duty regulations.

NEW REGISTRATION RULE FOR NOVA SCOTIA

HALIFAX, Nova Scotia—A change is expected to be made in the Motor Vehicle Act for the Province of Nova Scotia wherein it provides for the yearly registration of motorcycles. The registration clause calls for the payment of $2 for the first year's operation of a motorcycle and the charge for succeeding years is $4 per annum. This is a reverse of the usual order of procedure, it is considered, and an amendment will be made at the next session of the local house which will place the license fee at $4 per year from the start. This is not considered an excessive fee in the Province.

All licenses are renewable in Nova Scotia in August and this arrangement has been acceptable to only a portion of the riders as many of them secure new mounts only two or three months before the date necessary for the taking out of a new license. The proposed amendment to the act will provide, it is declared, for the payment of a part fee for machines registered shortly before the end of the license year. The proportion of this fee for the short period has not yet been determined.

THREE-MILE HANDICAP FOR MILITARY MEET

TORONTO, Ont.—As a result of a popular demand, a three-mile bicycle handicap has been added to the list of events for the Canadian military championships to be held on Saturday, September 9, at the Exhibition half-mile track. This meet will form the closing feature of the Canadian National Exhibition.

NATIONAL CHAMPIONSHIPS FOR DANVILLE, SEPT. 15

DUNNVILLE, Ont.—Final arrangements are being made for the holding of the 1916 National Championships of the Canada Motorcyclists' Association at Dunnville, Ontario, on Friday, September 15, when the riders of Toronto, Hamilton, London, Welland and other centers will fight it out for the honors. It is understood that motorcycle racers from across the border will be permitted to start in the titular contests which will be held on the half-mile dirt track here.

The very best prizes ever given at a motorcycle race-meet have already been provided for the events. Entries are being received by F. A. O. Johnston, president of the Canada Motorcyclists' Association, 106 Adelaide street, West, Toronto. The Dunville speed carnival will be the only big thing in Canadian motorcycle circles, this year.

FUEL FIGHT STARTS IN DOMINION TRADE

OTTAWA, Ont.—The gasoline fight is on in Canada, according to a declaration of war made by the incorporators of a three million dollar concern which has been formed, it is announced, for the purpose of producing naphtha under the Charles J. Greenstreet patents. The name of the new company, which has been given a Dominion charter, is the Canadian Gasoline Corporation. It promises to provide a high grade fuel at low price. Incorporation and patent matters have been handled by Charles H. Riches of Toronto.

ANLAUF AND BOONE DO WELL IN ANAHEIM

ANAHEIM, Cal.—M. G. Anlauf, Indian and Excelsior man here, sold four Powerplus models and five Excelsiors during the month of August. Anlauf's shop is full of repair work these days and the goose hangs high.

W. H. Boone handling the Harley-Davidson, states that for the first eighteen days of August his sales of new machines total one three-speed twin Harley-Davidson, two sidecars and one Cleveland lightweight. Second hand machines are in demand, but Boone cannot always get what he wishes in that line.

WAUGHOP CLAIMS NEW 24-HOUR RECORD

HACKENSACK, Aug. 24.—C. W. Waughop, of the Cleveland, reached here at 8 o'clock yesterday morning on his light weight machine, having covered the distance of 425 miles from Albansse, Vt., to this city within 24 hours. Waughop rode all day and all night, stopping merely to replenish his gas and oil supply and to eat. He claims that he has established a new 24-hour record for motorcycles, and it is certain that for the lightweight at least, he has beat all former performances. His Cleveland gave him not the slightest trouble, he claims. Waughop has been on an extensive trip which carried him from the annual F. A. M. convention at Providence throughout northern New England. He covered most of the distance on his demonstrator.

FORESTERS PLAN RACE

DOVER, N. H., Aug. 28.—The 15-mile professional open motorcycle race promises to be the feature event on the Monmouth field day program of the Foresters of America on Labor Day, Monday, September 4. The race is to be staged on a single mile oval at Granite State Park. Entries close on Saturday next, September 2.

FIVE EVENTS FOR LABOR DAY AT CAMBRIDGE

CAMBRIDGE, O., August 25.—R. E. Miller, of Zanesville, was in this city last week making final arrangements for the meet to be held on Labor Day, September 4, at the Byesville Driving Park track. There will be five events: A 5-mile open, miss and out race; 10-mile open; 7-mile open, and a 25-mile sweepstakes. A mile time trial is also slated. Prizes will be offered for all but the time trial.

The affair will be run under F. A. M. sanction and holds promise of providing sport of the fan-pleasing sort.

CRIST GETS CHICAGO HENDERSON RIGHTS

Veteran Dealer Purchases Stock of Motor Sales Company and Control of Territory for Detroit-Made Four-Cylinder Machine

CHICAGO, Ill., August 26.—R. C. Crist, the veteran dealer, has purchased the distribution rights for the Henderson for Chicago and vicinity, from the Motor Sales Company, of which Fred Huyck and C. E. Way were owners. Crist has taken the entire stock of the Sales Company at par, in addition to the selling rights. He will retail the Henderson at all his branch stores throughout the city.

Huyck for Manager

In addition to selling direct in Chicago, Crist will also act as distributor for the Henderson in portions of Cook County which surrounds the city. He has made arrangements with Fred Huyck to act as branch manager as part of the deal. As soon as the work of transferring the stock of parts, accessories and sundries from the present store of the Motor Sales Company is completed, the store will be closed.

Negotiations on this deal were begun several days ago. Terms on which the transfer of the rights were finally come to and the transaction was immediately completed. President T. W. Henderson, of the Henderson Motorcycle Company, stopped off at Chicago for a day when the arrangements had been practically settled, and ratified the deal, helping to smooth out little details. Crist is of the opinion that, with the new arrangement, all indications are that sales will be the greatest ever made in this section.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

CHEHALIS, Wash.—Everett Saindon & Co., doing both a wholesale and retail business, has incorporated. Catalogs are desired on automobile accessories, bicycles, lubricating oils and small tools.

OSCEOLA, Iowa.—Jarl & Gunnar have sold their implement business to Frank Wilson. Catalogs are requested on bicycles, automobile accessories and lubricating oils.

MT. VERNON, O.—W. W. Pinson has taken over the stock of Willard F. Smith & Co., and formed the Mt. Vernon Hardware Co. Catalogs on bicycles, small tools and oils are requested.

ALVA, Okla.—The Hanford Hardware Co. has been organized with a capital of $25,000. The firm will deal in bicycles, small tools and lubricating oils.

REDWOOD FALLS, Minn.—The Crescent Hardware Co. desires catalogs on bicycles, accessories, lubricating oils and small tools.

BANGOR, Me.—Choate & Simpson, newly-formed hardware firm, request catalogs on automobile accessories, small tools and oils.

AUGUSTA, Ill.—George H. Minier has purchased the business of Wayne Steinbarger, deceased. Catalogs covering automobile accessories, bicycles, lubricating oils and small tools are desired.

ORIENT, Iowa.—Haaf & Twombly have opened a hardware store here, and will handle automobile accessories, small tools, oils and greases. Catalogs on these lines are requested.

COFFEYVILLE, Kan.—The Coffeyville Exchange has started in business at 1021 South Walnut street. Catalogs are re-requested on bicycles, small tools and lubricants.

PACIFIC JUNCTION, Iowa.—Boyle & Empkie, Inc., have engaged in business and desire catalogs on automobile accessories, lubricants and small tools.

CLARENCE CARMAN IS PACED CHAMPION

Long Island Cyclist Beats Wiley, Walthour and Herbert in 50-Mile Title Race at Boston—Tim Sullivan Wins 5-Mile Sprint Race

BOSTON, Mass., Aug. 26.—Clarence Carman, the classy paced star from Jamaica, L. I., is now the motor-paced champion of America. The young Long Islander won his right to the title at the Revere Beach track last night, when he defeated George Wiley, the old title holder; "Bobby" Walthour, the Atlanta veteran, and Fred Herbert, the Fall River idol. The race was run over the 50-mile route and Carman, who won by 50 yards from Wiley, covered the distance in 1:10:28⅘.

Herbert, who was paced by Charley Turville, got off in the lead and held it for a little over a mile, when he was passed by Carman, who had Charley Stein as his pacemaker. Carman was never headed from the time he took the lead until the finish. George Wiley, paced by Rudolph Lehmann, the Swiss, rode a game race, but was not able to pass the fast flying Carman, Walthour, who had Napoleon Morin, pacing him, finished third and Herbert landed fourth place.

Tim Sullivan, the New Havenite, who is summering at the beach track, won the five-mile open for the professionals, which proved to be one of the finest sprint races staged there this season, and the finish caused plenty of excitement. Sullivan and Ned Chandler, the negro cyclist, were racing side by side in the last lap and Sullivan rode Chandler high, putting the latter out of his stride. Chandler lost out by a narrow margin, but did not lodge a protest against the Connecticut rider. The half-mile handicap for the amateurs went to John Carruthers and John Fardig accounted for the two-mile open for the same class.

Summaries:

Half-mile handicap, amateur—Won by John Carruthers, Beachmont, 115 yards; second, Clem Robinson, Boston, 80 yards; third, Frank Keenan, Revere, 70 yards; fourth, Elmer Duncan, Everett, 40 yards. Time, 58⅘ seconds.

Two-mile open, amateur—Won by John Fardig, Orient Heights; second, Frank Jeehan, New Haven; third, Fred McKenzie, Revere; fourth, Elmer Duncan, Everett. Time, 4:18⅘.

Five-mile open, professional—Won by Tim Sullivan, New Haven; second, Ned Chandler, Boston; third, Pat Logan, South Boston; fourth, Paul Suter, Switzerland. Time, 10:38⅘.

Fifty-mile American motor-paced championship, professional—Won by Clarence Carman, Jamaica, L. I.; second, George Wiley, Syracuse; third, "Bobby" Walthour, Atlanta; fourth, Fred Herbert, Fall River. Time, 1:10:28⅘.

MENUS BEDELL AGAIN SHINES

PHILADELPHIA, Pa., Aug. 27.—Menus Bedell, the Long Islander, won the 50-mile handicap motor-paced race at the Point Breeze track last night. Bedell had a start of ten laps (3⅓ miles) on Clarence Carman, the new paced champion, and George Wiley, Syracuse, who were on the honor mark. "Bobby" Walthour, the Atlanta veteran, had a start of 1⅔ miles. Carman finished second and Wiley third. The time was 1:04:56⅗.

CYCLEMOTOR BOOK IS VALUABLE TO DEALERS

COMPLETE descriptions, not only of the component parts of the Cyclemotor, but also of their operation are a valuable feature of the instruction book issued by the Cyclemotor Corporation, of Rochester, N. Y. This book, which is primarily intended for the use of dealers, is well illustrated and each operation from the installation of the outfit in the cycle frame to its conduct on the road is fully and clearly described. An important chapter is that given over to overhaul and repair.

Clarence Carman, Motor-Paced Champion of America

NEW RECORD CREDITED TO ITALIAN MADONNA

BOSTON, Mass., Aug. 27.—Vincent Madonna, the Providence Italian, defeated George Seres, the Frenchman, and Victor Linhart, the Belgian, in a one- hour paced race at the Revere Beach track last night. In the hour Madonna covered 43 miles, which was announced as a new record for the season. From the start Madonna seemingly had the race well in hand from the time he passed Seres, who finished second.

The five-mile open for the professional sprinters resulted in a fine race and the disqualification for rough riding of L. C. Rollins, of Everett, gave Tim Sullivan, the New Haven rider, the victory. Rollins, however, gave a good account of himself in the half-mile event for the cash chasing division by taking the event in a hard run race. Lewis Hill, of Revere, won the quarter-mile handicap in 27⅘ seconds from the 80-yard mark. Summaries:

Quarter-mile handicap, amateur—Won by Lewis Hill, Revere, 80 yards; second, Michael Barber, Brighton, 75 yards; third, C. J. Cardio, Boston, 70 yards; fourth, W. R. Greenquist, Revere, 85 yards. Time, 27⅘ seconds.

Half-mile handicap, professional—Won by L. C. Rollins, Everett, 60 yards; second, J. S. Grant, Lynn, 90 yards; third, Percy Cutter, Wakefield, 90 yards; fourth, Hardy Jackson, Revere, 100 yards. Time, 57 seconds.

Two-mile open, amateur—Won by Fred McKenzie, Revere; second, John Fardig, Orient Heights; third, Frank Jeehan, New Haven; fourth, Elmer Duncan, Everett. Time, 4:19⅗.

Five-mile open, professional—Won by Tim Sullivan, New Haven; second, Harold Rollins, Everett; third, Pat Logan, South Boston; fourth, Ned Chandler, Boston. Time, 11:42⅗. L. C. Rollins, Everett, finished first, but was disqualified for foul riding.

NEW ENGLAND CLUB HOLDS THREE ROAD RACES

NEW YORK, N. Y., Aug. 28.—One of the weekly series of races were held by the New England Wheelmen over the Pelham Parkway course yesterday. The first race was the six-mile weekly point race, which was captured by E. Aickelin from the honor mark. T. Urbach, starting from the three-minute mark finished second, while A. Levine, starting from the 2½-minute mark finished third and C. Eiler, 45 seconds, fourth. The time was 15:27.

The Pelham Trophy race over a course of almost a half-mile was also won by Aickelin with J. Palmier finishing in second place. Aickelin's time was 51⅘ seconds. In the third race, the one-mile event for the Tonges Trophy, Aickelin also captured first place, so taking it all in all he had a very good day. W. Sluyter, J. Boyes and E. Shindler followed Aickelin across the tape in the order named in the last race, the distance being covered in 3:09.

MORE YOUTHFUL TOURISTS

SOUTH BEND, Ind., Aug. 26.—Lawrence McCormick and Rudolph Meyer, two youthful cyclists left last week for the Pacific Coast on their bicycles. The tourists went by way of Chicago and after leaving the Windy City hit the Lincoln highway, which they will follow to the coast.
